

Learning About God

The God Who Would Be Known

Recently my wife and I took a few hours off to visit a local nature preserve. You know how quiet and peaceful that can be. Imagine you're out there in nature enjoying your walk, and talking with . . . God. That's what Adam and Eve did, wasn't it?

We don't walk and talk with God the same way Adam and Eve did, but the God of the universe Who holds our very existence in His hand wants to show Himself to us as well; He wants us to know Him. He not only wants us to *know* Him, though; He wants us to know *about* Him.

Sometimes Christians will say they don't need a lot of doctrine; they just want to know God personally, to just *experience* Him, without complicating things by adding all that theological gobbledy-gook. With a little bit of reflection, however, one can see how important knowing *about* God is to *knowing* God.

If my wife were to try to talk to me about her interests or desires or anything about herself, and I were to say, "You know, dear, I hate to get confused with all that information. I just want to *experience* your presence; I just want to *relate* to you personally," you might understand if she experienced some confusion! What does it mean to "know" someone in our experience without knowing things *about* the person? The most it could mean is that I just want the feelings that come with being near someone I love.

My own joy in her presence, however, rests on certain knowledge about her. How much joy would any of us experience in the presence of, say, a known axe-murderer?! It's amazing what a little knowledge can do for one's "experience!"

Resisting any knowledge about my wife would also indicate that I don't really have much interest in her; I'm only concerned with *myself* and *my* experience. What greater way is there to let someone know you really care and are interested than to want to learn about him or her?

Have I convinced you of the need to know *about* God in order to truly *know* God? If so, I hope you'll invest some time in studying theology. You needn't read a massive work on systematic theology. A writer whose work I'm benefiting from is Alister McGrath. He's a well-respected theologian who makes theology accessible for the layperson. R.C. Sproul and J. I. Packer are two others from whose writings you would benefit. In fact, Packer's popular book, *Knowing God*, would be a great place to start.

You might still be hesitant because you know that it's possible to substitute the "knowing about" for the "knowing personally." How can we let what we know about God feed our personal knowledge of Him? Listen to this suggestion from J. I. Packer: "The rule for doing this is demanding but simple. It is that we turn each truth that we learn *about* God into matter for meditation before God, leading to prayer and praise to God." [\(1\)](#)

In this essay we'll just touch on a few subjects of importance in knowing about God: revelation; the Trinity; God's sovereignty; and idolatry. I hope this will be helpful to you as you continue the wonderful journey of knowing God.

The God Who Can Be Known

In a debate on the existence of God between Christian philosopher J.P. Moreland and atheist philosopher Kai Nielsen, Nielsen argued that, for the educated person, "it is irrational to believe in God." [\(2\)](#) Why? Because there is nothing in our experience to refer to when we say "God" that gives meaning to the word. If we want to argue, for example,

that a certain table exists, we can point to the table or we can describe it in terms we understand. Since we can't point to God and we can't understand what God is in Himself, we can't talk about Him meaningfully, Nielsen says.

So, where does this leave Christians? Does it leave us with an irrational faith? *Can* we know about God? If so, *how* so?

We are able to know God because of revelation. *Revelation* means "disclosure." As New Testament scholar Leon Morris says, "Revelation is not concerned with knowledge we once had but have forgotten for the time being. Nor does it refer to the kind of knowledge that we might attain by diligent research. It is knowledge that comes to us from outside ourselves and beyond our own ability to discover." [\(3\)](#) The last book of the Bible is called *Revelation* because it reveals the plans of God which were otherwise unknowable.

Revelation is necessary because of the nature of God. He can't be seen by us (Jn. 1:18; I Tim. 6:16; I Jn. 4:12); we can't know his depths or His limits, Zophar told Job (Job 11:7; cf. Rom. 11:33); and no one knows His thoughts except the Spirit (I Cor. 2:11). Jesus said, "No one knows the Father except the Son and anyone to whom the Son wills to reveal Him" (Mt. 11:27). Thus, if God and His ways are to be known, they must be revealed by Him to us. As Deut. 29:29 says, "The secret things belong to the Lord our God, but the things revealed belong to us and to our sons forever. . ."

How has God revealed Himself to us? Rom. 1:20 says that we know God exists through what He has made (i.e., nature). We see the hand of God in the historical events recorded in the Old Testament, such as the Exodus and the establishment of Israel and the regathering of God's people under Ezra and Nehemiah (cf. Ps. 9:16; 77:14; Eze. 20:9). Our own conscience bears witness through a knowledge of moral law (Rom. 2:15). God has made Himself known specially through Jesus and through the written Word of God (Jn. 15:15; Mt. 11:27). Recall Heb.

1:1,2: “In the past God spoke to our forefathers through the prophets at many times and in various ways, but in these last days he has spoken to us by His Son.”

Through revelation we know of God’s glory (Is. 40:5), His righteousness (Is. 56:1), and His righteous judgment (Rom. 2:5). We know his plans (cf. Dan. 2:28,29; Eph. 3:3-6) and what He desires of us (cf. Micah 6:8). Even the message of the Gospel is referred to as a mystery now made known (Mt. 13:35; Rom. 16:25; I Cor. 2:7; Eph. 3:3-6).

If atheists like Prof. Nielsen refuse to acknowledge the reality of God, that doesn’t negate what we know to be true. *Our* belief in God doesn’t depend upon the confirmation of others. Besides, God has made Himself known in a tangible way in Jesus as well as in nature, history, conscience and Scripture. At the day of judgment, those who rely upon the excuse “Not enough evidence!” will be in for an awful surprise. God has revealed Himself, and we can know Him.

The Trinity

There’s probably no more baffling doctrine taught in Scripture than that of the Trinity. Christians say that God is three in one. How can that be? How can there be one God, and yet we name three persons— Father, Son, and Spirit—as God?

Attempts have been made to find some comparison in our own experience that can make this truth understandable, but they all fail at some point. Some say the Trinity might be like steam, water and ice—three forms which H₂O takes. But this analogy fails because the same quantity of H₂O doesn’t assume all three forms at one time. The analogy of an egg also fails because the three components—yolk, white and shell—are completely different. God isn’t three separate parts in one unit. The Bible teaches that there is only one God, and that He is unified in His being. It also teaches that there is God the Father, God the Son, and God the Spirit, distinct from one

another, all existing at the same time. One being, three persons. A mystery, for sure, but not a contradiction.

Theologian Alister McGrath offers a helpful illustration. If a scientist takes a sample of air for some kind of testing, he has real *air* in his sample but not *all* of the air. He just has a sample, but he expects that what can be found in the rest of the air can be found in the sample; they are identical in nature. As McGrath says, “Jesus allows us to sample God.”[\(4\)](#) When people saw Jesus, they saw God. This is a better illustration, but it still isn’t perfect.

Is this doctrine important? As McGrath notes, it is the foundational reality underlying our belief that “God was in Christ reconciling the world to Himself” (II Cor. 5:19). God could reach out to us effectively because He reached out Himself. It was God in Christ who acted on our behalf; it wasn’t some mere human emissary who brought us a good word from God. And it is the Holy Spirit—God again—who continues to minister in us while we wait for the glory which is to come.

The doctrine of the Trinity isn’t only a difficulty for Christians: it’s also a favorite target of critics who seek to undermine our faith by finding flaws in it. Apart from the logical question of how one God can be three persons, critics also point to the fact that it was centuries after Christ that the doctrine was formulated. They say it was an invention of the church.

It shouldn’t seem surprising that there was a delay in the development of the doctrine of the Trinity. As noted earlier, it’s the theological explanation of the teaching that was present from the beginning, that “God was in Christ reconciling the world to Himself.” As the church came under attack and as Christians thought through scriptural teaching, they gradually developed fuller and more sophisticated doctrines. They weren’t making up new beliefs; they were more fully explaining what they already believed.

The doctrine of the Trinity is a necessary component of Christian belief. Any description of God which doesn't include all that this doctrine includes is inadequate. Far from being theologically burdensome, the doctrine of the Trinity is an essential part of Christianity.

The Sovereignty of God

Along with the doctrine of the Trinity, an issue that is equally baffling is that of God's sovereignty and man's free will. The Bible indicates that God is fully in control of this universe, yet it also makes clear that we have real freedom. Our decisions are significant. Our prayers, for example, do make a difference. How can we be free and our actions be meaningful while God determines the course of history?

In recent years a view of God called the "open view" has gained a hearing among evangelicals. According to this view, "God does not control everything that happens."[\(5\)](#) God often changes His plans to meet the changing situation brought about by our decisions and actions. As one writer says, "God's will is not the ultimate explanation for everything that happens; . . . history is the combined result of what God and his creatures decide to do."[\(6\)](#) Among other things, this means that God doesn't know everything that is going to happen in the future; He is learning as we are.[\(7\)](#)

What do we learn from Scripture about this subject? First, we learn that God is unchanging in His being and perfections or attributes. In Malachi 3:6 God says "For I, the Lord, do not change; therefore you, O sons of Jacob, are not consumed." James tells us that in God "there is no variation or shifting shadow." (Jam. 1:17)

Second, we learn that God is unchanging in His purposes. "The counsel of the Lord stands forever, the plans of His heart from generation to generation," says Ps. 33:11. In Is. 46:9-11 God says clearly that what He has planned from long ago He

will bring about.

Third, we learn that God knows the future already. Is. 46:10 says He “[declares] the end from the beginning.”

While acknowledging God’s control of history leading to His own ends, we must also acknowledge that He does respond to our actions and petitions. In Gen. 6 we read that God was “grieved in His heart” that He had made man, so He acted to wipe out everyone except Noah and his family. In Numbers 14 we read of a time when God said He would wipe out the Israelites, but He relented after Moses interceded for the people.

What are we to make of this? As writer Mark Hanna has noted, we tend to make adjustments in our theology to compensate for this tension between God’s sovereignty and our free will. To do this, however, only creates problems elsewhere in our theology. What we must do is leave the tension where the Bible does. [\(8\)](#)

Why is the reality of God’s sovereign control important? It’s because God is unchanging in His being that we can trust Him to be “the same yesterday, today, and forever” (Heb. 13:8). It’s because God has knowledge of the future which is settled that predictive prophecy is possible. It’s because God knows in advance what people will do that he isn’t blind-sided by evil. Thus we can trust Him to know what is ahead of us; our future is ultimately in His hands, not the hands of people.

Although some people have theological problems with this, for others the problem might be personal. In other words, maybe we just don’t like the idea that anyone else—even God—has ultimate control over us. For those who are truly and joyfully submitted to God, however, the doctrine of God’s sovereignty and complete foreknowledge is a source of comfort, not of annoyance.

A Jealous God

In Isaiah 44 we read about a man who makes an idol from a tree. Part of the tree he worships; he calls on it to deliver him. The other part he burns for cooking and for warming himself. Isaiah 44:19 shows the ridiculousness of what he is doing with these words:

No one recalls, nor is there knowledge or understanding to say, "I have burned half of it in the fire and also have baked bread over its coals. I roast meat and eat it. Then I make the rest of it into an abomination, I fall down before a block of wood!"

Idolatry is setting something up in place of God. Paul sums it up in one simple phrase: "For they exchanged the truth of God for a lie, and worshiped and served the creature rather than the Creator, who is blessed forever" (Rom. 1:25). Those things to which we devote ourselves and which end up ruling our lives, thus taking precedence over God, become our idols.

Writer Richard Keyes speaks of nearby idols which give us a sense of control over our lives, things as ordinary as a clean house or even a stamp collection. Keyes also speaks about faraway idols, those things that give a sense of meaning to our lives such as financial security or progress in science. Nearby idols give us an immediate sense of security; they're substitutes for the immanent activity of God in our lives. Faraway idols give us a sense of purpose and meaning; in them we put our hope. They are substitutes for the transcendent rule of God over our world. [\(9\)](#)

In response to the unfaithfulness of the Israelites, God often revealed Himself to be a jealous God. "They have made Me jealous with what is not God," He said. "They have provoked Me to anger with their idols" (Deut. 32:21). Why would God respond this way? Because first, God deserves all glory, for

all good things come from Him (Jam. 1:17). And second, because created things can't do what God can and wants to do for us. In Is. 42 we read: "Thus says God the Lord, Who created the heavens and stretched them out, Who spread out the earth and its offspring, Who gives breath to the people on it and spirit to those who walk in it. . . . 'I am the Lord, that is My name; I will not give My glory to another, nor My praise to graven images.'" (42:5-8). He is the creator and life-giver. There is no one and nothing like Him.

In contrast to this, idols are created, they aren't eternal, and they are incapable of providing what we really need. Theologian Carl Henry brings to mind Elijah and the prophets of Ba'al when he refers to idols as "the false gods who never show." [\(10\)](#) Ba'al couldn't respond to his prophets no matter how much they shouted and danced and prayed (I Ki. 18:17-40). As the psalm writer said, "They have mouths, but they cannot speak; They have eyes, but they cannot see" (115:5). The problem is that idols by nature are not gods at all (Jer. 2:11; 5:7; Acts 19:26; Gal. 4:8). Thus it is that when such things as money or power or athletic prowess become our idols, we find that they cannot deliver us from everything that would destroy us.

We began this essay talking about the God Who would be known. To set up an idol in His place is to reject what He has told us about Himself and His desires. Today there are many other gods which call for our allegiance. We must continually recommit ourselves to the One Who won't share His glory with others.

Blaise Pascal: An Apologist for Our Times – A Defense of Christianity Ringing True Today

Rick Wade examines the contemporary relevance of the apologetics of Blaise Pascal, a 17th century mathematician, scientist, inventor, and Christian apologist.

This article is also available in [Spanish](#).

One of the tasks of Christian apologetics is to serve as a tool for evangelism. It is very easy, however, to stay in the

realm of ideas and never confront unbelievers with the necessity of putting their faith in Christ.

One apologist who was not guilty of this was Blaise Pascal, a seventeenth-century mathematician, scientist, inventor and Christian apologist. Christ and the need for redemption through Him were central to Pascal's apologetics.

There was another feature of Pascal's thought that was, and remains, rare in apologetics: his understanding of the human condition as both created and fallen, and his use of that understanding as a point of contact with unbelievers.

Peter Kreeft, a modern day Christian philosopher and apologist, says that Pascal is a man for *our* day. "Pascal," he says, "is three centuries ahead of his time. He addresses his apologetic to modern pagans, sophisticated skeptics, comfortable members of the new secular intelligentsia. He is the first to realize the new dechristianized, desacramentalized world and to address it. He belongs to us. . . . Pascal is our prophet. No one after this seventeenth-century man has so accurately described our twentieth-century mind."[\[1\]](#)

Pascal was born June 19, 1623 in Clermont, France, and moved to Paris in 1631. His mother died when he was three, and he was raised by his father, a respected mathematician, who personally directed his education.

Young Blaise took after his father in mathematics. In 1640, at age 16, he published an essay on the sections of a cone which was much praised.[\[2\]](#) Between 1642 and 1644 Pascal developed a calculating machine for his father to use in his tax computations. Later, he "invented the syringe, refined Torricelli's barometer, and created the hydraulic press, an instrument based upon the principles which came to be known as Pascal's law" of pressure.[\[3\]](#) He did important work on the problem of the vacuum, and he is also known for his work on

the calculus of probabilities.

Although a Catholic in belief and practice, after the death of his father and the entrance of his younger sister into a convent, Pascal entered a very worldly phase of his life. Things changed, however, on the night of November 23, 1654, when he underwent a remarkable conversion experience which changed the course of his life. He joined a community of scholars in Port-Royal, France, who were known as Jansenists. Although he participated in the prayers and work of the group, he didn't become a full-fledged member himself. However, he assisted them in a serious controversy with the Jesuits, and some of his writings on their behalf are considered "a monument in the evolution of French prose" by historians of the language.[{4}](#)

In 1657 and 1658 Pascal wrote notes on apologetics which he intended to organize into a book. These notes were published after his death as the *Pensees*, which means "thoughts" in French. It is this collection of writings which has established Pascal in Christian apologetics. This book is still available today in several different versions.[{5}](#)

Pascal was a rather sickly young man, and in the latter part of his short life he suffered from severe pain. On August 19, 1662, at the age of 39, Pascal died. His last words were "May God never abandon me!"[{6}](#)

The Human Condition

To properly understand Pascal's apologetics, it's important to recognize his motive. Pascal wasn't interested in defending Christianity as a system of belief; his interest was evangelistic. He wanted to persuade people to believe in Jesus. When apologetics has evangelism as its primary goal, it has to take into account the condition of the people being addressed. For Pascal the human condition was the starting point and point of contact for apologetics.

In his analysis of man, Pascal focuses on two very contradictory sides of fallen human nature. Man is both noble and wretched. Noble, because he is created in God's image; wretched, because he is fallen and alienated from God. In one of his more passionate notes, Pascal says this:

What kind of freak is man! What a novelty he is, how absurd he is, how chaotic and what a mass of contradictions, and yet what a prodigy! He is judge of all things, yet a feeble worm. He is repository of truth, and yet sinks into such doubt and error. He is the glory and the scum of the universe!{7}

Furthermore, Pascal says, we know that we are wretched. But it is this very knowledge that shows our greatness.

Pascal says it's important to have a right understanding of ourselves. He says "it is equally dangerous for man to know God without knowing his own wretchedness, and to know his own wretchedness without knowing the Redeemer who can free him from it." Thus, our message must be that "there is a God whom men can know, and that there is a corruption in their nature which renders them unworthy of Him." {8} This prepares the unbeliever to hear about the Redeemer who reconciles the sinner with the Creator.

Pascal says that people know deep down that there is a problem, but we resist slowing down long enough to think about it. He says:

Rick Wade examines the contemporary relevance of the apologetics of Blaise Pascal, a 17th century mathematician, scientist, inventor, and Christian apologist. Man finds nothing so intolerable as to be in a state of complete rest, without passions, without occupation, without diversion, without effort. Then he faces his nullity, loneliness, inadequacy, dependence, helplessness, emptiness. And at once there wells up from the depths of his soul boredom, gloom, depression, chagrin, resentment, despair. {9}

Pascal says there are two ways people avoid thinking about such matters: diversion and indifference. Regarding diversion, he says we fill up our time with relatively useless activities simply to avoid facing the truth of our wretchedness. "The natural misfortune of our mortality and weakness is so miserable," he says, "that nothing can console us when we really think about it. . . . The only good thing for man, therefore, is to be diverted so that he will stop thinking about his circumstances." Business, gambling, and entertainment are examples of things which keep us busy in this way.[\[10\]](#)

The other response to our condition is indifference. The most important question we can ask is What happens after death? Life is but a few short years, and death is forever. Our state after death should be of paramount importance, shouldn't it? But the attitude people take is this:

Just as I do
Rick Wade examines the contemporary relevance of the apologetics of Blaise Pascal, a 17th century mathematician, scientist, inventor, and Christian apologist. not know where I came from, so I do not know where I am going. All I know is that when I leave this world I shall fall forever into oblivion, or into the hands of an angry God, without knowing which of the two will be my lot for eternity. Such is my state of mind, full of weakness and uncertainty. The only conclusion I can draw from all this is that I must pass my days without a thought of trying to find out what is going to happen to me.[\[11\]](#)

Pascal is appalled that people think this way, and he wants to shake people out of their stupor and make them think about eternity. Thus, the condition of man is his starting point for moving people toward a genuine knowledge of God.

Knowledge of the Heart

Pascal lived in the age of the rise of rationalism. Revelation had fallen on hard times; man's reason was now the final

source for truth. In the realm of religious belief many people exalted reason and adopted a deistic view of God. Some, however, became skeptics. They doubted the competence of both revelation and reason.

Although Pascal couldn't side with the skeptics, neither would he go the way of the rationalists. Instead of arguing that revelation was a better source of truth than reason, he focused on the limitations of reason itself. (I should stop here to note that by *reason* Pascal meant the reasoning process. He did not deny the true powers of reason; he was, after all, a scientist and mathematician.) Although the advances in science increased man's knowledge, it also made people aware of how little they knew. Thus, through our reason we realize that reason itself has limits. "Reason's last step," Pascal said, "is the recognition that there are an infinite number of things which are beyond it."[\[12\]](#) Our knowledge is somewhere between certainty and complete ignorance, Pascal believed.[\[13\]](#) The bottom line is that we need to know when to affirm something as true, when to doubt, and when to submit to authority.[\[14\]](#)

Besides the problem of our limited knowledge, Pascal also noted how our reason is easily distracted by our senses and hindered by our passions.[\[15\]](#) "The two so-called principles of truth*reason and the senses*are not only not genuine but are engaged in mutual deception. Through false appearances the senses deceive reason. And just as they trick the soul, they are in turn tricked by it. It takes its revenge. The senses are influenced by the passions which produce false impressions."[\[16\]](#) Things sometimes appear to our senses other than they really are, such as the way a stick appears bent when put in water. Our emotions or passions also influence how we think about things. And our imagination, which Pascal says is our dominant faculty[\[17\]](#), often has precedence over our reason. A bridge suspended high over a ravine might be wide enough and sturdy enough, but our imagination sees us surely

falling off.

So, our finiteness, our senses, our passions, and our imagination can adversely influence our powers of reason. But Pascal believed that people really *do* know some things to be true even if they cannot account for it rationally. Such knowledge comes through another channel, namely, the heart.

This brings us to what is perhaps the best known quotation of Pascal: “The heart has its reasons which reason does not know.”[\[18\]](#) In other words, there are times that we know something is true but we did not come to that knowledge through logical reasoning, neither can we give a logical argument to support that belief.

For Pascal, the heart is “the ‘intuitive’ mind” rather than “the ‘geometrical’ (calculating, reasoning) mind.”[\[19\]](#) For example, we know when we aren’t dreaming. But we can’t prove it rationally. However, this only proves that our reason has weaknesses; it does not prove that our knowledge is completely uncertain. Furthermore, our knowledge of such first principles as space, time, motion, and number is certain even though known by the heart and not arrived at by reason. In fact, reason bases its arguments on such knowledge.[\[20\]](#) Knowledge of the heart and knowledge of reason might be arrived at in different ways, but they are both valid. And neither can demand that knowledge coming through the other should submit to its own dictates.

The Knowledge of God

If reason is limited in its understanding of the natural order, knowledge of God can be especially troublesome. “If natural things are beyond [reason],” Pascal said, “what are we to say about supernatural things?”[\[21\]](#)

There are several factors which hinder our knowledge of God. As noted before, we are limited by our finitude. How can the

finite understand the infinite?[{22}](#) Another problem is that we cannot see clearly because we are in the darkness of sin. Our will is turned away from God, and our reasoning abilities are also adversely affected.

There is another significant limitation on our knowledge of God. Referring to Isaiah 8:17 and 45:15[{23}](#), Pascal says that as a result of our sin God deliberately hides Himself ("hides" in the sense that He doesn't speak}. One reason He does this is to test our will. Pascal says, "God wishes to move the will rather than the mind. Perfect clarity would help the mind and harm the will." God wants to "humble [our] pride."[{24}](#)

But God doesn't remain completely hidden; He is both hidden and revealed. "If there were no obscurity," Pascal says, "man would not feel his corruption: if there were no light man could not hope for a cure."[{25}](#)

God not only hides Himself to test our will; He also does it so that we can only come to Him through Christ, not by working through some logical proofs. "God is a hidden God," says Pascal, " and . . . since nature was corrupted [God] has left men to their blindness, from which they can escape only through Jesus Christ, without whom all communication with God is broken off. *Neither knoweth any man the Father save the Son, and he to whosoever the Son will reveal him.*"[{26}](#) Pascal's apologetic is decidedly Christocentric. True knowledge of God isn't mere intellectual assent to the reality of a divine being. It *must* include a knowledge of Christ through whom God revealed Himself. He says:

All who have claimed to know God and to prove his existence without Jesus Christ have done so ineffectively. . . . Apart from him, and without Scripture, without original sin, without the necessary Mediator who was promised and who came, it is impossible to prove absolutely that God exists, or to teach sound doctrine and sound morality. But through and in Jesus Christ we can prove God's existence, and teach

both doctrine and morality.{27}

If we do not know Christ, we cannot understand God as the judge and the redeemer of sinners. It is a limited knowledge that doesn't do any good. As Pascal says, "That is why I am not trying to prove naturally the existence of God, or indeed the Trinity, or the immortality of the soul or anything of that kind. This is not just because I do not feel competent to find natural arguments that will convince obdurate atheists, but because such knowledge, without Christ, is useless and empty." A person with this knowledge has not "made much progress toward his salvation." {28} What Pascal wants to avoid is proclaiming a deistic God who stands remote and expects from us only that we live good, moral lives. Deism needs no redeemer.

But even in Christ, God has not revealed Himself so overwhelmingly that people cannot refuse to believe. In the last days God will be revealed in a way that everyone will have to acknowledge Him. In Christ, however, God was still hidden enough that people who didn't want what was good would not have it forced upon them. Thus, "there is enough light for those who desire only to see, and enough darkness for those of a contrary disposition." {29}

There is still one more issue which is central to Pascal's thinking about the knowledge of God. He says that no one can come to know God apart from faith. This is a theme of central importance for Pascal; it clearly sets him apart from other apologists of his day. Faith is the knowledge of the heart that only God gives. "It is the heart which perceives God and not the reason," says Pascal. "That is what faith is: God perceived by the heart, not by the reason." {30} "By faith we know he exists," he says. {31} "Faith is different from proof. One is human and the other a gift of God. . . . This is the faith that God himself puts into our hearts. . . ." {32} Pascal continues, "We shall never believe with an effective belief and faith unless God inclines our hearts. Then we shall

believe as soon as he inclines them.”{33}

To emphasize the centrality of heart knowledge in Pascal’s thinking, I deliberately left off the end of one of the sentences above. Describing the faith God gives, Pascal said, “This is the faith that God himself puts into our hearts, often using proof as the instrument.”{34}

This is rather confusing. Pascal says non-believers are in darkness, so proofs will only find obscurity.{35} He notes that “no writer within the canon [of Scripture] has ever used nature to prove the existence of God. They all try to help people believe in him.”{36} He also expresses astonishment at Christians who begin their defense by making a case for the existence of God.

 Their enterprise would cause me no surprise if they were addressing the arguments to the faithful, for those with living faith in their hearts can certainly see at once that everything which exists is entirely the work of the God they worship. But for those in whom this light has gone out and in who we are trying to rekindle it, people deprived of faith and grace, . . . to tell them, I say, that they have only to look at the least thing around them and they will see in it God plainly revealed; to give them no other proof of this great and weighty matter than the course of the moon and the planets; to claim to have completed the proof with such an argument; this is giving them cause to think that the proofs of our religion are indeed feeble. . . . This is not how Scripture speaks, with its better knowledge of the things of God.{37}

But now Pascal says that God often uses proofs as the instrument of faith. He also says in one place, “The way of God, who disposes all things with gentleness, is to instil [sic] religion into our minds with reasoned arguments and into our hearts with grace. . . .”{38}

The explanation for this tension can perhaps be seen in the types of proofs Pascal uses. Pascal won't argue from nature. Rather he'll point to evidences such as the marks of divinity within man, and those which affirm Christ's claims, such as prophecies and miracles, the most important being prophecies.[{39}](#) He also speaks of Christian doctrine "which gives a reason for everything," the establishment of Christianity despite its being so contrary to nature, and the testimony of the apostles who could have been neither deceivers nor deceived.[{40}](#) So Pascal *does* believe there are positive evidences for belief. Although he does not intend to give reasons for everything, neither does he expect people to agree without having a reason.[{41}](#)

Nonetheless, even evidences such as these do not produce saving faith. He says, "The prophecies of Scripture, even the miracles and proofs of our faith, are not the kind of evidence that are absolutely convincing. . . . There is . . . enough evidence to condemn and yet not enough to convince. . . ." People who believe do so by grace; those who reject the faith do so because of their lusts. Reason isn't the key.[{42}](#)

Pascal says that, while our faith has the strongest of evidences in favor of it, "it is not for these reasons that people adhere to it. . . . What makes them believe," he says, "is the cross." At which point he quotes 1 Corinthians 1:17: "Lest the cross of Christ be emptied of its power."[{43}](#)

The Wager

The question that demands to be answered, of course, is this: If our reason is inadequate to find God, even through valid evidences, how *does* one find God? Says Pascal:

Let us then examine the point and say: "Either God exists, or he does not." But which of the alternatives shall we choose? Reason cannot decide anything. Infinite chaos separates us. At the far end of this infinite distance a

coin is being spun which will come down heads or tails. How will you bet? Reason cannot determine how you will choose, nor can reason defend your position of choice.{44}

At this point Pascal challenges us to accept his wager. Simply put, the wager says we should bet on Christianity because the rewards are infinite if it's true, while the losses will be insignificant if it's false.{45} If it's true and you have rejected it, you've lost everything. However, if it's false but you have believed it, at least you've led a good life and you haven't lost anything. Of course, the best outcome is if one believes Christianity to be true and it turns out that it is!

But the unbeliever might say it's better not to choose at all. Not so, says Pascal. You're going to live one way or the other, believing in God or not believing in God; you can't remain in suspended animation. You must choose.

In response the unbeliever might say that everything in him works against belief. "I am being forced to gamble and I am not free," he says, "for they will not let me go. I have been made in such a way that I cannot help disbelieving. So what do you expect me to do?"{46} After all, Pascal has said that faith comes from God, not from us.

Pascal says our inability to believe is a problem of the emotions or passions. Don't try to convince yourself by examining more proofs and evidences, he says, "but by controlling your emotions." You want to believe but don't know how. So follow the examples of those who "were once in bondage but who now are prepared to risk their whole life. . . . Follow the way by which they began. They simply behaved as though they believed" by participating in various Christian rituals. And what can be the harm? "You will be faithful, honest, humble, grateful, full of good works, a true and genuine friend. . . . I assure you that you will gain in this life, and that with every step you take along this way, you

will realize you have bet on something sure and infinite which has cost you nothing.”[{47}](#)

Remember that Pascal sees faith as a gift from God, and he believes that God will show Himself to whomever sincerely seeks Him.[{48}](#) By taking him up on the wager and putting yourself in a place where you are open to God, God will give you faith. He will give you sufficient light to know what is really true.

Scholars have argued over the validity of Pascal’s wager for centuries. In this writer’s opinion, it has significant weaknesses. What about all the other religions, one of which could (in the opinion of the unbeliever) be true?

However, the idea is an intriguing one. Pascal’s assertion that one must choose seems reasonable. Even if such a wager cannot have the kind of mathematical force Pascal seemed to think, it could work to startle the unbeliever into thinking more seriously about the issue. The important thing here is to challenge people to choose, and to choose the right course.

Summary

Pascal began his apologetics with an analysis of the human condition drawn from the experience of the new, modern man. He showed what a terrible position man is in, and he argued that man is not capable of finding all the answers through reason. He insisted that the deistic approach to God was inadequate, and proclaimed Christ whose claims found support in valid evidences such as prophecies and miracles. He then called people to press through the emotional bonds which kept them separate from God and put themselves in a place where they could find God, or rather be found by Him.

Is Blaise Pascal a man for our times? Whether or not you agree with the validity of Pascal’s wager or some other aspect of his apologetics, I think we can gain some valuable insights

from his ideas. His description of man as caught between his own nobility and baseness while trying to avoid looking closely at his condition certainly rings true of twentieth-century man. His insistence on keeping the concrete truth of Christ at the center keeps his apologetics tied to the central theme of Christianity, namely, that our identity is found in Jesus, where there is room for neither pride nor despair, and that in Jesus we can come to a true knowledge of God. For apart from the knowledge of Christ, all the speculation in the world about God will do little good.

The Relevance of Christianity: An Apologetic

Rick Wade develops and defends the relevancy of Christianity, encouraging believers to find points of contact with an unbelieving world.

This article is also available in [Spanish](#). 

Christianity and Human Experience

In his book, *Intellectuals Don't Need God and Other Modern Myths*, theologian Alister McGrath tells about his friend's stamp-collecting hobby. His friend, he says, "is perfectly capable of telling me everything I could possibly want to know about the watermarks of stamps issued during the reign of Queen Victoria by the Caribbean islands of Trinidad and Tobago. And while I have no doubt about the truth of what he is telling me, I cannot help but feel that it is an utter irrelevance to my life."[\[1\]](#)

Christianity strikes many people the same way, McGrath says. They simply see no need for a religion that is 2000 years old and has had its day. How is it relevant to them?

One of the duties of Christian apologetics is that of making a case for the faith. We can prepare ourselves for such opportunities by memorizing many facts about our faith, such as evidences for the reliability of the Bible and the truth of the resurrection. We can learn logical arguments such as those for the existence of God or the logical consistency of

Christian doctrines. While these are important components, such things can seem very remote from people today. They will not do much good in our apologetics if people are not listening.

This is why some Christian thinkers are now saying that before we can show Christianity to be *credible*, we must first make it *plausible*. In other words, we must get people's attention first by bringing Christianity—at least in *their* thinking—into the position of being possibly true.[{2}](#) We need to find those points of contact with people that will encourage them to want to listen.

Why do we need to begin at such a basic level? A few reasons come to mind. First, many people think religion has nothing important to say regarding our public activities. So, in our daily lives religion is only allowed a minor role at best. This attitude quickly affects how we view our private lives as well. Second, many people hold that science is the only worthwhile source of meaningful knowledge. This often—although not necessarily—leads to a naturalistic worldview or at least causes people to think like naturalists. Scientism and naturalism seem to go hand-in-hand. Thus, in order to get a person's attention, the first step we might need to take is to show him how Christianity applies to his life's experience.[{3}](#)

Even though we are physically better off because of our scientific knowledge applied through various technologies, are we better off all around than before we had such things? I am not deriding the benefit of science and technology; I am simply wondering about our spiritual and moral health. Our society is trying to find itself. This is clearly seen in current debates over important ethical and social issues. At the root of our culture wars is the question, Who are we, and what are we to be about? The age-old questions continue to haunt us: Where did I come from? Why am I here? What am I supposed to be doing? Where am I going? With the loss of his exalted place in the universe following the loss of a

Christian world view, man now wonders what his place is. Am I significant in a universe that sees me as just one more piece of cosmic dust? Is there any intrinsic meaning to my existence? Or must I determine for myself what my place and role will be?

In addition to apologetic arguments from logic and factual evidence, we should also be prepared to answer questions such as these. We need to let people know that in Christ are found answers to the major issues of life. By doing this, we can engage people where they really live. We can show them that God is not some abstract force separated from the concerns of life, but “is intimately related to personal and human needs.”[{4}](#) As one writer put it, “God must be shown to be necessitated or justified by *practical* or *existential* thinking.”[{5}](#)

In this article I will address these three issues: meaning, morality, and hope.[{7}](#) offers and contrast it with the Christian view.

The Matter of Meaning

Let us begin with the matter of *meaning*. The question What is the meaning of life? might not be one which most people give serious attention to. But a similar question is often heard, namely, What’s the *point*? When we look for the significance or the point of our activities, we are wondering about their meaning. Reflective individuals carry this idea further, wondering What’s the point—or what is the *meaning*—of it *all*? Although many people would argue that life *has* no ultimate meaning, most people seem to expect it to. We search for it in creativity, in helping others, in “finding ourselves,” and in a variety of other ways.

The question of meaning encompasses other questions: Where did I come from? What is the significance of the experiences of my life? What is my overall purpose, and what should I be doing?

Where is all this heading?

The prevailing view in the West today, for all practical purposes, is naturalism. This is not only the prevailing philosophy on college campuses, but we have all been encouraged by the successes of science to believe that if something is not scientific, it is not reliable. Since science investigates the natural order, we tend to see nature as all that is really important, or even as all that exists. This is called scientific reductionism.

However, the scientific method is capable of dealing only with quantitative matters: How much? How big? How far? How fast? Philosopher Huston Smith has argued that, for all the achievements of science, it is incapable of speaking to such important issues as values, purpose, meaning, and quality.[\[8\]](#)

This focus on science is not meant to pick on this discipline, but to point out that science cannot give answers to some of the major issues of life. Moreover, if we go so far as to adopt naturalism as a world view, we are really in a bind, for naturalism *has* no answers to give, at least to the question of ultimate meaning. Naturalism says there was no purpose for our coming into being; the only meaning we can have now is that which we superimpose on our own lives; and we are all just going back to the dust. If the universe is just a chance accident in space and time; if living beings intrinsically are nothing more than just so many molecules, no matter how marvelously arranged; if human beings are merely cousins to trees, trapped on a planet caught somewhere “between immensity and eternity,” as Carl Sagan said; then there is no meaning to life that we ourselves do not give to it. Being finite, we are by nature incapable of providing ultimate meaning.

If we should seek to establish our *own* meanings, what is to guide us? By what shall we measure such things? What if that which is meaningful to me is offensive to you? Furthermore, what if the goals we pursue are not capable of bearing the

meaning we try to put into them? Many people strive to move up the ladder, to attain the power and prestige that they think will fulfill them, only to find that it's not all it's cracked up to be. The possession of material goods defines many of our lives. But how much is enough? Does the one with the most toys when he dies really win? Or, as some have said, is it simply that the one who dies with the most toys . . . still dies?

Thus, there is no ultimate meaning in a universe without God, and our attempts at providing our own limited meanings often leave us looking for more.

If naturalism is true, we should be able to shake off the fantasies of our past and give up worrying about questions of ultimate meaning. However, we continue to look for something bigger than ourselves, something that will give our lives meaning. Christianity provides the explanation. We are drawn toward the One who created us and imbues our lives with meaning as part of His purposes. We are significant in ourselves because He made us, and there is meaning in our daily activities because that is the context in which we work out His ambitions for us and our world. Recognizing the true God opens to us the reality of value and meaning. The meaning of life is found when we find our place in God's world.

The Matter of Morality

In his book, *Can Man Live Without God*, apologist Ravi Zacharias makes this bold assertion: "Antitheism provides every reason to be immoral and is bereft of any objective point of reference with which to condemn any choice. Any antitheist who lives a moral life merely lives better than his or her philosophy warrants."[\[9\]](#) What a bold thing to say! Is Zacharias saying that all atheists (or antitheists, as he calls them) are immoral? Not at all. But he is saying that atheism itself makes no provision for fixed moral standards.

One very important aspect of being human is morality. A basic

understanding of the concept of right and wrong or good and bad is fixed in our nature. We constantly evaluate actions and events—and even people—as good or bad or, in some cases, neither. These are moral evaluations. They are significant for our personal choices, and they are critical to our participation in society.

In our culture today naturalism is the reigning public philosophy. Even if many people claim to believe in God, practical naturalism (or atheism) is the rule of the day. Regarding morality, the general attitude seems to be that there is no moral code to which we all are subject. We say in effect, I'll choose my morality, and you choose yours. But if Zacharias is correct, naturalism (or atheism) provides no solid foundation even for personal morality.

The question we might pose to an atheist (which could be directed at a practical atheist as well) is this: How do you justify your own actions? To that question the atheist could simply answer that he has need no for justification apart from his own desires and needs. While I think it is possible to argue that naturalism cannot be trusted to provide a moral compass—even for one's own needs—we can bring the real issue to the fore more quickly by asking two questions: How do you justify your moral outrage at the actions of others in any given instance? and, Do you expect others to take your objections seriously? To expect someone to take my objections to his behavior seriously, I must presuppose a moral standard that stands in authority above us all, unless, of course, I think that I *myself* am that standard. But what does that do to his right to determine his *own* morality? The atheist sometimes wants to have it both ways. He wants to be his own standard-maker. But is he willing to give this privilege to others?

Now, some atheist might respond that, of course, as a culture we have to have laws in order to live together peacefully. Individuals are not free to do anything they please; they have to obey the laws of society. The well-known humanist

philosopher Paul Kurtz believes that “education, reason, science and democratic methods of persuasion” are adequate for establishing our norms.[\[10\]](#) But there are educated people who hold different beliefs. Intelligent reason has led people to different conclusions. Science can not instruct us in morality. And in a society where there are a variety of opinions about what is right and wrong, how do we know which opinion is correct? Simple majority rule? Sometimes the minority is in the right, as the issue of civil rights has shown. No, Kurtz’s reason, education, science, and democracy will not do by themselves. They need to be informed by a higher law.

Besides all this, Kurtz has certain presupposed ideas about the proper end of our laws. For example, does furthering the human race mean giving everyone an equal opportunity? Or does it mean joining with Hitler and seeking to exterminate the weak and inferior?

Naturalism provides no transcendent law that stands over all people at all times to which we can appeal to establish a moral order. Nor is there a solid basis upon which to complain when we are wronged. Christianity, on the other hand, *does* provide a transcendent moral structure and specific moral laws that serve to both restrain us and protect us.

When the question of morality arises, atheists will often offer the rebuttal that Christian morality is apparently not sufficient to lead people into the “good life” because Christians have done some terrible things to other people {and to each other} over the years. While it is true that Christians have done some terrible things, there is nothing in Christianity that requires it, and there are definite commands not to do such things. The Christian who does evil goes against the religion he or she professes. The atheist, however, can justify almost any kind of activity since man becomes the measure of all things. Again, this does not mean that all or even most atheists lead blatantly immoral lives.

It just means that they have no fixed point of reference by which to establish laws or to condemn the actions of others.

Christianity not only provides a moral structure and specific moral laws, it also provides for the power to do what is right. The atheist is left on his own to do what is right. Those who submit to God also have the Spirit to enable them to obey God's moral law.

There is turmoil in our society today as we try to decide all over again what is good and what is evil. In our encounters with non-believers, by tapping into the need we all have for a moral structure suitable for both our preservation and our betterment, we can pave the way for their consideration of the Gospel of Jesus Christ.

The Matter of Hope

You have likely heard the expression "hope against hope." It refers to those times when there is no hope in sight, yet we keep on hoping anyway. There is something within us—most of us, anyway—which continues to see some possibility for good beyond a present crisis, or at least causes us to long for it.

As we consider the role human experience can play in apologetics, we should give serious attention to the question of hope because it quickly finds a home in our souls. Few of us have absolutely no hope. What worse state can we imagine than to have no hope at all? What we are more likely to see than no hope at all is hope in things that are not worthy. Nonetheless, the presence of hope in the darkest of places is something with which we are all familiar.

Nowadays, however, hope seems to be in short supply. In spite of all the glorious advances made in a number of areas of life, there is a prevailing mood of unease. Americans seem to be scrambling for something in which to put their confidence for the future.

For centuries the Western world found its hope in God, the One who was working out His purposes toward a glorious end. But by the early part of this century, naturalism had taken hold of the academy and then our social consciousness as well.

From there, people went in different directions in their thinking. Secular humanists took the optimistic route and declared their hope in mankind. They continue to do so in spite of the fact that, in this “enlightened” era, our means of advancing the cause of humanity include aborting the unborn and helping the desperate kill themselves. Education, reason, science, and democracy—the gods of humanism—have yet to give us any real cause for hope.

Other people have grown cynical. With nothing more to hope in than what they see around them, they have lost faith in everything. They do not trust anyone anymore; they doubt that anyone can be truly virtuous; and they have simply settled into hopelessness. {11} Still others of a more philosophical bent have been drawn to atheistic existentialism, the philosophy of despair, which declares that God is dead and with Him that in which we once put our hope.{12}

A good illustration of someone trying to find something positive in the loss of hope in the Christian God is found in Albert Camus’ novel, *The Stranger*.{13} The protagonist, Meursault, winds up in jail for the senseless murder of a man on a beach. After his trial, as he is awaiting either an appeal or his execution, Meursault is visited by a chaplain who tries to get him to confess belief in God. Meursault informs him that he does not have much time left, “and [he] wasn’t going to waste it on God.”{14} Meursault angrily rejects all the priest says. He believes that the fate of death to which everyone is subject levels out everything people believe. One action is as good as another; one way of life is as good as another.

After the priest leaves and Meursault has slept for awhile, he

says this as he considers his fate:

[I] felt ready to start life all over again. It was as if that great gush of anger had washed me clean, emptied me of hope, and, gazing up at the dark sky spangled with its signs and stars, for the first time, the first, I laid my heart open to the benign indifference of the universe. {15}

If there is no God out there, the best we can do is accept the reality of our nothingness, and begin to make of ourselves whatever we can. Like the bumper sticker I once saw which read, "I've been much happier since I gave up hope." Previously Meursault had admitted being afraid, and he had betrayed his own humanity when, after coolly thinking about how death comes to everyone, and how it really does not matter when or how one dies, the thought of a possible appeal brought a sudden rush of joy through his body and brought tears to his eyes.{16} Now he bravely faces a universe that does not care, and he feels free.

If anyone ever truly feels this way in real life, that person is the exception rather than the rule. The word *hopeless* has negative connotations; we do not normally think of it as a positive thing. The atheistic existentialist must go against what appears to be the norm to achieve this state of happiness in the face of a purposeless universe.

Of course, not all atheists will opt for Camus' philosophy. To some extent, hope for the fulfillment of our various earthly ambitions fits in with a naturalistic worldview. A boy can practice his swing with the hope of doing better in the batter's box. A woman with the hope of getting married can very likely see that hope fulfilled. A man may get that promotion he hopes for by working hard. Yet frequently people find that what they had hoped for fails to provide the fulfillment they expected.

And what about hope for the future? Is there anything to hope

for after death? When old age creeps up and the elderly man reviews his life, is there any hope that something will come of all the labors and heartaches and wins and losses of his life? Was it all leading somewhere? The most naturalism can allow is that our lives might benefit others. But naturalism cannot of itself undergird such a hope. An impersonal universe offers no rewards. And no one can predict what the next generation will do with one's efforts. Besides, we might wonder why we should worry about the benefit of others who, like ourselves, are just pieces of cosmic dust. To take this even further, naturalism can just as easily allow for the destruction of the weak and the development of a master race as it can for an altruistic attitude toward all people.

Of course, naturalism has nothing beyond the grave to offer the individual him- or herself. There is no culmination, no reward, no "Well done, good and faithful servant" (Matt. 25:21). You live, you do your best (according to your own standards, of course), and you die.

Yet, we continue to hope. I wonder if the "hope [that] springs eternal" is rooted within us in that "eternity" which is "set . . . in the hearts of men" (Eccl. 3:11)? Or, maybe it stems from the knowledge we all have of Deity, even though that knowledge might be warped by sin. An inescapable awareness of something transcendent continually draws us upward.

Christianity holds that the psychological reality of hope, and the content of hope that does not fail, is found in Jesus who is our hope (1 Tim. 1:1). Let us look at that in more detail.

The Answer Found in Jesus

One of the great benefits of addressing the matters of meaning, morality, and hope in Christian apologetics is that they take us right into the Gospel message. Our meaning is rooted in the personal God who created us and is actively involved in our affairs. Lasting, objective moral values to

which we all are accountable and which serve to protect us find their source in God's nature and will. And hope is what He sent His Son to give us along with forgiveness and new life and a host of other things.

Before looking at these issues more closely, I should address a couple of potential objections to bringing human experience into apologetics. One objection is that the apologist can quickly fall into *selling* the faith by an appeal to the felt needs of consumeristic Americans. Such needs are not always valid.

Another objection is that such matters are subjective. To appeal to them is to become trapped in matters that are at best non-rational and at worst irrational. Our consideration of Christianity should not be based upon such flimsy foundations.

These problems can be avoided by concentrating on those aspects of our experience which are universally shared. Someone has called these "objective-subjective" matters. That is, they are subjective matters of a kind shared by all of us by virtue of our membership in the human race. The desire for moral order is something felt inwardly, but it is a universal need. Faith is subjective, but the disposition to believe is a universal one. Personal meaning also is an inward desire, but it is one we all have.

Let us consider now the answers the Bible gives to the questions we're considering.

Remember that one of the questions encompassed by the question of meaning is, Where did I come from? In John 1:1-3, Colossians 1:16-17, and Hebrews 1:2 we learn that we were created by God through Jesus. Furthermore, we learn from the examples of David and Jeremiah that God created us and knows us individually (Ps. 139:13-16; Jer. 1:5). Unless we are prepared to argue that we were made on a whim or maybe just

for sport—and nothing in Scripture indicates that God does anything like that—we must conclude that He made us for a purpose.

The question, Is there meaning in the experiences of daily life?, is answered by the understanding that God is working out His own purposes in our lives (Phil. 2:12-13; Rom. 8:28; 9:11,17; Eph. 1:11).

Finally, to the questions, What is my purpose? and What should I be doing?, Scripture teaches that I am to obey God's moral precepts (Jn. 14:23,24; 1 Jn. [entire book]), and that I am to participate in God's work by doing the things He has given me to do in particular (Jn. 13:12-17; Eph. 2:10; 1 Pe. 4:10).

Regarding morality, the noble acts of people and the ravages of war are understandable in light of our being created in God's image, on the one hand, and corrupted by sin, on the other. Although we typically do not think of Jesus as the law-giver as much as the exemplar of moral goodness, this is not to say that He does not Himself define for us what is good. Being fully God He shares the moral perfection of God the Father. He also created us as moral creatures and planted in us the awareness of right and wrong. Furthermore, His central position in the plan of redemption—which was put into effect because of our sin-induced estrangement from God—makes Him a focal point in the matter of good and evil. Thus, in Jesus is found an understanding of our consciousness of sin and judgment as well as the solution to the crucial issue of guilt and forgiveness.

This is all too often forgotten in evangelical witness today. One theologian has noted that the central theme of the Gospel is no longer justification by faith, but the new life. But people know that they do wrong, and they want to have the burden of guilt lifted. Many do this by denying any kind of universal morality. All they have to do to maintain a clear conscience, they think, is to be "true" to themselves. But in

practice this does not work. We react negatively when an individual who is being “true” to himself does something mean to us. We also know that others are justified in objecting to our actions that are hurtful to them. Our moral outrage at the actions and words of others betrays our sense that there is a moral law that transcends us. Naturalism has no means of dealing with all this, but Jesus does.

I have already touched on the important place that hope occupies in the Christian life. We have something specific to hope for, and in our walk with Christ we can experience hope on the psychological level.

For the apostles Paul and Peter, hope finds its objective focal point in the resurrection of Jesus (Acts 23:6; 24:14-15; 1 Pe. 1:3). For our hope is eternal life (Titus 1:2; 3:7), and Jesus’ resurrection is objective, concrete evidence that the promise of eternal life is sure. It is with the objective content of our hope in mind that Paul can say the Gentiles had no hope and were without God in the world (Eph. 2:12).

The hope we have is not something we can see (Rom. 8:24-25); it is waiting for us in heaven (Col. 1:5). Nonetheless it provides the context for our joy today (Rom. 12:12). Hope is strengthened as we learn what God has done in the past, and as we persevere in our Christian walk (Rom. 15:4). As our faith grows and we experience the joy and peace Jesus gives, our hope is brought alive (Rom. 15:13). Rather than put our hope in earthly riches (1 Tim. 6:17), we put our hope in the God who cannot lie (Titus 1:2).

In short, the answers to the questions of meaning, law, and hope—which have no answers in naturalism – are found in Jesus. These truths, buttressed by the facts and logical consistency of Christianity, can be a significant part of our case for the truth of Jesus Christ. Although truth is not ultimately determined by experience, the common experience of humanity provides a point of contact for the Gospel. Even if such

matters are not persuasive by themselves, they might at least serve to show that Christianity is relevant to our lives today.

The New Absolutes

William Watkins' book The New Absolutes says that Americans are not relativists, we're actually absolutists. Rather than abandoning absolutes, we're adopting new ones in place of the old.

Reality in the Balance

When Christians take a stand on a given moral issue—on abortion, for instance—what are some typical responses? Someone might say, “What right do you have to push *your* morality on the rest of us?” Or, “Abortion might be wrong for you, but it’s not for me.”

What these people are implying is that such beliefs are *relative*; that is, they are related to something else—an individual’s desires or circumstances, for example. Because people change through time, however, something that is true or good for a person today might not be so tomorrow. Nothing is true or good for all people at all times.

Have you noticed, however, that many of the same people who claim that truth and morality are relative can be found denouncing certain political views, or actively pushing the social acceptance of a formerly rejected lifestyle, or fighting for new rights in one area or another?

Author William Watkins *has* noticed, and he’s recorded his

thoughts in a new book titled, *The New Absolutes*. Watkins believes that despite the rhetoric, Americans are in fact *not* relativists; we are in reality *absolutists*. He says that, rather than *abandoning* absolutes, we are simply adopting *new* ones to replace the *old*.

It is now believed, Watkins says, "that truth and error, right and wrong, beautiful and ugly, normal and abnormal, and a host of other judgments are determined by the individual, . . . circumstances, or . . . culture. . . . There is no transcendent God or universal natural law we can point to that can inform us about who we are, what our world is like, and how we should get along in it."

What is the source of this thinking? Watkins points to three elements: a loss of belief in absolute truth, a strong belief in tolerance, and a detachment from people and institutions as a result of pessimism and distrust.

If Americans have concluded that ideas and morals are relative, however, why does Watkins say Americans are really absolutists? We are betrayed, he says, by our behavior.

Evidence that Watkins is right is seen in the glut of lawsuits in the courts, calls for law and order in politics, moral outrage over various offenses, cries for human rights, and the spreading of liberal democratic ideas to other countries. Americans have an idea of what is right, and we think others should agree with us. This is not relativism.

More significant, though, is how an absolutist mentality is seen in those who typically espouse relativism. For example, those who scream the loudest for *tolerance* often restrict others to saying and doing only what is politically correct. In the name of *pluralism* secularists push religion out of the public square. And *multiculturalists* condemn the West for its cultural practices. It seems that what is sauce for the goose is *not* sauce for the gander.

The average American who has come to accept relativistic notions of truth and morality might fairly be accused of being only inconsistent. But those who are real activists in the current fight for cultural change must bear the charge of blatant hypocrisy.

Old Absolutes vs. New Absolutes

In his book *The New Absolutes*, William Watkins contrasts ten traditional beliefs (old absolutes) with the ten beliefs that are replacing them (new absolutes). Though these new beliefs might not be “absolutes” in a strict, philosophical sense, they *function* as absolutes in contemporary society.

In this essay I’ll look at three issues Watkins discusses—pro-life versus pro-death beliefs, religion in the public square, and political correctness and tolerance—to see if, indeed, the social activists mentioned earlier are really the relativists they claim to be. As we consider these topics, I think you’ll come to agree with Watkins that the culture war is not being fought between absolutists and relativists, but between two groups of absolutists.

Death: What a Beautiful Choice

First, let’s consider the pro-life versus pro-death question.

According to Watkins, the *old* absolute was: “Human life from conception to natural death is sacred and worthy of protection.” The *new* absolute is: “Human life, which begins and ends when certain individuals or groups decide it does, is valuable as long as it is wanted.”

Two issues which bring this new belief to the fore are *abortion* and *physician-assisted suicide*. Few practices are as fiercely opposed or defended as abortion. Opponents say abortion is morally wrong for all people. Proponents say it is a matter of individual choice. Physician-assisted suicide draws similar responses.

It is easy to overstate the thinking of those espousing the new absolute of the value of life. Probably very few would say that they “love death” or would think of death as a “good” thing ranking up there, say, with riches and great health and freedom. Rather, death is more often thought of simply as the lesser of two evils.

Nevertheless, there *are* many who think of death as a positive thing, as something to be embraced, as the best answer to suffering or to certain hardships of life that many people experience.

Whether they think of death as a good thing or not, however, they think of it as a right not to be tampered with. It is rooted, they say, in a Constitutional “right to privacy.”

In claiming this right, however, any foundation in relativistic thinking must be abandoned. For the very “right” proponents claim is itself an *absolute*. They are saying that the right of individuals to decide for themselves should be observed by everyone else. When they say it is wrong for pro-lifers to try to press their beliefs on others, they are stating an absolute. If they say that the value of human life is a matter of its quality rather than of intrinsic worth, they are stating another absolute.

Some relativists will try to wriggle out of the charge of absolutism by saying that their position might be right for now but not necessarily for all times and all places. Nonetheless, their ideas about the value of human life and the option of death as a solution to human suffering function as absolutes in our society today.

Watkins is correct. The stubbornness of abortion advocates and assisted-suicide proponents in defending their “rights” is good evidence for the claim that Americans, despite all the talk, are not relativists after all.

Freedom From Religion

It used to be held that “religion is the backbone of American culture, providing the moral and spiritual light needed for public and private life.” Now, according to Watkins, we have a *new* absolute: “Religion is the bane of public life, so for the public good it should be banned from the public square.”

Certainly there are those who are this adamant about the place of religion. These are the ones who raise a fuss when a prayer is uttered at a public school graduation ceremony or who complain when a nativity scene is set up on public property at Christmas.

Probably the majority of Americans are not this combative about the issue. However, for a variety of reasons many believe religion should be kept separate from public life .

One reason is a misunderstanding of the First Amendment. We have been told over and over again that the separation of church and state requires that the government must not be involved with religious matters in any way. The new absolute is this: religion and public policy should be kept separate.

We don't often notice, however, that strict “separationists” do not talk much about our nation's beginnings. A study of our founding documents shows that religion was an integral part of Americans' lives; references to the Bible and Christian beliefs are often cited in the construction of our new government. Amazingly enough, the writers of the Constitution did not see in it the “wall of separation” current interpreters do.

Another reason people think religion should be kept a private matter is a misunderstanding about religion itself. Having been “schooled” in relativistic thinking, many (perhaps most) Americans believe that whatever they believe is true *for them*, but not necessarily for other people.

But this cannot be so. Religions provide an explanation of what is ultimately *real*. Either there is one true God or there is not. Either there is salvation through Jesus, or there is enlightenment through meditation, or there is some other way to find fulfillment. Not all of these can be true *in reality*.

This issue gets really tangled up when we bring in the matter of rights. The idea that everyone has the right to worship as he or she chooses has been transformed to mean that each person's choice of religion is true. "I have the right to believe as I wish" becomes "My belief is as true as yours." The fact that I believe something makes it true.

But is that how things work in other areas of life? If I believe that I am a millionaire, does that make me one? With respect to religion, does believing there is a God put Him there? Or does believing there is no God produce a god-less universe?

The new absolutism with respect to religion is a very real concern for many Americans. As Christians we are taught that our beliefs have meaning for all of life, not just for the prayer closet, yet bringing such beliefs out into the public arena has brought some Christians great difficulty.

It is ironic that, in a nation which began with a strong desire for the free expression of religious beliefs, people are now being forced more and more to leave their beliefs at home.

Does this sound like relativism to you?

The Politically Correct Life

The hypocrisy of the new absolutism is seen more clearly than anywhere else in what is now called "political correctness" or PC for short.

To be politically correct is to be in line with certain ideals

promoted by the new cultural reformers, ideals such as abortion rights, multiculturalism, gender feminism, and homosexual rights. To say or do anything which goes against these ideals is to be politically incorrect.

It is easier to understand PC if we think of it as the end of a chain of thinking.

First is the acceptance of relativism, the idea that there are no absolutes. This belief, taken with our democratic idea of equality, results in the belief that everyone's beliefs and choices are equal or equally valid. There should be no discrimination against other beliefs or lifestyles. This is the *new tolerance*, the prime virtue of the new reformers.

When history is viewed from this perspective, it seems clear that history is the story of the strong taking advantage of the weak. The weak—or disadvantaged—are victims who now require extra help to attain their rightful place of equality. Merely belonging to a victimized group is enough to expect this extra help regardless of whether a given individual has been victimized. The advantaged must now be sensitive to the "needs" of the disadvantaged to avoid making them feel any more victimized and must work to protect their rights. Finally, the advantaged must not do or say anything which could be interpreted as differentiating the disadvantaged, of showing them as different in a negative way. Being sensitive to the plight of the "oppressed" and avoiding doing or saying anything which might make them feel marginalized or inadequate or looked down upon . . . this is *political correctness*.

It is certainly true that there have been and are people who oppress others. This must be opposed. The problem with political correctness, however, lies in over-correcting the wrong.

For example, in *The New Absolutes*, William Watkins lists some words some real estate agents learn to shun in an effort to

avoid offending potential buyers. *Executive* has racist overtones since most executives are white. *Sports enthusiast* might make the disabled feel left out. *Master bedroom* creates images of slavery. *Walk-in closet* could offend people who can't walk.

Author Stan Gaede [pronounced Gay-dee], in his book *When Tolerance Is No Virtue*, says that "the overt goal of PC . . . is to enforce a uniform standard of tolerance, regardless of race, gender, cultural background or sexual orientation. The problem is that the items on this list . . . are not precisely parallel to each other. Though each is the basis for discrimination in our society, they involve very different kinds of issues. So the question immediately becomes: What does it mean to be tolerant *in each case*? . . . PC allows each group to define tolerance for itself."

We have now come full circle. The relativism which purportedly undergirds the new tolerance gives way to exactly what it was trying to be rid of, namely, absolutes. That is, the reformers make their own ideals the new guidelines for society. We are all expected to abide by them. These are the new absolutes.

How should Christians respond to all this? Next, we'll look at how the new absolutes are promoted, and we'll think about how we might respond.

Absolutely For the Common Good

It's a myth that America is a relativistic society. The truth is, Americans are a very moralistic people. What is alarming, however, is how cultural reformers are seeking to establish new absolutes which go against traditional ones. Watkins shows how these reformers are setting up new rules we all must follow.

How shall we understand the contradiction between claims of relativism on the one hand, and the imposition of new

absolutes on the other? Watkins believes the claim to relativism is an attempt “to rationalize . . . misbehavior and disarm . . . critics.” For example, individuals might fall back on relativism to justify sexual activity once held to be deviant. However, the supposed relativist quickly becomes an absolutist when he wants *others* to agree with *him* on a given idea or issue.

But if everything is relative, how are relativists able to convince others of the rightness of their own beliefs? They can’t appeal to a foundation of unchanging realities and objective truths and be consistent with their relativism.

So how do they do it? Calling opponents names, “fundamentalist” is a popular term, or repeating simplistic clichés—“safe, legal abortion” for example—are a couple of their favorite means. The media play a strong role in this process, especially television. Captivating images, clever writing, strategically placed laugh tracks, and other elements persuasively convey ideas without logical reasoning.

It is crucial that we step back to see what this situation sets us up for. If we are conditioned to be persuaded by sloganeering rather than by rational discourse, we are prepared to be taken in by any smooth talker. All our clamor for rights and for the authority of the individual has the unexpected result of preparing us to lose our freedoms at the hands of charismatic tyrants.

What can we do to turn things around?

First, Watkins believes that reality itself is on our side. The new absolutes go against the way the universe is. Many women who opt for childlessness, for example, find themselves late in life confronting their own maternal instincts. We can point out these facts to those who believe we can do anything we want and get along quite nicely.

Second, we can learn to recognize sloganeering and insist that

the cultural reformers use sound reason when promoting their ideals.

Third, we can point to the hypocrisy of so-called relativists. Homosexuals who barge in on church services demanding tolerance for their lifestyle must see how intolerant *they* are. Those who demand freedom of thought and expression cannot reasonably exclude religious beliefs from public discourse.

As strange as it might sound at first, William Watkins calls us to a renewed *intolerance*. He says, "We must violate the new tolerance and become people marked by intolerance. Not an intolerance that unleashes hate upon people, but an intolerance that's unwilling to allow error to masquerade as truth. An intolerance that calls evil *evil* and good *good*."

To reestablish the old absolutes, Watkins calls for the acknowledgment of certain beliefs, such as: all life is precious; relativism is false; the moral law is real; and, religion is essential. A return to these basics will return us to sound public policy-making, to greater civil order, and to moral progress.

The World of the Apostle Paul

Rick Wade examines different aspects of life in the day of the Apostle Paul: religion, philosophy, the family unit, social morality, and Christians' conflict with the culture.

This article is also available in [Spanish](#).

Religion

The purpose of this essay is to take a look at the Greco-Roman world in which the Apostle Paul lived so that we can better comprehend his ministry. Understanding the historical context helps us to gain such a perspective. We'll discuss religion, philosophy, the family unit, and the social morality of the Hellenistic culture with a concluding look at the conflict Christians faced.

Let's begin with the religion of the first century. Two episodes in the book of Acts provide insight into the religious beliefs and practices of that time.

In Acts 19 we read about the trouble Paul's companions got into over His ministry in Ephesus. Craftsmen who made miniature shrines of Artemis, the local deity, objected to Paul's teaching that "man-made gods are no gods at all" (Acts 19:26). In Paul's world, religion was an integral part of everyone's life. State-sponsored civic cults were one religious expression participated in by everybody. Historian Everett Ferguson notes that "the most deeply ingrained religious beliefs and practice in both Greece and Rome. . . . were associated with the traditional civic cult." [\(1\)](#) The state both funded and profited by these cults.

Each city had its patron deity. The city of Ephesus honored Artemis, the goddess of nature and of childbirth. The statue of Artemis stood in a magnificent temple, four times as large as the Parthenon in Athens. Deities such as Artemis were honored with festivals, prayers, and sacrifices. Annual festivals included banquets, entertainment, sacrifices, processions, athletic contests, and the performance of mystery rites. Prayers included invocation, praise, and petition with the goal of receiving the favor of the goddess. Sacrifices were offered for praise, thanksgiving, or supplication.

The riot in Ephesus that resulted from Paul's teaching was

prompted partly by monetary concerns; the craftsmen were afraid of losing business. But the chant, "Great is Artemis of the Ephesians" which went on for two hours—by people who didn't even know what the specific problem was—shows that money was not the only issue. The strength of religious devotion to the civic cults was such that Roman emperors saw the advantage of identifying with them instead of fighting them. We'll talk more about that later in this essay.

Ephesus was also a major center of magical activity, another part of the religious practice of the first century. In Acts 19 we read about practitioners of magic or sorcery forsaking their practices and burning their scrolls as they publicly declared their new faith.

The Ephesians' scrolls contained secret words and formulas which were used to force the gods to do one's bidding. The precise formula was critical. Practitioners sought wealth, healing, or power; they even used magic in an attempt to gain another person's love. Because it was also believed that to know someone's true name was to have power over that person, names and formulas were blended to produce strong magic.

Paul carried his message to a world with a multitude of religious beliefs, and the message he proclaimed showed its power over them. As we look at our culture with its increasingly pluralistic religious spectrum, we must remember that we, too, carry the same gospel with the same power.

Philosophy

When the Apostle Paul visited Athens, he took the message of Christ to the marketplace where a wide variety of people could be encountered. Among those he talked to were Epicurean and Stoic philosophers. We read about his encounter with them in Acts 17.

Who were these Epicureans and Stoics? I'd like to give a

thumbnail sketch of their ideas about God, man, and the world which will help us understand why Paul what he did.

Stoicism and Epicureanism were philosophies which were developed to free people from the concerns of the present life.

Stoicism was materialistic and pantheistic. That is, Stoics believed that everything was composed of matter. The higher form of matter was of a divine nature, and it pervaded the universe. They called it various things: fire, Zeus, or even God. They believed that this divine "fire," or God, generated the universe and would one day take the universe back into itself through a great conflagration. This cycle of creation and conflagration is repeated eternally.

Stoicism was thus deterministic. Things are the way they are and can't be changed. To find true happiness, they believed one should understand the course of nature through reason and simply accept things the way they are.

In contrast to the Stoics, Paul taught that God is personal and not a part of this universe. He also taught that there would be a judgment to come, not a giant conflagration leading to another cycle.

Epicureans focused on the individual's happiness, also, but they went in a completely different direction than the Stoics. They believed that the way to happiness was through maximizing pleasure and minimizing pain. Tranquility was sought through a quiet, contemplative life lived among a community of friends.

Epicureans were materialists, also, but they weren't pantheists. They believed the universe was formed from atoms falling through space which occasionally bumped into each other accidentally, eventually forming the stars and planets and us. When we die, we simply become dissolved into atoms again. Epicureans believed in the gods, but thought they were like men, only of a higher order. The gods resided out in

space somewhere, enjoying a life of quiet pleasure like that of the Epicureans. They had nothing to do with men. Apart from participation in sacrifices and religious rituals for aesthetic purposes, Epicureans believed humans needn't worry about the gods.

Against the Epicureans, Paul taught that God *is* involved in the affairs of His creation and created us specifically to search for Him. Of course, Paul's doctrine of a future judgment didn't fit with their thinking either.

As Paul evangelized the Greek world, he sometimes used their terminology and concepts; he even quoted their poets. But he preached a very different message. Maybe we, too, can find common ground with our culture by knowing what people believe and by putting the gospel into terms they understand. Without modifying the message itself, we must phrase it in a way that it can be understood. If we don't, we'll have a hard time getting people to listen.

The Family Unit

We've given some attention to the religion and philosophy of Paul's day, but what about the social structures of the Greco-Roman world? More specifically, what was the family like in the first century?

By the first century A.D., marriage was mostly by mutual consent. Historian Everett Ferguson describes marriage this way: "Consent to live together constituted marriage in all societies, and the procreation of children was its explicit object. Marriages were registered in order to make the children legitimate." [\(2\)](#) Although marriages were mostly monogamous, adultery was common. Divorce required only oral or written notice.

Men had the dominant role in the family. They had absolute authority over their children and slaves. Wives remained under

their fathers' authority. Men occupied their time with business interests and such social outlets as banquets, and the gymnasia which included exercise facilities, pools, and lecture halls. These functioned as community centers.

In the husband's absence the wife might conduct his business for him. However, managing the home was the wife's primary responsibility. Ferguson quotes the Greek writer Apollodorus who said, "We have courtesans for pleasure, handmaidens for the day-to-day care of the body, wives to bear legitimate children and to be a trusted guardian of things in the home." [\(3\)](#)

Women weren't necessarily confined to the home, however. Some engaged in occupations as diverse as music, medicine, and commerce. Many held civic office, and some held leadership positions in the religious cults.

Children were not considered a part of the family until acknowledged by the father. They could be sold or exposed if not wanted.

Parents were on their own to find suitable education for their children. Girls could go to the elementary schools, but that was rare. They mostly learned household skills at home. Although most boys learned a trade at home or through an apprenticeship, they could go through a series of primary, secondary, and advanced schooling depending on their class status. Rote memorization was a key element in primary education. Rhetoric was the most important subject in advanced education.

Slaves were a part of the family unit in the Roman Empire. They might be obtained through a number of means including war, child exposure, and the sale of persons to pay debts. Slaves might work in the mines, in temples, in homes as teachers, or in industry; they even held high positions as administrators in civil bureaucracy. Slaves often earned

enough money to buy their own freedom, although they had to continue working for their former owners.

Into this society the apostles brought new ideas about the value of the individual and about family relationships. Husbands were to be faithful to their own wives and to love them as their own bodies. Children were to be seen as much more than economic assets or liabilities. Masters were told to treat slaves with justice and fairness. People today who revile Christianity as being “oppressive” probably have no idea how much it elevated people in the Hellenistic world.

Social Morality

Moral instruction in the Hellenistic world was found more in philosophy and custom than in religion. Religion was largely external; that is, it was a matter of ritual more than of inner transformation. Philosophy sought to teach people how to live. Philosophers gave much attention to such matters as virtue, friendship, and civic responsibility.[\(4\)](#)

Historian Everett Ferguson notes that evidence from the Greco-Roman era indicates that many people lived quite virtuous lives. Inscriptions on grave stones, for example, include praises for husbands and wives for kindness and faithfulness.[\(5\)](#)

In spite of all this, history reveals a morally debased culture in the first century. One example is sexual immorality. “The numerous words in the Greek language for sexual relations,” says Ferguson, “suggest a preoccupation with this aspect of life.”[\(6\)](#) As I noted earlier, adultery was common. Men often had courtesans for physical pleasure. Homosexuality between young men or between an older and a younger man was openly accepted. Temple prostitution was part of some religious cults.

A low estimate of human worth was exhibited in the Hellenistic

world. Earlier I mentioned child exposure as a way of getting rid of children. Unwanted babies—more often girls—were put on the garbage pile or left in some isolated area to die. They might be picked up to be used, to be sold as slaves, or to serve as prostitutes.

The brutality of the day was seen most clearly in the games in the Roman amphitheaters. Ferguson notes that, “The amphitheaters of the west testify to the lust for blood under the empire. The spectacles of gladiatorial combat—man against man, man against animal, and animal against animal—drew huge crowds and replaced Greek drama and athletics in popularity.”[\(7\)](#) Executions were considered less exciting than mortal combat. Consequently, when executions were included in the day’s program, they were typically carried out during the lunch break. One of the ways criminals were disposed of was by dressing them in animal skins and throwing them to wild animals.

Such brutality was extended to the Christians in the days of persecutions. *Foxe’s Book of Martyrs* records that Nero had Christians thrown to the wild animals. He also had them dipped in wax, mounted on trees, and burned like giant torches in his gardens.[\(8\)](#)

Into this world of immorality and brutality came the message of love and righteousness found in Jesus. As with Judaism before, Christianity put religion and morality together. It revealed God’s standard of goodness and the sacrificial love of Christ, and it provided the power to attain that standard through the regenerating work of the Spirit based on Christ’s work on the cross.

Today, ethics and religion are again separate. And the results are being seen. But as in the first century, Christians today have a message of grace for our society: God not only tells us what *is* good, He also enables us to *be* good.

Christians' Conflict with the Culture

In the early church, the character of Christians was very important for gaining a hearing and for winning converts as they boldly gave testimony of their new faith.

What were these Christians like? The writer of the *Epistle to Diognetus*, written probably in the early second century, said this about them: "They marry as do all; they beget children, but they do not destroy their offspring. They have a common table, but not a common bed. They are in the flesh, but they do not live after the flesh. They pass their days on earth, but they are citizens of heaven. They obey the prescribed laws, and at the same time surpass the laws by their lives. They love all men, and are persecuted by all." [\(9\)](#)

If their lives were of such an exemplary nature, what was it that got Christians into so much trouble? Two of the most important factors were their unwillingness to participate in religious rituals and their refusal to bow before the images of the emperors.

Earlier I mentioned the importance of the civic religious cults in the Hellenistic world. The people believed that the gods required their sacrifices and other observances; otherwise, they would be angry and take their wrath out on the people as a whole. For the Christians to refuse to participate was to risk angering the gods.

The other factor was the matter of emperor worship. When Rome conquered the Western world, the rulers saw how important religion was to the people. Rather than fight against this, they took advantage of it by putting images of the Roman emperors in places of worship with the other deities. This wasn't a big problem for the Greeks. Apart from the fact that the Romans were their rulers, Greeks weren't exclusive in their worship. To worship one deity didn't preclude worshiping others as well.

For the Christians, however, Jesus was *Lord*; there could be no other gods besides Him, and they couldn't bow before anyone who claimed divine authority, including the emperor. However, since in the minds of the Romans the emperor represented the state, to refuse to bow before his image was to be an enemy of the state.

Thus, because of their refusal to participate in these activities, Christians were called atheists and enemies of the state. Their behavior was baffling to their neighbors. Why couldn't they just go through the motions? As I already noted, religion was non-exclusive. The people didn't necessarily *believe* in the gods to whom they made sacrifice, anyway. And since there was little or no connection between religion and ethics, one's religious activities didn't normally affect one's moral life. So, why couldn't the Christians just play along? The reason they couldn't was that to bow before the emperors or the gods would be to commit idolatry which was *the* fundamental sin in the early church.

Christians in the early church had to decide where they could conform to their society and where they couldn't. There was a difference of opinion as to what was appropriate and what wasn't. But it was clear that anyone who would be identified as a Christian had to draw the line here: Jesus is Lord, and there is no other.

Defeating Darwinism

Introduction

What's this? A lawyer debating philosophy with scientists? If you keep close tabs on the creation/evolution debate, you've probably already heard the name Phillip Johnson. If not, but you're interested in seeing how one Christian is challenging the dogma of Darwinism, you'll want to know about this man.

Phillip Johnson is a law professor at the University of California, Berkley. In 1997 InterVarsity Press published *Defeating Darwinism by Opening Minds*, Johnson's third book in his debate with naturalistic evolution. His first book, *Darwin On Trial*, examined the scientific evidence for evolution and launched a series of lectures and debates across the United States and overseas in universities and on radio and television. His second book, *Reason in the Balance*, examined the influence of naturalism in the spheres of science, law, and education. *Defeating Darwinism* brings his case to high school and early college-level students and their parents.

So, what prompted a law professor to take on the evolutionists? It seems that Johnson became aware of a significant difference between the way the theory of evolution is presented to the public and the way it's discussed among scientists. To the general public, evolution is presented as being settled with respect to the really important questions. Among scientists, however, there is still no consensus as to how evolution could have occurred. As another author said, evolution is a theory in crisis. Professor Johnson studied the literature closely and concluded that what keeps the "evolution-as-fact" dogma alive is not scientific evidence at all, but rather a commitment to the philosophy of naturalism.

Naturalism is the belief that everything that exists is on the same basic level, that of nature. There is no God who created the universe whether in six days or in 40 million years.

One needs to be cautious here. Many scientists believe in God. However, the rule of the day in the laboratory and the classroom is a commitment to the philosophy of naturalism or at least to practical naturalism. Consequently, whether there is a God or not, no reference can be made to Him in the realm of scientific study.

Two reasons come to mind to explain why Johnson has received such a wide hearing in secular academia. First, he keeps the focus on evolution, *not* on a particular theory of creation. This is annoying to evolutionists. But Johnson knows that as soon as he allows his views to be put under the spotlight, the debate will be over. Why? Because the evolutionists will immediately label his views as "religious," and he will be dismissed out of hand. Second, he is a legal scholar with years of experience in the logical analysis of evidence. He has the skill to carefully dissect the arguments of evolutionists, show their weaknesses, and reveal their unargued presuppositions.

In this essay we'll take a closer look at Johnson's book

Defeating Darwinism. We'll see how evolution gained dominance as a theory of origins, and we'll learn how Johnson exposes its UNscientific foundations. I urge you to get a copy of this book even if science isn't your area, just to learn one way to engage our culture in the realm of ideas.

Where's the Beef?

In his new book, *Defeating Darwinism By Opening Minds*, Phillip Johnson seeks to help high-school and college students and their parents evaluate the claims of Darwinism.

In his first book, *Darwin on Trial*, Johnson described the evidential problems with evolution in some detail. In *Defeating Darwinism*, he simply notes that possible transitional forms in the fossil record are very few in number and they are not found where fossil evidence is most plentiful. The problem, he says, is that textbooks and museums often present evidence in a way that implies there is more evidence available than there really is. As an example, Johnson points to an exhibit in San Francisco called the "Hard Facts Wall" which fills in gaps in the fossil record with imaginary ancestors. Says Johnson:

Visitors to the museum at first take the exhibit at face value; after I explain it to them, they are astonished that a reputable museum would commit such a deception. But the museum curators are not consciously dishonest; they are true believers who are just trying too hard to help the public get to the right' answer. [\(1\)](#)

Even though the physical evidence is not there, and there is no known mechanism for the transition from one type of organism to another, the scientific community clings to evolution as fact. The reasoning seems to be this: Since science studies the natural order, scientific theory must remain within naturalistic bounds. Since neo-Darwinism is the

best naturalistic theory, it *must* be true. This commitment extends beyond simply influencing scientific study; it is indoctrinated into students as the way things are. Johnson says that, "When students ask intelligent questions like 'Is this stuff really true?' teachers are encouraged or required not to take the questions seriously." [\(2\)](#)

A fifteen-year-old high school student found out about the power of Darwinist orthodoxy when he challenged a requirement to watch a program on public television which promoted the "molecule to man" theory as fact. When school administrators showed an inclination to go along, the bottom fell out. Johnson stated, "the Darwinists, . . . flooded the city's newspapers with their letters. Some of the letters were so venomous that the editorial page editor of the Denver Post admitted that her liberal faith had been shaken." [\(3\)](#) When CBS carried the story, a prominent evolutionist made the teenager out to be an enemy of education. Orthodoxy is not to be questioned.

One of the most significant factors in establishing the reign of evolution was the movie *Inherit the Wind*, the imaginative re-telling of the story of the Scopes "Monkey Trial" of 1925. The trial is presented as a David-and-Goliath match between the few reasonable and enlightened advocates of progress and the forces of ignorance and oppression who are shackled by their "Old Time Religion." The important players were caricatured and significant details were completely falsified, but the point was made: religion can co-exist with science, but only if it minds its own business.

The book *Defeating Darwinism* is an important contribution not only because of the questions it raises about evolution, but also because it teaches the reader *how* to think about issues. Next, we'll look at some fallacious arguments evolutionists use.

Baloney Detectors Wanted

In his book *Defeating Darwinism by Opening Minds*, Phillip Johnson analyzes the role *Inherit the Wind* played in our thinking about the relation of religion and science. This was the play—and later the movie—which retold the story of the Scopes “Monkey Trial” of 1925. One significant character who only appeared for a few minutes was the Radio Man, the radio announcer who made a live broadcast from the courtroom.

Near the end of the play, when the prosecuting attorney launches into a long speech denouncing the evils of evolution, the radio program director decides that the attorney’s speech has become boring, and Radio Man turns off the microphone. This is the only microphone in the courtroom. Johnson sees this move as symbolic. He says: “That is why what happened in the real-life Scopes trial hardly matters; the writers and producers of *Inherit the Wind* owned the microphone, making their interpretation far more important than the reality.” [\(4\)](#)

This example illustrates one of several logical fallacies evolutionists sometimes commit which Johnson exposes in his chapter “Tuning Up Your Baloney Detector.” This first fallacy is the selective use of evidence. Radio Man could broadcast what *he* wanted people to hear without giving the other side equal time. What we hear about today, says Johnson, are the evidences which seem to support evolution. What we don’t hear about is the absence of significant evidence in the fossil record as a whole. Seeing the entire picture can, and should, easily give one doubts about the story we’re now being told by the evolutionists.

Another fallacy evolutionists sometimes employ is the *ad hominem* argument, or the argument “against the man.” If a doubter can be labeled a “fundamentalist” or a believer in “creation science” (meaning creation in six, twenty-four hour days), his doubts can be set aside on the grounds of religious prejudice.

Johnson cautions us to watch out also for “vague terms and shifting definitions.” The word *evolution*, for example, can mean different things. Are we speaking of microevolution, small changes within a species, or are we talking about macroevolution, major mutations from one type of organism to another? As Johnson says, “That one word *evolution* can mean something so tiny it hardly matters, or so big it explains the whole history of the universe.”[\(5\)](#)

Johnson notes that fewer than 10 per cent of Americans actually believe that “humans . . . were created by a materialistic evolutionary process in which God played no part.”[\(6\)](#) Nonetheless, the vast majority who doubt this are not allowed to think for themselves on the matter of the fact of evolution. Rather than being educated to think for themselves, students are indoctrinated with the dogmatic claims of evolutionists.

In response, Johnson urges students to discern whether what they are being taught is simply assumed or whether it is based on real evidence. When evolutionists insist on the *fact* of evolution without having concrete evidence, and without having any idea of the *mechanism* of evolution, they’re revealing a faith commitment.

Although Johnson’s particular strength is in exposing the flaws in evolutionists’ arguments, he also presents a positive case for intelligent design in the creation of life. We’ll look at that subject next.

Intelligent Design

When Charles Darwin presented his theory of evolution, little was known about what goes on inside living cells. They were “black boxes,” objects the insides of which were unknown. With the development of molecular biology, scientists have come to realize that cells are extremely complex.

In his book, *Defeating Darwinism by Opening Minds*, Phillip Johnson introduces the reader to some exciting new discoveries in biology which he believes deal a significant blow to Darwinian evolution.

Johnson says it's now recognized that there's information encoded in cells which can't be reduced to matter. The evolutionist Richard Dawkins writes,

Each nucleus . . . contains a digitally coded database larger, in information content, than all 30 volumes of the Encyclopedia Britannica put together. And this figure is for each cell, not all the cells of the body put together."[\(7\)](#)

This information is distinct from the physical structure in the same way that the message of a book is distinct from the ink and paper which records it. The question biologists must answer is, Where did this genetic information come from? Information implies intelligence. It can't be explained by physical mutations and natural selection. This is a serious problem for Darwinists.

Another finding which also is a major problem for Darwinists is what is called the irreducible complexity of living organisms. Johnson explains what this means: "Molecular mechanisms . . . are made up of many parts that interact in complex ways, and all the parts need to work together. Any single part has no useful function unless all the other parts are also present."[\(8\)](#) The eye, for example, requires the coordinated working of many different parts to do its work. Each of these parts, however, can accomplish nothing on its own. That being the case, why would the individual parts have been preserved through time by natural selection? If there were gradual development, there must have been some intelligence behind it to know what to retain and what to destroy.

These two factors, then—information content and irreducible

complexity—are strong physical evidence for intelligent design. Information implies intelligence, and complexity can't be accounted for by mutation and selection. It requires design.

In spite of the evidence, however, Darwinists still insist that the origin of life can't lie in supernatural creation. As we noted on earlier, the key issue for them is their prior commitment to a naturalistic philosophy. As geneticist Richard Lewontin said, “[W]e are forced by our *a priori* adherence to material causes to create an apparatus of investigation and a set of concepts that produce material explanations, no matter how counter-intuitive, . . . Moreover, that materialism is absolute, for we cannot allow a Divine Foot in the door.” [\(9\)](#)

It's Phillip Johnson's project to expose this prior commitment and to convince evolutionists to acknowledge it. Now we'll turn to look at Johnson's overall project and see what lessons we can draw from it.

Evaluation

Johnson calls his basic strategy for addressing the issue of evolution, the “wedge.” He wants to drive a wedge into the “log” of scientific materialism so as to separate the facts of scientific investigation from the naturalistic philosophy which dominates science.

One of the criticisms of Johnson's work is that he wants to throw the baby out with the bathwater. Theistic evolutionists, for example, say that one needn't accept a materialistic theory of evolution to recognize the gradual development of life on our planet. Indeed, Johnson seems to be fighting two battles: the first against those who insist upon doing science in a thoroughgoing naturalistic framework; the second against macroevolution of any sort.

I noted earlier that Johnson argues against separating the so-

called *fact* of evolution from the *mechanism* of evolution. He insists that before we can know *that* evolution happened, we need to know *how* it happened. This certainly isn't a universal logical principle. I don't need to know precisely how a camera and film produce pictures to know that they do. Nonetheless, Johnson is correct in pressing for conclusive fossil evidence for gradual change or for a plausible explanation for sudden macromutations.

Johnson's challenge to the scientific community boils down to this question: "What should we do if empirical evidence and materialist philosophy are going in different directions?" [\(10\)](#) In other words, Are you willing to abandon a theory of purposeless processes if the evidence weighs against such a theory? When scientists are willing to do this, then science will be free to discover—as far as it's able—what nature is really like apart from personal prejudices.

It's evident that Johnson has struck a nerve in the scientific community. He's debated well-known scientists and has spoken at prestigious universities across America and overseas. He has not allowed opponents to pin him down on a particular theory of creation and then to dismiss him with the usual "religion vs. science" argument.

Johnson notes that Marx, Freud, and Darwin were three of the most influential men in this century. Marxism and Freudianism have both passed into history. Says Johnson, "I am convinced that Darwin is next on the block. His fall will be by far the mightiest of the three." [\(11\)](#)

But this will only happen, he says, if we "step off the reservation" [\(12\)](#) and do the work necessary to prove our case. We must encourage our young people to take up the challenge of thinking for themselves on this matter and not be intimidated by those who wish to maintain the status quo. This will involve a risk, but as Johnson says: "We will never know how great the opportunity was if we are afraid to take the

risk.”[\(13\)](#)

This book is valuable for any Christian who wants to learn how to think critically, whether the reader is scientifically-minded or not. Here we find a model for turning the tables on those who want to keep us on the defensive. If we have to give an answer for what we believe, it's only fair that our critics should do the same. *Defeating Darwinism* is an example of how to get them to do it.

Christian Apologetics

Rick Wade's introduction to Christian apologetics, rather than delving into specific arguments for the faith, examines the need to think well and develop logic skills. It is important to be able to answer the charge of elitism that is often leveled at Christianity today, and this essay concludes with some cogent statements making a case for Christianity.

Introduction

Throughout the history of the church, Christians have been called upon to explain why we believe what we believe. The apostle Paul spoke of his ministry as “the defense and confirmation of the gospel.” Peter said we need to “be ready to make a defense to everyone who asks you.”

This activity of the church came to be known as apologetics which means “defense.” But, if it is important that we defend the faith, how do we do it?

In this essay I will not provide a lot of evidences and arguments. I will rather look at some basic principles that will guide us in defending the faith. We will talk about our starting point and about the important matter of thinking logically. We'll look at the specific charge of elitism which is prevalent on college campuses today. Finally, we'll deal with the question of presenting a case for Christianity.

So, what is apologetics, anyway, and what is it supposed to do? Apologetics has been defined as “the science and art of defending the faith.” It is chiefly concerned with the question of the truth of Jesus Christ. In the days of the Greeks, when someone was summoned to court to face a charge, he would present an “apology” or a defense. For Christians,

this might mean answering the question, "Why do you believe that Jesus is God?" or a question more often heard today, "Why do you think Christians have the truth?"

So, apologetics is first of all defense. It has come to include more than just defense, however. Not only is the truth of our beliefs an issue, but also the beliefs others hold. A second task of apologetics is to challenge other people to defend their beliefs.

A third task of apologetics is to present a case for the truth of the biblical message. One might call this task "proving" Christianity (although the matter of proof must be qualified). If this seems to be too ambitious a goal, we might speak simply of persuading people of the truth of the biblical message.

In all of this our goal is to let the light of God's truth shine in all its brilliance. It is our ambition also to bring unbelievers to a recognition of the truth of Jesus Christ and to persuade them to put their faith in Him.

Apologetics is typically a response to a specific question or challenge, either stated outright or just implied. Paul reasoned with the Jews for whom the cross was a stumbling block, "explaining and giving evidence that the Christ had to suffer and rise again from the dead." In the second century, apologists defended not only Christian beliefs but also Christians themselves against such charges as atheism and cannibalism and being threats to the state. In the Medieval era, more attention was given to the challenges of Judaism and Islam. In the era of the Enlightenment, apologists had to defend Christianity against the narrow confines of scientific rationalism. Today the challenge has shifted again, this time from attacks on specific doctrines to the question of whether Christianity has any claim to final truth at all.

Like our forebears, we must answer the challenges of our day.

We must respond to our contemporaries' questions as difficult and uncomfortable as that might be.

Thinking Well

One of my frustrations in studying apologetics has been trying to master the overwhelming number of questions and challenges, on the one hand, and supporting evidences and reasons, on the other. Although it behooves us all to master some of these, it seems to me that it is just as important to learn how to think well.

Learning to think well, or logically, is important for Christians for several reasons. It helps us put together the various pieces of our faith to form a cohesive whole. It helps us make decisions in everyday life when the Bible doesn't speak directly to a particular issue. We must learn to deduce true beliefs or proper courses of action from what we do know from Scripture.

Good, logical thinking is especially important for an apologist. On the one hand, it can help prevent us from putting together shoddy arguments for what we believe. On the other hand, it helps us evaluate the beliefs of those who challenge Christianity. Too often we stumble at criticisms which sound good, but which really stand on logically shaky legs. Let's consider a few examples.

Here's a basic one. How do you respond to someone who says, "There's no such thing as absolute truth"? If the individual really thinks there is no absolute truth that is, truth that stands for all people at all times, that person at best can only say "In my opinion, there's no such thing as absolute truth." To say "There's no such thing as absolute truth" is to state an absolute; the statement refutes itself.

Here's another one. You've heard people say, "All religions really teach the same thing." Oh, really? Ours teaches that

Jesus is God in flesh; other religions say that He isn't. A logical principle called the law of non-contradiction says that Jesus can't both be God and not be God.

Let's try one more. Some people say, "I can't believe in Christ. Look at all the terrible things Christians have done through the centuries." How would you answer this objection? While it is true that what Christians do influences non-Christians' responses to the gospel, such actions have nothing to do with whether Christianity itself is true. If part of the gospel message was that once a person becomes a Christian that person absolutely will never sin again, the objector would have grounds for questioning the truth of the faith. But the Bible doesn't say that. We can agree that Christians shouldn't do terrible things to other people, but what people did in fourteenth-century Europe or do in twentieth-century America in the name of Jesus can't change the reality of the incarnation, crucifixion, and resurrection of Christ. The person making this argument may not like what Christians have done, but this complaint has no logical force against the truth of Christ. When people present arguments against the faith, we need to discern whether what they say is both factually true and logically sound. Often the objections we hear are neither. Learning how to think logically ourselves will enable us to spot fallacies in others' thinking. Perhaps pointing these out (in a gentle way, if possible) will cause the person to rethink his or her position. At least it will defuse the attack on our faith.

Answering The Charge of Elitism

I've been talking about the importance of logical thinking in doing apologetics. Now I'd like to apply that in considering a charge currently being made against Christians, especially on college campuses.

In a video I recently saw, a young woman said the notion that Christians have the only truth is "elitist." She was saying

that since there are so many different beliefs in the world, how can any one group of people claim to have the only truth? She, and many others like her, consider such thinking arrogant.

How can we respond to this charge? First, notice the name-calling. We are charged with "elitism." The real issue is passed over in favor of a put-down. This is just another example of how ideas and issues are dealt with in our society these days. It is important, however, not to react in kind. Too often in our society the battles over issues and ideas are fought with name-calling and sloganeering. This is unbecoming to Christians and unprofitable in apologetics and evangelism. We need to deal with the ideas themselves.

Second, Christians can acknowledge that non-Christians can know truth and that other religions can include some truth. If they didn't, they would find very few adherents. They fail, though, on such fundamental issues as the identity of Jesus and the way to be reconciled to God.

Third, notice the faulty logic in the argument. What does the reality of many points of view have to do with the truth-value of any of them? This is like saying: "Some men think they should treat their wives with the same respect they desire; some ignore their wives; others think it's okay to beat them. Who's to say only one way can be right?" The structure of the argument is the same, but it is obvious that the conclusion is wrong. A critic might understandably question our assurance that what we believe is the final truth given that there are so many people who disagree. But it is faulty logic to conclude that no beliefs can claim final truth simply because there are so many of them. Fourth, since the criticism rests upon the idea that two or more conflicting beliefs can be true, we must challenge this assumption. It can be shown to be incorrect by looking to everyday experience. If my wife says it is raining outside but my son says it isn't, do I take my umbrella or not? It can't be both raining and not raining at

the same time. Likewise, if one person says Jesus is the only way to salvation and another says He isn't, no more than one of them can be correct.

Some people, of course, will challenge the notion that our knowledge of God is like knowing whether it is raining outside. God is not a part of nature; He is "wholly other." This issue is much too involved to develop here. But I believe that this thinking is fundamentally a prejudice against authoritative revelation. God has spoken, and He has given us evidence in this world to confirm what He has said.

This challenge to Christianity and many others like it are not easy to deal with. But if defending the faith means responding to the challenges of our day, we must prepare ourselves, as difficult as it may be. Otherwise, we can't expect to be heard.

The Case for Christianity Part 1

Earlier I wrote that one of the tasks of apologetics is to present a case for the truth of the biblical message. Now I'd like to present a few foundational considerations, and after that we'll look at how we might construct a case.

When Christians are called upon to present a case for the faith, they are, in effect, being asked to offer proof that Christianity is true. What evidences or arguments can be marshaled to establish the truth of what we believe?

What we would like to do is make a case which no person of reasonable intelligence can fail to accept. But the Bible acknowledges the reality that many people will not believe no matter how compelling the evidence. Remember the story in Luke 16 about the rich man who died and suffered torment? He begged Abraham to send Lazarus back from the dead to warn his brothers about what they also faced. Listen to the response. Abraham said, "If they do not listen to Moses and the

Prophets, neither will they be persuaded if someone rises from the dead." A determined will can ignore the best of evidence.

Unless we are talking about proof in the mathematical sense, we need to note that proof is person-relative; what will convince one person might not convince another. This doesn't mean, however, that Christianity only becomes true when someone is convinced. It's true whether anyone believes it or not.

In making a case for the faith we seek to present a sound argument which will be persuasive for a particular listener. On the one hand, this consideration frees us from the responsibility of having an argument which will convince everyone; on the other hand, it means that we must not depend upon "one-size-fits-all" arguments.

Even if we're able to deal adequately with the challenges of a given individual, we need to also note what the real basis of our belief is. A true knowledge of God is based upon divine testimony which is accepted by faith, but which is also confirmed for us by evidences of various types. The testimony of Scripture about such matters as the work of Christ on the cross and justification by faith are things which can't be proved; they are accepted by faith.

We must also remember the nature of our message. Christianity is not just a system of beliefs, but rather the message of the One who is truth. This is an especially pertinent point today, given the mentality of the younger generations. Today we've lost the confidence in our ability to reason through the major issues of life in a disinterested, scientific manner and come to firm conclusions. Conceptual schemes that don't touch us where we really live hold little interest anymore. We need to draw people to Jesus who is the answer to the major questions of life. Christianity is living truth, and it should be preached and defended as such.

We might only be able to convince the non-believer that Christianity is plausible or believable. But that's a good start; often it takes many steps for a person to come to faith. Our job is to provide a solid intellectual foundation to make those steps sure.

The Case for Christianity Part 2

Now we'll finish our discussion by outlining a way of presenting a case for Christianity. Note that this is just an outline; it'll be up to you to fill in the details.

Since God created the universe and is active in His creation, there is no lack of evidence for the truth of Christianity. When I use the word "evidence," I'm using it in a broad way to include not only factual evidence, but logical arguments and human experience as well. Evidence is anything that can be brought to bear on the truth-claims of Scripture.

As we present evidence, we must be aware that the false presuppositions unbelievers hold about God, man, and the world might skew their evaluation of the evidences. In fact, the idea of encouraging people to evaluate Christianity makes some people uneasy. Are we allowing sinful people to bring God to the bar of judgment? No, we aren't. We are simply recognizing that, although the Bible never hints that anyone is justified in rejecting its message, it does present witnesses to the truth, typically through historical reminders and miracles. Further, because unbelievers are made in God's image and live in God's world, they have some understanding of the truth, and we can appeal to that understanding.

We can divide the kinds of evidence at our disposal into three categories: fact (or empirical evidence); reason (or logical thinking); and experience (or human nature and the experience of life).

These three kinds of evidence can be used two ways: evaluation

and explanation.

First, we can look for evidence in a given area which confirms Scripture. This is the evaluation aspect of apologetics. So, for example, we can ask, Are there observable facts which affirm what Scripture teaches? Consider history and archeology. Are the teachings of Scripture coherent and logically consistent? Yes, they are. Typically, people who say there are contradictions in the Bible have a hard time remembering one. Is what the Bible says about human nature and human experience true to what we know? Yes it is; we can identify with biblical characters.

The second way we use evidences is to see if Christianity can explain them. The following questions might clarify what I mean. We can ask, Does the Christian worldview explain the facts of nature? Yes, it does, for it says that Jesus created and sustains the universe. Does Christianity provide an explanation for the reliability of human reason itself? Sure; we are created in the image of God with intelligence. Does the Bible explain human nature and experience? Yes, for it relates that, while the image of God and common grace enable us to do good to a certain extent, we are given to sin because of the Fall.

In this essay I've tried to provide some foundational principles for defending the faith. As we prepare to give an answer to our society, it's important that we learn to think logically, that we respond to the questions of our day, that we become familiar with the broad range of evidence at our disposal, and that we consider the person or persons we are addressing as we present our case. With this in mind, we exhibit the truth of Jesus Christ in all its splendor, and, as always, leave the results to God.
