

Biblical Reliability

Kerby Anderson provides classic reasons the bible can be believed and trusted as a divine book from God.

Is the Bible historically reliable? That is an important question that deserves an answer since so many people today believe that the Bible is not accurate or reliable. We will look at various tests we can use to evaluate any book and will discover that the Bible is reliable and trustworthy. But before we look at the Bible's reliability, it is worth mentioning its uniqueness.

No doubt you have heard people say they don't read the Bible because it is merely another book. That is not true. Josh McDowell and Sean McDowell spend pages in their book, *Evidence That Demands a Verdict*, listing all the many ways the Bible is unique.

First, it is unique in character. This includes the fact that it is unique in time span, geographical production, authorship, literary genres, and languages. Professor F.F. Bruce, in *The Books and the Parchments*, summarized it this way: "The Bible, at first sight, appears to be a collection of literature—mainly Jewish. If we enquire into the circumstances under which the various Biblical documents were written, we find that they were written at intervals over a space of nearly 1400 years the writers wrote in various lands, from Italy in the west to Mesopotamia and possible Persia in the east."

He goes on to remind us that "The writers themselves were a heterogeneous number of people, not only separated from each other by hundreds of years and hundreds of miles but belonging to the most diverse walks of life . . . The writings themselves belong to a great variety of literary types. They include history, law, religious poetry, didactic treatises,

lyric poetry, parable and allegory, biography, personal correspondence, personal memoirs and diaries, in addition to the distinctively Biblical types of prophecy and apocalyptic.”

The Bible is also unique in its theology. There are teachings in the Bible that are not found in any other religious book. And the Bible is certainly unique in its impact (art, literature, history) and circulation (best-selling book of all time).

The Bible is unique, but it is reliable? The Bible makes significant claims about itself, and events recorded in the Bible. These are historical events and can be tested by the same criteria used to evaluate other historical documents.

There are three specific tests scholars, researchers, and archaeologists use to determine the authenticity of historical material. There are three basic principles of historiography: the internal test, the external test, and the bibliographic test. We will apply these three tests to the Bible to determine its reliability as an accurate historical source.

Internal Test

The internal test looks at a document to first see what the document claims for itself, and then to see if there are internal contradictions. What does the Bible claim for itself?

The Bible makes some very significant claims. It claims to be the Word of God. “All Scripture is inspired by God and profitable for teaching, for reproof, for correction, for training in righteousness” (2 Timothy 3:16). Just because the Bible claims to be inspired is not enough to accept that claim, but it does serve to remind us about the unique nature of the Bible. Jesus made an even more significant claim: “But it is easier for heaven and earth to pass away than for one stroke of a letter of the Law to fail” (Luke 16:17).

The Bible is unique in another significant way: its

unity. Consider that the Bible was written over a 1400-year period, by over 40 authors, from many walks of life. It was written in three languages, on different continents, under different circumstances. And it addresses numerous controversial topics, and yet we have unity and consistency throughout the Bible. Imagine if you had three people living at the same time, same place, speaking the same language writing on one controversial topic. Would they agree? They would not. The unity of the Bible suggests its inspiration.

But this raises another question. Skeptics often like to point to contradictions in the Bible. My quick answer often is to merely point to the number of books written over the last few centuries that provide reasonable answers to apparent contradictions. These many books illustrate that these difficult biblical texts can be resolved.

Professor Gleason Archer has written about Bible difficulties and concludes, "As I have dealt with one apparent discrepancy after another and have studied alleged contradictions between the biblical record and evidence of linguistics, archaeology, or science, my confidence in the trustworthiness of Scripture has been repeatedly certified and strengthened."

The reliability of the gospels is also supported by what is called undesigned coincidences. Professor Tim McGrew has been on my radio program to talk about these, and his wife Lydia has written a book on the subject. The writer in one gospel provides part of a testimony, while the writer of another gospel provides another key fact. These are not planned but give a fuller picture of the event. They are like pieces of a puzzle and provide yet another important piece of evidence for the internal test.

External Test

The external test looks at how the document aligns itself with facts, dates, and persons from its world. The facts from

archaeology and history validate the historical accuracy of the Bible. In previous articles, we have provided many examples of archaeological verification of the historical accuracy of the Bible.[\[1\]](#)

Dr. William Albright concluded, "There can be no doubt that archaeology has confirmed the substantial historicity of the Bible." Yale professor and expert on the Dead Sea Scrolls, Millar Burrows explained, "Archeological work has unquestionably strengthened confidence in the reliability of the scriptural record. More than one archaeologist has found his respect for the Bible increased by the experience of excavation in Palestine."

One of the most famous and most significant archeological finds was the [Dead Sea Scrolls](#). Over 800 fragments were found including a complete scroll of the book of Isaiah. It has provided a way to check the accuracy of the transmission of the Old Testament.

Another archaeological find occurred in 1993 when a stone monument fragment was discovered near the border of Israel and Syria. It mentions the "House of David" and implies a victory by Ben-Hadad, king of Damascus (1 Kings 15:20).

More recently, archaeologists uncovered a Curse Tablet found in Joshua's altar on Mount Ebal (Joshua 8:30). This ancient Hebrew inscription is centuries older than any known Hebrew inscription from ancient Israel. This is the earliest recorded Divine name in Israel and supports the biblical date of the Exodus.

There are also archaeological finds that validate the New Testament. In 1961, archeological work at Caesarea Maritima discovered a stone with the name "Pontius Pilate." He was a prefect of the Roman province of Judea and was responsible for ordering the crucifixion of Jesus. More recently, a ring was found at the Herodium (a desert palace outside of Bethlehem)

with the inscription "Pontius Pilate." The ring was not fancy enough to have been worn by Pilate and was likely used for official communications.

Classical scholar and historian Colin Hemer chronicles Luke's accuracy in the book of Acts. With painstaking detail, he identifies 84 facts in the last 16 chapters of the Book of Acts that have been confirmed by historical and archaeological research. This includes nautical details, names of gods, designation of magistrates, and proper names and titles.

Bibliographic Test

Now we will look at the bibliographic test. Since we do not have the original documents of any ancient literature, this test is used to evaluate the transmission from the original document to the manuscripts we possess today. The Bible is far superior to any ancient historical book in its- manuscript evidence with respect to time and the number of manuscripts.

Sir Frederic Kenyon observed, "In no other case is the interval of time between the composition of the book and the date of the earliest manuscripts so short as in that of the New Testament."

Many of the books on apologetics or biblical reliability provide a chart of the gap between the original manuscript and the earliest copy that we have: Plato (1200 years), Thucydides, *History* (1300 years), and Tacitus, *Annals* (1000 years). That smallest gap is Homer's *Iliad* (500 years). By contrast, the gap for the New Testament is just a few decades.

Above, we mentioned the importance of the Dead Sea Scrolls. Until their discovery, there was a significant gap between the original and the earliest copy (around AD 900). The discovery allowed us to now see there was an accurate transmission over a 1000-year period.

The number of manuscripts is also important. When we have more

manuscripts, we can compare them and have a better understanding of what was written in the original document. We have seven copies of Plato, eight copies of Thucydides, and twenty copies of Tacitus. There are over six hundred copies of Homer's *Illiad*.

By contrast, the number of manuscripts for the Bible is significant. The total number of Greek and non-Greek New Testament manuscripts is nearly 24,000. The number of Old Testament scrolls is more than 42,000. F.F. Bruce concludes, "There is n-o body of ancient literature in the world which enjoys such a wealth of good textual attestation as the New Testament."

The early church fathers also quoted from the New Testament as they wrote to each other. We have more the 36,000 of scripture citations from them as well.

John Warwick Montgomery concluded, "To be skeptical of the resultant text of the New Testament books is to allow all of classical antiquity to slip into obscurity; for no documents of the ancient period are as well attested bibliographically as the New Testament."

One Last Test: Prophecy

We have discussed three tests that show the reliability of the Bible, especially when compared to other literature of antiquity. The Bible passed the internal test because of its unity and cohesion. The Bible passed the external test because of the history and archaeology that confirms its accuracy. And the Bible passes the bibliographic test because of the number of manuscripts and the short time gap between the original and its copies.

But there is an additional test that only the Bible can meet. More than one-fourth of the Bible's content was prophetic at the time that it was originally written. More than half of

these 1000+ prophecies have been fulfilled down to the minutest detail. No other book (religious or secular) can make this claim.

Fifty years ago, J. Barton Payne compiled the *Encyclopedia of Biblical Prophecy*. It lists 1,239 prophecies in the Old Testament and 578 prophecies in the New Testament, for a total of 1,817. These encompass 8,352 verses.

In previous articles we have discussed the [prophecies of the Messiah](#). Hundreds of prophecies written down in the Old Testament are literally fulfilled in the person of Jesus Christ. For example, Zechariah records prophecies about the Messiah that were fulfilled by Jesus during the week He entered Jerusalem and was crucified. He predicted that the Messiah would enter Jerusalem riding a donkey (Zechariah 9:9). That was fulfilled during what we often call "Palm Sunday" (Matthew 21:5; Luke 19:32-37).

The price of his betrayal would be thirty pieces of silver (Zechariah 11:12-13) and the money would be cast onto the floor of the Temple. That was fulfilled by Judas and the chief priests (Matthew 27:3-10). Also, he predicted that the betrayal money would be used to buy a potter's field (Zechariah 11:13). We read about its fulfillment in Matthew 27:6-10.

Prophecy is history written before it happens and is another indication of the inspiration of the Bible. It also can give us confidence that prophecies that have not been fulfilled will be fulfilled in the future.

The Bible is historically accurate, and it also shows in many ways that it is also the inspired word of God.

Spiritual Abuse

Kerby Anderson provides an overview of what makes churches and organizations spiritually and emotionally unhealthy and hurtful.

In some ways, this article on spiritual abuse is an update on [a previous article on Abusive Churches](#). However, this article also provides a biblical perspective on the broader issue of spiritual abuse occurring in our country today.

Many church leaders became aware of the prevalence of abusive churches more than four decades ago when Professor Ronald Enroth wrote his best-selling book, *Churches That Abuse*. A few years later he followed up with a book on *Recovering from Churches that Abuse*.

More than three decades ago, Dr. Pat Zukeran wrote a week of Probe radio programs based on the first book by Ronald Enroth. The transcript of that program is still one of the top ten most popular articles based on the number of Internet searches that land on them each year.

That response to this important subject isn't unique. For example, thousands have also purchased the book by Stephen Arterburn *Toxic Faith*. The same is true of Ken Blue's book *Spiritual Abuse* and Philip Keller's book *Predators in Our Pulpits*. June Hunt with Hope for the Heart has also written a helpful booklet on *Spiritual Abuse*.

Jesus addressed the issue of spiritual abuse many times when he confronted the Pharisees. In Matthew 23, he proclaims seven woes to the Scribes and Pharisees. He concludes with: "You serpents, you brood of vipers, how are you to escape being sentenced to hell?" He describes them this way in John 8:44, "You are of your father the devil, and your will is to do your father's desires."

Paul also addresses various aspects of spiritual abuse and legalism within the church. He warns us about legalism by teaching that no works of the law can justify us (Romans 3:20). Instead, the "law of the Spirit of life has set you free in Christ Jesus from the law of sin and death" (Romans 8:2).

Spiritual abuse can occur when someone is in a position of spiritual authority misuses that authority to control or

manipulate another Christian. It may take the form of using religious works to control. It may involve misusing Scripture or twisting biblical concepts. Churches or Christian organizations may be guilty of teaching false doctrine. Even churches that teach sound doctrine may be guilty allowing worship leaders to bring music into the church with bad theology.

Spiritual abuse can also occur when someone in a position of spiritual authority fails to act. Many of the recent church scandals took place because church leaders or denominational leaders failed to act on or report incidents of sexual harassment or sexual abuse.

Characteristics of Abusive Churches

The book, *Churches That Abuse*, lists eight characteristics of abusive churches. You might compare that list to your own church and to other churches you know.

1. Abusive churches have a control-oriented style of leadership. The leader may be arrogant and dogmatic. The leader often is portrayed as more in tune spiritually with God. Thus, these leaders often are not accountable to anyone.

2. Second, the leader of an abusive church often uses manipulation to gain complete submission from their members. These tactics may involve guilt, peer pressure, and intimidation. The leader may even suggest that divine judgment from God will result if you question them.

3. There is a rigid, legalistic lifestyle involving numerous requirements and minute details for daily life. Members are pressured to give a certain amount of time and money to the church. Often members drop out of school, quit working, or neglect their families to meet a church-designated quota.

4. Abusive churches tend to change their names, especially

once they are exposed by the media. Often this is done because the church received bad publicity or was involved in a significant scandal.

5. Abusive churches are often denouncing other churches because they see themselves as superior to all other churches. The church leadership sees itself as the spiritual elite and the “faithful remnant.” They are the only ones “faithful to the true gospel.”

6. Abusive churches have a persecution complex and view themselves as being persecuted by the world, the media, and other Christian churches. Because they see themselves as a spiritual elite, they also expect persecution from the world and even feed on it.

7. Abusive churches specifically target young adults between eighteen and twenty-five years of age. Often, they target youth who are less experienced but looking for a cause. Sometimes an abusive church becomes surrogate parents to these young adults.

8. Members of abusive churches have a great difficulty leaving and often involves social, psychological, or emotional pain. Church members are often afraid to leave because of intimidation and social pressure. If they leave, they may be stalked and harassed by members of the abusive church.

Leaving an Abusive Church

For many of the reasons previously discussed, it is difficult for members to [leave an abusive church](#). There is significant emotional and spiritual damage that results. Often, former members of an abusive church not only leave the church, but they leave God.

The emotional damage is significant. One author suggested that victims of church abuse or other forms of spiritual abuse

suffer PTSD(post-traumatic stress disorder). They find it difficult to trust others, whether leaders in a church or other leaders in their life.

Victims of abusive churches also find it difficult to find the right church. That is why Ronald Enroth in his second book and Ken Blue in his book talk about discerning good from abusive. Here are a few questions worth considering.

1. Does the church leadership invite dialogue and solicit advice from others in the church who are not part of the elite group of leaders? Dogmatic and authoritarian pastors are threatened by diverse opinions whether from members or from people outside the church.

2. Is there a system of accountability or is all the power located in one person? Dogmatic and authoritarian pastors are not accountable to anyone. They may have a board of elders who merely “rubber stamp” any decisions.

3. Does the church encourage independent thinking and encourage members to develop discernment? Abusive church leaders attempt to get all its members to conform. There is a very low tolerance (sometimes no tolerance) for alternative perspectives even about insignificant programs and minor policies about how to run the church.

4. Is family commitment strengthened? Many churches (not just abusive churches) often demand so much of members that they begin to neglect their families. If parents are made to feel guilty for going to their children’s school events when it might conflict with a routine church meeting or activity, something is wrong.

5. Is the individual church member growing spiritually or on the edge of burnout? If you have to constantly attend a myriad of church meetings and meet a quota (time, talent, treasure) in order to be given church approval, something is wrong.

When someone leaves an abusive situation, it becomes difficult to trust others. That is also true when leaving an abusive church. Going to a different church or study group can be difficult and even frightening. But these questions help in choosing a church or organization that will help you grow spiritually.

Enabling Behavior and a Biblical Response – Part 1

There are no perfect churches because there are no perfect people. Sometimes I will hear someone say they are looking for the perfect church. A good response I have heard is: “If you find the perfect church, don’t join it because you will ruin it. You aren’t perfect.”

Every church has its problems, and pastors have a sin nature. But it does seem that we are also guilty of enabling behavior inside the church that isn’t healthy. Here are just a few statements I have gleaned from various sources.

Christians today often enable spiritual abuse from leaders because we value charisma over character. A pastor or leader is often given a platform not because of character but because he is a dynamic preacher.

Jesus warned His disciples (Matthew 20:25-28) that leaders should not exercise authority over people. Instead, whoever wants to become great must lower himself to be a servant. Paul even warns (2 Timothy 4:3) there will be a time when followers “will not endure sound doctrine.” Instead, they will want “to have their ears tickled” by eloquent speakers, who may not even have sound doctrine.

Paul reminds Timothy (1 Timothy 3:2-3) that a leader in the church should be “must be above reproach . . . sober-minded, self-controlled, respectable, hospitable, able to teach, not a

drunkard, not violent but gentle, not quarrelsome, not a lover of money.”

Peter (1 Peter 5:2-3) instructs the church that leadership should “shepherd the flock of God that is among you, exercising oversight, not under compulsion, but willingly, as God would have you; not for shameful gain, but eagerly; not domineering over those in your charge, but being examples to the flock.”

Christians today also enable spiritual abuse when they value the institution over individuals. We have seen this in our numerous radio programs involving church sexual abuse. Churches and denominations have been too quick to cover up sexual abuse scandals and intimidate victims. Time and again we hear them worrying about their reputations or the reputation of the church or denomination.

Christians today enable spiritual abuse when they value division over unity. Pastors and Christian leaders who are denouncing other churches or denominations can make us feel good about our church and denomination. But it doesn't bring unity. Paul teaches in Ephesians 4:3-6 to “Make every effort to keep the unity of the Spirit through the bond of peace. There is one body and one Spirit, just as you were called to one hope when you were called; one Lord, one faith, one baptism; one God and Father of all, who is over all and through all and in all.”

Enabling Behavior and a Biblical Response – Part 2

Christians today enable spiritual abuse when they value performance over character. Churches are often quicker to remove a pastor teaching heresy than to remove a pastor with character deficits. We should address heresy. Peter warns (2

Peter 2:1) that there will be “false prophets among the people, just as there will be false teachers among you. They will secretly introduce destructive heresies, even denying the sovereign Lord who bought them, bringing swift destruction on themselves.”

But some churches or denominations may have pastors or church leaders who have good theology but poor character. One example in the New Testament can be found in a man named Diotrephes (3 John 9-12). John plans to confront him because he is self-willed (likes to put himself first) and rebellious (does not acknowledge authority) and a slanderer (talking wicked gossip). Some commentators have called him the first “church boss” because he uses power for ungodly ends within the church.

But notice that John says nothing about him having bad theology. In his previous letters (1 John and 2 John), he does call out the unbiblical teaching of the false teachers. The problem with Diotrephes was not theology but psychology. For all we know, he might have been a good Bible teacher, but his behavior is the problem. How many churches have turned a blind eye to character problems with a pastor because he was a good preacher and brought people into the church?

Christians today enable spiritual abuse when they value anger and outrage over grace and meekness. Too often we reward candidates who raise their voice and point their fingers by electing them to office. We may enjoy a pastor who pounds the pulpit and condemns society, but is that what is required of a church leader?

Christians should not be enabling this behavior, they should be confronting this behavior and even condemning this behavior. This first step should be to follow the instructions of Jesus (Matthew 18:15-17) to go directly to a person engaging in spiritual abuse (after prayer and reflection). If he listens to you, “you have won your brother over. But if he

will not listen, take one or two others along.” If this is happening in society, we should speak out against spiritual abuse and abusive churches.

An important response to spiritual abuse is biblical truth. As believers we should proclaim the truth. Truth means freedom, not bondage. Jesus said, “You shall know the truth and the truth shall make you free” (John 8:32).

Loneliness and the Lockdown

Kerby Anderson looks at the isolation and longing for human contact that has become endemic even before the pandemic.

America was already facing a crisis of loneliness, and then the coronavirus pandemic hit. People sheltering at home had even less human contact. That made the crisis of loneliness even worse. The best thing people could do to protect

themselves from the virus was to isolate themselves. But that is not the best thing they could do for their physical or mental health.

A study by Julianne Holt-Lunstad found that loneliness can be as bad for your health as smoking 15 cigarettes a day. Another study by the National Academies of Sciences, Engineering, and Medicine found that social isolation in older adults increased their risk of heart disease, stroke, dementia, high cholesterol, diabetes, and poor health in general.[\[1\]](#)

More than a quarter century ago (1994), I wrote a book (*Signs of Warning, Signs of Hope*) making a number of predictions for the future. Chapter eight set forth the case for a coming crisis of loneliness.[\[2\]](#) Years earlier Philip Slater wrote about *The Pursuit of Loneliness*. The US Census Bureau documented the increasing number of adults living alone. Dan Kiley talked about living together loneliness in one of his books. Roberta Hestenes coined the term “crowded loneliness.” The trend was there for anyone to see if they began reading some of the sociological literature.

In the last few years, many authors have written about the crisis of loneliness. Robert Putnam wrote about it in his famous book, *Bowling Alone*.[\[3\]](#) He argues that people need to be connected in order for our society to function effectively. Putnam concludes, “Social capital makes us smarter, healthier, safer, richer, and better able to govern a just and stable democracy.” Senator Ben Sasse, in his book, *Them: Why We Hate Each Other—and How to Heal*, laments that our traditional tribes and social connectedness are in collapse.[\[4\]](#)

Living Alone

The reasons are simple: demographics and social isolation. More people are living alone than in previous generations, and

those living with another person will still feel the nagging pangs of loneliness.

In previous centuries where extended families dominated the social landscape, a sizable proportion of adults living alone was unthinkable. And even in this century, adults living alone have usually been found near the beginning (singles) and end (widows) of adult life. But these periods of living alone are now longer due to lifestyle choices on the front end and advances in modern medicine on the back end.

People have been postponing marriage and thus extending the number of years of being single. Moreover, their parents are (and presumably they will be) living longer, thereby increasing the number of years one adult will be living alone. Yet the increase in the number of adults living alone originates from more than just changes at the beginning and end of adult life. Increasing numbers are living most of their adult lives alone.

In the 1950s, about one in every ten households had only one person in them. These were primarily widows. But today, due to the three D's of social statistics (death, divorce, and deferred marriage), more than a third of all households is a single person household.

In the past, gender differences have been significant in determining the number of adults living alone. For example, young single households are more likely to be men, since women marry younger. On the other hand, old single households are more likely to be women, because women live longer than men. While these trends still hold true, the gender distinctions are blurring as both sexes are likely to reject traditional attitudes toward marriage.

Marriage Patterns

The post-war baby boom created a generation that did not make the trip to the altar in the same percentage as their parents. In 1946, the parents of the baby boom set an all-time record of 2,291,000 marriages. This record was not broken during the late 1960s and early 1970s, when millions of boomers entered the marriage-prone years. Finally, in 1979, the record that had lasted 33 years was finally broken when the children of the baby boom made 2,317,000 marriages.

The post-war generations are not only marrying less; they are also marrying later. The median age for first marriage for women in 1960 was 20 and for men it was 22. Today the median age for women is 27 and for men it is 29.

Another reason for a crisis in loneliness is marital stability. Not only are these generations marrying less and marrying later; they also stay married less than their parents. When the divorce rate shot up in the sixties and seventies, the increase did not come from empty nesters finally filing for divorce after sending their children into the world. Instead, it came from young couples divorcing before they even had children. That trend has continued into the 21st century.

The crisis of loneliness will affect more than just the increasing number of people living alone. While the increase in adults living alone is staggering and unprecedented, these numbers are fractional compared with the number in relationships that leave them feeling very much alone.

Commitment is a foreign concept to many of the millions of cohabiting couples. These fluid and highly mobile situations form more often out of convenience and demonstrate little of the commitment necessary to make a relationship work. These relationships are transitory and form and dissolve with alarming frequency. Anyone looking for intimacy and commitment

will not find them in these relationships.

Commitment is also a problem in marriages. Spawned in the streams of sexual freedom and multiple lifestyle options, the current generations appear less committed to making marriage work than previous generations. Marriages, which are supposed to be the source of stability and intimacy, often produce uncertainty and isolation.

Living-Together Loneliness

Psychologist Dan Kiley coined the term “living-together loneliness,” or LTL, to describe this phenomenon. He has estimated that 10 to 20 million people (primarily women) suffer from “living together loneliness.”[\[5\]](#)

LTL is an affliction of the individual, not the relationship, though that may be troubled too. Instead, Dan Kiley believes LTL has more to do with two issues: the changing roles of men and women and the crisis of expectations. In the last few decades, especially following the rise of the modern feminist movement, expectations that men have of women and that women have of men have been significantly altered. When these expectations do not match reality, disappointment (and eventually loneliness) sets in. Dan Kiley first noted this phenomenon among his female patients. He began to realize that loneliness comes in two varieties. The first is the loneliness felt by single, shy people who have no friends. The second is more elusive because it involves the person in a relationship who nevertheless feels isolated and very much alone.

To determine if a woman is a victim of LTL, Kiley employed a variation of an “uncoupled loneliness” scale devised by researchers at the University of California at Los Angeles. For example, an LTL woman would agree with the following propositions: (1) I can't turn to him when I feel bad, (2) I feel left out of his life, (3) I feel isolated from him, even

when he's in the same room, (4) I am unhappy being shut off from him, (5) No one really knows me well.

Women may soon find that loneliness has become a part of their lives whether they are living alone or "in a relationship," because loneliness is more a state of mind than it is a social situation. People who find themselves trapped in a relationship may be lonelier than a person living alone. The fundamental issue is whether they reach out and develop strong relationship bonds.

Crowded Loneliness

Loneliness, it turns out, is not just a problem of the individual. Loneliness is endemic to our modern, urban society. In rural communities, although the farmhouses are far apart, community is usually very strong. Yet in our urban and suburban communities today, people are physically very close to each other but emotionally very distant from each other. Close proximity does not translate into close community.

Dr. Roberta Hestenes at Eastern College has referred to this as "crowded loneliness." She observed that "we are seeing the breakdown of natural community network groups in neighborhoods like relatives." We don't know how to reach out and touch people, and this produces the phenomenon of crowded loneliness.

Another reason for social isolation is the American desire for privacy. Though many desire to have greater community and even long for a greater intimacy with others, they will choose privacy even if it means a nagging loneliness. Ralph Keyes, in his book *We the Lonely People*, says that above all else Americans value mobility, privacy, and convenience. These three values make developing a sense of community almost impossible. In his book *A Nation of Strangers*, Vance Packard

argued that the mobility of American society contributed to social isolation and loneliness. He described five forms of uprooting that were creating greater distances between people.

First is the uprooting of people who move again and again. An old Carole King song asked the question, "Doesn't anybody stay in one place anymore?" At the time when Packard wrote the book, he estimated that the average American would move about 14 times in his lifetime. By contrast, he estimated that the average Japanese would move five times.

The second is the uprooting that occurs when communities undergo upheaval. The accelerated population growth along with urban renewal and flight to the suburbs have been disruptive to previously stable communities.

Third, there is the uprooting from housing changes within communities. The proliferation of multiple-dwelling units in urban areas crowd people together who frequently live side by side in anonymity.

Fourth is the increasing isolation due to work schedules. When continuous-operation plants and offices dominate an area's economy, neighbors remain strangers.

Fifth, there is the accelerating fragmentation of the family. The steady rise in the number of broken families and the segmentation of the older population from the younger heightens social isolation. In a very real sense, a crisis in relationships precipitates a crisis in loneliness.

Taken together, these various aspects of loneliness paint a chilling picture of loneliness in the 21st century. But they also present a strategic opportunity for the church. Loneliness will be on the increase in this century due to technology and social isolation. Christians have an opportunity to minister to people cut off from normal, healthy relationships.

The Bible addresses this crisis of loneliness. David called out to the Lord because he was “lonely and afflicted” (Psalm 25:16). Jeremiah lamented that he “sat alone because your hand was on me and you had filled me with indignation” (Jeremiah 15:17). And Jesus experienced loneliness on the cross, when He cried out, “My God, my God, why have you forsaken me?” (Mark 15:34).

The local church should provide opportunities for outreach and fellowship in their communities. Individual Christians must reach out to lonely people and become their friends. We must help a lost, lonely world realize that their best friend of all is Jesus Christ.

Biblical Archaeology

Kerby Anderson provides an update on recent archaeological finds that corroborate the historicity of the Bible.

One of the most important proofs for the historical accuracy of the Bible can be found in archaeology. Ancient history and archaeology should confirm the accuracy of this record. That is what we find when comparing these finds with the written record of Scripture.

My focus will be to summarize a few of the past archaeological finds that confirm the Bible and then provide an update on some of the newest archaeological discoveries made in just the last few years that are very significant. On the Probe website, we have an excellent summary done twenty years ago of archaeology and the Old Testament (probe.org/archaeology-and-the-old-testament/) and archaeology and the New Testament (probe.org/archaeology-and-the-new-testament/).

Archaeology not only has confirmed the historical record found in the Bible, but it also provides additional details not found in the original writings of the biblical authors. Archaeology also helps explain Bible passages by providing context of the surrounding culture as well as the social and political circumstances.

We must also admit the limitations of archaeology. Although these archaeological finds can establish the historical accuracy of the record, they cannot prove the divine inspiration of the Bible. Also, we must admit that even when we have an archaeological find, it still must be interpreted. Those interpretations are obviously affected by the worldview perspective and even bias of the historians and archaeologists.

Even granting the skeptical bias that can be found in this field, it is still amazing that many archaeologists acknowledge the biblical confirmation that has come from significant archaeological finds.

Dr. William Albright observed, "There can be no doubt that

archaeology has confirmed the substantial historicity of Old Testament tradition.”[{1}](#)

Archaeologist Nelson Glueck and president of Hebrew Union College concluded, “It may be stated categorically that no archaeological discovery has ever controverted a Biblical reference. Scores of archaeological findings have been made which confirm in clear outline or exact detail historical statements in the Bible. And, by the same token, proper evaluation of Biblical description has often led to amazing discoveries.”[{2}](#)

Millar Burrows, Professor of Archaeology at Yale University, remarked that “On the whole, however, archaeological work has unquestionably strengthened confidence in the reliability of the Scriptural record. More than one archaeologist has found his respect for the Bible increased by the experience of excavation in Palestine.”[{3}](#)

Old Testament Archaeology

There are so many significant archaeological finds that confirm the historical accuracy of the Old Testament. Perhaps the most famous and most significant find is the Dead Sea scrolls. A young shepherd boy found the first of them in a cave in 1947. Eventually over 800 fragments were found. This includes a complete scroll of the book of Isaiah.

Many of these scrolls are from before the time of Jesus Christ. That is important because it provided a way to check the accuracy of the transmission of the Old Testament. The earliest copies of the Old Testament that we had before this discovery were a thousand years later. When we compare the Dead Sea scrolls to these later manuscripts, we can see that there were very few variations (mostly due to changes in spelling or grammar). The transmission through the scribe was very accurate.

Another significant find was archaeological documentation of King David. Archaeologists working at one site uncovered an inscription that means "house of David" that dates to the ninth century BC.

Another important archaeological find was the Hittite nation. The Hittites are mentioned nearly 50 times in the Old Testament, but there was no solid archaeological evidence they existed until the 20th century. Some argued that the Bible must be wrong since it mentions this nation but archaeological evidence was lacking.

The Hittites were a major force against the Jews. Israel needed to conquer them in order to enter the Promised Land (Joshua 11:3-4). King David had Uriah the Hittite killed because of his adultery with his wife, Bathsheba (2 Kings 11:3-21). Fortunately, archaeologists did uncover abundant evidence of the Hittites in Turkey. They found a temple, sculptures, a storeroom with 10,000 clay tablets. Later they even uncovered the Hittite capital city of Hattusha.

Archaeologists with the Israel Antiquities Authority digging at Tel Lachish found an ancient toilet that confirms Old Testament history. To understand its significance, we need to look at the record of King Hezekiah. We read in 2 Kings that he removed the Asherah poles from the high places and smashed the sacred stones that were used in the Canaanite cultic worship.

Archaeologists discovered large rooms that appear to be a shrine where four-horned altars were destroyed. They also found a seat carved in stone with the hole in it that was used as a toilet. It was mostly likely placed there as a form of desecration for the whole room.[\[4\]](#) This correlates with the biblical description in 2 Kings 10:27 that Jehu and his followers "demolished the pillar of Baal, and demolished the house of Baal, and made it a latrine to this day."

New Testament Archaeology

Jesus spent much of his time in Capernaum by the Sea of Galilee. It is mentioned 16 times in the New Testament. Archaeologists have uncovered evidence of the fishing industry there (anchors, fishhooks), which would have been used by many of the disciples. The houses were one-story buildings, with roofs of wooden beams or branches. This explains how men carried a man to the roof and let him down in front of Jesus (Mark 2:1-4). Jesus taught in the synagogue in Capernaum (Mark 1:21-22, Luke 4:31-36). The remains of a synagogue built in the 4th century sits atop the black basalt foundations of this synagogue that existed at the time of Jesus.

In Jerusalem are many archaeological discoveries from the time of Jesus. That includes the remains of the temple as well as the pool of Bethesda (John 5:1-15) and the pool of Siloam (John 9:1-7).

Archaeology (as well as history) verifies the existence of many political leaders mentioned in the New Testament. A Denarius coin shows a portrait of Tiberius Caesar. This is also significant because Jesus asked the people whose likeness was on the coin (Mark 12:17). The name Pontius Pilate was found in an inscription at Caesarea Maritima.

Sometimes archaeology can shed light on what seems like a sharp disagreement in the Bible. In Paul's letter to the Galatians, he recounts what he said to Peter who stopped eating meals with gentile Christians. He argued that Peter lived like a Gentile even though he was a Jew.

The answer lies in the fact that Paul was a devout Pharisee, who took kosher food laws and purity very seriously. Peter, though Jewish, was not a Pharisee and grew up in Bethsaida on the north shore of the Sea of Galilee. Archaeological excavations uncovered some non-kosher evidence. Some were eating wild boar and catfish, which were considered unclean

and not to be eaten by Jew following the Torah.[{5}](#)

Archaeological finds at Corinth include the city's *bema* seat, where Paul stood trial (Acts 18:12-17) and an inscription with the name Erastus, a city administrator who was an associate of Paul (Acts 19:22; 2 Timothy 4:20; Romans 16:23).

Critics have challenged the historical record of Luke because of alleged inaccuracies. Classical scholar Colin Hemer documents that Luke is a very accurate historian.[{6}](#) He identifies 84 facts in the Book of Acts that have been confirmed by historical and archaeological research. This includes nautical details, names of gods, designation of magistrates, and proper names and titles.

These are just a few of the archaeological discoveries in the past that have confirmed the Old Testament and the New Testament. In the next section we will look at some of the most recent archaeological discoveries.

Recent Archaeological Discoveries

Within the last few years, there have been major archaeological discoveries that further confirm biblical history. An article in *Christianity Today* provides a list of the top ten archaeological discoveries.[{7}](#) Here are just a few of these important discoveries.

The Israel Antiquities Authority announced the discovery of a limestone column on which the word "Jerusalem" was spelled out in Aramaic. This is the oldest inscription of this nature found so far. You might expect that there would be lots of such inscriptions, but that turn out to be very rare.

The inscription was found in an ancient potter's village that must have served pilgrims making their way to the Temple in Jerusalem. A potter's field calls to mind the one bought by the priests (Matthew 27:7) with the money Judas returned.

The Jewish tabernacle and the Ark of the Covenant were located for a time in Shiloh. Excavation there produced a clay pomegranate. In the Bible, the pomegranate was a common temple decoration (1 Kings 7:18; 2 Kings 25:17). Small pomegranates embroidered with blue, purple, and scarlet yarns hung from the hems of the priestly robes (Exodus 28:33). This discovery affirms the sacredness of Shiloh.

Scientists and archaeologists believe they have found the site of the destruction of Sodom and Gomorrah. They found evidence that a “high-heat” explosive event north of the Dead Sea wiped out all civilization in the affected area. It killed all the people within a 25-kilometer circular area. The fertile soil would have been stripped of nutrients by the high heat. Waves of briny salt would have washed over the surrounding area and spread through hot winds.

The scientists suggest that a cosmic airburst event from a meteor was the reason for the disappearance from the site. It apparently took 600 years for the region to recover before it could once again be inhabited. This fits with the description in Genesis 19, which says that burning sulfur rained down on Sodom and Gomorrah and killed all the people and all the vegetation of the land.

Archaeologist Dr. Stephen Collins says that there was a violent conflagration that ended occupation at the site. There is “melted pottery, scorched foundation stones, and several feet of ash and destruction debris churned into a dark gray matrix as if in a Cuisinart.” He and another author in a joint paper conclude that all of this provides “signs of a highly destructive and thermal event that one might expect from what is described in Genesis 19.”[\[8\]](#)

Recent Archaeological Discoveries

Above we looked at a few of the most recent archaeological

discoveries that confirm the historical accuracy of the Bible. Most of them were found in an article in *Christianity Today*. Here are a few more significant discoveries.

An inscribed piece of limestone discovered in a tomb along the west bank of the Nile was revealed to be a Semitic abecedary (alphabet in ABC order). It dates back to the time of Moses and fits with the statement that "Moses wrote down everything the Lord had said" (Exodus 24:4). It turns out he wasn't the only one writing in a Semitic script in Egypt at that time.

When ISIS terrorists captured Mosul, they blew up the tomb of the prophet Jonah. This uncovered the remains of a palace of the Assyrian King Esarhaddon. Previous archaeological teams stopped digging in certain sites in Iraq for fear of destroying them. That was a case of the traditional tomb of Jonah, until ISIS started digging beneath it to find artifacts to sell. As one article put it, "ISIS Accidentally Corroborates the Bible."[\[9\]](#) The tunnels they dug revealed a previously untouched Assyrian palace in the ancient city of Ninevah. Inscriptions found in the old city of Nineveh give an order of Assyrian kings that matches perfectly with the biblical order.

Extra careful processing of dirt from an archaeological dig in the southwest corner of the Temple Mount provided a *beka* weight. This was used (Exodus 38:6) to measure the silver in the half-shekel temple tax that was collected from each member of the Jewish community.

Another seal impression seems to be (a letter is missing) the name "Isaiah the prophet." It was found near the Temple Mount near another seal impression that says "King Hezekiah of Judah" that was uncovered two years earlier. Hezekiah and the prophet Isaiah are mentioned in the same verse 17 times. This clay seal gives the impression that Isaiah had access to the king's palace as his adviser.

A ring with the name "Pontius Pilate" on it was excavated decades ago but only could be read recently due to advanced photographic techniques. Of course, this is not the first time that his name has surfaced in archaeology, but it is still a significant find. The ring is not fancy enough to have been worn by Pilate. It was probably worn by someone authorized to act on his authority and would use it to seal official communications.

This is an exciting time for archaeological investigation. New finds provide even more evidence of the historical accuracy of the Old Testament and the New Testament. Archaeology has provided abundant confirmation of the Bible.

The Dangerous Ideology of Transgenderism

Transgenderism has been the topic in the news for more than a decade; therefore, Christians need to know what to think about the various claims being made. We also need to know how to respond to an aggressive push by trans activists to normalize this behavior and criticize anyone who does not accept it.

Transgenderism is the belief that people have a “gender identity” that is distinct from their biological sex. If they feel there is a conflict between their gender and their sex, gender identity should take precedence. Although a very small fraction of the population may experience gender dysphoria (where a person experiences discomfort or distress from a mismatch between their biological sex and the gender they want to be), the current percentage of Americans identifying as transgender or nonbinary (not identifying as either male or female, masculine or feminine) has exploded.

Sexuality, Gender, and Medical Studies

Dr. Paul McHugh has served as the Professor of Psychiatry and Behavioral Sciences at Johns Hopkins Medical School. He has concluded that “gender reassignment surgery” doesn’t work. He, along with Dr. Lawrence Mayer, surveyed over 200 peer-reviewed studies done in various disciplines.[\[1\]](#) Here are four of the most important conclusions from their paper:

First, the “belief that sexual orientation is an innate, biologically fixed human property” is not supported. In other words, people are not “born that way.”

Second, the “belief that gender identity is an innate, fixed human property independent of biological sex—so that a person might be a man trapped in a woman’s body or a woman trapped in a man’s body—is not supported by scientific evidence.”

Third, “only a minority of children who express gender-atypical thoughts or behavior will continue to do so into adolescence or adulthood.” It goes on to say that children should not be encouraged to become transgender. They also should not be subjected to hormone treatments or surgery.

Fourth, people who are homosexual or transgender “have higher rates of mental problems (anxiety, depression, suicide), as well as behavioral and social problems (substance abuse, intimate partner violence), than the general population.”

While the paper only focuses on the scientific research, it obviously has implications for public policy. Incorrect scientific claims have been used to justify court rulings, government policies, and medical practices concerning sexual orientation and gender identity. They have not been based upon sound science.

American College of Pediatricians

Above, we talked about some of the scientific research into homosexuality and transgenderism. Dr. Paul McHugh and Dr. Lawrence Mayer surveyed over 200 peer-reviewed studies and came to conclusions that are contrary to much of the current statements being made by trans activists.

Dr. Paul McHugh was also one of the authors of a statement by the American College of Pediatricians. The title of their statement was: “Gender Ideology Harms Children.”[{2}](#) Here is a summary sentence or two of the eight points they make in their statement.

1. “Human sexuality is an objective biological binary trait:

XY and XX are genetic markers of health, not genetic markers of a disorder.”

2. “No one is born with a gender: Everyone is born with a biological sex. Gender (an awareness and sense of oneself as male or female) is a sociological and psychological concept; not an objective biological one.”

3. “A person’s belief that he or she is something they are not is, at best, a sign of confused thinking.”

4. “Puberty is not a disease and puberty-blocking hormones can be dangerous.”

5. “According to the DSM-V [Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition], as many as 98% of gender-confused boys and 88% of gender-confused girls eventually accept their biological sex after naturally passing through puberty.”

6. “Pre-pubertal children diagnosed with gender dysphoria may be given puberty blockers as young as eleven, and will require cross-sex hormones in later adolescence to continue impersonating the opposite sex. These children will never be able to conceive any genetically related children even via artificial reproductive technology. In addition, cross-sex hormones (testosterone and estrogen) are associated with dangerous health risks including but not limited to cardiac disease, high blood pressure, blood clots, stroke, diabetes, and cancer.”

7. “Rates of suicide are nearly twenty times greater among adults who use cross-sex hormones and undergo sex reassignment surgery, even in Sweden which is among the most LGBTQ-affirming countries.”

8. “Conditioning children into believing that a lifetime of chemical and surgical impersonation of the opposite sex is normal and healthful is child abuse.”

Gender Dysphoria Research

Abigail Shrier wrote about the transgender craze in her book *Irreversible Damage: The Transgender Craze Seducing Our Daughters*.^{3} In [my radio interview with her](#), she explained that “gender dysphoria” was characterized by severe and persistent discomfort in one’s biological sex. It typically begins in early childhood. In previous generations, it afflicted a sliver of the population (roughly .01 percent) and occurred mostly in boys.

Prior to 2012, there was no scientific literature on girls (11-21) ever having developed gender dysphoria at all. Then the Western world experienced a sudden surge of adolescents claiming to have gender dysphoria and self-identifying as “transgender.”

In 2016, Lisa Littman (an ob-gyn, public health researcher) was scrolling through social media when she noticed a statistical peculiarity. Several adolescents (most of them girls) from a small town in Rhode Island had come out as transgender. In fact, they were all from the same friend group.

She admitted that she knew very little about gender dysphoria, but this statistical anomaly was interesting to her. And she then noticed there had been a sudden spike in the Western World of girls experiencing gender dysphoria. She immersed herself in the scientific literature on gender dysphoria to try to understand what was happening. Perhaps it was due to increased social acceptance of LGBTQ people, but she suggested in a peer-reviewed paper that the girls might be rushing toward “transition” because of peer contagion. As you might imagine, her suggestion was roundly criticized. She was also accused of anti-trans bigotry.

In a subsequent research project, she collected data anonymously from 256 parents whose kids had not met the

criteria of gender dysphoria in childhood, but suddenly identified as transgender in adolescence. She identified 16 traits in common. Here are a few.

1. The vast majority have zero indicators of childhood gender dysphoria.
2. Almost a third of them did not seem at all gender dysphoric.
3. A majority had one or more psychiatric diagnosis and almost half were engaged in self-harm prior to the onset of dysphoria.
4. Nearly 70 percent of the teenagers belonged to a peer group in which at least one friend had also come out as transgender.
5. Among parents who knew their children's social status, over 60 percent said the announcement brought a popularity boost.
6. Over 88 percent of the parents surveyed reported being supportive of transgender rights.

There is growing evidence that social contagion is a much better explanation for the notable increase in the number of young people (especially young women) who now claim to be transgender.

Promotion of Transgenderism

Transgenderism has been promoted through social media, through the schools, and even through the medical establishment. Abigail Shrier began to look at the influence of social media on this transgender craze. In her chapter on "The Influencers" she talks about trans promoters who have become a YouTube sensation. We are seeing similar promoters on TikTok and other social media platforms. Here are a few of the ideas she

discovered.

1. If you think you might be trans, you are.
2. Testosterone is amazing. It may just solve all your problems.
3. If your parents love you, they will support your trans identity.
4. Deceiving parents and doctors is justified, if it helps transition.
5. You don't have to identify as the opposite sex to be trans.

She also found that transgenderism was being promoted through the schools. One program coordinator she talked to acknowledged that the "role of schools has changed." Now "schools have expanded to be the hub for a lot more social services and looking more holistically, emotionally, at what's going on with children." In other words, they have become a "source of social justice."

You might wonder how schools teach about transgenderism to young children. Teachers begin by talking about gender identity. A book intended for kindergarten teachers to read to their students reinforces the idea that gender is a social construct. It begins with a familiar origin story: "Babies can't talk, so grown-ups make a guess by looking at their bodies. This is the sex assigned to you at birth, male or female." It then provides a list of gender options: trans, genderqueer, non-binary, gender fluid, transgender, gender neutral, agender, bigender, etc.

Transgender charts and diagrams are being used in many schools. There is a "Genderbread Person" that is supposed to help children sort through how their gender identity and their gender expression relates to their biological sex. And there

is a “Gender Unicorn” that is supposed to help them understand who they may be physically attracted to and emotionally attracted to.

The American Psychological Association has even put together guidelines for the Care of Transgender and Gender Nonconforming (TGNC) patients. Doctors must provide “gender affirming care” which is defined as being “respectful, aware, and supportive of the identities and life experiences of TGNC people.”

How to Respond to the Transgender Moment

Ryan Anderson is the author of the book, *When Harry Became Sally: Responding to the Transgender Moment*.^{4} When [I interviewed him](#) on his book, he explained how transgender ideology promotes the opportunity for children to change their gender with surgery and drugs. And parents “are told that puberty blockers and cross-sex hormones may be the only way to prevent their children from committing suicide.”

Ryan Anderson countered that the best studies of gender dysphoria have found “that between 80 and 95 percent of children who express a discordant gender identity will come to identify with their bodily sex if natural development is allowed to proceed.” He also documented that even children going through “transitioning” treatment still have an extraordinarily high rate of suicide attempts compared to the general population.

He reminded us that we should be tolerant and loving toward children (and adults) who struggle with their gender identity. But we should also be aware of the potential harm when transgender identity is normalized.

Unfortunately, we are living in a world where transgender activists want more than tolerance and kindness. They demand affirmation. We aren’t allowed to question whether using

medical treatments to aid in transgender transformation is positive for children. In his book, Ryan Anderson shows that the best biology, psychology, and philosophy support an understanding of sex as a bodily reality. As he puts it: "Biology isn't bigotry."

Abigail Shrier also offers several suggestions. First, don't get your kid a smartphone. She explains that nearly every problem teenagers face traces itself back to the introduction of the smartphone years ago.

Second, don't relinquish your authority as a parent. You don't have to go along with every idea your teenager has, nor do you have to go along with every educational or psychological fad being promoted in society.

Third, don't support gender ideology in your child's education. She provides an example of what happens when schools do a seminar on anorexia or suicide. Often the prevalence increases. A small number of students may have gender confusion or gender dysphoria. But talking about it will spread confusion.

Finally, don't be afraid to admit, that it's wonderful to be a girl.

While she talks about the benefits and opportunities of being a girl, Christians can go even further. We believe God is responsible for who we are and what we are. Each one of us is created in God's image (Genesis 1:26). We can celebrate girls and boys and encourage them to use their gender and their gifts to the glory of God (1 Corinthians 1:31).

Money Management in a Crisis

The COVID pandemic caused a worldwide financial crisis, making stewarding God's money more important than ever. Kerby Anderson provides a biblical view of money, giving, debt, and savings.

A number of years ago, I wrote a book with the appropriate title, *Making the Most of Your Money in Tough Times*.[{1}](#) Although there have been tough times in the past, we certainly need some biblical wisdom about our money and how to manage it in our current circumstances. Here are some key principles that I discuss in that book and in a more recent book on the subject of *Christians and Economics*.[{2}](#)

Biblical View on Money

Let's start by correcting a common cliché that money is the root of all evil. Actually, the biblical passage says: "The love of money is a root of all kinds of evil, for which some have strayed from the faith in their greediness" (1 Timothy 6:10).

Money is not evil, but the love of money can be a concern. Money can be used to promote good or evil. Money can provide

for your family, feed the poor, and promote the gospel. It can also be used to buy drugs, engage in prostitution, and destroy individuals and society.

The real question is: What is your attitude towards money? What do you plan to do with the financial resources God has placed into your hands? Jesus warned us that we should not love money because we cannot serve God and Mammon (Matthew 6:24). In order to have a proper biblical perspective on money, we need to understand what the Bible teaches about wealth and poverty.

While we are talking about money, let's focus some attention on wealth. Within the Christian community, we are often bombarded with unbiblical views of wealth. At one extreme are those who preach a prosperity gospel of "health and wealth" for all believers. At the other extreme are radical Christians who condemn all wealth and imply that a rich Christian is a contradiction in terms.

What is a biblical view of wealth? First, wealth itself is not condemned. The Bible teaches that God gave material wealth to Abraham (Genesis 13), Isaac (Genesis 26), Jacob (Genesis 30), and Joseph (Genesis 39). Other characters in the Old Testament were also wealthy, such as Job (Job 42) and Solomon (1 Kings 3). In fact, we see in Job 42 that God once again blessed Job with material possessions after his trials. In Deuteronomy, Proverbs, and Ecclesiastes, wealth is seen as evidence of God's blessing (Deuteronomy 8; 28; Proverbs 22:2; Ecclesiastes. 5:19).

Even though wealth might be an evidence of God's blessing, believers are not to trust in it. Passages in the Old Testament and the New Testament teach that the believer should not trust in wealth but in God (Proverbs 11:4; 11:28; Jeremiah 9:23; 1 Timothy 6:17; James 1:11; 5:2).

Second, when wealthy people in the Bible were condemned, they

were condemned for the means by which their riches were obtained, not for the riches themselves. The Old Testament prophet Amos railed against the injustice of obtaining wealth through oppression or fraud (4:11; 5:11). Micah spoke out against the unjust scales and light weights with which Israel defrauded the poor (6:1). Neither Amos nor Micah condemned wealth per se; they only denounced the unjust means by which it is sometimes achieved.

Third, Christians should be concerned about the effect wealth can have on our lives. We read in many passages that wealth often tempts us to forget about God. Proverbs 30:8-9 says: "Give me neither poverty nor riches; Feed me with the food that is my portion, That I not be full and deny You and say, 'Who is the Lord?'" Hosea 13:6 says of those who were satisfied that "their heart became proud" and ultimately forget about the Lord.

Biblical View on Giving

In order to develop a biblical point of view on money, we should first focus on the subject of giving. The concept of the tithe is introduced in the Old Testament. The word tithe means "a tenth part." Once you understand that someone who, say, makes \$3000 a month and gives only \$100 a month is not tithing. A number of studies have found that only 2-3 percent of households tithe their income to their church.

There is no explicit command in the New Testament to tithe. The primary reason is that the tithe was for the Levites and the priests. The substitutionary death of Christ for our sins did away with the need for a temple and priests.

In the New Testament, we do see numerous verses calling for believers to give. For example, we are to give to those who minister (1 Corinthians 16:1; Galatians 2:10). We are to give to those who trust God to supply their needs (Philippians

4:19). We are to give as God has prospered them (1 Corinthians 16:2) and are to give cheerfully (2 Corinthians 9:7). And the Bible teaches that we will ultimately give account of our stewardship (Romans 14:12).

The first century believers set a high standard for giving. They sold their goods and gave money to any believer in need (Acts 2:45). They sold their property and gave the entire amount to the work of the apostles (Acts 4:36-5:2). And they also gave generously to the ministry of Paul (2 Corinthians 8:1-5) on a continual basis (Philippians 4:16-18).

Even though the tithe was no longer required, it appears that the early believers used the tithe as a base line for their giving. After all, a large majority of the first century believers were Jewish, and so they gave not only the tithe but above and beyond the requisite ten percent.

Paul makes it clear that Christians are not to give "grudgingly or under compulsion" but as each believer has "purposed in his heart" (2 Corinthians 9:7). Although the tithe was no longer the mandatory requirement, it seems to have provided a basis for voluntary giving by believers.

There is also a correlation between sowing and reaping. 2 Corinthians 9:6 says: "Now this I say, he who sows sparingly will also reap sparingly, and he who sows bountifully will also reap bountifully." Elsewhere in Scripture, we read that the size of a harvest corresponds to what we scatter. Proverbs 11:24-25 says: "There is one who scatters, and yet increases all the more, And there is one who withholds what is justly due, and yet it results only in want. The generous man will be prosperous, And he who waters will himself be watered." Notice that a spiritual harvest may be different from the kind of seed that is sown. For example, a material seed (giving to ministry) may reap a spiritual harvest (1 Corinthians 9:9).

Finally, we are to give according to what we have purposed in

our hearts. 2 Corinthians 9:7 says: "Each one must do just as he has purposed in his heart, not grudgingly or under compulsion, for God loves a cheerful giver."

Biblical View on Debt – Part 1

The Bible has a number of warnings concerning debt. Proverbs 22:7 says: "The rich rule over the poor, and the borrower is a servant to the lender." When you borrow money and put yourself in debt, you put yourself in a situation where the lender has significant influence over you.

Many other verses in the Proverbs also warn about the potential danger of taking on debt, especially another person's debt (Proverbs 17:18; 22:26-27; 27:13). While this does not mean that we can never be in debt, it does warn us about its dangers.

If you are debt free you are free to follow the Lord's leading in your life. If you are in debt, you are constrained and become a servant to the lender. People who are in financial bondage are not emotionally or spiritually free. Their financial obligations wear heavy upon their mind and spirit.

The Bible also teaches that it is wrong to borrow and not repay. Psalm 37:21 says: "The wicked borrows and does not pay back, but the righteous is gracious and gives."

Some have taught that Christians should never go into debt. The basis for that teaching is usually the passage in Romans 13:8 because it says: "Owe nothing to anyone."

Although some have argued that this verse prohibits debt, the passage needs to be seen in context. This passage is not a specific teaching about debt but rather a summary of our duty as Christians to governmental authority. Paul is teaching that we should not owe anything to anyone (honor, taxes, etc.). But he is not teaching that we should never incur debt. While it

is better that we are debt-free, this passage is not commanding us to never go into debt.

The Bible is filled with biblical passages that provide guidelines to lending and borrowing. If debt was always wrong, then these passages would not exist. After all, why have passages providing guidelines for debt if debt is not permitted? Certainly there would be a clear prohibition against debt. We should point out that the clear implication of Romans 13:8 is that we should pay our debts and it would be wise if we would pay our debts off as quickly as possible.

Biblical View on Debt – Part 2

One of the consequences of debt is that we can often deny reality. In order to realistically deal with the debt in our lives we need to get rid of some of the silly ideas running around in our heads.

For example, you are NOT going to win the lottery. Your debt problem is NOT going to go away if you just ignore it. And a computer glitch in your lender's computer is NOT going to accidentally wipe out your financial records so that you don't have to repay your debt.

Another consequence of debt is a loss of integrity. When we cannot pay, we start saying "the check's in the mail" when it isn't. We not only kid ourselves but we try to mislead others about the extent of our problem with debt.

Sometimes debt even leads to dishonesty. Psalm 37:21 says: "The wicked borrows and does not pay back." We should repay our debts.

A third consequence of debt is addiction. Debt is addictive. Once in debt we begin to get comfortable with cars, consumer goods, furniture, etc. all funded through debt. Once we reach that comfort level, we go into further debt.

A final consequence of debt is stress. Stress experts have calculated the impact of various stress factors on our lives. Some of the greatest are death of a spouse and divorce. But it is amazing how many other stress factors are financially related (change in financial state, mortgage over \$100,000). When we owe more than we can pay, we worry and feel a heavy load of stress that wouldn't exist if we lived debt free.

Biblical View on Savings

It is always important for us to get out of debt. I have written another booklet on the subject of debt. If you are in debt or want to learn more about government debt and personal debt, I encourage you to obtain that booklet. Email me your name and address at kerby@probe.org and I will send it to you.

We should not merely work to get out of debt and eventually break even. Savings and investing should be part of your budget and part of your life plan. Saving and investing are ultimately a means to an end. You may be saving for your kids' college or saving for your retirement.

America used to be a nation of savers. In fact, thrift was a foundational element of American society. The architect Louis Sullivan even carved the word THRIFT over the door of his bank. Thrift was seen as a private moral virtue that made public prosperity possible. Americans supported institutions that encouraged savings.

The Bible encourages us to save. In Proverbs it encourages those who do not save to consider how a lowly creature like

the ant prepares for the future. "Go to the ant, you sluggard; consider its ways and be wise! It has no commander, no overseer or ruler, yet it stores its provisions in summer and gathers its food at harvest" (Proverbs 6:6-8).

The writer of Proverbs also talks about how wise people save in contrast to foolish people who do not. "In the house of the wise are stores of choice food and oil, but a foolish man devours all he has" (Proverbs 21:20).

We should always have a budget. Author and speaker, John Maxwell, has a great definition of a budget: "A budget is people telling their money what to do instead of wondering where it went." A budget is a plan for saving and spending.

The book of Proverbs admonishes us to plan. Proverbs 16:3 says, "Commit your works to the LORD And your plans will be established." But as we develop these plans for the future, we also need to be sensitive to the Lord's leading. "The mind of man plans his way, but the Lord directs his steps" (Proverbs 16:9).

The Bible promises that good things will happen when we plan. "Good planning and hard work lead to prosperity" (Proverbs 21:5, NLT). By contrast, the Bible also teaches that your plans will fail if these plans are not within the will of God. Isaiah 30:1 says, "'Destruction is certain for my rebellious children,' says the Lord. 'You make plans that are contrary to my will. You weave a web of plans that are not from my Spirit, thus piling up your sins.'"

If you do not have anything in savings, you need to begin by putting aside a cash reserve for emergencies. Proverbs 22:5 says, "The prudent sees danger and hides himself, but the simple go on and suffer for it." Everyone needs a cash reserve for major emergencies (fire, tornado, earthquake) and even for small emergencies and inconveniences (broken appliance, car repair, flat tire).

Most financial advisors suggest that you have six months' worth of income set aside for an emergency or unexpected expense. You may not have that set aside right now, but today is a good time to start setting aside some money. Make your first goal to set aside one month's worth of income.

This has been a brief overview of money management. I encourage you to read books{3} and visit websites that will give you even more direction on how to use your money. The Bible provides insight in giving, savings, and debt. Apply these principles and allow God to bless you.

George Washington and

Religion

Kerby Anderson presents a compelling argument for the view that George Washington was a devoted Christian rather than a deist. He points to Washington's insistence on the importance of services for his soldiers, his personal church attendance, his prayer life and his commitment to the spiritual upbringing of his godchildren.

Background

What was George Washington's view of religion and in particular of Christianity? The historical perspective used to be that Washington was a Christian and orthodox in most of his beliefs. But the modern view has been that he was either a lukewarm Anglican or more likely a Deist.

I want to look at some new research that argues for the traditional view and against the modern view of George Washington's religion. One book is *Washington's God: Religion, Liberty, and the Father of our Country*.[\[1\]](#) It is written by Michael Novak (American Enterprise Institute and winner of the Templeton Award) and Jana Novak. Another book, written by Peter Lillback with Jerry Newcombe, is *George Washington's Sacred Fire*.[\[2\]](#)

George Washington was born into a Virginia family of moderate wealth and was exposed to various religious activities: lessons in religion, regular prayer, Sunday school attendance, and reverence for God. His mother had a daily ritual of retiring with a book of religious readings.

By the time he was a teenager, Washington had already assumed serious responsibilities as a professional surveyor and then as a major in the Virginia militia. His adventures in the wild lands gave him invaluable lessons about the military, Indians,

and the British. Years later in a speech to the Delaware chiefs, Washington said, "You do well to wish to learn our arts and ways of life, and above all, the religion of Jesus Christ. These will make you a greater and happier people than you are."[\[3\]](#)

He studied the Bible as well as the writings of ancient heroes. The busts and portraits at Mount Vernon demonstrate this. There are busts of Alexander the Great, Julius Caesar, Charles XII of Sweden, and Frederick II of Prussia. In the dining room are portraits of the Virgin Mary and St. John.

Washington's own stepgranddaughter "Nelly" Custis saw him as a religious man. She wrote this to one of Washington's early biographers:

It was his custom to retire to his library at nine or ten o'clock, where he remained an hour before he went to his chamber. He always rose before the sun, and remained in his library until called to breakfast. I never witnessed his private devotions. I never inquired about them. I should have thought it the greatest heresy to doubt his firm belief in Christianity. His life, his writings, prove that he was a Christian. He was not one of those who act or pray, "that they may be seen of men." He communed with his God in secret.[\[4\]](#)

In what follows we will look at the evidence for George Washington's faith as it surfaced in his letters and actions as general and president.

Deism vs. Christianity

Pick up a book about George Washington written during the nineteenth century, and you will probably see that he is described as being a Christian. However, if you pick up a book written in the last seventy years, it will describe him as a Deist. Why the change?

The turning point seems to be a study by historian Paul F. Boller, Jr. entitled *George Washington and Religion*. His conclusion can be summarized in a single sentence: To the “unbiased observer” George Washington appears as a Deist, not a devout Christian.^{5} Most historians since Boller accepted this idea and were less likely to assert that Washington was a Christian.

What do we mean by “Deism”? Deism is the belief that God is merely a watchmaker God who started the universe but is not involved in the affairs of humans and human history. One definition of Deism is that “There is no special providence; no miracles or other divine interventions intrude upon the lawful natural order.”^{6}

Was George Washington a Deist? He was not. It is worth noting that even historian Paul Boller admitted that religion was important to Washington as a leader. Boller writes, “he saw to it that divine services were performed by the chaplains as regularly as possible on the Sabbath for the soldiers under his command.”^{7} We might reasonably ask, Why would chaplains be important to a Deist?

Boller even admits there are testimonials of Washington’s church attendance. This is important since many historians even go further than Boller and assert that Washington did not even attend church as a mature adult.

Michael Novak admits that some of the names Washington often used for God *sound* Deist, but that does not mean that he was a Deist. In fact, his prayers for God’s action were just the opposite of what you might hear from a Deist. Washington believed God favored the cause of liberty and should be beseeched to “interpose” his action on behalf of the Americans. He called for public thanksgiving for the many ways in which Americans experienced God’s hand in key events in our history.

Washington used more than eighty terms to refer to God, among them: Almighty God, Creator, Divine Goodness, Father of all mercies, and Lord of Hosts. The most common term he used in his writings and speeches was "Providence." When he did so, he used the masculine personal pronoun "he." Washington never refers directly to God as an "it," as he does occasionally with Providence. God is personal.{8}

If we look at the history of the eighteenth century, there were many with orthodox religious beliefs who sometimes used the philosophical language of the enlightenment. Washington was a Christian, even though he often used terms for God associated with Deists.

A Religious Nation Goes to War

There has been some dispute about how religious America was during the Revolutionary War. There was a shortage of churches and clergy (especially along the paths of westward migration). But we should also remember that this War of Independence followed the First Great Awakening.

At the first meeting of the Continental Congress in Philadelphia (September 1774), the first motion from the floor was for prayer to seek guidance from God. But there was resistance, not because of the prayer, but because of the theological disagreements among the members (Anabaptist, Quakers, Congregationalists, Episcopalians, Presbyterians). Sam Adams settled the dispute by saying he was no bigot and could pray along with any minister as long as he was a patriot.{9} I have in my office a picture of a painting showing George Washington praying with men like Patrick Henry, John Jay, and Richard Henry Lee.

At the second meeting, they proposed that Washington be appointed commander in chief of the Continental Army. He did not think he was equal to the command but accepted it. He

wrote his wife, "I shall rely, therefore, confidently on that Providence, which has heretofore preserved and been bountiful to me, not doubting but that I shall return safe to you in the fall." [{10}](#) At the time, Washington was the only man on the continent in uniform since no Continental Army yet existed. To the British, he was the supreme traitor, in open rebellion to the King. His neck was at risk, and the American independence depended on him.

One event that George Washington believed showed God's providence was the Battle of Long Island in 1776. Washington and his men were trapped on Brooklyn Heights, Long Island. The British were poised to crush the American army the next day and that would have been the end of the rebellion. Washington planned a bold move and began evacuating his troops under the cover of darkness using everything from fishing vessels to rowboats. But there was not enough time to accomplish the task. When morning came, the fog of night remained and only lifted in time for the British to see the last American boat crossing the East River beyond the reach of their guns. You can read more about this miraculous event in Michael Novak's book, *On Two Wings: Humble Faith and Common Sense at the American Founding*. [{11}](#)

Washington also required chaplains for the Continental Army, and personally took time for prayer. He forbade his troops under pain of death from uttering blasphemies, even profanity. He called upon them to conduct themselves as Christian soldiers because the people demanded it. [{12}](#)

Washington's actions during the Revolutionary War demonstrate his Christian character.

First in War and First in Peace

In his eulogy for George Washington, Henry Lee said he was "First in war, first in peace, and first in the hearts of his

countrymen.” We could also say the Washington demonstrated Christian character both in war and in peace.

While fulfilling his duties as general, he came to be known as a “nursing father.” This is a biblical phrase (Num. 11:12, Is. 49:23 KJV) that appears in many of the tributes to Washington after his death. He brought together very diverse groups to fight the Revolutionary War by bridging ethnic and social divisions. This ranged from the regiment from Marblehead, Massachusetts (that included men of mixed race, blacks, and Indians), to the Virginian and southern aristocrats to the yeomen in hunting shirts from western Virginia.

One of his orders stated that “All chaplains are to perform divine service tomorrow, and on every succeeding Sunday. . . . The commander in chief expects an exact compliance with this order, and that it be observed in future as an invariable rule of practice—and every neglect will be consider not only a breach of orders, but a disregard to decency, virtue and religion.”[{13}](#)

Washington grew even more explicit as the war dragged on: “While we are zealously performing the duties of good citizens and soldiers we certainly ought not to be inattentive to the higher duties of religion. To the distinguished character of patriot, it should be our highest glory to add the more distinguished character of a Christian.”[{14}](#)

Washington lost a great deal of money during the war by paying for things out of his own pocket and by refusing a salary. He happily returned to Mount Vernon and spent happy years with his wife. But the constitutional convention in 1787 brought him to elective office. He was elected as president by unanimous vote in 1789.

In his inaugural address, Washington said, “No people can be bound to acknowledge and adore the invisible hand, which conducts the affairs of men more than the people of the United

States. Every step, by which they have advanced to the character of an independent nation, seems to have been distinguished by some token of providential agency.”

He issued a thanksgiving proclamation in 1789 in which he asserted “the duty of all nations” in regard to God. His thanksgiving proclamation of 1795 proclaims there are signs of “Divine beneficence” in the world. And in his farewell address, he reminded Americans that “Of all the dispositions and habits which lead to political prosperity, Religion and Morality are indispensable supports.”

Washington demonstrated Christian character in war and in peace.

Washington as Christian: Pro and Con

Let’s summarize the arguments historians make about Washington’s religious faith. Those who believe that George Washington was a Deist and not a Christian usually make the following observations.

First, Washington never took communion at Sunday services. Second, he refused to declare his specific beliefs in public. Third, he rarely used the name of Jesus Christ in private correspondence and in public utterances. Finally, while he believed in God and had an awareness of Providence in his life, it all seems more like a Greek or Roman view of fate.

Michael Novak’s response to these observations is helpful. “All these objections have a grain of truth in them. Still, they are consistent with Washington’s being a serious Christian who believed that he had a public vocation that required some tact regarding his private confessional life.”[\[15\]](#) Novak adds:

It is not at all unusual for public men in pluralistic American life to maintain a notable reserve about their

private convictions. They do not burden the public with declarations of their deepest beliefs, whose general force they trust their actions will sufficiently reveal. In the public forum, they happily give to Caesar what is Caesar's and in the private forum, to God what is God's. [\[16\]](#)

What are some of the reasons to believe Washington was a Christian? First, he religiously observed the Sabbath as a day of rest and frequently attended church services on that day. Second, many report that Washington reserved time for private prayer. Third, Washington saved many of the dozens of sermons sent to him by clergymen, and read some of them aloud to his wife.

Fourth, Washington hung paintings of the Virgin Mary and St. John in places of honor in his dining room in Mount Vernon. Fifth, the chaplains who served under him during the long years of the Revolutionary War believed Washington was a Christian. Sixth, Washington (unlike Thomas Jefferson) was never accused by the press or his opponents of not being a Christian.

It is also worth noting that, unlike Jefferson, Washington agreed to be a godparent for at least eight children. This was far from a casual commitment since it required the godparents to agree to help insure that a child was raised in the Christian faith. Washington not only agreed to be a godparent, but presented his godsons and goddaughters with Bibles and prayer books.

George Washington was not a Deist who believed in a "watchmaker God." He was a Christian and demonstrated that Christian character throughout his life.

The Great Reset

The Great Reset means different things to different people. Kerby Anderson provides an overview and a biblical perspective.

Is the idea of “The Great Reset” merely a conspiracy theory? That seems unlikely, given the fact that if you type in those three words in a search engine you will find more than 900 million hits. But the phrase “great reset” apparently means different things to different people, so getting a clear definition is important.

In 2020, the founder of the World Economic Forum co-authored and published a book called *COVID-19: The Great Reset*.[\[1\]](#) This organization is composed of political, economic, and cultural elites who meet regularly in Davos, Switzerland. The two authors of this book see the current situation in the world as a means of dealing with the “weaknesses of capitalism” supposedly exposed during the pandemic.

But to understand the history of “The Great Reset” you need to go back to the beginning of the World Economic Forum. Klaus Schwab introduced the idea of “stakeholder capitalism.”[\[2\]](#) This is a term sometimes used by progressives to reset the management goals in corporations from shareholders to stakeholders.

The actual term “Great Reset” can be found in a book by that title written by urban studies scholar Richard Florida.[\[3\]](#) He argued that the 2008 economic crash was the latest in a series of great resets that included the Great Depression of the 1930s. A few years later, the book and its ideas became the basis for wanting to “push the reset button” on the world economies.

As you might expect, the pandemic and lockdowns have provided a context in which a reset could take place. The goal would be to make the world greener, more digital, and fairer. Given what the world has been through these last few years, the proponents hope to change the economies of nations, so that they benefit not only shareholders but employees, consumers, communities, and the environment.

Some of the comments proponents have made about “The Great Reset” have become fodder for various conspiracy theories. But it is probably fair to say that the phrase “The Great Reset” means different things to different people. Environmental groups want to reset how we use resources and focus on

sustainability. Business leaders want banks and corporations to use an ESG index (environmental, social, and governance index). Globalists want to reset the economy and move us toward a different view of [capitalism](#).

Critics talk about some of the other factors associated with “The Great Reset.” That would include such things as the promotion of uncontrolled immigration along with significant money printing that results in such problems as open borders and uncontrolled inflation.

In this article we look at this important issue from an economic, political, and biblical perspective. As you will see, Christians need to pay attention to this issue in the news.

The Great Reset of Capitalism

The primary focus from the World Economic Forum has been on the attempt to move our current economic system into “stakeholder capitalism.” Some critics have renamed it “corporate [socialism](#)” or even “communist capitalism.”

The plan is to change the behavior of corporations to no longer benefit shareholders but to focus on stakeholders. This would be done by requiring businesses and corporations to take a more central role when a crisis, like the recent pandemic, adversely affects society.

[Climate change](#) is another “crisis” that corporations need to address. Put simply, corporations need to be involved in social justice issues. That is why we are seeing major corporations getting more involved in political issues and expressing their opinions on issues ranging from transgenderism to voter integrity laws. One effective tactic being used is to rate businesses and corporations with an ESG index (environmental, social, and governance index).

The ESG index can be used to force businesses to comply with a [woke](#) agenda or else be squeezed out of the market. Some have suggested that the ESG index is essentially a social credit score being applied to businesses and corporations.

Andy Kessler, writing in the *Wall Street Journal*, argues that ESG is a loser and that you pay higher expenses for a fund with similar stocks but worse performance.[{4}](#) In fact, he encourages [investors](#) to buy stocks of companies with great prospects over the next decade at reasonable prices.

Aren't the companies and countries with a high ESG score better investments? A professor at the University of Colorado evaluated the system in the *Harvard Business Review* and made four key points about ESG.[{5}](#)

First, ESG funds have underperformed. Second, companies that tout their ESG credentials have worse compliance records for labor and environmental rules. Third, ESG scores of companies that signed the UN Principles of Investment, didn't improve after they signed, and their financial returns were lower for those who signed. His final point was even more significant. He concluded that often companies publicly embrace ESG as a cover for poor business performance. In other words, when earnings are bad, the company cites its ESG score.

Klaus Schwab believes that companies should try and optimize for more than short-term profits and focus on achieving the goals set forth by the UN for sustainable development. That may sound like a good idea until you look at the economic data behind it.

Why Now?

Why has there been such a push for significant changes in this decade? Activists wanting to make changes in society and our economy see the pandemic and governmental response as a political opportunity. It is the familiar phrase, "Never let a

crisis go to waste.”

Most social and political change occurs gradually. The crisis of the pandemic forced big government and big pharma to move at a much faster rate. Public acceptance of larger governmental control became a paradigm shift that allowed political leaders and even corporate leaders to move faster than the incremental pace of the past. The pandemic threw open the window for change. The only question is how much of “The Great Reset” will be put in place before it closes.

The pandemic is the external reason for pushing “The Great Reset” but there is also an internal reason. An entire generation of college students learning woke ideology in the universities are now filling positions in various companies. Many commentators naively suggested that once coddled college students enter the “real world,” they will drop their woke ideas and face the reality of making a living in the business world and the free market.

Instead, those woke students brought their ideas into corporate boardrooms and embraced attempts to reset capitalism and corporations. Their professors taught them that capitalism is evil, and that America is riven with racism, sexism, homophobia, and xenophobia. It is time, they believe, to join arms with activists and reformers and bring about “The Great Reset.” We might add that the American consumer hasn’t been so accepting of these ideas, which is why we sometimes hear the phrase “go woke, go broke.”

The push for a “Great Reset” is also taking place during what many commentators refer to as the fourth industrial revolution. The first industrial revolution was a mechanical revolution. The second and third revolutions were electrical and digital revolutions. This fourth industrial revolution brings together diverse technologies like artificial intelligence, robotics, nanotechnology, and biotechnology. It also includes philosophical ideas like [transhumanism](#).

In previous programs, I have discussed the impact of surveillance on our [privacy](#). We warned about the influence of [Big Tech](#) and [Big Data](#). And we have also talked about [the merging of humans and machines](#). Each new technological development brings progress and benefits, but they also bring legitimate concerns about how these technologies can be abused in the wrong hands.

How then will this be accomplished?

Administrative State

It may be difficult to imagine how the great reset programs could be implemented in the US. Only a few members of Congress would support these ideas. As we have discussed above, many of these ideas have been implemented in woke corporations. But these programs could also be implemented by the administrative state or what some have called “the deep state.”

Two books document the deep state. Michael Glennon (Tufts University law professor) wrote about *National Security and Double Government*.[\[6\]](#) This dual-state system, he explained, began under President Bush but was continued under President Obama.

Mike Lofgren (former congressional aide) wrote about *The Deep State: The Fall of the Constitution and the Rise of a Shadow Government*.[\[7\]](#) He argued that there is “the visible government situated around the Mall in Washington, and then there is another, more shadowy, more indefinable government that is not explained in Civics 101 or observable to tourists at the White House or the Capitol.” He explained that it wasn’t a “secret, conspiratorial cabal” but rather “the state within a state is hiding mostly in plain sight.”

The reason we have an executive bureaucracy is to benefit from the research and experience of public servants who have devoted their lives to understanding the social and political

implications of federal policies. This has always been a necessary function, but especially with the last few presidents. The experts in the bureaucracy can provide context and prevent presidents and their cabinets from making huge mistakes.

But there is another side to the federal bureaucracy. We may suppose that bureaucrats are there to implement the policies of the President and administration. Political appointees to the cabinet always say that they “serve at the pleasure of the president.”

That may be true for them. But a career civil servant has a different perspective and expects to be in government much longer than the four or eight years a president holds office. We may think of the bureaucracy as like a military unit (where every order is routinely obeyed). But the bureaucracy is often more like a university faculty (where you are part of a team but also have many of your own ideas about what should be done). Often the federal bureaucracy slows down the implementation of the president’s policies or even chooses to ignore them.

As I discussed in a previous program on [The Liberal Mind](#), even with the best of bureaucrats, the “[road to serfdom](#)” can be paved with good intentions. Fredrick Hayek wrote his book with that title because he was concerned that most government officials and bureaucrats write laws, rules, and regulations with good intention. They desire to make the world a better place and may believe that the best way to achieve that is to implement many of the great reset policies. That is why we need to pay attention to the “deep state” and administration policies.

Biblical Perspective

What is a biblical perspective on the great reset? It would be

easy to merely link all these ideas to end-time prophecy. It is easy to see how these emerging technologies and the concept of the “great reset” could be used by the Antichrist (2 Thessalonians 2, Revelation 13). Computer technology and enhanced surveillance would allow this future leader to control the world. But it is important to consider how we should respond in our current world to these proposals.

We are seeing many examples of leftist authoritarianism today and need to be alert and involved. James 4:7 says we have a responsibility to resist evil, and Paul tells us to fight the good fight (2 Timothy 4:7). Jesus teaches that we are to be the salt of the earth and the light of the world (Matthew 5:13-16).

Christians can agree with the goals of addressing economic inequality and the need to care for the environment. We are to defend the poor and oppressed (Psalm 82:3) and to be good stewards of God’s creation (Genesis 1:27-28). But we should also be concerned about the authoritarian impulses we see not only in government but in major corporations.

First, we should separate the message from the messenger. The World Economic Forum and its participants are sometimes naïve and they even propose disturbing solutions to very real problems in our society. We can agree with their attempts to deal with poverty and economic inequality, but we must reject some of the ways in which they want to reset the world and bring about change.

Second, we should apply the Bible and a biblical worldview to each issue. For example, a biblical view of justice usually differs from many of the secular, progressive ways of working for justice that also includes such things as the promotion of sexual and gender identities.

Third, we should apply a biblical perspective to technology. The Bible does not condemn technology but often reminds us

that tools and technology can be used for both good and evil. The technology that built the ark (Genesis 6) also was later used to construct the Tower of Babel (Genesis 11). A wise and discerning Christian should evaluate the benefits and drawbacks of each technology.

Christians will need discernment (Proverbs 18:15) in judging the ideas associated with the “great reset.” The phrase can mean different things to different people. Many of the ideas associated with it are bad for our country and us. But we can join hands with those who desire to make a better world and want to do it in ways that don’t contradict the Bible.

Socialism and Society

Kerby Anderson provides an overview of the popularity of socialist ideas in America from a biblical perspective.

Socialism is more popular today than anyone would have predicted a few years ago. A significant number of socialist characters can be found in Congress. Universities have many professors who are promoting socialism. And more young people than ever believe socialism is superior to capitalism.

Why is socialism so appealing to so many Americans? Young people are drawn to the siren song of Bernie Sanders and Alexandria Ocasio-Cortez. Part of the reason is that it appeals to their sense of fairness. Another reason is that it promises lots of free stuff.

Free college tuition and student loan forgiveness are examples. The millennial generation (Generation Y) and the iGen generation (Generation Z) have lots of student debt. They see the need but forget that someone would have to pay for this new massive entitlement. And they rarely stop and think about why someone who didn't go to college and took a blue-collar job should pay for their university education. These may be the most educated generations in history, but they don't seem to spend too much time reflecting on what they supposedly learned in economics.

The cost of some of these policies is enormous. Just covering the cost of tuition at public colleges and universities is estimated at \$70 billion a year. One study of the cost of government-run health care (called "Medicare for All") was estimated to cost \$32 trillion during the first ten years. Some estimate the cost of the "Green New Deal" to be \$93 trillion. We can certainly debate how accurate some of those estimates are, but we can't ignore that they would be very expensive once these programs are implemented.

There is some evidence that the popularity of socialism is waning. A post-election survey done by the Cultural Research Center shows a significant decline in support for socialism. George Barna believes that another reason for this decline is the aggressive marketing of a government-driven culture that show young and old what socialism in America would really be

like.

He found that the most precipitous decline in support for socialism was among Americans ages 30 to 49. Just a decade ago, they were the demographic I often pointed to as those who supported socialism more than capitalism. That has changed significantly.

Socialism is less popular even for Americans who are age 50 years or older. In the past, they have been the group most consistent in their support of capitalism. But even in this group, there was an eight percentage-point decline of support for socialism.

The demographic groups with the least support for socialism were Christians who had a biblical worldview and what George Barna calls SAGE Cons (Spiritually Active Governance Engaged Conservative Christians). But there are still a small percentage of them who support socialism. That is why I also address whether the Bible teaches socialism.

The Promise of Socialism

In order to understand the appeal of socialism, we need to make a clear distinction between capitalism and socialism. *Capitalism* is an economic system in which there is private property and the means of production are privately owned. In capitalism, there is a limited role for government. *Socialism* is an economic system in which there is public or state ownership of the means of production, and the primary focus is on providing an equality of outcomes. In socialism, the state is all-important and involved in central planning.

Often when young people are surveyed about socialism, the pollster does not provide a definition. If you merely believe socialism means more equality in society, then you can see why so many choose socialism over capitalism. Also, young people under the age of 30 are probably the least likely to associate

socialism with Soviet-style repression. Instead, they may have in their minds the current government push toward European socialism and find that more attractive.

There is also an important philosophical reason for the popularity of socialism. When Karl Marx first proposed the concepts of socialism and communism, he enjoyed an intellectual advantage. He could talk about the problems with capitalism the modern world was going through as they were adapting to the difficult process of industrialization. He could contrast the *reality* of capitalism with the *utopian* ideal of socialism.

Utopian visions will always win out over the harsh reality of the world. But we now have the terrible record of socialism. Unfortunately, socialism's death toll never quite gets factored into any equation. The late columnist Joseph Sobran said: "It makes no difference that socialism's actual record is terribly bloody; socialism is forever judged by its promises and supposed possibilities, while capitalism is judged by its worst cases."[\[1\]](#)

Dinesh D'Souza reminds us that many countries have tried socialism and all failed. The first socialist experiment was the Soviet Union, then came lots of countries in eastern Europe (Poland, Yugoslavia, Albania, Czechoslovakia, Hungary, Romania, and East Germany). Add to that countries in Asia (Vietnam, Laos, Cambodia, North Korea, and China) and countries in South America (Cuba, Nicaragua, Bolivia, and Venezuela) and Africa (Angola, Ghana, Tanzania, Benin, Mali, Mozambique, Zambia, and Zimbabwe). By his count, there are 25 failed experiments in socialism.[\[2\]](#)

The typical answer to these failures is that each of these wasn't done correctly. The failure of these socialist experiments was a failure of implementation. But this time, they say, we will get it right. Believing in socialism apparently mean never having to say you're sorry.

In the next section we will look at the argument that democratic socialism is the ideal we should pursue. We should ignore this list of socialist failures and focus on socialism in the Scandinavian countries.

A Different Kind of Socialism

Proponents of socialism not only argue that it was not implemented correctly in the past but also argue that what they are proposing is “democratic socialism.” They usually point to the Scandinavian countries as examples.

Anders Hagstrom in one of his videos asks, “What does socialism mean to [people such as actor and comedian Jim Carrey]?” He says that conversations about socialism often go like this: “A liberal says we should be socialist. A conservative points to Venezuela, and says socialism doesn’t work. A liberal says, What about Sweden and Norway? The conservative then points out that those countries aren’t actually socialist.”[\[3\]](#)

He says that even if we accept the comment by liberals, there is a problem. “Nordic countries have tiny populations of less than 10 million. And copying and pasting their policies to a country of 330 million isn’t going to work.” These Nordic countries were successful before they adopted the redistributive policies they have now. Here’s a reality check: if Sweden were to join the U.S. as a state, Sweden would be poorer than all but 12 states.

Hagstrom also explains that the policies of true socialists like Senator Bernie Sanders and Alexandria Ocasio Cortez go far beyond what the Nordic countries have. For example, Bernie Sanders wants a planned economy. None of the Nordic states have this. Alexandria Ocasio-Cortez wants to abolish profit. None of the Nordic countries have done that. And both of them want a universal minimum wage. None of the Nordic states have

that.

There's another problem with the argument. These countries aren't socialist. John Stossel in one of his videos interviewed a prominent Swedish historian.^{4} Johan Norberg makes it clear that "Sweden is not socialist—because the government doesn't own the means of production. To see that, you have to go to Venezuela or Cuba or North Korea." He does admit that the country did have something that resembled socialism a few decades ago. The government heavily taxed the citizens and spent heavily. That was not a good period in Swedish history, especially for the economy.

Yet even with the high Swedish taxes, there was simply not enough money to fund Sweden's huge welfare state. Norberg explains that "People couldn't get the pension that they thought they depended on for the future." At this point, the Swedish people had enough and began to reduce the size and scope of the government.

John Stossel says, "They cut public spending, privatized the national rail network, abolished certain government monopolies, eliminated inheritance taxes and sold state-owned businesses like the maker of Absolut vodka." While it is true that Sweden does have a larger welfare state than the US and higher taxes than the US, there are many other areas where Sweden is actually more free market.

Socialism and Equality

One of the moral arguments for socialism is that it creates a society with more social and economic equality. Proponents want us to consider the fairness argument when applied to a free market. How fair is it that basketball star LeBron James makes more than \$37 million when a social worker starting out only makes about \$30,000? Even more extreme is the estimate that Jeff Bezos makes more than \$320

million a day while the average Amazon salary is around \$35,000 a year.

Of course, this is what happens in a free society where people with different skills, different abilities, and different motivations are allowed to participate in a free market. You will get inequality, but you also have a free society where people can use their gifts to pursue their calling and still receive a good income.

We don't have to guess what will happen in a socialist economy because we have lots of historical examples. In a desire to bring equality, socialism doesn't bring people up out of poverty. Instead, it drives them into poverty. Consider two test cases (Germany and Korea).

After World War II, Germany was divided into two countries: West Germany was capitalist, while East Germany was socialist. Throughout the time they were divided, there was a striking difference between the two countries. When the two countries were reunified, the GDP of East Germany was a third of the GDP of West Germany.

An even better example is North and South Korea, because it lasted longer and continues to this day. South Korea is now more than 20 times richer than North Korea. Of course, people in South Korea are also freer than North Korea. They are also taller and live about 12 years longer than people in North Korea.[\[5\]](#)

By contrast, capitalism provides every person a chance to influence the society. In his book, *United States of Socialism*, Dinesh D'Souza doesn't ignore the issue of justice but actually embraces it. Capitalism, he says, "far more than socialism, reflects the will of the people and expresses democratic consent."[\[6\]](#) A consumer is like a voter. As a citizen, we get to vote in an election every two to four years. But a consumer gets to vote every day with his or her

dollar bills. That money represents the time and effort put in to get those dollar bills.

The free market provides you a level of popular participation and democratic consent that politics can never provide. You get to vote every day with your dollars and send economic signals to people and companies providing goods and services. Essentially, capitalism, like democracy, is a clear form of social justice.

The Bible and Socialism

Perhaps you have heard some Christians argue that the Bible actually supports socialism. The book of Acts seems to approve of socialism. In Acts 4, we find a statement that the believers in Jerusalem “had all things in common.” It also says that those who possessed land or houses sold them and brought the proceeds to the apostles’ feet. They distributed these gifts to anyone in need. This looks like socialism to many who are already predisposed to believe it should be the economic system of choice.

First, we need to realize that this practice was only done in Jerusalem. As you read through the rest of the book of Acts and read the letters of Paul and Peter, you see that most believers in other parts of the Roman world had private property and possessions. Paul calls upon them to give voluntarily to the work of ministry.

Second, the word voluntary applies not only to Christians in other parts of the world, but it also was a voluntary act by the believers in Jerusalem to give sacrificially to each other in the midst of persecution. This one passage in the book of Act is not a mandate for socialism.

If you keep reading in the book of Acts, you can also see that the believers in Jerusalem owned the property before they voluntarily gave the proceeds to the apostles. The next

chapter (Acts 5) clearly teaches that. When Peter confronted Ananias, he clearly stated that: "While it remained, was it not your own? After it was sold, was it not in your own control?"

Owning property contradicts one of the fundamental principles of socialism. In the *Communist Manifesto*, "the abolition of property" is a major item in the plan for moving from capitalism to socialism and eventually to communism.

By contrast, the Ten Commandments assume private property. The eighth commandment forbidding stealing and the tenth commandment about coveting both assume that people have private property rights.

In fact, we can use biblical principles to evaluate economic systems like capitalism and socialism. Although the Bible does not endorse a particular system, it does have key principles about human nature, private property rights, and the role of government. These can be used to evaluate economic systems like socialism and communism.

Socialism is still a popular idea, especially among young people. Recent polls along with various books about capitalism and socialism illustrate the need for us to discuss and explain the differences between capitalism and socialism. Socialism may sound appealing until you begin to look at the devastating impact it has had on countries that travel down the road of greater governmental control.

Transgenderism

Kerby Anderson provides an overview of the transgender craze that has taken over the western world in the past ten years, drawing on startling insights from Abigail Shrier and Ryan Anderson.

Transgenderism is the belief that people have a “gender identity” that is distinct from their sex. If they feel there is a conflict between their gender and their sex, gender identity should take precedence. Although a very small fraction of the population may experience gender dysphoria, the current percentage of Americans identifying as transgender or nonbinary has exploded.

Gender Dysphoria Research

Abigail Shrier wrote about the transgender craze in her book *Irreversible Damage: The Transgender Craze Seducing Our Daughters*. When she joined me on my Point of View radio program, she explained that “gender dysphoria” was characterized by severe and persistent discomfort in one’s biological sex. It typically begins in early childhood. In previous generations, it afflicted a sliver of the population

(roughly .01 percent) and occurred mostly in boys.

Prior to 2012, there was no scientific literature on girls (11-21) ever having developed gender dysphoria at all. Then the Western world experienced a sudden surge of adolescents claiming to have gender dysphoria and self-identifying as “transgender.”

In 2016, Lisa Littman (an ob-gyn, public health researcher) was scrolling through social media when she noticed a statistical peculiarity. Several adolescents (most of them girls) from a small town in Rhode Island had come out as transgender. In fact, they were all from the same friend group.

She admitted that she knew very little about gender dysphoria, but this statistical anomaly was interesting to her. And she then noticed there had been a sudden spike in the western world of girls experiencing gender dysphoria. She immersed herself in the scientific literature on gender dysphoria to try to understand what was happening. Perhaps it was due to increased social acceptance of LGBTQ people, but she suggested in a peer-reviewed paper that the girls might be rushing toward “transition” because of peer contagion. As you might imagine, her suggestion was roundly criticized. She was also accused of anti-trans bigotry.

In a subsequent research project, she collected data anonymously from 256 parents whose kids had not met the criteria of gender dysphoria in childhood, but suddenly identified as transgender in adolescence. She identified 16 traits in common. Here are a few.

- The vast majority have zero indicators of childhood gender dysphoria.
- Almost a third of them did not seem at all gender dysphoric.

- A majority had one or more psychiatric diagnosis and almost half were engaged in self-harm prior to the onset of dysphoria.
- Nearly 70 percent of the teenagers belonged to a peer group in which at least one friend had also come out as transgender.
- Among parents who knew their children's social status, over 60 percent said the announcement brought a popularity boost.
- Over 88 percent of the parents surveyed reported being supportive of transgender rights.

How to Respond to the Transgender Moment

Ryan Anderson is the author of the book, *When Harry Became Sally: Responding to the Transgender Moment*. He explains how transgender ideology promotes the opportunity for children to change their gender with surgery and drugs. And parents “are told that puberty blockers and cross-sex hormones may be the only way to prevent their children from committing suicide.”

Ryan Anderson countered that the best studies of gender dysphoria have found “that between 80 and 95 percent of children who express a discordant gender identity will come to identify with their bodily sex if natural development is allowed to proceed.” He also documented that even children going through “transitioning” treatment still have an extraordinarily high rate of suicide attempts compared to the general population.

He reminded us that we should be tolerant and loving toward children (and adults) who struggle with their gender identity. But we should also be aware of the potential harm when transgender identity is normalized.

Unfortunately, we are living in a world where transgender activists want more than tolerance and kindness. They demand affirmation. We aren't allowed to question whether using medical treatments to aid in transgender transformation is positive for children. In his book, Ryan Anderson shows that the best biology, psychology, and philosophy support an understanding of sex as a bodily reality. As he puts it: "Biology isn't bigotry."

Abigail Shrier also offers several suggestions. **First, don't get your kid a smartphone.** She explains that nearly every problem teenagers face traces itself back to the introduction of the smartphone years ago.

Second, don't relinquish your authority as a parent. You don't have to go along with every idea your teenager has, nor do you have to go along with every educational or psychological fad being promoted in society.

Third, don't support gender ideology in your child's education. She provides an example of what happens when schools do a seminar on anorexia or suicide. Often the prevalence increases. A small number of students may have gender confusion or gender dysphoria. But talking about it will spread confusion.

Finally, don't be afraid to admit that it's wonderful to be a girl.

While she talks about the benefits and opportunities of being a girl, Christians can go even further. We believe God is responsible for who we are and what we are. Each one of us is created in God's image (Genesis 1:26). We can celebrate girls and boys and encourage them to use their gender and their gifts to the glory of God (1 Corinthians 1:31).
