

Changing Hispanic Demographics and Religious Affiliation

More Cultural Research from Steve Cable

Hispanics will have a larger and larger influence on the religious makeup of America in the years ahead. Since 1980, the Hispanic percentage of the population has grown from about 6% to over 17%. The Census Bureau is predicting that percentage will grow to over 28% by 2060.

Perhaps most people assume that the Hispanic population from the 1980's through to today and beyond would be primarily Catholic. We took a look at the General Social Surveys from 1976 through 2014 to see what the actual situation is. Not surprisingly, in 1976 approximately 80% of Hispanics in America self-identified as Catholics. But the 1980's saw a downward trend in this number, so that through the 1990's up until 2006, approximately 68% of Hispanics identified as Catholics. From 2006 to 2014, this percentage has dropped significantly, down to about 55%.

At the same time, the percentage of Hispanics identifying as "nones," (i.e., having no religious affiliation) has grown from about 6% in the 1990's to 16% in 2014 (and to a high of 22% for emerging adult, Hispanics). It is interesting to note that the percentage of "nones" among Hispanics trails that found among whites by over ten percentage points in the GSS data.

A majority of Hispanics still identify as Catholics. How closely are they associated with their local Catholic church through regular attendance? Among emerging adult Hispanics affiliated with a Catholic church, about two out of three state that they only attend church once a month or less. So, the vast majority are not frequent attenders, but are still

more likely to attend than their white counterparts. Among emerging adult whites affiliated with a Catholic church, about four out of five state that they attend church once a month or less.

Although Hispanics are most likely to be Catholic today, if current trends continue, in the next decade this will no longer be the case as more and more become “nones,” evangelicals, and mainline Protestants.

Hispanic Religious Affiliation in 2014

More Cultural Research from Steve Cable

Since 1980, America’s Hispanic population has grown from 14.5 million to over 55 million individuals, an increase of over 275%. More importantly, as a percentage of our total population, from 1980 to 2014 Hispanics have grown from 6.5% to 17.4%. Although the U.S. Census Bureau predicts some moderation in this rate of growth, they are still expecting them to grow to over 28% of the population by 2060.

Most people would suspect that the vast majority of our Hispanic population affiliate with the Catholic faith. Is this so? Let's look at data from 2014 surveys by the General Social Survey and the Pew Research Center to see what we can learn. Looking at adults 30 and over, the GSS results show 60% of Hispanics in America indicate an association with a Catholic church, and the Pew Survey results show 51%. The difference in these numbers is larger than one would expect and is probably due to a difference in the way the two surveys identify Hispanics. In any case, both numbers are probably lower than what most people would guess.

For the same over-30 group, we find that between 15 to 20% of them indicate an Evangelical connection barely exceeding the 15% in both surveys who identified as a "none", i.e. one having no religious affiliation.

The median age of Hispanics in America is much lower than that of other ethnicities. Many Hispanics in America are emerging adults between the ages of 18 and 29. How do their beliefs stack up? The GSS data shows that about 45% of Hispanic emerging adults indicate a Catholic affiliation, while the Pew survey show only 35%. Both surveys show that significantly less than half of emerging adult Hispanics are Catholic. So have they become mainline, evangelical, "nones" or some Eastern religion?

Both surveys show a significant increase in the percentage of Hispanic "nones" for emerging adults compared to those over 30. The GSS survey shows an increase from 15% to 22% while the Pew data shows an increase from 15% to 31%. As with other ethnic groups, Hispanic emerging adults are much more likely to select a religious affiliation of "none" than are older adults. According to extensive data in the Pew Research survey, among emerging adults, the 31% of Hispanics who identify as "nones" are coming very close to surpassing the 35% who identify as Catholic.

Many assume that Hispanics are a monolithic block of Catholics, but the survey data shows that in a very few years the number of emerging adult Hispanics who consider themselves to be “nones” will eclipse the number who identify with Catholicism.

“Nones” are Not Christians Who Choose Not to Identify with a Specific Tradition

More Cultural Research from Steve Cable

In our [first post](#), we discussed the distressing rise of **“nones,”** those who select for their affiliation no religion at all, among our emerging adults (18- to 29-year-olds). As of 2014, over 35% of emerging adults classify as **“nones.”** Some distinguished scholars have suggested that a large percentage of **“nones”** are actually Christians who just have an aversion to identifying with a particular religious tradition.

This position seems somewhat odd since the GSS survey, for example, has only four choices that reflect a Christian tradition—Protestant, Catholic, Orthodox Christian, and Christian. None of those four are very specific as to one's religious beliefs.

But we have another way to see if these **“nones”** are either actually involved, practicing Christians, or are truly wanting to distinguish their beliefs from those of Christianity. Using the GSS survey taken in 2014, we can probe this question to find answers. First, how many of the **“nones”** in this survey say they actually attend a church at least once a month? The answer is less than 7% of them.

Second, how many of these **“nones”** say they believe in a God, believe that the Bible is the inspired word of God, and believe that there is life after death? The answer is about 12% of them.

Third, how many of these **“nones”** attend a church and have the three beliefs listed above. The answer is about 1%, or 1 out of every one hundred young adults not identifying as practicing Christians.

These three answers make it very clear that the increase in **“nones”** among emerging adults is not a result of them avoiding association with a particular religion. It is clear that the vast majority of **“nones”** are disassociating themselves from organized religion and from basic Christian doctrine as well.

Note: What about the **“nones”** who select “nothing at all” as their religious preference as opposed to those who claim they are atheists or agnostics? Perhaps, these “nothing at all”

simply do not want to identify with a specific Christian tradition. Well, the 2014 Pew survey indicates that two-thirds of the “**nones**” fall into this “nothing at all” category. So, if all of the positive answers to the three questions above were given by “nothing at alls,” their percentages would be 10%, 18% and 2% respectively.

So, again it is very clear that the vast majority of “nothing at alls” have broken away from organized religion and mere Christian doctrine. Most are not, as some scholars suggest, young believers keeping their identity options open.

Born-again Protestants Make Up Only 20% of Our Emerging Adult Population and That Number is Trending Down

More Cultural Research from Steve Cable

[As reported earlier](#), more than 43% of American emerging adults (ages 18-25) do not identify themselves as being part of the

Christian faith. But, that means we still have a majority of emerging adults selecting a Christian faith as part of their identity. How many of that majority are born-again evangelicals, and how has that changed over the years?

In my book, *Cultural Captives*, I reported that the percentage of emerging adults who identified themselves as born-again Protestants had only dropped a small amount from 1976 to 2008, from 28% to 25% of the population. However, the same survey organizations report that the number in 2014 has dropped to 20%. If this sudden drop is a precursor to the rest of this decade, we could see the number drop down to 15% by 2020.

In any case, we find that 20% of emerging adults are born-again Protestants while 43% of them are **“nones”** or of other faiths.

Looking at Protestants who do not consider themselves to be born-again, we find an even more dismal situation. Among emerging adults, they have dropped from around 25% of the population in 1990, down to around 14% of the population in 2014. But they have only dropped one percentage point since 2008 and appear to have leveled off. So perhaps, they will comprise around 12% of the emerging adult population in 2020.

We appear to be heading down a path where over half of emerging adults will be non-Christians and less than one-fourth will identify as Protestants. We are experiencing a major change in the religious make-up of our country.

Trend Indicates Over Half of Emerging Adults Will Identify as Non-Christian by 2020

More Cultural Research from Steve Cable

One of the dismaying trends I reported on in my book, *Cultural Captives*, was the significant increase in the percentage of people who indicated that their religion was atheist, agnostic, or nothing at all. I referred to this group collectively as the **“nones”** (those with “no religious affiliation”). The percentage of emerging adults (i.e., 18- to 29-year-olds) who self-identified as **“nones”** in 2008 was 25% of the population. This level is a tremendous increase from the 1990 level of 11%.

Now, we have later results from both the General Social Survey (GSS) and the Pew Research Center. Both surveys show another significant increase in the percentage of **“nones”** among this young adult group. In 2014, the GSS survey showed the **percentage of emerging adult “nones” was now up to 33% of the population**, an increase of eight percentage points. The Pew survey of over 35,000 Americans (an astounding number) came up with a similar result, tallying **35% of emerging adults identifying as “nones”** (an increase of nine percentage points over their 2007 survey).

When we consider the number who do not identify as either Protestant or Catholic (i.e., adding in other religions such as Islam and Hinduism), the percentage of emerging adults who do not identify as Christians increases to 43% of the population in both surveys.

If this trend continues at the same rate of growth it has been on since 1990, we will see **over half** of American emerging adults who do not self-identify as Christians by 2020. We will become, at least numerically, a post-Christian culture if things do not turn around.

The Importance of Parents in the Faith of Emerging Adults

Steve Cable explores the results of Probe's survey of 18- to 40-year-old born agains, focusing on the role of parents in their faith.

The State of Born Again Emerging Adults

In previous articles [{1}](#) we considered the dramatic changes in the beliefs of American evangelicals particularly among young adults. It certainly appears that we are sliding into an era of cultural captivity where one's identification with Christ and an evangelical church does not keep one from holding a set of beliefs consistent with the culture and counter to biblical truth. Here we want to consider the role that parents had in

establishing these inconsistent belief systems of their children, and think about some ways today's parents may be able to counter these destructive patterns in the future. Before looking at the roles parents do and should play in establishing these belief systems, let's consider some of the key belief trends that are driving our concern.

Foremost among our concerns is the dramatic change in the number of young adults who hold to no Christian religious beliefs or espouse a liberal view of Christianity. Looking at data from 1970 to the present, we uncover a disturbing new trend. From 1970 through 1990, the number of 18- to 25-year-old Americans who professed no Christian belief was constant at about twenty percent of the population. In 2000, this non-Christian group had grown to about thirty percent of this young generation, and by 2010 the numbers had exploded to around thirty-six percent.^{2} If this trend continues, less than half of young adults will consider themselves Christians by the year 2020.

This concern over the future is heightened by the conflicted beliefs of young born agains. Among young adults, who consider themselves born again believers, only about one-third of them ascribe to a basic set of biblical beliefs. These beliefs include a creator God, a sinless Jesus, salvation through grace, a real Satan, an accurate Bible and the existence of absolute moral truths. This statistic means that over two-thirds of these born agains do not ascribe to one or more of these beliefs. Overall, this means that less than ten percent of young American adults profess to being born again and hold to a set of biblical beliefs as compared to the sixty-eight percent who hold to no Christian beliefs or a liberal view of Christianity.

When we delve further into young adult beliefs, we find that their beliefs appear to be hodgepodge of cultural concepts and what's going on in their life, with little or no connection to their religious upbringing. Even though emerging adults looked

to religion as a place to learn good morals, in his study Christian Smith discovered a chilling paradox. “It was clear . . . that emerging adults felt entirely comfortable describing various religious beliefs that they affirmed but that appeared to have no connection whatsoever to the living of their lives.”^{3} One emerging adult observed, “I don’t think it’s the basis of how I live, it’s just, I guess I’m just learning about my religion and my beliefs. But I still kinda retain my own decision or at least a lot of it on situations I’ve had and experiences.”^{4} In fact, when we look at how many have a consistent biblical worldview that carries over into their views on sexuality, science, a concern for the poor, and basic religious practices, the survey data indicates that less than two percent of evangelical young adults would qualify. So the overwhelming majority of young evangelicals are not carrying their basic religious beliefs into the realm of everyday decision making.

The Impact of Parents on Spiritual Beliefs

So, what role did their parents have in establishing these inconsistent beliefs?

In 2010, we commissioned a survey to help us examine the causes and potential opportunities to change the marked shift in the thinking of young adults over the last decade. We surveyed over 800 born again, young adults across America to get an understanding for what they thought about spiritual and cultural issues *and* how they felt about their beliefs and actions. One area of questioning was, “When you think about how you developed the religious beliefs you hold today, who do you feel had the greatest influence on you? Did your beliefs come from your family, your friends, your church, your independent studies, your college professors, or others?”

The answers we received to this question were not shocking but

still sobering. More than sixty-five percent of the respondents reported that the source that had the greatest influence on their religious beliefs was a family member, with the vast majority of those saying it was parents or grandparents. Over twenty percent of the respondents pointed to another influential individual such as a pastor, youth leader, or college professor. Only about eleven percent stated that something less personal such as a youth group or the Bible was the greatest influencer of their religious beliefs.

As Christian Smith noted, “What the best empirical evidence shows . . . is that . . . when it comes to religion, parents are in fact *hugely* important.”^{5} In fact, “religious commitments, practices, and investments made during childhood and the teenage years, by parents and others in families and religious communities, matter—they make a difference.”^{6}

Of those who stated that a family member was the primary influence, over seven out of ten stated it was their mother or grandmother while less than three out of ten said it was their father or grandfather. So clearly among born again young adults, the female side of the family has a greater influence in passing down religious beliefs than do the males. One can postulate that this may be due to a combination of greater spiritual involvement on the female side of the family and a higher level of communication with their children. However, the rate of fatherly influence almost doubles for young adults with a biblical worldview compared to those without such a worldview. So it appears that fathers who hold a biblical worldview are much more likely to be involved in establishing the spiritual beliefs of their children.

Less than one out of ten of the respondents listed a pastor as the primary source of influence, and only three percent listed a youth group. These church-related functions may have an important role in helping to shape our religious beliefs, but our survey shows that it is at best a secondary role for the vast majority of people. We are mistaken if we are relying on

the church to pass on the right type of beliefs to our children. Parents, what you communicate through your lives is picked up by your children. What are you communicating to them concerning religious beliefs?

The Translation of our Beliefs

Since the beliefs of today's young adults are dramatically different than the dominant beliefs of forty years ago, does this mean that older adults have changed their beliefs as well, or have the beliefs been translated by the younger culture into something different?

An important part of understanding this question is that the survey results on who was the most significant source of our religious beliefs were almost identical regardless of racial background or levels of church attendance. In other areas of consideration such as biblical worldview, views on cultural behavioral issues, and church involvement, we found significant differences based on racial background, education, etc. But it appears clear that no matter our race, economic level, or religious beliefs, our mothers are the primary sources that pass down those beliefs to the next generation. In other words, if born-again believers have degraded views on worldview and cultural issues, it appears that their parents are communicating (or at least not contradicting) similar views.

As we look at the hodgepodge of religious and cultural beliefs held in our society, we can see the results of what Christian Smith referred to as "Moralistic Therapeutic Deism."[\[7\]](#) The Baby Boomers and their children are captives of our society's focus on pluralism and tolerance as the only acceptable views. With this view, I can hold to certain religious beliefs that are strictly private in their application. But, when those religious views begin to move into areas which may imply someone else's belief is wrong, then I need to modify my

beliefs to be more accepting. To believe in God as creator and Jesus as his sinless Son is probably okay. But when I say that Jesus is the only way we can be reconciled to God, I am starting to step on other's toes, making it inherently wrong.

On the one hand, Baby Boomers have bought into the cultural distaste for absolute beliefs which makes them loathe to state their beliefs too strongly. This viewpoint has been interpreted by the younger generation as an indication that those beliefs are not firm but rather culturally determined. So living in a more multi-ethnic, culturally diverse, and sexually liberated generation, these young adults pick and choose among biblical beliefs and distinctly non-biblical beliefs, with no apparent concern for the discontinuity in their belief systems.

The culture is winning the battle on two fronts. First, the older generation is buying into the importance of not being too forthright with their views. Second, the younger generation, given no clear direction from their parents, is buying into a disjointed set of views that avoids any conflict with others. According to Smith's research, the result is that the vast majority of young adult Americans are holding to some form of mainline Protestant philosophy. This philosophy states that Jesus is a worthwhile model of good behavior but our focus should be on getting along and not making waves rather than promoting faith in Christ.

Countering Parents with a Truth Experience

Have we, the Baby Boomers, the parents and grandparents of our society, so flummoxed up the works that we have started a downward spiral of disconnected beliefs from which we cannot recover? Of course, time will tell, but if we hold to a consistent set of biblical worldview beliefs, we should not sit back and wait patiently for the end of Christianity as we

know it. We are called to “proclaim Him, admonishing every man and teaching every man so that we might present every man complete in Christ” (Col. 1:28).

Interestingly, of those respondents who graduated from college and have a biblical worldview, a much greater percentage of them pointed to a source other than a family member as the most influential. This factor is probably the result of college students having their faith challenged and looking for answers from pastors, Bibles, and books. In other words, the direct challenge to their faith presented by some professors and many of their peers caused some to fall away but caused others to examine the reasons for their belief in Christ. We do not need to fear this examination. Our Lord’s case is more than capable of standing up to examination. In fact, it is the only religion that has a consistent, viable explanation for the complexities and shortcomings of life as we know it.

If a hostile, or at least a highly skeptical, attack on the basis of their faith caused some to examine their reasons for belief and come out with a stronger, more biblical faith, perhaps a friendly encouragement to examine their faith could produce similar results. If the parents are passing on a watered down, inconsistent set of beliefs, perhaps we can change those beliefs by causing the young adults to run them through a consistency and credibility filter. Probe has been doing this for years through our [Mind Games](#) conferences and summer camps for high school students. We have seen that this approach makes a difference.

Is it too late to make a difference in the lives of our young adults? When Viggo Olsen was in his mid-twenties, beginning his residency to become a doctor, his wife’s parents had a change in their belief system, becoming followers of Jesus Christ. Viggo wanted to restore his wife’s parents to sanity so he began an intense study to show the obvious failure of Christianity to address the real world. What he discovered was that a biblical worldview was the only viable answer to

understanding our lives and our future. He went from a mission to disprove Christianity to accepting Jesus not only as his Savior but as his purpose in life as a medical missionary to Bangladesh.[\[8\]](#)

In a similar way, we need to encourage, or better yet force our younger church-goers to examine their beliefs and compare them with the teachings of Christ. Ask them not to live an unexamined life conforming to the culture, but rather to examine their beliefs and see if they stand up to close examination.

Consistent Worldview Parents are Best

Unfortunately, many parents have not been passing on a clear view of faith in Christ from generation to generation. Instead our belief system, even among those who believe they are going to heaven when they die because of their faith in Jesus, has been eroding into a mishmash of popular cultural beliefs mixed in with some variation of beliefs taught in the Bible.

Confronting young adults with the disconnects and shortcomings created by their mixture of beliefs as compared to a consistent Christian worldview can get their attention and bring about changes in their thinking. This confrontation with truth has been a major focus of Probe throughout the years.

However, a major take-away from these studies should be for the young adults who are parents of our future generations. Listen up, young adults! If you do not communicate a clear set of biblical worldview beliefs through your words and through your actions, your children are going to pick up on the worldview you *do* communicate. Your desire to fit in with the culture and not make too many waves will result in children who believe that the culture is the ultimate authority on truth and right living. Why? Because that is what your life is saying to them loud and clear.

Suzie strongly believed that sex outside of marriage was wrong before God. It had a detrimental effect on the individuals caught up in it and on the society which promoted it. However, she felt that many of her friends did not view it in the same way she did. So, to get along, she never said much about it. What she did not realize was that her children were watching what she said. Even though she had told them she hoped they would remain pure until marriage, they did not hear her standing up for sexual purity among her friends. Without even thinking about it, her children relegated sexual purity to a nice ideal but not an important belief to live by. Suzie was instrumental in establishing their thinking on this topic. Their thinking lined up with what Suzie demonstrated was important to her even though it did not really line up with what she truly believed.

As parents, our beliefs have the greatest impact on our children's views. Things that you may not believe but grit your teeth and say nothing about will become core beliefs of your children. The society is saying they are true; they don't see a consistent disagreement from your words or your life. Thus, it must be the right value to hold. This process of gradually turning over our core beliefs to be reset by the culture is at least partially the reason for the tremendous shift in our cultural morality over the last sixty years.

As parents, we can make a difference in future generations. We need to hold fast to the truths of Jesus Christ, speak them with our tongues, and live them through our actions. Our children are still looking to us for truth in this area. Let us commit to not let them down by deferring to the norms of the culture.

The True State of American Evangelicals

Steve Cable analyzed the data concerning 18- to 40-year-old born-again and presents a concise summary of the results.

Good News for Evangelicals?

How is the evangelical church doing in America as we begin to make our way through the second decade of this century? Are we growing in numbers and in the clarity of our message, or are we holding our own against a tide of secularism, or are we on the verge of a major collapse partially obscured by continuing attendance? The people who should have the best handle on this

question are the sociologists and pollsters who map and track many different aspects of our society. What are they saying about the evangelical church?

First, consider Bradley Wright, professor of sociology at the University of Connecticut. In his 2010 book, *Christians Are Hate-filled Hypocrites . . . and Other Lies You've Been Told*, he finds "there seems to be no compelling evidence—based on the data we have about our young people—that the church in America is on the verge of collapse."[{1}](#)

Looking at the data from the Pew U. S. Religious Landscape Survey, 2008, and the General Social Survey, he concludes, "On the negative side, the number of young people who do not affiliate with any religion has increased in recent decades just as it has for the whole population. . . . On the positive side, the percentage of young people who attend church or who think that religion is important has remained mostly stable. . . . What I don't see in the data are evidence of a cataclysmic loss of young people."[{2}](#)

Wright notes that the percentage of Evangelicals has remained fairly constant in recent years, while mainline Protestantism has declined. He suggests that one reason mainline Protestantism has decreased as a percentage of the population is that most mainline churches have not emphasized church planting. Therefore, "the number of Americans has grown every year but the number of seats in mainline churches has not."[{3}](#)

Another sociologist looking at this question is Byron Johnson, professor of Social Sciences at Baylor University. Considering data from a survey commissioned by Baylor in 2005,[{4}](#) he concludes, "Leading religious observers claim that evangelicalism is shrinking and the next generation of evangelicals is becoming less religious and more secular, but these are empirical questions, and the evidence shows that neither of these claims is true. . . . Those who argue that a

new American landscape is emerging—one in which the conservative evangelicalism of the past few decades is losing numbers and influence—are simply ignoring the data.”{5}

As Johnson points out, “For starters, evangelicals have not lost members . . . Fully one-third of Americans (approximately 100 million) affiliate with an evangelical Protestant congregation.”{6}

Another eminent sociologist, Christian Smith of the University of Notre Dame, has done an extensive study of young Americans over the five years from 2003 to 2008, which he summarizes in his book *Souls in Transition, The Religious and Spiritual Lives of Emerging Adults*.{7} He begins by identifying the distinctly different culture of today’s twenty-somethings in contrast with those of prior generations. The major source of distinction is the view that they don’t really need to start living as married adults until they reach their thirties. The twenties are for exploring different jobs, lifestyles, and relationships before getting married and settling down. But when it comes to religion, he states, “The preponderance of evidence here shows emerging adults ages 18 to 25 actually remaining the same or growing more religious between 1972 and 2006—with the notable exceptions of significantly declining regular church attendance among Catholics and mainline Protestants, a near doubling in the percent of nonreligious emerging adults, and significant growth in the percent of emerging adults identifying as religiously liberal.”{8}

However, looking at the more detailed data from his surveys, he concludes, “Most emerging adults are okay with talking about religion as a topic, although they are largely indifferent to it—religion is just not that important to most of them. . . . Most of them think that most religions share the same core principles, which they generally believe are good.”{9} He goes on to say, “Furthermore, among emerging adults, religious beliefs do not seem to be important, action-driving commitments, but rather mental assents to ideas that

have few obvious consequences.”[{10}](#) He also concludes that among these young adults the tenets of liberal Protestantism have won the day, influencing many evangelicals, Catholics and Jews as well as mainline Protestants. One surprising outcome of this trend is the demise of mainline Protestant churches since their teaching is “redundant to the taken-for-granted mainstream” that they helped create.[{11}](#)

Standing in contrast to these eminent sociologists are the findings of George Barna and the Barna Group. Their surveys between 1995 and 2009[{12}](#) indicate that among all Americans who self-identify as being born again, less than 20% of them agree with six basic historic Christian beliefs[{13}](#) which Barna associates with a biblical worldview. Among those between 18 and 25, this number drops even further. Young people may be affiliating with evangelical churches at similar rates over the last fifty years, but that affiliation does not mean that they have beliefs similar to prior generations.

So what is right? Is it true that there is no compelling evidence that the church in America is on the verge of collapse? Or, do we have more religious young people who are heavily influenced by the beliefs of mainline Protestantism? Or, is the dearth of a biblical worldview an early warning sign of a significant collapse? As you can imagine, this is a question that we at Probe just had to get to the bottom of. So, we dove in to analyze the data behind the statements above, using their own data to validate or question their conclusions. We also commissioned our own survey of 18- to 40-year-old, born-again Americans to probe deeper into this question. Unfortunately, what we found convinced us that things are not only worse than what Wright, Johnson, and Smith concluded, but they appear to be worse in some ways than our prior assumptions from the existing Barna surveys.

Where Do We Really Stand?

When we look at the underlying survey data used by Wright, Johnson, Smith, and Barna, we discover an unsurprising result: on similar questions they get similar results. For example, consider the question “Do you believe God is all powerful and involved in the world today?” This question is asked in one form or another by all four surveys used by the authors above.^{14} Looking at twenty-somethings, we find the following affirmative responses:

Question	Author	Source Survey	Result
All powerful God involved in the world today	Wright	GSS	79%
	Johnson	Baylor 2005	83%
	Smith	NSYR 2008 ^{15}	83%
	Barna	Barna 2009	83%

As you can see, all sources have essentially the same results (which is nice since it tends to corroborate their polling techniques). So, how did they come to such different conclusions about the meaning of similar sets of data? Looking at these high percentages, how could Smith say there is something different about this emerging generation, or how could Barna say that “Jesus would be disappointed by the answers He received from today’s Americans?”

The answer comes from two sources. First, you need to ask more questions about their beliefs and practices than just “Do you believe in a God and in Jesus as His Son?” A person can mean a lot of different things when answering yes to those questions. Second (and it turns out to be extremely important), you must look at the combined answers to a set of related questions. In his book, Smith took the first step of asking a lot of probing questions, both in the survey and in face-to-face interviews. By doing this, it became clear that their answers to a few

questions about God and Jesus did not mean that they were biblically literate Christians. Barna took the second step of looking at the answers to a combined set of questions and discovered that the beliefs of Americans were disjointed and inconsistent, particularly among the younger generations. So, even though 83% of 18- to 26-year-olds who professed to be born-again believed that God is all powerful and involved in the world today, only a small subset of them believed all six biblical worldview questions.[{16}](#)

What happens if we look at the results of the surveys used by Wright, Johnson, and Smith? Fortunately, we were able to access the raw questionnaire results using the Association of Religious Data Archives online database. Of course, these surveys did not ask exactly the same questions, but we were able to find a set of roughly equivalent questions within each survey. And this is what we found about those with a biblical worldview, compared to those who actually apply their biblical worldview to the way they live:

Belief	Baylor	NSYR	Barna	Probe {17}
Biblical Worldview	27%	22%	19%	37%
Biblical Worldview plus Cultural Application	8%	3%	NA	10%

So each of the surveys used by the four different sociologists basically showed the same result: less than one third of born-again (or evangelicals) had a set of beliefs consistent with the biblical worldview taught by Jesus, and less than 10% had a biblical worldview *and* a set of cultural beliefs (e.g. beliefs about sex outside of marriage, abortion, materialism, caring for the poor, etc.) taught by Jesus in the New Testament. So, it appears that if they had done more in-depth analysis of their own data, Wright, Johnson and Smith should have been espousing the same message as the Barna survey.

This surprising result (at least to Wright and Johnson) that their data actually is consistent with Barna's data allows us to quit worrying about the differences and concentrate on the common message of these surveys. Among several, I think that three major messages from the survey results are important for us to consider here.

1. First, as the culture has adopted more unbiblical views regarding pluralism, sexuality, honesty, etc., the majority of evangelical church members have adapted to accept the new cultural positions rather than stand firm in the truth taught by Christ and his apostles. In other words, they have been taken "captive by the empty deception and philosophy according to the traditions of men, according to the elementary principles of the world, rather than according to Christ" (Col. 2:8).

2. Second, our 18- to 29-year-olds are leaving a classical evangelical faith in large numbers. A third of them directly leave any involvement with evangelical church, with half of that number going into liberal mainline denominations and the other half leaving behind all church affiliation. Of those who remain associated with an evangelical church, one third of them attend church but do not hold to a biblical worldview and another third do not go to church or hold to a biblical worldview. So, just less than 8% of American teenagers move into emerging adulthood with a strong, evangelical worldview.

3. The percentage of Americans belonging to evangelical churches has remained fairly consistent, but that does not mean that the beliefs of the members have remained constant. The sacred / secular split, described by Nancy Pearcey in her book *Total Truth*,[{18}](#) allows them to ascribe to at least a limited set of evangelical beliefs in their sacred side while keeping the "real truths" of the secular side isolated and unaffected by any evangelical beliefs.

How Did We Get to This State?

If you find your child trapped inside the dryer at home, you not only want to get them freed from captivity, you also want to understand how they got into that mess so you can prevent it in the future. In the same way, Probe has undertaken an in-depth survey to help us understand how seemingly born-again believers in Christ are so often taken captive by the thoughts of men rather than Christ. Our survey found they fall into three equally sized categories:

- Those *with* a biblical worldview who *attend* church regularly (Free Ones)
- Those *without* a biblical worldview who *attend* church regularly (Partial Captives)
- Those *without* a biblical worldview who *do not attend* church regularly (Full Captives)

The first take-away from this study is disturbing but not very surprising. Most American born-again between the ages of 18 and 40 received their spiritual beliefs (and most of their other beliefs) from their parents or grandparents. In other words, their hodgepodge of inconsistent beliefs covering everything from God to gossip, they essentially obtained from the previous generation. What the other surveys show is that people in their 40s and 50s have viewpoints that are more conformed to the culture than to Christ just as their children do. It is not quite as dramatic but it is very pronounced. If we parents are holding beliefs that are captive to the traditions of men and the elementary principles of this world, then it is not surprising to see that thinking expanded in our children.

It is very interesting to note that 42% of church-going young adults with a biblical worldview (called the Free Ones hereafter) stated that their spiritual beliefs were driven by

sources other than immediate family members, versus only 30% for other born-again (an increase of 40%). Interestingly, this difference also coincides with the higher percentage of college graduates among the Free Ones relative to other young born-again. In fact, college graduates influenced by sources outside their family are more than twice as likely to be church attendees with a biblical worldview than are those who did not graduate from college. So, it appears that this committed group of church-going young adults with a biblical worldview had to deal with challenges to their faith in college which led them to delve into the questions and develop a solid biblical worldview, drawing from sources outside their families.

However, it is worthwhile to note that when asked an additional six worldview questions only half of the Free Ones expressed a biblical point of view on those questions.

The second take away is in the different ways of viewing non-biblical thinking among young adults. We surveyed their attitudes and actions on a number of unbiblical areas of behavior including sexual activity, negative feelings such as anger and unforgiveness, use of the tongue, self-focus and greed, negative attitudes and sinful actions. For these unbiblical behaviors, if they engaged in that behavior we asked them what they thought about it. They could select from "I do not believe it is wrong," "Believe it is wrong, do it anyway and feel guilty or embarrassed," or "Believe it is wrong, do it anyway, without feeling guilty or embarrassed." Not surprisingly, the Free Ones tended to have the same level of participation in each area as other born-again, but a significantly lower percentage of those said the behavior wasn't wrong or did it without feeling guilty or embarrassed. On the other hand, among the one-third with irregular church attendance and no biblical worldview (the Fully Captive), about one-third had no guilt with their sexual indiscretions and over one-half had no guilt associated with issues of

internal attitudes, sins of the tongue, and other negative actions.

A third take-away from our survey was a difference in attitude as a function of age. Those between 30 and 40 were almost 30% more likely to subscribe to a biblical worldview than those between 18 and 24. Similarly, Christian Smith's data shows that over one-third of all 18- to 24-year-olds are no longer affiliated with any Christian religion today as compared to about one in five thirty-somethings.[\[19\]](#) If this is a precursor to permanent erosion in the number of people with a biblical worldview, we need to address it now.

In summary, the majority of young born-again

1. Caught their unbiblical beliefs from their parents
2. Make important decisions without considering biblical truth
3. Don't consider sinful behavior much of a problem

It should be noted that not all of the 817 born-again questioned in our survey are affiliated with evangelical churches. From the Baylor survey, we find that in the general population from age 18 to 44, 35% are evangelical or Pentecostal, 20% are mainline Protestants, 20% are Catholic, and the remaining 25% are not Christians. Among those who self-identified as born-again, 57% are evangelical or Pentecostal, 30% are affiliated with mainline Protestant denominations, and only 5% are Catholics. However, when we look at those born-again with a biblical worldview, we find almost 71% are evangelicals and Pentecostals, about 27% are mainline Protestants and only 1% are Catholics. This result shows the wide disparity of beliefs across denominations even among those who meet the criteria of being born-again.

We asked these born-again in making decisions associated with family, business, and religious matters, "What is the primary

basis or source of those principles and standards that you take into consideration?" We found there was a huge difference between Free Ones and the remainder. In fact, 75% of the Free Ones looked to a biblical source in making those decisions while only 33% of the Partially Captive and 10% of the Fully Captives considered a biblical source.

From Captives to Conquerors

As we dove into the data on how the American church is faring today, we started with something that first looked like a pure, white sand Caribbean beach but turned out upon further evaluation to be a trash-filled swamp of putrid, stale water. And, we have to ask the question, Can the church continue on this trajectory of scattered beliefs and split personalities for long? I think the answer has to be no. Either the evangelical church will follow the path of other Protestant denominations into shrinking, irrelevant entities, or something will bring it back to the truth found in Christ Jesus.

An encouraging note in this discouraging journey of discovery is that our status is not new. The apostle Paul expressed concern about a similar loss of the truth impacting the genuine believers of Colossae. He warned them, "I say this so that no one will delude you with persuasive argument" (Col 2:4) with the intent of taking them captive "through philosophy and empty deception . . . rather than according to Christ" (Col 2:8).

We find in the New Testament that it is clearly a strategy of Satan to offer watered-down and distorted views of what it means to live in Christ as a way to prevent Christians from bringing more people into eternal life through faith in Jesus. Clearly, from the data we have looked at for American evangelicals, this strategy is having a powerful effect in America today.

In this second chapter of Colossians, Paul goes on to highlight four different types of arguments that could lead us astray: Naturalism, Legalism, Mysticism and Asceticism. All four of these false views are alive and well in our world today. Naturalism (e.g. neo-Darwinism) and Mysticism (e.g. the forms presented by Eckhart Tolle and Oprah Winfrey^{20}) are the most prevalent in our society, but Legalism (i.e. religious rituals and performance over grace) still has a strong influence, and Asceticism (i.e. denying the body through severe treatment) is very strong in other parts of the world.

But, just as it was true for the Colossians, it is true for us: we don't have to fall for these traps that are out to delude our minds. Christ gives us the freedom and Paul gives us clear directions on how to escape from delusional thinking. Paul's advice can be summarized in five key areas:

- Ask God to fill us with the knowledge of His will (of the truth) with all spiritual wisdom and understanding (Col. 1:9-10; 2:2-3).
- Recognize that Christ is the maker and the sustainer of all, and therefore every truth in this world is Christ's truth (Col. 1:15-20).
- Accept that in Christ I have been made complete, and the acceptance of men and accolades of this world cannot add to that completeness (Col. 2:9-10).
- In the same way I received Christ Jesus for eternal life, I am to walk in His truth in this life. Jesus is not just my insurance for when I die; He is my life and I need to be "firmly rooted and grounded in Him" (Col. 2:6-7).
- Realize that I am now living in eternity with Christ and am assigned for a brief time to this temporal world (Col. 3:1-3).

Don't fall for Satan's trap that some man-made concept has a better grip on truth than Jesus our creator and sustainer. We have seen that coming generations are looking to you to define their beliefs. Are you going to show them an active belief in Christ as your Truth? If you do, it can make a difference!

Predictions for the 21st Century

From our 2015 vantage point, let's look back at predictions made in 1999 about trends which would shape this century. Although far from the end of this century, we can make a preliminary assessment of these predictions. Were they on the right track or are they already veering from current reality?

For this exercise, we drew on predictions made by seventeen scholars in 1999, published in *First Things: A Monthly Journal of Religion and Public Life*.^{1} They discussed what they were expecting in this next century.

Past vs. Future

Some of the scholars took the approach of looking at prior centuries to see what they could learn to help them predict future trends.

Writer Charlotte Allen^{2} began by stating, “Palm-reading the lifestyles of the future usually sets you up to be proved wrong,” and looked at the last two millennia to prove her point. First, someone predicting the future in the year 1 BC would probably talk about the Roman Empire and how it was entrenched and likely to remain the dominant power. But, of course the big event of the millennium was the beginning and growth of Christianity, still impacting our world today, while the Roman Empire is only a memory. Then she notes that the future of European civilization looked grim in the year 1000, but “it turned out to be the century of European expansion and great advances in science and economics.”

Looking ahead, she had a fairly negative outlook for the West: “The combination of the new people and a fading sense of common values seems to spell disaster . . .” But on a worldwide scale, she saw us trending toward a great religious revival, the same trend that changed the outcomes of the previous two millennia.

Assessing her forecast today, we continue to see a fading sense of common values in our society and can only hope that a great religious revival will occur.

Another forecaster, political scientist Andrew Bacevich,^{3} sees Americans becoming very self-centered in their view of the world. At the beginning of the last century, Woodrow Wilson brought in the idea of American global preeminence. At the end, Bill Clinton modified this sentiment to, “the allure of globalization lies in . . . the promise of gain without pain.” Bacevich believes this attitude of taking advantage of our position in the world order will continue to grow

throughout this century.

However, now President Obama has brought a new idea—denying that America should be globally preeminent but rather, just one of many nations, an idea offering the promise of pain without gain. We suffer the pain of conflict with no real expectation of gaining greater respect for democracy.

The Role of Religion

One area of interest in 1999 predictions is how the role of Christianity may change. Three of our forecasters touched on this subject.

Physicist Stephen Barr^{4} believed little progress will be made in answering top questions of science. Questions such as “What is consciousness, and how does it fit into . . . the physical world?” However, he believed we will make strides reconciling science and religion. He stated, “For many, the scientific spirit came to be defined in opposition to faith. This hostility . . . really involves an inner contradiction that is coming to the surface.” It would become clear to most scientists that there is more to this existence than physical science. “By proclaiming the truth about man, religion will be found to be not an enemy of reason, . . . but perhaps its last defender.”

Theologian Peter Leithart^{5} believed this century will see the West becoming the primary mission field for Christians from places like South Korea. He wrote, “The same nations swearing fealty to Christ a millennium ago are now among the most secular on the earth.” Success in the West may only come after the current situation is reduced to rubble through removing the constraints once held in place by common Christian values. In which case, “the West will have to relearn the habits of Christian civilization from those once considered barbarians.”

Psychiatrist and author Jeffrey Satinover^{6} believed the teachings of the Third Reich are prevailing over the teachings of Christ. “Mercy killing, abortion, infanticide, [all] once seen as repulsive has been transformed into . . . beauty.” He sees our best universities focused on teaching a perverted view of fairness. “The American mind isn’t just being closed, it’s being evacuated,” i.e., filled with inconsistent thinking. The system which should be promoting truth and protecting us from such politically correct drivel is religion. As he pointed out, “God Himself is doing just fine, but His earthly defenders are on the ropes . . . [after all] genuine religion claims for itself the ability to know what’s true,” and yet we are not proclaiming or defending truth. Without the broader truth of Christianity, we may lose our identities completely.

Three very different pictures were forecast. One, optimistically, believes religion will be the last defender of reason, while another believes our hope lies in becoming a mission field, and a third worries that Christianity may be discarded. Fifteen years into this millennium, it appears the latter two are closer to the trajectory of society, but the optimistic view is still a possibility when fueled by the prayers of believers.

Key Drivers in this Century

Some predictions made in 1999 about this century deal with the underlying forces shaping this century.

Philosopher and theologian William Dembski^{7} predicted that “information is the primary stuff of the coming age.” In the last century, the computer helped introduce an age where the amount of information we were able to use increased dramatically. But information may be far more fundamental in this universe. Should information be regarded as “a basic property of the universe, alongside matter and energy”? In other words, rather than information being something created

by man, it may be a primary contributor to the creation and being of the universe.

Information as a driving factor of the material universe helps us to understand how our conscious thoughts are a part of it as well. As Dembski quotes physicist Paul Davies, "If matter turns out to be a form of organized information, then consciousness may not be so mysterious after all."

Why is this concept important to religion and faith? If information is not primary, the world is seriously hampered in what it can reveal. We've seen this with the rise of modern science revealing nothing about God except that God is a lawgiver. But if information is the primary stuff, then there are no limits whatsoever on what the world can in principle reveal.

However, another prognosticator, journalist Hilton Kramer,[\[8\]](#) warned that dealing with the deluge of information will be a critical factor in maintaining a healthy life and society in this century. He stated, "All the portents point to an acceleration of the merry, mindless, technology-driven surrender to the complacent nihilism that has already overtaken so many of the institutions of cultural life. . . our democratic society has lost the power to protect . . . from the evil effect of this cultural imperative." The sea of information has the effect of removing the idea of a standard of truth for righteous living. With so many competing standards vying for their attention, many have given up on pursuing any concept of truth. This thinking has a devastating effect on life based upon Jesus, the one who said, "For this reason I was born . . . to testify to the TRUTH." (John 18:37) For the church, "everything will depend on its ability to marshal a principled resistance to the influence of popular culture" and the sea of inconsistent information.

One sixth of the way through this century, we see both the importance of information as a fundamental force and the

difficulty we have dealing with the vast amount of information constantly vying for our attention. Both of these forecasts are continuing along a path to fruition in this century.

Relating to Religion

Let's consider next the perversion of tolerance and the future of ecumenism.

Author Glenn Tinder^{9} posited that the meaning of tolerance had shifted from "a willingness to put up with the characteristics of others" to a distinctly different stand "that all beliefs should be considered equally true, except for any belief that states your beliefs are correct and another's are wrong." He wrote, "Tolerance easily becomes acquiescence in the submergence of truth into a shifting variety of opinions. . . [this view] cannot be acceptable to . . . Christians . . . challenged . . . to develop an attitude toward the religious and cultural confusions surrounding them that is tolerant" in a way that is distinct from today's new tolerance.

Tinder suggested using the term "forbearance," reflecting a view imbued with brotherly love, a recognition of a diversity of views, and an understanding that one should speak out for the truth as one knows it. "In an era that says to us every day, 'there is no Truth,' the art of forbearance might at least help us resist the temptations of relativism."

In 2015, the post-modern definition of tolerance continues to hold sway. But a discernible trend to use another term to describe the loving attitude Christians have toward others has not appeared. The fight against promoting any set of ideas as equally valuable is continuing but with no discernible progress.

Princeton University law professor Robert George^{10} looked back to the Second Vatican Council in 1965 when many mainline

Protestants and Catholics were wondering if it were a precursor to ultimate reunification of the Christian Church. Surprisingly, by 1999 it was not the left talking of ecumenicalism, but rather the religious right. The consistency of moral positions in the Catholic Church and in evangelical circles had blossomed into a genuine spiritual engagement.

“How can there be genuine spiritual fellowship between people who sincerely consider each other to be in error on profoundly important religious questions?” George suggested it was genuine because it took religious faith and religious differences seriously.

Their common goal of combatting the increasing rise of non-Christian thought would cause them to work together. He stated, “I am even hopeful of its capacity to survive victories—though that of course is the far greater challenge.”

Today, in 2015, cooperation continues between conservative Catholics and evangelicals on moral issues in our world. Some Catholic and evangelical leaders released the Manhattan Declaration calling for the sanctity of human life, the dignity of marriage, and freedom of religion. And, in 2011, the organization, Evangelicals and Catholics Together, released a statement supporting religious liberty.

What Rules Our World

We have been looking at predictions made for this century in 1999 about factors that would rule our world situation today and in the future.

Theologian Paul Griffiths^{11} noted that at the end of the first millennium, the primary institutional form was the church. During the second millennium, it was joined by the nation-state and corporations. Entering the third millennium, “the forces . . . are now primarily economic and secondarily

political” with the churches existing at the margin of society.

He predicted the significance of corporations will advance as nation-states decline, making us a world not defined by what we believe, but by what we consume. Hopefully “as the bankruptcy . . . of the corporate promise begins . . . to become evident, people turn . . . to the churches with renewed passion.” To become anything other than a religious preference box on a census form, churches must look to provide a message that offers a hope of resistance.

Today, we are more driven by consumption. Time will tell if Griffiths is right and this trend will ultimately lead us back to the church with renewed passion.

Legal scholar Robert Bork^{12} predicted the “rule of law” will no longer have independent moral force of its own. Bureaucracies will lay down most of what governs with little accountability to the people. Elections and legislative deliberation will be disconnected from the real governance, making politics simply entertainment. “Democracy will consist of the chaotic struggle to influence decision makers who are not responsive to elections.”

Today, we are seeing the President and bureaucracy taking away the legislative authority of the Congress. If anything, this process seems to be picking up steam in the first half of 2015. If this trend remains unchecked, Bork’s prediction will come to fruition.

Francis Cardinal George^{13} foresaw a major shift in the forces of global conflict. Where most conflicts were between states, in this new century we will see the clash between modern Western states, Asian civilizations and Islamic civilization. Uncertainty about the intentions of other civilizations will produce fear between them. For example, the post-modernity of the West directly attacks the pre-modern,

faith-based culture of the Islamic societies.

George felt Christians should be open to Muslim cooperation in “addressing the moral failures of modernity.” The church could take the lead in creating a “globalization of solidarity.”

So far in this century, the clash between the West and Islamic civilizations is at the forefront of world relationships with no significant signs of a breakthrough in understanding or compromise.

Looking back over the last fifteen years, many of these predictions from 1999 are roughly on track. These pundits did not paint an encouraging view of the future. It is incumbent on evangelicals to pray fervently and work diligently to change western society for Christ over the next 85 years.

Can the Just Succeed?

Can the just succeed? Can people living by Biblical principles successfully compete in a capitalist economy without compromising? Should we even try? Steve Cable provides a biblical perspective.

Corrupting Cultural Climate

At the turn of the twenty-first century, America was hit with a tsunami of corporate corruption. Names like Enron, Tyco and WorldComm became synonymous with greed and failed corporate leadership. Today, even after Congress and the SEC have strengthened their oversight, high profile cases, such as backdated stock options at Apple, continue to plague us. We can't even take comfort in some past golden era of corporate ethics as we look back at a history filled with robber barons, ruthless company towns, and shady land deals.

In the light of this discouraging reality, we are asking the question, Can the just succeed? Can people living by Biblical principles successfully compete in a capitalist economy without compromising? Should we even try?

Let's begin our exploration of this question by considering the overall cultural climate surrounding our free market economic system. A number of recent studies indicate less than honest behavior, and downright dirty dealing are common throughout our culture.

Let's begin at the top. What type of standard is being set by our business leaders? One recent poll showed that less than twenty percent of Americans had confidence that CEOs would consistently make job-related decisions that were morally appropriate.[\[1\]](#) Is this skepticism well-founded? After all, most CEOs have worked their way to the top as a result of

excellent performance in lower positions. Almost fifty percent of corporate executives in a recent Tulane University study were willing to commit fraud in role playing exercises.[{2}](#) What was particularly disturbing was that these same executives had affirmed their unwavering commitment to the highest ethical business standards.

Perhaps, we can rely on our workforce to apply their solid middle class values to curb the effects of corrupt leadership. Sadly, a recent study found that forty-eight percent of workers admitted to acting illegally or unethically in the workplace during the previous year.[{3}](#) Over thirty percent of them said that their coworkers condone questionable ethics by showing respect for those who achieve success using them.[{4}](#) In other words, cheating is not only condoned, it is respected.

We all hope that the upcoming generation will improve upon the sins of the prior generations. Are they bringing a standard of personal values that will clean up the marketplace of the future? Or, are they following in their elders' footsteps? From 1969 to 1989, the number of students who let someone copy their work rose from fifty-eight to ninety-seven percent.[{5}](#) A recent survey published in *Education Week* found that three out of four students admitted to engaging in "serious cheating" within the previous year.[{6}](#)

People emulate the behavior they believe will make them successful. Perhaps, today's Christians should join Habakkuk as he questioned God: "Why do You look with favor on those who deal treacherously? Why are You silent when the wicked swallow up those more righteous than they?" (Hab. 1:13)[{7}](#)

It appears that we will be dealing with a culture of dishonesty in the marketplace for the foreseeable future.

The Slippery Slope

Surprisingly, most Americans identify themselves as trustworthy. So, why are all of these good trustworthy people demonstrating by their behavior that they are not worthy of our trust?

Well, Paul gives us a lot of insight in his first letter to Timothy when he writes, "But those who want to get rich fall into temptation and a snare and many foolish and harmful desires which plunge men into ruin and destruction. For the love of money is a root of all sorts of evil" (1 Tim. 6:9,10).

When we want to accumulate money for our own enjoyment beyond what we need to live, we are tempting ourselves to unethical behavior.

In his book *There is No Such Thing as Business Ethics*, John Maxwell identifies three primary reasons "good" people are led astray in business dealings.[\[8\]](#)

First, we do what is convenient. Many times doing the right thing is a lot more trouble than doing the convenient thing. Have you ever discovered that you were given too much change, but you didn't want to go to the trouble of returning to the store? Sometimes a convenient lie can help us avoid the consequences of a mistake.

Second, we do what we must to win. After all, everyone is doing it. I have to compromise my standards in order to compete. During my years in a very competitive industry, one of my co-workers often stated, "If you can't lie on a proposal, when can you lie?" In other words, promise whatever you need to get the job, and try to wiggle out of it later.

Third, we rationalize our unethical choices with relativism. We tell ourselves that our ultimate intentions are good. And, besides, if it is good for me, then it must be good. It is scary to think how easy this will be in a postmodern society

where all truth is relative truth.

All three of these relate to putting our success ahead of our values. John Maxwell put it well when he said, “Ethics is about how we meet the challenge of doing the right thing when that will cost more than we want to pay.”[{9}](#)

I would like to add a fourth reason I call the Sudden Slippery Slope. We are taught that as long as we can justify our actions by the rule book then they are OK. In order to get ahead, we start to push the envelope of how we interpret the rules. One day we wake up to find that we have clearly gone beyond the boundary. We discover that we are on a slippery slope where the more we try to cover up or undo our actions the more we find ourselves breaking the rules. Enron is an excellent example of this effect.[{10}](#) No one at Enron started out with the objective to wipe out \$50 billion in shareholder value overnight through unethical business practices, but a culture of pushing the ethical boundaries will inevitably result in a culture of corruption. Proverbs warns us that when we get in this mode, we have a hard time telling right from wrong: “But the path of the righteous is like the light of dawn, that shines brighter and brighter until the full day. The way of the wicked is like darkness; they do not know over what they stumble” (Prov. 4:18-19).

A Christian Perspective on Capitalism

Let’s consider a biblical perspective on capitalism.

People are rarely neutral when it comes to capitalism. Some people blame capitalism for the excesses of unethical behavior described earlier in this discussion. But capitalism as the primary cause of corruption is exonerated by comparisons with many communist and socialist economic systems. Historically, these systems have raised corruption and graft to the highest levels.

On the other hand, some commentators seem to equate capitalism with Christianity, implying that one of the tenets of Christianity is a capitalistic free market system. This premise does not hold up to scrutiny either as Christianity has flourished under a variety of economic systems.

Before we go any further, a simple definition of capitalism is needed. Capitalism is an economic system in which the means of production and distribution are privately or corporately owned, and development is proportionate to the accumulation and reinvestment of profits gained in a free market.^[11] In other words, private individuals own the resources and make decisions on how to use those resources based on an expectation of return. The genius of capitalism is that individuals or corporations who can provide valuable services better or more efficiently are rewarded with more resources. So, resources tend to be allocated to those who are most capable of using them to produce desired goods and services.

However, one can approach capitalism from either a secular or a faith perspective. In secular capitalism:

- the purpose for business is to return a profit,
- the standard of conduct is the rule of law, and
- the measure of success is accumulation of wealth.

Under a Christian view of capitalism:

- the purpose for business is to honor God,
- the standard of conduct is the Golden Rule, and
- the measure of success is the ability to bless others with the resources God has entrusted to us.

A secular capitalist is accountable only to himself and his shareholders. A Christian business person is accountable to God with a responsibility to all of the stakeholders in the business, including customers and employees.

Capitalism is not essentially Christian, but, as Max Weber

pointed out in his classic book, *The Protestant Ethic and the Spirit of Capitalism*, [\[12\]](#) Christianity is good for capitalism in many ways including:

- An excellent work ethic motivated by Paul's admonition in Colossians to "work with sincerity of heart as unto the Lord." Our work results reflect on our Savior, so we are motivated to excellence.
- A willingness to put integrity above profits and to forego investing in businesses which degrade or take advantage of others. As Proverbs 28 says, "Better is the poor who walks in his integrity than he who is crooked though he be rich. . . . He who increases his wealth by interest and usury gathers it for him who is gracious to the poor" (vv. 6,8). Integrity reduces the "greed tax" which is all of the effort wasted on monitoring others to prevent theft.
- A long term perspective that is willing to forgo near term gratification for long term benefits such as investing in hospitals and schools.

Counter to the view of Michael Douglass' character in the movie *Wall Street*, greed is not good. Greed is not what makes capitalism successful. Trusting resources to those who are productive and want to do something of significance is the key to long term economic success!

Called to the Marketplace

What is the role of Christians in the marketplace?

Over the centuries, Christians have had varying responses to the secular marketplace. Some, like the Amish, attempt to isolate themselves from the corrupting influence of the secular world. Others, like the Puritans, believed that excelling in the marketplace was a critical part of the Christian life as evidence of one's election. In recent years

the trend has been for Christians to segregate their spiritual church life from their secular work life. This attitude allows many to believe they can conform to the compromised values of our culture without impacting the spiritual aspects of their life. However, since God's truth is the truth in all aspects of our lives, this attitude could not be truth.

What does the New Testament have to say on this subject? Out of twenty-two letters to churches, not one advised Christians to quit working in or participating in the Roman economic system. None of these letters encouraged all Christians to leave their secular vocation and immediately leave for the mission field. The overall picture is that some people are given as gifts to the church, devoting their energies to equipping the church for ministry. But the majority of us are called to be ministers in our vocation (whether that vocation is as a business leader, a laborer or a stay-at-home mother). As Christians, we are called to be a redeeming influence in the place where non-Christians can be found, the marketplace.

As we enter the business world, we should be clear as to our purpose. I don't think that it is to prove our salvation by getting the most promotions. Four clear biblical purposes for Christians in the work place are:

1. To honor Christ through my attitude, performance and integrity (Col 3:22-25). In my career, whenever I was asked to state my career objectives, I would focus on Colossians 3 for my answer. I would tell them that since I was called to "work heartily as unto the Lord" and to serve with "sincerity of heart", my career objective is to fulfill the role that creates the most value for my employer. That statement was not only true, but was also warmly received by my supervisor.

2. To share Christ in my unique mission field. We interact with more non-Christians in the business world than just about any other venue (Col. 4:5-6).

3. To provide for the physical needs of your family (1 Tim. 5:8).
4. To be able to share with others who need help (2 Cor. 8:12-14).

Jesus summed it up for us when He said, "Let your light shine before men in such a way that they may see your good works, and glorify your Father who is in heaven" (Matt. 5:16).

Compelling Results

Let's conclude by considering the characteristics of a just business and looking at some measures of success.

Whether for the individual or for a corporation, Christian behavior is going to be characterized by the Golden Rule taught by our Lord: "Treat others the way that you want them to treat you" (Luke 6:31). This means that we are not going to deceive, covet, or steal in our business dealings. We are going to treat others with respect and with grace. We are going to choose integrity over convenience or profit.

Since we all like to win, does the Golden Rule mean that I should always let my competitors win? Should I just turn over the market to them? I don't know about you, but I absolutely hate it when someone lets me win. Everyone loses if we allow inferior or more costly products to claim the market because no one wants to compete with the status quo (think about the fall of the Soviet Union when you consider this topic). Competition promotes better products and greater productivity which creates more resources and opportunities even for your competitors. The problem arises not from having a competitive system, but from greed causing some to hoard wealth. So, a Christian business will compete aggressively but fairly. They will also realize not to compete by destroying the lives of employees through long hours, poor working conditions, or unfair wages.

Won't a company or individual applying these principles put themselves at a disadvantage? After all, when swimming with sharks, a guppy will always get eaten. In his book *Profit at Any Cost*,^{13} Jerry Fleming analyzed the results of corporations who appeared to place a premium on a high standard of ethical behavior. He discovered that these businesses typically induce others to behave ethically toward them. There is also a strong correlation between a firm's commitment to ethics and a lower employee turnover. Typically, a lower turnover rate results in greater productivity from experienced, content employees. At the bottom line, he found a significant positive correlation between a firm's ethical behavior and its economic performance. Companies promoting unethical practices pay a price in the long run (think Enron). An investment in ethically responsible firms has resulted in a return eight times better than the return on the Dow Jones Industrial Average over a period of thirty years.

What conclusions can we draw from our study of Christian principles in the workplace? Applying Christian principles to business is not:

- a magic shield against failure, or
- a way to always avoid criticism, or
- an assurance that your product will be the best on the market.

But, it is:

- a part of our calling to follow Christ,
- the best way to conduct business, and
- a consistent companion of long term success.

No matter the financial results, we are a success when we follow Christ's example in the work place.

The Development of Modern Culture – Critical Role of Christianity Downplayed

Steve Cable explodes 5 myths about history, showing Christianity's true critical role in the progress and development of culture.

Is our history really what you have been taught in school? For at least the last five decades in schools across this nation, most of us have digested a similar litany of facts about the development of the Western world. Among these commonly accepted facts are these five:

1. The Roman Empire introduced and maintained a period of relative peace in which innovation and free thought could flourish.
2. The Dark Ages, coming after the fall of the Roman Empire, was a period of over 500 years during which the European world languished in feudalism and ignorance.
3. The Protestant Reformation, fueled by the invention of the printing press, introduced a new era of religious freedom.
4. The Scientific Revolution was the result of Europe casting aside religious “superstitions” during the so-called Enlightenment.
5. Protestant missionaries were a negative, colonizing influence on the non-Western world.

In his recent book, entitled *How the West Won: The Neglected Story of the Triumph of Modernity*, Rodney Stark, Distinguished Professor of the Social Sciences at Baylor University, questions these “historical facts” from our childhood along with many others. His premise, based on the current state of historical data and analysis, is that the conventional wisdom about the history of the western world was tainted by the prejudices and lack of knowledge of the early historical writers. His view is backed up by the research and writings of many contemporary scholars. He clearly points out that what is taught in our schools lags far behind the common knowledge held by top researchers in the field. It is interesting to note that this phenomenon is very similar to the difference between high school textbooks on the evolution of man and the current state of research into the origins of life.

Stark concludes that contrary to the conventional wisdom of high school textbooks, the worldview that developed as a result of following after the God revealed in Christian scripture was critical to the advent of our modern age. Only a society steeped in the message of an all-powerful, loving, creator of this universe was postured to take on the scientific and societal endeavors which are crucial to our society today. According to Stark, our modern world is not the result of key people freeing themselves from the chains of religious intolerance to pursue knowledge and truth, but rather the result of people seeking to better understand this universe created out of nothing into an orderly something by our Lord and God.

In the remainder of this article, we will look at these five key concepts of our history still taught to our students today and see how contemporary research has significantly modified

or completely discredited them.

The Impact of Greece, Judaism, and Rome

Apart from periods of Jewish history, most of the world before 600 B.C. was controlled by systems of government that awarded the elite few at the expense of the rest of society. In China, India and Egypt societies had this common theme: "Wealth is subject to devastating taxes and the constant threat of usurpation; the challenge is to keep one's wealth, not to make it productive."[{1}](#) Their rulers strived to make it so. Stark pointed this out: "As Ricardo Caminos put it about the ancient Egyptians, 'Peasant families always wavered between abject poverty and utter destitution.' If the elite seizes all production above the minimum needed for survival, people have no motivation to produce more."[{2}](#)

Beginning around 600 B.C., the Greek city-states prior to the reigns of Phillip of Macedonia and his son, Alexander the Great, were the first to offer a different economic model on a large scale. "The major benefit of Greek democracy was sufficient freedom so that individuals could benefit from innovations making them more productive, with the collective result of economic progress."[{3}](#) This unprecedented freedom was partly the result of Greece having an unfavorable geography with an abundance of mountains, no abundance of natural resources, and no large navigable river. This geography helped to promote the large number of small, independent city states. "Thus, having an unfavorable geography contributed to the greatness of Greece, for disunity and competition were fundamental to everything else."[{4}](#) Once Greece was under the rule of the Macedonians and later the Romans, the scale of innovation in the areas of democracy, economic progress, the arts, and technology slowed dramatically.

Unlike other peoples near the cities of Greece, the Jews were greatly impacted by the Greek philosophers. Why? The God the

Jews worshipped was “conscious, concerned and rational”[\[5\]](#) and as such the Jewish theologians were committed to reasoning about God from the things God revealed through Scripture. At this time the vast majority of Jews lived in the Diaspora outside of Palestine. And so, like the Apostle Paul, these Jews were exposed to Greek thought filtered through their understanding of Scripture.

Of course, the early Christians accepted this view of God but also added the idea that our knowledge of God and of his creation is progressive.[\[6\]](#) Understand that our early Christian fathers did not wholeheartedly embrace Greek ideas, choosing to show how Christian doctrines were much more rational. But they did embrace the ideas of reason and logic which were behind Greek philosophy. This train of thought by our Christian fathers set the stage for the development and advances of science. As Stark notes, “The truth is that science arose only because the doctrine of the rational creator of a rational universe made scientific inquiry plausible.”[\[7\]](#)

The rule of the Roman Empire provided centuries of relative peace and free travel throughout the Mediterranean area. This *pax Romana* facilitated the spread of Christianity across the Mediterranean world and thus played an important role in the growth of Christianity. However, Stark suggests that “the Roman Empire as at best a pause in the rise of the West, and more plausibly a setback.”[\[8\]](#)

Most of us probably view the Roman Empire as an expanded version of the great age of Greece where advancements were common in philosophy, commerce and technology. Stark points out that as a large, centrally controlled empire, Rome had plenty of labor and a large distance between the privileged few and the laboring masses. Consequently, the art and literature of the Roman period was fundamentally Greek. There were very few technological innovations developed during this period. In fact, “the Romans made little or no use of some

known technologies, e.g. water power.”{9} They preferred to use manual labor rather than employ labor saving devices.

Stark suggests that two events during the period of Roman control were important to the development of our modern culture: the Christianization of the empire and the fall of Rome. “It was Rome that fell, not civilization. . . the millions of residents of the former empire did not suddenly forget everything they knew. To the contrary, with the stultifying effects of Roman repression now ended, the glorious journey toward modernity resumed.”{10}

The Not-So-Dark Ages

My understanding of the Dark Ages as a student from the 1970’s is probably similar to yours. It was pictured as a time in which European culture took a step backward from the advances of the Roman Empire and made little or no progress in advancing culture, economics, philosophy, or technology. It was a time characterized by wars and the stultifying oppression of the Catholic Church. Many historians of the past wrote that the fall of Rome cast Europe into this dismal age, aided by Christianity which celebrated poverty and urged contentment.

Stark, along with most modern historians, take a far different view of this period of Western history. Stark puts it this way: “The fall of Rome was, in fact, the most beneficial event in the rise of Western civilization, precisely because it unleashed creative competition among the hundreds of independent political units, which, in turn resulted in rapid and profound progress.”{11}

In this culture of independent political units, trade developed and expanded rapidly, the average person ate better and grew larger than in the past because the people could now put to personal use the wealth Rome had previously squeezed from them. “Perhaps the most remarkable aspect of the Dark

Ages myth is that it was imposed on what was actually 'one of the great innovative eras of mankind.'" {12} During this period technology was developed and put into use "on a scale no civilization had previously known." {13}

One of the strongest influences during this period came from the Scandinavians, the Vikings. "The Viking merchants traveled a complex network of trade routes extending as far as Persia. . . (The) Vikings had excellent arms, remarkable ships, and superb navigational skills . . . Their boats were far superior to anything found elsewhere on earth at that time." {14} Our history lessons, however, placed an emphasis on great empires rather than movements impacting our way of life. "Not only have they continued to regret the fall of Rome, but they remember Charlemagne as the man who almost 'saved' Europe. In fact, the Scandinavians were as civilized as the Franks, while William the Conqueror was certainly as able as Charlemagne, and considerably more tolerant." {15}

One of the major events during this period was the rise of capitalism as an economic driver. Capitalism can only exist in societies with free markets, secure property rights and the right of individuals to work where they wish. The Christian West, out from under the yoke of the Roman Empire, was the only society where this move was possible. As Stark explains, "Of the major world faiths, only Judaism and Christianity have devoted serious and sustained attention to human rights, as opposed to human duties. Put another way, the other great faiths minimize individualism and stress collective obligations. They are . . . cultures of shame rather than cultures of guilt. There is not even a word for freedom in the languages in which their scriptures are written." {16} Counter to the position of earlier historians who put the advent of capitalism much later in history, capitalism not only thrived during this period but had been fully debated by theologians who on the whole gave it general approval.

You may remember being taught that during these Dark Ages that

Islamic scholarship and technological innovation kept society moving forward in the areas of science and technology. In fact, Stark points out, "The 'Golden Era' of Islamic science and learning is a myth. Some Muslim-occupied societies gave the appearance of sophistication only because of the culture sustained by their subject peoples – Jews and various brands of Christianity."[{17}](#) In fact when they later cleansed their society of these other people, they soon fell back into a state where any technology was bought from the West and in many cases had to be operated by Westerners. One area where this was revealed on multiple occasions was in the area of military strategy and technology. In numerous battles between A.D. 1200 and 1600, Western forces on land and on the oceans typically inflicted casualties upon their Muslim foes at a rate ranging from 10 to 1,000 Muslim casualties for every casualty among the Western forces.

"Despite the record of Muslim failure against Western military forces, far too many recent Western historians promulgate politically correct illusions about Islamic might, as well as spurious claims that once upon a time Islamic science and technology were far superior to that of a backward and intolerant Europe."[{18}](#)

"In 1148 all Christians and Jews were ordered to convert to Islam or leave Moorish Spain immediately, on pain of death. . . . And as (they) disappeared, they took the "advanced" Muslim culture with them. What they left behind was a culture so backward that it couldn't even copy Western technology but had to buy it and often even had to hire Westerners to use it."[{19}](#)

What we had been taught were Dark Ages of no progress were actually a period of great progress in the development of individual freedom and the concept of capitalism.

The Reformation and Religious Freedom

Martin Luther, the catalytic figure of the Reformation, asserted that salvation is God's gift, freely given, and gained entirely by faith in Jesus as the redeemer. Each person must establish his or her own personal relationship with God. This new emphasis on individual freedom and responsibility was certainly consistent with the key aspects of Western modernity. But the way these ideas played out in society were a different matter.

The popular view promulgated by English and German historians was that the Protestant Reformation, which roughly occurred between A.D. 1515 and 1685, was facilitated by the printing press and the spread of literacy, resulting in a "remarkable revival of popular piety and the spread of religious liberty." You were probably taught that this new view of piety, placing the responsibility of a relationship with God squarely on the shoulders of the individual rather than on the intervening work of the Church, created a new environment of religious tolerance and personal piety. This environment was invigorating to the concepts of scientific and economic progress. However, the real situation was far different from this idealistic view promulgated by English and German historians. Far from introducing religious liberty to the masses, the Protestant Reformation was more about switching one monopoly religion for another.

Stark points out three ways in which earlier historians and sociologists have misrepresented what went on in the spread of the Protestant Reformation. These historians and probably your high school history textbook, taught the following about the Reformation:

1. The Reformation introduced an era of religious freedom in Europe
2. The Reformation was able to spread rapidly because of the

newly invented printing press

3. The Reformation's spread was partially a result of its attractiveness to the common man.

On the first point, rather than introducing an era of religious freedom, the Reformation produced competing monopoly religions. Depending upon the area in which one lived, the pressure to conform to the religion adopted by that region was immense. So what determined whether your region would be Catholic or Protestant? If the area's current Catholic hierarchy was not operating under the rule of local rulers or councils, the rulers were very likely to convert to a Protestant view, thereby removing the influence of the Catholic Church in their domain. Importantly, it allowed them to loot church property in the name of religion. As Stark point out, "It is all well and good to note the widespread appeal of the doctrine that we are saved by faith alone, but it also must be recognized that Protestantism prevailed only where the local rulers or councils had not already imposed their rule over the Church. Pocketbook issues prevailed." [\[20\]](#)

Was it the printing press that allowed the Reformation to spread rapidly? If so, one would expect that cities with printing presses producing Luther's pamphlets and his Bible, would be most likely to align with Protestantism. Yet what we find is a negative correlation between towns with printers who had published Luther's Bible and those towns which had converted to Protestantism. The printing press was certainly a factor in spreading Luther's theology, but if it was the dominant factor we should see a strongly positive correlation, not a negative one. "Indeed, assessments of the impact of printed materials on the success of the Lutheran Reformation too often overlook a critical factor: no more than five percent of Germans in this era could read." [\[21\]](#)

Finally, a widely held belief is that the Lutheran Reformation touched the hearts of the masses, resulting in a huge revival

in personal faith and piety. However, most people were not personally impacted by the theological arguments between Catholicism and Protestantism. The common man in Germany at that time was, at best, semi-Christian. As Stark points out, "Eventually even Martin Luther admitted that neither the tidal wave of publications nor all the Lutheran preachers in Germany had made the slightest dent in the ignorance, irreverence, and alienation of the masses. Luther complained in 1529, "Dear God, help us! . . . The common man, especially in the villages, knows absolutely nothing about Christian doctrine; and indeed many pastors are in effect unfit and incompetent to teach. Yet they all are called Christians, are baptized, and enjoy the holy sacraments – even though they cannot recite either the Lord's Prayer, the Creed or the Commandments. They live just like animals."

The Scientific Revolution and Christianity

The term "Scientific Revolution" was coined, referring to the period in the sixteenth and seventeenth century beginning with Copernicus and ending with Newton, when the rate of scientific advancement was thought to have increased dramatically. However, modern historians say that no such revolution occurred, although the role of science definitely matured during that period of time. Many of us remember being taught three aspects of this so-called revolution that we want to consider:

1. Most key scientific contributors had freed themselves from the rigid dogmas of faith.
2. The Protestant Reformation had freed society from "the dead hand of the Catholic Church," thereby making real scientific thinking possible.
3. Real science could not occur in universities controlled by the churches.

However, Rodney Stark points out that current evidence indicates that all of these claims are false, stating, "Indeed, Christianity was essential to the rise of science, which is why science was a purely Western phenomenon." [\[22\]](#)

Of the 52 most prominent contributors to scientific advancement during this period, we find that 60% of them were devout believers in Christianity. Only one of them was a skeptic toward the message of Christianity. And the rest were classified as conventionally religious. So, the idea promoted by contemporary philosophers that scientific advancement was the result of freeing themselves from belief in the dogmas of the faith could not be further from the truth.

Of these 52 leaders of the scientific community, 26 were Protestant and 26 were Catholic. This equal distribution belies the common wisdom that the Protestant revolution allowed real scientific thinking to begin to take root. It appears that prior advances in scientific thought had prepared the minds of these individuals to advance the frontiers even further, regardless of whether they were Protestant or Catholic. Both faiths believed in God as the Intelligent Designer of a rational universe, and a rational universe was one that could be understood through the application of the scientific method.

As noted earlier, most modern historians sided with the statement, "Not only were the universities of Europe not the foci of scientific activity . . . but the universities were the principal centers of opposition for the new conceptions of nature which modern science constructed." [\[23\]](#) Actually, 92% of these leaders in scientific research spent an extended period of time of ten years or more in the universities. Nearly half of them served as university professors during their careers. In fact, the distinguished historian of science Edward Grant stated, "The medieval university laid far greater emphasis on science than does its modern counterpart." [\[24\]](#)

Stark wrote, "Science only arose in Christian Europe because only medieval Europeans believed that science was possible and desirable. And the basis of their belief was their image of God and his creation."[{25}](#) As the distinguished mathematician and scientist, Johannes Kepler stated, "The chief aim of all investigations of the external world should be to discover the rational order and harmony imposed on it by God and which he revealed to us in the language of mathematics."[{26}](#) Thus, the so-called scientific revolution occurred not in spite of Christianity but rather directly because a Christian worldview beckoned them to study the nature of our world more closely.

Protestant Missionaries and the Rise of Western Democracies

Protestant missionaries are often portrayed as the villains of imperialistic expansion. They have often been portrayed as having a greater interest in converting their charges to Western culture than introducing them to eternal life through Jesus Christ. However, their personal and public publications do not support this negative view. On the contrary, "Missionaries undertook many aggressive actions to defend local peoples against undue exploitation by colonial officials."[{27}](#)

Beyond correcting this distorted view of missionary purpose, modern historians have discovered an interesting impact. A recent study has shown that the rise and spread of stable democracies in the non-Western world can be attributed primarily to the impact of Protestant missionaries. According to a study by sociologist Robert Woodberry,[{28}](#) the impact of these missionaries far exceeds that of fifty other control variables such as gross domestic product and whether or not a nation was a British colony. One would think that having a healthy amount of production per individual would be one of the biggest factors leading to a stable democratic government. But the data shows that it has been much more important to

have the teaching and leadership development provided by Protestant missionaries.

In addition, the greater number of Protestant missionaries per capita in a nation in 1923, the lower that nation's infant-mortality rate in 2000. In this case, the effect of having Protestant missionaries was more than nine times as large as the effect of current GDP per capita. In other words, having a history of Protestant missionaries is much more important than having a large amount of money in determining a low infant-mortality rate.

Conclusion

Many of us have been given the impression by educators that the scientific, governmental, and societal advances we enjoy are the result of enlightened people taking off their religious blinders and thinking more clearly about these topics. Sociologist Rodney Stark presents compelling data, arguing that in fact it was the unique worldview of Christianity that created societies in which new ideas could foment and flourish. This Christian worldview was fundamental to the advances in economics, science and government common in our current world. Understanding the worldview that fueled the advances making up our modern world is important if we are to continue to move ahead responsibly.
