High Tech Witchcraft

April 26, 2007

Mention witchcraft and most people will think of Harry Potter. And while these books and movies have certainly been incredibly successful in promoting witchcraft, they represent only part of a larger campaign to spread the ideas of Wicca, witchcraft, and Neopaganism throughout our society.

In a recent article in *SCP Newsletter*, Marcia Montenego talked about how witchcraft has gone "high tech." Parents should not only pay attention to books and movies. They should also pay attention to the impact that computers and the Internet are having in the promoting of witchcraft. Here are just a few examples.

1. Dungeons and Dragons — has been a popular fantasy role playing game for many years. Now kids can play it on the Internet or in video or computer games. The player begins by choosing a character to role-play. Each of these characters have different traits and abilities. The game is supervised by an experienced player known as the Dungeon Master. The game uses a number of occult terms. These include: spell casting, invocation, evocation, and summon. And there are spells such as the death spell and the finger of death.

There are several books about Dungeons and Dragons that also give information and suggestions for spell casting. In one book, there is a warning of "The Cost of Magic." It says, "Wizards may have to make terrible pacts with dark powers for the knowledge they seek, priests may have to sacrifice something dear to them to invoke their deity's favor, or the spell-caster may pay an immediate price in terms of fatigue, illness, or even a loss of sanity."

2. Magic: The Gathering - is a fantasy trading card game

created in the early 1990s. The cards are linked to one of five kinds of paranormal magic: red, blue, green, white or black. Players assume the role of wizards or mages (magicians) and use their cards to defeat other players in the game. A key term that shows up in this game as well as in movies like "The Craft" is the term mana. It refers to a magical force or power which is essentially a vital life force.

This card game is challenging and requires intricate strategy. It also introduces the players to scary and repulsive images. There is the Bone Shaman or the Necrite (shown licking blood off a dagger) or the Soul Drinker or the Sorceress Queen. Parents should be concerned about the occult and macabre images that players in the game will see as well as the desensitization towards the occult and witchcraft.

3. Yu Gi Oh — was originally a comic created in Japan about a boy playing a card game called "Dueling Monsters." This comic eventually gave rise to a card game, movies, and video games.

The story centers around Yugi who is possessed by a 5000-year-old pharaoh, Yama Yugi, who is trying to solve an ancient puzzle. One Internet site suggests that Yugi is taken over by "dark Yugi" when it needs to work on the puzzle. Others point out that during duels, Yugi seems possessed by the spirit which deepens his voice and shadows him.

4. The Vampire Games — is another role playing game that introduces the players to the world of vampires. This includes the live action role playing games such as *Vampire: The Masquerade* and *Vampire: the Requiem*.

As you might imagine, these games involve dark and macabre situations, including drinking blood and killing innocent people. The vampires are predators on humans and described as killing machines who struggle with their baser instincts. The vampires also have certain powers such as telepathy, psychic projection, and bodily possession.

Players often form clubs in order to play the game. Some players even imitate vampires in real life by wearing razor-sharp artificial fangs. The popularity of these games have spawned others: Werewolf: The Forsaken, Mage: The Awakening, and Sword & Sorcery.

5. World of Warcraft — is an online computer war game. It includes the typical action games strategies but also adds elements of the occult and New Age. There are four main races of beings: humans (one of the youngest races), Orcs (part of a Shamanistic society), Night Elves (who misuse magic), and the Undead Scourge (thousands of walking corpses and extradimensional entities).

As with many of the other games already mentioned, strategy and the use of the occult and paranormal magic are key to success in this game. Powers are summoned and spells are cast.

These various forms of "high tech" spell casting are a doorway into the occult and witchcraft. The Bible warns of the dangers of divination, sorcery, and witchcraft (Exodus 22:18; Leviticus 19-20; Deuteronomy 18:10-12; 1 Samuel 15:23; 2 Kings 23:24; 1 Chronicles 10:13; Isaiah 2:6; 8:19-20; 47:13-14; Ezekiel 13:20-23; Daniel 2:27-28; 5:15-17; Acts 13:7-10; 16:16-18; Galatians 5:19-20; Revelation 22:15). We should not focus our minds and attention on what is dark and dangerous. We are called to let our minds dwell on what is true, honorable, pure, and lovely (Philippians 4:8).

Global Warming: Cool the Hype

Al Gore's film, "An Inconvenient Truth," won an Academy Award for best documentary. And Al Gore is being treated like a rock star at Hollywood parties and when he testified in front of Congress. But has Al Gore's hype and hysteria gone too far?

That's what many scientists and supporters are beginning to say. They are alarmed at his alarmism. "I don't want to pick on Al Gore," Don Easterbrook (emeritus professor of geology at Western Washington University) told hundred of experts at the annual meeting of the Geological Society of America. "But there are a lot of inaccuracies in the statements we are seeing, and we have to temper that with real data." {1}

Kevin Vranes (climatologist at the Center for Science and Technology Policy Research at the University of Colorado) has praised Gore for "getting the message out" but also questioned whether his presentations were "overselling our certainty about knowing the future." {2}

Global warming is the observed increase in the average temperature of the Earth's atmosphere and oceans in recent decades. The argument made in many science journals and in Al Gore's film is that most of the observed warming over the last fifty years is attributable to human activities. Political activists argue we must act now to prevent a global catastrophe.

These claims bring us back to the hype that many see in Al Gore's film. He argues "Humanity is sitting on a ticking time bomb" and that "we have just ten years to avert a major catastrophe that could send our entire planet into a tail-spin of epic destruction involving extreme weather, droughts, epidemics and killer heat waves beyond anything we have ever experienced." {3}

Throughout the film, Al Gore invariably will pick the most

extreme estimate to prove that we are on the edge of a catastrophe. For example, if global warming really is taking place, how much will the sea level rise? Gore says 20 feet, and then shows a dramatic animation of what it would look like if various locations on earth were flooded by a sea level rise of 20 feet.

Yet the most recent summary of the United Nations Intergovernmental Panel on Climate Change doesn't say anything like this. {4} Even though this panel is full of policy makers who believe in global warming and argue for major policy changes, they conclude that sea levels might rise 7 to 17 inches over the course of a century. There is a vast difference between sea levels rising about one foot versus 20 feet!

Add to this the number of factual errors in many of the presentations heralding a looming catastrophe from global warming. Iain Murray documents "25 inconvenient truths for Al Gore" in his column that analyzes the scientific statements in "An Inconvenient Truth." [5] Bjorn Lomborg, author of the Skeptical Environmentalist, shows how the report on climate change by Nicholas Stern and the U.K. government makes sloppy errors and cherry-picks statistics. [6]

We should also mention that many scientists believe that the current warming is due to factors other than human activity. Sami Solanki (Max Planck Institute for Solar System Research, Germany) has quantitatively reconstructed the sun's activity since the last Ice Age and says the sun "is brighter than it was a few hundred years ago and this brightening started relatively recently." {7} Scientists have observed that the ice caps on Mars are melting, and Jupiter is developing a second giant red spot due to the sudden warming of our solar system's largest planet. {8}

Those who dare to criticize the global warming scenario are often compared to being the moral equivalent of a holocaust

denier. {9} In the film, Al Gore compares scientists who criticize his theory to scientists at the tobacco companies who tried to tell us that smoking was not harmful. Gore and others also say that many who are skeptical about global warming are being paid by the oil companies they say are running a disinformation campaign.

This last charge infuriated Dr. Easterbrook who told the geologists, "I've never been paid a nickel by an oil company." He went on to add, "And I'm not a Republican."

Al Gore argues that the global warming issue isn't a political issue but rather a moral issue. Yet in his film, Al Gore argues we need the political will to confront and solve the issue. It doesn't take much insight to realize there is a political agenda here.

The first step, say the activists, is to ratify the Kyoto Protocol. This treaty calls for the reduction in carbon dioxide emissions in the United States, the European Union, Japan, Canada, Australia, and New Zealand. When Al Gore was Vice President, it was brought before the U.S. Senate and defeated 95-0. It won't pass if put up for a vote once again.

But even if it did pass, it would only be a start. Estimates are that it would cost \$200 billion to \$1 trillion every year. But other Kyotos treaties would have to be ratified by the developing countries. After all, there are a billion people in China and a billion people in India, and China plans on building an additional 2,200 coal plants by 2030.{10} One scientist speculated that "it might take another 30 Kyotos" to deal with global warming.{11} And what would be the impact? Critics say that even if adhered to by every signatory, it would only reduce surface temperature by 0.13° F.{12}

Even if we assume that global warming is occurring and assume that it is due only to human activity, the cost-benefit is enormous. Bjorn Lomborg established a program known as the Copenhagen Consensus. {13} This panel (that included three Nobel Laureates in economics) evaluated strategies to deal with major problems facing humanity. When they listed these alternatives in descending order of effectiveness, things like treating communicable disease and hunger were at the top of the list while dealing with climate change were at the bottom of the list.

This suggests that adaptation to climate change will be more effective and less costly than mitigation. We need to cool the hype and let cooler heads make wise decisions.

Truth Decay

We live in a world that has dramatically changed its view of truth. What is the impact of the worldview of postmodernism and the ethical system of relativism in our society and inside the church?

Three Views of Truth

We live in a world that has dramatically changed its view of truth, and thus have inherited an ethical system that denies the existence of truth. The worldview of the twenty-first century is postmodernism, and the dominant ethical system of the last two centuries has been relativism.

To understand this changed view of truth, we need to consider the story of three baseball umpires. {1} One said, "There's balls and there's strikes, and I call 'em the way they are." Another said, "There's balls and there's strikes, and I call 'em the way I

see 'em." And the third umpire said, "There's balls and there's strikes, and they ain't nothing until I call them."

Their three different views of balls and strikes correspond with three different views of truth. The first is what we might call *premodernism*. This is a God-centered view of the universe that believes in divine revelation. Most of the ancient world had this view of true and believed that truth is absolute ("I call 'em the way they are"). By the time of the

Enlightenment, Western culture was moving into a time of modernism. This view was influenced by the scientific revolution, and began to reject a belief in God. In this period, truth is relative ("I call 'em the way I see 'em"). Today we live in what many call postmodernism. In this view, there is a complete loss of hope for truth. Truth is not discovered; truth is created ("they ain't nothing until I call them").

Postmodernism is built upon the belief that truth doesn't exist except as the individual wants it to exist. Truth isn't objective or absolute. Truth is personal and relative. Postmodernism isn't really a set of doctrines or truth claims. It is a completely new way of dealing with the world of ideas. It has had a profound influence in nearly every academic area: literature, history, politics, education, law, sociology, linguistics, even the sciences.

Postmodernism, however, is based upon a set of self-defeating propositions. What is a self-defeating proposition? If I said that my brother is an only child, you would say that my statement is self-refuting. An only child would not have a brother. Likewise, postmodernism is self-refuting.

Postmodernists assert that all worldviews have an equal claim to the truth. In other words, they deny absolute truth. But the denial of absolute truth is self-defeating. The claim that all worldviews are relative is true for everyone, everywhere, at all times. But that claim itself is an absolute truth.

It's like the student who said there was no absolute truth. When asked if his statement was an absolute truth. He said, "Absolutely." So he essentially said that he absolutely believed there was no absolute truth, except the absolute truth that there is no absolute truth!

Postmodernism

Postmodernism may seem tolerant, but in many ways it is not. For example, postmodernists tend to be skeptical of people (e.g., Christians) who claim to know truth. Now that doesn't mean that it is hostile to religion or spirituality. Postmodernists have no problem with religion unless it makes certain claims about its religion.

Postmodernists tolerate religion as long is it makes no claim to universal truth and has no authority. But they are very critical of those who believe there is one truth or an absolute truth. They are also critical of Christian missionaries because they believe they are "destroyers of culture." This is reminiscent of the TV show "Star Trek" that had "The Prime Directive" which prohibited those on the star ship from interfering with any culture. The assumption was that each culture must decide what is true for itself.

Related to this idea of cultural relativism is the belief in religious pluralism. This is the belief that every religion is true. While it is proper to show respect for people of different religious faiths, it is incorrect to assume that all religions are true.

Various religions and religious groups make competing truth claims, so they cannot all be true. For example, God is either personal or God is impersonal. If God is personal then Judaism, Christianity, and Islam could be true. But the eastern religions (Hinduism and Buddhism) are false. Either Jesus is the Messiah or He is not. If He is the Messiah then Christianity is true, and Judaism is false.

Religious pluralism essentially violates the "Law of Non-contradiction." This law states that A and the opposite of A cannot both be true (at the same time in the same way). You cannot have square circles. And you cannot have competing and contradictory religious truth claims all be true at the same

time.

Jesus made this very clear in John 14:6 when He said, "I am the way, and the truth, and the life; no one comes to the Father but through Me." Jesus taught that salvation was through Him and no one else. This contradicts other religions.

Postmodernism has also changed the highest value in society. We used to live in a society that believed in "Truth" (with a capital T). This has now been replaced by a new word with a capital T. And that is the word "Tolerance." We are told to tolerate every view and value. Essentially, all moral questions can be summed up with the phrase: Who are you to say?

Moral Relativism

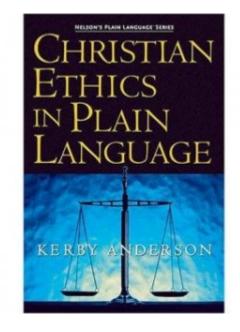

The worldview of postmodernism provides the foundation for moral relativism. Although a view of ethics as relative began in the era of modernism, it has reached full bloom in the era of postmodernism. If there is no absolute truth, then there is no absolute standard for ethical behavior. And if truth is merely personal preference, then certainly ethics is personal and situational.

Moral relativism is the belief that morality is relative to the person. In other words, there is no set of rules that universally applies to everyone. In a sense, moral relativism can be summed up with the phrase: "It all depends." Is murder always wrong? Relativists would say, "It depends on the circumstances." Is adultery wrong? They would say, "It just depends on whether you are caught."

Moral relativism is also self-defeating. People who say they believe in relativism cannot live consistently within their ethical system. Moral relativists make moral judgments all the time. They speak out against racism, exploitation, genocide, and much more. Christians have a consistent foundation to

speak out against these social evils based upon God's revelation. Moral relativists do not.

There are two other problems with moral relativism. First, one cannot critique morality from the outside. In my book Christian Ethics in Plain Language, I point out with problem cultural relativism. {2} If ethics are relative to each culture, then anyone outside the culture loses the right to critique that Essentially was the

argument of the Nazi leaders during the Nuremberg Trials. What right do you have to criticize what we did within Nazi Germany? We had our own system of morality. Fortunately, the judges and Western society rejected such a notion.

Second, one cannot critique morality from the inside. Cultural relativism leaves no place for social reformers. The abolition movement, the suffrage movement, and the civil rights movement are all examples of social movements that ran counter to the social circumstances of the culture. Reformers like William Wilberforce or Martin Luther King Jr. stood up in the midst of society and pointed out immoral practices and called society to a moral solution. Abolishing slavery and fighting for civil rights were good things even if they were opposed by many people within society.

Not only is moral relativism self-defeating; it is dangerous. Moral relativism leads to moral anarchy. It is based upon the assumption that every person should be allowed to live according to his or her own moral standards. Consider how dangerous that would be in a society with such vastly different moral standards.

Some people think stealing is perfectly moral, at least in certain circumstances. Some people think murder can be justified. Society simply cannot allow everyone to do what they think is right in their own eyes.

Obviously, society allows a certain amount of moral anarchy when there is no threat to life, liberty, or property. Each year when I go to the state fair, I see lots of anarchy when I watch the people using the bumper cars. In that situation, we allow people to "do their own thing." But if those same people started acting like that on the highway, we simply could not allow them to "do their own thing." There is a threat to life, liberty, and property.

Moral relativism may sound nice and tolerant and liberating. But if ever implemented at a societal level, it would be dangerous. We simply cannot allow total moral anarchy without reverting to barbarism. That is the consequence of living in a world that has changed its view of truth and established an ethical system that denies the existence of truth.

Impact of Truth Decay

What has been the impact of a loss of truth in society? There are many ways to measure this, and many ministries and organizations have done just that.

Each year the Nehemiah Institute gives the PEERS test to thousands of teenagers and adults. They have administered this test since 1988. The PEERS test measures understanding in five categories: Politics, Economics, Education, Religion, and Social Issues. [3] It consists of a series of statements carefully structured to identify a person's worldview in those five categories.

Based upon the answers, the respondent is then classified under one of four major worldview categories: Christian Theism, Moderate Christian, Secular Humanism, or Socialism. In

the mid-1980s, it was common for Christian youth to score in the Moderate Christian worldview category. Not anymore.

Currently, Christian students at public schools score in the lower half of secular humanism, headed toward a socialistic worldview. And seventy-five percent of students in Christian schools score as secular humanists.

Take this question from the PEERS test as an example: "Moral values are subjective and personal. They are the right of each individual. Individuals should be allowed to conduct life as they choose as long as it does not interfere with the lives of others." The Nehemiah Institute found that seventy-five percent of youth agreed with this statement.

Let's also consider the work of George Barna. He conducted a national survey of adults and concluded that only four percent of adults have a biblical worldview as the basis of their decision-making. The survey also discovered that nine percent of born again Christians have such a perspective on life. {4} And when you look at the questions, you can see that what is defined as a biblical worldview is really just basic Christian doctrine.

George Barna has also found that a minority of born again adults (forty-four percent) and an even smaller proportion of born again teenagers (nine percent) are certain of the existence of absolute moral truth. {5}

By a three-to-one margin, adults say truth is always relative to the person and their situation. This perspective is even more lopsided among teenagers who overwhelmingly believe moral truth depends on the circumstances. {6}

Back in 1994, the Barna Research Group conducted a survey of churched youth for Josh McDowell. Now remember, we are talking about young people who regularly attend church. They found that of these churched youth, fifty-seven percent could not say that an objective standard of truth exists. They also

found that eighty-five percent of these same churched youth reason that "just because it's wrong for you doesn't mean its wrong for me."

George Barna says that the younger generation tends to be composed of non-linear thinkers. In other words, they often cut and paste their beliefs and values from a variety of sources, even if they are contradictory.

More to the point, they hold these contradictory ideas because they do not have a firm belief in absolute truth. If truth is personal and not objective, then there is no right decision and each person should do what is right for him or her.

Biblical Perspective

What is a biblical perspective on postmodernism? One of the problems with the postmodern worldview is that it affects the way we read the Bible.

Because of the popularity of postmodernism, people are reading literature (including the Bible) differently than before. Literary interpretation uses what is called "postmodern deconstruction." Not only is this used in English classes on high school and college campuses, it is being applied to biblical interpretation.

Many Christians no longer interpret the Bible by what it says. Instead, they interpret the Bible by asking what the passage means to them. While biblical application is important, we must first begin by understanding the intent of the author. Once that principle goes out the window, proper biblical interpretation is in jeopardy.

So what should we do? First we must be prepared for the intellectual and philosophical battle we face in the twenty-first century. Colossians 2:8 says, "See to it that no one takes you captive through philosophy and empty deception,

according to the tradition of men, according to the elementary principles of the world, rather than according to Christ."

We must also be studying the Scriptures on a daily basis. Paul says the Bereans were "noble-minded" because "they received the word with great eagerness, examining the Scriptures daily to see whether these things were so" (Acts 17:11).

Studies of born again Christians say that they are not reading their Bibles on a regular basis. An important antidote to postmodernism and relativism is daily Scripture study so that we make sure that we are not being conformed to the culture (Romans 12:2).

We should also develop discernment, especially when we are considering the worldviews that are promoted in the media. Philippians 4:8 says, "Finally, brethren, whatever is true, whatever is honorable, whatever is right, whatever is pure, whatever is lovely, whatever is of good repute, if there is any excellence and if anything worthy of praise, dwell on these things."

The average student in America watches 22,000 hours of television before graduation. That same student also listens to 11,000 hours of music during their teenage years. Add to this time spent on a computer, on the Internet, and absorbing the culture through books and magazines.

Postmodernism is having a profound impact on our society. This erosion of truth is affecting the way we view the world. And the rejection of absolutes leads naturally to a rejection of absolute moral standards and the promotion of moral relativism.

Christians must wisely discern these trends and apply proper biblical instruction to combat these views.

Candidates and Religion

October 9, 2007

Should we know more about a political candidate's religion before we vote? That is a question that will certainly surface in this election cycle.

When John Kennedy ran for the presidency he said: "I believe

in a President whose religious views are his own private affair." While that may have satisfied some back in 1960, I doubt it will be sufficient in this election.

Michael Kinsley recently wrote about this important topic in *Time* magazine as he discussed Governor Mitt Romney. Although I would probably disagree with Kinsley on many political and theological issues, I think he rightly points out that the religious faith of a candidate cannot be kept private because it affects his or her worldview.

He says it is important for three reasons. First, we need to know the details of a candidate's faith and the extent to which those details are accepted. He notes that Catholic liberal politicians since Mario Cuomo have said they accept the doctrine of the church but nevertheless believe in a woman's right to choose. He concludes that either these politicians are lying to their church, or they are lying to us.

Second, since some doctrines of various religions may be offensive to the general public, they have a right to know if a candidate agrees with those doctrines. Michael Kinsley applies this only to Mitt Romney's Mormonism, but it should also be applied to the religious faith of every candidate.

Third, candidates' religious faith also will affect their character. Voters should take character into account before they cast their vote for a particular candidate.

This election season it has been popular for candidates to talk about their faith. But how does that faith affect his or her views on social and political issues? So far, the media has been content to let them talk about their faith in a vague way, but voters deserve to know more. Back in 1960, John Kennedy dodged the question of how his faith affected his decision-making. We cannot allow candidates to dodge the question now.

Tales From the Crypt: Do We Have the Bones of Jesus?

February 26, 2008

The last week in February started out with an incredible announcement. James Cameron (director of the film Titanic) and Simcha Jacobovici announced that they have found the bones of Jesus! At their news conference, they promoted their Discovery Channel special The "Lost Tomb of Jesus" that will air on March 4th and also promoted the book by Simcha Jacobovici and Charles Pellegrino entitled *The Jesus Family Tomb: The Discovery, the Investigation, and the Evidence That Could Change History* released by Harper-Collins.

If proved reliable, these findings would call into question the very cornerstone of Christianity: the resurrection of Jesus. But are they true?

The foundational claim is that they have discovered the family tomb of Jesus Christ. Is this really the tomb of Jesus or his family? There are many good reasons to believe this tomb has no relationship at all to Jesus and his family. Many are asking what to think about these claims. Therefore, I put together a quick two-page summary of some of the criticisms and concerns that surfaced in the first few hours after the announcement. Before we look at those criticisms, let's first review the history of this tomb.

We have known about this tomb since it was discovered in 1980.

Back then, Israeli construction workers were digging the foundation for a new building in a Jerusalem suburb. Their digging revealed a cave with ten limestone ossuaries. Archeologists removed the limestone caskets for examination.

When they were able to decipher the names on the ten ossuaries, they found: Jesua, son of Joseph, Mary, Mary, Mathew, Jofa and Judah, son of Jesua. At the time, one of Israel's most prominent archeologists (Professor Amos Kloner) didn't associate the crypt with Jesus. He rightly argued that the father of Jesus was a humble carpenter who couldn't afford a luxury crypt for his family. Moreover, the names on the crypt were common Jewish names.

None of this has stopped Cameron and Jacobovici from promoting the tomb as the family tomb of Jesus. They claim to have evidence (through DNA tests, archeological evidence, and Biblical studies) to prove that the ten ossuaries belong to Jesus and his family. They also argue that Jesus and Mary Magdalene might have produced a son named Judah. However, a number of biblical scholars say this is really just an old story now being recycled in an effort to create a media phenomenon that will sell books and guarantee a large audience for the television special.

First, does it really make sense that this would be the family tomb of Jesus? Remember that Jesus was in Jerusalem as a pilgrim and was not a resident of the city. How would his family be able to buy this tomb? As we already mentioned, Joseph (who had probably already died in Galilee) and his family did not have the funds to buy such an elaborate burial site. Moreover, they were from out of town and would need time to find this tomb location. To accept this theory, one has to believe they stole the body of Jesus and moved it to this tomb in a suburb of Jerusalem all within about a day's time.

Second, if this is the family tomb of Jesus and his family, why is Jesus referred to as the son of Joseph? As far as we

can determine from history, the earliest followers of Jesus never called Jesus the son of Joseph. The record of history is that it was only outsiders who mistakenly called him that.

Third, if this is the family tomb of Jesus, why do we have the name of Matthew listed with the rest of the family? If this is the Matthew that traveled with Jesus, then he certainly was not a family member. And you would have to wonder why James (who remained in Jerusalem) would allow these inscriptions as well as allow the family to move the body from Jerusalem to this tomb and perpetrate a hoax that Jesus bodily rose from the grave. Also, the fourth-century church historian Eusebius writes that the body of James (the half-brother of Jesus) was buried alone near the temple mount and that his tomb was visited in the early centuries.

Fourth, there is the problem with the common names on the tombs. Researchers have cataloged the most common names at the time. The ten most common were: Simon/Simeon, Joseph, Eleazar, Judah, John/Yohanan, Jesus, Hananiah, Jonathan, Matthew, and Manaen/Menahem. These are some of the names found on the ossuaries and thus suggest that the tomb belonged to someone other than Jesus of Nazareth and his family. In fact, the name Jesus appears in 98 other tombs and on 21 other ossuaries.

Finally there is the question of the DNA testing. Apparently there is evidence that shows that the DNA from the woman (in what they say is the Mary Magdalene ossuary) and the DNA from the so-called Jesus ossuary does not match. So they argue that they were not relatives and thus must have been married.

But does the DNA evidence really prove that? It does not prove she is his wife. In fact, we really dont even know who in the ossuaries are related to the other. Moreover, we do not have an independent DNA control sample to compare these findings with. At best, the DNA evidence shows that some of these people are related and some are not.

All of this looks like sensationalism from Simcha Jacobovici (who has a reputation as an Indiana-Jones type) and James Cameron (the director of the highly fictionalized Titanic). The publicity s certain to sell books and draw a television audience, but it is not good history or archaeology.

Follow-up from Kerby 2/28/07

My commentary was a brief (two-page) summary of some of the criticisms and concerns that many people surfaced in the first few hours after the announcement. Now that we have a few days of reflection on the claims by James Cameron and Simcha Jacobovici, I think we can begin to provide an even more detailed perspective.

Here are some good commentaries and blogs posted by experts in the field as well some news articles that quote these people. Some of these experts have been able to see the Discovery Channel special "The Lost Tomb of Jesus" and thus can give even more detail than I was able to do when I first wrote my commentary on Monday, February 26. The first two links are for commentaries by Dr. Darrell Bock, Dallas Theological Seminary. He was on my radio program "Point of View" and provided some great insight. The next link is for a commentary by Ben Witherington, Asbury Theological Seminary. The following three are news articles quoting from experts:

God in Our Nation's Capital

U.S. Capitol Building

In our minds, lets take a walking tour through Americas capital city, Washington, DC. What we will be seeing in our minds eye comes from the book Rediscovering God in America: Reflections on the Role of Faith in Our Nations History and Future. {1} As we consider what religious symbols are found in the buildings and monuments, I think we will gain a fresh appreciation for the role of religion in the public square.

We will begin with the U.S. Capitol Building. No other building in Washington defines the skyline like this one does. It has been the place of formal inaugurations as well as informal and spontaneous events, such as when two hundred members of Congress gathered on the steps on September 12, 2001, to sing God Bless America.

President George Washington laid the cornerstone for the Capitol in 1793. When the north wing was finished in 1800, Congress was able to move in. Construction began again in 1803 under the direction of Benjamin Latrobe. The British invasion of Washington in 1812 resulted in the partial destruction of the Capitol. In 1818, Charles Bulfinch oversaw the completion of the north and south wings (including a chamber for the Supreme Court).{2}

Unfortunately, the original design failed to consider that additional states would enter the union, and these additional representatives were crowding the Capitol. President Millard Fillmore chose Thomas Walter to continue the Capitols construction and rehabilitation. Construction halted during the first part of the Civil War, and it wasnt until 1866 that the canopy fresco in the Rotunda was completed.

The religious imagery in the Rotunda is significant. Eight different historical paintings are on display. The first is the painting *The Landing of Columbus* that depicts the arrival on the shores of America. Second is *The Embarkation of the Pilgrims* that shows the Pilgrims observing a day of prayer and fasting led by William Brewster.

Third is the painting *Discovery of the Mississippi by DeSoto*. Next to DeSoto is a monk who prays as a crucifix is placed in the ground. Finally, there is the painting *Baptism of Pocahontas*.

Throughout the Capitol Building, there are references to God and faith. In the Cox Corridor a line from America the Beautiful is carved in the wall: America! God shed His grace on thee, and crown thy good with brotherhood, from sea to shining sea! {3}

In the House chamber is the inscription, In God We Trust. Also

in the House chamber, above the Gallery door, stands a marble relief of Moses, the greatest of the twenty-three law-givers (and the only one full-faced). At the east entrance to the Senate chamber are the words *Annuit Coeptis* which is Latin for God has favored our undertakings. The words In God We Trust are also written over the southern entrance.

In the Capitols Chapel is a stained glass window depicting George Washington in prayer under the inscription In God We Trust. Also, a prayer is inscribed in the window which says, Preserve me, God, for in Thee do I put my trust. {4}

The Washington Monument

The tallest monument in Washington, DC, is the Washington Monument. From the base of the monument to its aluminum capstone are numerous references to God. This is fitting since George Washington was a religious man. When he took the oath of office on April 30, 1789, he asked that the Bible be opened to Deuteronomy 28. After the oath, Washington added, So help me God and bent forward and kissed the Bible before him. {5}

Construction of the Washington Monument began in 1848, but by 1854 the Washington National Monument Society was out of money and construction stopped for many years. Mark Twain said it had the forlorn appearance of a hollow, oversized chimney. In 1876, Congress appropriated money for the completion of the monument which took place in 1884. In a ceremony on December 6, the aluminum capstone was placed atop the monument. The east side of the capstone has the Latin phrase *Laus Deo*, which means Praise be to God.

The cornerstone of the Washington Monument includes a Holy Bible, which was a gift from the Bible Society. Along with it are copies of the Declaration of Independence and the U.S. Constitution.

If you walk inside the monument you will see a memorial plaque

from the Free Press Methodist-Episcopal Church. On the twelfth landing you will see a prayer offered by the city of Baltimore. On the twentieth landing you will see a memorial offered by Chinese Christians. There is also a presentation made by Sunday school children from New York and Philadelphia on the twenty-fourth landing.

The monument is full of carved tribute blocks that say: Holiness to the Lord; Search the Scriptures; The memory of the just is blessed; May Heaven to this union continue its beneficence; In God We Trust; and Train up a child in the way he should go, and when he is old, he will not depart from it.

So what was George Washingtons faith? Historians have long debated the extent of his faith. But Michael Novak points out that Washingtons own step-granddaughter, Nelly Custis, thought his words and actions were so plain and obvious that she could not understand how anybody failed to see that he had always lived as a serious Christian. {6}

During the first meeting of the Continental Congress in September 1774, George Washington prayed alongside the other delegates. And they recited Psalm 35 together as patriots.

George Washington also proclaimed the first national day of thanksgiving in the United States. In 1795 he said, When we review the calamities which afflict so many other nations, the present condition of the United States affords much matter of consolation and satisfaction. He therefore called for a day of public thanksgiving and prayer. He said, In such a state of things it is in an especial manner our duty as people, with devout reverence and affectionate gratitude, to acknowledge our many and great obligations to Almighty God and implore Him to continue and confirm the blessings we experience. {7}

The Lincoln Memorial

The idea of a memorial to the sixteenth president had been discussed almost within days after his assassination, but lack of finances proved to be a major factor. Finally, Congress allocated funds for it during the Taft administration. Architect Henry Bacon wanted to model it after the Greek Parthenon, and work on it was completed in 1922.

Bacon chose the Greek Doric columns in part to symbolize Lincolns fight to preserve democracy during the Civil War. {8} The thirty-six columns represented the thirty-six states that made up the Union at the time of Lincolns death.

Daniel Chester French sculpted the statue of Abraham Lincoln to show his compassionate nature and his resolve in preserving the Union. One of Lincolns hands is tightly clenched (to show his determination) while the other hand is open and relaxed (to show his compassion).

Lincolns speeches are displayed within the memorial. On the left side is the Gettysburg Address (only 267 words long). He said, We here highly resolved that these dead shall not have died in vain, that this nation, under God, shall have a new birth of freedom.

On the right side is Lincolns second inaugural address (only 703 words long). It mentions God fourteen times and quotes the Bible twice. He reflected on the fact that the Civil War was not controlled by man, but by God. He noted that each side looked for an easier triumph, and a result less fundamental and astounding. Both read the same Bible, and pray to the same God; and each invokes his aid against the other.

He concludes with a lament over the destruction caused by the Civil War, and appeals to charity in healing the wounds of the war. With malice toward none, with charity for all, with firmness in the right as God gives us to see the right, let us

strive on to finish the work we are in, to bind up the nations wounds, to care for him who shall have borne the battle and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations.

It is fitting that one hundred years after Lincolns second inaugural, his memorial was the place where Reverend Martin Luther King, Jr. delivered his most famous speech, I have a dream. An inscription was added to the memorial in 2003 that was based upon Isaiah 40:4-5: I have a dream that one day every valley shall be exalted, and every hill and mountain shall be made low, the rough places will be made plain, and the crooked places will be made straight and the glory of the Lord shall be revealed and all flesh shall see it together.

At a White House dinner during the war, a clergyman gave the benediction and closed with the statement that The Lord is on the Unions side. Abraham Lincoln responded: I am not at all concerned about that, for I know that the Lord is always on the side of the right. But it is my constant anxiety and prayer that I and this nation should be on the Lords side. {9}

The Jefferson Memorial

Thomas Jefferson was Americas third president and the drafter of the Declaration of Independence, so it is surprising that a memorial to him was not built earlier than it was. In 1934, Franklin Delano Roosevelt persuaded Congress to establish a memorial commission to honor Jefferson. After some study the commission decided to honor Pierre LEnfants original plan, which called for the placement of five different memorials that would be aligned in a cross-like manner. {10}

The architect of the memorial proposed a Pantheon-like structure that was modeled after Jeffersons own home which incorporated the Roman architecture that Jefferson admired.

The original design was modified, and the memorial was officially dedicated in 1943.

When you enter the Jefferson Memorial you will find many references to God. A quote that runs around the interior dome says, I have sworn upon the altar of God, eternal hostility against every form of tyranny over the minds of man.

On the first panel, you will see the famous passage from the Declaration of Independence: We hold these truths to be self-evident: That all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

On the second panel is an excerpt from A Bill for Establishing Religious Freedom, 1777. It was passed by the Virginia Assembly in 1786. It reads: Almighty God hath created the mind free. . . . All attempts to influence it by temporal punishments or burdens . . . are a departure from the plan of the Holy Author of our religion. . . . No man shall be compelled to frequent or support any religious worship or ministry or shall otherwise suffer on account of his religious opinions of belief, but all men shall be free to profess, and by argument to maintain, their opinions in matters of religion. I know but one code of morality for men whether acting singly or collectively.

The third panel is taken from Jeffersons 1785 Notes on the State of Virginia. It reads: God who gave us life gave us liberty. Can the liberties of a nation be secure when we have removed a conviction that these liberties are the gift of God? Indeed I tremble for my country when I reflect that God is just, that His justice cannot sleep forever. Commerce between master and slave is despotism. Nothing is more certainly written in the book of fate than that these people are to be free.

The Supreme Court

Of the three branches of government, the Supreme Court was the last to get its own building. In fact, it met in the Capitol building for over a hundred years. During that time, it met in many different rooms of the capitol until it finally settled in the Old Senate Chamber in 1860.

Supreme Court Justice William Howard Taft (who also had served as president) persuaded Congress to authorize funds for the Supreme Court building. It was modeled after Greek and Roman architecture in the familiar Corinthian style and dedicated in 1935.

It is ironic that the Supreme Court has often issued opinions which have stripped religious displays from the public square when these opinions have been read in a building with many religious displays. And it is ironic that public expressions of faith have been limited when all sessions of the court begin with the Courts Marshal announcing: God save the United States and this honorable court.

In a number of cases, the Supreme Court has declared the posting of the Ten Commandments unconstitutional (in public school classrooms and in a local courthouse in Kentucky). But this same Supreme Court has a number of places in its building where there are images of Moses with the Ten Commandments. These can be found at the center of the sculpture over the east portico of the Supreme Court building, inside the actual courtroom, and finally, engraved over the chair of the Chief Justice, and on the bronze doors of the Supreme Court itself. {11}

Nevertheless, the Supreme Court has often ruled against the very kind of religious expression that can be found in the building that houses the court. Former Speaker of the House Newt Gingrich says in his book *Rediscovering God in America*, that we see a systematic effort . . . to purge all religious

expression from American public life. He goes on to say that for the last fifty years the Supreme Court has become a permanent constitutional convention in which the whims of five appointed lawyers have rewritten the meaning of the Constitution. Under this new, all-powerful model of the Court, and by extension the trail-breaking Ninth Circuit Court, the Constitution and the law can be redefined by federal judges unchecked by the other two coequal branches of government. {12}

This is the state of affairs we find in the twenty-first century. If five justices believe that prayer at a public school graduation is unconstitutional, then it is unconstitutional. If five justices believe that posting the Ten Commandments is unconstitutional, it is unconstitutional.

If the trend continues, one wonders if one day they may rule that religious expression on public monuments is unconstitutional. If that takes place, then you might want to invest in sandblasting companies in the Washington, DC, area. There are lots of buildings and monuments with words about God, faith, and religion. It would take a long time to erase all of these words from public view.

The next time you are in our nations capital, make sure you take a walking tour of the buildings and monuments. They testify to a belief in God and a dynamic faith that today is often under attack from the courts and the culture.

The New Atheists — Kerby Anderson Blog

Kerby Anderson writes that unlike the old-style atheists who were content to merely argue that Christianity is not true, the new atheists now argue that Christianity is dangerous.

January 18, 2007

For centuries there has been conflict and debate between atheists and Christianity. But the rise of what journalists are calling "The New Atheists" represents a significant change in the nature of the debate. "The New Atheists" is part reality and part journalistic catch phrase. It identifies the new players in the ongoing battle between science and religion.

Unlike the atheists who came before them who were content to merely argue that Christianity is not true, these new atheists now argue that Christianity is dangerous. It is one thing to argue about the *error* of Christianity, it is quite another to argue about the *evil* of Christianity.

Many of these authors have books in the New York Times bestseller list. Letter to a Christian Nation by Sam Harris is

one of those books in the top ten. He goes beyond the traditional argument that suffering in the world proves there is no God. He argues that belief in God actually causes suffering in the world. He says, "That so much of this suffering can be directly attributed to religion—to religious hatreds, religious wars, religious delusions and religious diversions of scarce resources—is what makes atheism a moral and intellectual necessity." He argues that unless we renounce religious faith, religious violence will soon bring civilization to an end.

Response to his book has been glowing. One reader found the book to be "a wonderful source of ammunition for those who, like me, hold to no religious doctrine." Others enjoyed the pounding he gives Christianity. For them it "was like sitting ring side, cheering the champion, yelling 'Yes!' at every jab."

But Christians are not the only target of his criticism. Harris also argues that religious moderates and even theological liberals function as "enablers" of orthodox Christianity. His book is not only a criticism of Christians, but it is a call for tolerant people in the middle to get off the fence and join these new atheists.

Another popular book is *The God Delusion* by Oxford professor Richard Dawkins. He says that religious belief is psychotic and arguments for the existence of God are nonsense. He wants to make respect for belief in God socially unacceptable.

He calls for atheists to identify themselves as such and join together to fight against the delusions of religious faith. He says, "The number of nonreligious people in the US is something nearer to 30 million than 20 million. That's more than all the Jews in the world put together. I think we are in the same position the gay movement was in a few decades ago. There was a need for people to come out."

Like Harris, Dawkins does not merely disagree with religious faith, but he disagrees with tolerating religious faith. He argues that religious people should not be allowed to teach these religious "myths" to their children, which Dawkins calls the "colonization of the brains of innocent tykes."

Dawkins hammers home the link between evolution and atheism. He believes that evolutionary theory must logically lead to atheism. And he states that he is not going to worry about the public relations consequences of tying evolution to atheism.

Daniel Dennett is another important figure and author of the book, Breaking the Spell: Religion as a Natural Phenomenon. He does not use the harsh and critical rhetoric of the others, but still is able to argue his case that religion must be subjected to scientific evaluation. He believes that "neutral, scientifically informed education about every religion in the world should be mandatory in school" since "if you have to hoodwink—or blindfold—your children to ensure that they confirm their faith when they are adults, your faith ought to go extinct."

In addition to the books by "The New Atheists" have been a number of others that have targeted Christian conservatives. David Kuo wrote *Tempting Faith* to tell conservative Christians that they were taken for a ride by the administration that derided them behind closed doors. Add to this Michael Goldberg's *Kingdom Coming: The Rise of Christian Nationalism* and Randall Balmer's *Thy Kingdom Come* and Kevin Phillips' *American Theocracy*. Each put the religious right in their crosshairs and pulled the trigger.

Many of these books border on paranoia. Consider James Rudin's book, *The Baptizing of America*. His opening paragraph says, "A specter is haunting America, and it is not socialism and certainly not communism. It is the specter of Americans kneeling in submission to a particular interpretation of a religion that has become an ideology, an all-encompassing way

of life. It is the specter of our nation ruled by the extreme Christian right, who would make the United States a 'Christian nation' where their version of God's law supersedes all human law—including the Constitution. That, more than any other force in the world today, is the immediate and profound threat to our republic."

These comments move from anti-Christian bigotry to anti-Christian paranoia. Please, tell me who these dangerous Christian conservatives are so we can correct them. I interview many of the leaders and do not even hear a hint of this. If anything, these leaders want the judges to *follow* the Constitution not supercede it with another version (either secular or Christian).

Rudin goes on to argue that these Christian leaders would issue everyone a national ID card giving everyone's religious beliefs. Again, who are these people he is talking about? Frankly, I have not found anyone that wants a national ID card (either secular or Christian).

Nevertheless, Rudin maintains that "such cards would provide Christocrats with preferential treatment in many areas of life, including home ownership, student loans, employment and education." And the appointed religious censors would control all speech and outlaw dissent. Do you know we wanted to do that?

Clearly we are moving into a time in which atheists see religion as full of error and evil. And Christian conservatives are especially being singled out because of their belief in the truth of the Bible.

Christians should respond in three ways. First, we must always be ready to give an answer for the hope that is in us (1 Peter 3:15) and do it with gentleness and reverence. Second, we should trust in the power of the Gospel: "I am not ashamed of the Gospel, because it is the power of God for all those who

believe (Romans 1:16). Third, we should live godly lives before the world so that we may (by our good behavior) silence the ignorant talk of foolish men (1 Peter 2:15).

Ten Commandments in America (Radio)

The ongoing debate about the posting the Ten Commandments in public places has certainly been controversial for the last few decades. But as we will see this week, there was a time not so long ago when politicians and citizens alike saw the Ten Commandments as the very foundation of our society.

In 1980, the Supreme Court ruled against the posting of the Ten Commandments in the public schools in the case of *Stone v. Graham*. They ruled that the preeminent purpose for posting the Ten Commandments on schoolroom walls is plainly religious in nature.

The justices even worried what would happen if students were to read the Ten Commandments on their classroom wall: If the posted copies of the Ten Commandments are to have any effect at all, it will be to induce the schoolchildren to read, meditate upon, perhaps to venerate and obey, the Commandments. However desirable this might be as a matter of private devotion, it is not a permissible state objective under the Establishment Clause.{1}

In 2005, the Supreme Court revisited this decision because of cases from Kentucky and Texas. A divided court struck down displays in two Kentucky courthouses, but ruled a Ten

Commandments monument on state government land in Texas was acceptable. Anyone looking for a clear line of reasoning that provides guidance for future cases will not find them.

In the Kentucky cases, two counties posted copies of the Ten Commandments on the walls of their courthouse. These framed copies of the Ten Commandments hung alongside documents such as the Bill of Rights, the Star-Spangled Banner, and a version of the Congressional Record declaring 1983 the Year of the Bible. These were considered unconstitutional.

The Texas case involved a six foot granite monument on the grounds of the Texas Capitol. It was deemed acceptable because it is one of seventeen historical displays on the twenty-two-acre lot. Although this was considered constitutional, some justices couldnt even accept that. Justice John Paul Stevens said, The monument is not a work of art and does not refer to any event in the history of the state, he wrote. The message transmitted by Texas chosen display is quite plain: This state endorses the divine code of the Judeo-Christian God. {2}

Other justices noted that one monument among many others is hardly an endorsement of religion. You can stop to read it, you can ignore it, or you can walk around it. Chief Justice William Rehnquist argued that the monuments placement on the grounds among secular monuments was passive, rather than confrontational. Justice Antonin Scalia listed various ways in which higher beings are invoked in public life, from so help me God in inaugural oaths to the prayer that opens the Supreme Courts sessions. He asked, With all of this reality (and much more) staring it in the face, how can the court possibly assert that the First Amendment mandates governmental neutrality?

The framers of the Constitution didnt try to mandate neutrality. They understood that ultimately law must rest upon a moral foundation. One of those foundations was the Ten Commandments.

Ten Commandments in American History

When we look at the Founding Fathers, we see they wereanything but neutral when it came to addressing the influence of the Ten Commandments on our republic. For example, twelve of the original thirteen colonies incorporated the entire Ten Commandments into their civil and criminal codes. {3}

John Quincy Adams stated, The law given from Sinai was a civil and municipal as well as a moral and religious code. These are laws essential to the existence of men in society and most of which have been enacted by every nation which ever professed any code of laws. He added that: Vain indeed would be the search among the writings of [secular history] . . . to find so broad, so complete and so solid a basis of morality as this Decalogue lays down. {4}

John Witherspoon was the president of what later came to be known as Princeton University and was a signer of the Declaration of Independence. He said that the Ten Commandments are the sum of the moral law. {5}

John Jay was one of the authors of *The Federalist Papers*. He later became the first Chief Justice of the U.S. Supreme Court. He said, The moral or natural law, was given by the sovereign of the universe to all mankind. {6}

On September 19, 1796, in his Farewell Address, President George Washington said, Of all the dispositions and habits which lead to political prosperity, Religion and Morality are indispensable supports. {7}

William Holmes McGuffey, considered the Schoolmaster of the Nation, once said, The Ten Commandments and the teachings of Jesus are not only basic but plenary. {8}

The founders of this country also wanted to honor Moses as the deliverer of the Ten Commandments. After separating from England, Thomas Jefferson and Benjamin Franklin were

responsible for designing a symbol of this newly formed nation. Franklin proposed Moses lifting his wand and dividing the Red Sea.{9}

In the U.S. Capitol, there are displays of the great lawgivers (Hammurabi, Justinian, John Locke, William Blackstone, etc). All are profiles of the lawgivers except for one. The relief of Moses is full faced rather than in profile and looks directly down onto the House Speakers rostrum.

Anyone who enters the National Archives to view the Declaration of Independence or the Constitution must first pass by the Ten Commandments embedded in the entry way of the Archives. Likewise, there are a number of depictions of the Ten Commandments. One is on the entry to the Supreme Court Chamber, where it is engraved on the lower half of the two large oak doors.

Another is engraved in the stone above the head of the Chief Justice with the great American eagle protecting them. And Moses is included among the great lawgivers in the sculpture relief on the east portico.

Chief Justice Warren Burger noted the irony of this in theU.S. Supreme Court decision of *Lynch v. Donnelly*. The very chamber in which oral arguments on this case were heard is decorated with a notable and permanentnot seasonalsymbol of religion: Moses with the Ten Commandments.{10}

The Commandments in Civil Law

Let's see how the Ten Commandments were expressed inAmerican civil law. It may surprise you to find out that all of the commandments were written into law in some way. {11}

These illustrations are descriptive, not normative. I am not arguing that we must return to these legal formulations in every case cited. We may certainly disagree to what extent the

Ten Commandments should be part of our legal structure. But there should be no disagreement that at one time the Ten Commandments were the very foundation of the civil laws of America.

The Ten Commandments can be summarized in this way: (1) Have no other gods, (2) Have no idols, (3) Honor Gods name, (4) Honor the Sabbath, (5) Honor your parents, (6) Do not murder, (7) Do not commit adultery, (8) Do not steal, (9) Do not commit perjury, (10) Do not covet. The Ten Commandments might be called rules of (1) religion, (2) worship, (3) reverence, (4) time, (5) authority, (6) life, (7) purity, (8) property, (9) tongue, and (10) contentment.

The first commandment is: You shall have no other gods before Me (Ex. 20:3). There were a number of early colonial laws that addressed this command.

A law passed in 1610 in the Virginia colony declared thatsince we owe our highest and supreme duty, our greatest and all our allegiance to Him from whom all power and authority is derived . . . I do strictly command and charge all Captains and Officers . . . to have a care that the Almighty God be duly and daily served. {12}

A 1641 Massachusetts law stated: If any man after legal conviction shall have or worship any other god but the Lord God, he shall be put to death. Deut. 13:6,10; Deut 17:2,6; Ex. 22:20.{13}

The second commandment is: You shall not make for yourself an idol (Ex. 20:4). A 1680 New Hampshire law declared: It is enacted by ye ssembly and ye authority thereof, yet if any person having had the knowledge of the true God openly and manifestly have or worship any other gods but the Lord God, he shall be put to death. Ex. 22:20; Deut. 13:6 and 10.{14}

The third commandment is: You shall not take the name of the Lord your God in vain (Ex. 20:7). Laws to obey this commandment came in two forms. Some were laws prohibiting blasphemy and others were laws against profanity. Noah Webster discussed both of these categories in relation to the third commandment in one of his letters:

When in obedience to the third commandment of the Decalogue you would avoid profane swearing, you are to remember that this alone is not a full compliance with the prohibition which [also] comprehends all irrelevant words or action and whatever tends to cast contempt on the Supreme Being or on His word and ordinances. {15}

Nearly all of the colonies had anti-blasphemy laws. This includes Connecticut, New Hampshire, Pennsylvania, Virginia, North Carolina, and South Carolina.

As Commander-in-Chief, George Washington issued numerous military orders during the American Revolution that prohibited swearing. This is one of his orders issued on July 4, 1775:

The General most earnestly requires and expects a due observance of those articles of war established for the government of the army which forbid profane cursing, swearing, and drunkenness; and in like manner requires and expects of all officers and soldiers not engaged on actual duty, a punctual attendance on Divine Service to implore the blessings of Heaven upon the means used for our safety and defense. {16}

After the Declaration of Independence, George Washington issued similar orders to his troops during the Revolutionary War. And similar prohibitions against blasphemy and profanity were issued throughout the rest of the Eighteenth century and into the Nineteenth century.

The fourth commandment is: Remember the Sabbath day, to keep it holy (Ex. 20:8). Each of the colonies and states had laws dealing with the Sabbath. Even the U.S. Constitution has a provision stipulating that the president has 10 days to sign a law, Sundays excepted. This clause was found in state constitutions and thus incorporated into the U.S. Constitution.

An 1830 New York law declared that: Civil process cannot, by statute, be executed on Sunday, and a service of such process on Sunday is utterly void and subjects the officer to damages. {17} Many other states had similar laws.

During the American Revolution, George Washington issued military orders directing that the Sabbath be observed. Here is his order of May 2, 1778 at Valley Forge:

The Commander in Chief directs that Divine Service be performed every Sunday at 11 oclock in those brigades to which there are chaplains; those which have none to attend the places of worship nearest to them. It is expected that officers of all ranks will by their attendance set an example to their men. {18}

The fifth commandment is: Honor your father and your mother (Ex. 20:12). A 1642 Connecticut law dealt with this commandment and cited additional verses:

If any child or children above sixteen years old, and of sufficient understanding shall curse or smite their normal father or mother, he or they shall be put to death; unless it can be sufficiently testified that the parents have been very unchristianly negligent in the education of such children or so provoke them by extreme and cruel correction that they have been forced thereunto to preserve themselves from death [or] maiming. Ex. 21:17, Lev. 20, Ex. 20:15.{19}

The sixth commandment is: You shall not murder (Ex. 20:13). The earliest laws in America illustrate that punishment for murder was rooted in the Ten Commandments. A 1641 Massachusetts law declared:

- 4. Ex. 21:12, Numb. 35:13-14, 30-31. If any person commit any willful murder, which is manslaughter committed upon premeditated malice, hatred, or cruelty, not in a mans necessary and just defense nor by mere casualty against his will, he shall be put to death.
- 5. Numb. 25:20-21, Lev. 24:17. If any person slayeth another suddenly in his anger or cruelty of passion, he shall be put to death.
- 6. Ex. 21:14. If any person shall slay another through guile, either by poisoning or other such devilish practice, he shall be put to death. {20}

The seventh commandment is: You shall not commit adultery (Ex. 20:14). Most colonies and states had laws against adultery. Even in the late Nineteenth century, the highest criminal court in the state of Texas declared that its laws came from the Ten Commandments:

The accused would insist upon the defense that the female consented. The state would reply that she could not consent. Why? Because the law prohibits, with a penalty, the completed act. Thou shalt not commit adultery is our law as well as the law of the Bible. {21}

The eighth commandment is: You shall not steal (Ex. 20:15). All colonies and states had laws against stealing based upon the Ten Commandments. In 1940, the Supreme Court of California acknowledged:

Defendant did not acknowledge the dominance of a fundamental precept of honesty and fair dealing enjoined by the Decalogue

and supported by moral concepts. Thou shalt not steal applies with equal force and propriety to the industrialist of a complex civilization as to the simple herdsman of ancient Israel. {22}

The Louisiana Supreme Court in 1951 also acknowledged: In the Ten Commandments, the basic law of all Christian countries, is found the admonition Thou shalt not steal.

The ninth commandment is: You shall not bear false witness against your neighbor (Ex. 20:16). The colonies and states had laws against perjury and bearing false witness. In modern times, the Oregon Supreme Court declared that: No official is above the law. Thou shalt not bear false witness is a command of the Decalogue, and that forbidden act is denounced by statute as a felony. {23}

The tenth commandment is: You shall not covet (Ex. 20:17). Many of the founders and framers saw this commandment as a foundation for others. William Penn of Pennsylvania declared that he that covets can no more be a moral man than he that steals since he does so in his mind. {24} John Adams argued that: If Thou shalt not covet and Thou shalt not steal were not commandments of Heaven, they must be made inviolable precepts in every society before it can be civilized or made free. {25}

Christian Discernment

We are confronted with ethical choices and moral complexity. We must apply biblical principles to these social and political issues. And we must avoid the pitfalls and logical fallacies that so often accompany these issues.

This article is also available in <u>Spanish</u>.

Turn on a television or open a newspaper. You are immediately presented with a myriad of ethical issues. Daily we are confronted with ethical choices and moral complexity. Society is awash in controversial issues: abortion, euthanasia, cloning, race, drug abuse, homosexuality, gambling, pornography, and capital punishment. Life may have been simpler in a previous age, but now the rise of technology and the fall of ethical consensus have brought us to a society full of moral dilemmas.

Never has society needed biblical perspectives more to evaluate contemporary moral issues. And yet Christians seem less equipped to address these topics from a biblical perspective. The Barna Research Group conducted a national survey of adults and concluded that only four percent of adults have a biblical worldview as the basis of their decision-making. The survey also discovered that nine percent of born again Christians have such a perspective on life. {1}

It is worth noting that what George Barna defines as a biblical worldview would be considered by most people to be basic Christian doctrine. It doesn't even include aspects of a biblical perspective on social and political issues.

Of even greater concern is the fact that most Christians do not base their beliefs on an absolute moral foundation. Biblical ethics rests on the belief in absolute truth. Yet surveys show that a minority of born again adults (forty-four percent) and an even smaller proportion of born again teenagers (nine percent) are certain of the existence of absolute moral truth. {2} By a three-to-one margin adults say truth is always relative to the person and their situation. This perspective is even more lopsided among teenagers who overwhelmingly believe moral truth depends on the circumstances. {3}

Social scientists as well as pollsters have been warning that American society is becoming more and more dominated by moral anarchy. Writing in the early 1990s, James Patterson and Peter Kim said in *The Day America Told the Truth* that there was no moral authority in America. "We choose which laws of God we believe in. There is absolutely no moral consensus in this country as there was in the 1950s, when all our institutions commanded more respect." {4} Essentially we live in a world of moral anarchy.

So how do we begin to apply a Christian worldview to the complex social and political issues of the day? And how do we avoid falling for the latest fad or cultural trend that blows in the wind? The following are some key principles to apply and some dangerous pitfalls to avoid.

Biblical Principles

A key biblical principle that applies to the area of bioethics is the sanctity of human life. Such verses as Psalm 139:13-16 show that God's care and concern extend to the womb. Other verses such as Jeremiah 1:5, Judges 13:7-8, Psalm 51:5 and Exodus 21:22-25 give additional perspective and framework to this principle. These principles can be applied to issues ranging from abortion to stem cell research to infanticide.

A related biblical principle involves the equality of human beings. The Bible teaches that God has made "of one blood all nations of men" (Acts 17:26). The Bible also teaches that it is wrong for a Christian to have feelings of superiority (Philippians 2). Believers are told not to make class distinctions between various people (James 2). Paul teaches the spiritual equality of all people in Christ (Galatians 3:28; Colossians 3:11). These principles apply to racial relations and our view of government.

A third principle is a biblical perspective on marriage. Marriage is God's plan and provides intimate companionship for life (Genesis 2:18). Marriage provides a context for the procreation and nurture of children (Ephesians 6:1-2). And finally, marriage provides a godly outlet for sexual desire (1 Corinthians 7:2). These principles can be applied to such diverse issues as artificial reproduction (which often introduces a third party into the pregnancy) and cohabitation (living together).

Another biblical principle involves sexual ethics. The Bible teaches that sex is to be within the bounds of marriage, as a man and the woman become one flesh (Ephesians 5:31). Paul teaches that we should "avoid sexual immorality" and learn to control our own body in a way that is "holy and honorable" (1 Thessalonians 4:3-5). He admonishes us to flee sexual immorality (1 Corinthians 6:18). These principles apply to such issues as premarital sex, adultery, and homosexuality.

A final principle concerns government and our obedience to civil authority. Government is ordained by God (Rom.13:1-7). We are to render service and obedience to the government (Matt. 22:21) and submit to civil authority (1 Pet. 2:13-17). Even though we are to obey government, there may be certain times when we might be forced to obey God rather than men (Acts 5:29). These principles apply to issues such as war, civil disobedience, politics, and government.

Biblical Discernment

So how do we sort out what is true and what is false? This is a difficult proposition in a world awash in data. It underscores the need for Christians to develop discernment. This is a word that appears fairly often in the Bible (1 Samuel 25:32-33; 1 Kings 3:10-11; 4:29; Psalm 119:66; Proverbs 2:3; Daniel 2:14; Philippians 1:9 [NASB]). And with so many facts, claims, and opinions being tossed about, we all need to be able to sort through what is true and what is false.

Colossians 2:8 says, "See to it that no one takes you captive through philosophy and empty deception, according to the tradition of men, according to the elementary principles of the world, rather than according to Christ." We need to develop discernment so that we are not taken captive by false ideas. Here are some things to watch for:

1. Equivocation — the use of vague terms. Someone can start off using language we think we understand and then veer off into a new meaning. Most of us are well aware of the fact that religious cults are often guilty of this. A cult member might say that he believes in salvation by grace. But what he really means is that you have to join his cult and work your way toward salvation. Make people define the vague terms they use.

This tactic is used frequently in bioethics. Proponents of embryonic stem cell research often will not acknowledge the

distinction between adult stem cells and embryonic stem cells. Those trying to legalize cloning will refer to it as "somatic cell nuclear transfer." Unless you have a scientific background, you will not know that it is essentially the same thing.

2. Card stacking — the selective use of evidence. Don't jump on the latest bandwagon and intellectual fad without checking the evidence. Many advocates are guilty of listing all the points in their favor while ignoring the serious points against it.

The major biology textbooks used in high school and college never provide students with evidence against evolution. Jonathan Wells, in his book *Icons of Evolution*, shows that the examples that are used in most textbooks are either wrong or misleading. {5} Some of the examples are known frauds (such as the Haeckel embryos) and continue to show up in textbooks decades after they were shown to be fraudulent.

Another example would be the Y2K fears. Anyone who was concerned about the potential catastrophe in 2000 need only read any of the technical computer journals in the 1990s to see that no computer expert was predicting what the Y2K fear mongers were predicting at the time.

3. Appeal to authority — relying on authority to the exclusion of logic and evidence. Just because an expert says it, that doesn't necessarily make it true. We live in a culture that worships experts, but not all experts are right. Hiram's Law says: "If you consult enough experts, you can confirm any opinion."

Those who argue that global warming is caused by human activity often say that "the debate in the scientific community is over." But an Internet search of critics of the theories behind global warming will show that there are many scientists with credentials in climatology or meteorology who

have questions about the theory. It is not accurate to say that the debate is over when the debate still seems to be taking place.

4. Ad hominem — Latin for "against the man." People using this tactic attack the person instead of dealing with the validity of their argument. Often the soundness of an argument is inversely proportional to the amount of ad hominem rhetoric. If there is evidence for the position, proponents usually argue the merits of the position. When evidence is lacking, they attack the critics.

Christians who want public libraries to filter pornography from minors are accused of censorship. Citizens who want to define marriage as between one man and one woman are called bigots. Scientists who criticize evolution are subjected to withering attacks on their character and scientific credentials. Scientists who question global warming are compared to holocaust deniers.

5. Straw man argument — making your opponent's argument seem so ridiculous that it is easy to attack and knock down. Liberal commentators say that evangelical Christians want to implement a religious theocracy in America. That's not true. But the hyperbole works to marginalize Christian activists who believe they have a responsibility to speak to social and political issues within society.

Those who stand for moral principles in the area of bioethics often see this tactic used against them. They hear from proponents of physician assisted suicide that pro-life advocates don't care about the suffering of the terminally ill. Proponents of embryonic stem cell research level the same charge by saying that pro-life people don't care that these new medical technologies could alleviate the suffering of many with intractable diseases. Nothing could be further from the truth.

6. Sidestepping — dodging the issue by changing the subject. Politicians do this in press conferences by not answering the question asked by the reporter, but instead answering a question they wish someone had asked. Professors sometimes do that when a student points out an inconsistency or a leap in logic.

Ask a proponent of abortion whether the fetus is human and you are likely to see this tactic in action. He or she might start talking about a woman's right to choose or the right of women to control their own bodies. Perhaps you will hear a discourse on the need to tolerate various viewpoints in a pluralistic society. But you probably won't get a straight answer to an important question.

7. Red herring — going off on a tangent (from the practice of luring hunting dogs off the trail with the scent of a herring fish). Proponents of embryonic stem cell research rarely will talk about the morality of destroying human embryos. Instead they will go off on a tangent and talk about the various diseases that could be treated and the thousands of people who could be helped with the research.

Be on the alert when someone in a debate changes the subject. They may want to argue their points on more familiar ground, or they may know they cannot win their argument on the relevant issue at hand.

In conclusion, we have discussed some of the key biblical principles we should apply to our consideration and debate about social and political issues. We have talked about the sanctity of human life and the equality of human beings. We have discussed a biblical perspective on marriage and on sexual ethics. And we have also talked about a biblical perspective on government and civil authority.

We have also spent some time talking about the importance of developing biblical discernment and looked at many of the

logical fallacies that are frequently used in arguing against a biblical perspective on many of the social and political issues of our day.

Every day, it seems, we are confronted with ethical choices and moral complexity. As Christians it is important to consider these biblical principles and consistently apply them to these issues. It is also important that we develop discernment and learn to recognize these tactics. We are called to develop discernment as we tear down false arguments raised up against the knowledge of God. By doing this we will learn to take every thought captive to the obedience to Christ (2 Corinthians 10:4-5).

"What's Your Position on

Creationism?"

Kerby,

Thanks for coming to the Worldview Weekend. I know you don't hold to evolutionism, per se. But after the conference in Wichita last week, I was wondering, do you agree with the Bible's chronology of the earth being older than the sun. That the record in Genesis (and Ex. 20:11) of the six days of creation are to be understood as ordinary days. Finally, do you agree with the idea of no bloodshed and disease before the fall of man? In other words, should I believe the Bible or what I have been taught?

The reason why I am asking is I know that I have compromised in these areas of Genesis and lead many down a road of disbelief because of that.

Please send me your answers with Biblical references.

Thank you for your e-mail. You might want to visit the Probe web site (www.probe.org) and read two articles. One deals with different views of science and earth history. The other deals with why we believe in creation. I think these two will help you think through the issues and would accurately represent the perspective of all of us on Probe Ministries staff.

Thanks for writing.

Kerby Anderson
