

# 9/11 and You

My sister had a 9:00 a.m. appointment at the World Trade Center.

On September 12.

Since September 11, 2001, I've often wondered what might have happened had her appointment been a day earlier or the terrorist attacks a day later. I could have been walking the streets of New York City with her picture.

What were your feelings that tragic day? Shock? Fear? Anger? Confusion? Sadness? How do you process those feelings now, as reminders of the attacks come in anniversary commemorations and media coverage? Nearly two-thirds of American Red Cross 9/11 adult counselees still grieve, according to a study of those directly affected by the attacks<sup>{1}</sup>.

## “I Hate You!”

In the immediate aftermath, my feelings of sadness blended with intense hostility. Once when Osama Bin Laden's face appeared on television, I spontaneously shouted, “I hate you!”

I was and am a follower of Jesus. He taught his followers to “love your enemies.”<sup>{2}</sup> Why was I yelling “I hate you!” to a picture on a TV screen?

I wondered why this guy hated my sister. If Deborah Wright had been among the victims, her death would have been included among those he applauded. If I had been a victim, he would have applauded mine. I wrote a radio series on “[Why Radical Muslims Hate You](#)” to discover historical, socio-cultural, political, religious, and psychological roots of such anger. It helped me to connect with Muslims who shared similar concerns but disavowed the radical methods.

## Dust of Death

Deborah's experience as a corporate chaplain took her back to New York to help WTC-based companies and their employees who suffered loss on 9/11 cope with the emotional and spiritual whirlwinds their worlds had become. Many suffered from survivor guilt. Failure to process grief could lead to serious consequences. Some firemen, for instance, were assigned to look after widows of fallen comrades. "There can be enormous intimacy and bonding in shared grief," Deborah notes. "Some of the firemen and widows ended up in bed together."

Some competitive, driven businesspersons re-examined their rat race—making big bucks and accumulating the most toys—and asked, "Is that all there is?". Long looks at corporate culture prompted many to consider spiritual realities.

Part of helping survivors process their experiences involved taking them to Ground Zero. Deborah comments, "As I stood at Ground Zero and picked up the dust, I could not help but think that we were standing in a giant crematorium. The ground seemed hallowed to me."

## Personal Lessons from 9/11

What personal 9/11 lessons persist? Perhaps you can relate to these that seem poignant to me:

*We live in a contingent universe.* Human decisions and actions have consequences, often for good or evil.

*Life is temporary.* One early spiritual leader wrote of our lives' fleeting nature, "You are just a vapor that appears for a little while and then vanishes away."[\[3\]](#)

*Link with the eternal.* Jesus of Nazareth, whom people of diverse spiritual persuasions respect as a great teacher, told a friend grieving her brother's death, "I am the resurrection and the life. Those who believe in me, even though they die

like everyone else, will live again. They are given eternal life for believing in me and will never perish.”[\[4\]](#)

*Cherish your friends.* In the aftermath of 9/11, many friendships were deepened as people linked with each other for encouragement, solace and support.

*Understand and love your enemies and intellectual adversaries.* Support national defense, but learning about state enemies can help communication with moderates who share some of their convictions. Getting to know neighbors or associates with whom you differ politically, philosophically or spiritually can help build bridges that foster civility in public discourse.

# Animal House Considers God

How would you like this introduction for your speaking engagement?

The terrazzo floor is glazed with stale, dry beer from the weekend’s wild party. As students stream into the dining room,

it is obvious no self-respecting cockroach would have wanted to live in the adjoining kitchen. A few composite portraits of members hang – somewhat askew – on the paneled walls. The room buzzes as the 60 men swap stories and engage in friendly banter. Then their leader gavels them to order. Welcome to the fraternity chapter meeting.

First up is a profanity-laced tirade by the president condemning two rival University of Miami fraternities and a UM campus administrator. Next, an officer blasts some members for lagging participation. A sharp crack of the gavel awakens a sleeping brother, who responds with an obscene gesture. The president declares he is stressed out and cannot wait to get away for spring break so he can get drunk and sleep with some chicks he does not know. A few minutes later he announces a speaker who has come to talk about brotherhood.

As you step up to speak, you might think, ***So, I break my back raising support to get to do this?***

Some friends, Christian campus workers at the University of Miami, lined me up to speak at this fraternity. Ken and Robert were eager to reach the campus Greek community. Of course, fraternity and sorority members have no special standing in God's eyes. But Greeks are leaders on many campuses, with significant potential influence for Christ. They often live together which helps facilitate small groups and discipleship. Ken was a member of this fraternity on another campus, as was I, and his relationships in the Miami chapter opened doors. We prayed that God would work through this meeting.

My opening joke bombed. My stories and illustrations about communication skills, conflict resolution, and brotherly love seemed to connect; they laughed and appeared more relaxed. The chapter advisor had told me that internal feuds were affecting his men. As I spoke, I was convinced the Holy Spirit had arranged this presentation on this topic for this audience at this moment. To catch a glimpse of what went on that evening,

here is a bit of what the men heard.

## **Backfired Road Trip And Brotherly Love Quotient**

I related this incident: During my freshman year in college, two other pledges and I took my fraternity big brother (an older student mentor) on a road trip. We borrowed his car (he was generous), took him to dinner, and then drove to a remote location with plans to strand him there. All went according to plan until we arrived at the remote location. Somehow, he overpowered us, grabbed the keys, and drove off, leaving **us** to find our way home. Of course, we were red-faced. Eventually, his forgiveness soothed our embarrassment.

In the same way, these men to whom I spoke could forgive when wronged, but care enough to confront when appropriate. Balancing truth and grace can be challenging.

Some questions helped them analyze their attitudes and brotherly love quotient:

- 1. How often do I use biting sarcasm?*
- 2. How do I act toward members whose participation lags?*
- 3. Do I participate in chapter activities as I should? How is my attitude?*
- 4. How do I feel about the brother who casts a vote against my favorite rushee (prospective member)?*
- 5. How do I relate to rushees to whom we did not extend bids to join the fraternity? Later, when I see them on campus, do I give a friendly smile and greeting? Or was all that just for rush?*
- 6. I am madly in love with the beautiful blond in Chemistry 101. So is another member of my chapter ... and **they** are going*

*out tonight. How do I feel toward that brother?*

Number six may be the ultimate test of brotherly love.

How does one get the internal power to love and accept others unconditionally? I related to these men that as I struggled with this question some friends suggested I consider the spiritual dimension. I learned in coming to faith as a freshman that God can provide inner power to enhance life and relationships.

The men seemed fairly attentive and were gracious in their applause. Had the Holy Spirit penetrated hearts? The men's written comments gave some clues:

- *"On target."*
- *"Very good but a bit idealistic to me."*
- *"If I did not know any better, I would have thought that you had lived here for months. You clearly know the ins and outs of fraternity life, and you hit the nail right on the head. I especially like what you said about the situation where two brothers like the same girl [sic]; it happens more than we would like to admit. Thank you."*
- *"Boring."*
- *"Very sincere. I am not the most spiritual person. But you made sense."*
- *"You read my mind."*
- *"I would be interested in receiving your articles and more about brotherhood."*

Arrogance, wrath, and lasciviousness sometime mask empty hurting hearts.

Ken continued his ministry in that house. Two years later, the chapter gathered at 11 p.m. to hear a Christian perspective on sex. When my host and I departed after midnight, several men followed us out the door with heartfelt questions. Animal house was not a church sanctuary, but God was at work.

## **Lessons For Communicating In Secular Universities**

Consider some lessons from this story that relate to one-on-one, small-group, and public speaking situations.

### **Pray**

Ken, Robert, other friends, and I prayed before the outreach. The warm response was God's answer. Wisdom and skill help, but ultimately it is God who works in hearts.

### **Meet on their turf**

To present Christ to hardened nonbelievers in their own home might seem scary, but they feel much more comfortable there among their friends than they would in a church or a neutral campus location. Use various outreach venues as appropriate, but also go where people are. Jesus and Paul went to homes, the marketplace, synagogues, and schools.

### **Transcend differences**

In a Greek house or dormitory, you may encounter uncomfortable scenarios: pinups, porn, drunkenness, and foul language. At a campus-wide outreach meeting in my fraternity house, one member welcomed guests while tied to a cross. Other members heckled the speaker. The speaker responded with poise, engaging them in friendly dialogue about Jesus. We are seeking to rescue lost people who do not always feel lost. Pick your battles and learn to overlook the natural flaws of natural people so you can relate spiritual truth.

## **Establish personal relationships**

Ken's friendships with fraternity leaders helped open doors for our meeting and for continued ministry there. That we were both members of their fraternity did not hurt. Use the opportunities you are given; but warm, personal relationships can open many doors for the gospel.

## **Use humor and stories**

Those men could relate to the story about my backfired road trip, laughing with – and at – me. Humor can involve risk. I have studied, written about, taught, and used humor often. I also have had hilarious stories fall flat. Learn from these situations, develop recovery techniques, but realize that circumstances and specific audiences may generate different reactions. Do not be discouraged when your best zingers or illustrations bomb. Ask others to critique your presentation, but keep telling stories to connect with today's campus culture.

## **Connect with their situation**

Learn your listeners' intellectual and emotional languages. This applies to any people group you seek to reach, whether they reside in remote forested jungles or nearby academic ones. In this case, stories about fraternity life and recognizable social situations – using terms familiar to them – helped gain and hold attention.

## **Connect their interests with spiritual matters**

The brotherly love quotient questions helped listeners consider their need for inner strength to love unconditionally. From that point, discussing spiritual matters, God's inner power, and my own journey to faith followed naturally. Do not simply tack the gospel onto your secular material. Show a clear connection.

## Trust the Holy Spirit for long-term fruit and open doors

After Paul presented Christ to the Greek philosophers on Mars Hill, “some laughed, but others said, ‘We want to hear more about this later.’ ... Some joined him and became believers” (Acts 17:32,34, NLT).<sup>{1}</sup> Similarly, in our attempts to reach secular students and professors, some will scorn, some will want to know more, and some will believe. As we are faithful to trust the Holy Spirit to open hearts and doors of opportunity, God will work. “The king’s heart is like channels of water in the hand of the Lord; He turns it wherever He wishes” (Proverbs 21:1, NASB).<sup>{2}</sup>

# Duke Lacrosse: Ethical Reflections

Written by Rusty Wright

The Duke lacrosse story has multiple ingredients for explosive

media coverage: sex, race, politics, criminal charges, sports, class, a prestigious institution the list goes on.

Like many Duke alumni, I have personal convictions about the scandal. My Duke experience was and remains positive. So I'm biased. But I'm also realistic. Houston, we have a problem.

As much of the civilized world knows, a hired African-American stripper alleged some white players raped her at a lacrosse party. The accuser attended nearby North Carolina Central University. The accused maintain their innocence. The lacrosse coach resigned. Duke cancelled the season.

During basketball season, it was often "All Duke, all the time" on America's sports pages. Through much of the Spring, it became "All Duke, all the time" on the front pages.

Nowadays at Duke, quips one professor, historical calendars are not reckoned "BC" and "AD" but "BLC" and "ALC." "Before the Lacrosse Crisis" and "After the Lacrosse Crisis."

I'm glad Duke President Richard Broadhead emphasizes the presumption of innocence in criminal law. Travels in Eastern Europe and the former Soviet Union have exposed me to chilling stories about presuming guilt.

At an April reunion, I found the campus buzzing with controversy. Some students conveyed deep personal pain about race and gender issues. At their national tournament in May, Duke women lacrosse players wore wristbands and headbands supporting the men's team.

Broadhead commissioned an ongoing Campus Culture Initiative emphasizing responsibility and respect. In my view, he's handled a difficult situation with exceptional grace, dignity, and transparency.

What ethical lessons might come from this episode? Of course, if rape occurred, punishment should ensue.

But setting aside the rape allegations, what about the ethics of hiring a stripper? What principles should determine how we act in life?

When I was an undergraduate, a friend from the fraternity next door excitedly told me the dean had just given his fraternity permission to host a topless dancer at their Saturday night party in university housing.

Fast forward to 2006. On one television program, a woman argued that her own stripping had paid her college bills, and besides, it allowed her to exercise power over men.

Suppose you were a Duke student. Should you host or attend such a party? Hiring a stripper broke no laws. Both the players and the young woman could claim benefit. What's the harm?

A pragmatist might maintain, "In retrospect, it was more trouble than it was worth." A libertarian might assert, "Stripping's OK, if no one gets hurt." Some absolutists might say, "No. Never." Feminists could argue either side. Stripping exploits women as sex objects, a negative cultural influence. Yet a woman needs to earn a living.

Duke ethicist Elizabeth Kiss, soon to become Agnes Scott College president, recommends a starting point for answering the classic question, "How should I act?" She notes that the "[Golden Rule](#)" appears in various forms in different faith traditions.

Good point. Jesus said, "In everything, therefore, treat people the same way you want them to treat you."

The Jewish Talmud says, "What is hateful to you, do not do to your neighbor."

Muhammad said, "Not one of you truly believes until you wish for others what you wish for yourself."

On Duke's main quadrangle sits a [plaque](#) containing the first article of the university's bylaws. The statement promotes truth, scholarship, freedom, tolerance, and service. It begins as follows:

"The aims of Duke University are to assert a faith in the eternal union of knowledge and religion set forth in the teachings and character of Jesus Christ, the Son of God..."

Hmmm. An ethical guideline worth considering?

## Redeeming the Da Vinci Code

*Dr. Michael Gleghorn critiques The Da Vinci Code's theories, demonstrating that most of these theories are simply false.*

*This article is also available in [Spanish](#).*

### Introduction to *The Da Vinci Code*

Dan Brown's novel, *The Da Vinci Code*,[{1}](#) has generated a huge amount of interest from the reading public. About forty million copies have been sold worldwide.[{2}](#) And Ron Howard and Sony Pictures have brought the story to theatres.[{3}](#) To help answer some of the challenges which this novel poses to

biblical Christianity, Probe has teamed up with EvanTell, an evangelism training ministry, to produce a DVD series called *Redeeming The Da Vinci Code*. The series aims to strengthen the faith of believers and equip them to share their faith with those who see the movie or have read the book.[{4}](#) I hope this article will also encourage you to use this event to witness to the truth to friends or family who have read the book or seen the movie.

Why so much fuss about a novel? The story begins with the murder of the Louvre's curator. But this curator isn't just interested in art; he's also the Grand Master of a secret society called the Priory of Sion. The Priory guards a secret that, if revealed, would discredit biblical Christianity. Before dying, the curator attempts to pass on the secret to his granddaughter Sophie, a cryptographer, and Harvard professor Robert Langdon, by leaving a number of clues that he hopes will guide them to the truth.

So what's the secret? The location and identity of the Holy Grail. But in Brown's novel, the Grail is not the cup allegedly used by Christ at the Last Supper. It's rather Mary Magdalene, the wife of Jesus, who carried on the royal bloodline of Christ by giving birth to His child! The Priory guards the secret location of Mary's tomb and serves to protect the bloodline of Jesus that has continued to this day!

Does anyone take these ideas seriously? Yes; they do. This is partly due to the way the story is written. The first word one encounters in *The Da Vinci Code*, in bold uppercase letters, is the word "FACT." Shortly thereafter Brown writes, "All descriptions of artwork, architecture, documents, and secret rituals in this novel are accurate."[{5}](#) And the average reader, with no special knowledge in these areas, will assume the statement is true. But it's not, and many have documented some of Brown's inaccuracies in these areas.[{6}](#)

Brown also has a way of making the novel's theories about

Jesus and the early church seem credible. The theories are espoused by the novel's most educated characters: a British royal historian, Leigh Teabing, and a Harvard professor, Robert Langdon. When put in the mouths of these characters, one comes away with the impression that the theories are actually true. But are they?

In this article, I'll argue that most of what the novel says about Jesus, the Bible, and the history of the early church is simply false. I'll also say a bit about how this material can be used in evangelism.

## **Did Constantine Embellish Our Four Gospels?**

Were the Gospels of Matthew, Mark, Luke and John, which were later to be officially recognized as part of the New Testament canon, intentionally embellished in the fourth century at the command of Emperor Constantine? This is what Leigh Teabing, the fictional historian in *The Da Vinci Code*, suggests. At one point he states, "Constantine commissioned and financed a new Bible, which omitted those gospels that spoke of Christ's human traits and embellished those gospels that made Him godlike" (234). Is this true?

In a letter to the church historian Eusebius, Constantine did indeed order the preparation of "fifty copies of the sacred Scriptures."[\[7\]](#) But nowhere in the letter does he command that any of the Gospels be embellished in order to make Jesus appear more godlike. And even if he had, it would have been virtually impossible to get faithful Christians to accept such accounts.

Before the reign of Constantine, the church suffered great persecution under Emperor Diocletian. It's hard to believe that the same church that had withstood this persecution would jettison their cherished Gospels and embrace embellished

accounts of Jesus' life! It's also virtually certain that had Constantine tried such a thing, we'd have lots of evidence for it in the writings of the church fathers. But we have none. Not one of them mentions an attempt by Constantine to alter any of our Gospels. And finally, to claim that the leaders of the fourth century church, many of whom had suffered persecution for their faith in Christ, would agree to join Constantine in a conspiracy of this kind is completely unrealistic.

One last point. We have copies of the four Gospels that are significantly earlier than Constantine and the Council of Nicaea (or Nicea). Although none of the copies are complete, we do have nearly complete copies of both Luke and John in a codex dated between A.D. 175 and 225—at least a hundred years before Nicaea. Another manuscript, dating from about A.D. 200 or earlier, contains most of John's Gospel.[\[8\]](#) But why is this important?

First, we can compare these pre-Nicene manuscripts with those that followed Nicaea to see if any embellishment occurred. None did. Second, the pre-Nicene versions of John's Gospel include some of the strongest declarations of Jesus' deity on record (e.g. 1:1-3; 8:58; 10:30-33). That is, the most explicit declarations of Jesus' deity in any of our Gospels are already found in manuscripts that pre-date Constantine by more than a hundred years!

If you have a non-Christian friend who believes these books were embellished, you might gently refer them to this evidence. Then, encourage them to read the Gospels for themselves and find out who Jesus really is.

But what if they think these sources can't be trusted?

## Can We Trust the Gospels?

Although there's no historical basis for the claim that Constantine embellished the New Testament Gospels to make Jesus appear more godlike, we must still ask whether the Gospels are reliable sources of information about Jesus. According to Teabing, the novel's fictional historian, "Almost everything our fathers taught us about Christ is false" (235). Is this true? The answer largely depends on the reliability of our earliest biographies of Jesus—the Gospels of Matthew, Mark, Luke and John.

Each of these Gospels was written in the first century A.D. Although they are technically anonymous, we have fairly strong evidence from second century writers such as Papias (c. A.D. 125) and Irenaeus (c. A.D. 180) for ascribing each Gospel to its traditional author. If their testimony is true (and we've little reason to doubt it), then Mark, the companion of Peter, wrote down the substance of Peter's preaching. And Luke, the companion of Paul, carefully researched the biography that bears his name. Finally, Matthew and John, two of Jesus' twelve disciples, wrote the books ascribed to them. If this is correct, then the events recorded in these Gospels "are based on either direct or indirect eyewitness testimony."[{9}](#)

But did the Gospel writers intend to reliably record the life and ministry of Jesus? Were they even interested in history, or did their theological agendas overshadow any desire they may have had to tell us what really happened? Craig Blomberg, a New Testament scholar, observes that the prologue to Luke's Gospel "reads very much like prefaces to other generally trusted historical and biographical works of antiquity." He further notes that since Matthew and Mark are similar to Luke in terms of genre, "it seems reasonable that Luke's historical intent would closely mirror theirs."[{10}](#) Finally, John tells us that he wrote his Gospel so that people might believe that Jesus is the Christ, the Son of God, and that by believing

they might have life in His name (20:31). While this statement admittedly reveals a theological agenda, Blomberg points out that “if you’re going to be convinced enough to believe, the theology has to flow from accurate history.”[\[11\]](#)

Interestingly, the disciplines of history and archaeology are a great help in corroborating the general reliability of the Gospel writers. Where these authors mention people, places, and events that can be checked against other ancient sources, they are consistently shown to be quite reliable. We need to let our non-Christian friends know that we have good grounds for trusting the New Testament Gospels and believing what they say about Jesus.

But what if they ask about those Gospels that didn’t make it into the New Testament? Specifically, what if they ask about the Nag Hammadi documents?

## **The Nag Hammadi Documents**

Since their discovery in 1945, there’s been much interest in the Nag Hammadi texts. What are these documents? When were they written, and by whom, and for what purpose? According to Teabing, the historian in *The Da Vinci Code*, the Nag Hammadi texts represent “the earliest Christian records” (245). These “unaltered gospels,” he claims, tell the real story about Jesus and early Christianity (248). The New Testament Gospels are allegedly a later, corrupted version of these events.

The only difficulty with Teabing’s theory is that it’s wrong. The Nag Hammadi documents are not “the earliest Christian records.” Every book in the New Testament is earlier. The New Testament documents were all written in the first century A.D. By contrast, the dates for the Nag Hammadi texts range from the second to the third century A.D. As Darrell Bock observes in *Breaking The Da Vinci Code*, “The bulk of this material is a few generations removed from the foundations of the Christian

faith, a vital point to remember when assessing the contents.”[{12}](#)

What do we know about the contents of these books? It is generally agreed that the Nag Hammadi texts are Gnostic documents. The key tenet of Gnosticism is that salvation comes through secret knowledge. As a result, the Gnostic Gospels, in striking contrast to their New Testament counterparts, place almost no value on the death and resurrection of Jesus. Indeed, Gnostic Christology had a tendency to separate the human Jesus from the divine Christ, seeing them as two distinct beings. It was not the divine Christ who suffered and died; it was merely the human Jesus—or perhaps even Simon of Cyrene.[{13}](#) It didn’t matter much to the Gnostics because in their view the death of Jesus was irrelevant for attaining salvation. What was truly important was not the death of the man Jesus but the secret knowledge brought by the divine Christ. According to the Gnostics, salvation came through a correct understanding of this secret knowledge.[{14}](#)

Clearly these doctrines are incompatible with the New Testament teaching about Christ and salvation (e.g. Rom. 3:21-26; 5:1-11; 1 Cor. 15:3-11; Tit. 2:11-14). Ironically, they’re also incompatible with Teabing’s view that the Nag Hammadi texts “speak of Christ’s ministry in very human terms” (234). The Nag Hammadi texts actually present Christ as a divine being, though quite differently from the New Testament perspective.[{15}](#)

Thus, the Nag Hammadi texts are both later than the New Testament writings and characterized by a worldview that is entirely alien to their theology. We must explain to our non-Christian friends that the church fathers exercised great wisdom in rejecting these books from the New Testament.

But what if they ask us how it was decided what books to include?

# The Formation of the New Testament Canon

In the early centuries of Christianity, many books were written about the teachings of Jesus and His apostles. Most of these books never made it into the New Testament. They include such titles as The Gospel of Philip, The Acts of John, and The Apocalypse of Peter. How did the early church decide what books to include in the New Testament and what to reject? When were these decisions made, and by whom? According to the Teabing, "The Bible, as we know it today, was collated by . . . Constantine the Great" (231). Is this true?

The early church had definite criteria that had to be met for a book to be included in the New Testament. As Bart Ehrman observes, a book had to be ancient, written close to the time of Jesus. It had to be written either by an apostle or a companion of an apostle. It had to be consistent with the orthodox understanding of the faith. And it had to be widely recognized and accepted by the church.[{16}](#) Books that didn't meet these criteria weren't included in the New Testament.

When were these decisions made? And who made them? There wasn't an ecumenical council in the early church that officially decreed that the twenty-seven books now in our New Testament were the right ones.[{17}](#) Rather, the canon gradually took shape as the church recognized and embraced those books that were inspired by God. The earliest collections of books "to circulate among the churches in the first half of the second century" were our four Gospels and the letters of Paul.[{18}](#) Not until the heretic Marcion published his expurgated version of the New Testament in about A.D. 144 did church leaders seek to define the canon more specifically.[{19}](#)

Toward the end of the second century there was a growing consensus that the canon should include the four Gospels, Acts, the thirteen Pauline epistles, "epistles by other 'apostolic men' and the Revelation of John."[{20}](#) The Muratorian Canon, which dates toward the end of the second

century, recognized every New Testament book except Hebrews, James, 1 and 2 Peter, and 3 John. Similar though not identical books were recognized by Irenaeus in the late second century and Origen in the early third century. So while the earliest listing of all the books in our New Testament comes from Athanasius in A.D. 367, there was widespread agreement on most of these books (including the four Gospels) by the end of the second century. By sharing this information “with gentleness and respect” (1 Pet. 3:15), we can help our friends see that the New Testament canon did not result from a decision by Constantine.

## Who Was Mary Magdalene? (Part 1)

Mary Magdalene, of course, is a major figure in *The Da Vinci Code*. Let’s take a look at Mary, beginning by addressing the unfortunate misconception that she was a prostitute. Where did this notion come from? And why do so many people believe it?

According to Leigh Teabing, the popular understanding of Mary Magdalene as a prostitute “is the legacy of a smear campaign . . . by the early Church.” In Teabing’s view, “The Church needed to defame Mary . . . to cover up her dangerous secret—her role as the Holy Grail” (244). Remember, in this novel the Holy Grail is not the cup used by Jesus at the Last Supper. Instead it’s Mary Magdalene, who’s alleged to have been both Jesus’ wife and the one who carried His royal bloodline in her womb.

How should we respond to this? Did the early church really seek to slander Mary as a prostitute in order to cover up her intimate relationship with Jesus? The first recorded instance of Mary Magdalene being misidentified as a prostitute occurred in a sermon by Pope Gregory the Great in A.D. 591.[{21}](#) Most likely, this wasn’t a deliberate attempt to slander Mary’s character. Rather, Gregory probably misinterpreted some passages in the Gospels, resulting in his incorrectly

identifying Mary as a prostitute.

For instance, he may have identified the unnamed sinful woman in Luke 7, who anointed Jesus' feet, with Mary of Bethany in John 12, who also anointed Jesus' feet shortly before His death. This would have been easy to do because, although there are differences, there are also many similarities between the two separate incidents. If Gregory thought the sinful woman of Luke 7 was the Mary of John 12, he may then have mistakenly linked this woman with Mary Magdalene. Interestingly, Luke mentions Mary Magdalene for the first time at the beginning of chapter 8, right after the story of Jesus' anointing in Luke 7. Since the unnamed woman in Luke 7 was likely guilty of some kind of sexual sin, if Gregory thought this woman was Mary Magdalene, then it wouldn't be too great a leap to infer she was a prostitute.

If you're discussing the novel with someone who is hostile toward the church, don't be afraid to admit that the church has sometimes made mistakes. We can agree that Gregory was mistaken when he misidentified Mary as a prostitute. But we must also observe that it's quite unlikely that this was part of a smear campaign by the early church. We must remind our friends that Christians make mistakes—and even sin—just like everyone else (Rom. 3:23). The difference is that we've recognized our need for a Savior from sin. And in this respect, we're actually following in the footsteps of Mary Magdalene (John 20:1-18)!

## **Who Was Mary Magdalene? (Part 2)**

What do our earliest written sources reveal about the real Mary Magdalene? According to Teabing, Mary was the wife of Jesus, the mother of His child, and the one whom He intended to establish the church after His death (244-48). In support of these theories, Teabing appeals to two of the Gnostic Gospels: The Gospel of Philip and The Gospel of Mary

[Magdalene]. Let's look first at The Gospel of Mary.

The section of this Gospel quoted in the novel presents an incredulous apostle Peter who simply can't believe that the risen Christ has secretly revealed information to Mary that He didn't reveal to His male disciples. Levi rebukes Peter: "If the Saviour made her worthy, who are you . . . to reject her? Surely the Saviour knows her very well. That is why he loved her more than us" (247).

What can we say about this passage? First, we must observe that nowhere in this Gospel are we told that Mary was Jesus' wife or the mother of His child. Second, many scholars think this text should probably be read symbolically, with Peter representing early Christian orthodoxy and Mary representing a form of Gnosticism. This Gospel is probably claiming that "Mary" (that is, the Gnostics) has received divine revelation, even if "Peter" (that is, the orthodox) can't believe it.[{22}](#) Finally, even if this text should be read literally, we have little reason to think it's historically reliable. It was likely composed sometime in the late second century, about a hundred years after the canonical Gospels.[{23}](#) So, contrary to what's implied in the novel, it certainly wasn't written by Mary Magdalene—or any of Jesus' other original followers.[{24}](#)

If we want reliable information about Mary, we must turn to our earliest sources—the New Testament Gospels. These sources tell us that Mary was a follower of Jesus from the town of Magdala. After Jesus cast seven demons out of her, she (along with other women) helped support His ministry (Luke 8:1-3). She witnessed Jesus' death, burial, and resurrection, and was the first to see the risen Christ (Matt. 27:55-61; John 20:11-18). Jesus even entrusted her with proclaiming His resurrection to His male disciples (John 20:17-18). In this sense, Mary was an "apostle" to the apostles.[{25}](#) This is all the Gospels tell us about Mary.[{26}](#) We can agree with our non-Christian friends that she was a very important woman. But we must also remind them that there's nothing to suggest that she

was Jesus' wife, or that He intended her to lead the church.

All this aside, someone who's read *The Da Vinci Code* might still have questions about The Gospel of Philip? Doesn't this text indicate that Mary and Jesus were married?

## Was Jesus Married? (Part 1)

Undoubtedly, the strongest textual evidence that Jesus was married comes from The Gospel of Philip. So it's not surprising that Leigh Teabing, should appeal to this text. The section of this Gospel quoted in the novel reads as follows:

*And the companion of the Saviour is Mary Magdalene. Christ loved her more than all the disciples and used to kiss her often on her mouth. The rest of the disciples were offended by it and expressed disapproval. They said to him, "Why do you love her more than all of us?" (246).*

Now, notice that the first line refers to Mary as the companion of the Savior. In the novel, Teabing clinches his argument that Jesus and Mary were married by stating, "As any Aramaic scholar will tell you, the word companion, in those days, literally meant spouse" (246). This sounds pretty convincing. Was Jesus married after all?

When discussing this issue with a non-Christian friend, point out that we must proceed carefully here. The Gospel of Philip was originally written in Greek.[{27}](#) Therefore, what the term "companion" meant in Aramaic is entirely irrelevant. Even in the Coptic translation found at Nag Hammadi, a Greek loan word (*koinonos*) lies behind the term translated "companion". Darrell Bock observes that this is "not the typical . . . term for 'wife'" in Greek.[{28}](#) Indeed, *koinonos* is most often used in the New Testament to refer to a "partner." Luke uses the

term to describe James and John as Peter's business partners (Luke 5:10). So contrary to the claim of Teabing, the statement that Mary was Jesus' companion does not at all prove that she was His wife.

But what about the following statement: "Christ loved her . . . and used to kiss her often on her mouth"?

First, this portion of the manuscript is damaged. We don't actually know where Christ kissed Mary. There's a hole in the manuscript at that place. Some believe that "she was kissed on her cheek or forehead since either term fits in the break."[{29}](#) Second, even if the text said that Christ kissed Mary on her mouth, it wouldn't necessarily mean that something sexual is in view. Most scholars agree that Gnostic texts contain a lot of symbolism. To read such texts literally, therefore, is to misread them. Finally, regardless of the author's intention, this Gospel wasn't written until the second half of the third century, over two hundred years after the time of Jesus.[{30}](#) So the reference to Jesus kissing Mary is almost certainly not historically reliable.

We must show our non-Christian friends that The Gospel of Philip offers insufficient evidence that Jesus was married. But what if they've bought into the novel's contention that it would have been odd for Jesus to be single?

## **Was Jesus Married? (Part 2)**

The two most educated characters in *The Da Vinci Code* claim that an unmarried Jesus is quite improbable. Leigh Teabing says, "Jesus as a married man makes infinitely more sense than our standard biblical view of Jesus as a bachelor" (245). Robert Langdon, Harvard professor of Religious Symbolology, concurs:

*Jesus was a Jew, and the social decorum during that time virtually forbid a Jewish man to be unmarried. According to*

*Jewish custom, celibacy was condemned. . . . If Jesus were not married, at least one of the Bible's Gospels would have mentioned it and offered some explanation for His unnatural state of bachelorhood (245).*

Is this true? What if our non-Christian friends want a response to such claims?

In his excellent book *Breaking The Da Vinci Code*, Darrell Bock persuasively argues that an unmarried Jesus is not at all improbable.[{31}](#) Of course, it's certainly true that most Jewish men of Jesus' day did marry. It's also true that marriage was often viewed as a fundamental human obligation, especially in light of God's command to "be fruitful and multiply, and fill the earth" (Gen. 1:28). Nevertheless, by the first century there were recognized, and even lauded, exceptions to this general rule.

The first century Jewish writer, Philo of Alexandria, described the Essenes as those who "repudiate marriage . . . for no one of the Essenes ever marries a wife."[{32}](#) Interestingly, the Essenes not only escaped condemnation for their celibacy, they were often admired. Philo also wrote, "This now is the enviable system of life of these Essenes, so that not only private individuals but even mighty kings, admiring the men, venerate their sect, and increase . . . the honors which they confer on them."[{33}](#) Such citations clearly reveal that not all Jews of Jesus' day considered marriage obligatory. And those who sought to avoid marriage for religious reasons were often admired rather than condemned.

It may be helpful to remind your friend that the Bible nowhere condemns singleness. Indeed, it praises those who choose to remain single to devote themselves to the work of the Lord (e.g. 1 Cor. 7:25-38). Point your friend to Matthew 19:12, where Jesus explains that some people "have renounced marriage

because of the kingdom of heaven” (NIV). Notice His conclusion, “The one who can accept this should accept it.” It’s virtually certain that Jesus had accepted this. He had renounced marriage to fully devote Himself to the work of His heavenly Father. What’s more, since there was precedent in the first century for Jewish men to remain single for religious reasons, Jesus’ singleness would not have been condemned. Let your friend know that, contrary to the claims of *The Da Vinci Code*, it would have been completely acceptable for Jesus to be unmarried.

## **Did Jesus’ Earliest Followers Proclaim His Deity?**

We’ve considered *The Da Vinci Code*’s claim that Jesus was married and found it wanting. Mark Roberts observed “that most proponents of the marriage of Jesus thesis have an agenda. They are trying to strip Jesus of his uniqueness, and especially his deity.”[\[34\]](#) This is certainly true of *The Da Vinci Code*. Not only does it call into question Jesus’ deity by alleging that He was married, it also maintains that His earliest followers never even believed He was divine! According to Teabing, the doctrine of Christ’s deity originally resulted from a vote at the Council of Nicaea. He further asserts, “until that moment in history, Jesus was viewed by His followers as a mortal prophet . . . a great and powerful man, but a man nonetheless” (233). Did Jesus’ earliest followers really believe that He was just a man? If our non-Christian friends have questions about this, let’s view it as a great opportunity to tell them who Jesus really is!

The Council of Nicaea met in A.D. 325. By then, Jesus’ followers had been proclaiming His deity for nearly three centuries. Our earliest written sources about the life of Jesus are found in the New Testament. These first century

documents repeatedly affirm the deity of Christ. For instance, in his letter to the Colossians, the apostle Paul declared, "For in Christ all the fullness of the Deity lives in bodily form" (2:9; see also Rom. 9:5; Phil. 2:5-11; Tit. 2:13). And John wrote, "In the beginning was the Word . . . and the Word was God . . . And the Word became flesh, and dwelt among us" (1:1, 14).

There are also affirmations of Jesus' deity in the writings of the pre-Nicene church fathers. In the early second century, Ignatius of Antioch wrote of "our God, Jesus the Christ." [\[35\]](#) Similar affirmations can be found throughout these writings. There's even non-Christian testimony from the second century that Christians believed in Christ's divinity. Pliny the Younger wrote to Emperor Trajan, around A.D. 112, that the early Christians "were in the habit of meeting on a certain fixed day . . . when they sang . . . a hymn to Christ, as to a god." [\[36\]](#)

If we humbly share this information with our non-Christian friends, we can help them see that Christians believed in Christ's deity long before the Council of Nicaea. We might even be able to explain why Christians were so convinced of His deity that they were willing to die rather than deny it. If so, we can invite our friends to believe in Jesus for themselves. "For God so loved the world that he gave his one and only Son, that whoever believes in him shall not perish but have eternal life" (John 3:16).

# Crime and Punishment – A Christian View of Dostoevsky's Classic Novel

*Michael Gleghorn looks at the famous novel through a Christian worldview lens to see what truths Dostoevsky may have for us. We learn that this great novel records the fall of man into a degraded state but ends with the beginning of his restoration through the ministry of a selfless, Christian woman.*

## Introduction and Overview

In 1866 the Russian novelist Fyodor Dostoevsky published *Crime and Punishment*, one of his greatest novels. It's a penetrating study of the psychology of sin, guilt, and redemption, and it haunts the reader long after the final page has been read. It tells the story of an intelligent, but impoverished, young Russian intellectual named Raskolnikov. Under the unfortunate influence of a particularly pernicious theory of society and human nature, he exalts himself above the moral law, grievously transgresses it by committing two murders, "and plunges into a hell of persecution, madness and terror."[\[1\]](#)

Raskolnikov had conceived of himself as a great and extraordinary man, on the order of a Napoleon. He tried to convince himself that he wasn't bound by the same tired old moral code that the vast mass of humanity lives in recognition of, if not obedience to—the merely *ordinary* men and women who accomplish little and amount to less. Nevertheless, after committing his horrible crime, he finds that he cannot escape his punishment: he cannot silence his sensitive and overburdened conscience. In the end, when he can stand it no

longer, he decides to confess his crime and accept suffering as a means of atonement.

Joseph Frank observes that Dostoevsky, the author of this story, had “long been preoccupied with the question of crime and conscience.”<sup>{2}</sup> In one of his letters, Dostoevsky describes his story as the “psychological report of a crime.”<sup>{3}</sup> The crime is committed, he says, by “a young man, expelled from the university . . . and living in the midst of the direst poverty.” Coming under the influence of “the strange, ‘unfinished’ ideas that float in the atmosphere,” he decides to murder an old pawnbroker and steal her money. Dostoevsky describes the old woman as “stupid and ailing,” “greedy” and “evil.” Why, it would hardly be a crime at all to murder such a wretched person! What’s more, with the money from his crime, the young man can “finish his studies, go abroad,” and devote the rest of his life to the benefit of humanity!

Inspired by these thoughts, the young man goes through with the crime and murders the old woman. But, notes Dostoevsky, “here is where the entire psychological process of the crime is unfolded. Insoluble problems confront the murderer, unsuspected and unexpected feelings torment his heart . . . and he finishes by *being forced* to denounce himself.”

This, in brief, is the story of *Crime and Punishment*. In what follows, we’ll take a closer look at the theory which led Raskolnikov to commit his crime. Then we’ll consider why the theory proved false when Raskolnikov actually attempted to put it into practice.

## **The Ordinary and Extraordinary**

Raskolnikov committed two murders, in part simply to see if he really has the bravado to put his theories into practice. But what are these ideas? Where do they come from? And why do they

lead Raskolnikov to such heinous actions?

Essentially, Raskolnikov's theory, which was partially developed in an article on crime that he had written, holds that all men, by a kind of law of nature, are divided into two distinct classes: the *ordinary* and the *extraordinary*. This theory, which finds some of its philosophical roots in the writings of men like Hegel and Nietzsche, claims that ordinary men exist merely for the purpose of reproduction by which, at length, the occasional, extraordinary man might arise. Raskolnikov declares, "The vast mass of mankind is mere material, and only exists in order by some great effort, by some mysterious process, by means of some crossing of races and stocks, to bring into the world at last perhaps one man out of a thousand with a spark of independence." The man of genius is rarer still, "and the great geniuses, the crown of humanity, appear on earth perhaps one in many thousand millions." {4}

The distinctive features of the ordinary man are a conservative temperament and a law-abiding disposition. But extraordinary men "all transgress the law." Indeed, says Raskolnikov, "if such a one is forced for the sake of his idea to step over a corpse or wade through blood, he can . . . find . . . in his own conscience, a sanction for wading through blood." {5} So the extraordinary man has the right—indeed, depending on the value of his ideas, he may even have the duty—to destroy those who stand in his way. After all, Raskolnikov observes, such ideas may benefit "the whole of humanity." {6} But how can we know if we are merely ordinary men, or whether, perhaps, we are extraordinary? How can we know if we have the *right* to transgress the law to achieve our own ends?

Raskolnikov admits that confusion regarding one's class is indeed possible. But he thinks "the mistake can only arise . . . among the ordinary people" who sometimes like to imagine themselves more advanced than they really are. And we needn't

worry much about that, for such people are “very conscientious” and will impose “public acts of penitence upon themselves with a beautiful and edifying effect.”{7}

But as we’ll see, it’s one of the ironies of this novel that Raskolnikov, who committed murder because he thought himself extraordinary, made precisely this tragic mistake.

## A Walking Contradiction

James Roberts observes that Raskolnikov “is best seen as two characters. He sometimes acts in one manner and then suddenly in a manner completely contradictory.”{8} Evidence for this can be seen throughout the novel. In this way, Dostoevsky makes clear, right from the beginning of his story, that Raskolnikov is *not* an extraordinary man, at least not in the sense in which Raskolnikov himself uses that term in his theory of human nature.

In the opening pages of the novel, we see Raskolnikov at war with himself as he debates his intention to murder an old pawnbroker. “I want to attempt a thing *like that*,” he says to himself.{9} Then, after visiting the old woman’s flat, ostensibly to pawn a watch, but in reality as a sort of “dress rehearsal” for the murder, he again questions himself: “How could such an atrocious thing come into my head? What filthy things my heart is capable of. Yes, filthy above all . . . loathsome!”{10}

This inner battle suggests that Raskolnikov has mistaken himself for an *extraordinary* man, a man bound neither by the rules of society, nor the higher moral law. But in fact, he’s actually just a conscientious *ordinary* man. The portrait Dostoevsky paints of him is really quite complex. He often appears to be a sensitive, though confused, young intellectual, who’s been led to entertain his wild ideas more as a result of dire poverty and self-imposed isolation from

his fellow man, rather than from sheer malice or selfish ambition.

In fear and trembling he commits two murders, partly out of a confused desire to thereby benefit the rest of humanity, and partly out of a seemingly genuine concern to really live in accordance with his theories. Ironically, while the murders are partly committed with the idea of taking the old pawnbroker's money to advance Raskolnikov's plans, he never attempts to use the money, but merely buries it under a stone. What's more, Raskolnikov is portrayed as one of the more generous characters in the novel. On more than one occasion, he literally gives away all the money he has to help meet the needs of others. Finally, while Raskolnikov is helped toward confessing his crime through the varied efforts of Porfiry Petrovich, the brilliant, yet compassionate, criminal investigator, and Sonia, the humble, selfless prostitute, nevertheless, it's primarily Raskolnikov's own tormented conscience that, at length, virtually forces him to confess to the murders.

So while Raskolnikov is guilty, he's not completely lost. He still retains a conscience, as well as some degree of genuine compassion toward others. Dostoevsky wants us to see that there's still hope for Raskolnikov!

## **The Hope of Restoration**

After Raskolnikov commits the two murders, he finds himself confronted with the desperate need to be reconciled with God and his fellow man. From the beginning of the story, Raskolnikov is portrayed as somewhat alienated from his fellows. But once he commits the murders, he experiences a decisive break, both spiritually and psychologically, from the rest of humanity. Indeed, when he murders the old pawnbroker and her sister, something within Raskolnikov also dies. The bond that unites him with all other men in a common humanity

is destroyed—or “dies”—as a sort of poetic justice for murdering the two women.

This death, which separates Raskolnikov both from God and his fellow man, can only be reversed through a miracle of divine grace and power. In the novel, the biblical paradigm for this great miracle is the story of the raising of Lazarus. Just as Lazarus died, and was then restored to life through the miraculous power of God in Christ, so also, in Dostoevsky’s story, Raskolnikov’s “death” is neither permanent nor irreversible. He too can be “restored to life.” He too can be reconciled with God and man.

While this theme of death and restoration to life is somewhat subtle, nevertheless, Dostoevsky probably intended it as one of the primary themes of the novel. In the first place, it is emphasized by Sonia, Porfiry Petrovich, and Raskolnikov’s own sister, that only by confessing his crime and accepting his punishment can Raskolnikov again be *restored* to the rest of humanity. In this way, Dostoevsky repeatedly emphasizes the “death” of Raskolnikov.

In addition, the raising of Lazarus is mentioned at least three times in the novel. One time is when, in the midst of a heated discussion, Porfiry specifically asks Raskolnikov if he believes in the raising of Lazarus, to which Raskolnikov responds that he does.[{11}](#) This affirmation foreshadows some hope for Raskolnikov, for the fact that he believes in this miracle at least makes possible the belief that God can also work a miracle in his own life. Secondly, the only extended portion of Scripture cited in the novel relates the story of Lazarus. In fact, it’s Raskolnikov himself, tormented by what he’s done, who asks Sonia to read him the story.[{12}](#) Finally, at the end of the novel, the raising of Lazarus is mentioned yet again, this time as Raskolnikov recollects Sonia’s previous reading of the story to him.[{13}](#) Interestingly, this final reference to the raising of Lazarus occurs in the context of Raskolnikov’s own “restoration to life.”

## Restored to Life

Near the end of the novel, Raskolnikov at last goes to the police station and confesses to the murders: “*It was I killed the old pawnbroker woman and her sister Lizaveta with an axe and robbed them.*”[{14}](#) He is sentenced to eight years in a Siberian labor prison. Sonia, true to her promise, selflessly follows him there. Early one morning she comes to visit Raskolnikov. Overcome with emotion, he begins weeping and throws himself at her feet. Sonia is terrified. “But at the same moment she understood . . . . She knew . . . that he loved her . . . and that at last the moment had come.”[{15}](#) God’s love, mediated through Sonia, had finally broken through to Raskolnikov: “He had risen again and he . . . felt in it all his being.”[{16}](#)

Although Raskolnikov had previously been something of an outcast with his fellow inmates, nevertheless, on the day of his “restoration,” his relations with them begin to improve. Dostoevsky writes:

*He . . . fancied that day that all the convicts who had been his enemies looked at him differently; he had even entered into talk with them and they answered him in a friendly way. He remembered that now, and thought it was bound to be so. Wasn't everything now bound to be changed?*[{17}](#)

What’s more, Dostoevsky also implies that Raskolnikov is being restored to relationship with God. Picking up the New Testament that Sonia had given him, “one thought passed through his mind: ‘Can her convictions not be mine now? Her feelings, her aspirations at least . . . .’”[{18}](#) And Dostoevsky then concludes his great novel by stating: “But that is the beginning of a new story—the story of the gradual renewal of a man, the story of his gradual regeneration, of his passing from one world into another, of his initiation into a new unknown life.”[{19}](#)

So by the end of the novel, Raskolnikov, as a type of Lazarus, has experienced his own “restoration to life.” He is ready to begin “his initiation into a new unknown life.” And interestingly, the grace which brings about Raskolnikov’s restoration is primarily mediated to him through the quiet, humble love of Sonia, a prostitute. Just as God was not ashamed to have his own Son, humanly speaking, descended from some who were murderers and some who were prostitutes—for it was just such people He came to save—so also, in Dostoevsky’s story, God is not ashamed to extend His forgiveness and grace to a prostitute, and through her to a murderer as well. *Crime and Punishment* thus ends on a note of hope, for the guilty can be forgiven and the dead restored to life!

# Globalization and the Wal-Mart Effect – How Wal-Mart Changes the Way Products are Sourced and Sold

*Kerby Anderson helps us understand the foundational principles and some the current factors which make Wal-Mart the dominant force in consumer sales in the world. Wal-Mart has fundamentally changed the way products are sourced and sold as shown in the examples presented in this article. Kerby does not take a position for or against those changes but encourages us to consume in ways that consider the impact of our consumption.*

## Introduction

In this article, we revisit the issue of global trade and the process of globalization. In [an earlier article](#) I asked, Is the world flat?<sup>{1}</sup> I talked about the various things that have made our world flat and used Wal-Mart as one of the examples.

I would like to further develop our discussion by using Wal-Mart as an example of what is happening in our world. Thomas

Friedman, in his book *The World is Flat*, says that if Wal-Mart were an individual economy, it would rank as China's eighth-biggest trading partner, ahead of Russia, Australia, and Canada. {2}

Often I will be referring to many of the facts and figures from Charles Fishman's book *The Wal-Mart Effect*. {3} For example, he points out that more than half of all Americans live within five miles of a Wal-Mart store. For most people, that's about a ten- to fifteen-minute drive. Ninety percent of Americans live within fifteen miles of a Wal-Mart. In fact, when you drive down the interstate, it is rare for you to go more than a few minutes without seeing a Wal-Mart truck.

Wal-Mart has over 3800 stores in the United States. That is more than one Wal-Mart store for every single county in the country. {4} And they don't exactly fade into the landscape. They sit on vast aprons of asphalt parking and stand out because of their sheer size.

Wal-Mart has also become the national commons. Every seven days more than one hundred million Americans shop at Wal-Mart (that's one third of the country). Each year, ninety-three percent of American households shop at least once at Wal-Mart.

Wal-Mart's sales in the United States are a bit more than \$2000 per household. And Wal-Mart's profit on that amount was just \$75.00. {5}

The size of this company is hard to grasp. Wal-Mart isn't just the largest retailer in the nation and the world. For most of this decade, it has been both the largest company in the world as well as the largest company in the history of the world.

In 2006, Wal-Mart will be bumped from the number-one spot on the Fortune 500 list of the largest companies by ExxonMobil, whose sales will surge past Wal-Mart's because the world price of oil rose so much in the last year.

But if you consider payrolls, there is no comparison. ExxonMobil employs about 90,000 people worldwide. Wal-Mart employs 1.6 million.[\[6\]](#) And there's another difference. ExxonMobil is growing by raising prices. Wal-Mart is growing despite lowering prices.

Put another way, Wal-Mart is as big as Home Depot, Kroger, Target, Costco, Sears, and Kmart combined. Target might be considered Wal-Mart's biggest rival and closest competitor, but it is small in comparison. Wal-Mart sells more by St. Patrick's Day (March 17) than Target sells all year.[\[7\]](#)

## **The Wal-Mart Effect**

Ask people to give you their opinion about Wal-Mart and you are likely to get lots of different responses. They may talk with enthusiasm about the "always low prices." Or they might talk about the impact Wal-Mart had on small businesses in their community when the first store arrived. They may even talk about the loss of American jobs overseas. Believe me, most will have an opinion about Wal-Mart.

Wal-Mart had its creation in the mind of Sam Walton who promoted a single idea: sell merchandise at the lowest price possible. It began with Wal-Mart working hard to keep the costs of their company as low as possible. This idea moved from their company to their suppliers as they asked them to be as frugal as possible. As the company grew in size, they began looking for every way to wring out the last penny of savings from materials, packaging, labor, transportation, and display. The result was "the Wal-Mart effect."

Consumers have embraced "the Wal-Mart effect." As a store moves into a community bringing lower prices, it drives down prices in other stores. And either they compete or close their doors. And it also reshapes the shopping habits of those in the community.

But with “the Wal-Mart effect” comes fears of “the Wal-Mart economy.” This is the nagging feeling that there are social and economic costs to be paid for “always low prices.” Critics talk about low wages, minimal benefits, and little chance for career advancement.

The company has found itself under attack from many quarters. There is a lawsuit on behalf of 1.6 million women who have worked at Wal-Mart that alleges systematic sex discrimination. Add to this the allegations that managers have required employees to work off the clock and even have locked employees in stores overnight.

There is also the constant complaint that Wal-Mart does not provide adequate health care benefits. Last year, for example, the Maryland legislature passed a bill that forces companies with more than 10,000 employees to spend at least eight percent of their payroll on health care or pay the state the difference. Since Wal-Mart is the only employer with over 10,000 employees in the state, it is easy to see that the legislation was only targeting Wal-Mart.

Wal-Mart recently settled a federal investigation of its use of illegal aliens to clean its stores. The company made a record-setting payment to the federal government.

Sam Walton’s goal from the beginning was an unrelenting focus on controlling costs in order to provide “always low prices.” He instilled in his employees core values like hard work, frugality, discipline, and loyalty.[\[8\]](#)

In his book *The Wal-Mart Effect*, Charles Fishman says these values have become inverted. He points out how the company has changed. When Sam Walton died in 1992, Wal-Mart was a \$44 billion-a-year company with 370,000 employees. The number of employees has now grown by 1.2 million, and sales have grown by \$240 billion. “Wal-Mart is not only not the company Sam Walton founded, it is no longer the company he left

behind.” {9}

## Out of the Box

You probably never thought about the packaging around deodorant, but Wal-Mart did. Until the early 1990s, nearly every brand of deodorant came in a paperboard box. Most consumers opened the box, pulled out the deodorant container, and tossed the box into the garbage. Some of us recycled them, but we were a very small minority.

In the early 1990s, Wal-Mart (along with a few other retailers) decided the paperboard box was a waste. The product came in a can or plastic container. These were at least as tough as the box. The box took up wasted space, and it wasted cardboard. Shipping the weight of the cardboard added weight to trucks and wasted fuel. And the box itself cost money to design and produce. It even cost money to put the deodorant into the box.

Wal-Mart began to apply pressure on the suppliers to eliminate the box. Deodorant manufacturers calculated that the box cost about a nickel for every consumer. Wal-Mart split the savings. Deodorant makers keep a few pennies, and Wal-Mart passed a couple of pennies savings on to the consumers.

Walk into Wal-Mart today and look at the deodorant aisle. You will probably find eight shelves of deodorant, sixty containers across. In this sea of nearly five hundred containers of deodorant, not one box.

Consider the impact of this one decision. First, there is the environmental impact. Whole forests were not cut down to provide a box that consumers did not use. A few recycled them, but the vast majority threw them away seconds after they removed their deodorant. Was Wal-Mart's pressure to unbox deodorant a good thing? It certainly was, if you are concerned about environmental issues. And Christians should be concerned

about our stewardship of the environment.

The economic impact was also considerable. A savings of one nickel might seem trivial until you multiply it by the two hundred million adults in the United States. If you just account for the container of deodorant in every American bathroom, you have a savings of \$10 million, of which consumers got to keep half. But don't forget that the savings is recurrent. Americans are saving \$5 million in nickels about five to six times a year.

But there is also a third impact. The impact this decision had on jobs. So far the decision looks like a win-win. But you might not feel so excited about the decision if you work in the forestry industry or are in the paperboard box business.

This story illustrates only so well the problem with providing a clear, unambiguous analysis of consumer behavior in American markets and, even more so, the ethics of corporations in a global market. And this story is probably easier to analyze if your first priority is the environment. But the ethics of other situations that arise from globalization aren't quite so easy to evaluate.

Wal-Mart illustrates the world in which corporate entities significantly influence our decisions and even transform an economy. While we might like the outcome of saving paperboard boxes, we certainly don't like other aspects of "the Wal-Mart effect." The company has grown so large and evolved in unexpected ways that it is difficult to predict what the future holds. And when we begin to ask moral questions, it isn't so easy to always determine whether the outcomes are good for us or the country.

## Salmon

Americans love to eat salmon. In fact, we eat more than 1.75 million pounds of salmon a day.[\[10\]](#) We eat it at home and when

we go out to a restaurant.

And Americans buy lots of cheap salmon from Wal-Mart. But they are probably unaware of the impact their purchase has on the environment. Most of the salmon served in the United States is Atlantic salmon (which is a species that is not only found wild but is also the species of choice for salmon farmers).

The salmon that you buy in Wal-Mart is “a factory product.” In other words, they are hatched from eggs, raised in freshwater hatcheries, and then grown to maturity in open-topped ocean cages in cold coastal waters.[{11}](#)

Wal-Mart sells more salmon than any other store in the country. Wal-Mart also buys all its salmon from Chile. In fact, they purchase about one-third of the annual harvest of salmon that Chile sells. Wal-Mart sells the salmon for \$4.84 a pound. It seems incredible that they can sell it for so little, but there are hidden costs.

Atlantic salmon are not native to Chile (its coastline runs along the Pacific). It’s an exotic species that is literally farmed and processed by thousands of Chileans. The labor conditions are certainly a concern (long hours, low pay, processing of salmon with razor-sharp filleting instruments).

Another concern is the environment. Salmon farming is already transforming the ecology of southern Chile “with tens of millions of salmon living in vast ocean corrals, their excess food and feces settling to the ocean floor beneath the pens, and dozens of salmon processing plants dumping untreated salmon entrails directly into the ocean.”[{12}](#)

When we buy salmon from Chile are we contributing to this environmental damage? Charles Fishman asks, “Does it matter that salmon for \$4.84 a pound leaves a layer of toxic sludge on the ocean bottoms of the Pacific fjords of southern Chile?”[{13}](#) After all, these salmon are raised in pens (with as many as one million per farm). They are fed antibiotics to

prevent disease. As a result, you have quite a mess. One million salmon produce about the same amount of waste as 65,000 people. And add to that additional waste from unconsumed food and antibiotic residue. In essence, the current method of salmon farming creates a toxic seabed.

So how do we change this? The answer is simple: by changing consumer behavior. If shoppers won't buy salmon until Wal-Mart insists on higher standards, Wal-Mart will insist on them. The same company that created this huge market for salmon can also change it. But this will only happen if consumers voice their concerns and back it up with their behavior.

## **Consumer Behavior**

As I said earlier, mention the name Wal-Mart and you are likely to get lots of varied reactions. While shoppers love the "always low prices," critics point to the impact that the company has had on the economy and the environment.

In fact, it is a bit misleading to think of Wal-Mart as merely a company. In reality it's a global market force. Without a doubt it is one of the most efficient entities at improving its supply chain not only in this country but around the world. Most of us just shop at the store and don't think of the implications of what we buy and where we buy it.

The size of Wal-Mart gives it the power to do many positive things. It recently announced fuel-savings plans for its stores and trucks. This could provide a model for the nation.

Wal-Mart also provided a model of how to deal with a disaster like Hurricane Katrina. Even though they had 171 facilities in the path of the storm, they were able to recover and reopen eighty-three percent of their facilities in the Gulf area within six days.[{14}](#)

One key to Wal-Mart's success was associates who were

dedicated to their communities. The local connection helped it deliver goods when the government failed. Wal-Mart sprang into action even before the hurricane hit. Whenever there is a possibility of a hurricane, its supply chain automatically adjusts and sends in plenty of non-perishable food and generators.

What is Wal-Mart's effect on the local economy? One famous study found that the arrival of a Wal-Mart store had a dramatic impact. "Grocery stores lost 5 percent of their business, specialty stores lost 14 percent of their business, and clothing stores lost 18 percent of their business—all while total sales were rising 6 percent, mostly due to Wal-Mart."[\[15\]](#)

Critics of Wal-Mart say that it forces small businesses into bankruptcy. But if you think about it, it is the consumers who put people out of business. We vote with our wallets. Shoppers are the ones who have made it possible for Wal-Mart's phenomenal growth. And we are the ones who need to pay attention to what we buy and where we buy it.

In this article, we have identified a few economic and environmental issues that result from "the Wal-Mart effect." Previously, we have produced articles discussing the Christian's responsibility towards [economics](#)[\[16\]](#) and [the environment](#).[\[17\]](#)

Our consumer behavior can have a positive impact on our world. As individuals, we have a minimal impact, but collectively we have an impact on our lives and our economy every day when we spend money. For too long, Christians have been willing to separate ethics from economics. Yet in earlier centuries theologians asked important questions about the relationship of morality to money.

It is time to return to that moral reflection, especially in this age of globalization. Christians should be alert

consumers in this global economy.

# **The Lion, the Witch and the Wardrobe: Reflections on Its Meaning**

*Michael Gleghorn provides an overview of C.S. Lewis's classic book for children of all ages that ought to be required reading for anyone who can read.*

## **A Very Brief Overview**

With the recent release of the movie *The Lion, the Witch and the Wardrobe*, the public fascination with all things "Narnian" has once again been raised. But what are we to make of this wonderful story? What deeper truths might it contain?

In order to answer these questions, we must begin with a very brief overview of the story. Four children—Peter, Susan, Edmund and Lucy—are evacuated from London to the house of an old professor during World War II. Once there, they soon discover a magic wardrobe that leads to another world! First Lucy, then Lucy and Edmund, and then all four of the children find their way into the enchanted land of Narnia. The country is ruled by the White Witch, who has placed it under a spell so that it's always winter but never Christmas.

Once in Narnia the children learn of Aslan, the great lion and true king of the country. After a long absence, he's now returned. He will deal with the Witch, they're told, and put everything right again. They also learn of an ancient prophecy, that when two Sons of Adam and two Daughters of Eve

sit enthroned at the castle of Cair Paravel, then the Witch's reign (as well as her life) will be over. It's believed that the time for this must be near, since Aslan and the four children are now in Narnia.

But Edmund threatens to ruin everything. Unbeknownst to the others, on a previous visit to Narnia he'd met the Witch, eaten her food, and come under her power. Although he really knows that the Witch is bad, he nonetheless betrays his siblings, hoping the Witch will one day make him king. Knowing about the prophecy, however, she eventually decides to kill Edmund. But before she can do so, he's rescued by forces loyal to Aslan!

Not to be outdone, the Witch then appears before Aslan, demanding the traitor's life. Aslan acknowledges the validity of the Witch's claim on a now repentant Edmund, but gets her to renounce it by offering to die in his place. The Witch agrees, and that night she slays Aslan on the Stone Table. She believes her rule in Narnia is now assured. But with the rising of the sun, Aslan rises from the dead! He leads his army to victory against the Witch and her forces. After personally dispatching the Witch, he installs the four children as kings and queens of Narnia, thus fulfilling the ancient prophecy.

This, in a nutshell, is the story. But did the author, C. S. Lewis, intend some deeper meaning? And if so, what is it?

## **The Search for a Deeper Meaning**

It seems that Lewis had at least three objectives in writing his famous *Chronicles*. First, he simply wanted to tell a good story. And almost everyone who's read the *Chronicles* will agree that he succeeded admirably here, for they're among the best-loved books of all time. Second, Lewis also aimed at using his stories to communicate moral truth, both by precept and example. In this regard, Paul Ford observes that Lewis is

something of a Christian Aesop. Like Aesop, he's more than *just* a storyteller; he's "also a moral educator."[{1}](#) As Gilbert Meilaender notes:

Lewis . . . believes that moral principles are learned indirectly from others around us, who serve as exemplars. . . . the *Chronicles of Narnia* . . . are not just good stories . . . they serve to enhance moral education, to build character. . . . To overlook the function of the *Chronicles of Narnia* in communicating images of proper emotional responses is to miss their connection to Lewis's moral thought.[{2}](#)

Finally, Lewis also purposed to communicate important truths of the Christian faith by translating them into the imaginary landscape of Narnia. But here we must be careful. Lewis insisted that the *Chronicles* should not be read as Christian allegories. Paul Ford observes that in an allegory there are "one-to-one correspondences between philosophical or religious concepts and the characters or events or objects in a story."[{3}](#) The *Chronicles*, said Lewis, are not allegories. They're rather what he called "supposals." He explained the difference in a letter, with special reference to the great lion Aslan:

[Aslan] is an invention giving an imaginary answer to the question, 'What might Christ become like, if there really were a world like Narnia and He chose to be incarnate and die and rise again in *that* world as He actually has done in ours?' This is not an allegory at all. . . . The incarnation of Christ in another world is mere supposal.[{4}](#)

So while the *Chronicles* should not be read as allegories, it's still quite true that they're informed throughout by Lewis's Christian faith and imagination. They are Christian "supposals"—and Aslan is *supposed* to be what Christ *might* look like if He became incarnate in a land like Narnia.

Having discussed Lewis's purposes in writing the *Chronicles*, and having seen that they do indeed contain a deeper meaning, we're now ready to look more closely at the most famous of these: *The Lion, the Witch and the Wardrobe*.

## **Temptation and Sin**

Two of the major themes developed by Lewis are temptation and sin. By carefully weaving these into his story, Lewis is able to address issues of importance both for basic morality and for the Christian faith.

When Edmund first stumbles into Narnia through the wardrobe, he finds himself alone in a snow-covered wood. Cold, and not much liking the look of the place, he almost decides to go home when he hears the sound of bells in the distance. Shortly thereafter a sleigh comes into view, and in it sits the White Witch.

The Witch stops the sleigh and questions Edmund. She knows of the ancient prophecy that, when two Sons of Adam and two Daughters of Eve sit enthroned at Cair Paravel, then her reign (and life) will be over. When she learns that Edmund is human, she raises her wand as if she intends to turn him into stone. But she changes her mind and with feigned friendliness invites Edmund to sit in her sleigh. She asks if he would like something to eat and Edmund requests Turkish Delight (which she magically produces).

As he devours the sweets, the Witch continues to question him. She learns that he has a brother and two sisters. Together, the siblings could fulfill the prophecy that would spell her doom! But the Turkish Delight is enchanted; whoever tastes it will want more and more. Knowing this, the Witch tempts Edmund. She says that if he will bring his siblings to her house, then she will give him more Turkish Delight—something Edmund desperately wants. She also says that she would like to make Edmund a prince. And later, when she's gone, he will even

be king! So the Witch tempts him by appealing to his desire for power and pleasure.

And it works! Before Edmund returns home, “he [is] already more than half on the side of the Witch.”<sup>{5}</sup> Later, when all four siblings get into Narnia together, Edmund slips away from the others and goes to betray them to the Witch. His desire for Turkish Delight and to be king leads him to yield to temptation—and sin. It reminds one of what James says in the New Testament: “But each one is tempted when, by his own evil desire, he is dragged away and enticed. Then, after desire has conceived, it gives birth to sin; and sin, when it is full-grown, gives birth to death” (1:14-15).

Though we might not like to admit it, there’s something of Edmund in all of us. Like Edmund, we’ve all sinned (Rom. 3:23). And unless Someone intervenes who can change both us and our circumstances, then like Edmund we’re also doomed to die (Rom. 6:23; Rev. 20:14-15).

## **Sacrifice and Redemption**

Lewis claimed that the idea for his story, *The Lion, the Witch and the Wardrobe*, “all began with a picture of a Faun carrying an umbrella and parcels in a snowy wood.” “At first,” he wrote, “I had very little idea how the story would go. But then suddenly Aslan came bounding into it. . . . [and] He pulled the whole story together.”<sup>{6}</sup> It’s a good thing He did. For without Aslan the traitorous Edmund would have met a very different fate than that which actually befell him.

You see, Aslan’s Father, the great Emperor-Beyond-the-Sea, put some Deep Magic into Narnia at its beginning. The Witch, who accuses Edmund before Aslan, is quite knowledgeable about this Deep Magic. “Every traitor,” she insists, “belongs to me as my lawful prey. . . . Unless I have blood as the Law says all Narnia will . . . perish in fire and water.”<sup>{7}</sup> Aslan agrees that her claim is valid.

Although it looks like Edmund is as good as dead, Aslan, in a private conversation with the Witch, gets her to renounce her claim on Edmund's blood. It's only later that we learn why. The great lion made the Witch an offer she couldn't refuse. He offered to die in Edmund's place. True to His word, He arrives that night at the Stone Table and there He is slain by the Witch.

But that's not the end of the story. Early the next morning, as the sun peers over the horizon, the Stone Table cracks in two and Aslan is raised from the dead. He's conquered death through an even Deeper Magic, unknown to the Witch. As Aslan explains, "Her knowledge goes back only to the dawn of Time. But if she could have looked . . . into . . . the darkness before Time dawned . . . She would have known that when a willing victim who had committed no treachery was killed in a traitor's stead, the Table would crack and Death itself would start working backwards." [\[8\]](#)

It's a beautiful picture of substitutionary atonement. Aslan willingly lays down His life for the traitorous Edmund, thereby redeeming him from the just demands of the Law. It reminds one of what Christ did for us. Paul told the Galatians, "Christ redeemed us from the curse of the law by becoming a curse for us, for it is written: 'Cursed is everyone who is hung on a tree'" (Gal. 3:13). Just as Aslan gave up His life for Edmund, so Christ gave up His life for each of us, dying as a substitute in our place so that we might forever share in the life of God!

## **Reflections on the Movie**

As many fans of Lewis's classic story *The Lion, the Witch and the Wardrobe* have already observed, the movie is really quite good and well worth seeing. It is a generally faithful rendition of Lewis's beautiful and imaginative original. Indeed the film is really at its best when it adheres most closely to the book. It was reported that at one time another

group of filmmakers was planning to produce a very different version of the story. Supposedly their plan was to set Lewis's wonderful children's classic "in present-day Brentwood. Instead of a White Witch wooing young Edmund with Turkish Delight, a cool Californian would win him with cheeseburgers." [{9}](#) If this is really true, we can all rejoice that such an absurd retelling of Lewis's famous story never saw the light of day. All those involved with bringing *The Lion, the Witch and the Wardrobe* to the big screen are to be commended for adhering so closely to Lewis's original vision.

But of course no movie is perfect, and *The Lion* is no exception. Possibly two of the biggest disappointments for fans of the book are the diminished role given to some of Lewis's most important dialogue and the diminished importance of the great lion himself. For example, compared to his counterpart in the book, wise old professor Kirke has precious little to say in the movie.

Even more troubling, the extended conversation which the four children have with Mr. and Mrs. Beaver about Aslan lacks many of the Beavers' most important declarations. Unlike the book, the movie never refers to Aslan as "the son of the great Emperor-Beyond-the-Sea." And Mr. Beaver is also denied his famous response to Lucy's question about whether Aslan is actually safe. "Safe?" he asks, "Who said anything about safe? 'Course he isn't safe. But he's good. He's the King, I tell you." [{10}](#) Not only was such important dialogue cut, but as Jeffrey Overstreet noted, Aslan's appearances are "painfully brief." He doesn't "have the time onscreen to earn our affection and awe the way we might have hoped." [{11}](#)

In spite of such shortcomings, however, the movie still possesses much of the book's magic. What's more, it retains the crucially important themes of temptation and sin, sacrifice and redemption. Aslan still dies as a substitute for the traitorous Edmund, thereby redeeming him from the just demands of the Law. Finally, as Overstreet observed, "Those

who respond to the movie's roar by running to Lewis's book will find Deeper Magic in its pages. Meeting them there, Lewis himself will lead them 'further up, further in'." [\[12\]](#) If the movie leads a new generation of readers to tackle this classic story, then it will indeed have served as a fitting tribute to its author.

# Christianity: The Best Thing That Ever Happened to Women

*Sue Bohlin examines the facts to show us that a Christian, biblical worldview of women lifted them from a status equivalent to dogs to a position a fellow heirs of the grace of God through Jesus Christ. Christianity, accurately applied, fundamentally changed the value and status of women.*

## The Low Status of Women in Jesus' Day

Some feminists charge that Christianity, the Bible, and the Church are anti-female and horribly oppressive to women. Does God really hate women? Did the apostle Paul disrespect them in his New Testament writings? In this article we'll be looking at why Christianity is the best thing that ever happened to women, with insights from Alvin Schmidt's book *How Christianity Changed the World*.[{1}](#)

"What would be the status of women in the Western world today had Jesus Christ never entered the human arena? One way to answer this question," writes Dr. Schmidt, "is to look at the status of women in most present-day Islamic countries. Here women are still denied many rights that are available to men, and when they appear in public, they must be veiled. In Saudi Arabia, for instance, women are even barred from driving an automobile. Whether in Saudi Arabia or in many other Arab countries where the Islamic religion is adhered to strongly, a man has the right to beat and sexually desert his wife, all with the full support of the Koran. . . .[{2}](#) This command is the polar opposite of what the New Testament says regarding a man's relationship with his wife. Paul told the Christians in Ephesus, 'Husbands, love your wives, just as Christ loved the church and gave himself up for her.' And he added, 'He who loves his wife loves himself.'[{3}](#)

Jesus loved women and treated them with great respect and dignity. The New Testament's teaching on women developed His perspective even more. The value of women that permeates the New Testament isn't found in the Greco-Roman culture or the cultures of other societies.

In ancient Greece, a respectable woman was not allowed to leave the house unless she was accompanied by a trustworthy male escort. A wife was not permitted to eat or interact with male guests in her husband's home; she had to retire to her woman's quarters. Men kept their wives under lock and key, and women had the social status of a slave. Girls were not allowed to go to school, and when they grew up they were not allowed to speak in public. Women were considered inferior to men. The Greek poets equated women with evil. Remember Pandora and her box? Woman was responsible for unleashing evil on the world. [{4}](#)

The status of Roman women was also very low. Roman law placed a wife under the absolute control of her husband, who had ownership of her and all her possessions. He could divorce her if she went out in public without a veil. A husband had the power of life and death over his wife, just as he did his children. As with the Greeks, women were not allowed to speak in public. [{5}](#)

Jewish women, as well, were barred from public speaking. The oral law prohibited women from reading the Torah out loud. Synagogue worship was segregated, with women never allowed to be heard.

## **Jesus and Women**

Jesus' treatment of women was very different:

*The extremely low status that the Greek, Roman, and Jewish woman had for centuries was radically affected by the appearance of Jesus Christ. His actions and teachings raised*

*the status of women to new heights, often to the consternation and dismay of his friends and enemies. By word and deed, he went against the ancient, taken-for-granted beliefs and practices that defined woman as socially, intellectually, and spiritually inferior.*

*The humane and respectful way Jesus treated and responded to the Samaritan woman [at the well] (recorded in John 4) may not appear unusual to readers in today's Western culture. Yet what he did was extremely unusual, even radical. He ignored the Jewish anti-Samaritan prejudices along with prevailing view that saw women as inferior beings.* [{6}](#)

He started a conversation with her—a Samaritan, a woman—in public. The rabbinic oral law was quite explicit: “He who talks with a woman [in public] brings evil upon himself.” Another rabbinic teaching prominent in Jesus’ day taught, “One is not so much as to greet a woman.” [{7}](#) So we can understand why his disciples were amazed to find him talking to a woman in public. Can we even imagine how it must have stunned this woman for the Messiah to reach out to her and offer her living water for her thirsty soul?

Among Jesus’ closest friends were Mary, Martha and Lazarus, who entertained him at their home. “Martha assumed the traditional female role of preparing a meal for Jesus, her guest, while her sister Mary did what only men would do, namely, learn from Jesus’ teachings. Mary was the cultural deviant, but so was Jesus, because he violated the rabbinic law of his day [about speaking to women].” [{8}](#) By teaching Mary spiritual truths, he violated another rabbinic law, which said, “Let the words of the Law [Torah] be burned rather than taught to women. . . . If a man teaches his daughter the law, it is as though he taught her lechery.” [{9}](#)

When Lazarus died, Jesus comforted Martha with this promise containing the heart of the Christian gospel: “I am the

resurrection and the life. He who believes in me will live, even though he dies; and whoever lives and believes in me will never die. Do you believe this?" (John 11:25-26) These remarkable words were spoken to a woman! "To teach a woman was bad enough, but Jesus did more than that. He called for a verbal response from Martha. Once more, he went against the socioreligious custom by teaching a woman and by having her publicly respond to him, a man." {10}

"All three of the Synoptic Gospels note that women followed Jesus, a highly unusual phenomenon in first-century Palestine. . . . This behavior may not seem unusual today, but in Jesus' day it was highly unusual. Scholars note that in the prevailing culture only prostitutes and women of very low repute would follow a man without a male escort." {11} These women were not groupies; some of them provided financial support for Jesus and the apostles (Luke 8:3).

The first people Jesus chose to appear to after his resurrection were women; not only that, but he instructed them to tell his disciples that he was alive (Matt. 28, John 20). In a culture where a woman's testimony was worthless because she was worthless, Jesus elevated the value of women beyond anything the world had seen.

## **Paul, Peter, and Women**

Jesus gave women status and respect equal to men. Not only did he break with the anti-female culture of his era, but he set a standard for Christ-followers. Peter and Paul both rose to the challenge in what they wrote in the New Testament.

In a culture that feared the power of a woman's external beauty and feminine influence, Peter encouraged women to see themselves as valuable because God saw them as valuable. His call to aspire to the inner beauty of a trusting and tranquil spirit is staggeringly counter-cultural. He writes, "Your beauty should not come from outward adornment, such as braided

hair and the wearing of gold jewelry and fine clothes. Instead, it should be that of your inner self, the unfading beauty of a gentle and quiet spirit, which is of great worth in God's sight. For this is the way the holy women of the past who put their hope in God used to make themselves beautiful."

Equally staggering is his call to men to elevate their wives with respect and understanding: "Husbands, in the same way be considerate as you live with your wives, and treat them with respect as the weaker partner and as heirs with you of the gracious gift of life, so that nothing will hinder your prayers." Consideration, respect, fellow heirs; these concepts sound good to us, but they were unheard of in the first century!

The apostle Paul is often accused of being a misogynist, one who hates and fears women. But Paul's teachings on women reflect the creation order and high value God places on women as creatures made in his image. Paul's commands for husbands and wives in Ephesians 5 provided a completely new way to look at marriage: as an earthbound illustration of the spiritual mystery of the union of Christ and His bride, the church. He calls wives to not only submit to their husbands as to the Lord, but he calls husbands to submit to Christ (1 Cor. 11:3). He calls men to love their wives in the self-sacrificing way Christ loves the church. In a culture where a wife was property, and a disrespected piece of property at that, Paul elevates women to a position of honor previously unknown in the world.

Paul also provided highly countercultural direction for the New Testament church. In the Jewish synagogue, women had no place and no voice in worship. In the pagan temples, the place of women was to serve as prostitutes. The church, on the other hand, was a place for women to pray and prophecy out loud (1 Cor. 11:5). The spiritual gifts—supernatural enablings to build God's church—are given to women as well as men. Older women are commanded to teach younger ones. The invitation to

women to participate in worship of Jesus was unthinkable—but true.

## Misogyny in the Church

Author Dorothy Sayers, a friend of C.S. Lewis, wrote:

*Perhaps it is no wonder that the women were first at the Cradle and last at the Cross. They had never known a man like this Man—there had never been such another. A prophet and teacher who never nagged at them, who never flattered or coaxed or patronized; who never made arch jokes about them, never treated them either as ‘The women, God help us!’ or ‘The ladies, God bless them!’; who rebuked without querulousness and praised without condescension; who took their questions and arguments seriously, who never mapped out their sphere for them, never urged them to be feminine or jeered at them for being female; who had no ax to grind and no uneasy male dignity to defend; who took them as he found them and was completely unselfconscious.*

She continues: “There is no act, no sermon, no parable in the whole Gospel that borrows its pungency from female perversity; nobody could possibly guess from the words of Jesus that there was anything ‘funny’ about woman’s nature.”[\[12\]](#) And this is one of the unfortunate truths about Christianity we have to acknowledge: over the centuries, many Christ-followers have fallen far short of the standard Jesus set in showing the worth and dignity of women.

In the second century Clement of Alexandria believed and taught that every woman should blush because she is a woman. Tertullian, who lived about the same time, said, “You [Eve] are the devil’s gateway. . . . You destroyed so easily God’s image, man. On account of your desert, that is death, even the Son of God had to die.” Augustine, in the fourth century, believed that a woman’s image of God was inferior to that of

the man's. [{13}](#) And unfortunately it gets even nastier than that.

Some people mistakenly believe these contemptuous beliefs of the church fathers are rooted in an anti-female Bible, but that couldn't be farther from the truth. People held these misogynistic beliefs *in spite of*, not because of, the biblical teachings. Those who dishonor God by dishonoring His good creation of woman allow themselves to be shaped by the beliefs of the surrounding pagan, anti-female culture instead of following Paul's exhortation to not be conformed to this world, but be transformed by the renewing of our minds (Rom. 12:2). The church in North America does the same thing today by allowing the secular culture to shape our thinking more than the Bible. Only nine percent of Americans claiming to be born-again have a biblical worldview. [{14}](#) The church in Africa and Asia does the same thing today by allowing animism, the traditional folk religion, to shape their thinking more than the Bible.

It's unfortunate that some of the church fathers did not allow the woman-honoring principles found in Scripture to change their unbiblical beliefs. But that is the failing of imperfect followers of Jesus, not a failure of God nor of His Word. Jesus loves women.

## **Effects of Christianity on Culture**

As Christianity spread throughout the world, its redemptive effects elevated women and set them free in many ways. The Christian ethic declared equal worth and value for both men and women. Husbands were commanded to love their wives and not exasperate their children. These principles were in direct conflict with the Roman institution of *patria potestas*, which gave absolute power of life and death over a man's family, including his wife. When *patria potestas* was finally repealed by an emperor who was moved by high biblical standards, what a tremendous effect that had on the culture! Women were also

granted basically the same control over their property as men, and, for the first time, mothers were allowed to be guardians of their children.[{15}](#)

The biblical view of husbands and wives as equal partners caused a sea change in marriage as well. Christian women started marrying later, and they married men of their own choosing. This eroded the ancient practice of men marrying child brides against their will, often as young as eleven or twelve years old. The greater marital freedom that Christianity gave women eventually gained wide appeal. Today, a Western woman is not compelled to marry someone she does not want, nor can she legally be married as a child bride. But the practice continues in parts of the world where Christianity has little or no presence.[{16}](#)

Another effect of the salt and light of Christianity was its impact on the common practice of polygamy, which demeans women. Many men, including biblical heroes, have had multiple wives, but Jesus made clear this was never God's intention. Whenever he spoke about marriage, it was always in the context of monogamy. He said, "The two [not three or four] will become one flesh." As Christianity spread, God's intention of monogamous marriages became the norm.[{17}](#)

Two more cruel practices were abolished as Christianity gained influence. In some cultures, such as India, widows were burned alive on their husbands' funeral pyres. In China, the crippling practice of foot binding was intended to make women totter on their pointed, slender feet in a seductive manner. It was finally outlawed only about a hundred years ago.[{18}](#)

As a result of Jesus Christ and His teachings, women in much of the world today, especially in the West, enjoy more privileges and rights than at any other time in history. It takes only a cursory trip to an Arab nation or to a Third World country to see how little freedom women have in countries where Christianity has had little or no

presence.<sup>{19}</sup> It's the best thing that ever happened to women.

# **Is the World Flat? How Should Christians Respond in Today's Global World**

*Drawing from Thomas Friedman's book, *The World is Flat*, Kerby Anderson looks at some of the major new factors in our world which cause not only countries and companies, but also individuals to think and act globally. Most of the factors discussed are givens against which Kerby helps us to consider their impact on Christianity and the spread of the gospel on a global basis.*

## **Introduction**

Is the world flat? The question is not as crazy as it might sound in light of the book by Thomas Friedman entitled *The World is Flat: A Brief History of the Twenty-First Century*. His contention is that the global playing field has been leveled or flattened by new technologies.

In fourteen hundred and ninety-two when Columbus sailed the ocean blue, he used rudimentary navigational equipment to

prove that the earth was *round*. More than 500 years later, Friedman discovered in a conversation with one of the smartest engineers in India that essentially the world was *flat*. Friedman argues that we have entered into a third era of globalization, which he calls Globalization 3.0 that has flattened the world.

The first era of globalization (he calls Globalization 1.0) lasted from when Columbus set sail until around 1800. "It shrank the world from a size large to a size medium. Globalization 1.0 was about countries and muscles."[{1}](#) The key change agent in this era was how much muscle your country had (horsepower, wind power, etc.). Driven by such factors as imperialism and even religion, countries broke down walls and began the process of global integration.

The second era (he calls Globalization 2.0) lasted from 1800 to 2000 with interruptions during the Great Depression and World Wars I and II. "This era shrank the world from size medium to a size small. In Globalization 2.0, the key agent of change, the dynamic force driving global integration, was multinational companies."[{2}](#) At first these were Dutch and English joint-stock companies, and later was the growth of a global economy due to computers, satellites, and even the Internet.

The dynamic force in Globalization 1.0 was *countries* globalizing, while the dynamic force in Globalization 2.0 was *companies* globalizing. Friedman contends that Globalization 3.0 will be different because it provides "the newfound power for *individuals* to collaborate and compete globally."[{3}](#)

The players in this new world of commerce will also be different. "Globalization 1.0 and 2.0 were driven primarily by European and American individuals and businesses. . . . Because it is flattening and shrinking the world, Globalization 3.0 is going to be more and more driven not only by individuals but also by a much more diverse—non-Western,

non-white—group of individuals. Individuals from every corner of the flat world are being empowered.”{4}

## The Flatteners

Friedman argues in his book that the global playing field has been flattened by new technologies.

The first flattener occurred on November 9, 1989. “The fall of the Berlin Wall on 11/9/89 unleashed forces that ultimately liberated all the captive peoples of the Soviet Empire. But it actually did so much more. It tipped the balance of power across the world toward those advocating democratic, consensual, free-market-oriented governance, and away from those advocating authoritarian rule with centrally planned economies.”{5}

The economic change was even more important. The fall of the Berlin Wall encouraged the free movement of ideas, goods, and services. “When an economic or technological standard emerged and proved itself on the world stage, it was much more quickly adopted after the wall was out of the way.”{6}

Thomas Friedman also makes a connection between the two dates 11/9 and 9/11. He noted that in “a world away, in Muslim lands, many thought [Osama] bin Laden and his comrades brought down the Soviet Empire and the wall with religious zeal, and millions of them were inspired to upload the past. In short, while we were celebrating 11/9, the seeds of another memorable date—9/11—were being sown.”{7}

A second flattener was Netscape. This new software played a huge role in flattening the world by making the Internet truly interoperable. Until then, there were disconnected islands of information.

We used to go to the post office to send mail; now most of us send digitized mail over the Internet known as *e-mail*. We used

to go to bookstores to browse and buy books, now we browse digitally. We used to buy a CD to listen to music, now many of us obtain our digitized music off the Internet and download it to a MP3 player.

A third flattener was work flow software. As the Internet developed, people wanted to do more than browse books and send e-mail. "They wanted to shape things, design things, create things, sell things, buy things, keep track of inventories, do somebody else's taxes, and read somebody else's X-rays from half a world away. And they wanted to be able to do any of these things from anywhere to anywhere and from any computer to any computer—seamlessly."[\[8\]](#)

All the computers needed to be interoperable not only between departments within a company but between the systems of any other company. Work flow software made this possible.

Where will this lead? Consider this likely scenario. When you want to make a dentist appointment, your computer translates your voice into a digital instruction. Then it will check your calendar against the available dates on the dentist's calendar. It will offer you three choices, and you will click on the preferred date and hour. Then a week before your appointment, the dentist's calendar will send you an e-mail reminding you of the appointment. The night before your appointment, a computer-generated voice message will remind you.

The fourth flattener is open-sourcing. Open-source comes from the idea that groups would make available online the source code for software and then let anyone who has something to contribute improve it and let millions of others download it for free.

One example of open-source software is Apache which currently powers about two-thirds of the websites in the world. Another example of open-sourcing is blogging. Bloggers are often one-

person online commentators linked to others by their common commitments. They have created essentially an open-source newsroom.

News bloggers were responsible for exposing the bogus documents use by CBS and Dan Rather in a report about President Bush's Air National Guard service. Howard Kurtz of *The Washington Post* wrote (Sept 20, 2004): "It was like throwing a match on kerosene-soaked wood. The ensuing blaze ripped through the media establishment as previously obscure bloggers managed to put the network of Murrow and Cronkite on the defensive."

Another example of open-sourcing is the Wikipedia project which has become perhaps the most popular online encyclopedia in the world. Linux is another example. It offers a family of operating systems that can be adapted to small desktop computers or laptops all the way up to large supercomputers.

A fifth flattener is outsourcing. In many ways, this was made possible when American companies laid fiber-optic cable to India. Ultimately, India became the beneficiary.

India has become very good at producing brain power, especially in the sciences, engineering, and medicine. There are a limited number of Indian Institutes within a population of one billion people. The resulting competition produces a phenomenal knowledge meritocracy. Until India was connected, many of the graduates would come to America. "It was as if someone installed a brain drain that filled up in New Delhi and emptied in Palo Alto." [\[9\]](#)

Fiber-optic cable became the ocean crosser. You no longer need to leave India to be a professional because you can plug into the world from India.

A sixth flattener was offshoring. Offshoring is when a company takes one of its factories that is operating in Canton, Ohio and moves the whole factory to Canton, China.

When China joined the World Trade Organization, it took Beijing and the rest of the world to a new level of offshoring. Companies began to shift production offshore and integrate their products and services into their global supply chains.

The more attractive China makes itself offshoring, the more attractive other developed and developing countries have to make themselves. This created a process of competitive flattening and a scramble to give companies the best tax breaks and subsidies.

How does this affect the United States? "According to the U.S. Department of Commerce, nearly 90 percent of the output from U.S.-owned offshore factories is sold to foreign consumers. But this actually stimulates American exports. There is a variety of studies indicating that every dollar a company invests overseas in an offshore factory yields additional exports for its home country, because roughly one-third of global trade today is within multi-national companies."[\[10\]](#)

The seventh flattener is supply chaining. "No company has been more efficient at improving its supply chain (and thereby flattening the world) than Wal-Mart; and no company epitomizes the tension the supply chains evoke between the consumer in us and the worker in us than Wal-Mart."[\[11\]](#)

Thomas Friedman calls Wal-Mart "the China of companies" because it can use its leverage to grind down any supplier to the last halfpenny. And speaking of China, if Wal-Mart were an individual economy, it would rank as China's eighth-biggest trading partner, ahead of Russia, Australia and Canada.

An eighth flattener is what Friedman calls *insourcing*. A good example of this is UPS. UPS is not just delivering packages, the company is doing logistics. Their slogan is Your World Synchronized. The company is synchronizing global supply chains.

For example, if you own a Toshiba laptop computer under warranty that you need fixed, you call Toshiba. What you probably don't know is that UPS will pick up your laptop and repair it at their own UPS-run workshop dedicated to computer and printer repair. They fix it and return it in much less time than it would take to send it all the way to Toshiba.

A ninth flattener is in-forming. A good example of that is Google. Google has been the ultimate equalizer. Whether you are a university professor with a high speed Internet connection or a poor kid in Asia with access to an Internet café, you have the same basic access to research information.

Google puts an enormous amount of information at our fingertips. Essentially, all of the information on the Internet is available to anyone, anywhere, at anytime.

Friedman says that, "In-forming is the ability to build and deploy your own personal supply chain—a supply chain of information, knowledge, and entertainment. In-forming is about self-collaboration—becoming your own self-directed and self-empowered researcher, editor, and selector of entertainment, without having to go to the library or movie theater or through network television."[\[12\]](#)

A tenth flattener is what he calls "the steroids." These are all the things that speed the process (computer speed, wireless).

For example, the increased speed of computers is dazzling. The Intel 4004 microprocessor (in 1971) produced 60,000 instructions per second. Today's Intel Pentium 4 Extreme has a maximum of 10.8 billion instructions per second.

The wireless revolution allows anyone portable access to everything that has been digitized anywhere in the world. When I was at graduate school at Yale University, all of us were tied to a single mainframe computer. In order to use the computer, I had to hand computer cards to someone in the

computer lab in order to input data or extract information. Now thanks to digitization, miniaturization, and wireless I can do all of that and much more from my home, office, coffee shop, airport—you name it.

## **Biblical Perspective**

Although futurists have long talked about globalization and a global village, many of these forces have made that a reality. At this point it might be valuable to distinguish between *globalization* and *globalism*. Although these terms are sometimes used interchangeably, I want to draw some important distinctions. Globalization is used to describe the changes taking place in society and the world due to economic and technological forces. Essentially, we have a global economy and live in the global village.

Globalism is the attempt to draw us together into a new world order with a one world government and one world economy. Sometimes this even involves a desire to develop a one world religion. In a previous article ([“Globalism and Foreign Policy”](#)), I addressed many of the legitimate concerns about this push towards global government. We should be concerned about political attempts to form a new world order.

On the other hand, we should also recognize that globalization is already taking place. *The World is Flat* focuses on many of the positive aspects of this phenomenon, even though there are many critics would believe it may be harmful.

Some believe that it will benefit the rich at the expense of the poor. Some believe it will diminish the role of nations in deference to world government. These are important issues that we will attempt to address in future articles.

For now, let's look at some important implications of a flat world. First, we should prepare our children and grandchild for global competition. Thomas Friedman says that when he was

growing up his parents would tell him “Finish your dinner. People in China and India are starving.” Today he tells his daughters, “Girls, finish your homework—people in China and India are starving for your jobs.”[\[13\]](#)

Another implication is the growing influence of the two countries with the largest populations: China and India. Major companies are looking to these countries for research and development. The twentieth century was called “the American Century.” It is likely that the twenty-first century will be “the Asian Century.”

These two countries represent one-third of the world’s population. They will no doubt transform the entire global economy and political landscape.

Students of biblical prophecy wonder if these two countries represent the “Kings of the East” (Rev. 16:12). In the past, most of the focus was only on China. Perhaps the Kings (plural) represent both China and India.

A final implication is that this flattened world has opened up ministry through the Internet and subsequent travel to these countries. Probe Ministries, for example, now has a global ministry. In the past, it was the occasional letter we received from a foreign country. We now interact daily with people from countries around the world.

Last month the Probe website had nearly a quarter of a million visitors from over 140 countries. These online contacts open up additional opportunities for speaking and ministry overseas.

The flattening of the world may have its downsides, but it has also opened up ministry in ways that were unimaginable just a few years ago. Welcome to the flat world.

# **Video Games – Evaluating Them From a Christian Perspective**

## **Grand Theft Auto**

The best-selling video game in America last year was “Grand Theft Auto: San Andreas.” The recent controversy over this popular video game is just another reminder of the deception of ratings and the need for parental direction and discernment when it comes to buying video games.

The game in question already has a bad reputation. The National Institute on Media and the Family described it this way: “Raunchy, violent and portraying just about every deviant

act that a criminal could think of in full, living 3D graphics. Grand Theft Auto takes the cake again as one of the year's worst games for kids. The premise—restore respect to your neighborhood as you take on equally corrupt San Andreas police.”[\[1\]](#)

Ironically what caused the controversy over the game was not its overt violence and sexuality. What caused a national stir was what was hidden within the game. Those playing the game (known as gamers) could download a modification of “Grand Theft Auto” that would allow them to see graphic sex scenes on screen.

Initially the distributor distanced itself from what hackers could do with their product once it was on the market. But that argument fell flat when it was found that the downloaded modification merely unlocked pornographic material already within the game. It now turns out that skilled players can unlock the pornographic content without downloading the key from the Internet. The game initially had a “Mature” rating. The Entertainment Software Ratings Board now requires that it be labeled “Adults Only.”

“Grand Theft Auto” has already been a lightning rod for controversy because it rewards players for committing crimes and engaging in dangerous and immoral behavior. Gamers can buy and sell drugs, steal cars, run down pedestrians, even feed people into a wood chipper. Nevertheless, the game has sold more than five million copies in the United States.

Who is buying this game? Some are adults buying the game for themselves, but a large percentage of the people buying this game are parents or grandparents buying the game for their kids or grandkids.

Columnist Mona Charen points out that the original concerns about this game surfaced when a Manhattan grandmother bought the game for her fourteen-year-old grandson. Then she was

shocked to find out that he could modify the game by downloading material from the Internet. Charen asks, "So, a kindly eighty-five-year-old lady has no qualms about purchasing a gang-glorifying, violence-soaked, sick entertainment for her teenage grandson, but is shocked when it turns out to contain explicit sex? Wasn't the rest enough?"[{2}](#)

In most cases, parents and grandparents are buying these games and need to exercise discernment. Many games are harmless and even can help stimulate the mind. Some are questionable. And others are violent and sexually explicit. We need to use discernment in selecting these games.

## **Benefits of Video Games**

A recent article in *Discover* magazine talked about the perception most people have of video game players. It said this is "the classic stereotype of gamers as attention-deficit-crazed stimulus junkies, easily distracted by flashy graphics and on-screen carnage."[{3}](#) Yet new research shows that gaming can be mentally enriching with such cognitive benefits as: pattern recognition, system thinking, and even patience.[{4}](#)

One of the best-known studies (done by Shawn Green and Daphne Bavelier) found that playing an action video game markedly improved performance on a range of visual skills related to detecting objects in briefly flashed displays. They found that gamers exhibit superior performance relative to non-gamers on a set of benchmark visual tasks.[{5}](#)

What they found was the action video gamers tend to be more attuned to their surroundings. While this occurs while performing within the video game, it also transfers to such things as driving down a residential street where they are more likely than a non-gamer to pick out a child running into the street after a ball.

They found that gamers can process visual information more quickly and can track 30 percent more objects than non-gamers. These conclusions came from testing both gamers and non-gamers with a series of three tests.

The first test flashed a small object on a screen for 1/160 of a second and the participant would indicate where it flashed. Gamers tended to notice the object far more often than non-gamers.

The second test flashed a number of small objects on a screen at once. The subjects had to type the number of objects they saw. Gamers saw the correct number more often than non-gamers.

The third test flashed black letters and one white letter on a screen in fast succession. The one white letter was sometimes followed by a black "X." Gamers were able to pick out the white letter more often than non-gamers and could more accurately say whether it was followed by a black "X."

The researchers also wanted to know whether the superior performance of gamers was acquired or self-selected. In other words, do video games actually improve visual attention skills or is it possible that visually attentive people choose to play video games?

Green and Bavelier trained a selection of non-gamers on one of two video games. One group played the World War II action video game "Medal of Honor." The other group served as the control group and played the puzzle game "Tetris." The researchers found that after two weeks, the group trained on the World War II game showed a marked increase in performance over the control group.

The researchers therefore concluded: "By forcing players to simultaneously juggle a number of varied tasks (detect new enemies, track existing enemies and avoid getting hurt, among others), action-video-game playing pushed the limits of three rather different aspects of visual attention."[\[6\]](#)

Video games can also train our brain to be more efficient. In the early 1990s, Richard Haier (University of California at Irving's Department of Psychiatry and Human Behavior), scanned the brains of "Tetris" players. He found that in first-time users, the brain requires lots of energy. In fact, cerebral glucose metabolic rates actually soar. But after a few weeks, these rates sink to normal as performance increases seven-fold.[\[7\]](#) In essence, "Tetris" trains your brain to stop using inefficient gray matter.

## Types of Video Games

Let's now focus on the rating of video games and the major video game categories. As we mentioned earlier, the video game industry is self-regulated, so we need to exercise discernment.

**EC – Early Childhood (age 3 and older)** – These games are appropriate for anyone who can play a video game and contains no inappropriate material.

**E – Everyone (age 6 and older)** – These games are designed for younger players and are the equivalent of a PG movie.

**T – Teen (age 13 and older)** – Generally these games are not appropriate for younger ages and are equivalent of a PG-13 movie.

**M – Mature (age 17 and older)** – These games are not appropriate for children. They may be rated as such because of overt violence, sexual content, and profanity.

**A0 – Adults Only (ages 18 and older)** – These games involve excessive violence, sexual content, and explicit language.

There are a number of different types of video games.

**Puzzles** – Puzzle games are usually acceptable for all ages and generally are rated "E." These games involve logic and spatial

arrangements. The best known puzzle game is "Tetris."

**Strategy** – These games may be as straightforward as "Chessmaster" or involve the use of tactical moves of troops or players such as "Advanced Wars."

**Simulation games** – Some games like "SimCity" require creativity and advanced problem-solving skills. Others involve driving or flying simulations that can be relatively tame or highly offensive such as the "Grand Theft Auto" series of video games.

**Arcade games** – The classic arcade games include such favorites as "Pacman" or "Frogger." However, the newer arcade games may include games like the violent "Street Fighter."

**Role playing games** – This is a type of game where players assume the roles of via role-playing. Although these games may be less graphic, they often involve fantasy and even the occult.

**Action games** – These games most often have an "M" rating. Many of these action games involve point-and-shoot games that are especially dangerous.

## **Violent Video Games**

There is cause for concern about violent video games. According to the American Academy of Pediatrics, playing violent video games increases the likelihood of adolescent violent behavior by as much as 13 percent to 22 percent.[\[8\]](#)

A 2005 meta-analysis of over thirty-five research studies (that included 4000 participants) found that "playing violent video games significantly increases physiological arousal and feelings of anger or hostility, and significantly decreases pro-social helping behavior."[\[9\]](#) Another study has shown a relationship between playing violent video games and being

involved in violent acts.[{10}](#)

Testimony before the United States Senate documents the following: (1) that violent video games increase violent adolescent behavior, (2) that heavy game players become desensitized to aggression and violence, (3) that nearly 90 percent of all African-American females in these games are victims of violence, and (4) that the most common role for women in violent video games is as prostitutes.[{11}](#)

One of the people speaking out against violent video games is Lt. Col. Dave Grossman, whom I have interviewed on a number of occasions. He is a former West Point professor and has written books on the subject of killing.[{12}](#) He has also testified that these violent video games are essentially “killing simulators.”

Grossman testified on the shooting in Paducah, Kentucky. Michael Carneal, a fourteen-year-old boy who had never fired a handgun before, stole a pistol and fired a few practice shots the night before. The next morning he fired eight shots and had eight hits (four of them head shots, one neck, and three upper torso). This is unprecedented marksmanship for a boy who only fired a .22 caliber rifle once at a summer camp.

The typical response in firing a gun is to fire at the target until it drops. Carneal instead moved from victim to victim just like he had learned in the violent video games he played.

The goal in these games is to rack up the “highest score” by moving quickly. Grossman points out that many of the games (such as “House of the Dead” or “Goldeneye” or “Turok”) give bonus points for head shots.[{13}](#)

Does that mean that anyone who plays these games will be a killer? Of course not. But Grossman says that the kind of training we give to soldiers (operant conditioning, desensitization, etc.) is what we are also giving to our kids through many of these violent video games.

Ironically, the U.S. Marine Corps licensed one of these popular video games (“Doom”) to train their combat fire teams in tactics and to rehearse combat actions of killing.<sup>{14}</sup> The video game manufacturers certainly know these are killing simulators. In fact the advertising for one game (“Quake II” that is produced by the same manufacturer as “Doom”), says: “We took what was killer, and made it mass murder.”

## **Biblical Discernment**

If we look back at the list of different types of video games, it is pretty easy to see that it is possible to find acceptable games as well as questionable and even dangerous video games in just about any category. That is why parental direction and discernment are so important.

The latest controversy over “Grand Theft Auto” demonstrates that the video game industry has not been effective at self-regulation. And children cannot be expected to exercise good judgment unless parents use discernment and teach it to their kids.

Paul tells us in Philippians 4:8, “Finally, brothers, whatever is true, whatever is noble, whatever is right, whatever is pure, whatever is lovely, whatever is admirable—if anything is excellent or praiseworthy—think about such things.” We should focus on what is positive and helpful to our Christian walk.

As Christians, we should develop discernment in our lives. See my article on “Media and Discernment” ([www.probe.org/faith-and-culture/culture/media-and-discernment.html](http://www.probe.org/faith-and-culture/culture/media-and-discernment.html)) for suggestions on how to develop discernment in your life and the life of your child.

Parents need to determine the possible benefits to playing videos and whether those benefits outweigh the negatives. Many of the games available today raise little or no concern. As one commentator put it, “The majority of video games on the

best-seller list contain no more bloodshed than a game of Risk.”[\[15\]](#)

But even good, constructive games played for long periods of time can be detrimental. Over the last few years I have been compiling statistics for my teen talk on media use. The number of hours young people spend watching TV, listening to music, surfing the Internet, going to movies, etc. is huge and increasing every year. Young people spend entirely too much time in front of a screen (TV screen, computer screen, movie screen).

So even good video games can be bad if young people are staying indoors and not going outdoors for exercise. Obesity is already a problem among many young people. And good video games can be bad if they take priority over responsibilities at home and schoolwork.

Parents should understand the potential dangers of video games and make sure they approve of the video games that come into their home. They may conclude that the drawbacks outweigh the benefits. If their children do play video games, they should also set time limits and monitor attitudes and behaviors that appear. They should also watch for signs of addiction. The dangers of video games are real, and parents need to exercise discernment.
