

The Liberal Mind

Kerby Anderson tries to understand the liberal mind from a biblical perspective. What are the assumptions the liberals make? How do those assumptions square with the Bible?

As we begin this discussion, I want to make a clear distinction between the terms “liberal” and “leftist.” We often use the terms interchangeably but there is an important difference.

Dennis Prager wrote about this and even described those differences in a PragerU video.[\[1\]](#) His argument is that traditional liberalism has far more in common with conservatism than it does with leftism. Here are some examples he uses to make his point.

Liberals and leftists have a different view of race. The traditional liberal position on race is that the color of one’s skin is insignificant. By contrast, leftists argue that the notion that race is insignificant is itself racist. Liberals were committed to racial integration and would have rejected the idea of separate black dormitories and separate black graduations on university campuses.

Nationalism is another difference. Dennis Prager says that liberals always deeply believed in the nation-state. Leftists, on the other hand, oppose nationalism and promote class solidarity.

Superman comics illustrate the point. When the writers of Superman were liberal, Superman was not only an American but also one who fought for “Truth, justice, and the American

way.” The left-wing writers of Superman comics had Superman announce a few years ago that he was going to speak before the United Nations and inform them that he was renouncing his American citizenship.

Perhaps the best example is free speech. American liberals agree with the statement: “I disapprove of what you say, but I will defend your right to say it.” Leftists today are leading a nationwide suppression of free speech everywhere from the college campuses to the Big Tech companies.

Capitalism and the free enterprise system would be yet another example. Dennis Prager says, “Liberals have always been pro capitalism,” though they often wanted government “to play a bigger role” in the economy. Leftists oppose capitalism and are eagerly promoting socialism.

Liberals have had a love of Western civilization and taught it at most universities. They were promoters of the liberal arts and fine arts. In fact, one of the most revered liberals in American history was President Franklin Roosevelt who talked about the need to protect Western Civilization and even Christian civilization.

Today Western Civilization classes are rarely if ever taught in the university. That’s because leftists don’t believe Western Civilization is superior to any other civilization. Leftists label people who attempt to defend western values as racist and accuse them of promoting white supremacy. And attempts to promote religious liberty are dismissed as thinly disguised attacks on the LGBT community.

In conclusion, liberals and leftists are very different.

Ethics and a Belief in Right and Wrong

The philosophical foundation for most liberal perspectives is secularism. If you don’t believe in God and the Bible, then

you certainly don't believe in biblical absolutes or even moral absolutes. Dostoyevsky put it this way: "If God is dead, then everything is permitted."

Even atheists admit that a view of God affects human behavior. Richard Dawkins recently expressed his fear that the removal of religion would be a bad idea for society because it would give people "license to do really bad things."

He likens the idea of God to surveillance, or as he puts it, the "divine spy camera in the sky."[{2}](#) People generally tend to do the right thing when someone is watching them. They tend to do bad things when no one is watching. He goes on to add that the "Great Spy Camera theory" isn't a good reason for him to believe in God.

It is also worth mentioning that more and more young people aren't making decisions about right and wrong based on logic but instead based on feelings. I began to notice this decades ago. College students making a statement or challenging a conclusion used to say "I think" as they started a sentence." Then I started to see more and more of them say "I feel" at the start of a sentence. They wouldn't use reason to discuss an issue. Instead, they would use emotion and talk about how they felt about a particular issue.

The liberal mind also has a very different foundation for discussing right and wrong. Dennis Prager recently admitted that he had been wrong. All of his life, he has said that the left's moral compass is broken. But he has concluded that "in order to have a broken moral compass, you need to have a moral compass to begin with. But the left doesn't have one."[{3}](#)

He doesn't mean that conclusion as an attack. It is merely an observation that the left doesn't really think in terms of good and evil. We assume that other people think that way because we think that way. But that is not how most of the people on the left perceive the world.

Karl Marx is a good example. He divided the world by economic class (the worker and the owner). One group was exploiting the other group. Good and evil aren't really relevant when you are thinking in terms of class struggle. Friedrich Nietzsche, for example, operated "beyond good and evil."

To the Marxists, "there is no such thing as a universal good or universal evil." Those of us who perceive the world from a Judeo-Christian worldview see ethics as relevant to the moral standard, not the person or their social status.

A biblical view of ethics and morality begins with the reality that God exists and that He has revealed to us moral principles we are to apply to our lives and society. Those absolute moral principles are tied to God's character and thus unchanging.

A Naïve View of Human Nature

In this article we are talking about the liberal mind, while often making a distinction between liberals and the left. When it comes to the proper view of human nature, both groups have a naïve and inaccurate view.

You can discover this for yourself by asking a simple question: Do you believe people are basically good? You will get an affirmative answer from most people in America because we live in a civilized society. We don't have to deal with the level of corruption or terror that is a daily life in so many other countries in the world.

But if you press the question, you will begin to see how liberals have difficulty explaining the holocaust and Muslim terrorism. Because the liberal mind starts with the assumption that people are basically good. After all, that is what so many secular philosophers and psychologists have been saying for centuries. Two world wars and other wars during the 20th century should have caused most people to reject the idea that

people are basically good.

The Bible teaches just the opposite. Romans 3:23 reminds us that “all have sinned and fall short of the glory of God.” Jeremiah 17:9 says, “The heart is deceitful above all things, and desperately sick; who can understand it?” This statement about the deceitfulness of our heart may seem extreme until we realize that Jesus also taught that “out of the heart come evil thoughts, murder, adultery, sexual immorality, theft, false witness, slander” (Matthew 15:19).

This naïve view of human nature should concern all of us. Young people, two generations after Auschwitz, believe people are basically good. One reason is biblical illiteracy. Another reason is historical illiteracy. A recent survey found two thirds of young people did not know six million died in the Holocaust and nearly half could not name one of the Nazi death camps.[{4}](#)

This naïve view of human nature may also explain another phenomenon we have discussed before. One of the untruths described in the book, *The Coddling of the American Mind*, is the belief that the battle for truth is “us versus them.”[{5}](#) If you think that people are basically good and you have to confront someone who disagrees with you, then they must be a bad person. They aren't just wrong. They are evil.

Tribalism has been with us for centuries. That is nothing new about people joining and defending a tribe. But that has become more intense because of the rhetoric on university campuses and the comments spreading through social media. We don't have to live this way, but the forces in society are making the divisions in society worse by the day.

A biblical perspective starts with the teaching that all are created in God's image (Genesis 1:27) and thus have value and dignity. But all of us have a sin nature (Romans 5:12). We should interact with others who disagree with us with humility

(Ephesians 4:2) and grace (Colossians 4:6).

Big Government

We will now look at why liberals and the left promote big government. The simple answer relates to our discussion above about human nature. If you believe that people are basically good, then it is easy to assume that political leaders and bureaucrats will want to do the best for the citizens.

Christians agree that government is necessary and that it is one of the institutions ordained by God (Romans 13:1-7). There is a role for government to set the rules of governing and to resolve internal disputes through a legal system. Government is not God. But for people who don't believe in God, then the state often becomes God.

Friedrich Hayek wrote about this drive toward big government and the bureaucratic state in his classic book, [*The Road to Serfdom*](#). He argued in his book that "the most important change which extensive government control produces is a psychological change, an alteration in the character of the people."[\[6\]](#)

The character of citizens is changed because they yield their will and decision-making to a more powerful government. They may have done so willingly in order to have a welfare state. Or they may have done so unwillingly because a dictator has taken control of the reins of power. Either way, Hayek argues, their character has been altered because the control over every detail of economic life is ultimately control of life itself.

Friedrich Hayek wrote *The Road to Serfdom* to warn us that sometimes the road can be paved with good intentions. Most government officials and bureaucrats write laws, rules, and regulations with every good intention. They desire to make the world a better place by preventing catastrophe and by encouraging positive actions from their citizens. But in their

desire to control and direct every aspect of life, they take us down the road to serfdom.

He argued that people who enter into government and run powerful bureaucracies are often people who enjoy running not only the bureaucracy but also the lives of its citizens. In making uniform rules from a distance, they deprive the local communities of the freedom to apply their own knowledge and wisdom to their unique situations. A government seeking to be a benevolent god, usually morphs into a malevolent tyrant.

The liberal mind is all too willing to allow political leaders and bureaucrats to make decisions for the public. But that willingness is based on two flawed assumptions. First, human beings are not God and thus government leaders will certainly make flawed decisions that negatively affect the affairs of its citizens. Second, liberals do not believe we have a sin nature (Romans 3:23), and that includes government leaders. Even the best of them will not always be wise, compassionate, and altruistic. This is why the founders of this country established checks and balances in government to limit the impact of sinful behavior.

Tolerance?

If there is one attitude that you would think would be synonymous with the liberal mind, it would be [tolerance](#). That may have been true in the past. Liberalism championed the idea of free thought and free speech. That is no longer the case.

Liberals have been developing a zero-tolerance culture. In some ways, that has been a positive change. We no longer tolerate racism. We no longer tolerate sexism. Certain statements, certain jokes, and certain attitudes have been deemed off-limits.

The problem is that the politically correct culture of the left moved the lines quickly to begin to attack just about any

view or value contrary to the liberal mind. Stray at all from the accepted limits of leftist thinking and you will earn labels like racist, sexist, homophobic, xenophobic.

Quickly the zero-tolerance culture became the cancel culture. It is not enough to merely label an opponent with a smear, the left demands that an "enemy" lose their social standing and even their job and livelihood for deviating from what is acceptable thought. A mendacious social media mob will make sure that you pay a heavy penalty for contradicting the fundamental truths of the liberal mind.

One phenomenon that promotes this intolerance is the use of smears and negative labels. For example, patriotism and pride in your country is called xenophobia. Acknowledging the innate differences between males and females is labelled sexist. Promoting the idea that we are all of one race (the human race) and that all lives matter is called racist. Questioning whether we should redefine traditional marriage is deemed homophobic. Arguing that very young children should not undergo sex assignment surgery is called transphobia. Pointing out that most terrorist attacks come from Muslim terrorists is labelled Islamophobic.

Should Christians be [tolerant](#)? The answer is yes, we should be tolerant, but that word has been redefined in society to argue that we should accept every person's behavior. The Bible does not permit that. That is why I like to use the word [civility](#). Essentially, that is the Golden Rule: "Do to others whatever you would have them do to you" (Matthew 7:12).

Civility requires humility. A civil person acknowledges that he or she does not possess all wisdom and knowledge. That means we should listen to others and consider the possibility that they might be right, and we could be wrong. Philippians 2:3 says, "Do nothing from selfishness or empty conceit, but with humility of mind let each of you regard one another as more important than himself." We can disagree with other

without being disagreeable. Proverbs 15:1 reminds us that “A gentle answer turns away wrath.”

This is an important principle as we try to understand the liberal mind and work to build bridges to others in our society.

Abortion: A Biblical View

Sue Bohlin calls for a spiritual and moral reflection on the topic of abortion, urging people to consider the eternal implications and affirming that God's love, grace, and forgiveness extend even to those who have committed this sin.

An earlier version of this article is also available in [Spanish](#).

Abortion as Spiritual Warfare

Abortion continues to be a volatile issue, and an emotional one, in the United States. It is usually seen as a political issue, but I think it's way bigger than that.

I believe we need to see abortion as spiritual warfare.

We live in two dimensions at the same time: the physical world that we can see and touch and measure, and the unseen spiritual realm that is filled with God, angels and demons (2 Corinthians 4:17-18). Jesus revealed to us that Satan is the thief who “comes only to steal and kill and destroy” (John 10:10); abortion is one of the most wicked, heinous ways he inflicts pain and destruction on people God loves.

He steals joy and peace from women who have had abortions, as well as some of the fathers of the babies who were killed in the womb. He steals babies from what should be the safest place on earth. He steals motherhood from women and fatherhood from men. Through abortion, he steals grandchildren from grandparents.

Satan uses abortion to kill. Just in the United States, since

Roe v. Wade made abortion legal, over 64 million babies have been murdered.[{1}](#) In China, the horrible one-child policy that terrorized the Chinese people for 35 years resulted in 350 million baby deaths.[{2}](#)

Satan uses abortion to destroy. Willingly choosing abortion for a pregnant teenager has been Satan's foothold in many families that were torn apart, a phenomenon I have seen with my own eyes. Abortion—and its evil twin infanticide—destroyed the natural ratio of boys to girls in China. Today, there are 30 million young men who cannot find a girl to marry because there aren't enough to go around.[{3}](#)

The rallying cry of abortion is, "It's my body"—even though there is another human being's body involved as well. Theologian Dr. Peter Kreeft's insight is breathtaking to me: "Abortion is the Antichrist's demonic parody of the Eucharist. That is why it uses the same holy words, 'This is my body,' with the blasphemously opposite meaning."[{4}](#)

Abortion is an evil weapon in the hands of an unspeakably evil enemy. In Genesis 3, Satan declared war on the people God created and loves, and he has been warring with us ever since. The Lord Jesus triumphed over this defeated foe at the cross, but He allows battles to continue on this side of eternity to strengthen us and help us learn to depend on Him and grow stronger in our faith. In this article we'll be talking about the spiritual battlefield of abortion, but please remember that not only does Jesus win in the end, He has provided us with spiritual armor that starts with TRUTH. Let's go there now.

The Bible's View of the Unborn

Pro-choice advocates don't like the use of the word "murder." Many of them maintain that no one really knows when human life begins, and they choose to believe that the idea of personhood at conception is a religious tenet and therefore not valid.

But it *is* a human life that is formed at conception. The zygote contains 46 chromosomes, half contributed by each parent, in a unique configuration that has never existed before and never will again. It is not plant life or animal life, nor is it mere tissue like a tumor. From the moment of conception, the new life is genetically different from his or her mother, and is not a part of her body like her tonsils or appendix. This new human being is a separate individual living inside the mother. Rather like an astronaut being protected and kept alive in space.

The Bible doesn't specifically address the subject of abortion, probably since it is covered in the commandment, "Thou shalt not murder." (Exodus 20:13) But it does give us insight into God's view of the unborn. In the Old Testament, the Hebrew word for the unborn (*yeled*) is the same word used for young children. The Hebrew language did not have or need a separate word for pre-born babies. All children were children regardless of whether they lived inside or outside the womb. In the New Testament, the same word is used to describe the unborn John the Baptist and the already-born baby Jesus. The process of birth just doesn't make any difference concerning a baby's worth or status in the Bible.

We are given some wonderful insights into God's intimate involvement in the development and life of the pre-born infant in Psalm 139:13-16:

For you created my inmost being;
you knit me together in my mother's womb.
I praise you because I am fearfully
and wonderfully made;
your works are wonderful, I know that full well.
My frame was not hidden from you
when I was made in the secret place.
When I was woven together in the depths of the earth,
your eyes saw my unformed body.
All the days ordained for me

were written in your book before one of them came to be.

All people, regardless of the circumstances of their conception, or whether they are healthy or handicapped, are God's image bearers who have been personally knit together by His fingers. He has planned out all the days of the unborn child's life before one of them has happened.

Chemical Abortion: "The Abortion Pill"

Chemical abortions now account for the majority of induced abortions in the U.S. [{5}](#)

Two drugs are used in tandem to end a pregnancy. The first pill, RU-46 or Mifepristone or Mifeprex (all the same drug), shuts down progesterone. That's the pregnancy hormone that the developing embryo or fetus needs to survive and thrive. Progesterone allows the mother's body to feed and nourish and oxygenate the baby. The first abortion pill blocks progesterone, so the baby dies. Then the next drug, Misoprostol or Cytotec, causes the uterus to contract and squeeze out the baby and other pregnancy tissue like the placenta. [{6}](#)

These drugs are very disruptive to the natural progress of growing a baby inside a womb. They are unfortunately quite effective up to seven weeks' gestation, and then their effectiveness drops off. By the time the baby is ten weeks along, for one in six women the drugs won't fully empty the uterus. Dangerous complications can set in, like:

- An infection caused by an incomplete or failed abortion where the fetus remains in the uterus
- An undetected ectopic pregnancy, which can be dangerous and is a medical emergency
- Blood clots remaining in the uterus
- Heavy bleeding

What is also scary is that chemical abortions are so easy to

obtain they are like over-the-counter medications. No doctor is needed to supervise. If a woman has an ectopic pregnancy, where the embryo grows in her Fallopian tube instead of her uterus, she's going to have awful pain and needs a sonogram to see where the baby is. Some of the deaths from Mifeprex abortions were from women that never had an ultrasound; they were given the drug and they had a pregnancy in their tube, and they died.

Thousands of women experience complications, called "adverse events" that require hospital intervention, but the FDA does not require adverse events to be reported unless someone dies. The abortion pill is being touted as being "safe as Tylenol," which is a life-threatening lie.[{7}](#) But then, abortion is spiritual warfare, and the enemy constantly lies and deceives us.

But there is good news! Many times, even while swallowing the abortion pills and immediately afterwards, women wrestle with regret for starting the regimen. There is a protocol called [Abortion Pill Reversal](#) where a doctor prescribes a dose of progesterone, the pregnancy hormone, to counteract what the mifepristone did. If started quickly enough within 72 hours of a woman taking mifepristone and before she takes the second drug, there is about a 70% chance of saving her child![{8}](#)
Thank You Lord!

Handicapped Children

What if prenatal tests reveal that a baby is going to be born sick or handicapped? There's no doubt about it, raising a handicapped child is painful and hard. Is it ever okay to abort a child whose life will be less than perfect?

We need to ask ourselves, does the child deserve to die because of his handicap or illness? Life is hard, both for the handicapped person and for her parents. But it is significant that no organization of parents of mentally retarded children

has ever endorsed abortion.

Some people honestly believe that it's better to abort a handicapped child than to let him experience the difficult life ahead. Dr. C. Everett Koop, former Surgeon General of the United States, has performed thousands of pediatric surgeries on handicapped children. He remarks that disability and unhappiness do not necessarily go together. Some of the unhappiest children he has known had full mental and physical faculties, and some of the happiest youngsters have borne very difficult burdens.^{9} Life is a lot harder for people with disabilities, but I can tell you personally that there is a precious side to it as well. [I have lived most of my life with a physical handicap](#), but it hasn't stopped me from experiencing a fierce joy from living life to the fullest of the abilities I *do* have. I can honestly rejoice in my broken body because it is that very brokenness and weakness that makes it easier for others to see the power and glory of my Lord in me, because His power is perfected in weakness.

Often, parents abort children with defects because they don't want to face the certain suffering and pain that comes with caring for a handicapped individual. By aborting the child, they believe they are aborting the trouble. But as we discussed earlier, there is no way to avoid the consequences of abortion: the need to grieve, the guilt, the anger, the depression.

What if a baby is going to die anyway, such as those with fatal genetic birth disorders? I think we need to look at the larger picture, one that includes God and His purposes for our lives. When a tragedy like this occurs, we can know that it is only happening because He has a reason behind it. God's will for us is not that we live easy lives, but that we be changed into the image of Jesus. He wants us to be holy, not comfortable. The pain of difficult circumstances is often His chosen method to grow godliness in us and in the lives of those touched by the tragedy of a child's handicap. When it is

a matter of life and death, as abortion is, it is not our place to avoid the pain.

My husband and I know what it is to bury a baby who only lived nine days. We saw God use this situation to draw people to Himself and to teach and strengthen and bless so many people beyond our immediate family. Despite the tremendous pain of that time, now that I have seen how God used it to glorify Himself, I would go through it again.

Not all abortions are performed as a matter of convenience. Some are performed in very hard cases, such as a handicapped child or as the result of rape or incest. But again, we need to back off and view abortion—for whatever reason—from an eternal perspective. God is the One who gives life, and only He has the right to take it away. Every person, born or unborn, is a precious soul made by God, in His image. Every life is an entrustment from God we need to celebrate and protect.

Post-Abortion Syndrome

Millions of women live with the emotional and physical aftershock of abortion. Although some do not seem to have been rocked by their choice, many many women live with deep guilt and shame and denial. Some live with the physical effects of the hormonal shock of suddenly ending the massive construction job of their body building another human being inside her womb. It's something like throwing a car into park when it was going full speed down the road.

Post-abortion syndrome or stress disorder is real for many women. The grief is real; the deep loss of the child is real. And many people need help facing the pain and getting through it. I asked a dear friend about her experience. It's been 48 years since her abortion. She wrote to me,

“Though the procedure was fairly easy, I knew the second it

was over that I had done the wrong thing. I left that clinic empty, guilty, and depressed. It was the start of a lifetime of sadness and regret. I told no one other than my husband and kept that secret for over 30 years. I suffered in silence. I knew then that I had made the choice to end a human life.

“When I became pregnant later, the sadness and guilt actually multiplied. When I could feel the baby inside me, the intense feelings of shame and guilt consumed me for ending my first child’s life. When my daughter was born and I held her for the first time and looked into her eyes, as happy as I was to have her, I also felt the worst pain I had ever felt because of what I had done 7 years earlier.”

Ending another’s life, whether freely chosen or being pressured into it, is capital-T Trauma. The woman is shaped and changed by this trauma, and I am so grateful for abortion recovery programs. They help women (and men, though there are far fewer programs for [Forgotten Fathers](#)) to experience grace and compassion as they confess their sin and receive forgiveness and cleansing from Jesus, *who died for their abortion*.

Abortion is a hard choice for which there are hard consequences. But God’s love and compassion and grace are bigger than all of it, and there is such good news in Romans 8:28—God is able to make all things work together for good for those who love Him and are called according to His purpose.

Gen-Z: The Generation That Ends Christian Influence in America?

In order to grow the number of Gen-Z Christians, we need an understanding of ways to build bridges from their pluralistic, secular worldview to seriously contemplating the unique grace of God. Steve Cable draws upon the wisdom of two pastors who are making a real difference in the lives of young adults to address this important topic.

What Are Gen-Zs Like?

In this article we look beyond the Millennials to consider the latest generation and what they tell us about the future of Evangelicals in America. Gen-Z is the generation born between 1995 and 2010.

This year, half of the Gen-Z generation are 18 or older. By the time they are all at least 18, the Millennials and Gen-Zs will make up almost 50% of the adult population. We will consider how this generation compares with previous generations. We want to understand this generation to truly communicate the good news of the gospel to them; to help them “to walk in a manner worth of the Lord.”[\[1\]](#)

In their book, *So the Next Generation Will Know*[\[2\]](#), Sean McDowell and J. Warner Wallace identified some key traits common among Gen-Zs. They are:

1. Digital Multitaskers – “spending nearly every waking hour interacting with . . . digital technology,” often while watching television
2. Impatient – quickly moving from thing to thing with an attention span of around 8 seconds
3. Fluid – constantly blurring the lines; making truth, genders, and family structures personal choices
4. Lonely – swamped in social media where personal relationships are minimized while personal troubles follow them everywhere. Sean points to “the availability of endless counterfeits that claim to be able to fill their hearts with meaning.”[\[3\]](#)
5. Individualistic – individual feelings more important than facts while judging the choices of others is avoided. As James White points out in *Meet Generation Z*[\[4\]](#), “the ability to find whatever they’re after without the help of intermediaries . . . has made them more independent. . . . Like no other generation before,

Gen-Z faces a widening chasm between wisdom and information.”[{5}](#)

Most importantly, most of these young Americans are thoroughly secular with little exposure to Christian theology. As White opines, “They are lost. They are not simply living in and being shaped by a post-Christian cultural context. They do not even have a memory of the gospel. . . . They have endless amounts of information but little wisdom, and virtually no mentors.”[{6}](#)

As they enter adulthood, the culture around them will not encourage them to consider the claims of Christ. In fact, the Millennials going before them are already seen leaving any Christian background behind as they age into their thirties.

Gen-Z: How Are They Trending?

What can we truly know about the religious thinking of Gen-Zs age 11 to 25? Pew Research surveyed teens and their parents giving us a glimpse into both[{7}](#).

They found *one third* of American teens are religiously Unaffiliated.[{8}](#) In contrast, their parents were less than *one quarter* Unaffiliated. Another Pew survey[{9}](#) found more than *half* of young adult Gen-Zs are unaffiliated. This group is easily the largest religious group among Gen-Zs.

Teens attend church services with their parents, but lag behind in other areas. Less than *one fourth* of teens consider religion very important. And on an absolute belief in God and praying daily, the teens trail their parents significantly.

Using an index of religious commitment[{10}](#), almost *half* of the parents but only *one third* of teens rated high. In fact, almost half of teenagers with parents who rated high did not rate high themselves.[{11}](#)

Perhaps the minds of teenagers are mush. Their views will firm

up as they age. In reality, older Gen-Zs and Millennials also trail older adults by more than 20 points in believing in God and praying daily.[{12}](#) Also, church attendance drops dramatically among these young adults who are no longer attending with parents.

If religion were important to teens, they would look to religious teaching and beliefs to help make decisions about what is right and wrong. But less than *one third* of teens affiliated with a religion turned to its teachings to make such decisions.

As George Barna reports,[{13}](#) “The faith gap between Millennials and their predecessors is the widest intergenerational difference identified at any time in the last seven decades.” It seems that Gen-Z will increase this gap.

Gen-Z: Worldview and Apologetics

Why have the Unaffiliated been growing dramatically over the last 25 years while doctrinally consistent Christians have been declining? At one level, we recognize the watered-down gospel taught in many churches encourages people to pursue other things and not waste time on church. That may have been the primary issue at one time. But in this decade, we are seeing a real reduction in the number of Evangelicals as well. The self-professed Evangelicals[{14}](#) among those ages 18 to 29 has reduced from 29% down to 20%, a reduction of almost one third.

One major driver is the dominant worldview of our young adult society. The worldview promoted by our schools, media, and entertainment industry has changed from a Christian inspired worldview to a worldview which is secular and specifically anti-Christian. As James White observes, “It’s simply a cultural reality that people in a post-Christian world are genuinely incredulous that anyone would think like a

Christian—or at least, what it means in their minds to think like a Christian.”[{15}](#)

Almost all Gen-Zs have been brought up hearing the worldview of Scientism espoused. This worldview teaches “that all that can be known within nature is that which can be empirically verified . . . If something cannot be examined in a tangible, scientific manner, it is not simply unknowable, it is meaningless.”[{16}](#) At the same time, most Gen-Zs have not even been exposed to an Evangelical Christian worldview. Consequently, apologetics is critical for opening their minds to hear the truth of the gospel. Many of them need to understand that the basic tenets of a Christian worldview can be true before they will consider whether these tenets are true for them. Answering questions such as: “Could there be a creator of this universe?” and “Could that creator possibly be involved in this world which has so much pain and suffering?” is a starting point to opening their minds to a Christian view.

Encouraging Gen-Zs to understand the tenets of their worldview and comparing them to a Christian worldview begins the process of introducing them to the gospel. As White points out, “I have found that discussing the awe and wonder of the universe, openly raising the many questions surrounding the universe and then positing the existence of God, is one of the most valuable approaches that can be pursued.”[{17}](#) The Christian worldview is coherent, comprehensive and compelling as it explains why our world is the way it is and how its trajectory may be corrected into one that honors our Creator and lifts up people to a new level of life.

Gen-Z: Removing the Isolation of Faith

What will it take to reach Gen-Z? James White says, “. . . the primary reason Gen-Z disconnects from the church is our failure to equip them with a biblical worldview that empowers them to understand and navigate today’s culture.”[{18}](#) If we

want to equip Gen-Zs to embrace faith, we must directly discuss worldview issues with them.

The challenge is exacerbated as most Gen-Zs are taught a redefined tolerance: to not only accept classmates with different worldviews, e.g. Muslims and the Unaffiliated, but to believe that it is as true for them as your parents' worldview is for them. As Sean McDowell states, "Gen-Zs are exposed to more competing worldviews—and at an earlier age—than any generation in history."[{19}](#)

The new tolerance leads directly to a pluralistic view of salvation. Christ stated, "No one comes to the Father except through me,"[{20}](#) and Peter preached that "There is salvation in no one else, for there is no other name under heaven . . . by which we must be saved."[{21}](#) Yet the survey of American teens[{22}](#) finds *less than one third* believe that only one religion is true, broken up into *two-thirds* of Evangelicals and *less than one-third* of Mainlines and Catholics.

Compounding these issues is the growing practice of limiting the impact of religious beliefs on real life. Sean points out, "The biggest challenge in teaching worldview to young people is the way our increasingly secular culture fosters the compartmentalization of faith."[{23}](#) We need to help them see how a consistent Christian worldview applies to all issues. It is foolish to segregate your spiritual beliefs from your life decisions.

As an example, many Gen-Zs are enamored by a socialist view that the government should provide everything we need, equally distributing goods and services to all. Those who work hard and excel will have their productivity redistributed equally. It sounds like a possibly good approach and yet it has destroyed the economies of many countries including Russia, Cuba, and Venezuela. It fails because it is based on a worldview that "assumes greed comes from inequality in the distribution of material goods in society."[{24}](#) In contrast,

the Bible is clear that greed is part of the fallenness of the human heart. As a result, any centralized function with no competition discourages productivity and becomes an inefficient bureaucracy.

Reaching Gen-Zs

Today, most Gen-Zs move into adulthood with little exposure to the gospel. The majority are either Unaffiliated, another religion, or have a nominal Christian background. Current surveys find that 98% of young Americans do not have a Christian worldview.[{25}](#)

This sobering data does not mean giving up on reaching Gen-Z. But if we are not intentional about it, we are not going to stem the tide. As James White observes, “What is killing the church today is (focusing) on keeping Christians within the church happy, well fed, and growing. The mission . . . must be about those who have not crossed the line of faith.”

And Sean McDowell points out that we need “to teach the difference between subjective and objective truth claims and make sure they understand that Christianity falls in the latter category.”[{26}](#)

Sean encourages a focus on relationships saying, “Relationships are the runway on which truth lands. Take the time to listen with empathy, monitor from a place of wisdom, and demonstrate your concern.”[{27}](#) White agrees, saying, “If we want (them) to know the faith, we have to teach, model and incarnate truth in our relationship with them.”[{28}](#) From a place of relationship, we can address challenges keeping them from truly hearing the gospel.

One key challenge is the role of media. As Sean notes, “Media shapes their beliefs, and it also shapes the orientation of their hearts.”[{29}](#) To counter this pervasive influence, he suggests engaging them in a skeptic’s blog. Help them consider

1) what claim is being made, 2) is the claim relevant if true, and 3) decide how to investigate the claim.^{30} By learning to investigate claims, they are examining the truth of the gospel. We should never fear the gospel coming up short when looking for the truth.

Key ways White's church is connecting with the Unaffiliated include:

1. Rethinking evangelism around Paul's message in Athens. Tantalizing those with no background to search for truth in Christ.
2. Teaching the grace/truth dynamic in quick segments consistent with their learning styles.
3. Being cultural missionaries – learning from those who have not been Christians.
4. Cultivating a culture of invitation by creating tools to invite friends all the time.

If we focus on growing the number of Gen-Z Christians, we could change the trajectory of American faith. If we devote ourselves to prayer, the leadership of the Holy Spirit, and reaching the lost in America rather than continuing church as usual, God can use us to turn the tide.

Woke Theology

We frequently hear the term “woke” in current discussions. Campuses, corporations, and even some churches are described as being woke. What does the term mean? How are these ideas influencing society? Is there any connection to ESG mandates and stakeholder capitalism? And how should Christians respond to the influence of wokeness?

Definition of the Term

The term means that one is “awake” to the true nature of the world at a time when so many in society are asleep. In his book on *Christianity and Wokeness*, Owen Strachan explains that “wokeness occurs when one embraces the system of thought called critical race theory. CRT teaches that all societal life is structured along racial power dynamics.”

According to this view, race is a “social construct,” not biologically based, and merely exists in our imagination. This is one place where there might be some agreement between wokeness and the Bible. The Bible teaches that we are “one race.” Some translations, for example, for Acts 17:26 refer to all humans as “one blood.” Another verse would be Galatians 3:28 which says, “There is neither Jew nor Greek, there is neither slave nor free, there is no male and female, for you are all one in Christ Jesus.”

I have found that woke theology often surfaces in the non-Christian world as a substitute religion. Woke theology also surfaces in some churches that are legitimately concerned about injustice. They want to be relevant to the cultural dialogue and thus adopt wokeness.

These terms are sometimes misused, which is why Strachan also

devotes a section on explaining what wokeness is *not*. Here are just five statements of the fifteen he discusses:

- Wanting societal harmony across backgrounds does not make you woke.
- Seeing massive failings in American and Western history, sustained patterns of racist thought, does not make you woke.
- Doing everything you can and know to do to build bonds with people different from you in various ways does not make you woke.
- Praying for greater diversity in your church through saving of fellow sinners does not make you woke.
- Wanting greater justice in the world doesn't make you woke.

In this article we will be looking at various aspects of woke theology. What is the ideology? How does it relate to critical race theory? What about corporations that have adopted a woke ideology? And how can we as Christians respond to this current cultural trend?

Woke Ideology

Wokeness includes the ideas of critical race theory and antiracism but is broader than just these ideas about race and racial justice. It also includes other social, legal, and even environmental concerns. These ideas were first developed and promoted on university campuses but have made their way into government, corporations, and nearly every part of society.

It is most visible through the actions of people who call themselves "social justice warriors." Critics might describe them as "virtue-signaling liberals" or merely call them "the woke." Whatever name you give to these groups, they have been successful in influencing nearly every institution in America and much of the Western world.

They use inflamed rhetoric and what one commentator calls “*ex-cathedra* incantations of pseudo-values so absurd that only a few years ago it would have seemed like they must be kidding.” That’s a fancy way of saying that you can’t believe people are completely serious when they are saying crazy things about race, gender, and science.

Much of this began on university campuses across the nation. Professors promoted ideas about cultural transformation that influenced the young minds who became the future opinion-forming elite of today. These ideas were reinforced because of a liberal media forming a feed-back loop between a leftist academy and a liberal establishment media.

This is an important principle to understand. In the past, we used to hear parents and others argue that the nutty ideas in the heads of college students would fade away as they had to earn a living and deal with the realities of the world of business. What happened was the fact that these college graduates found previous graduates in some of these corporations who were woke soul mates. The woke ideas on campus often became the foundational ideas in business and government. The media continued to reinforce those crazy woke ideas.

In her book, *Awake: Not Woke*, Noelle Mering explains how many in this emerging generation do not believe they are defined as being in the image of God but instead are called to fight evil in society. They are merely one entity in a group identity rather than someone made in the image and likeness of God. They aren’t praised or criticized by their actions and attitudes. Instead, they are elevated or condemned based on their group, their racial background, or their gender. They are not only being indoctrinated by critical theory on race but also by critical theory on sex and gender. And obedience to these ideas is achieved through thought and speech control.

Critical Race Theory

One aspect of wokeness is critical race theory. Critical theory began at the University of Frankfurt's Institute for Social Research, which came to be known as the "Frankfurt School." The Frankfurt scholars fled to Columbia University's Teachers College in New York in 1934 to escape the Nazis.

Critical theory traces all social injustice to inequities in power that are based on class, race, gender, or sexual orientation. In classical Marxism, the focus was on class, with the assumption that the working class would rise up against the capitalist oppressors. By contrast, critical theory is a form of cultural Marxism that seeks a radical transformation of society by uprooting present social authorities. Cultural Marxism retains basic Marxist assumptions but advocated a "long march through the institutions," to quote a leading thinker, Antonio Gramsci.

You are either in power or out of power. If you are in power, you are automatically discredited. If you are underprivileged, you are immune from criticism. The underprivileged can make demands, but they need not make arguments, since the whole system, including basic rationality, is rigged against them. This also means that the claims of critical race theory are unfalsifiable.

At its core, critical race theory is impractical. James Lindsay asks you to imagine you own a small tailor shop where you must assist each customer individually. Two people enter your store: one is white, and the other is black. If you choose to serve the black person first, it shows you are racist because you don't trust a black person in the store unsupervised. If you choose to serve the white person first, it shows you are racist because you value white people over black people.

How should we respond to these claims? First, the Bible

teaches that truth exists and can be discerned (Proverbs 30:5, John 8:32, 2 Timothy 3:16). Racial bias may be a problem, but the real impediment to proper biblical interpretation is our sin (John 3:19-20). Proponents of the woke agenda reject rational arguments and censor contrary ideas about race and society.

Christians are to love God with our minds (Mark 12:30). We are to “destroy arguments and every proud obstacle raised up against the knowledge of God” because we are to “take every thought captive to obey Christ” (2 Corinthians 10:4-5).

Second is the issue of grace. According to their view, members of an “oppressor” race will never really be forgiven because they will always be part of that race. By contrast, the Bible teaches that we are guilty because we are sinful (Romans 3:23, 6:23) not because of our racial status. We cannot earn salvation by good works because salvation is a gift of grace (Ephesians 2:8-9). We are redeemed through Jesus Christ (Romans 3:22-24).

Woke Corporations

Corporations that have gone woke have been increasingly involved in politics. Here are just a few examples from the last year.

When the Georgia legislature debated and then passed voter integrity laws, the CEOs of several corporations took to the media to express their displeasure. For example, the CEO of Coca-Cola complained the voting law was oppressive, which then brought attention to the fact that the company was doing business in China with oppressive human rights violations. The CEO of Delta Airlines complained about voter IDs as other critics were reminding them that you couldn't get on a Delta flight without showing a form of ID. But if these Georgia laws were supposedly an attempt at voter suppression, they failed since the number of voters in the latest election set records.

Many of these companies seem to be reevaluating their past actions. They can see the downward financial trajectory of past woke companies. The common phrase “get woke, go broke” seems to be true.

They also have noticed how members of Congress have responded. Senator Rick Scott wrote an open letter to “Woke Corporate America,” saying that he hoped they were having fun with their virtue signaling and the attempts to one-up each other. But he reminded them they destroyed working people’s jobs and destroyed some small businesses.

Although there are some members in Congress who want to pressure corporations to be less woke, there are other significant pressures on these companies to be more woke. This comes from the enforcing of ESG standards. The “E” stands for environmental concerns. What is the company doing to address the threat of climate change by lowering carbon emissions? The “S” stands for social and looks at the company’s relationship with stakeholders (often called stakeholder capitalism). The “G” stands for governance and desires diversity on the board of directors and corporate transparency.

While many of the ESG goals are admirable, recent examples show how it has been used as a political tool against anyone who dissents. A senior HSBC banker was canceled merely because he correctly observed that some of the climate change rhetoric was shrill and unsubstantiated.

Recently Tesla was removed from the S&P 500 ESG Index, even though they are the largest producer of electric cars and a few months ago had the fourth largest weighting in the index. Could it be that this change had more to do with the words and actions of Elon Musk than anything at Tesla?

How Should We Respond?

We are living in a time when we can be canceled for something

we say or even for our lack of enthusiasm for a particular policy or piece of legislation. That is why Rod Dreher warns us in his book, *Live Not by Lies*, of a coming “soft totalitarianism.” The old, hard totalitarianism came from the state (Germany, Russia) and was dedicated to the eradication of Christianity. This new totalitarianism usually comes from the Left in society but is also dedicated to the eradication of Christianity.

The soft totalitarianism of today demands allegiance to a set of progressive beliefs. Compliance is forced less by the state than by elites who form public opinion, and by private corporations that control our lives through technology. Citizens won't be taken away in handcuffs by the state, but their lives will be devastated by Leftist elites that will do what they can to destroy their lives.

Dissenters from the woke party line find their businesses, careers, and reputations destroyed. They are pushed out of the public square, stigmatized, canceled, and demonized as racists, sexists, and homophobes.

His book is full of stories from Christians who endured hard totalitarianism and provide us with models for how to address this more insidious form of soft totalitarianism. Often this is coming from business and the media.

What is a biblical perspective on race and gender? Christians and churches are facing persecution because many of these woke ideas are contrary to Scripture. Nevertheless, many of these woke ideas are making their way into the pulpits and Sunday School classes of many churches.

Woke religion rejects the salvation of Christ and supplants it with a utopian view that true salvation can be found in environmental activism, racial activism, and stakeholder capitalism. We can applaud young people looking to make the world a better place, but they have put their allegiance into

a worldview contrary to biblical principles.

Woke faith at its core is atheistic and denies God and Christ. Much of it is rooted in a Marxist view of the world. Second, it also replaces the biblical idea of sin (Romans 3:23) with salvation through environmental activism and racial struggle. Third, it is a utopian vision that assumes we can create “heaven on Earth” without Christ.

If we want to address real social problems in our society, we need to come back to biblical principles. Many of the successful social movements in the last two centuries (abolition, suffrage, civil rights) rested on a biblical foundation. We don't need woke theology to bring salt and light to our fallen world.

Nuclear War

Kerby Anderson provides an overview of nuclear war from Annie Jacobsen's book Nuclear War: A Scenario with a biblical response.

Hell on Earth

Annie Jacobsen begins her book with a scenario: [\[1\]](#) a one-megaton thermonuclear bomb strikes the Pentagon and vaporizes the building and the 27,000 employees within it. A mile away the marble columns of the Lincoln and Jefferson memorials burst apart and disintegrate. Two and a half miles west at National Park, the clothes of a majority of the 35,000 people watching the ballgame catch on fire.

Her book, *Nuclear War: A Scenario*, takes you through, in a minute-by-minute description, what would happen if a “bolt out of the blue” nuclear attack took place on U.S. soil. This 370-page book isn't for the faint-hearted, but it is an in-depth investigation in how we got to this place in world history and what would happen if the unthinkable became reality. And the book provides a sequel to the 2023 biographical film, *Oppenheimer*.

Why are we discussing this difficult topic of nuclear war now? First, there is a need to educate a new generation. Although Americans talked about the danger of nuclear war during the Cold War years, much less has been said in recent years. Second, the threat of nuclear war is even greater today because of countries like North Korea that have nuclear weapons and other countries like Iran that are attempting to develop nuclear weapons. Third, this discussion is relevant because so many documents about nuclear war have been declassified. We know so much more about nuclear war than we knew just a few years ago.

It is impossible for our minds to comprehend what happens in a nuclear blast. The air heats to one hundred and eighty million degrees Fahrenheit. This is nearly five times hotter than the temperature in the center of the sun. The blast levels any structure within miles, but also creates winds travelling at several hundred miles per hour.

The nuclear fireball then rises like a hot-air balloon forming the iconic mushroom cloud with cap and stem. Then the inferno begins. Gas lines explode and look like giant blowtorches. Washington, D.C. has now become a mega-inferno. Asphalt streets turn to liquid from the intense heat. More than a million people are dead or dying within two minutes after the detonation.

Outside of the blast area, the electromagnetic pulse obliterates all radio, television, and the Internet. Cars with electric ignition systems cannot start. Water stations cannot pump water. And deadly radiation spreads to those who survived the initial blast.

Nuclear war may be unthinkable, but that is why we are thinking and talking about it.

Happens Too Fast

Nuclear war could develop unthinkably fast and devastate our world.

An intercontinental ballistic missile is a long-range missile that delivers nuclear weapons to political and military targets on the other side of the world. These ICBMs exist to do one thing: kill millions of people in another country.

Back when the ICBM was invented, Herb York, the Pentagon's chief scientist, wanted to calculate how many minutes it would take for it to reach the Soviet Union. [{2}](#) A group of defense scientists estimated that it would take 26 minutes and 40

seconds. From launch to annihilation takes just 1,600 seconds. Nuclear war happens too fast.

Today that estimate varies because we have nine countries that possess nuclear weapons: Russia, France, China, Pakistan, India, Israel, North Korea, the UK, and the US. Given North Korea's geographical location, the launch-to-target time frame from the Korean peninsula to the East Coast of the US would be about 33 minutes.

But a nuclear blast can come even sooner from nuclear-armed, nuclear-powered submarines. These submarines are called "boomers" or even have been called the "handmaidens of the apocalypse." They are undetectable under the sea and can sneak up very close to a nation's coast and launch a first-strike attack. This is why the president actually has only a six-minute window to decide on a nuclear counterattack.

Launch on Warning

America has a policy known as "launch on warning."^[3] What that means is that America will launch its nuclear weapons once its early-warning electronic sensor system warns of an impending nuclear attack. Put another way, the US won't wait to check if a warning is accurate, it will not wait and physically absorb a nuclear blow before launching its own nuclear weapons at whoever sent a missile to them.

This policy has been in place since the height of the cold war and represented an incredibly high risk. As one advisor explains, launch on warning during at time of intense crisis is a recipe for catastrophe.

Presidential candidates have promised to change this policy, but nothing has happened so far. George W. Bush in 2000 vowed to address this policy: "Keeping so many weapons on high alert may create an unacceptable risk for accidental or unauthorized launch." Barack Obama argued that "keeping nuclear weapons ready to launch on a moment's notice is a dangerous relic of

the Cold War.” President Biden has also encouraged to eliminate this perilous policy. No change has been made.

President’s Football

The decision to launch a nuclear strike comes from the president. How did the government decide to give the president the nuclear football? The story begins with Harold Agnew back in 1959.^{4} He visited a NATO base and noticed there were four F-84F aircraft at the end of the runway; each was carrying two nuclear gravity bombs. This meant that these nuclear bombs were in the custody of one U.S. Army private armed with a M1 rifle with eight rounds of ammunition. The only safeguard against unauthorized use of an atomic bomb was this single GI surrounded by numbers of foreign troops on foreign territory with thousands of Soviet troops just miles away.

When he got back to the U.S., Agnew contacted a project engineer at Sandia Laboratories and asked if they could put an electronic “lock” on the bomb’s firing circuits that would prevent others from arming the nuclear bomb. They produced a lock and coded switch that would be activated with a three-digit code.

They presented the idea and the device to the Joint Committee on Atomic Energy and then to President Kennedy who ordered it to be done. But the military objected. A general asked how a pilot somewhere in the world could get a code from the President of the United States to arm a nuclear weapon before being overrun by a massively superior number of Soviet troops? And why not have other nuclear bombs also coded?

The answer came in the creation of the President’s Football, which is an emergency satchel. This gave the president, not the military, control of America’s nuclear arsenal. The Football must always be near the president.

There is a story of how important it is for the president to have access to the Football.[{5}](#) When President Clinton was visiting Syria, President Hafez al-Assad's handlers tried to prevent Clinton's military aide from riding in an elevator with him. The Secret Service would not let that happen, and they did not let that happen.

Inside is a set of documents known as the Black Book. Robert "Buzz" Patterson served as a military aide to President Clinton, and I was able to interview him one time on [my radio program](#). He likened the Black Book to a "Denny's breakfast menu" because of how it looked. The president must choose retaliatory targets from a predetermined nuclear strike list on the menu.

Let me end with this question: Do you believe the current president has a mental capacity to make a rational decision of about launching nuclear weapons?

War Games

One question that was asked more than forty years ago was whether anyone could win a nuclear war. Spoiler alert: no one can. President Reagan ordered a simulated war game with the name Proud Prophet to explore the outcome and long-term effects of a nuclear war.[{6}](#)

The research used mathematical models to predict outcomes and was conducted at the National War College. Participants were cloistered away inside a secure location to prevent leaks. The results were only declassified in 2012, but much of the material was blacked out. Fortunately, this declassification allowed participants to discuss it without violating the Espionage Act of 1917.

Over the two weeks, every simulated scenario ended the same way. Sometimes they began with a tactical nuclear strike and a so-called limited nuclear war. Other times they simulated

exercises with NATO and then with other exercises without NATO. There were scenarios where the U.S. launched nuclear war preemptively. Sometimes that was when the Pentagon was supposedly in focused calm and other when in a crisis mode.

Sadly, the result was the same. Once a nuclear war starts, there is no way to win it or even end it. No matter how a nuclear war begins, it ends with complete Armageddon-like destruction. As one participant put it, this destruction "made all the wars of the past five hundred years pale in comparison." At least a half billion (and probably more like a billion) people die in the war's opening salvo. Then billions more die of radiation poisoning and starvation.

Nuclear Winter

When the bombs cease striking targets, the world turns cold and dark. Everything is on fire. Smoke produces noxious smog of pyrotoxins. Fires in the cities ignite other fires. Even in the less-populated areas, forest fires rage.

The density of soot reduces global temperatures by 20-40 degrees depending on the location. Earth plunges into the horror known as a "nuclear winter." This might be a familiar term for those of us who lived in the 1980s. Astronomer Carl Sagan wrote about it and warned us of the dangers of nuclear war.

A nuclear war would change the troposphere and thus the amount of sunlight reaching the earth. Once the radioactive fog and haze diminish, the ozone layer disappears, and the sun's warming rays are now killer UV rays.

Earth is no longer as hospitable for humans as it once was. After millennia of planting and harvesting, the few humans to survive return to a hunter-gatherer existence.

Biblical Perspective

We will conclude this discussion of nuclear war with a biblical perspective. Let's begin with the realization that God is sovereign and in control. But that doesn't mean that He would never allow a nuclear war to take place. Throughout history, we have had tyrants and armies destroy people groups and civilizations. God used pagan nations to judge the nation of Israel.

How should we respond? Since the first atomic bombings at the end of World War II, there has been a condition known as "nuclear anxiety." Jesus instructs us not to "be anxious about tomorrow" (Matthew 6:34), and Paul also tells us not to "be anxious about anything" (Philippians 4:6). Jesus even says that "if those days had not been cut short, no human being would be saved" (Matthew 24:22).

In the book of Daniel, we have another reminder of God's sovereignty that came in the second dream of Nebuchadnezzar. It reminded him of the fact that God "rules the kingdom of men and gives it to whom he will and sets over it the lowliest of men" (Daniel 4:17). Nebuchadnezzar knew more about human sovereignty than anyone and proclaimed God's sovereignty over the earth at the end of his days (4:34).

Some Christians have suggested that the Bible may be describing a nuclear war. In the book of Revelation, there is a description of the poisoning of the waters (8:11), death of the earth's vegetation (8:17), the end of ocean life (16:3), and the inability to block the sun's rays resulting in severe burns (16:8).

There is a description of stars of heaven falling to earth (6:13) that some have suggested might be describing nuclear missiles raining down on earth during a nuclear war. These would be visible as they enter the atmosphere and begin striking the cities on earth.

Even passages in the Old Testament might point to the effects of a nuclear war. For example, in Zechariah 14:12 we read that “the Lord will strike all the peoples that wage war against Jerusalem: their flesh will rot while they are still standing on their feet, their eyes will rot in their sockets, and their tongues will rot in their mouths.”

One prophecy yet to be fulfilled can be found in Ezekiel 38 that describes nations that will come against Israel. But critics point to the fact that it says they are riding horses, wearing helmets and armor, and wielding swords (38:4-5). That doesn't look like a modern army. But I remember a famous quote from Albert Einstein: “I know not with what weapons World War III will be fought, but World War IV will be fought with sticks and stones.” The world might look very different after a nuclear war.

In this article we have been discussing the unthinkable: a nuclear war. We should remember the words of Jesus: “In the world you will have tribulation. But take heart; I have overcome the world” (John 16:33).

Ransom and the Martial Spirit in Perelandra

Dr. Michael Gleghorn explores the spiritual dimensions of Dr. Elwin Ransom in C.S. Lewis's space novel Perelandra.

In C. S. Lewis's novel, *Perelandra*, the second book in what some have called the "Cosmic Trilogy," Dr. Elwin Ransom is sent by God to the planet Venus on a mission of great importance.[{1}](#) Although Ransom has learned that dark spiritual powers on earth are plotting "some sort of attack on Perelandra" (or Venus), he doesn't know precisely what he's to do about it once he arrives, nor why he's been chosen for such a venture.[{2}](#) But God knows, and he's specially prepared Ransom for this mission (though this doesn't mean it will be easy).[{3}](#)

[In a prior article](#), I observed how God had providentially orchestrated Ransom's earlier adventures on the planet Mars in order to help him develop some of the "martial" virtues—traits like grit, courage, and perseverance.[{4}](#) As this second story on the planet Venus (or Perelandra) unfolds, the reader gradually comes to see how important this preparation was.[{5}](#) Indeed, before his mission can be completed, Ransom will need all these virtues (along with the grace and help of God) if he's to successfully realize the purpose for which he's been sent.

In the first two chapters of the novel, Lewis foreshadows key themes that will surface later in the story. These include demonic opposition to the plans and purposes of God, the importance of dying to one's self-will and yielding that will to God, and the possibility of Ransom's physical combat and injury.

The most important of these is probably that of dying to one's

self-will by continually surrendering that will to God. As Lewis makes clear elsewhere, such surrender might be harder or easier depending on the spiritual condition of the one who needs to do the surrendering.[{6}](#) For an unfallen creature, such surrender could be experienced as a kind of pleasure. For a fallen and sinful creature, however, it involves a kind of death. This is foreshadowed in the novel by the fact that Ransom is transported to Perelandra in “a large coffin-shaped casket.”[{7}](#) The very means by which he’s taken to Perelandra symbolizes the fact that God is taking Ransom on a journey that will require him to die to his own will by surrendering to the Divine will.[{8}](#)

In the remainder of this article, we’ll consider some of the key issues that Lewis explores in this novel, particularly as these concern the martial spirit in Ransom, who functions as God’s representative in Perelandra.

Beauty and the Beast

In C. S. Lewis’s “Cosmic Trilogy,” each planet in our solar system is governed by a powerful spiritual intelligence that combines aspects of a Christian archangel with the characteristics of a Roman god or goddess.[{9}](#) Hence, in Lewis’s first novel of the trilogy, *Out of the Silent Planet*, we learn that the planet Mars is governed by a powerful angelic ruler with qualities like the Roman god Mars (though void of all the negative characteristics attributed to Mars in Greco-Roman mythology). In a similar way, in Lewis’s second novel, *Perelandra*, we learn that Perelandra (or Venus) is governed by an angelic ruler with characteristics like those of the Roman goddess Venus, the goddess of love and beauty.[{10}](#)

After initially being deposited in the ocean of Perelandra, and then making his way to one of the many “floating islands” of that world, Ransom soon discovers that the planet is

replete with beauty and pleasure. The colors, the fragrances, the taste of the fruits—everything about the planet exudes beauty, wonder, joy, and pleasure.[{11}](#)

Eventually, Ransom meets Tinidril, the unfallen first mother of Perelandra, also known as “the Green Lady” (due to the color of her skin).[{12}](#) She has been separated from Tor, the first father and king of Perelandra, in part because of the floating islands. At this stage in the history of Perelandra, Tor and Tinidril occupy a position much like that of Adam and Eve before the fall.

One day, while Ransom is conversing with the Green Lady, they see something “like a shooting star” race “across the sky” and fall into the ocean.[{13}](#) They later discover that Weston, the physicist who originally kidnapped Ransom and took him to Mars, has come to Perelandra on a spaceship.

Given his history with Weston, Ransom is naturally worried about why he should have come to Perelandra. Talking with Weston only increases his concerns, for Weston’s previously naturalistic philosophy now has a decidedly religious bent. He claims to have been “guided” to Perelandra by a spiritual force and the more Ransom hears, the more he thinks this force may well be diabolical. When Weston arrogantly calls “that Force” into himself, he is suddenly possessed by a demonic spirit.[{14}](#) He is the “bridge” by which this evil spirit has entered Perelandra.[{15}](#) Ransom now understands that he has been sent to Perelandra to protect the Green Lady from Weston.

Temptation

Perelandra (or Venus) exists in a state much like that of Earth prior to the fall of Adam and Eve. It is an unfallen paradise.

But there’s a problem. Weston, a proud and arrogant scientist, has come to Perelandra at the behest of an evil spirit.

Shortly after landing on the planet, he is completely possessed by this spirit. Ransom, the hero of the story, now realizes that God has sent him to Perelandra in order to prevent the planet's first couple from falling into the same disobedience as our first parents.

Weston (now referred to as the "Un-man") soon begins tempting Tinidril (the Perelandrian "Eve") to disobey God, trying to get her to sleep on the fixed land. You see, Perelandra consists of both floating islands and fixed land, and God has forbidden the first couple to sleep on the fixed land, just as Adam and Eve were forbidden to eat fruit from the Tree of the Knowledge of Good and Evil.[{16}](#)

Initially, Ransom tries to counter the Un-man's arguments to disobey God with arguments of his own. After many days, however, he realizes that he cannot allow this to continue. Tinidril has been faithfully resisting the Un-man's temptations, but she seems to be growing weaker and Ransom sees that something more definitive must be done.[{17}](#)

While thinking about this issue, Ransom realizes that God is calling him to confront and physically fight the Un-man.[{18}](#) This is where Ransom's prior experience on Mars and his development of the martial spirit become particularly important. God has prepared Ransom for this and now calls upon him to destroy the corrupt demonic evil that has invaded His good world.

Ransom initially resists this idea, fearing that he may well be killed in such a violent encounter. But God impresses upon Ransom that he's His *representative* in Perelandra—and if he fails, there will be very real consequences. Perelandra *really can* fall into the hands of the enemy, just as Earth did. Ransom is forced to confront the agonizing reality that his choices are significant and make a real difference. If he chooses to do nothing, then evil will win, and Perelandra will be ruined. He thus decides that he must yield his will to

God's will, fight the Un-man, and attempt to rid this beautiful world of its evil invader.[{19}](#)

Holy War

Above we saw how Dr. Ransom, the hero of the story, comes to realize that God is calling him to fight and destroy the Un-man. The Un-man is a demon-possessed physicist whose humanity has been obliterated by the demonic spirit inhabiting his body. He wants to persuade Tinidril (the Perelandrian "Eve") to disobey God, thus introducing sin and evil into this unfallen paradise.

Although some might find it startling that God would call Ransom to fight and destroy the Un-man, we must not forget that at this point the Un-man is mostly just a demon-possessed corpse, an enemy of both God and the innocent persons on Perelandra. Moreover, Lewis carefully contextualizes this battle within the larger mythological world of his story. As Ransom realizes while contemplating this issue, "Whatever happened here would be of such a nature that earth-men would call it mythological."[{20}](#)

The bottom line is that evil has invaded and is attempting to destroy God's good world of Perelandra—and God is utterly serious about eliminating it. As a just and holy being, God cannot allow evil to go unjudged and unpunished, for evil (by its very nature) *deserves* punishment. Moreover, since evil will always seek to corrupt and destroy all that is good, it must either be set right (through repentance and submission to God's will) or else be completely eliminated from God's good creation. There is no other alternative if God wants to restore His world to perfect goodness, peace, and rest.

The battle begins the next morning and Ransom gets an initial victory. The Un-Man flees, Ransom pursues, and they eventually end up in a large, dark, underground cavern. Although it's too

dark to see, Ransom finally believes that he has killed the Un-Man and he sets off to find his way out of the darkness. Unfortunately, however, the demonic spirit reanimates Weston's corpse and pursues him. As the Un-Man comes up out of a tunnel, Ransom confronts him, crushes his head with a large stone, and pushes the corpse over a ledge into a "sea of fire" below.[{21}](#) Here Lewis probably intends an allusion to the biblical "lake of fire," into which the devil and his "offspring" are ultimately cast (Revelation 20:10-15). Ransom, imbued with the martial spirit, has been victorious, and the evil which had invaded Perelandra has been defeated.

Ransom as a Christ-Figure

In the previous section we covered how Dr. Ransom, the hero of the novel, killed the demonically possessed "Un-man" by crushing his head with a large stone. After the battle, Ransom, completely exhausted, falls into a deep sleep (possibly symbolic of death). After waking, he eventually emerges (with the aid of Divine providence), from the deep, dark, tomb-like cavern (in which the final battle had taken place) into the light and air of Perelandra (which is possibly symbolic of resurrection).[{22}](#)

Given the extent of Ransom's injuries, it takes some time for him to recover. During "this long Sabbath," Ransom lay by a stream, eating, drinking, and sleeping.[{23}](#) Only when he is "nearly well" does he discover "his most serious injury." "It was a wound in his heel," inflicted by the Unman in one of their many violent encounters. The wound is still bleeding when Ransom first notices it, and "nothing he could do would stop it."[{24}](#)

Here we see Ransom emerge from his martial victory over the Un-man as a type of Christ. Those familiar with the Bible will recall Genesis 3:15, in which the Lord tells the serpent, who led Adam and Eve into disobedience, that He will put "enmity"

between the serpent and *his* offspring and the woman and *her* offspring. "He shall bruise your head," God tells the serpent, "and you shall bruise his heel" (Genesis 3:15).

Lewis is clearly portraying Ransom as a Christ-figure, who has acted as God's representative in Perelandra. In a small and limited way, Ransom did something similar to what Jesus had already perfectly accomplished on earth. In the mythological world of the story, he crushed the head of the serpent's offspring and, in turn, received a wound in his heel. This might remind us of the Apostle Paul's concluding words to the church in Rome: "The God of peace will soon crush Satan under your feet" (Romans 16:20). Insofar as we belong to Christ, we act as His representatives in the world. What is true of Christ is also, in some sense, true of his people.

Having thus secured martial victory in Perelandra, Ransom returns to Earth with the wound in his heel as a continual reminder of his battle against the forces of evil. And it is in this condition that we will meet him for the last time in the concluding novel of this series, *That Hideous Strength*.

Transhumanism and Artificial Intelligence

Kerby Anderson provides an overview of transhumanism and AI, considering its impact on us and our families.

Over the last few years, we have heard more pundits and futurists talk about transhumanism. What is this philosophy? How will it affect our families and us? How should a Christian think about transhumanism?

Transhumanism is an intellectual and cultural movement that seeks to transform the human condition. The leaders of this movement want to use the developing technologies to eliminate aging and enhance human potential (physical, psychological, and mental).

Nick Bostrom explains that transhumanism views human nature as a “work-in-progress, a half-baked beginning that we can learn to remold in desirable ways.” He goes on to explain the transhumanist vision: “Transhumanists hope that by responsible use of science, technology, and other rational means we shall eventually manage to become posthumans, beings with vastly greater capacities than present human beings have.”[\[1\]](#)

Two primary ways they want to do this is through genetic engineering and artificial intelligence. They want to genetically create “the new man,” and they want to use technology to merge humans with machines.

The genetic part of this equation claims that we can use gene splicing and other genetic modification techniques so that genes can be easily transferred between species. But we should be concerned about geneticists who want to create a superhuman race. Leon Kass warned that “Engineering the engineer seems to differ in kind from engineering the engine.”[\[2\]](#)

The other part of the equation concerns technology. The leaders of transhumanism believe we are on the cusp of a technological threshold in both artificial intelligence and human-machine technology.

The “humanism” in transhumanism reminds us that this is a philosophy rooted in Enlightenment humanism. But it is different. Whereas the goal of humanism was to develop the ideal human, the goal of transhumanism is to transcend what we have traditionally considered human.

The Transhumanist Declaration provides eight key points to describe what the signers believe should be the future of humans.^{3} It begins with this claim: “Humanity stands to be profoundly affected by science and technology in the future. We envision the possibility of broadening human potential by overcoming aging, cognitive shortcomings, involuntary suffering, and our confinement to planet Earth.”

Two Principles of Transhumanism

Now I would like to look at the two foundational principles of transhumanism.

The first principle is “metaman.” Futurists predict that our current human condition will evolve into being a cyborg (short for *cybernetic organism*). Our bodies will be joined to machines as we “evolve” through technological progress.

Transhumanists believe we will have immense knowledge and information because of the rapid advances in artificial intelligence and computing power. These advances will eventually exceed human intelligence. Meanwhile, advances in genetic engineering will allow scientists to modify the human body to keep pace with these technological advances.

This is the two-fold hope of the transhumanists: artificial intelligence and genetic engineering. One represents biological change through mixing and matching genes. The other

presents the merging of human intelligence with artificial intelligence.

In fact, the hope is to create a superorganism through the transference of genes between species. This may even eradicate the differences between species. One scientist even suggested that tampering with the genetic codes of all plants and animals on this planet would cause the “definition of human beings to drift.”^{4} Humans would merge with the rest of nature, thereby creating a planetary superorganism he calls “Metaman.”

In essence, transhumanists would like to erase any distinction between human, other forms in nature, and machines. Humans would now control the future direction of evolution and merge all forms of life and non-life together in one enormous superorganism.

The second principle is “the singularity.” Transhumanists wait for the arrival of a technological threshold that will be achieved through artificial intelligence. Futurists predict that sometime in the middle of this century, we will achieve what transhumanists call “the singularity.”^{5} The current distinction between humanity and nature and machine will fade and there will no longer be any barriers between the natural world and artificial world.

This utopian view assumes that humans will be able to transcend the limitations of our biological bodies and brains. There will no longer be any distinction between humans and machines. And this, say the transhumanists, will allow humanity to no longer be resigned to death as the end. All of this, they predict, will usher in a technological millennium.

History of Artificial Intelligence

The term artificial intelligence was coined in 1956 by the American computer scientist John McCarthy. He defines it as

“getting a computer to do things which, when done by people, are said to involve intelligence.” Unfortunately, there is no standard definition of what constitutes AI. Part of the problem is the lack of agreement on what constitutes intelligence and how it relates to machines.

McCarthy proposes that “Intelligence is the computational part of the ability to achieve goals in the world. Varying kinds and degrees of intelligence occur in people, many animals, and some machines.”[\[6\]](#) This would include such capabilities as logic, reasoning, conceptualization, self-awareness, learning, emotional knowledge, planning, creativity, abstract thinking, and problem solving.

Researchers have for decades hoped to build machines that could do anything the human brain could do. Progress was slow for many decades but has accelerated in the last few years. A significant breakthrough occurred in 2012, when an idea called the neural network shifted the entire field. This is a mathematical system that learns skills by finding statistical patterns in enormous amounts of data.

The next big step came around 2018 with large language models. Companies such as Google, Microsoft, and OpenAI began building neural networks trained on vast amounts of text including digital books, academic papers, and Wikipedia articles. Surprisingly, these systems learned to write unique prose and computer code and to carry on sophisticated conversations. This breakthrough has been called “generative AI.”

These AI algorithms are based on intricate webs of neural networks and allow for what is considered “deep learning.” These advanced AI systems collect huge amounts of data and can correct mistakes and even anticipate future problems.

The benefits are significant. Factory automation, self-driving cars, efficient use of resources, correlating massive amounts of data, and fewer errors in medical diagnoses are just a few

of the many ways in which AI will improve our lives in the 21st century.

Unfortunately, AI poses dangers to us.

Dangers of Artificial Intelligence

Although artificial intelligence offers some significant benefits, it also poses many dangers. The authors of the open letter on AI warn that human beings are not ready for a powerful AI under present conditions or even in the foreseeable future. What happens after AI becomes smarter than humans? That is a question that bothered Eliezer Yudkowsky. In his opinion piece for *Time* magazine, he argued that “We Need to Shut It All Down.”[{7}](#)

He warned that “Many researchers steeped in these issues, including myself, expect that the most likely result of building a superhumanly smart AI, under anything remotely like the current circumstances, is that literally everyone on Earth will die.” He doesn’t think this is merely a possibility but believes it is a virtual certainty.

He uses this illustration to drive home his point: “To visualize a hostile superhuman AI, don’t imagine a lifeless book-smart thinker dwelling inside the internet and sending ill-intentioned emails. Visualize an entire alien civilization, thinking at millions of times human speeds, initially confined to computers—in a world of creatures that are, from its perspective, very stupid and very slow.”

Bill Gates understands both the benefits and dangers of AI. He explains that the “development of AI is as fundamental as the creation of the microprocessor, the personal computer, the Internet, and the mobile phone.” While these changes in how we work, learn, and communicate are good, there is also “the possibility that AIs will run out of control.”[{8}](#)

He asks, “Could a machine decide that humans are a threat,

conclude that its interests are different from ours, or simply stop caring about us?" He recognizes that "superintelligent AIs are in our future" and that they "will be able to do everything that a human brain can, but without any practical limits on the size of its memory or the speed at which it operates." However, these "strong AIs" will "probably be able to establish their own goals." Those would likely conflict with our best interests.

Notice the number of dystopian movies where the machines have taken over. That would include movies like *2001: A Space Odyssey*, *Avengers: Age of Ultron*, *I, Robot*, the *Matrix* series, and the *Terminator* series. That is why many people fear how AI will be used in the future.

Biblical Perspective

How should Christians respond to transhumanism? We should begin by looking at the philosophical foundation of this movement. It begins with a belief that there is no God and we are responsible for our own destiny. It also is based upon an evolutionary foundation that assumes that we are the product of millions of years of chance process.

The leaders of transhumanism see genetic engineering as a tool to be used to speed up the process of evolution. We can use genetics to enhance and improve the human race. If we believe that humans are merely the product of the undirected force of evolution, then certainly intelligent scientists can "improve on nature."

The evolutionary argument goes like this. Humans die due to some technological glitch (e.g., heart stops beating). Therefore, "Every technical problem has a technical solution. We don't need to wait for the Second Coming in which to overcome death. A couple of geeks in a lab can do it. If traditionally death was the specialty of priests and theologians, now the engineers are taking over." [\[9\]](#)

The leaders of transhumanism believe we should use technology to improve the human race so that we are perfect and immortal. In many ways, this technological imperative harkens back to the Tower of Babel (Genesis 11). Instead, we should use technology wisely as we exercise dominion over the world (Genesis 1:28).

Here are a few biblical principles. First, we begin with the reality that each human being is created in God's image (Genesis 1:26-27, Psalm 139:13-16, Isaiah 43:6-7, Jeremiah 1:5, Ephesians 4:24). We have been given dominion and stewardship over the creation (Genesis 1:28, Colossians 1:16) and should reject any form of technology that would usurp or subvert that stewardship responsibility.

Second, humans are created as moral agents. Computer technology can aid us in making moral decisions because of its powerful ability to process data. But we can never cede our moral responsibility to those same computers. God will hold us responsible for the moral or immoral decisions we make (Roman 2:6-8, Galatians 5:19-21, 2 Peter 1:5-8). We should never give computers that authority.

We should reject the vision of transhumanism that looks forward to the day in which man and machine become one in the singularity. We must reject the idea that this is the next step in human evolution. We should reject the worship of technology and reject the idea that AI will make us more human. And we should reject the false utopian vision of a world when machines are given co-equal value to humans created in the image of God (Genesis 1:26-27).

Loneliness and the Lockdown

Kerby Anderson looks at the isolation and longing for human contact that has become endemic even before the pandemic.

America was already facing a crisis of loneliness, and then the coronavirus pandemic hit. People sheltering at home had even less human contact. That made the crisis of loneliness

even worse. The best thing people could do to protect themselves from the virus was to isolate themselves. But that is not the best thing they could do for their physical or mental health.

A study by Julianne Holt-Lunstad found that loneliness can be as bad for your health as smoking 15 cigarettes a day. Another study by the National Academies of Sciences, Engineering, and Medicine found that social isolation in older adults increased their risk of heart disease, stroke, dementia, high cholesterol, diabetes, and poor health in general.[{1}](#)

More than a quarter century ago (1994), I wrote a book (*Signs of Warning, Signs of Hope*) making a number of predictions for the future. Chapter eight set forth the case for a coming crisis of loneliness.[{2}](#) Years earlier Philip Slater wrote about *The Pursuit of Loneliness*. The US Census Bureau documented the increasing number of adults living alone. Dan Kiley talked about living together loneliness in one of his books. Roberta Hestenes coined the term “crowded loneliness.” The trend was there for anyone to see if they began reading some of the sociological literature.

In the last few years, many authors have written about the crisis of loneliness. Robert Putnam wrote about it in his famous book, *Bowling Alone*.[{3}](#) He argues that people need to be connected in order for our society to function effectively. Putnam concludes, “Social capital makes us smarter, healthier, safer, richer, and better able to govern a just and stable democracy.” Senator Ben Sasse, in his book, *Them: Why We Hate Each Other—and How to Heal*, laments that our traditional tribes and social connectedness are in collapse.[{4}](#)

Living Alone

The reasons are simple: demographics and social isolation.

More people are living alone than in previous generations, and those living with another person will still feel the nagging pangs of loneliness.

In previous centuries where extended families dominated the social landscape, a sizable proportion of adults living alone was unthinkable. And even in this century, adults living alone have usually been found near the beginning (singles) and end (widows) of adult life. But these periods of living alone are now longer due to lifestyle choices on the front end and advances in modern medicine on the back end.

People have been postponing marriage and thus extending the number of years of being single. Moreover, their parents are (and presumably they will be) living longer, thereby increasing the number of years one adult will be living alone. Yet the increase in the number of adults living alone originates from more than just changes at the beginning and end of adult life. Increasing numbers are living most of their adult lives alone.

In the 1950s, about one in every ten households had only one person in them. These were primarily widows. But today, due to the three D's of social statistics (death, divorce, and deferred marriage), more than a third of all households is a single person household.

In the past, gender differences have been significant in determining the number of adults living alone. For example, young single households are more likely to be men, since women marry younger. On the other hand, old single households are more likely to be women, because women live longer than men. While these trends still hold true, the gender distinctions are blurring as both sexes are likely to reject traditional attitudes toward marriage.

Marriage Patterns

The post-war baby boom created a generation that did not make the trip to the altar in the same percentage as their parents. In 1946, the parents of the baby boom set an all-time record of 2,291,000 marriages. This record was not broken during the late 1960s and early 1970s, when millions of boomers entered the marriage-prone years. Finally, in 1979, the record that had lasted 33 years was finally broken when the children of the baby boom made 2,317,000 marriages.

The post-war generations are not only marrying less; they are also marrying later. The median age for first marriage for women in 1960 was 20 and for men it was 22. Today the median age for women is 27 and for men it is 29.

Another reason for a crisis in loneliness is marital stability. Not only are these generations marrying less and marrying later; they also stay married less than their parents. When the divorce rate shot up in the sixties and seventies, the increase did not come from empty nesters finally filing for divorce after sending their children into the world. Instead, it came from young couples divorcing before they even had children. That trend has continued into the 21st century.

The crisis of loneliness will affect more than just the increasing number of people living alone. While the increase in adults living alone is staggering and unprecedented, these numbers are fractional compared with the number in relationships that leave them feeling very much alone.

Commitment is a foreign concept to many of the millions of cohabiting couples. These fluid and highly mobile situations form more often out of convenience and demonstrate little of the commitment necessary to make a relationship work. These relationships are transitory and form and dissolve with alarming frequency. Anyone looking for intimacy and commitment

will not find them in these relationships.

Commitment is also a problem in marriages. Spawned in the streams of sexual freedom and multiple lifestyle options, the current generations appear less committed to making marriage work than previous generations. Marriages, which are supposed to be the source of stability and intimacy, often produce uncertainty and isolation.

Living-Together Loneliness

Psychologist Dan Kiley coined the term “living-together loneliness,” or LTL, to describe this phenomenon. He has estimated that 10 to 20 million people (primarily women) suffer from “living together loneliness.”[\[5\]](#)

LTL is an affliction of the individual, not the relationship, though that may be troubled too. Instead, Dan Kiley believes LTL has more to do with two issues: the changing roles of men and women and the crisis of expectations. In the last few decades, especially following the rise of the modern feminist movement, expectations that men have of women and that women have of men have been significantly altered. When these expectations do not match reality, disappointment (and eventually loneliness) sets in. Dan Kiley first noted this phenomenon among his female patients. He began to realize that loneliness comes in two varieties. The first is the loneliness felt by single, shy people who have no friends. The second is more elusive because it involves the person in a relationship who nevertheless feels isolated and very much alone.

To determine if a woman is a victim of LTL, Kiley employed a variation of an “uncoupled loneliness” scale devised by researchers at the University of California at Los Angeles. For example, an LTL woman would agree with the following propositions: (1) I can't turn to him when I feel bad, (2) I feel left out of his life, (3) I feel isolated from him, even

when he's in the same room, (4) I am unhappy being shut off from him, (5) No one really knows me well.

Women may soon find that loneliness has become a part of their lives whether they are living alone or "in a relationship," because loneliness is more a state of mind than it is a social situation. People who find themselves trapped in a relationship may be lonelier than a person living alone. The fundamental issue is whether they reach out and develop strong relationship bonds.

Crowded Loneliness

Loneliness, it turns out, is not just a problem of the individual. Loneliness is endemic to our modern, urban society. In rural communities, although the farmhouses are far apart, community is usually very strong. Yet in our urban and suburban communities today, people are physically very close to each other but emotionally very distant from each other. Close proximity does not translate into close community.

Dr. Roberta Hestenes at Eastern College has referred to this as "crowded loneliness." She observed that "we are seeing the breakdown of natural community network groups in neighborhoods like relatives." We don't know how to reach out and touch people, and this produces the phenomenon of crowded loneliness.

Another reason for social isolation is the American desire for privacy. Though many desire to have greater community and even long for a greater intimacy with others, they will choose privacy even if it means a nagging loneliness. Ralph Keyes, in his book *We the Lonely People*, says that above all else Americans value mobility, privacy, and convenience. These three values make developing a sense of community almost impossible. In his book *A Nation of Strangers*, Vance Packard

argued that the mobility of American society contributed to social isolation and loneliness. He described five forms of uprooting that were creating greater distances between people.

First is the uprooting of people who move again and again. An old Carole King song asked the question, "Doesn't anybody stay in one place anymore?" At the time when Packard wrote the book, he estimated that the average American would move about 14 times in his lifetime. By contrast, he estimated that the average Japanese would move five times.

The second is the uprooting that occurs when communities undergo upheaval. The accelerated population growth along with urban renewal and flight to the suburbs have been disruptive to previously stable communities.

Third, there is the uprooting from housing changes within communities. The proliferation of multiple-dwelling units in urban areas crowd people together who frequently live side by side in anonymity.

Fourth is the increasing isolation due to work schedules. When continuous-operation plants and offices dominate an area's economy, neighbors remain strangers.

Fifth, there is the accelerating fragmentation of the family. The steady rise in the number of broken families and the segmentation of the older population from the younger heightens social isolation. In a very real sense, a crisis in relationships precipitates a crisis in loneliness.

Taken together, these various aspects of loneliness paint a chilling picture of loneliness in the 21st century. But they also present a strategic opportunity for the church. Loneliness will be on the increase in this century due to technology and social isolation. Christians have an opportunity to minister to people cut off from normal, healthy relationships.

The Bible addresses this crisis of loneliness. David called out to the Lord because he was “lonely and afflicted” (Psalm 25:16). Jeremiah lamented that he “sat alone because your hand was on me and you had filled me with indignation” (Jeremiah 15:17). And Jesus experienced loneliness on the cross, when He cried out, “My God, my God, why have you forsaken me?” (Mark 15:34).

The local church should provide opportunities for outreach and fellowship in their communities. Individual Christians must reach out to lonely people and become their friends. We must help a lost, lonely world realize that their best friend of all is Jesus Christ.

The Rise of the Nones —

Reaching the Lost in Today's America

Steve Cable addresses James White's book The Rise of the Nones in view of Probe's research about the church.

Probe Ministries is committed to updating you on the status of Christianity in America. In this article, we consider James White's book, *The Rise of the Nones, Understanding and Reaching the Religiously Unaffiliated*.[\[1\]](#) His book addresses a critical topic since the fastest-growing religious group of our time is those who check "none" or "none of the above" on religious survey questions.

Let's begin by reviewing some observations about Christianity in America.

From the 1930's[\[2\]](#) into the early 1990's the percentage of *nones* in America[\[3\]](#) was less than 8%. But by 2012, the number had grown to 20% of all adults and appears to be increasing. Even more alarming, among those between the ages of 18 and 30 the percentage grew by a factor of three, from 11% in 1990 to nearly 32% in 2012.

Another study reported Protestantism is no longer the majority in the U.S., dropping from 66% in the 1960's down to 48% in 2012.

The *nones* tend to consider themselves to be liberal or moderate politically, in favor of abortion and same-sex

marriage being legal, and seldom if ever attend religious services. For the most part, they are not atheists and are not necessarily hostile toward religious institutions. However, among those who believe in “nothing in particular,” 88% are not even looking for a specific faith or religion.

One report concludes, “The challenge to Christianity . . . does not come from other religions, but from a rejection of all forms of organized religions. They’re not thinking about religion and rejecting it; they are not thinking about it at all.”^{4} In fact, the 2011 Baylor survey found that 44% of Americans said they spend no time seeking “eternal wisdom,” and a Lifeway survey found that nearly half of Americans said they never wonder whether they will go to heaven.

As White notes, these changes in attitude come in the wake of a second major attack on traditional Christian beliefs. The first set of attacks consisted of:

1. Copernicus attacking the existence of God
2. Darwin attacking God’s involvement in creation, and
3. Freud attacking our very concept of a creator God.

The second storm of attacks focuses on perceptions of how Christians think in three important areas.

1. An over entanglement with politics linked to anti-gay, sexual conservatism, and abrasiveness
2. Hateful aggression that has the church talking in ways that have stolen God’s reputation, and
3. An obsession with greed seen in televangelist transgressions and mega-pastor materialism, causing distrust of the church.

These perceptions, whether true or not, create an environment where there is no benefit in the public mind to self-

identifying with a Christian religious denomination.

Living in a Post-Christian America

A 2013 Barna study^{5} shows America rapidly moving into a post-Christian status. Their survey-based study came to this conclusion: over 48% of young adults are post-Christian, and “The influence of post-Christian trends is likely to increase and is a significant factor among today’s youngest Americans.”^{6}

White suggests this trend is the result of “three deep and fast-moving cultural currents: secularization, privatization, and pluralization.”^{7}

Secularization

Secularization teaches the secular world is reality and our thoughts about the spiritual world are fantasy. White states: “We seem quite content to accept the idea of faith being privately engaging but culturally irrelevant.”^{8} In a society which is not affirming of public religious faith, it is much more difficult to hold a vibrant, personal faith.

Privatization

Privatization creates a chasm between the public and private spheres of life, trivializing Christian faith to the realm of opinion. Nancy Pearcey saw this, saying, “The most pervasive thought pattern of our times is the two-realm view of truth.”^{9} In it, the first and public realm is secular truth that states, “Humans are machines.” The second and private realm of spirituality states, “Moral and humane ideals have no basis in truth, as defined by scientific naturalism. But we affirm them anyway.”^{10}

Pluralization

Pluralization tells us all religions are equal in their lack

of ultimate truth and their ability to deliver eternity. Rather speaking the truth of Christ, our post-modern ethic tells us we can each have our own truth. As reported in our book, *Cultural Captives*[{11}](#), about 70% of evangelical, emerging adults are pluralists. Pluralism results in making your own suit out of patches of different fabrics and patterns and expecting everyone else to act as if it were seamless.

White sums up today's situation this way: "They forgot that their God was . . . radically other than man . . . They committed religion functionally to making the world better in human terms and intellectually to modes of knowing God fitted only for understanding this world."[{12}](#)

This combination of secularization, privatization and pluralization has led to a mishmash of "bad religion" overtaking much of mainstream Christianity. The underlying basis of the belief systems of *nones* is that there is a lot of truth to go around. In this post-modern world, it is considered futile to search for absolute truth. Instead, we create our own truth from the facts at hand and as necessary despite the facts. Of course, this creates the false (yet seemingly desirable) attribute that neither we, nor anyone else, have to recognize we are sinners anymore. With no wrong, we feel no need for the ultimate source of truth, namely God.

If You Build It, They Won't Come

We've been considering the beliefs and thinking of the *nones*. Can we reach them with the gospel, causing them to genuinely consider the case for Christ?

We are not going to reach them by doing more of the same. Statistics indicate that we are not doing a good job of reaching the *nones*.

As James White notes, "The very people who say they want unchurched people to . . . find Jesus resist the most basic .

. . issues related to building a relationship with someone apart from Christ, . . . and inviting them to an open, winsome, and compelling front door so they can come and see.”{13}

Paul had to change his approach when addressing Greeks in Athens. In the same way, we need to understand how to speak to the culture we want to penetrate.

In the 1960’s, a non-believer was likely to have a working knowledge of Christianity. They needed to personally respond to the offer of salvation, not just intellectually agree to its validity. This situation made revivals and door-to-door visitation excellent tools to reach lost people.

Today, we face a different dynamic among the *nones*. “The goal is not simply knowing how to articulate the means of coming to Christ; it is learning how to facilitate and enable the person to progress from [little knowledge of Christ], to where he or she is able to even consider accepting Christ.”{14}

The rise of the *nones* calls for a new strategy for effectiveness. Today, cause should be the leading edge of our connection with many of the *nones*, in terms of both arresting their attention and enlisting their participation.

Up through the 1980s, many unchurched would respond for salvation and then be incorporated into the church and there become drawn to Christian causes. From 1990 through the 2000s, unchurched people most often needed to experience fellowship in the body before they were ready to respond to the gospel. Today, we have *nones* who are first attracted to the causes addressed by Christians. Becoming involved in those causes, they are attracted to the community of believers and gradually they become ready to respond to the gospel.

We need to be aware of how these can be used to offer the good news in a way that can penetrate through the cultural fog. White puts it this way, “Even if it takes a while to get to

talking about Christ, (our church members) get there. And they do it with integrity and . . . credibility. . . Later I've seen those *nones* enfolded into our community and before long . . . the waters of baptism."[{15}](#)

Relating to *nones* may be outside your comfort zone, but God has called us to step out to share His love.

Combining Grace and Truth in a Christian Mind

Every day we are on mission to the unchurched around us. James White suggests ways we can communicate in a way that the *nones* can understand.

We need to take to heart the three primary tasks of any missionary to an unfamiliar culture. First, learn how to communicate with the people we are trying to reach. Second, become sensitized to the new culture to operate effectively within it. Third, "translate the gospel into its own cultural context so that it can be heard, understood, and appropriated."[{16}](#)

The growth of the *nones* comes largely from Mainline Protestants and Catholics, right in the squishy middle where there is little emphasis on the truth of God's word. How can we confront them with truth in a loving way?

The gospel of John tells us, "Grace and truth came through Jesus Christ."[{17}](#) Jesus brought the free gift of grace grounded in eternal truth. As we translate the gospel in today's cultural context for the *nones*, this combination needs to shine through our message. What does it look like to balance grace and truth?

- If we are communicating no grace and no truth, we are following the example of Hinduism.

- If we are high on grace – but lacking in truth, we give license to virtually any lifestyle and perspective, affirming today’s new definition of tolerance.
- On the other hand, “truth without grace: this is the worst of legalism . . . – what many *nones* believe to be the hallmark of the Christian faith.” The real representative of dogma without grace is Islam.” In a survey among 750 Muslims who had converted to Christianity, they said that as Muslims, they could never be certain of their forgiveness and salvation as Christians can.
- Grace is the distinctive message of Christianity but never remove it from the truth of the high cost Christ paid. Jesus challenged the religious thought of the day with the truth of God’s standard. Recognizing we cannot achieve that standard, we are run to the grace of God by faith.

To communicate the truth, we need to respond to the new questions *nones* are asking of any faith. As White points out, “I do not encounter very many people who ask questions that classical apologetics trained us to answer . . . Instead, the new questions have to do with significance and meaning.” Questions such as, “So, what?” and “Is this God of yours really that good?”

We need to be prepared to “give a defense for the hope that is within us” in ways that the *nones* around us can resonate with, such as described in our article *The Apologetics of Peter* on our website.

Opening the Front Door to *Nones*

The *nones* desperately need the truth of Jesus, yet it is a challenge to effectively reach them. “Reaching out to a group of people who have given up on the church, . . . we must renew our own commitment to the very thing they have rejected – the church.”[\[18\]](#) The fact that some in today’s culture have

problems with today's church does not mean that God intends to abandon it.

The church needs to grasp its mandate "to engage in the process of 'counter-secularization'. . . There are often disparaging quips made about organized religion, but there was nothing disorganized about the biblical model."[{19}](#) We all have a role to play in making our church a force for the gospel in our community.

It must be clear to those outside that we approach our task with civility and unity. Our individual actions are not sufficient to bring down the domain of darkness. Jesus told us that if those who encounter the church can sense the unity holding us together they will be drawn to its message.

How will the *nones* come into contact with the unity of Christ? It will most likely be through interaction with a church acting as the church. As White points out, "If the church has a "front door," and it clearly does, why shouldn't it be . . . strategically developed for optimal impact for . . . all *nones* who may venture inside?"[{20}](#) Surveys indicate that 82 percent of unchurched people would come to church this weekend if they were invited by a friend.

One way we have a chance to interact with *nones* is when they expose their children to a church experience. Children's ministry is not something to occupy our children while we have church, but is instead a key part of our outreach to the lost *nones* in our community. "What you do with their children could be a deal breaker."

In today's culture, we cannot overemphasize the deep need for visual communication. Almost everyone is attuned to visually receiving information and meaning. By incorporating visual arts in our church mainstream, "it has a way of sneaking past the defenses of the heart. And *nones* need a lot snuck past them."[{21}](#)

We need to keep evangelism at the forefront. “This is no time to wave the flag of social ministry and justice issues so single-mindedly in the name of cultural acceptance and the hip factor that it becomes our collective substitute for the clear articulation of the gospel.”[\[22\]](#)

White clearly states our goal, “Our only hope and the heart of the Great Commission, is to stem the tide by turning the nones into wons.”[\[23\]](#)

Smuggling Theology Into “Out of the Silent Planet”

Dr. Michael Gleghorn provides an overview of how C.S. Lewis wove theology into his ‘Out of the Silent Planet,’ the first book of his space trilogy,

Out of the Silent Planet, C.S. Lewis’ first foray into the science-fiction genre, was originally published in 1938.^{1} Lewis, who appreciated the science-fiction stories of authors like H. G. Wells, was nonetheless troubled by elements in these stories that were morally and intellectually objectionable. According to Alister McGrath, Lewis realized “that the forms of science fiction . . . used to promote various forms of atheism and materialism could . . . be used to *critique* these viewpoints and advocate an alternative.”^{2} This is what Lewis *did* in *Out of the Silent Planet*—and what he *continued* to do in two follow-up books: *Perelandra* and *That Hideous Strength*. Together, these books are commonly known as “the Space Trilogy.”

Out of the Silent Planet tells the story of Dr. Elwin Ransom, who is drugged, kidnapped, and taken aboard a spaceship traveling to Mars. Weston and Devine, the two men who kidnap Ransom, have been to Mars before and believe that the planet's inhabitants want them to bring back another human being (wrongly assuming that the person *may* be wanted as a sacrificial offering). Weston is a physicist, interested in finding potential planets for humanity to colonize once our own planet becomes uninhabitable. Devine is an investor, hoping to make some money from the enterprise.

On their way to Mars (known as Malacandra to its own inhabitants), Ransom learns that his life may be in danger once they reach the planet. Hence, shortly after their arrival, Ransom escapes his kidnappers and ends up meeting a creature called a Hross, one of the planet's native inhabitants. He soon discovers that, much like himself, these are intelligent and moral beings. Indeed, in some ways they, along with the other intelligent species on the planet, are superior to human beings, for they have not been infected with the same moral illness that plagues our own species. Eventually, Ransom even meets the designated ruler of the planet, a spiritual intelligence referred to as an Oyarsa. He then learns why earth is known as "the silent planet."[\[3\]](#)

After publishing the book, Lewis confided to one interested correspondent that most of the early reviews had completely missed of Christian theology that he had woven into his narrative. He humorously noted that, apparently, "any amount of theology can now be smuggled into" such a book without anyone's even noticing.[\[4\]](#) So how much theology did Lewis "smuggle into" *Out of the Silent Planet*? That's what we'll discuss in the remainder of this article.

The Heavens Declare the Glory

As Weston, Devine, and Ransom travel through space on their way to Mars, Ransom is surprised by just how *good* he is feeling: courageous, joyful, alert, and full of life. He reflects upon the fact that he had been educated to regard space as “the black, cold vacuity” separating the worlds. He comes to realize, however, that this was all wrong. The term “space,” he muses, was utterly inadequate “for this . . . ocean of radiance in which they swam.” He thus *rejects* the term, observing that “Older thinkers had been wiser when they named it simply the heavens—the heavens which declared the glory.”[\[5\]](#)

Ransom is here reflecting upon the words of King David in Psalm 19:1, “The heavens declare the glory of God; the skies proclaim the work of his hands.” As one commentator remarks, “David was moved by observing that the heavens, under the dominating influence of the sun, declare the splendor of God’s handiwork.”[\[6\]](#) The reference to the sun here is apt, for it is largely through the influence of the solar rays that Ransom feels “his body and mind daily rubbed and scoured and filled with new vitality.”[\[7\]](#)

Of course, we must remember that Lewis is here writing science *fiction*—and not science fact. While “the substitution of heaven for space” was Lewis’s “favorite idea in the book,” he also acknowledged “that the rays in interplanetary space, so far from being beneficial,” would actually be harmful to us.[\[8\]](#) But Lewis was attempting to reintroduce a conception of wonder and beauty into the world. He wanted to move his readers’ understanding of “space” from something merely cold, dark, and dead, to a conception of the “heavens” as something radiant and alive with the goodness and bounty of their Creator. And this, in the fictional (and even mythological) world of the story, he has arguably achieved.

Indeed, it’s one of the reasons that many dislike referring to

these books as “the *space* trilogy.” Such language misses the fact that Lewis was attempting to shift our attention from the darkness and deadness of “space” to the glory and splendor of the “heavens.” It’s just one of the ways in which Lewis was attempting to reclaim for God a genre of literature that was so often dominated by atheistic and materialistic forms of thinking.[\[9\]](#)

War in Heaven

Before we go any further, we must address the meaning of Lewis’s title, “*Out of the Silent Planet*.” The novel concerns a voyage from Earth to Mars, and details the adventures of the main character, Dr. Elwin Ransom, after his arrival. In the novel, Earth is known as “the *silent* planet.” But why?

The answer has partly to do with “smuggled theology” and partly with the mythological world of the story created by Lewis. In this mythological world, we are introduced to the idea that each planet in our solar system is ruled by a very great, though still created, spiritual being. These beings were created by God and are something like a cross between a Christian archangel and a Roman god or goddess. Hence, the spirit that governs Mars is something like a cross between the archangel Michael and the Roman god Mars (devoid, of course, of all the negative characteristics traditionally ascribed to Mars in Greco-Roman mythology). In fact, this being is a loyal servant of God and was created (at least in part) for the purpose of ruling the planet assigned to it. In the novel, such a ruling spiritual power is referred to as an *Oyarsa*.

Eventually, Ransom meets this ruling power and learns why Earth is known as “the silent planet.” He is told that the *Oyarsa* of *our* world was once very great, even greater than that of Mars.[\[1\]](#)¹⁰ Unfortunately, however, he became “bent” (or evil). This happened in the distant past, before there was any life on Earth. Because this “Bent One” desired to destroy

“other worlds besides his own,” there was “great war” in the heavens. Eventually, he was “bound . . . in the air of his own world.” “There,” Ransom learns, “doubtless he lies to this hour.”[{11}](#) The other planets have no communication with Earth. It is “silent.”

Do you see what Lewis is doing? In the fictional world of the novel, he is telling us a story very similar to that of the fall of the devil. In the Bible, the Apostle Paul refers to Satan as the “prince of the power of the air” (Ephesians 2:1-2) and the “god of this world” (2 Corinthians 4:4). Lewis is doing something similar in his description of the “Bent One” who rules the Earth as a rebel against God. But Lewis goes much further than this.

War on Earth

Above, we left Ransom, the hero of C. S. Lewis’s novel, *Out of the Silent Planet*, deep in conversation with the divinely appointed spiritual ruler of Mars. After telling Ransom that Earth, alone among the planets in our solar system, is “silent,” being ruled by a “bent” (or evil) power, the Martian ruler then says something quite intriguing.

He tells Ransom that they do not think that “Maleldil” (more on this in a moment) would completely surrender Earth to the “Bent One.” Indeed, he says, “there are stories among us” that Maleldil has done some “strange” and wonderful things, even personally appearing on Earth and “wrestling with the Bent One” for the right to rule. “But of this,” he says, “we know less than you; it is a thing we desire to look into.”[{12}](#)

So who is Maleldil, and what exactly has he done? In the world of the novel, Maleldil is the name for God in the Old Solar language, which Ransom has gradually learned during his time on Mars.[{13}](#) Hence, the Martian ruler is essentially telling Ransom that they do not believe that God would completely

surrender Earth to the devil. Indeed, they have even heard stories that God (or Maleldil) has visited “the silent planet” and done battle with the evil one. He admits that there is much they do not know about all this but says that he (and other loyal servants of God) long to look into these things.

Those familiar with the Bible will doubtless see what Lewis is doing here, for he concludes this passage with what is basically a biblical quotation. The Apostle Peter wrote of “the prophets who prophesied about the grace” that was to be ours in Christ. So great was the content of this revelation, notes Peter, that even “angels long to look” into such things (1 Peter 1:10-12). Thus, as Christiana Hale rightly notes, the “strange counsel” that Maleldil has taken, and the wonderful things he has done, “the things that all the angels desire to look into, is the Gospel of Jesus Christ: the Incarnation, birth, death, and resurrection of the Son of God.”[{14}](#)

Once again, therefore, we see Lewis “smuggling theology” into his interplanetary space adventure. In this case, though not stating it explicitly, he clearly alludes to the whole gospel message about Jesus. Next, we’ll consider one final example of “smuggled theology” in C. S. Lewis’s *Out of the Silent Planet*.

Divine Providence and the Martial Spirit

Although God, who is known as Maleldil in the novel, is mentioned repeatedly, He is always mentioned in the third person. We hear about things that Maleldil *has done, is doing,* or may one day *do*, but we do not hear directly from God (or Maleldil) himself. Nevertheless, it is clear that He is ultimately in charge, and He is providentially at work in and through His creatures.[{15}](#)

For example, the spiritual power that Maleldil created to govern Mars, tells Ransom (the hero of the novel) that it was only by Maleldil that he had been able to save his own planet

from the destructive rage of the “Bent One” (or devil). Indeed, it was only by Maleldil that the heavenly host were able to stop the “Bent One’s” ambitious cruelty and confine him to the Earth.[{16}](#) Moreover, we learn that Maleldil has done marvelous things and even personally visited Earth to do battle with the devil.[{17}](#)

Lewis thus portrays God (or Maleldil) not only as a king, but also as a warrior. He is characterized (in an appropriate way) by what might be called the “warrior” or “martial spirit.” Moreover, the spiritual power that Maleldil created to govern Mars is also (like the god of Roman mythology) imbued with the martial spirit. He, too, is a warrior, loyally engaged in fighting in the service of God. In light of this, once we learn that Ransom has been called to Mars by its planetary ruler, we can rightly surmise that it was, in fact, *God’s will* for Ransom to make this journey. We might even guess that one of the purposes of this journey was to develop the “martial spirit” in Ransom himself.

As Christiana Hale observes, “Lewis does not randomly pick Mars as the location, as if any alien planet would do. No, he chooses Mars for a reason, and an enormous part of that reason is to mold Ransom into a Martial character.”[{18}](#) In other words, God (or Maleldil) wants to develop certain martial virtues in Ransom, things like courage, strength, determination, perseverance, and grit. Indeed, this is providentially necessary, for He is preparing Ransom for something far greater in the future. Hence, through the providence of God and the influence of Mars, we witness Ransom’s growth in the martial spirit, thus preparing him for [his next great adventure](#) on a different alien world, that of Perelandra.
