“Should a Christian Radio Station Accept an Underwriting Grant from a Ford Dealership?”

I am on the board of a local Christian radio station. We have a man who is a franchise owner of a Ford Motor Company Dealership. He is a Christian and wants to support our radio station through his dealership. There is currently a national boycott against Ford for their support of homosexual agendas. Is it ethical to allow him to underwrite our station when we are in support of the national boycott of Ford products? We as a board want to do the right thing.

Thank you for your question. This is a good case of an ethical dilemma in which Christians may come to different conclusions.

1. The Bible clearly teaches that if someone believes a particular action to be wrong for them, then it is wrong. Paul says in Romans 14:4, I know and am convinced in the Lord Jesus that nothing is unclean in itself; but to him who thinks anything to be unclean, to him it is unclean. So if a station manager feels it would be wrong to receive support from a Ford dealership, then it is wrong. End of discussion.

2. However, if a station manager does NOT have an initial moral concern, then you might consider some other issues:

(a) Many people would see a distinction between the Ford Motor Company and a local dealership. While we may disagree with the policies of the national leadership of Ford toward homosexuality, that doesn't necessarily mean that the local

dealership agrees with those policies. In fact, one of the sad results of the boycott has been that many local Ford dealerships (run by godly Christians who disagree with Ford's policies) have been hurt by the boycott.

(b) This leads to my next point. Many Christians do not agree that a boycott of Ford Motor Company is the best way to send a signal to the company. They feel that it is too blunt an instrument. Some Christians may be led to follow the boycott, while others do not. Paul says in Romans 14:3 that the one who eats is not to regard with contempt the one who does not eat nor should the one who does not eat . . . judge the one who eats. In other words, whether you participate in or refrain from a boycott is an individual decision that a station manager should be "fully convinced of" (Romans 14:5).

(c) Some might also point out that there is a difference between boycotting Ford and receiving a sponsorship from a local dealership. The station is not buying a Ford product but receiving an underwriting grant. Essentially, it is the difference between the station paying Ford and Ford paying the station. Obviously, this distinction is meaningless if one believes that anything Ford Motor Company does is tainted by their national policy. In that case, giving money to Ford or receiving money from Ford would be wrong.

So I would encourage you and your station manager to consider whether you feel it is wrong to receive a grant from the local Ford dealership as I describe in section #1. If you do, then the other points are meaningless. If you do NOT feel it would be wrong, then you might consider the three points I put under section #2.

Sex and Violence on Television – A Christian Worldview Perspective

Kerby Anderson takes a reasoned look at the amount of sex and violence portrayed on television and comes away with a sobering understanding of the intensity of the problem. From a biblical perspective, this level of consumption of disturbing images will result in a deadening of even Christian hearts to the clear call of Scripture to a life of purity in mind and action.

The Extent of the Problem

Is there too much sex and violence on television? Most Americans seem to think so. One survey found that seventy-five percent of Americans felt that television had “too much sexually explicit material.” Moreover, eighty-six percent believed that television had contributed to “a decline in values.”[{1}](#) And no wonder. Channel surfing through the television reveals plots celebrating premarital sex, adultery, and even homosexuality. Sexual promiscuity in the media appears to be at an all-time high. A study of adolescents (ages twelve to seventeen) showed that watching sex on TV influences teens to have sex. Youths were more likely to initiate intercourse as well as other sexual activities.[{2}](#)

A study by the Parents Television Council found that prime time network television is more violent than ever before. In addition, they found that this increasing violence is also of a sexual nature. They found that portrayals of violence are up seventy-five percent since 1998.[{3}](#)

The study also provided expert commentary by Deborah Fisher, Ph.D. She states that children, on average, will be exposed to a thousand murders, rapes, and assaults per year through television. She goes on to warn that early exposure to television violence has “consistently emerged as a significant predictor of later aggression.”[{4}](#)

A previous study by the Parents Television Council compared the changes in sex, language, and violence between decades. The special report entitled *What a Difference a Decade Makes* found many shocking things.[{5}](#)

First, on a per-hour basis, sexual material more than tripled in the last decade. For example, while references to homosexuality were once rare, now they are mainstream. Second, the study found that foul language increased five-fold in just a decade. They also found that the intensity of violent incidents significantly increased.

These studies provide the best quantifiable measure of what has been taking place on television. No longer can defenders of television say that TV is “not that bad.” The evidence is in, and television is more offensive than ever.

Christians should not be surprised by these findings. Sex and violence have always been part of the human condition because of our sin nature (Romans 3:23), but modern families are exposed to a level of sex and violence that is unprecedented. Obviously, this will have a detrimental effect. The Bible teaches that “as a man thinks in his heart, so is he” (Proverbs 23:7, KJV). What we see and hear affects our actions. And while this is true for adults, it is especially true for children.

Television’s Impact on Behavior

What is the impact of watching television on subsequent behavior? There are abundant studies which document that what

you see, hear, and read does affect your perception of the world and your behavior.

The American Academy of Pediatrics in 2000 issued a “Joint Statement on the Impact of Entertainment Violence on Children.” They cited over one thousand studies, including reports from the Surgeon General’s office and the National Institute of Mental Health. They say that these studies “point overwhelmingly to a causal connection between media violence and aggressive behavior in some children.”[\[6\]](#)

In 1992, the American Psychological Association concluded that forty years of research on the link between TV violence and real-life violence has been ignored, stating that “the ‘scientific debate is over’ and calling for federal policy to protect society.”[\[7\]](#)

A 1995 poll of children ten to sixteen years of age showed that children recognize that “what they see on television encourages them to take part in sexual activity too soon, to show disrespect for their parents, [and] to lie and to engage in aggressive behavior.” More than two-thirds said they are influenced by television; seventy-seven percent said TV shows too much sex before marriage, and sixty-two percent said sex on television and in movies influences their peers to have sexual relations when they are too young. Two-thirds also cited certain programs featuring dysfunctional families as encouraging disrespect toward parents.

The report reminds us that television sets the baseline standard for the entire entertainment industry. Most homes (ninety-eight percent) have a television set. And according to recent statistics, that TV in the average household is on more than eight hours each day.[\[8\]](#)

By contrast, other forms of entertainment (such as movies, DVDs, CDs) must be sought out and purchased. Television is universally available, and thus has the most profound effect

on our culture.

As Christians we need to be aware of the impact television has on us and our families. The studies show us that sex and violence on TV can affect us in subtle yet profound ways. We can no longer ignore the growing body of data that suggests that televised imagery does affect our perceptions and behaviors. So we should be concerned about the impact television (as well as other forms of media) has on our neighbors and our society as a whole.

Sex on Television

Most Americans believe there is too much sex on television. A survey conducted in 1994 found that seventy-five percent of Americans felt that television had “too much sexually explicit material.” Moreover, eighty-six percent believed that television had contributed to “a decline in values.”[{9}](#) As we documented earlier, sexual promiscuity on television is at an all-time high.

I have previously written about the subject of pornography and talked about the dangerous effects of sex, especially when linked with violence.[{10}](#) Neil Malamuth and Edward Donnerstein document the volatile impact of sex and violence in the media. They say, “There can be relatively long-term, anti-social effects of movies that portray sexual violence as having positive consequences.”[{11}](#)

In a message given by Donnerstein, he concluded with this warning and observation: “If you take normal males and expose them to graphic violence against women in R-rated films, the research doesn’t show that they’ll commit acts of violence against women. It doesn’t say they will go out and commit rape. But it does demonstrate that they become less sensitized to violence against women, they have less sympathy for rape victims, and their perceptions and attitudes and values about

violence change.”[{12}](#)

It is important to remember that these studies are applicable not just to hard-core pornography. Many of the studies used films that are readily shown on television (especially cable television) any night of the week. And many of the movies shown today in theaters are much more explicit than those shown just a few years ago.

Social commentator Irving Kristol asked this question in a *Wall Street Journal* column: “Can anyone really believe that soft porn in our Hollywood movies, hard porn in our cable movies and violent porn in our ‘rap’ music is without effect? Here the average, overall impact is quite discernible to the naked eye. And at the margin, the effects, in terms most notably of illegitimacy and rape, are shockingly visible.”[{13}](#)

Christians must be careful that sexual images on television don’t conform us to the world (Rom. 12:2). Instead we should use discernment. Philippians 4:8 says, “Finally, brothers, whatever is true, whatever is noble, whatever is right, whatever is pure, whatever is lovely, whatever is admirable, if anything is excellent or praiseworthy, think about such things.”

Sex on television is at an all-time high, so we should be even more careful to screen what we and our families see. Christians should be concerned about the images we see on television.

Violence on Television

Children’s greatest exposure to violence comes from television. TV shows, movies edited for television, and video games expose young children to a level of violence unimaginable just a few years ago. The American Psychological Association says the average child watches eight thousand televised murders and one hundred thousand acts of violence

before finishing elementary school.[{14}](#) That number more than doubles by the time he or she reaches age eighteen.

At a very young age, children are seeing a level of violence and mayhem that in the past may have been seen only by a few police officers and military personnel. TV brings hitting, kicking, stabbings, shootings, and dismemberment right into homes on a daily basis.

The impact on behavior is predictable. Two prominent Surgeon General reports in the last two decades link violence on television and aggressive behavior in children and teenagers. In addition, the National Institute of Mental Health issued a ninety-four page report, *Television and Behavior: Ten Years of Scientific Progress and Implications for the Eighties*. They found “overwhelming” scientific evidence that “excessive” violence on television spills over into the playground and the streets.[{15}](#) In one five-year study of 732 children, “several kinds of aggression, conflicts with parents, fighting and delinquency, were all positively correlated with the total amount of television viewing.”[{16}](#)

Long-term studies are even more disturbing. University of Illinois psychologist Leonard Eron studied children at age eight and then again at eighteen. He found that television habits established at the age of eight influenced aggressive behavior throughout childhood and adolescent years. The more violent the programs preferred by boys in the third grade, the more aggressive their behavior, both at that time and ten years later. He therefore concluded that “the effect of television violence on aggression is cumulative.”[{17}](#)

Twenty years later Eron and Rowell Huesmann found the pattern continued. He and his researchers found that children who watched significant amounts of TV violence at the age of eight were consistently more likely to commit violent crimes or engage in child or spouse abuse at thirty.[{18}](#) They concluded that “heavy exposure to televised violence is one of the

causes of aggressive behavior, crime and violence in society. Television violence affects youngsters of all ages, of both genders, at all socioeconomic levels and all levels of intelligence.”[{19}](#)

Violent images on television affect children in adverse ways and Christians should be concerned about the impact.

Biblical Perspective

Television is such a part of our lives that we often are unaware of its subtle and insidious influence. Nearly every home has a television set, so we tend to take it for granted and are often oblivious to its influence.

I’ve had many people tell me that they watch television, and that it has no impact at all on their worldview or behavior. However the Bible teaches that “as a man thinks in his heart, so is he” (Proverbs 23:7). What we view and what we think about affects our actions. And there is abundant psychological evidence that television viewing affects our worldview.

George Gerbner and Larry Gross, working at the Annenberg School of Communications in the 1970s, found that heavy television viewers live in a scary world. “We have found that people who watch a lot of TV see the real world as more dangerous and frightening than those who watch very little. Heavy viewers are less trustful of their fellow citizens, and more fearful of the real world.”[{20}](#) Heavy viewers also tended to overestimate their likelihood of being involved in a violent crime. They defined heavy viewers as those adults who watch an average of four or more hours of television a day. Approximately one-third of all American adults fit that category.

And if this is true of adults, imagine how television violence affects children’s perceptions of the world. Gerbner and Gross say, “Imagine spending six hours a day at the local movie

house when you were twelve years old. No parent would have permitted it. Yet, in our sample of children, nearly half of the twelve-year-olds watch an average of six or more hours of television per day." This would mean that a large portion of young people fit into the category of heavy viewers. Their view of the world must be profoundly shaped by TV. Gerbner and Gross therefore conclude, "If adults can be so accepting of the reality of television, imagine its effect on children. By the time the average American child reaches public school, he has already spent several years in an electronic nursery school."[\[21\]](#)

Television viewing affects both adults and children in subtle ways. We must not ignore the growing body of data that suggests that televised imagery does affect our perceptions and behaviors. Our worldview and our subsequent actions are affected by what we see on television. Christians, therefore, must be careful not to let television conform us to the world (Romans 12:2), but instead should develop a Christian worldview.

Darwinism and Truth

Darwinism and the Fact/Value Split

Nancy Pearcey writes in her book *Total Truth* that Christians must counter the effects of our secular culture and mindset by developing a consistent and comprehensive biblical worldview.[{1}](#) In the middle chapters of her book, she demonstrates how Christians should do this with the question of origins.

Earlier in her book she notes that our society has divided truth into two categories. She calls this the sacred /secular split or the private/public split or the fact/value split. They are different ways of saying the same thing. Religion and moral values are subjective and shoved into the upper story where private opinions and values reside. And in the lower story are hard, verifiable facts and scientific knowledge.

There is another key point to this split. The two spheres should not intersect. In other words, it would be bad manners and a violation of logic to allow your personal and private choices and values to intersect with your public life. As the popular saying goes, that would be “shoving your religion down someone’s throat.”

Ray Bohlin’s [review](#) of Pearcey’s book provides further explanation for how this idea plays out in society.[{2}](#)

Darwinists accept this split and have even tried to convince Christians that in this way religion is safe from the claims and conclusions of Darwinian evolution. But a brief glance at the best seller list shows that evolutionists regularly invade this upper story of values with their harsh criticism.

In *The God Delusion*, Richard Dawkins says that religious belief is psychotic, and arguments for the existence of God

are nonsense. Sam Harris echoes that sentiment in his bestselling book, *Letter to a Christian Nation*. Daniel Dennett, in his book *Breaking the Spell*, believes that religion must be subjected to scientific evaluation.

Nancy Pearcey shows that Darwinism leads to naturalism. And this is a naturalistic view of knowledge where “theological dogmas and philosophical absolutes were at worst totally fraudulent and at best merely symbolic of deep human aspirations.”[\[3\]](#) In other words, if Darwinian evolution is true, then religion and philosophical absolutes are not true. Truth, honesty, integrity, morality are not true but actually fraudulent concepts and ideas. If we hold to them at all, they were merely symbolic but not really true in any sense.

Daniel Dennett, in his book *Darwin’s Dangerous Idea*, says that Darwinism is a “universal acid” which is his allusion to a children’s riddle about an acid that is so corrosive that it eats through everything including the flask that holds it. In other words, Darwinism is too corrosive to be contained. It eats through every academic field of study and destroys ethics, morality, truth, and absolutes. When it is finished, Darwinism “eats through just about every traditional concept and leaves in its wake a revolutionized world-view.”[\[4\]](#)

Darwinism and Naturalism

Pearcey writes that “Darwinism functions as the scientific support for an overarching naturalistic worldview.”[\[5\]](#) Today scientists usually assume that scientific investigation requires naturalism. But that was not always the case.

When the scientific revolution began (and for the next three hundred years), science and Christianity were considered to be compatible with one another. In fact, most scientists had some form of Christian faith, and they perceived the world of diversity and complexity through a theistic framework. Pearcey

points out that Copernicus, Galileo, Kepler, Newton, and others sought to understand the world and use their gifts to honor God and serve humanity.

By the nineteenth century, secular trends began to change their perspective. This culminated with the publication of *The Origin of Species* by Charles Darwin. His theory of evolution provided the needed foundation for naturalism to explain the world without God. From that point on, social commentators began to talk about the “war between science and religion.”

By the twentieth century, G. K. Chesterton was warning that Darwinian evolution and naturalism was becoming the dominant “creed” in education and the other public arenas of Western culture. He said it “began with Evolution and has ended in Eugenics.” Ultimately, it “is really our established Church.”[{6}](#)

Today, it is easy to see how scientists believe that naturalism and science are essentially the same thing. They often slip from physics to metaphysics. In other words, they leave the boundaries of science and begin to make philosophical statements about the nature of the universe. While scientists can tell us how the universe operates, they cannot tell us if there is anything outside of the universe.

But that didn't stop astronomer Carl Sagan in the PBS program “Cosmos.” The first words you hear from him are: “The Cosmos is all that is or ever was or ever will be.”[{7}](#) In other words, the universe (or Cosmos) is all there is: no God, no heaven.

Now, Carl Sagan's comment is not a scientific statement. It's a philosophical statement. And it set the ground rules for the rest of the program. Nature is all there is. In many ways it sounds like a creed. It is as if Carl Sagan was attempting to modify the *Gloria Patri*: “As it was in the beginning, is now, and ever will be.”

Do those ideas end up in our children's books? Nancy Pearcey tells the story of picking up a science book for her son, *The Bears' Nature Guide*, which featured the Berenstain Bears. The Bear family goes on a nature walk. Turn a few pages in the book and you will see a sunrise with these words in capital letters: "Nature . . . is all that IS, or WAS, or EVER WILL BE!"[\[8\]](#) Sounds like a heavy dose of Carl Sagan's naturalism packaged for young children courtesy of the Berenstain Bears.

If you are looking for a resource to counter this Darwinian and naturalistic indoctrination, let me recommend Probe's DVD series on "Redeeming Darwin." It will give you the intellectual ammunition you need.

In *Total Truth*, Nancy Pearcey discusses many of the so-called "icons of evolution" that Jonathan Wells documents in his book by that title.[\[9\]](#) These examples show up in nearly every high school and college biology textbook. But these examples which are used to "prove" evolution are either fraudulent or fail to prove evolution.

Let's start with a piece of evidence for evolution that was found where Charles Darwin first got his inspiration for his theory of evolution: the [Galapagos Islands](#). The islands can be found off the coast of South America. On those islands are finches, which have come to be known as Darwin's finches. It's hard to find a biology textbook that doesn't tell the story of these finches.

One study found that during a period of drought, the average beak size of these finches increased slightly. The reason cited for this is that during these dry periods, the most available seeds are larger and tougher to crack than at other times. So birds with larger beaks do better in conditions of drought.

I spent an afternoon looking at specimens of Darwin's finches when I was in graduate school at Yale University and should

point out that the changes in beak thickness is minimal and thus measured in tens of millimeters (thickness of a thumbnail). Moreover, the changes seem to be cyclical. When the rains returns, the original size seeds appear and the average beak size returns to normal.

This is not evolution. It is an interesting cyclical pattern in natural history. But it's not evolution. Nevertheless, one science writer enthusiastically proclaimed that this is evolution happening "before [our] very eyes."[10](#)

If this is evolution occurring then we should be seeing macro changes that would allow these finches to evolve into another species. But this cyclical pattern shows just the opposite. These minor changes in beak size and thickness actually allow them to remain finches under changing environmental conditions. It does not show them evolving into another species.

So what has been the response from the scientific establishment? The National Academy of Sciences put out a booklet on evolution for teachers. The booklet did not even mention that the average beak size returned to normal after drought. Instead the booklet makes unwarranted speculation about what might happen if these changes were to continue indefinitely for a few hundred years. "If droughts occur about once every ten years on the islands, a new species of finch might arise in only 200 years."[11](#)

Is this an accurate conclusion based upon the facts of natural history? It seems to be a clear example of misleading teachers (who in turn will unintentionally mislead their students). The booklet teaches that the beak sizes in Darwin's finches are directional and evolutionary rather than cyclical and reversible.

A column in the *Wall Street Journal* made this point. "When our leading scientists have to resort to the sort of distortion

that would land a stock promoter in jail,” Phillip Johnson said, “you know they are in trouble.”[{12}](#)

Ray Bohlin’s [review](#) of Jonathan Well’s book, *Icons of Evolution*, provides further detail on some of these examples.[{13}](#)

Peppered Moths

One example that appears in most biology textbooks is the story of the peppered moths in England. The moths appear in two forms: dark gray and light gray. During the Industrial Revolution, the factories produced pollution that darkened the tree trunks. This made it easier for birds to catch and eat the lighter colored moths. Later, when pollution was cleaned up, the tree trunks were lighter and it made it easier for the birds to catch the darker colored moths.

On its face, all this example proves is that the ratio of dark colored and light colored moths changed over time. In many ways, this is nothing more than another example of cyclical changes that we just discussed concerning Darwin’s finches.

But there is much more to the story. Peppered moths don’t actually perch on tree trunks. Actually they are quite torpid during the daylight hours and rest in the upper canopy of the trees.

If you have ever been in a biology class you have seen pictures of these moths on the tree trunks. You might even have seen a film that was made decades ago of birds landing on the trees and catching moths. It turns out that in order to create the photos and the film scientists put the moths in a freezer to immobilize them and then glued them to the tree trunks.

How did this example become such an enduring icon of evolution? Scientists accepted it for many years uncritically

because they wanted to believe it and needed a visual example to show evolution. The peppered moth story fit the bill and quickly became “an irrefutable article of faith.”[\[14\]](#)

Now there are journal articles, and even books, that document the scientific scandal surrounding the story of the peppered moths. One leading evolutionist noted that the story was a “prize horse in our stable of examples.” He goes on to say that when he learned the truth, it was like learning “that it was my father and not Santa Claus who brought the presents on Christmas Eve.”[\[15\]](#)

But what is so amazing is that this example still shows up with regularity in biology textbooks, even though most scientists and textbook writers know the story is untrue. One reporter even interviewed a textbook writer who admitted that he knew the photos were faked but used them in the biology textbook anyway. “The advantage of this example,” he argued, “is that it is extremely visual.” He went on to add that “we want to get across the idea of selective adaptation. Later on, they can look at the work critically.”[\[16\]](#)

The examples of the falsified “icons of evolution” demonstrate the extremes to which many Darwinists will go to “prove” the theory of evolution. They keep an incorrect example in the textbooks simply because it is visual and supports the theory of evolution and worldview of naturalism.

Fraudulent Embryos

Nearly every textbook has pictures of developing vertebrate embryos lined up across the page to demonstrate an evolutionary history being replayed in the womb. These pictures are placed there to show common ancestry and thus prove evolution. During this day, Charles Darwin called the similarity of vertebrate embryos “by far the strongest single class of facts in favor of” his theory of evolution.[\[17\]](#)

In biology class many of us learned the phrase “ontogeny recapitulates phylogeny.” That means that these developing embryos go through similar stages that replay the stages of evolution. So this supposedly was embryological proof of evolution.

But it turns out that the pictures were and are an elaborate hoax. German scientist Ernst Haeckel drew them in order to prove evolution. He deliberately drew the embryos more similar than they really are.

What is so incredible about this hoax is that it was known more than a century ago. Scientists knew the drawings were incorrect, and his colleagues accused him of fraud. An embryologist, writing in the journal *Science*, called Haeckel’s drawings “one of the most famous fakes in biology.”[\[18\]](#)

Now you would think that a hoax uncovered more than a hundred years ago would certainly not make it into high school and college biology textbooks. But if you assumed that, you would be wrong. Many textbooks continue to reprint drawings labeled as a hoax a century ago.

So why do Darwinists continue to believe in the theory of evolution and even use examples to “prove” evolution that are not true. It may be due to a bias in their worldview. The only theories that they believe are acceptable are those that are developed within a naturalistic framework.

Richard Dawkins noted: “*Even if there were no actual evidence in favor of the Darwinian theory . . . we would still be justified in preferring it over rival theories.*”[\[19\]](#) Think about that statement for a moment. Even if there were no evidence for evolution, Darwinists would still believe it because it is naturalistic.

Another professor made an even more incredible statement. He said: “Even if all the data point to an intelligent designer, such an hypothesis is excluded from science because it is not

naturalistic.”[{20}](#) Now think about that. Even if the evidence points to intelligent design rather than to evolution, it is excluded from consideration because it is not naturalistic.

As you can see from these two quotes (as well as from some of the other material presented here), the commitment to evolution is more philosophical than scientific. Nancy Pearcey concludes that “the issue is not fundamentally a matter of evidence at all, but of a prior philosophical commitment.”[{21}](#)

Again, let me also recommend Probe’s DVD series on “Redeeming Darwin” that is available through Probe’s website www.probe.org.

High Tech Witchcraft

April 26, 2007

Mention witchcraft and most people will think of Harry Potter. And while these books and movies have certainly been incredibly successful in promoting witchcraft, they represent only part of a larger campaign to spread the ideas of Wicca, witchcraft, and Neopaganism throughout our society.

In a recent article in *SCP Newsletter*, Marcia Montenegro talked

about how witchcraft has gone “high tech.” Parents should not only pay attention to books and movies. They should also pay attention to the impact that computers and the Internet are having in the promoting of witchcraft. Here are just a few examples.

1. Dungeons and Dragons – has been a popular fantasy role playing game for many years. Now kids can play it on the Internet or in video or computer games. The player begins by choosing a character to role-play. Each of these characters have different traits and abilities. The game is supervised by an experienced player known as the Dungeon Master. The game uses a number of occult terms. These include: spell casting, invocation, evocation, and summon. And there are spells such as the death spell and the finger of death.

There are several books about Dungeons and Dragons that also give information and suggestions for spell casting. In one book, there is a warning of “The Cost of Magic.” It says, “Wizards may have to make terrible pacts with dark powers for the knowledge they seek, priests may have to sacrifice something dear to them to invoke their deity’s favor, or the spell-caster may pay an immediate price in terms of fatigue, illness, or even a loss of sanity.”

2. Magic: The Gathering – is a fantasy trading card game created in the early 1990s. The cards are linked to one of five kinds of paranormal magic: red, blue, green, white or black. Players assume the role of wizards or mages (magicians) and use their cards to defeat other players in the game. A key term that shows up in this game as well as in movies like “The Craft” is the term *mana*. It refers to a magical force or power which is essentially a vital life force.

This card game is challenging and requires intricate strategy. It also introduces the players to scary and repulsive images. There is the Bone Shaman or the Necrite (shown licking blood off a dagger) or the Soul Drinker or the Sorceress Queen.

Parents should be concerned about the occult and macabre images that players in the game will see as well as the desensitization towards the occult and witchcraft.

3. Yu Gi Oh – was originally a comic created in Japan about a boy playing a card game called “Dueling Monsters.” This comic eventually gave rise to a card game, movies, and video games.

The story centers around Yugi who is possessed by a 5000-year-old pharaoh, Yama Yugi, who is trying to solve an ancient puzzle. One Internet site suggests that Yugi is taken over by “dark Yugi” when it needs to work on the puzzle. Others point out that during duels, Yugi seems possessed by the spirit which deepens his voice and shadows him.

4. The Vampire Games – is another role playing game that introduces the players to the world of vampires. This includes the live action role playing games such as *Vampire: The Masquerade* and *Vampire: the Requiem*.

As you might imagine, these games involve dark and macabre situations, including drinking blood and killing innocent people. The vampires are predators on humans and described as killing machines who struggle with their baser instincts. The vampires also have certain powers such as telepathy, psychic projection, and bodily possession.

Players often form clubs in order to play the game. Some players even imitate vampires in real life by wearing razor-sharp artificial fangs. The popularity of these games have spawned others: *Werewolf: The Forsaken*, *Mage: The Awakening*, and *Sword & Sorcery*.

5. World of Warcraft – is an online computer war game. It includes the typical action games strategies but also adds elements of the occult and New Age. There are four main races of beings: humans (one of the youngest races), Orcs (part of a Shamanistic society), Night Elves (who misuse magic), and the Undead Scourge (thousands of walking corpses and extra-

dimensional entities).

As with many of the other games already mentioned, strategy and the use of the occult and paranormal magic are key to success in this game. Powers are summoned and spells are cast.

These various forms of “high tech” spell casting are a doorway into the occult and witchcraft. The Bible warns of the dangers of divination, sorcery, and witchcraft (Exodus 22:18; Leviticus 19-20; Deuteronomy 18:10-12; 1 Samuel 15:23; 2 Kings 23:24; 1 Chronicles 10:13; Isaiah 2:6; 8:19-20; 47:13-14; Ezekiel 13:20-23; Daniel 2:27-28; 5:15-17; Acts 13:7-10; 16:16-18; Galatians 5:19-20; Revelation 22:15). We should not focus our minds and attention on what is dark and dangerous. We are called to let our minds dwell on what is true, honorable, pure, and lovely (Philippians 4:8).

Global Warming: Cool the Hype

Al Gore’s film, “An Inconvenient Truth,” won an Academy Award for best documentary. And Al Gore is being treated like a rock star at Hollywood parties and when he testified in front of Congress. But has Al Gore’s hype and hysteria gone too far?

That’s what many scientists and supporters are beginning to say. They are alarmed at his alarmism. “I don’t want to pick on Al Gore,” Don Easterbrook (emeritus professor of geology at Western Washington University) told hundred of experts at the annual meeting of the Geological Society of America. “But there are a lot of inaccuracies in the statements we are seeing, and we have to temper that with real data.”[\[1\]](#)

Kevin Vranes (climatologist at the Center for Science and Technology Policy Research at the University of Colorado) has praised Gore for “getting the message out” but also questioned whether his presentations were “overselling our certainty about knowing the future.”[\[2\]](#)

Global warming is the observed increase in the average temperature of the Earth’s atmosphere and oceans in recent decades. The argument made in many science journals and in Al Gore’s film is that most of the observed warming over the last fifty years is attributable to human activities. Political activists argue we must act now to prevent a global catastrophe.

These claims bring us back to the hype that many see in Al Gore’s film. He argues “Humanity is sitting on a ticking time bomb” and that “we have just ten years to avert a major catastrophe that could send our entire planet into a tail-spin of epic destruction involving extreme weather, droughts, epidemics and killer heat waves beyond anything we have ever experienced.”[\[3\]](#)

Throughout the film, Al Gore invariably will pick the most extreme estimate to prove that we are on the edge of a catastrophe. For example, if global warming really is taking place, how much will the sea level rise? Gore says 20 feet, and then shows a dramatic animation of what it would look like if various locations on earth were flooded by a sea level rise of 20 feet.

Yet the most recent summary of the United Nations Intergovernmental Panel on Climate Change doesn’t say anything like this.[\[4\]](#) Even though this panel is full of policy makers who believe in global warming and argue for major policy changes, they conclude that sea levels might rise 7 to 17 inches over the course of a century. There is a vast difference between sea levels rising about one foot versus 20 feet!

Add to this the number of factual errors in many of the presentations heralding a looming catastrophe from global warming. Iain Murray documents “25 inconvenient truths for Al Gore” in his column that analyzes the scientific statements in “An Inconvenient Truth.”[{5}](#) Bjorn Lomborg, author of the *Skeptical Environmentalist*, shows how the report on climate change by Nicholas Stern and the U.K. government makes sloppy errors and cherry-picks statistics.[{6}](#)

We should also mention that many scientists believe that the current warming is due to factors other than human activity. Sami Solanki (Max Planck Institute for Solar System Research, Germany) has quantitatively reconstructed the sun’s activity since the last Ice Age and says the sun “is brighter than it was a few hundred years ago and this brightening started relatively recently.”[{7}](#) Scientists have observed that the ice caps on Mars are melting, and Jupiter is developing a second giant red spot due to the sudden warming of our solar system’s largest planet.[{8}](#)

Those who dare to criticize the global warming scenario are often compared to being the moral equivalent of a holocaust denier.[{9}](#) In the film, Al Gore compares scientists who criticize his theory to scientists at the tobacco companies who tried to tell us that smoking was not harmful. Gore and others also say that many who are skeptical about global warming are being paid by the oil companies they say are running a disinformation campaign.

This last charge infuriated Dr. Easterbrook who told the geologists, “I’ve never been paid a nickel by an oil company.” He went on to add, “And I’m not a Republican.”

Al Gore argues that the global warming issue isn’t a political issue but rather a moral issue. Yet in his film, Al Gore argues we need the political will to confront and solve the issue. It doesn’t take much insight to realize there is a political agenda here.

The first step, say the activists, is to ratify the Kyoto Protocol. This treaty calls for the reduction in carbon dioxide emissions in the United States, the European Union, Japan, Canada, Australia, and New Zealand. When Al Gore was Vice President, it was brought before the U.S. Senate and defeated 95-0. It won't pass if put up for a vote once again.

But even if it did pass, it would only be a start. Estimates are that it would cost \$200 billion to \$1 trillion every year. But other Kyotos treaties would have to be ratified by the developing countries. After all, there are a billion people in China and a billion people in India, and China plans on building an additional 2,200 coal plants by 2030.^{10} One scientist speculated that "it might take another 30 Kyotos" to deal with global warming.^{11} And what would be the impact? Critics say that even if adhered to by every signatory, it would only reduce surface temperature by 0.13° F.^{12}

Even if we assume that global warming is occurring and assume that it is due only to human activity, the cost-benefit is enormous. Bjorn Lomborg established a program known as the Copenhagen Consensus.^{13} This panel (that included three Nobel Laureates in economics) evaluated strategies to deal with major problems facing humanity. When they listed these alternatives in descending order of effectiveness, things like treating communicable disease and hunger were at the top of the list while dealing with climate change were at the bottom of the list.

This suggests that *adaptation* to climate change will be more effective and less costly than *mitigation*. We need to cool the hype and let cooler heads make wise decisions.

Truth Decay

We live in a world that has dramatically changed its view of truth. What is the impact of the worldview of postmodernism and the ethical system of relativism in our society and inside the church?

Three Views of Truth

We live in a world that has dramatically changed its view of truth, and thus have inherited an ethical system that denies the existence of truth. The worldview of the twenty-first century is postmodernism, and the dominant ethical system of the last two centuries has been relativism.

To understand this changed view of truth, we need to consider the story of three baseball umpires.^[1] One said, "There's balls and there's strikes, and I call 'em the way they are." Another said, "There's balls and there's strikes, and I call 'em the way I see 'em." And the third umpire said, "There's balls and there's strikes, and they ain't nothing until I call them."

Their three different views of balls and strikes correspond with three different views of truth. The first is what we might call *premodernism*. This is a God-centered view of the universe that believes in divine revelation. Most of the ancient world had this view of true and believed that truth is absolute ("I call 'em the way they are"). By the time of the Enlightenment, Western culture was moving into a time of *modernism*. This view was influenced by the scientific revolution, and began to reject a belief in God. In this period, truth is relative ("I call 'em the way I see 'em"). Today we live in what many call *postmodernism*. In this view, there is a complete loss of hope for truth. Truth is not discovered; truth is created ("they ain't nothing until I call them").

Postmodernism is built upon the belief that truth doesn't exist except as the individual wants it to exist. Truth isn't objective or absolute. Truth is personal and relative. Postmodernism isn't really a set of doctrines or truth claims. It is a completely new way of dealing with the world of ideas. It has had a profound influence in nearly every academic area: literature, history, politics, education, law, sociology,

linguistics, even the sciences.

Postmodernism, however, is based upon a set of self-defeating propositions. What is a self-defeating proposition? If I said that my brother is an only child, you would say that my statement is self-refuting. An only child would not have a brother. Likewise, postmodernism is self-refuting.

Postmodernists assert that all worldviews have an equal claim to the truth. In other words, they deny absolute truth. But the denial of absolute truth is self-defeating. The claim that all worldviews are relative is true for everyone, everywhere, at all times. But that claim itself is an absolute truth.

It's like the student who said there was no absolute truth. When asked if his statement was an absolute truth. He said, "Absolutely." So he essentially said that he absolutely believed there was no absolute truth, except the absolute truth that there is no absolute truth!

Postmodernism

Postmodernism may seem tolerant, but in many ways it is not. For example, postmodernists tend to be skeptical of people (e.g., Christians) who claim to know truth. Now that doesn't mean that it is hostile to religion or spirituality. Postmodernists have no problem with religion unless it makes certain claims about its religion.

Postmodernists tolerate religion as long as it makes no claim to universal truth and has no authority. But they are very critical of those who believe there is one truth or an absolute truth. They are also critical of Christian missionaries because they believe they are "destroyers of culture." This is reminiscent of the TV show "Star Trek" that had "The Prime Directive" which prohibited those on the star ship from interfering with any culture. The assumption was that each culture must decide what is true for itself.

Related to this idea of cultural relativism is the belief in religious pluralism. This is the belief that every religion is true. While it is proper to show respect for people of different religious faiths, it is incorrect to assume that all religions are true.

Various religions and religious groups make competing truth claims, so they cannot all be true. For example, God is either personal or God is impersonal. If God is personal then Judaism, Christianity, and Islam could be true. But the eastern religions (Hinduism and Buddhism) are false. Either Jesus is the Messiah or He is not. If He is the Messiah then Christianity is true, and Judaism is false.

Religious pluralism essentially violates the "Law of Non-contradiction." This law states that A and the opposite of A cannot both be true (at the same time in the same way). You cannot have square circles. And you cannot have competing and contradictory religious truth claims all be true at the same time.

Jesus made this very clear in John 14:6 when He said, "I am the way, and the truth, and the life; no one comes to the Father but through Me." Jesus taught that salvation was through Him and no one else. This contradicts other religions.

Postmodernism has also changed the highest value in society. We used to live in a society that believed in "Truth" (with a capital T). This has now been replaced by a new word with a capital T. And that is the word "Tolerance." We are told to tolerate every view and value. Essentially, all moral questions can be summed up with the phrase: Who are you to say?

Moral Relativism

The worldview of postmodernism provides the foundation for moral relativism. Although a view of ethics as relative began

in the era of modernism, it has reached full bloom in the era of postmodernism. If there is no absolute truth, then there is no absolute standard for ethical behavior. And if truth is merely personal preference, then certainly ethics is personal and situational.

Moral relativism is the belief that morality is relative to the person. In other words, there is no set of rules that universally applies to everyone. In a sense, moral relativism can be summed up with the phrase: "It all depends." Is murder always wrong? Relativists would say, "It depends on the circumstances." Is adultery wrong? They would say, "It just depends on whether you are caught."

Moral relativism is also self-defeating. People who say they believe in relativism cannot live consistently within their ethical system. Moral relativists make moral judgments all the time. They speak out against racism, exploitation, genocide, and much more. Christians have a consistent foundation to speak out against these social evils based upon God's revelation. Moral relativists do not.

There are two other problems with moral relativism. First, one cannot critique morality from the outside. In my book *Christian Ethics in Plain Language*, I point out the problem with cultural relativism.[\[2\]](#) If ethics are relative to each culture, then anyone outside the culture loses the right to critique it. Essentially that was the argument of the Nazi leaders during the Nuremberg Trials. What right do you have to criticize what we did within Nazi Germany? We had our own system of morality. Fortunately, the judges and Western society rejected such a notion.

Second, one cannot critique morality from the inside. Cultural relativism leaves no place for social reformers. The abolition movement, the suffrage movement, and the civil rights movement are all examples of social movements that ran counter to the social circumstances of the culture. Reformers like William Wilberforce or Martin Luther King Jr. stood up in the midst of society and pointed out immoral practices and called society to a moral solution. Abolishing slavery and fighting for civil rights were good things even if they were opposed by many people within society.

Not only is moral relativism self-defeating; it is dangerous. Moral relativism leads to moral anarchy. It is based upon the assumption that every person should be allowed to live according to his or her own moral standards. Consider how dangerous that would be in a society with such vastly different moral standards.

Some people think stealing is perfectly moral, at least in certain circumstances. Some people think murder can be justified. Society simply cannot allow everyone to do what they think is right in their own eyes.

Obviously, society allows a certain amount of moral anarchy when there is no threat to life, liberty, or property. Each year when I go to the state fair, I see lots of anarchy when I watch the people using the bumper cars. In that situation, we allow people to "do their own thing." But if those same people started acting like that on the highway, we simply could not allow them to "do their own thing." There is a threat to life, liberty, and property.

Moral relativism may sound nice and tolerant and liberating. But if ever implemented at a societal level, it would be dangerous. We simply cannot allow total moral anarchy without reverting to barbarism. That is the consequence of living in a world that has changed its view of truth and established an ethical system that denies the existence of truth.

Impact of Truth Decay

What has been the impact of a loss of truth in society? There are many ways to measure this, and many ministries and organizations have done just that.

Each year the Nehemiah Institute gives the PEERS test to thousands of teenagers and adults. They have administered this test since 1988. The PEERS test measures understanding in five categories: Politics, Economics, Education, Religion, and Social Issues.[{3}](#) It consists of a series of statements carefully structured to identify a person's worldview in those five categories.

Based upon the answers, the respondent is then classified under one of four major worldview categories: Christian Theism, Moderate Christian, Secular Humanism, or Socialism. In the mid-1980s, it was common for Christian youth to score in the Moderate Christian worldview category. Not anymore.

Currently, Christian students at public schools score in the lower half of secular humanism, headed toward a socialistic worldview. And seventy-five percent of students in Christian schools score as secular humanists.

Take this question from the PEERS test as an example: "Moral values are subjective and personal. They are the right of each individual. Individuals should be allowed to conduct life as they choose as long as it does not interfere with the lives of others." The Nehemiah Institute found that seventy-five percent of youth agreed with this statement.

Let's also consider the work of George Barna. He conducted a national survey of adults and concluded that only four percent of adults have a biblical worldview as the basis of their decision-making. The survey also discovered that nine percent of born again Christians have such a perspective on life.[{4}](#) And when you look at the questions, you can see that what is

defined as a biblical worldview is really just basic Christian doctrine.

George Barna has also found that a minority of born again adults (forty-four percent) and an even smaller proportion of born again teenagers (nine percent) are certain of the existence of absolute moral truth.[{5}](#)

By a three-to-one margin, adults say truth is always relative to the person and their situation. This perspective is even more lopsided among teenagers who overwhelmingly believe moral truth depends on the circumstances.[{6}](#)

Back in 1994, the Barna Research Group conducted a survey of church youth for Josh McDowell. Now remember, we are talking about young people who regularly attend church. They found that of these church youth, fifty-seven percent could not say that an objective standard of truth exists. They also found that eighty-five percent of these same church youth reason that “just because it’s wrong for you doesn’t mean it’s wrong for me.”

George Barna says that the younger generation tends to be composed of non-linear thinkers. In other words, they often cut and paste their beliefs and values from a variety of sources, even if they are contradictory.

More to the point, they hold these contradictory ideas because they do not have a firm belief in absolute truth. If truth is personal and not objective, then there is no right decision and each person should do what is right for him or her.

Biblical Perspective

What is a biblical perspective on postmodernism? One of the problems with the postmodern worldview is that it affects the way we read the Bible.

Because of the popularity of postmodernism, people are reading literature (including the Bible) differently than before. Literary interpretation uses what is called "postmodern deconstruction." Not only is this used in English classes on high school and college campuses, it is being applied to biblical interpretation.

Many Christians no longer interpret the Bible by what it says. Instead, they interpret the Bible by asking what the passage means to them. While biblical application is important, we must first begin by understanding the intent of the author. Once that principle goes out the window, proper biblical interpretation is in jeopardy.

So what should we do? First we must be prepared for the intellectual and philosophical battle we face in the twenty-first century. Colossians 2:8 says, "See to it that no one takes you captive through philosophy and empty deception, according to the tradition of men, according to the elementary principles of the world, rather than according to Christ."

We must also be studying the Scriptures on a daily basis. Paul says the Bereans were "noble-minded" because "they received the word with great eagerness, examining the Scriptures daily to see whether these things were so" (Acts 17:11).

Studies of born again Christians say that they are not reading their Bibles on a regular basis. An important antidote to postmodernism and relativism is daily Scripture study so that we make sure that we are not being conformed to the culture (Romans 12:2).

We should also develop discernment, especially when we are considering the worldviews that are promoted in the media. Philippians 4:8 says, "Finally, brethren, whatever is true, whatever is honorable, whatever is right, whatever is pure, whatever is lovely, whatever is of good repute, if there is any excellence and if anything worthy of praise, dwell on

these things.”

The average student in America watches 22,000 hours of television before graduation. That same student also listens to 11,000 hours of music during their teenage years. Add to this time spent on a computer, on the Internet, and absorbing the culture through books and magazines.

Postmodernism is having a profound impact on our society. This erosion of truth is affecting the way we view the world. And the rejection of absolutes leads naturally to a rejection of absolute moral standards and the promotion of moral relativism.

Christians must wisely discern these trends and apply proper biblical instruction to combat these views.

Candidates and Religion

October 9, 2007

Should we know more about a political candidate's religion before we vote? That is a question that will certainly surface in this election cycle.

When John Kennedy ran for the presidency he said: "I believe in a President whose religious views are his own private affair." While that may have satisfied some back in 1960, I doubt it will be sufficient in this election.

Michael Kinsley recently wrote about this important topic in *Time* magazine as he discussed Governor Mitt Romney. Although I would probably disagree with Kinsley on many political and theological issues, I think he rightly points out that the religious faith of a candidate cannot be kept private because it affects his or her worldview.

He says it is important for three reasons. First, we need to know the details of a candidate's faith and the extent to which those details are accepted. He notes that Catholic liberal politicians since Mario Cuomo have said they accept the doctrine of the church but nevertheless believe in a woman's right to choose. He concludes that either these politicians are lying to their church, or they are lying to us.

Second, since some doctrines of various religions may be

offensive to the general public, they have a right to know if a candidate agrees with those doctrines. Michael Kinsley applies this only to Mitt Romney's Mormonism, but it should also be applied to the religious faith of every candidate.

Third, candidates' religious faith also will affect their character. Voters should take character into account before they cast their vote for a particular candidate.

This election season it has been popular for candidates to talk about their faith. But how does that faith affect his or her views on social and political issues? So far, the media has been content to let them talk about their faith in a vague way, but voters deserve to know more. Back in 1960, John Kennedy dodged the question of how his faith affected his decision-making. We cannot allow candidates to dodge the question now.

Tales From the Crypt: Do We Have the Bones of Jesus?

February 26, 2008

The last week in February started out with an incredible announcement. James Cameron (director of the film *Titanic*) and Simcha Jacobovici announced that they have found the bones of Jesus! At their news conference, they promoted their Discovery Channel special *The "Lost Tomb of Jesus"* that will air on March 4th and also promoted the book by Simcha Jacobovici and Charles Pellegrino entitled *The Jesus Family Tomb: The*

Discovery, the Investigation, and the Evidence That Could Change History released by Harper-Collins.

If proved reliable, these findings would call into question the very cornerstone of Christianity: the resurrection of Jesus. But are they true?

The foundational claim is that they have discovered the family tomb of Jesus Christ. Is this really the tomb of Jesus or his family? There are many good reasons to believe this tomb has no relationship at all to Jesus and his family. Many are asking what to think about these claims. Therefore, I put together a quick two-page summary of some of the criticisms and concerns that surfaced in the first few hours after the announcement. Before we look at those criticisms, let's first review the history of this tomb.

We have known about this tomb since it was discovered in 1980. Back then, Israeli construction workers were digging the foundation for a new building in a Jerusalem suburb. Their digging revealed a cave with ten limestone ossuaries. Archeologists removed the limestone caskets for examination.

When they were able to decipher the names on the ten ossuaries, they found: Jesua, son of Joseph, Mary, Mary, Mathew, Jofa and Judah, son of Jesua. At the time, one of Israel's most prominent archeologists (Professor Amos Kloner) didn't associate the crypt with Jesus. He rightly argued that the father of Jesus was a humble carpenter who couldn't afford a luxury crypt for his family. Moreover, the names on the crypt were common Jewish names.

None of this has stopped Cameron and Jacobovici from promoting the tomb as the family tomb of Jesus. They claim to have evidence (through DNA tests, archeological evidence, and Biblical studies) to prove that the ten ossuaries belong to Jesus and his family. They also argue that Jesus and Mary Magdalene might have produced a son named Judah. However, a

number of biblical scholars say this is really just an old story now being recycled in an effort to create a media phenomenon that will sell books and guarantee a large audience for the television special.

First, does it really make sense that this would be the family tomb of Jesus? Remember that Jesus was in Jerusalem as a pilgrim and was not a resident of the city. How would his family be able to buy this tomb? As we already mentioned, Joseph (who had probably already died in Galilee) and his family did not have the funds to buy such an elaborate burial site. Moreover, they were from out of town and would need time to find this tomb location. To accept this theory, one has to believe they stole the body of Jesus and moved it to this tomb in a suburb of Jerusalem all within about a day's time.

Second, if this is the family tomb of Jesus and his family, why is Jesus referred to as the son of Joseph? As far as we can determine from history, the earliest followers of Jesus never called Jesus the son of Joseph. The record of history is that it was only outsiders who mistakenly called him that.

Third, if this is the family tomb of Jesus, why do we have the name of Matthew listed with the rest of the family? If this is the Matthew that traveled with Jesus, then he certainly was not a family member. And you would have to wonder why James (who remained in Jerusalem) would allow these inscriptions as well as allow the family to move the body from Jerusalem to this tomb and perpetrate a hoax that Jesus bodily rose from the grave. Also, the fourth-century church historian Eusebius writes that the body of James (the half-brother of Jesus) was buried alone near the temple mount and that his tomb was visited in the early centuries.

Fourth, there is the problem with the common names on the tombs. Researchers have cataloged the most common names at the time. The ten most common were: Simon/Simeon, Joseph, Eleazar, Judah, John/Yohanan, Jesus, Hananiah, Jonathan, Matthew, and

Manaen/Menahem. These are some of the names found on the ossuaries and thus suggest that the tomb belonged to someone other than Jesus of Nazareth and his family. In fact, the name Jesus appears in 98 other tombs and on 21 other ossuaries.

Finally there is the question of the DNA testing. Apparently there is evidence that shows that the DNA from the woman (in what they say is the Mary Magdalene ossuary) and the DNA from the so-called Jesus ossuary does not match. So they argue that they were not relatives and thus must have been married.

But does the DNA evidence really prove that? It does not prove she is his wife. In fact, we really don't even know who in the ossuaries are related to the other. Moreover, we do not have an independent DNA control sample to compare these findings with. At best, the DNA evidence shows that some of these people are related and some are not.

All of this looks like sensationalism from Simcha Jacobovici (who has a reputation as an Indiana-Jones type) and James Cameron (the director of the highly fictionalized Titanic). The publicity is certain to sell books and draw a television audience, but it is not good history or archaeology.

Follow-up from Kerby 2/28/07

My commentary was a brief (two-page) summary of some of the criticisms and concerns that many people surfaced in the first few hours after the announcement. Now that we have a few days of reflection on the claims by James Cameron and Simcha Jacobovici, I think we can begin to provide an even more detailed perspective.

Here are some good commentaries and blogs posted by experts in the field as well some news articles that quote these people. Some of these experts have been able to see the Discovery

Channel special "The Lost Tomb of Jesus" and thus can give even more detail than I was able to do when I first wrote my commentary on Monday, February 26. The first two links are for commentaries by Dr. Darrell Bock, Dallas Theological Seminary. He was on my radio program "Point of View" and provided some great insight. The next link is for a commentary by Ben Witherington, Asbury Theological Seminary. The following three are news articles quoting from experts:

Hollywood Hype: The Oscars and Jesus' Family Tomb, What do they share?

God in Our Nation's Capital

U.S. Capitol Building

In our minds, let's take a walking tour through America's capital city, Washington, DC. What we will be seeing in our minds eye comes from the book *Rediscovering God in America: Reflections on the Role of Faith in Our Nations History and Future*.^{1} As we consider what religious symbols are found in the buildings and monuments, I think we will gain a fresh appreciation for the role of religion in the public square.

We will begin with the U.S. Capitol Building. No other building in Washington defines the skyline like this one does. It has been the place of formal inaugurations as well as informal and spontaneous events, such as when two hundred members of Congress gathered on the steps on September 12, 2001, to sing God Bless America.

President George Washington laid the cornerstone for the Capitol in 1793. When the north wing was finished in 1800, Congress was able to move in. Construction began again in 1803 under the direction of Benjamin Latrobe. The British invasion of Washington in 1812 resulted in the partial destruction of the Capitol. In 1818, Charles Bulfinch oversaw the completion of the north and south wings (including a chamber for the Supreme Court).^{2}

Unfortunately, the original design failed to consider that additional states would enter the union, and these additional representatives were crowding the Capitol. President Millard Fillmore chose Thomas Walter to continue the Capitols construction and rehabilitation. Construction halted during the first part of the Civil War, and it wasn't until 1866 that the canopy fresco in the Rotunda was completed.

The religious imagery in the Rotunda is significant. Eight

different historical paintings are on display. The first is the painting *The Landing of Columbus* that depicts the arrival on the shores of America. Second is *The Embarkation of the Pilgrims* that shows the Pilgrims observing a day of prayer and fasting led by William Brewster.

Third is the painting *Discovery of the Mississippi by DeSoto*. Next to DeSoto is a monk who prays as a crucifix is placed in the ground. Finally, there is the painting *Baptism of Pocahontas*.

Throughout the Capitol Building, there are references to God and faith. In the Cox Corridor a line from America the Beautiful is carved in the wall: America! God shed His grace on thee, and crown thy good with brotherhood, from sea to shining sea!{3}

In the House chamber is the inscription, In God We Trust. Also in the House chamber, above the Gallery door, stands a marble relief of Moses, the greatest of the twenty-three law-givers (and the only one full-faced). At the east entrance to the Senate chamber are the words *Annuit Coeptis* which is Latin for God has favored our undertakings. The words In God We Trust are also written over the southern entrance.

In the Capitols Chapel is a stained glass window depicting George Washington in prayer under the inscription In God We Trust. Also, a prayer is inscribed in the window which says, Preserve me, God, for in Thee do I put my trust.{4}

The Washington Monument

The tallest monument in Washington, DC, is the Washington Monument. From the base of the monument to its aluminum capstone are numerous references to God. This is fitting since George Washington was a religious man. When he took the oath of office on April 30, 1789, he asked that the Bible be opened to Deuteronomy 28. After the oath, Washington added, So help

me God and bent forward and kissed the Bible before him. [{5}](#)

Construction of the Washington Monument began in 1848, but by 1854 the Washington National Monument Society was out of money and construction stopped for many years. Mark Twain said it had the forlorn appearance of a hollow, oversized chimney. In 1876, Congress appropriated money for the completion of the monument which took place in 1884. In a ceremony on December 6, the aluminum capstone was placed atop the monument. The east side of the capstone has the Latin phrase *Laus Deo*, which means Praise be to God.

The cornerstone of the Washington Monument includes a Holy Bible, which was a gift from the Bible Society. Along with it are copies of the Declaration of Independence and the U.S. Constitution.

If you walk inside the monument you will see a memorial plaque from the Free Press Methodist-Episcopal Church. On the twelfth landing you will see a prayer offered by the city of Baltimore. On the twentieth landing you will see a memorial offered by Chinese Christians. There is also a presentation made by Sunday school children from New York and Philadelphia on the twenty-fourth landing.

The monument is full of carved tribute blocks that say: Holiness to the Lord; Search the Scriptures; The memory of the just is blessed; May Heaven to this union continue its beneficence; In God We Trust; and Train up a child in the way he should go, and when he is old, he will not depart from it.

So what was George Washington's faith? Historians have long debated the extent of his faith. But Michael Novak points out that Washington's own step-granddaughter, Nelly Custis, thought his words and actions were so plain and obvious that she could not understand how anybody failed to see that he had always lived as a serious Christian. [{6}](#)

During the first meeting of the Continental Congress in

September 1774, George Washington prayed alongside the other delegates. And they recited Psalm 35 together as patriots.

George Washington also proclaimed the first national day of thanksgiving in the United States. In 1795 he said, When we review the calamities which afflict so many other nations, the present condition of the United States affords much matter of consolation and satisfaction. He therefore called for a day of public thanksgiving and prayer. He said, In such a state of things it is in an especial manner our duty as people, with devout reverence and affectionate gratitude, to acknowledge our many and great obligations to Almighty God and implore Him to continue and confirm the blessings we experience.{7}

The Lincoln Memorial

The idea of a memorial to the sixteenth president had been discussed almost within days after his assassination, but lack of finances proved to be a major factor. Finally, Congress allocated funds for it during the Taft administration. Architect Henry Bacon wanted to model it after the Greek Parthenon, and work on it was completed in 1922.

Bacon chose the Greek Doric columns in part to symbolize Lincolns fight to preserve democracy during the Civil War.{8} The thirty-six columns represented the thirty-six states that made up the Union at the time of Lincolns death.

Daniel Chester French sculpted the statue of Abraham Lincoln to show his compassionate nature and his resolve in preserving the Union. One of Lincolns hands is tightly clenched (to show his determination) while the other hand is open and relaxed (to show his compassion).

Lincolns speeches are displayed within the memorial. On the left side is the Gettysburg Address (only 267 words long). He said, We here highly resolved that these dead shall not have died in vain, that this nation, under God, shall have a new

birth of freedom.

On the right side is Lincoln's second inaugural address (only 703 words long). It mentions God fourteen times and quotes the Bible twice. He reflected on the fact that the Civil War was not controlled by man, but by God. He noted that each side looked for an easier triumph, and a result less fundamental and astounding. Both read the same Bible, and pray to the same God; and each invokes his aid against the other.

He concludes with a lament over the destruction caused by the Civil War, and appeals to charity in healing the wounds of the war. With malice toward none, with charity for all, with firmness in the right as God gives us to see the right, let us strive on to finish the work we are in, to bind up the nations wounds, to care for him who shall have borne the battle and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations.

It is fitting that one hundred years after Lincoln's second inaugural, his memorial was the place where Reverend Martin Luther King, Jr. delivered his most famous speech, I have a dream. An inscription was added to the memorial in 2003 that was based upon Isaiah 40:4-5: I have a dream that one day every valley shall be exalted, and every hill and mountain shall be made low, the rough places will be made plain, and the crooked places will be made straight and the glory of the Lord shall be revealed and all flesh shall see it together.

At a White House dinner during the war, a clergyman gave the benediction and closed with the statement that The Lord is on the Unions side. Abraham Lincoln responded: I am not at all concerned about that, for I know that the Lord is always on the side of the right. But it is my constant anxiety and prayer that I and this nation should be on the Lords side. [\[9\]](#)

The Jefferson Memorial

Thomas Jefferson was Americas third president and the drafter of the Declaration of Independence, so it is surprising that a memorial to him was not built earlier than it was. In 1934, Franklin Delano Roosevelt persuaded Congress to establish a memorial commission to honor Jefferson. After some study the commission decided to honor Pierre L'Enfant's original plan, which called for the placement of five different memorials that would be aligned in a cross-like manner.[{10}](#)

The architect of the memorial proposed a Pantheon-like structure that was modeled after Jefferson's own home which incorporated the Roman architecture that Jefferson admired. The original design was modified, and the memorial was officially dedicated in 1943.

When you enter the Jefferson Memorial you will find many references to God. A quote that runs around the interior dome says, I have sworn upon the altar of God, eternal hostility against every form of tyranny over the minds of man.

On the first panel, you will see the famous passage from the Declaration of Independence: We hold these truths to be self-evident: That all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

On the second panel is an excerpt from A Bill for Establishing Religious Freedom, 1777. It was passed by the Virginia Assembly in 1786. It reads: Almighty God hath created the mind free. . . . All attempts to influence it by temporal punishments or burdens . . . are a departure from the plan of the Holy Author of our religion. . . . No man shall be compelled to frequent or support any religious worship or ministry or shall otherwise suffer on account of his religious opinions or belief, but all men shall be free to profess, and by argument to maintain, their opinions in matters of

religion. I know but one code of morality for men whether acting singly or collectively.

The third panel is taken from Jefferson's 1785 Notes on the State of Virginia. It reads: God who gave us life gave us liberty. Can the liberties of a nation be secure when we have removed a conviction that these liberties are the gift of God? Indeed I tremble for my country when I reflect that God is just, that His justice cannot sleep forever. Commerce between master and slave is despotism. Nothing is more certainly written in the book of fate than that these people are to be free.

The Supreme Court

Of the three branches of government, the Supreme Court was the last to get its own building. In fact, it met in the Capitol building for over a hundred years. During that time, it met in many different rooms of the capitol until it finally settled in the Old Senate Chamber in 1860.

Supreme Court Justice William Howard Taft (who also had served as president) persuaded Congress to authorize funds for the Supreme Court building. It was modeled after Greek and Roman architecture in the familiar Corinthian style and dedicated in 1935.

It is ironic that the Supreme Court has often issued opinions which have stripped religious displays from the public square when these opinions have been read in a building with many religious displays. And it is ironic that public expressions of faith have been limited when all sessions of the court begin with the Courts Marshal announcing: God save the United States and this honorable court.

In a number of cases, the Supreme Court has declared the posting of the Ten Commandments unconstitutional (in public school classrooms and in a local courthouse in Kentucky). But

this same Supreme Court has a number of places in its building where there are images of Moses with the Ten Commandments. These can be found at the center of the sculpture over the east portico of the Supreme Court building, inside the actual courtroom, and finally, engraved over the chair of the Chief Justice, and on the bronze doors of the Supreme Court itself.[{11}](#)

Nevertheless, the Supreme Court has often ruled against the very kind of religious expression that can be found in the building that houses the court. Former Speaker of the House Newt Gingrich says in his book *Rediscovering God in America*, that we see a systematic effort . . . to purge all religious expression from American public life. He goes on to say that for the last fifty years the Supreme Court has become a permanent constitutional convention in which the whims of five appointed lawyers have rewritten the meaning of the Constitution. Under this new, all-powerful model of the Court, and by extension the trail-breaking Ninth Circuit Court, the Constitution and the law can be redefined by federal judges unchecked by the other two coequal branches of government.[{12}](#)

This is the state of affairs we find in the twenty-first century. If five justices believe that prayer at a public school graduation is unconstitutional, then it is unconstitutional. If five justices believe that posting the Ten Commandments is unconstitutional, it is unconstitutional.

If the trend continues, one wonders if one day they may rule that religious expression on public monuments is unconstitutional. If that takes place, then you might want to invest in sandblasting companies in the Washington, DC, area. There are lots of buildings and monuments with words about God, faith, and religion. It would take a long time to erase all of these words from public view.

The next time you are in our nations capital, make sure you take a walking tour of the buildings and monuments. They

testify to a belief in God and a dynamic faith that today is often under attack from the courts and the culture.
