Social Media

*Kerby Anderson assesses how social media’s influence is changing our brains and the way we think. He also provides an overview of censorship within social media.*

The influence of social media in our society has increased dramatically in the last decade. This leads to two very important questions. First, how are the various forms of social media and these digital devices affecting us? Second, should we respond to the documented examples of censorship on these social media platforms?

**Social Media Influence**

More than a decade ago, social scientists and social commentators expressed concern about how the Internet in general and social media in particular was influencing us. Nicholas Carr raised this question in an *Atlantic* article entitled “Is Google Making Us Stupid?” He observed that “Over the past few years I’ve had an uncomfortable sense that someone, or something, has been tinkering with my brain, remapping the neural circuitry, reprogramming the memory.” He believed this came from using the Internet and searching the web with Google.

He later went on to write a book with the arresting title, *The Shallows: What the Internet Is Doing to Our Brains*. He surveyed brain research that helped to explain why we don’t read as much and why it is so hard to concentrate. The Internet and social media are retraining our brains. He says, “Once I was a scuba diver in the sea of words. Now I zip along the surface like a guy on a Jet Ski.”

A developmental psychologist at Tufts University put it this way. “We are not only what we read. We are how we read.” The style of reading on the Internet puts “efficiency” and “immediacy” above other factors. Put simply, it has changed the way we read and acquire information.

You might say that would only be true for the younger generation. Older people are set in their ways. The Internet could not possibly change the way the brains of older people download information. Not true. The 100 billion neurons inside our skulls can break connections and form others. A neuroscientist at George Mason University says: “The brain has the ability to reprogram itself on the fly, altering the way it functions.”

The proliferation of social media has also begun to shorten our time of concentration. Steven Kotler made this case in his *Psychology Today* blog, “How Twitter Makes You Stupid.” He once asked the author of the best-selling book why he called it the “8 Minute Meditation.” The author told him that eight minutes was the length of time of an average segment of television. He reasoned that “most of us already know exactly how to pay attention for eight minutes.”

Steven Kotler argues that Twitter was reducing the time of concentration to 140 words (back when that was the word limit). He showed how Twitter was constantly tuning “the brain to reading and comprehending information 140 characters at a time.” He concluded that “[I]f you take a Twitter-addicted teen and give them a reading comprehension test, their comprehension levels will plunge once they pass the 140 word mark.”

Not only is there a problem with concentration; there is a problem with distraction. A study at the University of Illinois found that if an interruption takes place at a natural breakpoint, then the mental disruption is less. If it came at a less opportune time, the user experienced the “where was I?” brain lock.
Another problem is what is called “continuous partial attention.” People who use mobile devices often use their devices while they should be paying attention to something else. Psychologists tell us that we really aren’t multitasking, but rather engage in rapid-fire switching of attention among tasks. It is inevitable they are going to miss key information if part of their focus is on their digital devices.

There is also the concern that social media and digital devices are reducing our creativity. Turning on a digital device and checking social media when you are “doing nothing” replaces what we used to do in the days before these devices were invented. Back then, we called it “daydreaming.” That is when the brain often connects unrelated facts and thoughts. You have probably had some of your most creative ideas while shaving, putting on makeup, or driving. That is when your brain can be creative. Checking e-mail and social media sites reduces daydreaming.

These new media platforms present a challenge to us as Christians. As we use these new forms of media, we should always be aware of their influence on us. They can easily conform us to the world (Romans 12:2). Therefore, we should make sure that we are not taken captive (Colossians 2:8) by the false philosophies of the world.

Christians should strive to apply the principle set forth in Philippians 4:8. “Finally, brothers, whatever is true, whatever is honorable, whatever is just, whatever is pure, whatever is lovely, whatever is commendable, if there is any excellence, if there is anything worthy of praise, think about these things.”

A wise Christian will use discernment when approaching the various social media platforms. They provide lots of information and connect us with people around the world. But we should also guard against the worldly influence that is also promoted on many of these platforms.

**Social Media Censorship**

Big Tech companies have been censoring content for many years. Many years ago, the National Religious Broadcasters began monitoring censorship on these social media platforms through their John Milton Project for Religious Free Speech. Even back then, their report concluded that “The free speech liberty of citizens who use the Internet is nearing a crisis point.”

A recent Senate hearing provided lots of additional examples. Senator Marsha Blackburn asked why her pro-life ad was pulled during the 2018 campaign because Twitter deemed it “inflammatory.” It is worth noting that she did receive an apology from the executive who added that they made a “mistake on your ad.” Senator Ted Cruz pointed to a Susan B. Anthony List ad that was banned. It had a picture of Mother Teresa with her quote: “Abortion is profoundly anti-woman.” At the top of the poster in the committee room was the word: CENSORED.

A number of commentators (Laura Loomer, Milo Yiannopoulos, Alex Jones) have been banned from Facebook and Instagram. Steven Crowder’s YouTube channel has been demonetized. Nearly two-dozen PragerU videos have been slapped with a restricted label on YouTube. The list goes on and on.

Big tech does control much of the media world. Google controls 90% of worldwide search, 75% of smartphone operating systems, 67% of desktop browser, and 37% of digital advertising. Add to this other platforms like Twitter, Instagram, and YouTube that also have a profound influence. At the Senate hearing, Ted Cruz noted that these big tech companies “are larger and more powerful than Standard Oil was when it was broken up” and “larger and more powerful than AT&T when it was broken up.” But does that mean government should get involved?
Those who are advocating government intervention make the case that “platform access is a civil right.” The argument is that private companies are actually violating the civil rights of Americans in the same way that preventing someone to speak in a public park would be a violation. They argue that the big tech companies are a monopoly. And they call for federal and state regulation of these social media platforms arguing that the Supreme Court has argued in the past that government cannot restrict your access to the public square.

The problem with that argument is two-fold. First, these big tech companies are private companies not the government. Facebook, Twitter and YouTube platforms are private property and not the public square. We may not always like what they do, but they are privately owned technology companies and not the federal government, which is governed by the First Amendment.

Second, these companies are protected by a section of the 1996 Communications Decency Act that keeps them from being exposed to potentially crippling liability for something posted on their platform. Some politicians have called for changing that legal protection, but Congress seems unlikely to do anything like that in the near future.

Many conservatives are wary of having the government get involved in patrolling social media platforms. They remind us of the 1949 FCC Fairness Doctrine. This regulation was supposed to provide an opportunity for media outlets to provide content that was fair, honest, and balanced. Talk radio and other forms of media exploded once the Fairness Doctrine was removed. In most cases, government regulation of the media hurt conservative voices more than helped them.

Even if government were to regulate content on social media platforms, it is worth mentioning that the major tech companies would probably have lots of influence. Facebook and Mark Zuckerberg would have a place at the table as government drafted various media regulations. It is likely that company and many others might even help craft regulations that would protect them from future competitors. We have seen this picture before in other instances when government intervened.

Some have even suggested that we close our social media accounts. If you don’t like the way the New York Times or the Washington Post reports stories or provides commentary from people on your side, you don’t have to subscribe to those newspapers. If you don’t like how MSNBC or Fox News covers stories, you don’t have to tune to that TV network. Media outlets are already choosing what to print or broadcast. Social media platforms are no different.

Sam Sweeney has this advice: “Delete your Facebook, yesterday. Don’t get your news from Twitter. The issues of free speech on social media will no longer matter to you. They don’t matter to me. I’ve made a decision not to subjugate myself to the whims of our new overloads.”

I think most of us want to keep our social media accounts because of the benefit we receive. But I also realize that in light of what we have discussed in this article, many will decide to follow his advice and drop one or more of these social media accounts. We leave that decision to you.

What is Art, Anyway?

When my dear friend Laura Helms told me about integrating her biblical worldview with how she teaches high school art, I was fascinated and asked her to write about her approach.

For the last nine years I have had the privilege of teaching visual arts in the public school system here in Texas. Each year I start off with one question on the board: “What is art?” Students give a wide range of answers but they usually land somewhere near the phrase “art can be whatever you want it to be.”

This year I laid out an assortment of objects ranging from pottery to paintings to piles of trash that I pulled from the garbage can that morning. Through many giggles and lots of questions, many of the students still firmly asserted that all of these items could be considered “art.” While you may agree or disagree with the used candy wrapper being called “art,” art is a form of visual communication that encompasses the values and beliefs of the maker. Effective art communicates those beliefs clearly to the viewer. And I believe good art communicates truth to the viewer.

I don’t get upset when my students hold the candy wrapper up as “art.” I don’t get upset because I know why they think that way. Matthew 6:22-23 says, “The eye is the lamp of the body. So, if your eye is healthy, your whole body will be full of light, but if your eye is bad, your whole body will be full of darkness. If then the light in you is darkness, how great is the darkness!” My primary goal as an art teacher is to help students learn how to see clearly. The goal is to teach them to look for truth—objective truth rather than subjective truth.

Art history is a reflection of what cultures believe about truth. The shift in western art movements
closely correlates to changes in public value systems. Nietsche famously wrote “God is dead” in the late 1800s. After two world wars, the rise of Nihilism in the West, and the elevation of reactionary self-determination supported by the growing popularity of psychology, artistic thought turned inward for answers to the human experience. Artists looked at a world going up in flames and thought to themselves, *Maybe it is true. Maybe I am on my own and this is all there is to life.* Artists created art in their own image, validating their own truths and personal beliefs. When our eyes do not work, we do not see clearly. It is not shocking, but it is heartbreaking. When we exchange the truth of God for a lie (Romans 1:25), we hope to find life in things that cannot give us life.

I want to briefly share with you the journey my students take each year. Together we first identify our beliefs. What do you think the definition of art really is? What is the purpose of art? How do you know if art is good art? We start by identifying what we believe about “art.”

Next, we look at how we came to hold those beliefs. Together we look at history, philosophy and the evolution of Western thought. We talk about wars and Darwin, about appropriation and human rights. We look at the change in technology and how it influenced human interaction. We talk about religion and worldviews. We pinpoint large ideological shifts that show up in history. Did you know that the phrase “art is about personal expression” would have been laughed at before 1900? And the phrase “art can be what I want it to be” didn’t show up in public thought until the 1960s. As a class, we look at these origins and take note of how they have shaped our own thoughts and beliefs about art.

Once students can articulate what they believe about art and the origins of those beliefs, we take a second look. How do you know your beliefs are true? How has your understanding of art changed after your studies? Students think they are profound when they make grandiose statements like “art is whatever I want it to be.” The goal isn’t to change their beliefs. The goal is to teach them to see clearly.

I think we all need to go to art class. At our core, none of us want to be fools, trusting in false hopes. We all desire to see truth. It is my goal to help them learn how to seek it and find it. When was the last time you asked yourself, “How do I know this to be true?”

Now go make some good, weird art.

Are Surveys Fake News?

On March 7, 2019, Probe’s Senior VP Steve Cable gave a one-hour presentation drawing on his decades of statistical research and insight to probe deeply into the trustworthiness of news containing references to surveys. In this message he shows why we should remain skeptical of what surveys purportedly indicate. Sometimes the actual results are directly opposite of what is claimed.

“Gosnell”: The Doctor Who Snuffed Out Babies and His Silencing Accomplices

“Were you guys at the ‘Gosnell’ showing?” asked the older gentleman at the urinal next to me. “Have you ever been in a theater where nobody speaks as they leave the movie?” Two very unusual events had just occurred: the reaction he mentioned and men talking at the toilet! A men’s room discussion ensued, focusing on the heaviness of the topic: abortion and baby killing.

Despite unseasonable cold and rain, my wife and I had sat with a few others in the local theater late on a weeknight. It was the last chance to see a film that’s been just as shut down as the discussion of its topic: killing of babies born alive by an abortionist so unprincipled that he was foresworn by fellow abortionists and pro-abortion advocates. The perpetrator: Dr. Kermit Gosnell. The film bears his name. It is also subtitled, maybe exaggeratedly, “The Trial of America’s Biggest Serial Killer.” But who cares if a few others killed more humans than he did over 30 years’ time? Gosnell is deservedly serving three life sentences for first degree murder for offing who knows how many
newborns as a “service” to poor women.

As we exited the theater, I had nearly commented about the palpable silence, but realized the gravity of the moment and stopped myself. Perhaps it would take a while to process the newly resurrected horror. The alternate thought occurred to me that, even with a likely self-selecting audience of pro-lifers, silence is what got us to the cultural situation we are in regarding abortion. Would anyone even comment?

The “right to choose” has now been superseded by a debate about personhood of fetuses and babies. Christians often remain silent. Many believe fetal sonogram pictures have dealt a blow to the euphemisms. Turns out, it’s a picture that sealed Gosnell’s doom.

The story tells itself, so the film simply needed to be believable. The superbly cast “Gosnell” pulls it off, with characters as diverse as inner-city young women employed by the mad doctor to a suburbanite prosecutor and mother of five to the queerly eccentric, self-justified Gosnell himself. (The lead actor is the actual Gosnell’s doppelganger!) A well-played Emo blogger may have made the difference in prosecuting the deranged doctor, while the mainstream press was absent without leave. Cable TV-level cursing lends a less religious, more real-to-life tone, but it seemed a bit overdone.

“Gosnell’s” biggest strength, unfortunately, is the unraveling of a chamber of horrors haunted by the abortionist’s classical piano playing and taste for exotic flowers. It is surreal. This cat- and exotic turtle-loving, soft dictator’s demise began as a drug case. In a classic storyline, the DEA (Drug Enforcement Agency) and FBI encroach on a local police investigation, forcing the investigation down the cul-de-sac of a mere drug bust. As a law unto himself, Gosnell had become a dealer. No one was prepared for the baby body bags and slime of Gosnell’s “clinic.” That is, the headlines and court case were stranger than fiction—and more disturbing than most. Frankly, the pre-Halloween release seems appropriate. Still, the obvious moral implications and the inevitable appeal to conscience provides a critical reality check for all time, something that cuts through the slogans and euphemisms surrounding abortion.

That tension between the practice no one talks about and the inherent law of right and wrong within human hearts at times splits the screen. The pro-abortion prosecutor subtly rethinks her position as she cuddles her new baby. The most telling scene is the courtroom practice session with the defense lawyer, brilliantly played by Nick Searcy. Here, Gosnell unequivocally states that he has no respect for laws about training healthcare workers up to code. More chillingly, he declares that his diagnosis of fetal-and live-birth babies’ viability is the definitive opinion. In other words, the doctor totally violated the classical “do no harm” doctrine of medicine as aided and abetted by authorities, wantonly violated laws designed to protect women, and played God with babies’ lives even beyond the allowance of Roe-liberalized abortion laws. But truth has a way of emerging. And history repeats itself in a way.

How so? The up-to-the-minute story, which smells as fishy as Gosnell’s clinic and the cover-up-by-negligence that kept him in grim business for a third of a century, is a tale of viewpoint discrimination. The little-known fight to stanch this movie’s release and cancel showings parallels the way that authorities ignored—by decree—the egregious crimes of Gosnell. This week, headlines like “‘Gosnell’ Filmmakers: Theaters Dropping Movie, Preventing People From Buying Tickets” emerged on Christian news web sites—and nowhere else, apparently. “John Sullivan, the film’s producer and marketing director, said, ‘The fact that we’ve been dropped from theaters where the movie is the number 6 or number 9 movie is just something you don’t see. It’s hard not to believe it isn’t about the content of the movie’.”[1] Despite an excellent opening run, Facebook ticket-buyers report refunds from AMC outlets without explanation and in explicable screening cancellations.
It still seems as if there’s a conspiracy to shut down knowledge of the facts. The spirit of the grand jury-convening judge who demanded the case not be about abortion lives on. Recently, NPR played the same card, avoiding the hot button term “abortion.” *The Daily Beast* reports that “National Public Radio’s own past reporting called Kermit Gosnell an ‘abortion doctor.’ But when the makers of a new film [“Gosnell”] wanted to pay to use the phrase on air, no dice.” According to actual events, which comprise most of the screenplay, health officials had direct orders from the governor’s office not to follow up on complaints about the clinic.

Gosnell’s “hellhole” of an abortion mill defied imagination. It was a nasty nest of cat filth and biohazards. Turns out, lots of that biological “waste” were the bodies of infants killed both in the womb past legal dates, whom the butcher-doctor “snipped” in the neck after they were delivered. “As liberal commentator Kirsten Powers wrote at USA Today back in 2013, ‘Infant beheadings. Severed baby feet in jars. A child screaming after it was delivered alive during an abortion procedure. Haven’t heard about these sickening accusations? It’s not your fault.’ Powers continued, ‘Since the murder trial of Pennsylvania abortion doctor Kermit Gosnell began . . . there has been precious little coverage of the case that should be on every news show and front page.’” Years later, the crickets can still be heard. Gosnell’s gruesome methods boggled the mind of jurors and moviegoers. Still, the trial was not allowed to “be a case about abortion.” Nor the film. Yeah, right.

So, the docudrama about a “prolific serial killer” seems to be merely another extension of the strange silence induced by a biased system and a duped public. On a radio interview, the producer said he had to raise funds himself, as with other such independent conservative films. He has faced astonishing resistance at every turn in the four-year process of creating and releasing “Gosnell.” Studios supposedly balk because of controversy, but conservatives know that there is more viewpoint discrimination than anything at work. One would almost think that there are tweaked consciences being defended.

In a monumental scene, the prosecutor shows the gruesome picture of a late-term born-alive baby boy who had been executed by Gosnell. Courtroom fact-finding, arguments, and persuasive appeals gave way to the impact of a picture, worth many more than a thousand words. May the light of day shine on the awful picture of death-dealing in and out of the womb in the court of public opinion and individual hearts and minds. “Gosnell” provides a revealing and compelling picture that will hopefully live on despite the spotty and embattled theater releases.

**Politicized Culture**

*Kerby Anderson examines the politicized nature of American culture, offering the Bible’s antidote of a call to civility.*
Social Media’s Role in Politicizing Issues

I think most of us lament how just about everything in our culture has become politicized. We can attribute that to the fact that we live in a nation that is divided. The clash of worldviews is more apparent than ever before.

In this article I want to talk about the politicized nature of our culture. First I would like to look at how technology has accentuated this problem. In a recent column, Daniel Foster points the finger to social media. The title of his column is “Everything All the Time.”

His perspective is simple. “It is no longer the case that technologies of communication merely accelerate the public discourse, they now ensure that every possible public discourse happens simultaneously.” In other words, we don’t hear these comments one after another. We hear every comment all at the same time.

We have always had conflicts and differences of opinion in this republic. But these seem to have intensified because of the means of our communication. We could work through our differences “at a pace consistent with social cohesion.” Now we “get a no-holds-barred battle royale in which all things are always at stake.”

Football and the national anthem provide a good example. We were told that Colin Kaepernick did not have a job in the NFL because he was either: (a) a terrible quarterback, or (b) was being blackballed by the NFL owners.

Foster argues that the truth was obviously in between: he is a middling NFL talent who might have the job if he didn’t come with so much baggage.

Of course, the discussion quickly moved beyond him to many of the other NFL players that decided to kneel during the national anthem. Either they were presented as saints or traitors. Soon the protests became something else: a referendum on America. Lost in all of that was the reason for the actions of the football players.

The tackle for the Pittsburg Steelers (Alejandro Villanueva) decided to stand for the national anthem with his hand on his heart. As an ex-Army Ranger, he could do nothing less. Yet, he was made a hero by many and criticized by others.

He wasn’t trying to make a statement, and I don’t think he was trying to defy his coach and teammates. He was merely trying to do what he thought was right. He was distressed with how he was being portrayed in the media by both people who approved of his actions and by those who disapproved. He was merely trying to do what he thought was right before playing the game of football.

In this world of new media, everyone’s opinion is available simultaneously. And the most strident opinions are often given more attention because they are the more extreme. There is little time to digest them and evaluate them because they are coming fast and furious.
Politicizing Sport and Education

An NFL player kneeling during the national anthem isn’t the only place where we see a politicized culture.

For example, the controversy over the NFL players seemed to be dying down until President Donald Trump intensified the debate with his speeches and tweets. But politics in sports began long before he became president.

ESPN has been losing viewers, in part, because it has become much more political. Sports journalist Clay Travis put it this way: “Middle America wants to pop a beer and listen to sports talk, they don’t want to be lectured about why Caitlyn Jenner is a hero, Michael Sam in the new Jackie Robinson of sports, and Colin Kaepernick is the Rosa Parks of football.”

In fact, a recent survey validates his conclusions. “The study aggregated 43 different media markets to see the political leanings of ESPN consumers in those markets.”[2] The study found that Republicans were fleeing ESPN in droves. In the last year, the ESPN audience became 5 percent less Republican and ESPN 2 actually became 10 percent less Republican. The biggest partisan shift happened on ESPN News, whose audience became 36 percent less Republican.

Last week the editors at the Wall Street Journal explained why we need some areas of our life that are not dominated by political thought. “Healthy democracies have ample room for politics but leave a larger space for civil society and culture that unites more than divides. With the politicization of the National Football League and the national anthem, the Divided States of America are exhibiting a very unhealthy level of polarization and mistrust.”[3]

Politics has also been a part of education, especially higher education, for some time. Political correctness led to attempts to prevent certain professors from gaining tenure and kept certain speakers from even being allowed to speak on campus. Universities may say they believe in free speech, but I think we all know that certain religious views and political views are essentially banned from the academy.

Politics has now become part of the business world. Just like on college campuses, we see that certain social and political views are not allowed in the corporate world. Just ask employees at Google and Mozilla who lost their jobs because one wrote a memo about gender and diversity and the other gave a donation to support traditional marriage. No wonder America is so polarized. Nearly everything in our world has become political.

This politicized political environment has moved into nearly every area of life, including the military.

Politicizing the Military

The military might be one arena that you could assume would not be politicized. Unfortunately, we have seen how even the military has been affected by the political environment we find ourselves in today.

We have some examples during the 2016 presidential campaign. Candidate Trump seemed to question the heroism of Senator John McCain when he said, “I like people that weren’t captured.” Trump also belittled the Khan family who criticized him at the Democratic Convention. His approval ratings dropped significantly due to his critical comments about that Gold Star family.
More recently, we have seen the controversy that erupted when a Gold Star wife and a member of Congress complained about the way President Trump talked on the phone to her about the loss of her son. Before it was over, you had the media, members of Congress, and key figures in the Trump administration making comments and charges about what was supposed to be a desire to console a mother who lost her son.

In a recent column, Ben Shapiro reminds us that when we politicize a sacred space in our culture it is a serious problem. He believes it is serious “because no culture can exist without certain cultural capital—trust—and that trust exists only when there are certain spaces in which we can assume agreement without having to ask.”

When there is shared agreement, there is communication and less friction. If every issue becomes contentious, then the chances for miscommunication increase. Also the cost of transactions increases dramatically.

One of the cultural taboos (until recently) have been the politicization of Gold Star families. Their loved ones have paid the ultimate sacrifice, and they certainly deserve to be left alone to grieve and rebuild their lives. They should not be at the center of politicized statements.

President George W. Bush provides a good example of how to respond. You might remember that he was the target of a Gold Star mother by the name of Cindy Sheehan. Instead of opposing her or reacting to her, he allowed her to make harsh political statements and did not respond.

It is worth remembering she alleged that Bush went to war for oil. She even said that Bush sent her son to die to make his oil friends rich. She even camped out near his home in Crawford, Texas to protest him. He showed character and restraint.

Perhaps there is a lesson for us to learn. In this politicized environment, we need to be peacemakers as people of integrity and civility. We should practice restraint because it is often better to turn the other cheek. Sometimes it is better not to respond or retaliate. After all, that is what the Bible tells us to do.

**Philosophical and Spiritual Roots of Politicizing**

Why has nearly everything in society become politicized? We have talked about the role of social media and other cultural factors. Today I would like to look at the philosophical and spiritual reasons.

What we are seeing in our society can also be seen in Western civilization. It is the loss of civility. The two words share the same etymology. The root word means to be “a member of the household.” Just as there are certain rules that allow family members to live peacefully within a household, so there are rules of civility that allow us to live peacefully within a society. Those rules have collapsed in the 21st century.

How can we summarize the principles of civility? I believe Jesus simply expressed the goal of civility when he taught that “You shall love your neighbor as yourself” (Matthew 22:39). If we truly love our neighbors, then we should be governed by moral standards that express concern for others and limit our own freedom.

Perhaps that is why civility is on the decline. More and more people live for themselves and do not feel they are morally accountable to anyone (even God) for their actions or behavior. We live in a world of selfishness and narcissism and we aren’t about to let anyone limit our freedom to be
ourselves.

Civility also acknowledges the value of another person. Politeness and manners are not merely to make social life easier. We are to treat each other with respect and afford them the dignity they deserve as people created in the image of God. It is improper not to treat them with the dignity they deserve.

Again, this may help answer why civility is on the decline and political divisions seem to be growing. An increasing majority in our society no longer believes in moral absolutes. A significant number do not believe in God and therefore do not believe we are created in God’s image. The moral restraints that existed in the past are loosed. As this crisis of morality and theology unfolds, so does barbarism and decadence. Civility is what is lost from society.

If this is so, then the rise of rudeness and incivility cannot be easily altered. Miss Manners and others have written books about how our nation can regain its civility. But if the crisis is greater than a lack of manners (and I believe that it is), its solution must be found in a greater social change than merely teaching manners or character.

Ultimately, a return to civility must flow out of a moral and religious change. And I believe Christians should lead the way by exemplary behavior. In essence, Christians must be the best citizens and the best examples of civility in society.

**The Bible’s Antidote**

Let’s turn from the loss of civility and the subsequent rise in a politicized culture to what the Bible has to say about this idea of a civil discourse.

At the heart of civility is the biblical command to love your neighbor as yourself. While it is relatively easy to love people who are your friends or people who are nice to you, the real test of Christian love comes when we are with strangers or with people who are not civil to you. When we find ourselves being criticized in social media or face to face, we should still treat these critics with dignity and respect even if they are not civil to us. Even if they are not gracious toward us, we should not repay them with incivility.

Our duty to be civil to others should not depend on whether we like them or agree with their moral or political perspectives. They may be disagreeable, and we are free to disagree with them, but we should do so by giving grace. Often such a gentle response can change a discussion or dialogue. Proverbs 15:1 reminds us that “A gentle answer turns away wrath.”

Civility also demands that we not retaliate. The Apostle Paul teaches in Romans (12:9, 14, 21) we are to “Abhor what is evil; hold fast to what is good.” Paul goes on to say that we should “Bless those who persecute you; bless and do not curse them.” Finally, he concludes, “Do not be overcome by evil, but overcome evil with good.”

Civility also requires humility. A civil person acknowledges that he or she does not possess all wisdom and knowledge. Therefore, one should listen to others and consider the possibility that they might be right and that he is wrong. Philippians 2:3 says, “Do nothing from selfishness or empty conceit, but with humility of mind let each of you regard one another as more important than himself.”

Civility also requires that we watch what we say. The Bible clearly warns us of the danger of the tongue in James 3:5-8. We should watch what we say and what we write.
We should work to cleanse our language of harsh, critical, and condemning words. We should rid ourselves of nasty and vulgar language. Ephesians 4:29 says, “Let no unwholesome word proceed from your mouth, but only such a word as is good for edification according to the need of the moment, that it may give grace to those who hear.”

In summary, we should be a positive example as we engage the world. We should do so with courage, compassion, character, and civility.

**A Pilgrim’s Progress: Suffering in the Life of John Bunyan - A Christian View of Suffering**

Dr. Michael Gleghorn considers the lessons presented by the life and writings of the famous author of The Pilgrim’s Progress to give each of us a better understanding of the role of suffering in the lives of followers of Christ.

**A Suffering Pilgrim**

John Bunyan is known to most people today as the author of The Pilgrim’s Progress, a book he began writing in prison. It tells the story of “Christian,” who makes his way from the “City of Destruction” (which represents this world) to the “Celestial City” (which represents Heaven). It’s been described as “perhaps the world’s best-selling book” (after the Bible), and has been “translated into over 200 languages.”[1] Written in the form of an allegory, it essentially relates the story of Bunyan’s own Christian journey.[2] And just as his life was full of trials and suffering, so also “Christian” must face many hardships and difficulties as well.

Bunyan was born in England in 1628 at a time of great political and religious unrest. In 1644, at just fifteen years old, both his mother and sister died within a month of each other. Later that year,
“when Bunyan had turned sixteen, he was drafted into the Parliamentary Army and for about two years was taken from his home for military service.”[3] He married in 1648, at about the age of twenty, but his wife died just ten years later, leaving him with four children, the oldest of whom was blind. He married again the following year, in 1659, but incredibly, just one year after this, “Bunyan was arrested and put in prison.”[4] His wife, who was pregnant at the time, suffered a miscarriage, probably because of the added stress which this ordeal created. She was then left to care for Bunyan’s four children while he spent the next twelve years in jail.[5]

As you can see, Bunyan was no stranger to suffering. Indeed, he had an intimate, firsthand acquaintance with heartache, trials, and difficulties. But what crimes had he committed to be cast into prison? Essentially, the charges against him were two: first, “he refused to attend the services of the Established church” of England; and second, he “preached to unlawful assemblies.”[6] You see, Bunyan had converted to Christianity during his first marriage and had become a powerful and respected preacher. But in the volatile political and religious climate of that day, the freedom of Nonconformist preachers like Bunyan eventually came to an end. And when it did, he was arrested and put in prison.

In the remainder of this article we’ll look at some of the trials this man endured, how he responded to them, and what they might teach us as we each make our own spiritual journey.

**The Pilgrim’s Conversion**

*The Pilgrim’s Progress* is one of the best-selling Christian books of all time. But as Bunyan tells us in another of his books, the autobiographical *Grace Abounding to the Chief of Sinners*, before becoming a Christian he had few equals in “cursing, swearing, lying and blaspheming the holy name of God.” Indeed, prior to his marriage, he says he was “the very ring-leader of all the youth . . . into all manner of vice and ungodliness.”[7]

Bunyan’s young wife had a very godly father. When he died, he left her two books which she brought into her marriage: *The Plain Man’s Pathway to Heaven* and *The Practice of Piety*. According to Bunyan, although these books did not awaken him to his “sad and sinful state,” they nevertheless did arouse within him “some desires to religion.”[8] One of the practical effects of these new desires was Bunyan’s regular attendance at a local church.

Soon Bunyan also began to read the Bible. He then came under such powerful conviction of sin that he scarcely knew what to do. “Sin and corruption,” he wrote, “would as naturally bubble out of my heart, as water would bubble out of a fountain. . . I thought none but the devil himself could equalize me for inward wickedness and pollution of mind.”[9] Bunyan was plunged into a state of despair over the greatness of his sin which, he tell us, “continued a long while, even for some years together.”[10]

Eventually, after years of spiritual and emotional agony, Bunyan described “what seemed to be the decisive moment.”[11] He was heading into the field one day when suddenly this sentence broke in upon his mind: “Thy righteousness is in heaven.” At this, he says, “I . . . saw . . . that it was not my good frame of heart that made my righteousness better, nor yet my bad frame that made my righteousness worse: for my righteousness was Jesus Christ himself, *the same yesterday, and today, and for ever* (Heb. 13:8).” “Now,” he said, “did my chains fall off my legs indeed . . . my temptations also fled away . . . now went I . . . home rejoicing, for the grace and love of God.”[12]

After years of spiritual anguish, Bunyan had been set free by the grace of God from some of his worst fears and torments. But as we’ll see, this was not to be the end of his experience with
suffering. As one set of trials was ending, another was soon to begin.

The Pilgrim’s Imprisonment

According to Bunyan, five or six years after his conversion, in about the year 1655, some of the believers in his local congregation began entreating him “to speak a word of exhortation unto them.” {13} Although initially hesitant, Bunyan agreed to their request “and suddenly a great preacher was discovered.” {14} Apparently, word spread quickly through the English countryside. According to one author, “In the days of toleration, a day’s notice would get a crowd of 1,200 to hear him preach at 7 o’clock in the morning on a weekday.” {15}

Unfortunately, it was not to last. In 1660, the same year in which Charles II was brought home as king in the Restoration of the Monarchy, John Bunyan was arrested and imprisoned “for preaching without state approval.” {16} Officially, he was charged with being in violation of the Elizabethan Conventicle Act of 1593. According to this Act, anyone found guilty of “abstaining from coming to church to hear divine service, and . . . being a common upholder of several unlawful meetings . . . could be held without bail until he or she submitted to the authority of the Anglican church.” {17} As a Nonconformist preacher, this Act applied to men like Bunyan.

What’s interesting, however, is that Bunyan could have gone free at any time, so long as he agreed to give up preaching. But as he was firmly persuaded that he had been called by God to this ministry, he was completely unwilling to abandon his calling. He thus spent the next twelve years in prison, largely cut off from his wife, children, friends, and church.

I say “largely cut off” for, strange as it may seem, it appears that Bunyan was occasionally let out “to see his family or make brief trips.” {18} Of course, this was the exception and not the rule. Nevertheless, by “the standards of the seventeenth century the conditions in which he was held were not particularly brutal.” {19} On the other hand, Bunyan was largely fortunate in this respect: “hundreds of Dissenters died in prison, and many more came out with their health broken by foul, over-crowded conditions.” {20}

Although these qualifications must be admitted, we must never lose sight of the fact that Bunyan was willing to endure twelve long years of this suffering, rather than agree to give up preaching. And thankfully, as we’ll see, God brought a great deal of good out of His faithful servant’s suffering.

The Pilgrim’s Writings

Most people today know John Bunyan as the author of The Pilgrim’s Progress, but this is just one of many works written by the metal-worker turned minister. His first book was written in 1656, when he was twenty-eight years old. But by the time of his death, some thirty-two years later, he had authored fifty-seven more! {21} John Piper notes:

The variety in these books was remarkable: books dealing with controversies (like those concerning the Quakers . . . justification and baptism), collections of poems, children’s literature, and allegory (like The Holy War and The Life and Death of Mr. Badman). But the vast majority were practical . . . expositions of Scripture built from sermons for the sake of . . . helping Christian pilgrims make their way successfully to heaven. {22}

What’s especially astonishing about the size and variety of Bunyan’s literary legacy is that it came
from a man with almost no formal education. As a child Bunyan had been taught to read and write, but nothing more. He had no university or seminary degrees in which to boast. And yet his diligent study of the Bible, born mainly out of a burning desire to find peace with God, made Bunyan mighty in the Scriptures. Indeed the Bible, more than any other book, would be the primary influence upon his many writings. So evident was this to Charles Spurgeon, the famous nineteenth century Baptist preacher, that he once wrote of Bunyan:

He had studied our Authorized Version . . . till his whole being was saturated with Scripture; and though his writings are . . . full of poetry, yet he cannot give us his Pilgrim's Progress—that sweetest of all prose poems—without continually making us feel and say, “Why, this man is a living Bible!” Prick him anywhere; and you will find that his blood is Bibline, the very essence of the Bible flows from him.\[23\]

Not even his suffering in prison could dampen Bunyan’s enthusiasm for the Word of God or for writing. Indeed, if anything, it increased it. Some of his best-known works were written from the confines of a prison cell. These include Grace Abounding to the Chief of Sinners, written during his first imprisonment, as well as The Pilgrim’s Progress, apparently completed during a second, briefer period of imprisonment in 1677.\[24\] Bunyan’s writings are surely one of his greatest gifts to the church.

**Lessons from a Suffering Pilgrim**

A thoughtful examination of John Bunyan’s reflections on the purpose and value of suffering can give us much wisdom in how best to deal with it in our own lives. Near the end of his spiritual autobiography, Grace Abounding to the Chief of Sinners, he appended a brief account of his imprisonment in the Bedford jail. In it, he tells of how he tried to prepare himself for imprisonment, and possibly even death, when he realized that he might soon be called upon to suffer for the cause of Christ. Naturally, as one might well expect, one of the things he did was pray. He was particularly concerned to ask God for the strength to patiently endure his imprisonment, even with an attitude of joy (Col. 1:11).\[25\]

However, it’s the second thing he says that I find especially interesting and helpful. He reflects on the words of the apostle Paul in 2 Corinthians 1:9: “[W]e had the sentence of death within ourselves in order that we should not trust in ourselves, but in God who raises the dead” (NASB). Commenting on this verse, he then makes the following two observations:

By this scripture I was made to see that if ever I would suffer rightly, I must first pass a sentence of death upon everything that can properly be called a thing of this life, even to reckon myself, my wife, my children, my health, my enjoyments and all, as dead to me, and myself as dead to them. . . . The second was, to live upon God that is invisible; as Paul said in another place, the way not to faint, is to look not at the things that are seen, but at the things that are not seen; for the things that are seen are temporal; but the things that are not seen, they are eternal\[26\].

Bunyan realized that, like it or not, suffering, pain, loss and death would all come to him in one way or another. Indeed, sooner or later every single one of us must ultimately face these terrifying realities. How, then, can we best prepare to meet them? As Bunyan reminds us, if we only prepare for prison, say, then we will be unprepared for beatings. But if we stop our preparation with
beatings, then we will be unprepared for death. But we cannot evade or cheat death forever. And thus, concludes Bunyan, “the best way to go through sufferings, is to trust in God through Christ, as touching the world to come; and as touching this world.” (27) This was how Bunyan lived, and with God’s help it was also how he died. May the eternal and unseen God grant each of us the grace to follow his example.

Probe Responses to “The Shack”

Probe staff members are not unanimous in their responses to The Shack. Sue Bohlin enjoyed it as “a good book with problems,” and former staffer Pat Zukeran sees value in the book but is concerned enough about the theological problems to give it a “thumbs down.” Those of us who have read the book have a difference of opinion with each other, but we remain friendly and mutually respectful even as we disagree.

The movie is faithful enough to the book that our takeaways still stand.

Patrick Zukeran’s Critique of The Shack

What is Probe?

Probe Ministries is a non-profit ministry whose mission is to assist the church in renewing the minds of believers with a Christian worldview and to equip the church to engage the world for Christ. Probe fulfills this mission through our Mind Games conferences for youth and adults, our 3-minute daily radio program, and our extensive Web site at www.probe.org.

Further information about Probe’s materials and ministry may be obtained by contacting us at:

Japan’s Unknown Christian History: A Review of ‘Silence’

Former Probe staffer Dr. Patrick Zukeran reviews Silence, the book by Shusaku Endo and the movie directed by Martin Scorsese, which look at the little-known Christian history of Japan.

Introduction: Historical Background

The novel Silence, written by Shusaku Endo, has been made into a movie directed by Martin Scorsese and starring Liam Neeson and Andrew Garfield. This historical fiction provides a glimpse into the little known Christian history of Japan. Few are aware that Japan has a rich Christian history that dates back over four centuries.

The first Christian missionary from Europe was Francis Xavier, who arrived in Japan in 1549. The Japanese embraced the message of Christ and for half a century Christianity flourished in Japan. By 1587, it is estimated that there were nearly 200,000 Christians in Japan. In 1597, it is estimated that approximately 300,000 Japanese had become Christian, 1.6% of the population.\(^1\)

The situation changed dramatically in 1587 under the rule of the Shogun Toyotomi Hideyoshi. He grew concerned about the growing influence of Christianity and viewed it as a threat to his power. He gave an edict outlawing Christianity in Japan. In 1597 the first 26 Christians were arrested in Kyoto and marched 600 miles to Nagasaki, the center of Christianity in Japan. There they were tortured and later crucified. This began the Christian persecution in Japan.

Following Hideyoshi came the reign of the Tokugawa Shogunate (1603-1867), which lasted over 250 years. Under the Tokugawa rule one of the fiercest Christian persecutions occurred in Church history. Church historians estimate that between 300,000 and 500,000 Christians died during this time.

The Tokugawa Shoguns realized that killing the Christians did not diminish the growth of Christianity in Japan. The Shogun eventually devised a more sinister and effective way of thwarting the spread of Christianity. Instead of quickly executing Christians, it was more effective to torture the Christians and coerce them to renounce their faith. After committing apostasy, the apostate would be paraded throughout Japan and have them persuade fellow Christians to abandon their faith. This proved more effective in discouraging people from becoming Christians. Christians who apostatized were known as “korobi” or fallen Christians. Priests who apostatized were the most valuable in this endeavor.

To induce Christians to renounce their faith, the Shogun devised some of the most heinous forms of torture that he unleashed on the Christians. Christian men, women, and children were slowly burned at the stake, boiled in hot springs, thrown into frozen lakes and brutalized in various ways. One of the most feared methods was the pit. In this technique, people were hung upside down and their head was placed in a covered pit filled with sewage. The torturers would cut a slit behind the ears or across the forehead so the blood rush would not kill the person but prolong the agony for days.
The persecution proved to be very effective. In 1612 there were an estimated 300,000 Christians. In 1625 it is estimated that there were less than half that number. For the next 250 years the Japanese Christians were forced to worship secretly and were known as the “kakure” or hidden Christians.

This is the historical setting for the movie *Silence* which takes place in 1639 during the height of the Christian persecution in Japan. Two Jesuit priests from Portugal, Father Sebastião Rodrigues and Father Francisco Garpe, secretly enter Japan in search of their mentor Father Cristóvão Ferreira (Neeson) who is purported to have apostatized. Their goal is to find Ferreira and minister to the Japanese Christians who are without priests and thus without true spiritual guidance.

The priests arrive in Japan to find that the Christians live a very arduous life. The movie does an excellent job in revealing the poverty of the Christian communities who are forced to retreat to remote areas. The audience also feels the anxiety and fear that constantly looms over the Christian villages. The priests spend their days in hiding and in the evenings they minister to the community. However, the priests are discovered and eventually captured.

*Silence* vividly portrays graphically the brutal torture the Japanese Christians suffered at the hands of the daimyos. There are heart-wrenching scenes that depict the way fathers, mothers, and children were inhumanely tortured before they were executed. In many church history books we read of the glorious death of the Christian martyrs. However, this is not the case in the novel or the movie. In the book *Silence*, Susaku Endo wrote,

> I had long read about the martyrdom in the lives of the saints – how the souls of the martyrs had gone home to Heaven, how they had been filled with glory in Paradise, how the angels had blown trumpets. This was the splendid martyrdom I had often seen in my dreams. But the martyrdom of the Japanese Christians I now describe to you was no such glorious thing. What a miserable and painful business it was. [2]

Indeed, the horror of martyrdom is captured in the movie. The agonizing deaths of the Christians are not inspiring or glorious but dreadful to watch.

The priests are coerced to apostatize while in prison. The priests do not fear their own death but they cannot bear to watch the suffering of others. Father Garpe dies attempting to rescue Christians tossed into the ocean. Rodrigues is now the last missionary in Japan. Finally, the dreaded but sought-for meeting occurs. He meets his mentor Father Ferreira who has apostatized and now goes by his Japanese name Sawano Chuan. He is married and spends his days translating European writings for the Japanese and persuading Christians to abandon their faith in Christ. He encourages Rodrigues to save his life and his fellow believers by apostatizing. Rodrigues refuses and expresses his heartfelt disappointment at Ferreira. Rodrigues courageously resists but eventually he is unable to endure the suffering of his fellow Christians hanging in the pit. Worn down by the cruelty, he eventually steps on the portrait of Jesus, renouncing his faith in Christ. Knowing the Catholic Church cannot forgive him, Rodrigues wonders if Jesus will forgive him for what he has done. This becomes his agonizing struggle for the rest of his life.
The Silence of God

The main question that is asked throughout the movie is, Where is God? How can He let His people suffer and die like this? Why does He remain silent and not answer the cries of His people? The priests Garrpe and Rodrigues wrestle with that question throughout the movie and we are drawn into their struggle. This is the question people in every age ask in the midst of their suffering.

Each year I lead the Japan Christian Martyrs Tour where I take the group along the path of the Martyrs. We see the sites and hear the stories where thousands of Japanese Christians were brutally tortured and executed. At those times, even four centuries later, we still ask, “Where was God? Why was He silent? How could He allow the violent massacre of His people in Japan?”

In the final moments of the movie, Rodrigues, now known as the Apostate Paul wrestles with God on this lifelong struggle. He reflects on his act of apostasy, stepping on the image of Christ but instead of anger in the eyes of Christ, he saw eyes of understanding, grace and love. He states,

> Even now that face is looking at me with eyes of pity from the plaque rubbed by many feet. “Trample!” said those compassionate eyes. “Trample! Your foot suffers in pain; it must suffer like all the feet that have stepped on this plaque. But that pain alone is enough. I understand your pain and your suffering. It is for that reason I am here.”

> “Lord, I resented your silence,” states Rodrigues. Jesus replies, “I was not silent. I suffered beside you.”

Despite his act of apostasy, Rodrigues in the end finds forgiveness from a Christ who understands his situation and extends grace to him. He realizes Christ was not silent but with him though his suffering and remained with him even in his final days. He seems to realize the love of Christ is more powerful and faithful than he has ever known.

This is one of the unique aspects of Silence. Endo and Scorsese want us to see through the eyes of the “korobe” Christian. We applaud those who died never renouncing their faith in Christ and quickly condemn those who publicly renounced their faith in Christ. However, I believe Shusaku Endo through his novel tells us, “Not so fast!” Those who apostatized struggled and suffered greatly too. I believe Endo wants us to see through the eyes of Rodrigues and ask ourselves the question, “Could we endure watching our wives, children and loved ones receiving such vicious treatment for days without end?” “Would we remain steadfast or would we renounce Christ to save our loved ones from such an unbearable fate?” “Would Christ condemn us for renouncing Him to save our loved ones or would he understand and extend grace in such a situation as the Japanese and other persecuted Christian face?”

I believe Endo wants us to understand the struggle of persecuted Christians and wants us to understand they wrestle with their guilt for the rest of their lives. If God’s grace is indeed “greater than all my sin,” should we consider extending grace to our “fallen brethren” as well?

I believe another lesson Endo wants us to learn is that God is not silent but remains with His people in their suffering, never abandoning His people. Throughout church history, Christians have faced brutal persecutions. Even Christ the Son of God suffered the most dreadful death on the cross. Therefore, God understands the pain we experience, He grieves at the wickedness of men,
and He promises to be with us always.

I agree with Endo that God is with us in our suffering. However, I feel his answer is incomplete. In a Christian’s suffering, often a disciple feels the presence of Christ in an even greater way. In the writings of the persecuted saints and in the many interviews I have had with Christians who are suffering, many state they feel the presence of God in greater ways than they have ever known. The Apostle Paul writes in Philippians 3:10-11, “... that I may know him and the power of his resurrection, and may share his sufferings, becoming like him in his death, that by any means possible I may attain the resurrection from the dead.” So many times in suffering Christians identify with the sufferings of Christ and sense His presence in greater ways.

What I found troubling about the novel and movie is the gloomy mood of the story. The movie emphasizes the brutal deaths of Christians, the struggles of a fallen priest, and what appears to be the demise and bleak future of Christianity in Japan. Indeed, the Christian history of Japan is sorrowful and the movie ends in the midst of Japan’s persecution so I can understand Endo’s ending. On this earth, life will not always have a happy ending. What I find missing in Endo’s story is the message of hope that is found in Christ even in suffering. What compels Christians to surrender their life for Christ is the assured hope of eternal life in Jesus Christ. Hebrews 1:2 states, “... looking to Jesus, the founder and perfecter of our faith, who for the joy that was set before him endured the cross, despising the shame, and is seated at the right hand of the throne of God.”

There is little joy when focusing primarily on the affairs and outcomes in this fallen world. If this is where the story ends, it is indeed dark and disheartening. However, through the darkness shines the hope that allowed Christ to have joy even when facing the agony of the cross. Believers can also have joy and hope if they look forward to the glory that awaits every believer in Christ. Despite the suffering believers face, it pales in comparison to the eternal glory that is to come. Persecution teaches Christians we are citizens of a heavenly kingdom. Christians can endure and remain joyful even in their suffering when focused on Christ and the glory of our true home. The end is not the cross of death, but the resurrection of Jesus and every disciple of Christ. This is important in any story of persecuted Christians. It is emphasized in the New Testament and is the story of Christ’s and the believer’s ultimate triumph. The New Testament prophesies the future persecution of all believers but ends with the triumphant resurrection and return of Christ. Through Christ’s victory, the Christian story ends ultimately in triumph. The end is not the death of the Christians in Japan but the glory they received from Christ in heaven. Their courageous commitment should be an inspiration to believers around the world and an example of what it means to live not for this world, but the kingdom of heaven. Hebrews 11:35-40 states,

Some were tortured, refusing to accept release, so that they might rise again to a better life. Others suffered mocking and flogging, and even chains and imprisonment. They were stoned, they were sawn in two, they were killed with the sword. They went about in skins of sheep and goats, destitute, afflicted, mistreated— of whom the world was not worthy—wandering about in deserts and mountains, and in dens and caves of the earth. And all these, though commended through their faith, did not receive what was promised, since God had provided something better for us, that apart from us they should not be made perfect.

The Japanese Christians were living for another kingdom and looking forward to the eternal glory of heaven. This message was not present in the novel or the film,
which I believe made it a dark and gloomy story. Although Japan Christian history is discouraging, the end has not been written for the Christ’s Church in Japan.

**Can A Tree Grow in a Swamp?**

One of the most significant dialogues in the movie occurs between Rodrigues and the Samurai Lord Inoue, also known as the Inquisitor. Inoue states,

> A tree which flourishes in one kind of soil, may wither if the soil is changed. As for the tree of Christianity, in a foreign country its leaves may grow thick and the buds may be rich, while in Japan the leaves wither and no bud appears. Father, have you never thought of the difference in the soil, the difference in the water?

Inoue tells Rodrigues that a tree cannot grow in a swamp. Therefore, Christianity will not take root in Japan.

There is a famous saying, “The blood of the martyrs is the seed of the church.” In other words, persecution strengthens the faith of Christians and the church grows when persecuted. This was not the case in Japan. The genocide that took place from 1600-1800 was devastating and Christianity has never regained a strong foothold in Japan. Another question Christians struggle with is, “Why has Christianity not taken root in Japan?” Today the largest growth of Christianity is occurring throughout Asia. Despite this, Christianity continues to struggle in Japan.

When Christianity first arrived in Japan in 1549, the Japanese embraced the gospel of Christ. Xavier was so impressed with Japan that he called for only the missionaries of highest quality to be sent. Xavier wrote, “Japan is the only country yet discovered in these regions where there is hope of Christianity permanently taking root. . . . These are the best people so far discovered, and it seems to me that among the unbelievers, no people can be found to excel them.” Father Organto, who followed Xavier, wrote that Japan would be Christianized in 30 years, expressing the optimism of missionaries that Christianity would thrive in Japan. The situation quickly changed and the two centuries of persecution that followed nearly eradicated Christianity in Japan.

Today there is a famous saying among missionaries: “Japan is where Christian missionaries go to die.” Indeed, many return after years of labor discouraged and disillusioned by the little fruit they see in their years of labor in Japan. There are many reasons given why the gospel has not thrived in this country. Can the seed of the gospel penetrate the hard soil of Japanese culture?

As unbelievable as this may seem, I believe a spiritual revival for Japan. As the gospel flourished 400 years ago, spiritual awakening will come to this nation again. How it will come about only God knows. I believe the Japanese are realizing the emptiness of their secular outlook and lifestyle of materialism and consumerism. Their high suicide rate reflects the emptiness of these ideologies. Japanese Buddhism and Shinto fail to answer the great questions of life or fill the void in the heart of all people. These religions are also largely built on myths and so they are not based on reality.

Xavier realized the Japanese religions did not answer the big questions of life such as the origin of life and the universe, the nature of God, the origin of evil, the answer to the problem of evil, and what happens after death. The ideologies that dominate Japan still fail to adequately answer these questions today. As Xavier demonstrated that Christianity provides the best answer to these questions, so the Church in Japan must do the same. Christianity has the evidence to uphold its claims to truth and life everlasting in Jesus. I believe that Christian apologetics would do well in this
country that is very rational and well educated. The message of the gospel provides the true message of hope for this nation. I hope that the message and lives of the Japan Christian martyrs will one day be recognized and remembered by the people of Japan.

Conclusion

Scorsese’s film is one of the few films about the little known Christian history of Japan. Even the Japanese are not aware of the tremendous Christian history of their nation. We should be thankful to Scorsese for showing the brutal persecution and the suffering endured by the Christians of Japan. Endo and Scorsese reveal to us the heinous tortures but they also take us into the mental torture that those suffering persecution go through. The struggles of the priests and the questions they ask are the same questions we all struggle with in our journey of faith. Endo and Scorsese present a unique perspective looking through the eyes of one who apostatizes and yet finds God’s grace through it all.

It is my hope that Christians throughout the world gain a greater awareness of one of the greatest massacre of Christians that took place in Church history. I also hope that people will appreciate and admire the courage and commitment of the Japanese Christians who gave their lives for Christ. The Japanese unfortunately hide this part of their history. However, the Japanese and the world should recognize this facet of their history. The story of the men, women and children who gave their lives for Christ is moving and inspirational. They truly lived out the call of discipleship as Jesus commanded. In Matthew 10:37-39 Jesus said,

> Whoever loves father or mother more than me is not worthy of me, and whoever loves son or daughter more than me is not worthy of me. And whoever does not take his cross and follow me is not worthy of me. Whoever finds his life will lose it, and whoever loses his life for my sake will find it.

Few have lived out the commands of Christ so faithfully and courageously as the Christians of Japan. I hope that more will recognize and remember the Christians of Japan who gave their lives for the Gospel.

Notes

**Gay Men to Lead Boy Scouts: Gates’ Failure**
to Render Genuine Leadership

This week the Boy Scouts of America have announced they will welcome transgendered youth into the program. This culture-following trend began when the BSA allowed gay scouts, then gay leaders. This shows a serious leadership gap, according to Eagle Scout, former Scout employee, and volunteer Byron Barlowe.

Boy Scouts will now be subject to gay adult leadership if BSA (Boy Scouts of America) president Robert Gates’ advice is taken. Gates, who once held our military’s top position as Secretary of Defense, declared the inevitability of ending the ban on openly gay Scout leaders while addressing the BSA national annual meeting in Atlanta Thursday, May 21, 2015.

Does anyone really doubt that Gates’ position will be made official, especially given recent advances for gay rights at the states’ level, with the Girl Scouts, in Ireland’s national referendum vote three days later and most likely via the United States Supreme Court this June? I wager it’ll be only a few months before it’s official BSA policy.

The question for Mr. Gates: How does bowing to the rapidly changing poll numbers on this issue constitute leadership? Don’t heroes often have to stand alone? Even if Gates holds convictions that would dictate openness in his personal dealings, his stated premise for lifting the long-time ban on gay Scout leaders that stands to affect tens of thousands of youth is flawed: that the proverbial train has left the station and the organization needs to cover its rear guard, to go with the inevitable flow of gay rights, to kowtow to pressure from within and without. Pure pragmatism on parade. And entirely inappropriate and unrespectable.

Brave New World vs. “A Scout is Brave”

Part of the Scout Law every Boy Scout for 105 years has memorized and recited reads, “A Scout is trustworthy . . . brave . . . reverent. . . .” But the BSA has done a 180-degree flip on the topic of homosexuality, having won a Supreme Court case against a gay membership push as recently as 2000. The Opinion of the Court in Dale v. Boy Scouts of America, written by Chief Justice Rehnquist, reads, “The Boy Scouts asserts that it ‘teach[es] that homosexual conduct is not morally straight’” in its defense of denying avowed homosexual and gay activist James Dale leadership privileges with a Scout troop.

Oh, what a difference fifteen years makes when one bases decisions on the swiveling wind vane of a degrading culture.

To his credit, Dr. Gates called for individual chartering organizations—representing 70 percent of Boy Scout Troops and Cub Packs—to decide for themselves how to implement such a policy. Yet, in the same speech, Gates cites the refusal of a New York Council to abide by current BSA policy in hiring gay leaders as a realistic reason to change the national policy. Which is it? Gay men get the right to lead, or troops and packs get to say no? We see where that is going in the courts and in culture with Christian photographers, bakers and T-shirt makers: inescapable pressure to succumb.

Live Up to High Standards of Scouting

I’m holding President Gates to a high standard here. Sure, he’s been pressured by his own big business (read: big donor) board members like Randall Stephenson of AT&T and James Turley of Ernst & Young to eradicate the BSA’s longstanding policies against gay participation at every level.
Though it may not compare to high stakes, national level non-profit boardroom politics, I lost my job as a BSA District Executive by holding to the principles of Scouting (and my biblical faith). When asked to misrepresent the number of Cub Scout Packs in local schools at a BSA Council in North Carolina, I refused. Threats didn’t move me despite my 23-year-old, first-job fears. Call me naïve. Then explain that to a boy. It would be refreshing to see Mr. Gates stand up to power himself.

Even if I agreed with gay rights claims concerning the private youth training organization, I’d object to the hypocrisy of its leader. Gates’ recent declaration, as with the BSA’s 2013 decision to enroll openly gay Scouts, is modeling another dereliction of duty. Yet “duty to God,” others and self has always formed the three-legged stool of values on which Scouting stood. God is not confused on this issue, nor was the Scouting program for a full century.

If This Goes, Scouting Will Forever Be Altered

I write “values on which Scouting stood” in past tense advisedly. As I was quoted via the *Los Angeles Times* syndicate while demonstrating against the policy change to allow openly gay Scouts in 2013, this is the end of Scouting as we have known it. Another prediction: A sharp decrease in numbers following that decision will be surpassed if the BSA allows admittedly gay leaders. As an Eagle Scout, father of an Eagle Scout, former volunteer Scouting leader and BSA local executive, I can no longer support in any way the Boy Scouts of America. I’ll support other youth programs.

This conviction grieves me, but borrowing from the Christian reformer Martin Luther, here I stand and I can do no other. No, this episode does not rise to the level of religious reformation; however, the gravity of such social slides will change the cultural landscape for as long as our Republic stands. The gay advocacy heavyweight Human Rights Campaign is right when it celebrates Gates’ announcement as a huge victory in its drive for full acceptance of homosexuals across the culture, given that the BSA is “one of America’s most storied institutions.”

As SecDef, Gates ended the ambiguous “Don’t ask, don’t tell” doctrine, a decision that opened doors for openly gay service men and women to serve freely despite fears of sexual chaos. Our former CIA Director and, again, Secretary of Defense Gates now holds the top leadership post among a younger group of Americans. On this issue he has led neither members of the armed forces nor impressionable and sexually vulnerable adolescent Scouts.

Once again, Gates’ ethics reek of pure pragmatism: “We must deal with the world as it is, not as we might wish it to be. The status quo in our movement’s membership standards cannot be sustained,” he said to the assembled Scouting leaders.

Never mind high ideals. The wind has blown, the ship has sailed and we must get on board or be left behind (or at least sued heavily). Oh, such bravery.

Dr. Lawrence Terlizzese says that our addiction to technology is heading toward the opposite of the life we want.

What Saccharine is to Sugar, or The Technological Simulacra: On the Edge of Reality and Illusion

“Anyone wishing to save humanity today must first of all save the word.” – Jacques Ellul

Simulacra

Aerosmith sings a familiar tune:

“There’s something wrong with the world today,
I don’t know what it is,
there’s something wrong with our eyes,
we’re seeing things in a different way
and God knows it ain’t [isn’t] his;
there’s melt down in the sky. We’re living on the edge.”

What saccharine is to sugar, so the technological simulacra is to nature or reality—a technological replacement, purporting itself to be better than the original, more real than reality, sweeter than sugar: hypersugar.

Simulacra, (Simulacrum, Latin, pl., likeness, image, to simulate): or simulation, the term, was adapted by French social philosopher Jean Baudrillard (1929-2007) to express his critical interpretation of the technological transformation of reality into hyperreality. Baudrillard’s social critique provided the premise for the movie The Matrix (1999). However, he was made famous for declaring that the Gulf War never happened; TV wars are not a reflection of reality but projections (recreations) of the TV medium.

Simulacra reduces reality to its lowest point or one-dimension and then recreates reality through attributing the highest qualities to it, like snapshots from family vacation. When primitive people refuse to have their picture taken because they are afraid that the camera steals their souls, they are resisting simulacra. The camera snaps a picture and recreates the image on paper or a digital medium; it then goes to a photo album or a profile page. Video highlights amount to the same thing
in moving images; from three dimensions, the camera reduces its object to soulless one-dimensional fabrication. {4}

Simulacra does not end with the apparent benign pleasures of family vacation and media, although media represents its most recent stage. {5} Simulacra includes the entire technological environment or complex, its infrastructure, which acts as a false “second nature” {6} superimposed over the natural world, replacing it with a hyperreal one, marvelously illustrated in the movie Terminator 2: Judgment Day (1991). As liquid metal conforms itself to everything it touches, it destroys the original. {7}

Humanity gradually replaces itself through recreation of human nature by technological enhancements, making the human race more adaptable to machine existence, ultimately for the purpose of space exploration. Transhumanists believe that through the advancements in genetic engineering, neuropharmaceuticals (experimental drugs), bionics, and artificial intelligence it will redesign the human condition in order to achieve immortality. “Humanity+,” as Transhumanists say, will usher humanity into a higher state of being, a technological stairway to heaven, “glorification,” “divinization” or “ascendency” in theological terms. {8}

God made man in his own image and now mankind remakes himself in the image of his greatest creation (image), the computer. If God’s perfection is represented by the number seven and man’s imperfection by the number six, then the Cyborg will be a five according to the descending order of being; the creature is never equal or greater than the creator but always a little lower. {9}

Glorious Reduction! {10}

Hyperreality

An old tape recording commercial used to say, “Is it real or is it Memorex?” By championing the superiority of recording to live performance the commercial creates hyperreality, a reproduction of an original that appears more real than reality, a replacement for reality with a reconstructed one, purported to be better than the original.

Disneyland serves as an excellent example by creating a copy of reality remade in order to substitute for reality; it confuses reality with an illusion that appears real, “more real than real.” {11} Disney anesthetizes the imagination, numbing it against reality, leaving spectators with a false or fake impression. Main Street plays off an idealized past. The technological reconstruction leads us to believe that the illusion “can give us more reality than nature can.” {12}

Hyperreality reflects a media dominated society where “signs and symbols” no longer reflect reality but are manipulated by their users to mean whatever. Signs recreate reality to achieve the opposite effect (metastasis) {13}; for example, in Dallas I must travel west on Mockingbird Lane in order to go to East Mockingbird Lane. Or, Facebook invites social participation when no actual face to face conversation takes place. {14}

Hyperreality creates a false perception of reality, the glorification of reduction that confuses fantasy for reality, a proxy reality that imitates the lives of movie and TV characters for real life. When reel life in media becomes real life outside media we have entered the high definition, misty region—the Netherlands of concrete imagination—hyperreality! {15}

Hyperreality goes beyond escapism or simply “just entertainment.” If that was all there was to it,
there would be no deception or confusion, at best a trivial waste of time and money. Hyperreality is getting lost in the pleasures of escapism and confusing the fantasy world for the real one, believing that fantasy is real or even better than reality. Hyperreality results in the total inversion of society through technological sleight of hand, a cunning trick, a sorcerer’s illusion transforming the world into a negative of itself, into its opposite, then calling it progress.

Hyperreality plays a trick on the mind, a self-induced hypnotism on a mass scale, duping us by our technological recreation into accepting a false reality as truth. Like Cypher from the movie *The Matrix* who chose the easy and pleasant simulated reality over the harsh conditions of the “desert of the real” in humanity’s fictional war against the computer, he chose to believe a lie instead of the truth.\(^1\)

**The Devil is a Liar**

A lie plays a trick on the mind, skillfully crafted to deceive through partial omission or concealment of the truth. The lie is the devil’s (devil means liar) only weapon, always made from a position of inferiority and weakness (Revelation 20:3, 8). A lie never stands on its own terms as equal to truth; it does not exist apart from twisting (recreating) truth. A lie never contradicts the truth by standing in opposition to it.

A lie is not a negative (no) or a positive (yes), but obscures one or the other. It adds by revealing what is not there—it subtracts by concealing what is there. A lie appears to be what is not and hides what it really is. “Satan disguises himself as an angel of light” (2 Corinthians 11:14).

A lie does not negate (contradict) or affirm truth. Negation (No) establishes affirmation (Yes). Biblically speaking, the no comes before the yes—the cross then the resurrection; law first, grace second. The Law is no to sin (disobedience); the Gospel is yes to faith (obedience). Truth is always a synthesis or combination between God’s no in judgment on sin and His yes in grace through faith in Jesus Christ. “For the Law was given through Moses; grace and truth were realized through Jesus Christ” (John 1:17). Law without grace is legalism; grace without law is license.\(^2\)

The devil’s lie adds doubt to the promise of God; “Indeed, has God said, ‘you shall not eat from any tree of the garden’?” (Genesis 3:1 NASB) It hides the promise of certain death; “You surely will not die” (Genesis 3:4). The serpent twists knowledge into doubt by turning God’s imperative, “Don’t eat!” into a satanic question “Don’t eat?”\(^3\)

But it is Eve who recreates the lie in her own imagination. “When the woman saw that the tree was good for food, and that it was a delight to the eyes, and that the tree was desirable to make one wise, she took from its fruit and ate; and she gave also to her husband with her, and he ate” (Genesis 3:6).\(^4\)

[Sight incites desire. We want what we see (temptation). Eve was tempted by “the lust of the eyes” (1 John 2:16) after seeing the fruit, then believed the false promise that it would make her wise. “She sees; she no longer hears a word to know what is good, bad or true.”\(^5\) Eve fell victim to her own idolatrous faith in hyperreality that departed from the simple trust in God’s word.\(^6\)]

**The Void Machine**

Media (television, cell phone, internet, telecommunications) is a void machine.\(^7\) In the presence
of a traditional social milieu, such as family, church or school, it will destroy its host, and then reconstruct it in its own hyperreal image (Simulacra). Telecommunication technology is a Trojan Horse for all traditional institutions that accept it as pivotal to their “progress,” except prison or jail. The purpose of all institutions is the promotion of values or social norms, impossible through the online medium.

Media at first appears beneficial, but this technology transforms the institution and user into a glorified version of itself. The personal computer, for example, imparts values not consistent with the mission of church or school, which is to bring people together in mutual support around a common goal or belief for learning and spiritual growth (community). This is done primarily through making friends and forming meaningful relationships, quite simply by people talking to each other. Values and social norms are only as good as the people we learn them from. Values must be embodied in order to be transmitted to the next generation.

Talking as the major form of personal communication is disappearing. Professor of Communications John L. Locke noted that “Intimate talking, the social call of humans, is on the endangered species list.” People prefer to text, or phone. Regrettably, educational institutions such as high schools and universities are rapidly losing their relevance as traditional socializing agents where young people would find a potential partner through like interests or learn a worldview from a mentor. What may be gained in convenience, accessibility or data acquisition for the online student is lost in terms of the social bonds necessary for personal ownership of knowledge, discipline and character development.

An electronic community is not a traditional community of persons who meet face to face, in person, in the flesh where they establish personal presence. Modern communication technologies positively destroy human presence. What philosopher Martin Heidegger called Dasein, “being there,” (embodiment or incarnation) is absent. As Woody Allen put it, “90 percent of life is showing up.” The presence of absence marks the use of all electronic communication technology. Ellul argued, “The simple fact that I carry a camera [cell phone] prevents me from grasping everything in an overall perception.” The camera like the cell phone preoccupies its users, creating distance between himself and friends. The cellphone robs the soul from its users, who must exchange personal presence for absence; the body is there tapping away, but not the soul! The cell phone user has become a void!

The Power of Negative Thinking

According to popular American motivational speakers, the key to unlimited worldly wealth, success and happiness is in the power of positive thinking that unleashes our full potential; however, according to obscure French social critics the key to a meaningful life, lived in freedom, hope and individual dignity is in the power of negative thinking that brings limits, boundaries, direction and purpose.

Negativity gives birth to freedom, expanding our spiritual horizons with possibilities and wise choices, which grounds faith, hope and love in absolute truth, giving us self-definition greater than our circumstances, greater than reality of the senses. To freely choose in love one’s own path, identity and destiny is the essence of individual dignity.

According to French social critics Jacques Ellul and Herbert Marcuse, freedom is only established in negation that provides limits and boundaries, which tells us who we are. Technological hyperreality removes all natural and traditional limits in the recreation of humanity in the image of the cyborg. The transhuman transformation promises limitless potential at the expense of individual freedom,
personal identity and ultimately human dignity and survival.

www.probe.org/into-the-void-the-coming-transhuman-transformation/

All limitless behavior ends in self-destruction. Human extinction looms over the technological future, like the Sword of Damocles, threatening humanity’s attempt to refit itself for immortality in a grand explosion (nuclear war), a slow poisoning (ecocide) or suicidal regressive technological replacement. Stephen Hawking noted recently that technological progress threatens humanity’s survival with nuclear war, global warming, artificial intelligence and genetic engineering over the course of the next 100 years. Hawking stated, “We are not going to stop making progress, or reverse it, so we must [recognize] the dangers and control them.”

In asserting “NO!” to unlimited technological advance and establishing personal and communal limits to our use of all technology, especially the cell phone, computer and TV, we free ourselves from the technological necessity darkening our future through paralyzing the will to resist.

After we “JUST SAY NO!” to our technological addictions, for instance, after a sabbatical fast on Sunday when the whole family turns off their electronic devices, and get reacquainted, a new birth of freedom will open before us teeming with possibilities. We will face unmediated reality in ourselves and family with a renewed hope that by changing our personal worlds for one day simply by pushing the off button on media technology we can change the future. Through a weekly media fast (negation) we will grow faith in the power of self-control by proving that we can live more abundant lives without what we once feared absolute necessity, inevitable and irresistible. “All things are possible with God” (Mark 10: 27). When we exchange our fear of idols for faith in the Living God the impossible becomes possible and our unlimited potential is released that will change the world forever!

I see trees of green, red roses, too,
I see them bloom, for me and you
And I think to myself
What a wonderful world.

I see skies of blue, and clouds of white,
The bright blessed day, the dark sacred night
And I think to myself
What a wonderful world.

The colors of the rainbow, so pretty in the sky,
Are also on the faces of people going by.
I see friends shaking hands, sayin’, “How do you do?”
They’re really sayin’, “I love you.”

I hear babies cryin’. I watch them grow.
They’ll learn much more than I’ll ever know
And I think to myself
What a wonderful world.

“If man does not pull himself together and assert himself . . . then things will go the way I describe [cyborg condition].” – Jacques Ellul

Notes

3. The same is true of the game last night—I caught the highlights on ESPN—no difference really—it never happened! The Presidential debates, my Facebook page, 911, televangelism, the online (electric) church: all reproductions, all exist at the level of Santa Claus in a dreamy, surreal world not really real: hyperreal, really!

4. French social critic Herbert Marcuse (1898-1979) described dimensional reduction in human nature through the process of “mimesis” very similar to Baudrillard’s conception of simulacra (technological simulation) and Ellul’s *la technique* (technological order). Mimesis eradicates all protest and opposition to the prevailing technological normalcy and silences all conscientious objections to the obvious or self-evident benefits (taken for granted) and blessings of technological progress. Like a frontal lobotomy when a section of the brain is removed that leaves all necessary automatic biological functions but removes the capacity to higher critical thinking, effectively silencing all differences, removing unique personality, individuality, and private space. The person is reduced to *one dimension* without the critical higher thought process or skills. Mimesis or mimicry transcends the adjustment phase to new technology known as *Future Shock* and brings the population into a direct and immediate relationship with the technological environment comparable to prehistoric and primitive cultures in their relationship to their natural milieus, climates and habitats. Mimesis replaces the traditional social environment with a technological one, an imitation or mimicry (simulacra). Mimesis removes the ability to feel alienation. Through reduction of the individual to a cell (atomization) in the social body, one never feels out of place, discomfort or disease, etc., because there is no longer any sense of individuality or difference. Anesthetizing the soul kills the pain of maladjustment to modernity leaving all feelings alike; joy is indistinguishable from hate. What do people feel after a lobotomy? They feel nothing, *comfortably numb* describes postmodern sentimentality.

Mimesis reduces the population to impulsive consumers. Material goods tie us to the system. “People recognize themselves in their commodities; they find their soul in their automobile, hi-fi set, split-level home, kitchen equipment. The very mechanism which ties the individual to his society has changed and social control is anchored in the new needs it has produced” (Herbert Marcuse, *One-Dimensional Man: Studies in Advanced Industrial Society* [Boston: Beacon Press, 1964], 9). People are in love with their technology. Consumer objects express passion and spirituality; “For example, cars are not simply neutral transportation objects but beloved expressions of soul.” Their self-image is locked in the kind of cars they drive, houses they live in: “From teen dreaming about a hot set of wheels to the self-imagined sophisticate, it is image that dictates our purchase . . . Most of us can’t imagine why anyone would buy a Hummer except to flaunt his financial ability to conspicuously consume . . . Anyone who doubts the role of image needs only drive a rust bucket” (Lee Worth Bailey, *The Enchantments of Technology* [Chicago: University of Illinois Press, 2005], 7). “Image is everything!” Modern technological materialism has become the antithesis of the Christian way of life. Jesus said, “A man’s life does not consist in the abundance of his possessions” (Luke 12:15).

5. Orders of Simulacra:

Renaissance: Copies of Original

Industrial: Mass Production of Original

Hyperreality: Recreation of Original

Metastasis: Reverse effects of the hyperreal stage of simulacra proliferate, comparable to the spread of cancerous tissue. “Metastasis: the transfer of disease from one organ or part to another not
Metastasis in the Orders of Simulacra according to Baudrillard also reflects Jacques Ellul’s critical technological analysis in his assertion of the law of diminishing returns (law of reverse effects), The Technological Bluff (Grand Rapids: Eerdmans, 1990). Once the threshold of reversal in technological progress is reached, a saturation point, beyond which any further advance is completely unnecessary (and thus further progress despite mass optimism) will produce reverse or opposite effects than intended. The technological threshold is reached when new technology is imposed on the population which was unnecessary prior to its invention. When necessity for a new technology appears after its invention the threshold of beneficial effects inverts and harmful consequences, side effects—intended or not—rapidly multiply. There is no use or felt needs for much of the technology developed in the 20th century; TV, computer, jet engine, rockets, atom bomb, cell phone, innumerable widgets and gadgets, so use is found and need artificially created. People have no felt need for a technology that does not yet exist. When useless technology is developed for its own sake (knowledge for knowledge’s sake), rather than liberation it displaces the good of mankind to the glory of God as its object or telos and becomes an end in itself. The general population never asks for new technology; rather, technology is developed according to the technological imperative—whatever can be done should be done. Its beneficial use is unquestionably assumed and its use promoted through mass advertising and commercials (technological propaganda), and in short order a new necessity is added to the litany of technological requirements. As the list of “must haves” and “can’t live without” grows in order to keep pace with the tempo of modern life, users voluntarily surrender their freedom for self-imposed technological necessity, blissfully unaware of any potential side-effects or untoward consequences.

The technological condition may be compared to generational slavery. Those born into servitude accept it as normal. The “happy slave” remains so through refusal to recognize his condition as “slave.” He embraces the world as he finds it with all his material needs and appetites satiated. There is no reason to protest, compounded by the fact that he has no ability to do so. A slave will always remain a slave until he recognizes that he is a slave. And without an intellectual horizon to lift him above his condition as a real possibility he will forever remain a slave. The first step to freedom for the slave is to recognize his condition of slavery and the possibility of a different way of life through self-determination, but that is impossible without a degree of abstract analysis and a measure of critical reason. Comparatively, technological determinism imposes its frightful inescapable necessity as a natural order without a meaningful future beyond the present way of life. In stripping society of critical ability to reason and negate that order from a metaphysical view,
humanity has lost its only absolute reference point outside its own limited existence and above its
concrete situation from which to criticize technology and bring it under ethical control and moral
limitation. God is greater than any technological idol made by human hands and provides an
immovable ground from which humanity can reassert control, but mankind’s Creator, Savior and
Helper does him no good if he does not believe in his power or worse confuses it with the status quo,
so that the apocalyptic power of God’s confrontational judgment that leveled Babel (Genesis 11),
Egypt (Exodus), Jerusalem and Rome is convoluted through blessing the technological utopia as New
Atlantis.

The idolization of technology follows in the wake of modern science and rationalism but has a
dehumanizing effect rather than amelioration. New technology brings new necessity and demands
rather than freedom that exacts its price from humanity and nature, resulting in a much more
complicated and dangerous world. The Apostle Paul stated that if we have food and shelter we
should be content (1 Timothy 6:8). The accumulation of material things beyond meeting basic needs
becomes a new burden, an added necessity not there before, resulting in bondage not freedom.
People are owned by their possessions, must work harder for their technology and have been
reduced to cogs in the wheel of progress rather than individuals with inherent value made in the
image of God. From electricity, to phones, appliances to automobiles to computers, cell phones, ad
infinitum, ad nauseam each new technology begins with the promises of convenience and improving
modern life by making it faster, then through habitual use it becomes necessary, eventually
addictive. From the basic material needs of food and shelter modern life has added dishwashers,
microwave ovens, vacuum cleaners, TVs, cars, computers and most recently the cell phone as
necessary for life in modern times. The devaluation of human life pays for the technology that is
developed for the sake of expanding the frontiers of knowledge and exploration rather than creating
the condition of freedom. Human freedom is lost with each new artificial technical necessity,
resulting in an increasingly nihilistic society; where power increases, choice is lost, resulting in
increased meaninglessness. Nihilistic sentiment develops along with technological power; “We know
that power always destroys values and meaning . . . Where power augments indefinitely there is less
and less meaning” (Jacques Ellul, Perspectives on Our Age [New York: Seabury, 1981], 45).
Technological necessity proliferates along with technological power over nature, reducing the scope
of available choices, options or way of life that differs from those ensnared in the modern
mechanized mainstream. What possibilities for a decent way of life are open to those who own
neither car nor home, do not use a cell phone or computer, or possess at least a college degree?
How successful will any corporate organization, church, school or business be if it does not use
modern communication technology, radio, TV, computer or advertising techniques (propaganda) to
promote its cause or product? As the world conforms itself to technological necessity, “you must get
a cell phone and use a computer or risk getting left behind,” it loses touch with the reality outside
these devices, which is reduced and recreated online. For example, the traditional “church service”
where believers join together in the unity of faith around the communion table as community and
family becomes the embarrassing forgery of a lone spectator in front of a one dimensional monitor.

7. “Tillich describes the creation of a ‘second nature’ that results from science’s attempt to control
nature. Second nature in turn subjects man to the same domination he wishes to exert over nature,
making himself subject to the very thing he had created to liberate him” (Lawrence J. Terlizzese,
Trajectory of the 21st Century: Essays on Theology and Technology [Eugene, OR: Resource
Publications, 2009, 155]).

7. Baudrillard’s description of Simulacra is reminiscence of Herbert Marcuse’s depiction of
“Mimesis” in One-Dimensional Man. Mimesis: the total identification of the individual with
technological environment that mimics, apes or imitates historical social conditions, for example the
city replaces nature, the automobile replaces the horse and carriage, TV replaces the family hearth, social media substitutes for personal relationships. Muk-bang replaces family members at the dinner table, traditional institutions that requires a personal presence, school and church, are rapidly transferring to the online medium. Likewise Jacques Ellul in *The Technological Society* describes technological advancement or “*la technique*” as creating a new environment, one that overlays both the natural and historical social environments with an urban/industrial/digital one.

8. Braden Allenby and Daniel Sarewitz, *The Techno-Human Condition* (Cambridge, MA: MIT Press, 2011), 1-13; *Humans Need Not Apply*, CGP Grey, 2014. The Transhuman Transformation is the ultimate in works salvation that lifts humanity to the next stage in evolutionary development through technological immortality or digitalized godhood that replaces all his physical corruptions with artificial replacements in the simulated heaven of a computer server. The computer does not dominate the will of humanity, enforcing universal peace through fear of annihilation as in the movie *Colossus: The Forbin Project* (1970), but assimilates humanity digitally and recreates it in its own image or highest ideal. The robots are not taking over, rather humanity is surrendering its will and decisions to the computer in tired resignation of life which has become too difficult by its own design.

9. “O LORD . . . What is man that you are mindful of him or the son of man that you visit him? For you have made him a little lower than the angels and crowned him with glory and honor” (Psalm 8:4, 5). “Angels,” Elohim (God) in Psalm 8:5 refers to the divine visitation (theophany) mentioned in verse 4, the Angel of The LORd, i.e., Genesis 18; 19; 22:15; 32:24-32; Exodus 12:12, 13. Humanity was made highest in God’s created order, below the creator and above the angelic host in the chain of being; “Don’t you know you will judge angels?” (1 Corinthians 6:3). Angels are “ministering spirits sent to minister to the heirs of salvation” (Hebrews 1:14).

10. We are not saying one cannot reduce a complicated argument, book, movie etc., to its main points in outline form. We are saying that reduction does not replace the original, as somehow “better.” A well-done outline does not alleviate the audience’s responsibility to discover for itself, to pick up and read, but will inspire the audience to do so. Reading Calvin’s *Institutes*, or Augustine’s *City of God* or Thomas’ *Summa Theologica* in PowerPoint or Cliff Notes is comparable to watching the Super Bowl in highlights instead of in its entirety from kickoff.

The proliferation of the digital camera as appendage to the cell phone has created the absurd phenomenon of reduction of reduction in the class room. As the PowerPoint slide has allowed professors to reduce all learning to three pertinent bullet points per slide, so students have followed their cue in picturing the text (taking a picture of the slide). Instead of suffering the laborious and tedious task of jotting down a simple outline in a note book, a helpful mnemonic practice, they take a picture of it, reducing the slide to digital acknowledgement and temporary storage before deletion, in order to make room for the pictures of tomorrow night’s Harry Potter costume gala. Education isn’t what it used to be, it just isn’t!

13. The projections of visual media may have their origins in “the desert of the real” as Baudrillard puts it, but what the spectator sees on his screen, monitor or photograph should not be confused with “reality,” but recreated reality mediated through an electronic medium. Marshall McLuhan’s famous maxim for media analysis, “The medium is the message,” undergirds this critical understanding of media technology. Any fan of live entertainment or sports knows immediately that TV broadcast of a live venue is an entirely different event than being there live behind home plate or
on the fifty yard line. Preference for the surreal, sterilized, cartoonish, Apollonian images on TV and in film, rather than seeing the actual blots, blemishes and facial scars of people, perspiring athletes or hearing the crack of the bat is not the central moral issue, which does not come down to preferences, which are already conditioned by excessive media exposure at an early age. The failure to distinguish between reality and hyperreality constitutes the greatest dangers of the technological simulacra. When the general audience mistakes or confuses the hyperreal for reality, it allows itself to be deceived. When it believes what it sees on TV to be the literal unbiased truth, when in fact TV broadcasts a highly opinionated reconstructed version designed to transport its audience to a dream-like existence, the audience loses touch with reality and becomes immune to moral conscience, guilt and remorse for its actions—for example, war, ecological destruction, racism, etc. Group deception and delusion is rooted in personal inability to distinguish fact and fantasy, reality and illusion creating a strange self-hypnotic mass psychosis, easily persuaded by the predominate image projected into its thinking. “Brainwashing” or “mind control” are not the best choice of words, yet the terms still resonate for many people in describing the immediate effects of visual media on the audience. Electronic media bypass the rational process and speaks directly to the emotional or subconscious. Media effects the shaping of behavior through mass appeal of image, a reproduction of reality framed in drama and grounded in the erotic (sex appeal), moving the mass to do something (doing is being), buy, give, join, fight, etc., without the ballast of critical reflection that will spare a people from rushing headlong into disaster. The irrational nature of the emotional appeal was the cause for Plato’s expulsion of artists, musicians and dramatists from his fictional utopia The Republic. By allowing irrational appeal free reign, the public loses the appeal to critical reason as the measure of truth and the people become prone to deception and mass manipulation by a tyrant. Likewise Jesus urges all to pause in rational reflection, “to count the cost” like a king going to war or building a tower, before deciding to follow him (Luke 14:25-33).

The failure to discern the difference between reality and illusion in mass and social media is due to the intoxicating effects of hyperreality and the loss of critical reason in the public’s media consumption. Electronic media numbs awareness to reality and allows escape to fantasy, as the universal soma (perfect drug from Huxley’s fictional tale Brave New World). The condition of intoxication or “drunkardness” is one of self-induced madness, so the self-hypnotic condition of electronic media creates a similar neurosis. Karl Marx criticized religion as “the opiate of the people,” accurate for the masses living in the industrial conditions of the 19th century, but obsolete as a description of the masses since the invention of television, which has replaced religion as the opiate of the people.

When image dominates a societal mindset and learning, emotional (sex) appeal moves the population in mass conformity or group behavior that ousts critical reason in herd mentality, subject to the whims of the image makers, propagandists, clergy, advertisers, etc. Ellul noted two orders of thinking determined by the means of learning: image and language. Image learning presents knowledge as a totality, each image is a world, complete and ready-made, certain of its own truthfulness, imparting its information instantly so long as we occupy the same space as the image. “The image conveys to me information belonging to the category of evidence, which convinces me without any prior criticism” (Ellul, The Humiliation of the Word, 36). The image impresses itself on the character of the learner through unconscious acceptance that does not follow the logical sequence of language from start to finish, beginning to end but produces a haphazard collage of contradicting light totalities that appeal immediately to the moment (instant gratification). Image based learning produces a monolithic mentality or stereotypical thinking and prescribed behavior. Critical reason is never allowed to assert differences; extremes are normalized so that everything is accepted. This is very apparent in the current PC orthodoxy widely accepted in the Millennial generation, the first generation raised on the computer, that stupidly pontificates that any assertion of difference between sexes, races, religion, etc., etc., amounts to “hate-crime.” For example, the
gay lifestyle is no longer an acceptable alternative to monogamy but now has legal sanction as part of the mainstream establishment, despite its irrational and unnatural character. Islam is accepted as a religion of peace and compatible with Western democracies, yet no proof is ever offered to support this claim from the history of Islam. And the universal inanity of technological neutrality that provides the false sense of individual control over technological use, rapidly degenerates to technological necessity and inevitability of technological progress in actual daily behavior. Technology cannot be both neutral in its character under control of human choices and necessary or not under control of human choices, but autonomous (developing according to its own inner logic) at the same time; yet this inherent contradiction is completely ignored by all advocates of unlimited technological progress, Transhumanists, Futurists or simply all those who feel invested in the latest innovation: intellectuals, preachers, writers, professors, technogeeks, technognostics and technophiles. The smartest people in society appear completely oblivious to the contradiction of believing that technology is neutral in its essence yet necessary in application, rationalizing its rapid acceleration, not because they are bad people but because their thinking is dominated by the image of unlimited progress and human perfectibility projected onto them from the computer, rather than a rational way of thinking growing out of the book and lecture. Computerization of all human life creates the cardinal value of speed for its own sake (faster is better), which necessarily leads to nonlinear or irrational (emotional) learning through images because it is easy, instant, and unconscious, producing stereotypical categories and behavior. The word expressed in speech and writing produces opposition to image domination of the computer because it is slower, linear and critical.

The second order of thinking Ellul says comes from language or the spoken and written word which must follow an arduous task of connecting letters, words, sentences and thoughts to each other through the process of speaking, reading and writing which follows the contours of logical sequence in step by step growth in knowledge and reason. Language learning does not begin with the self-asserting certainty of the totalitarian image, but develops progressively from “the unknown to uncertain and then from the uncertain to the known.” (Ellul, The Humiliation of the Word, 36); dialectically including doubt, objection, protest or difference in the attainment of knowledge. Language is rational, self-aware or conscious, certain of what it knows but never exhaustive in its claim to absolute total knowledge, therefore it remains critical or open to differences of opinion and further learning; there is always something new to learn, discover and explore. Language allows for personal identity through individual choices that are free but never absolute or final beyond correction or criticism. In the total world imposed by the image, knowledge is absolute with nothing new possible, therefore it must be accepted uncritically.

Because language is rational it also produces the highest standards in ethics and morality-rooted individual values and beliefs. Rationalism always produces the greatest moralism. In the ancient world the rational school of philosophy (Stoicism) based on their belief in logos (universal reason) was also the most ethical in their practice of universal peace, and equality. In world religions Buddhism stands as the most rational in its beliefs of simple universal truths leading to practical moral behavior (Four Noble Truths: life is suffering, suffering is caused by selfish desire, suffering is alleviated by limiting selfish desire, curb selfish desire through the practical application of the Eightfold Path). Modern Rationalism culminating in the 19th century was also one of the profoundest in moral character in all strata of society, education, politics, economics and religion. The ethic of love rooted in the Fatherhood of God and Brotherhood of Man was considered the essence of Christianity in the 19th century (Harnack, What is Christianity?). The Jewish rabbinical approach to learning through language is legendary for its rationalism and strict legalism as well as its Islamic counterpart in the Muslim devotion to the Koran, Sharia Law and iconoclasm.

In the second order of language, ethics are grounded in personal choices as a product of rational
criticism, which allows for meaningful differences of opinion and the free creation of values. In the first order of image learning, all views are standard and all behavior an expression of group conformity. “The image tends . . . to produce conformity, to make us join a collective tendency” (Ellul, *The Humiliation of the Word*, 35). Thus the two orders of thinking are opposed to each other. The first order in totalitarian fashion is in the process of eradicating the second order through purging critical reason from the mindset of the population like a mass spiritual lobotomy that removes part of the brain that contains the higher function of reason and abstract thought process. The image overwhelms the word through reduction and then removal and remaps the collective mind to think accordingly, freedom of thought is left open as possibility only because most people cannot think for themselves but are programed through media saturation. Note the drift in social media from glorified email responses on Facebook to the forced shrinkage of the word to 120 characters on Twitter, to finally pictures only on Tumblr, and Instagram. The second order in critical toleration of the image does not want to eradicate it, but put image in its place, not as an expression of truth or reality but a simple illustration in service of the word and higher critical function of human nature through which humanity creates its self-definition, limits and significance. The second order of language thinking does not separate rational discourse in philosophy from a dramatic presentation in literature, or the arts, film or TV, etc. The Twentieth Century French Existentialists demonstrated the compatibility of rational discourse through abstract prose and exposition and the concrete embodiment of their ideas in dramatic forms such as plays, novels and movie illustrations. Jean Paul Sartre, Albert Camus, Gabriel Marcel wrote the most penetrating philosophical analysis of the modern condition of alienation as well as the greatest poetic description of modern despair and hope, for example, compare Sartre’s tome Being and Nothingness with his play “No Exit” or Camus’ essay on The Myth of Sisyphus to his novel The Stranger. Theologian Paul Tillich argued likewise that art serves as the spiritual barometer of culture. Through rational analysis of art, literature and drama the church will gain a better read on the spiritual climate of the society it hopes to evangelize and better tailor its message of the gospel to the concrete situation expressed through peoples felt needs. Even Jacques Ellul the leading social critic of visual media and advocate of word over image adopted a similar method of point and counter point as the existentialists by pairing the most penetrating sociological analysis of technology, raising the question how to limit autonomous technique and answering it with an allegorical interpretative method of the biblical text under the respectable umbrella of Barthian theology through his ethic of limits or nonpower. Compare The Technological Society to his biblical exposition of Genesis in The Meaning of the City.

14. On Facebook, friends can number into the thousands. New friends are just a click away; you don’t even have to know them or even meet them to be friends. Aristotle said that friends are the people we eat with every day. Simple enough to grasp, but what does an ancient Greek philosopher know compared to the moguls of social media?

15. Baudrillard and Eco validated Gasset’s thesis in *Revolt of the Masses* that science and technology sows the seeds of its own demise by elevating the mass of humanity through its values of discovery, invention and discipline, yet the mass revolt against those values that brought them to dominance. This is the same basic thesis that argues we are the victims of our own success as applied to capitalism and the accumulation of wealth. One generation works to achieve a level of wealth that the next generation inherits with all the benefits of wealth but none of the sacrifice of the previous generation. Therefore it squanders it not knowing the value of wealth not having to work for it and being raised in privilege.

Gay Marriage is another recent example of simulacra. The hyperreal replaces the real with a copy made in our own image. Contemporary society is under a spell, thinking it can remake the institution of marriage founded in the Bible between one man and one woman (Genesis 2 and Matthew 19) to include its opposite or whatever the courts deem acceptable; eventually the courts will accept the
union of people and their pets. Already the Disney Corporation has changed the name of The Family Channel to Free Form, an ominous precursor to the dissolution of meaning to the sacred word family in American popular culture and its reprobate legal system.

16. Reality and Truth are not coequal or synonymous terms, but signify different metaphysical orders. Ellul noted that the unity of reality and truth expresses “the unity of being” (Ellul, Humiliation of the Word, 96), or the right relationship between the Creator and his creation. Truth belongs to God’s essence alone, as the One Eternal Absolute. Reality expresses the multifaceted finite human concrete situation. When our reality aligns with God’s truth we experience the peace of redemption that passes understanding, harmonious being. Reality is the realm of sight that leads us away from the truth of the invisible God who cannot be seen and is found only through the word (speech, talk, conversation, discourse, lecture, song). The visible is the realm of false idols incarnated as very real visible powers (gods): Money, the State, and Technology (Ellul, The Humiliation of the Word, 94, 95). The order of reality is the order of human life which Nietzsche argued may include error. “Life no argument—We have fixed up a world for ourselves in which we can live-assuming bodies, lines, planes, causes and effects, motion and rest, form and content: without these articles of faith, nobody now would endure life. But that does not mean that they have been proved. Life is no argument; the conditions of life could include error.” (Friedrich Nietzsche, The Gay Science (New York: Vintage, 1974), 177 [121]). Iconoclasm then becomes the mission of the church as it proclaims the gospel and demolishes spiritual strong holds which is the battle for the mind “destroying speculations . . . raised up against the knowledge of God” (2 Corinthians 10:3-6); “iconoclasm is always essential to the degree that other gods and other representations are manifested . . . Today reality triumphs, has swept everything away and monopolizes all our energy and projects. The image is everywhere, but now we bestow dignity, authenticity and spiritual truth on it. We enclose within the image everything that belongs to the order of truth” (Ellul, The Humiliation of the Word, 94, 95).

17. In terms of an ethic of technology biblical truth translates as limit before use or law before license. For example, When adults set time limits on media use for their children anywhere from twenty minutes to an hour of screen time be it TV, computer or cell phone, they are practicing an ethic of technology.

Social critic Jacques Ellul stated; “The ‘yes’ makes no sense unless there is also the ‘no’ . . . the no comes first, death before resurrection. If the ‘No!’ is not lived in its reality the yes is a nice pleasantry, a comfort one adds to one’s material comfort, and as Barth has conclusively shown the No is included in the gospel” Quoted in Lawrence J. Terlizzese, Hope in the Thought of Jacques Ellul (Cascade: Eugene, OR, 2005), 127; Jacques Ellul, False Presence of the Kingdom, 25.

18. Original Divine Command: “From any tree of the Garden you may eat freely, but from the tree of the knowledge of good and evil you shall not eat, for in the day that you eat from it you shall surely die” (Genesis 2:16, 17 NASB).

Satanic Recreation of the original command: “Indeed, has God said, ‘You shall not eat from any tree of the garden’” (Genesis 3:1 NASB).

Imperative turns into question through a simple shift in voice emphasis, “Don’t eat!” to “Don’t eat?”, inciting disobedience instead of obedience as its effect, confusing the knowledge of good and evil.

19. The hyperreal replaces the real with a copy made in our own image. A copy is never greater than the original and to believe that a glorified reduction, a snap shot somehow surpasses the original shows just how far along the popular delusion has advanced. Simulacra is portent to antichrist: “The one whose coming is in accord with the activity of Satan, with all power and signs and false
wonders, and with all the deception of wickedness for those who perish, because they did not receive the love of the truth so as to be saved. For this reason God will send upon them a deluding influence so that they will believe what is false in order that they all may be judged who did not believe the truth, but took pleasure in wickedness” (2 Thessalonians 2:9-12). Mass media qualifies as “a deluding influence”: remaking the image of God in the image of an image. “Language is unobtrusive in that it never asserts itself on its own. When it [mass media] uses a loudspeaker and crushes others with its powerful equipment, when the television set speaks, the word is no longer involved, since no dialogue is possible. What we have in these cases is machines that use language as a way of asserting themselves. Their power is magnified, but language is reduced to a useless series of sounds which inspires only reflexes and animal instincts” (Jacques Ellul, The Humiliation of the Word, 23).

The first commandment teaches that “You shall not make any graven images . . . you shall not bow down to them nor worship them (Exodus 20:4, 5). The construction of image is always a reduction from an original and imperfectly copies what it claims to represent; presenting a false image of God, an idol. The idol transforms its worshipers into its own image. All those who worship idols become like them (Psalms 115).

By worshiping the creature humanity dehumanizes itself by bowing down to the created order lower than itself. The prohibition against worshipping idols is meant to spare God’s people from corrupting God’s glory by reducing the invisible Creator to the visible creation and enslaving themselves to the works of their own hands. Idolatry exchanges “the glory of the incorruptible God for an image in the form of corruptible man . . .” (Romans 1:23). The idol is the construction of man, representing his ideal of God (image) in his own image, which in turn recreates man as slave in the image of the idol. Here we see perfectly in the biblical model of idolatry, the same Transhumanists enterprise of constructing an ideal image (cyborg) in the image (mankind) of an image (the computer), leading not to human ascendance or godhood but dehumanization or slavery by placing humanity lower than its own creation (the cyborg condition). Man builds an idol he thinks represents God which in truth is a reduction of the glory of God into the image of the creature and lowers himself through worship of the false image of God making himself a slave to a thing that appears real but really does not exist outside of humanity’s faith in its own self-projection.

The first commandment prohibits “graven images” the invisible God cannot be seen in the works of human hands (Acts 17). All images of God are an affront to his holiness and danger to his children. Idols reduce God to the false image which then further reduces worshipers.

Iconoclasm is the central liberation mission of the church in its declaration of the gospel.

“No one can see God and live” (Exodus 33:20). “Images are incapable of expressing anything about God. In daily life as well, the word remains the expression God Chooses. Images are in a completely different domain—the domain that is not God and can never become God on any grounds” (Ellul, The Humiliation of the Word, 91).

21. God’s revelation comes only through the spoken word received by faith never through sight, which must remain subservient to the oral, spoken invisible message. “Faith comes from hearing and hearing by the word of Christ” (Romans 10:17). “We look not at the things that are seen, but at the things that are not seen; for the things that are seen are temporal, but the things that are not seen are eternal” (2 Corinthians 4:18). “We walk by faith, not by sight (2 Corinthians 5:7). “Faith is the assurance of things hoped for, conviction of things not seen . . . By faith we understand . . . Without faith it is impossible to please God” (Hebrews 11). “The righteousness of God is revealed from faith
to faith, as it is written; ‘The righteous live by faith!’ (Romans 1:17). “Set your mind on things above [the invisible Christ, “the way, the truth and the life”], not on the things that are on earth [the visible, material, tangible, concrete reality of the present world].” “Fixing our eyes on Jesus the author and perfecter of faith” (Hebrews 12:2). The aural, auditory sense or put simply the ear is the organ of perception and faith never the eyes. Sight brings only doubt; despite popular opinion seeing is not believing, but unbelief. The desire to see the truth is rooted in doubt and unbelief; “Unless I see . ..” doubting Thomas said, “. . . I will not believe” (John 20:25). “Blessed are they who have not seen and yet believe” (John 20:29). “Sight played an enormous role in the Fall and caused all of humanity and language to swing to its side. Under these circumstances, it is understandable that the Bible so often relates sight to sin. Sight is seen as the source of sin, and the eye becomes the link between reality and the flesh. The eye is seen as the focusing lens of the body (but only of the body). The Bible speaks of the lust of the eye and of the eye as the source and means of coveting. Now we know that covetousness is the crux of the whole affair, since sin always depends on it. “You shall not covet” (Ex. 20: 17) is the last of the commandments because it summarizes everything—all the other sins” (Ellul, *The Humiliation of the Word*, 100, 101). Because Eve looked upon the fruit, she lusted after wisdom, the knowledge of good and evil, a possession she desired but did not work for or earn that did not belong to her. “Eve coveted equality with God . . . She coveted autonomy of decision” (Ellul, *The Humiliation of the Word*, 101). Lust is born from sight of the material possession. The Tenth Commandment lists a prohibition of desire on what does not belong to us but is rightfully our neighbor’s: his wife, house, domesticated animals and servants, all must first be seen before desired. Today we call these possessions status symbols, spouse, house, cars, money, etc., etc., all the objects of consumer desire that dominate our visual horizon through advertising, commercials and the all-pervasive world of image, which fills us with materialistic greed.

22. Technological convergence brings TV, computer, cell phone, video game (telecommunications) together as one medium. Professor of Philosophy Andy Clark notes that the cell phone is the gateway to the cyborg condition: “The cell phone is, indeed, a prime, if entry-level cyborg technology” (Andy Clark, *Natural-Born Cyborgs: Minds, Technologies, and the Future of Human Intelligence* [New York: Oxford University Press, 2003], 27). The cell phone has evolved from a clumsy mobile phone into a sleek microcomputer that puts the full resources of the internet at the fingertips of the user.

The computer medium heralds the absolute closing of the human mind and cultural diversity by subverting all ends to its means it creates the condition necessary for total domination of the human spirit. All total systems subvert ends to means in their revolutionary beginning, such as the Napoleonic empire, fascism and communism. “By any means necessary,” or “for the good of the cause” becomes the motto of the radical on the road to totalitarian paradise (Serfdom). The computer coopts all nontechnical areas; in the form of “technical aid and support” subverting their ends by overbearing means. As the absolute single point of convergence for all humanity the computer fixes its own organizational categories on every person, discipline (field) or organization that uses it. The passage of admission to digital utopia is technical conformity (surrender). All nontech people and fields must soon learn the ways of the computer, if they expect to survive in the new universal cyber regime (the technological order). Liberal Arts, for instance no longer exists as a separate track or discipline in a dialectical counter balance to Science. Beholden to the computer for success it has sold its spiritual birth right as moral conscience through cultural critic or prophet to the rational establishment. By way of apt analogy, in the past when churches received State support through official recognition as the established religion they became in effect the court prophets, chaplain’s to the king. They "sold out" to the powers that be, forfeiting their divisive voice. Dissent is never allowed in any total system by definition, otherwise it would not be total. Those who profit from the system are not in a position to disagree with its direction without mortal endangerment. The old maxim “never bite the hand that feeds you” was rigorously applied by the official religions in the past. Likewise, rarely is a critical voice heard today through the prodigious production of liberal
arts in media, except for science fiction film. The old dichotomy of art and technology embodied in
the Intellectual versus the City model has resolved itself in the computer. Chilton Williamson, Jr.
noted the subtle reeducation the older generation of writers must endure in order to practice their
work using the computer. “Writing ought to be, technically speaking, among the simplest and natural
of human actions. The computer makes it one of the most complex and unnatural ones. It is nothing
less than a crime against humanity, and against art, that a writer should be required to learn how to
master a machine of any kind whatsoever in order to write a single sentence. But no writer today
can succeed in his craft if he does not learn to become a more or less skillful machine operator first.”
(“Digital Enthusiasm” in Chronicles [June 2014, 38.6], 33). The end or goal of writing (to be read by
others) has been subverted by means of the computer (Subversion: to corrupt an alien system for
different ends from within, for example; primitive Christianity was subverted by the political forces
of the later Roman Empire, creating Christendom). Computer subversion of humanity has been
repeated simultaneously with writing since the digital revolution in the 1990’s.

By giving children at the earliest age possible a computer to play with and master, turning work into
play, the technological oligarchy has guaranteed that they will grow to become computer technicians
in some degree and has successfully circumvented the nasty reeducation process necessary to all
revolutions in the past. As the product of the digital revolution the Millennial generation has
inherited the onerous responsibility of being the first generation raised on the computer as their
defining characteristic. They are the first non-national generation, identifiable by digital acuity,
video game addiction and the cell phone, rather than by race, gender or creed. The world that they
create will ultimately prove their humanity or not.

One machine that can do everything controls everyone, even now as I write an unsolicited
advertisement appears on my computer screen telling me that “Technical support is designed to
monitor your system for issues.” Positively Orwellian! No greater insidious subtlety to seduce the
human spirit than the emerging global technological order has appeared since the Tower of Babel!

All total systems are inherently corrupt and eventually self-destruct.

23. Philosopher Michael Foucault builds on Jeremy Bentham’s purposed panoptic system theory by
arguing that Bentham’s proposed universal prison surveillance system that kept prisoners under
constant watch has been extended to contemporary society through media saturation. Law Professor
Jerry Rosen argues that through social media society has entered a condition he describes as
“Omniopipticon” where we are all watching each other (The Naked Crowd); Ellul, The Humiliation of
the Word, 152; Reg Whitaker The End of Privacy: How Total Surveillance Is Becoming a Reality

24. Hyperreal communities, churches, schools, dating sites do not allow for individual charisma,
personal persona, flamboyancy, speech impediments, warts, blemishes, ugliness, beauty,
intelligence, everything thing that makes an individual unique disappears behind the brilliance of a
cartoon reality.

The modern socialization process once reserved for family, church and community in traditional
society has been usurped by media and the State. Socialization is the rather sensitive and all
important process through which values are imprinted on youth. Socialization is everything! Society
receives its understanding of right and wrong, good and evil in a word normalcy through
socialization. In the mission of the church socialization is equal to evangelism. If the church
successfully evangelizes a society, converting everyone to the Christian faith, it must then pass those
values to the next generation, if it fails to do so it must then start the whole evangelization process
over. Regrettably, the American church is learning this lesson the hard way, after surrendering the
socialization process of Christian youth to media, and public schools. The most media saturated and
technologically adapt generation in human history is rapidly becoming the most nihilistic since late antiquity.

Media transmits collective values directly to the social body by passing the individual consciousness. Mass media transmits its own values of consumption and materialism that traditional family, church and community as social agents cannot compete with according to social critic Herbert Marcuse. Media transmits the values of “efficiency, dream, and romance.” “With this education, the family can no longer compete.” The father’s authority is the first traditional value to fall. (Herbert Marcuse, *Eros and Civilization: A Philosophical Inquiry to Freud* (New York: Vintage 1955, 88).

26. The only reason people give as to why they use media technology is because of its convenience, it is easier to send an email or text than write a letter and use a postage stamp. However, ease of use and convenience shows lack of understanding as well as accountability. “I use it because it is easy” is hardly a thought-out moral defense for one’s action! And here is where the trap lies for all of us. The history of technology demonstrates that convenient and pervasive use over time slowly turns into necessity. What was once done because it was so easy to do, eventually must be done. TV, computer and most recently the cell phone, these technologies never appeared as necessities but convenience, but now they are irresistible necessities. Convenience turns into necessity because it was so easy to send a text, or email, we have forgotten how to communicate in any other way, or refuse to relearn those old ways. Convenience dulls the spirit and numbs the mind, producing stupidity and apathy by removing all other practices from our intellectual horizon. Beware of anything that looks so easy, it is nothing more than a hook to necessity. The old saying, “If it sounds too good to be true it probably is,” applies to technology as well. “Whatever appears to make your life easier right now in the long run may make it more difficult.” Convenience turns into habit, habit turns into need, need turns into addiction.

27. The friendships forged in traditional institutions create the social support network for an individual throughout his professional career. As an online professor I did not know how to write a letter of recommendation for a student I have never met in person. Education has become so dominated by technical learning, all students in essence are studying to be engineers in their field whether teachers, medical practitioners, social workers etc.; they are taught efficient methods as administrators or managers of large groups of people.

30. Ellul, *The Humiliation of the Word*, 122. “Even more, it [the camera] keeps me from proceeding to cultural assimilation, because these two steps can be taken only in a state of availability and lack of preoccupation with other matters – a state of “being there.” (Ibid).

31. In line with Baudrillard thesis on the orders of simulacra, popular cell phone use, namely texting, demonstrates regressive effects of the latter stage of simulacra: metastasis or reversal of effects. It is quite common to see people texting and even preferring texting to any other mode of communication, especially phone calling, when it is obviously easier to call and talk than it is to text, time wise and in terms of context and amount of content necessary for successful conversation, yet texting is preferred because of its impersonal nature; people prefer the harder task of texting because it is impersonal, however, impersonal communication is less effective to the point of communication.
32. Radio Times (January 2016). Hawking said bluntly, “I think the development of full artificial intelligence could spell the end of the human race.” Quoted in “Rise of the Machines” in the Dallas Morning News Sunday, February 14, 2016, 1P. Recognizing and controlling the dangers of progress is a call for limits and boundaries to technological acceleration possible only through negation.

33. The fear of living without the necessity that controls us reveals the modern condition of technological determinism. In confronting determinism we must appeal to “the individual’s sense of responsibility . . . the first act of freedom, is to become aware of the necessity” (Ellul, The Technological Society, xxxiii).

Necessity (whatever we fear we cannot live without) is always a limitation placed on human nature, such as the basic biological needs to eat and sleep. Necessity limits freedom and therefore power and ability. Death is also a necessity, without which new life and growth cannot take place. However, death is the last enemy, which is defeated finally in the resurrection of the saints (1 Corinthians 15:50-58). To believe as Transhumanists do that death can be overcome through technological enhancement can only result in abomination. Professor of Computer Science Matthew Dickerson prophetically asks, what if the Transhuman “transformation is based on something that is not true? What will we be transformed into?” (The Mind and the Machine: What it Means to be Human and Why it Matters, Grand Rapids, MI: Brazos Press, 2011), xiv.

34. A campaign to “JUST SAY NO!” to further technological advance that threatens human existence, such as artificial intelligence, must be a collective effort for the entire human race, but begins with our own personal individual choices in limiting technological use, i.e. TV, computer, cell phone, and automobiles, and set boundaries to consumption on all consumer products. Resist the digitalization of traditional life through technological transfer of community to the online medium. Despite the convenience of a total online education it is unconscionable and detrimental if online students never encounter a real college classroom, talk face to face with a professor and argue in group discussion with peers. Likewise, the church cannot remain the Body of Christ by shunting its responsibilities to parishioners, new members and seekers by declaring online and televised services equal to a live one. “Do not forsake the assembly of yourselves together“ (Hebrews 10:25) prohibits a total digitalization of Christian worship and community. Christ said, “Where two or three have gathered in my name, I am there in the midst of them” (Matthew 18:20). The bodily presence necessary for community conveyed in these passages must not be allegorized by techno-gnostics who equate physical isolation in front of an electric screen to be “just as good” as being there.

35. We are enslaved to what we fear we cannot live without whether it be money, sex or technology. The rich young ruler did not follow Christ because he could not imagine life without his wealth, the security, comfort and power it bestowed was greater than the promise of eternal life through Jesus Christ. “Children, how hard it is for those who trust in riches to enter the kingdom of God” (Mark 10:24). The disciples were in shock at Jesus’ utter intolerance to devotion to anything other than God: “You cannot serve God and money [technology, power]” (Matthew 6:24). Knowing their own attachment to wealth, they despaired, “Who then can be saved?” (Mark 10:26). It appears impossible to give up what we fear we cannot live without. “What shall we eat? What shall we drink? What shall we wear?” (Matthew 6:25); the perennial anxiety and pursuit of the faithless and fearful enslaved to material (bodily) necessity; “Is not life more than food and the body more than clothing [enhancement]?” (Matthew 6:25). “For after all these things the Gentiles [unregenerate] seek” (Matthew 6:32). “But Lord Jesus, we cannot live without cell phones and computers, any more than we can live without money! Get real, be reasonable—Lord you are asking the impossible of mortal sinners.” And Jesus agrees, “With people it is impossible, but not with God; for all things are possible with God” (Mark 10:27).

36. Louis Armstrong – What A Wonderful World Lyrics | MetroLyrics
