

The Bible: Intentionally Misunderstood

Dissecting the Bible by Focusing on Nits

Recently, New Testament scholar and expert on ancient New Testament documents, Dr. Daniel Wallace, spoke on the work being done to ensure we have the most accurate version of the Greek New Testament. He also mentioned several documents presenting a false view of this level of accuracy. One of these documents, *The Bible: So Misunderstood It's a Sin* by Kurt Eichenwald, appeared in *Newsweek* in December 2014.^{1} His article presents arguments intended to undermine the New Testament. Let's evaluate some of these arguments to be better equipped in sharing the truth.

The article contains at least 125 errors and/or half-truths in 14 pages. Of course, I am not the first to respond to this article. Dr. Wallace and Dr. Darrel Bock both wrote responses shortly after the document was published addressing specific areas of interest to them. I commend their posts to you as excellent resources.^{2} I will address some areas that are not addressed or only partially addressed by these seminary professors.

Using Survey Data Without Understanding It

Eichenwald begins his article by parroting the negative stereotypes put forth by those who cannot be bothered with trying to understand the vast majority of evangelicals. Attempting to add some rigor to his rant, he refers to two surveys on religious beliefs. Unfortunately for Eichenwald, rather than adding rigor, his comments showed that he did not take the time to examine the survey results he was spouting.

He first states, “[Evangelicals’] lack of knowledge about the Bible is well established. A Pew Research poll in 2010^{3} found that evangelicals ranked only a smidgen higher than atheists in familiarity with the New Testament and Jesus’s teachings.”^{4} He referred to a table showing the average number of questions out of twelve that each faith group answered correctly. However, only two of the twelve questions had anything to do with the New Testament and none of them related to Jesus’s teachings. The remaining questions were divided equally between the Old Testament and on latter day religious figures/beliefs. ^{5} Two questions are not enough to evaluate someone’s knowledge of the New Testament. But, for the record, the questions were “Name the four gospels” and “Where, according to the Bible, was Jesus born?” Fifty three percent of those professing to be born again answered these correctly versus twenty percent of atheists. Apparently to Eichenwald, a “smidgen higher” must mean almost three times as many. Perhaps, *Newsweek* cannot afford a fact checker?

The second poll he referenced was a 2012 effort by the Barna Group^{6}. He said, “[It found] that evangelicals accepted the attitudes and beliefs of the Pharisees . . . more than they accepted the teachings of Jesus.” The study actually showed that 63% of evangelicals accepted the attitudes and actions of Jesus at least as much, if not more, than the attitudes and actions the Barna Group associated with the Pharisees.

Accuracy of English Translations Not Effectively Addressed

Eichenwald spends two pages bemoaning the translation problems in the New Testament. But as pointed out by Wallace and Bock, his critique really serves to highlight the excellence of today’s translations. The areas he points out as having questionable additions in the text are clearly marked in all of today’s popular translations and if removed make no difference in the overall message of the New Testament (i.e. the woman caught in adultery

in John and snake handling at the end of Mark).

He goes on to say, "The same is true for other critical portions of the Bible, such as . . ." [{7}](#) and then lists three short passages which he claims did not appear in earlier Greek copies. One passage is 1 John 5:7 which was expanded in the original King James Version but (as Eichenwald is apparently unaware of) was removed in modern translations, e.g. NASU, NET, ESV, NIV. Another passage is Luke 22:20 which does appear in almost all modern translations as well as the KJV. As Metzger [{8}](#) points out, the longer version with Luke 22:20 appears in "all Greek manuscripts except for D and in most of the ancient versions and Fathers." So this passage does appear in most earlier Greek copies, contrary to what Eichenwald claims. He finally refers to Luke 24:51 as a passage not found in the earlier Greek versions. Once again, he is wrong. This passage appears in many older manuscripts [{9}](#) including the Bodmer Papyri written in about 200 AD.

When Eichenwald attempts to strengthen his argument, he draws from limited sources that contain questionable data. Even if they were correct, they and all the other areas where ancient manuscripts vary do not change the message of the New Testament in any significant way. As Wallace points out, "The reality is that we are getting closer and closer to the text of the original New Testament as more and more manuscripts are being discovered

and catalogued. . . . The New Testament has more manuscripts that are within a century or two of the original than anything else from the Greco-Roman world too. If we must be skeptical about what the original New Testament said, that skepticism, on average, should be multiplied one thousand times for other Greco-Roman literature." [{10}](#)

Supposed Biblical Contradictions

After attacking the accuracy of the New Testaments available to most American Christians, Eichenwald attacks the

consistency of the biblical record to undermine our confidence in what we read and the message we take from it. He presents nine different topics where he sees obvious contradictions in the text. We will examine four of them here, two from the Old Testament and two from the New Testament.

Number One: Creation

First, he claims there are three different creation models in the Bible, one in Genesis chapter 1, one in Genesis chapter 2, and “one referenced in the Books of Isaiah, Psalms and Job”[{11}](#) in which “the world is created in the aftermath of a great battle between God and . . . a dragon . . . called Rahab.”[{12}](#)

Liberal theologians claim that chapters 1 and 2 of Genesis describe different accounts. If they were describing the same events in the same way, that might be so. However, whether Exodus was written by Moses or whether it was put together later, a human author would not contradict himself on the same page. A clear-headed look at the two passages shows that chapter 1 describes the overall creation as observed from earth while chapter 2 talks about what God did on the sixth day in creating Adam and Eve. As pointed out in the NET Bible, “for what follows (verse 2:4) is not another account of creation but a tracing of events from creation through the fall and judgment (the section extends from 2:4 through 4:26.”[{13}](#)

Eichenwald adds in the so-called third creation story of God and Rahab stating, “In fact, the Bible has three creation models”[{14}](#) as if this were a clear and well-known fact. If you read all the verses in Isaiah, Psalms and Job that reference Rahab, you will scratch your head and wonder how could anyone relate those few verses to a creation story. Rahab is a Hebrew word meaning “strong one and it is not necessarily a name. It is clear in Isaiah and Psalms that Rahab is a reference to Egypt, not some mythical dragon. In

Job, it could be referring to the forces of chaos. He probably gets his idea from some articles that suggest that since Job 9:13 says "God does not restrain His anger; under Him the helpers of Rahab lie crushed" that the helpers of Rahab could refer to the helpers of Tiamat from the Babylonian Creation Epic. Even if this were true, rather than a third creation story one would say this verse tells us

1. God destroys all idols and false gods raised up by others, and
2. This is what Job said and Job was forced to retract what he said when he was confronted by Yahweh as seen in Job 42:1-6.

Eichenwald's claim of three different creation models is an illusion.

Number Two: The Flood

Eichenwald reports another set of clear contradictions in the Genesis story of Noah and the flood. He points to three areas of supposed contradiction.

The first one has to do with how many animals are on the ark. In Genesis 6:19, God tells Noah that he shall "bring two of every kind into the ark, to keep them alive with you." Years later after Noah has completed the ark, God tells him in Genesis 7:2 to take seven pairs of every clean animal and two of every unclean animal. Eichenwald claims this is a contradiction that the author/editor was so incompetent as to include only five verses apart. He does not consider the option that after completing the ark, God gave Noah more complete instructions because more clean animals would be needed to provide for the sacrifices to the Lord in Genesis 8:20. Noah did not need this detail before starting to build the ark.

The second contradiction is that the Bible has Noah and his family boarding the ark and the flood

beginning in two different sections. What Eichenwald sees as a contradiction, most readers take as a common literary technique, i.e. summarize the situation and then describe it again with more details. This was a seminal event in human history and deserved repeating.

The third contradiction according to Eichenwald is, "The water flooded the earth for 40 days (Genesis 7:17), or 150 days (Genesis 7:24). But Noah and his family stayed on the ark for a year (Genesis 8:13)." Upon reading the account, it is clear that Noah was on the ark for 12 months and 11 days during which it rained for forty days, the earth was totally inundated for 150 days as the waters slowly receded, but Noah waited to leave the ark until the land had become dry. You may choose not to believe in a universal flood, but to say the Bible has contradictions in its description is ludicrous.

Number Three: The Trial and Crucifixion

In this claim, he states that John was written "at a time when gentiles in Rome were gaining dramatically more influence over Christianity; that explains why the Romans are largely absolved from responsibility for Jesus's death and blame instead is pointed toward the Jews." [\[15\]](#) Thus, he implies that the other gospels put much of the blame on the Romans. Let us see if this is true.

Luke is very clear that the instigators of the death of Jesus were the Jewish leaders and those who followed them. In Luke 22:2 we read, "The chief priests and the experts in the law were trying to find some way to execute Jesus." When Pilate is brought in to the process, Luke records that Pilate did not find Jesus guilty of anything worthy of death and stated so three different times [\[16\]](#). At least five times in the book of Acts, Luke records Paul as squarely placing the responsibility for Jesus' death onto the Jewish leaders and nation. [\[17\]](#) We find similar verses in Matthew [\[18\]](#) and Mark. [\[19\]](#)

All of the gospels squarely place the blame on the Jewish leaders and those that followed them. Either Eichenwald has never read the gospels and just assumed the other gospels blamed the Romans, or he assumes his readers have never read the gospels.

Number Four: Ascension of Jesus

The fourth supposed contradiction deals with the ascension of Jesus. Eichenwald writes, “As told in Matthew, the disciples go to Galilee after the Crucifixion and see Jesus ascend to heaven; in Acts, written by Luke, the disciples stay in Jerusalem and see Jesus ascend from there.”[\[20\]](#)

As most of you know, the gospel of Matthew ends with Jesus meeting his disciples in Galilee and giving them the Great Commission. Matthew says **nothing** about Jesus ascending to heaven in Galilee or anywhere else. Because the Gospel of Luke does not discuss the time intervals, one might interpret it as saying that Jesus ascended into heaven on the day He was resurrected. But in Acts, Luke tells us that the resurrected Lord was with His disciples over a 40-day period. During which time, it would have been easy to travel to Galilee, as recorded in Matthew and John, and then travel back to Jerusalem.

Not surprisingly, his other five so-called “contradictions” all fail to hold up when one examines the Scriptures.

Faulty Interpretation of Scripture Passages Passages on Homosexuality

Eichenwald wants to convince us that what we think the Bible teaches about homosexuality is not what God intended.

He begins by pointing out, “The word homosexual didn’t even exist until more than 1,800 years after the New Testament was written. . . . The editors of these modern Bibles just made it

up.”{21} But this could be said of many English words we use today. The ancient Greek word used in the text is a compound word clearly meaning male-with-male sexual activity. A respected dictionary of New Testament words defines it this way, “a male engaging in same-gender sexual activity, a sodomite.”{22}

He then tells us, “Most biblical scholars agree that Paul did not write 1 Timothy”{23} and, presumably, should not be trusted when addressing behaviors we should avoid, such as homosexuality. The early church fathers from the second century on and many contemporary scholars{24} do not agree it is a forgery. Regardless, the same prohibition appears in other epistles and not just in Timothy.

Eichenwald points out Romans, Corinthians and Timothy discuss other sins in more detail than homosexual behavior. He writes, “So yes, there is one verse in Romans about homosexuality . . . and there are eight verses condemning those who criticize the government.”{25}

Most people understand that explaining our relationship to the government is more complex than forbidding homosexuality which is clearly understood. Romans talks about not resisting government authority. It says nothing about criticizing people in the government. In fact, that expression is protected by the laws of our land. In other words, to obey those laws you should feel free to criticize the government.

He then claims that people engage in other sins such as adultery, greed, drunkenness and lying and are not banished for those behaviors. But if you proclaimed you practice those actions regularly and teach them as truth, your church is going to remove you from any leadership position. They should still encourage you to attend worship services out of a desire to see God change your heart.{26} Mr. Eichenwald would be surprised to learn that most evangelical churches handle issues with homosexuality in the same way.

Then he declares, "Plenty of fundamentalist Christians who have no idea where references to homosexuality are in the New Testament . . . always fall back on Leviticus." {27} Personally, I have never run into another church member who was unfamiliar with the New Testament, but knew "by memory" the details of Leviticus.

Christianity and the Law

Eichenwald claims homosexuality is not a sin or if it is, it is the same as all the other sins that he believes we ignore so that we can throw all our venom at homosexuals. To strengthen his position, he brings out "a fundamental conflict in the New Testament—arguably the most important one in the Bible." {28} This conflict is whether as Christians we are to obey the Mosaic Law or whether we are to ignore it.

He claims, "The author of Matthew made it clear that Christians must keep Mosaic Law like the most religious Jews, in order to achieve salvation." {29}

Wow, what a mistaken understanding of the message. In Matthew, Jesus explains if we want to enter the kingdom of heaven "our righteousness must surpass that of the scribes and Pharisees (the most religious Jews)." {30} We must not get angry, call people names, or lust after others in our minds. He caps it off by saying, "You are to be perfect, as your heavenly Father is perfect." {31} He is clearly not teaching them to be like Orthodox Jews and they will be okay. He is teaching they cannot be good enough. It is only through His sacrifice that we can be made righteous.

In Acts 15, we see that some believers who were Pharisees by background brought this question up to the apostles and elders. Peter responded by telling them, "Now therefore why do you put God to the test by placing upon the neck of the disciples a yoke which neither our father nor we have been able to bear? But we believe that we are saved through the

grace of the Lord Jesus, in the same way as they (the Gentiles) also are.”[{32}](#) And the apostles, the elders, and the whole church agreed to send directions to the Gentiles that they were not required to follow the Mosaic Law.

So as Gentiles, we are not required to follow the Law of Moses as laid out in Leviticus. But the New Testament is very careful to identify those actions and attitudes which are sin so that we Gentiles know to avoid them. Which is why sexual sins are specifically mentioned in the New Testament.[{33}](#) Even in Acts 15 where the church in Jerusalem is deciding what to tell Gentile Christians about the Law, they decide to tell them to abstain from fornication, a term generally covering all sexual activity outside of marriage.[{34}](#)

In summary, Eichenwald believes we should declare homosexuality is not a sin and those who practice it should be honored as leaders within the church. He does not suggest that we treat any other sins that way. He does not present a cogent argument that the New Testament agrees with his position. He is saying that we should ignore biblical teaching. But, we really do love those struggling with homosexual behavior and we want to help them gain freedom from those lusts just as much as someone struggling with opposite sex issues.

Obeying the Law vs. Criticizing the Government

Eichenwald also castigates us for disobeying the New Testament teaching about government. He says Romans has “eight verses condemning those who criticize the government. . . . In other words, all fundamentalist Christians who decry Obama have sinned as much as they believe gay people have.”[{35}](#) He points to Pat Robertson as sinning when Pat stated, “We need to do something, to pray to be delivered from this president.” Does Romans condemn those who criticize the government?

Actually, Romans says, “Let every person be subject to the governing authorities. . . . the person who resists such

authority resists the ordinance of God.”[\[36\]](#) It doesn’t say that we are required to say good things about the government, but rather that we should obey the laws of our government. Our Bill

of Rights states that “Congress shall make no law . . . abridging the freedom of speech.”[\[37\]](#) So, if we do not voice our opinions about those running our government, we are in fact, not availing ourselves of the law established by our governing authorities.

Judging Our Motives for Prayer

Eichenwald casts aspersion on people of faith for gathering together to pray. He begins by castigating a prayer rally in Houston in 2011. He says, “[Then-governor Rick] Perry stepped to a podium, his face projected on a giant screen . . . and boomed out a long prayer asking God to make America a better place . . . babbling on . . . about faith and country and the blessings of America.” He further claimed that Perry “heaped up empty phrases as the Gentiles do.”

In reality, during the daylong event, Rick Perry spoke about 12 minutes and prayed for slightly more than **two minutes**. In his short prayer, Perry prayed in a cogent manner, praying for among others our president and his family.

Eichenwald explains that Perry is just an example of our misguided ways. The problem is that most Christians in American are disobeying the teaching of Jesus by praying in front of people and praying words other than the Lord’s Prayer. As Jesus told us, “Whenever you pray, do not be like the hypocrites, for they love to stand and pray . . . so that they may be seen by others.”

Yes, Jesus is very clear that we are not to be hypocrites, but it is possible for someone to speak a prayer in the presence of others without being a hypocrite. Jesus does tell us to make our prayers a personal conversation with

our heavenly Father. But Jesus prayed often before synagogue attenders, in front of his disciples, and before over 5,000 people. But clearly those times, although numerous, were much less than the time He spent communing with His Father alone. That ratio should be true of our lives as well.

Even stranger is Eichenwald's belief that we should only pray the Lord's Prayer just as Jesus stated it. But, the passage in Matthew 6 tells us that Jesus was giving us a model, an example, of how to pray, not giving us a set of words to repeat in a meaningless fashion. In the gospels and the other New Testaments books, we are privy to many of the prayers offered by the apostles. None of them use the words from the Lord's prayer. If only Eichenwald had been there to instruct them, they would not have sinned so grievously.

Eichenwald claims the only reason anyone could be praying in front of a large crowd, or on television, or by extension in a small congregation is "to be seen." This claim does not make sense. The people he is judging can build themselves up without having to resort to prayer.

Conclusion

In this article, we have seen that critics use an incomplete, shallow examination of Scripture to claim it is not accurate and our application is faulty. In every case, we have seen that these claims leak like a sieve.

Dan Wallace sums up Eichenwald's arguments this way:

Time and time again the author presents his arguments as though they were facts. Any serious disagreements with his reasoning are quietly ignored as though they did not exist. The most charitable thing I can say is that Eichenwald is in need of a healthy dose of epistemic humility as well as a good research assistant who can do some fact-checking before the

author embarrasses himself further in print. . . . But his numerous factual errors and misleading statements, his lack of concern for any semblance of objectivity, his apparent disdain for and lack

of interaction with genuine evangelical scholarship, and his uber-confidence about more than a few suspect viewpoints, make me wonder. . . . Eichenwald's grasp of conservative Christianity in America as well as his grasp of genuine biblical scholarship are, at best, subpar. And this article is an embarrassment to *Newsweek*—or should be!"[\[38\]](#)

If Eichenwald's article represents the best scholarship discrediting the Bible, one rejoices in our firm foundation. On the other hand, realizing how many readers of such pieces don't know their flimsy nature, one is saddened by the potential impact on a society include to ignore the Bible.

The Resurrection: Fact or Fiction? – A Real Historical

Event

Dr. Zukeran presents strong evidence discounting the most common theories given against a historical resurrection. The biblical account and other evidence clearly discount these attempts to cast doubt on the resurrection. Any strong apologetic argument is anchored on the reality of the resurrection of Jesus Christ as an historical event.

Introduction

The most significant event in history is the Resurrection of Jesus Christ. It is the strongest evidence that Jesus is the Son of God. This event gives men and women the sure hope of eternal life a hope that not only gives us joy as we look to the future but also provides us with powerful reasons to live today.

Throughout the centuries, however, there have been scholars who have attempted to deny the account of the Resurrection. Our schools are filled with history books which give alternative explanations for the Resurrection or in some cases, fail even to mention this unique event.

In this essay we will take a look at the evidence for the Resurrection and see if this event is historical fact or fiction. But, first, we must establish the fact that Jesus Christ was a historical figure and not a legend. There are several highly accurate historical documents that attest to Jesus. First, let's look at the four Gospels themselves. The authors Matthew, Mark, Luke, and John recorded very specific facts of the events surrounding the life of Jesus, and archaeology has verified the accuracy of the New Testament. Hundreds of facts such as the names of officials, geographical sites, financial currencies, and times of events have been confirmed. Sir William Ramsay, one of the greatest geographers of the 19th century, became firmly convinced of the accuracy

of the New Testament as a result of the overwhelming evidence he discovered during his research. As a result, he completely reversed his antagonism against Christianity.

The textual evidence decisively shows that the Gospels were written and circulated during the lifetime of those who witnessed the events. Since there are so many specific names and places mentioned, eyewitnesses could have easily discredited the writings. The New Testament would have never survived had the facts been inaccurate. These facts indicate that the Gospels are historically reliable and show Jesus to be a historical figure. For more information on the accuracy of the Bible, see the essay from Probe entitled [Authority of the Bible](#).

Another document that supports the historicity of Jesus is the work of Josephus, a potentially hostile Jewish historian. He recorded Antiquities, a history of the Jews, for the Romans during the lifetime of Jesus. He wrote, "Now there was about that time Jesus, a wise man, if it be lawful to call him a man."⁽¹⁾ Josephus goes on to relate other specific details about Jesus' life and death that correspond with the New Testament. Roman historians such as Suetonius, Tacitus, and Pliny the Younger also refer to Jesus as a historically real individual.

Skeptics often challenge Christians to prove the Resurrection scientifically. We must understand, the scientific method is based on showing that something is fact by repeated observations of the object or event. Therefore, the method is limited to repeatable events or observable objects. Historical events cannot be repeated. For example, can we repeatedly observe the creation of our solar system? The obvious answer is no, but that does not mean the creation of the solar system did not happen.

In proving a historical event like the Resurrection, we must look at the historical evidence. Thus far in our discussion we

have shown that belief in the historical Jesus of the New Testament is certainly reasonable and that the scientific method cannot be applied to proving a historical event. For the remainder of this essay, we will examine the historical facts concerning the Resurrection and see what the evidence reveals.

Examining the Evidence

Three facts must be reckoned with when investigating the Resurrection: the empty tomb, the transformation of the Apostles, and the preaching of the Resurrection originating in Jerusalem.

Let us first examine the case of the empty tomb. Jesus was a well-known figure in Israel. His burial site was known by many people. In fact Matthew records the exact location of Jesus' tomb. He states, "And Joseph of Arimathea took the body and wrapped it in a clean linen cloth and laid it in his own new tomb" (Matt. 27:59). Mark asserts that Joseph was "a prominent member of the Council" (Mark 15:43).

It would have been destructive for the writers to invent a man of such prominence, name him specifically, and designate the tomb site, since eyewitnesses would have easily discredited the author's fallacious claims.

Jewish and Roman sources both testify to an empty tomb. Matthew 28:12-13 specifically states that the chief priests invented the story that the disciples stole the body. There would be no need for this fabrication if the tomb had not been empty. Opponents of the Resurrection must account for this. If the tomb had not been empty, the preaching of the Apostles would not have lasted one day. All the Jewish authorities needed to do to put an end to Christianity was to produce the body of Jesus.

Along with the empty tomb is the fact that the corpse of Jesus

was never found. Not one historical record from the first or second century is written attacking the factuality of the empty tomb or claiming discovery of the corpse. Tom Anderson, former president of the California Trial Lawyers Association states,

Let's assume that the written accounts of His appearances to hundreds of people are false. I want to pose a question. With an event so well publicized, don't you think that it's reasonable that one historian, one eye witness, one antagonist would record for all time that he had seen Christ's body? . . . The silence of history is deafening when it comes to the testimony against the resurrection.(2)

Second, we have the changed lives of the Apostles. It is recorded in the Gospels that while Jesus was on trial, the Apostles deserted Him in fear. Yet 10 out of the 11 Apostles died as martyrs believing Christ rose from the dead. What accounts for their transformation into men willing to die for their message? It must have been a very compelling event to account for this.

Third, the Apostles began preaching the Resurrection in Jerusalem. This is significant since this is the very city in which Jesus was crucified. This was the most hostile city in which to preach. Furthermore, all the evidence was there for everyone to investigate. Legends take root in foreign lands or centuries after the event. Discrediting such legends is difficult since the facts are hard to verify. However, in this case the preaching occurs in the city of the event immediately after it occurred. Every possible fact could have been investigated thoroughly.

Anyone studying the Resurrection must somehow explain these three facts.

Five Common Explanations

Over the years five explanations have been used to argue against the Resurrection. We will examine these explanations to see whether they are valid.

The Wrong Tomb Theory

Proponents of this first argument state that according to the Gospel accounts, the women visited the grave early in the morning while it was dark. Due to their emotional condition and the darkness, they visited the wrong tomb. Overjoyed to see that it was empty, they rushed back to tell the disciples Jesus had risen. The disciples in turn ran into Jerusalem to proclaim the Resurrection.

There are several major flaws with this explanation. First, it is extremely doubtful that the Apostles would not have corrected the women's error. The Gospel of John gives a very detailed account of them doing just that. Second, the tomb site was known not only by the followers of Christ but also by their opponents. The Gospels make it clear the body was buried in the tomb of Joseph of Arimathea, a member of the Jewish council. If the body still remained in the tomb while the Apostles began preaching, the authorities simply would have to go to the right tomb, produce the body, and march it down the streets. This would have ended the Christian faith once and for all. Remember, the preaching of the Resurrection began in Jerusalem, fifteen minutes away from the crucifixion site and the tomb. These factors make this theory extremely weak.

The Hallucination Theory

This second theory holds that the Resurrection of Christ just occurred in the minds' of the disciples. Dr. William McNeil articulates this position in his book, *A World History*. He writes,

The Roman authorities in Jerusalem arrested and crucified

Jesus. . . . But soon afterwards the dispirited Apostles gathered in an upstairs room' and suddenly felt again the heartwarming presence of their master. This seemed absolutely convincing evidence that Jesus' death on the cross had not been the end but the beginning. . . . The Apostles bubbled over with excitement and tried to explain to all who would listen all that had happened.(3)

This position is unrealistic for several reasons. In order for hallucinations of this type to occur, psychiatrists agree that several conditions must exist. However, this situation was not conducive for hallucinations. Here are several reasons. Hallucinations generally occur to people who are imaginative and of a nervous make up. However, the appearances of Jesus occurred to a variety of people. Hallucinations are subjective and individual. No two people have the same experience. In this case, over five hundred people (Corinthians 15) have the same account. Hallucinations occur only at particular times and places and are associated with the events. The Resurrection appearances occur in many different environments and at different times. Finally, hallucinations of this nature occur to those who intensely want to believe. However, several such as Thomas and James, the half brother of Jesus were hostile to the news of the Resurrection.

If some continue to argue for this position, they still must account for the empty tomb. If the Apostles dreamed up the Resurrection at their preaching, all the authorities needed to do was produce the body and that would have ended the Apostles' dream. These facts make these two theories extremely unlikely.

The Swoon Theory

A third theory espouses that Jesus never died on the cross but merely passed out and was mistakenly considered dead. After three days He revived, exited the tomb, and appeared to His

disciples who believed He had risen from the dead. This theory was developed in the early nineteenth century, but today it has been completely given up for several reasons.

First, it is a physical impossibility that Jesus could have survived the tortures of the crucifixion. Second, the soldiers who crucified Jesus were experts in executing this type of death penalty. Furthermore, they took several precautions to make sure He was actually dead. They thrust a spear in His side. When blood and water come out separately, this indicates the blood cells had begun to separate from the plasma which will only happen when the blood stops circulating. Upon deciding to break the legs of the criminals (in order to speed up the process of dying), they carefully examined the body of Jesus and found that He was already dead.

After being taken down from the cross, Jesus was covered with eighty pounds of spices and embalmed. It is unreasonable to believe that after three days with no food or water, Jesus would revive. Even harder to believe is that Jesus could roll a two-ton stone up an incline, overpower the guards, and then walk several miles to Emmaeus. Even if Jesus had done this, His appearing to the disciples half-dead and desperately in need of medical attention would not have prompted their worship of Him as God.

In the 19th century, David F. Strauss, an opponent of Christianity, put an end to any hope in this theory. Although he did not believe in the Resurrection, he concluded this to be a very outlandish theory. He stated,

It is impossible that a being who had stolen half-dead out of the sepulchre, who crept about weak and ill, wanting medical treatment, who required bandaging, strengthening, and indulgence, and who still at last yielded to his sufferings, could have given the disciples the impression that he was a Conqueror over death and the grave, the Prince of life, an impression that would lay at the bottom of their future

ministry.(4)

The Stolen Body Theory

This fourth argument holds that Jewish and Roman authorities stole the body or moved it for safekeeping. It is inconceivable to think this a possibility. If they had the body, why did they need to accuse the disciples of stealing it? (Matt. 28:11-15). In Acts 4, the Jewish authorities were angered and did everything they could to prevent the spread of Christianity. Why would the disciples deceive their own people into believing in a false Messiah when they knew that this deception would mean the deaths of hundreds of their believing friends? If they really knew where the body was, they could have exposed it and ended the faith that caused them so much trouble and embarrassment. Throughout the preaching of the Apostles, the authorities never attempted to refute the Resurrection by producing a body. This theory has little merit.

The Soldiers Fell Asleep Theory

Thus far we have been studying the evidence for the Resurrection. We examined four theories used in attempts to invalidate this miracle. Careful analysis revealed the theories were inadequate to refute the Resurrection. The fifth and most popular theory has existed since the day of the Resurrection and is still believed by many opponents of Christianity. Matthew 28:12-13 articulates this position.

When the chief priests had met with the elders and devised a plan, they gave the soldiers a large sum of money telling them, "You are to say, his disciples came during the night and stole him away while we were asleep."

Many have wondered why Matthew records this and then does not refute it. Perhaps it is because this explanation was so

preposterous, he did not see the need to do so.

This explanation remains an impossibility for several reasons. First, if the soldiers were sleeping, how did they know it was the disciples who stole the body? Second, it seems physically impossible for the disciples to sneak past the soldiers and then move a two-ton stone up an incline in absolute silence. Certainly the guards would have heard something.

Third, the tomb was secured with a Roman seal. Anyone who moved the stone would break the seal, an offense punishable by death. The depression and cowardice of the disciples makes it difficult to believe that they would suddenly become so brave as to face a detachment of soldiers, steal the body, and then lie about the Resurrection when they would ultimately face a life of suffering and death for their contrived message.

Fourth, Roman guards were not likely to fall asleep with such an important duty. There were penalties for doing so. The disciples would have needed to overpower them. A very unlikely scenario.

Finally, in the Gospel of John the grave clothes were found "lying there as well as the burial cloth that had been around Jesus' head. The cloth was folded up by itself separate from the linen" (20:6-7). There was not enough time for the disciples to sneak past the guards, roll away the stone, unwrap the body, rewrap it in their wrappings, and fold the head piece neatly next to the linen. In a robbery, the men would have flung the garments down in disorder and fled in fear of detection.

Conclusion: Monumental Implications

These five theories inadequately account for the empty tomb, the transformation of the Apostles, and the birth of Christianity in the city of the crucifixion. The conclusion we must seriously consider is that Jesus rose from the grave. The

implications of this are monumental.

First, if Jesus rose from the dead, then what He said about Himself is true. He stated, "I am the Resurrection and the life; he who believes in me shall live even if he dies" (John 11:25). He also stated, "I am the way, and the truth, and the life; no man comes to the father , but through me" (John 14:6). Eternal life is found through Jesus Christ alone. Any religious belief that contradicts this must be false. Every religious leader has been buried in a grave. Their tombs have become places of worship. The location of Jesus' tomb is unknown because it was empty; his body is not there. There was no need to enshrine an empty tomb.

Second, Paul writes in 1 Corinthians 15:54, "Death has been swallowed up in victory." Physical death is not the end; eternal life with our Lord awaits all who trust in Him because Jesus has conquered death.

Jesus' Resurrection: Fact or Fiction? – A Clear Christian Perspective

Rusty Wright presents a compelling case for the historicity of Jesus' resurrection. Looking at four outcomes of the resurrection, he presents a brief case supporting a Christian worldview understanding that Jesus actually died and was resurrected from the tomb.

At Easter, some might wonder what all the fuss is about. Who cares? What difference does it make if Jesus rose from the dead?

It makes all the difference in the world. If Christ did not rise, then thousands of believers have died as martyrs for a hoax.

If he did rise, then he is still alive and can offer peace to

troubled, hurting lives.

Countless scholars—among them the apostle Paul, Augustine, Sir Isaac Newton and C.S. Lewis—believed in the resurrection. We need not fear committing intellectual suicide by believing it also. Where do the facts lead?

Paul, a first-century skeptic-turned believer, wrote that “Christ died for our sins...he was buried...he was raised on the third day...he appeared to Peter, and then to the Twelve (Disciples). After that, he appeared to more than five hundred...at the same time, most of whom are still living.” Consider four pieces of evidence:

1. The explosive growth of the Christian movement. Within a few weeks after Jesus was crucified, a movement arose which, by the later admission of its enemies, “upset the world.” What happened to ignite this movement shortly after its leader had been executed?

2. The Disciples’ changed lives. After Jesus’ arrest and crucifixion, most of the Disciples fled in fear. Peter denied three times that he was a follower of Jesus. (The women were braver and stayed to the end.) Yet ten out of the eleven Disciples (Judas committed suicide) were martyred for their faith. According to traditions, Peter was crucified upside down; Thomas was skewered; John was boiled in oil but survived. What turned these cowards into heroes? Each believed he had seen Jesus alive again.

3. The empty tomb. Jesus’ corpse was removed from the cross, wrapped like a mummy and placed in a solid-rock tomb. A one-and-a-half to two-ton stone was rolled into a slightly depressed groove to seal the tomb’s entrance.

A “Green Beret”-like unit of Roman soldiers guarded the grave. Sunday morning, the stone was found rolled away, the body was gone but the graveclothes were still in place. What happened?

Did Christ's friends steal the body? Perhaps one of the women sweet-talked (karate-chopped?) the guards while the others moved the stone and tiptoed off with the body. Or maybe Peter (remember his bravery) or Thomas (Doubting Thomas) overpowered the guards, stole the body, then fabricated—and died for—a resurrection myth.

These theories hardly seem plausible. The guard was too powerful, the stone too heavy and the disciples too spineless to attempt such a feat.

Did Christ's enemies steal the body? If Romans or Jewish religious leaders had the body, surely they would have exposed it publicly and Christianity would have died out. They didn't, and it didn't.

The "Swoon Theory" supposes that Jesus didn't really die but was only unconscious. The expert Roman executioners merely thought he was dead. After a few days in the tomb without food or medicine, the cool air revived him.

He burst from the 100 pounds of graveclothes, rolled away the stone with his nail-pierced hands, scared the daylights out of the Roman soldiers, walked miles on wounded feet and convinced his Disciples he'd been raised from the dead. This one is harder to believe than the resurrection itself.

4. The appearances of the risen Christ. For 40 days after his death, many different people said they saw Jesus alive. Witnesses included a woman, a shrewd tax collector, several fishermen and over 500 people at once. These claims provide further eyewitness testimony for the resurrection.

As a skeptic, I realized that attempts to explain away the evidences run into a brick wall of facts that point to one conclusion: Christ is risen.

The above does not constitute an exhaustive proof, rather a reasoned examination of the evidence. Each interested person

should evaluate the evidence and decide if it makes sense. Of course, the truth or falsity of the resurrection is a matter of historical fact and is not dependent on anyone's belief. If the facts support the claim, one can conclude that he arose. In any case, mere intellectual assent to the facts does little for one's life.

A major evidence comes experientially, in personally receiving Jesus' free gift of forgiveness. He said, "I stand at the door and knock; if anyone hears my voice and opens the door, I will come in to him (or her)."

Worth considering?

The Technological Simulacra: On the Edge of Reality and Illusion

Dr. Lawrence Terlizze says that our addiction to technology is heading toward the opposite of the life we want.

What Saccharine is to Sugar, or The Technological Simulacra: On the Edge of Reality and Illusion

"Anyone wishing to save humanity today must first of all save the word."[\[1\]](#) – Jacques Ellul

Simulacra

Aerosmith sings a familiar tune:

*"There's something wrong with the world today,
I don't know what it is,
there's something wrong with our eyes,
we're seeing things in a different way
and God knows it ain't [isn't] his;
there's melt down in the sky. We're living on the edge."*[{2}](#)

What saccharine is to sugar, so the technological simulacra is to nature or reality—a technological replacement, purporting itself to be better than the original, more real than reality, sweeter than sugar: hypersugar.

[This article without footnotes](#)

Simulacra, (*Simulacrum*, Latin, pl., *likeness, image, to simulate*): or simulation, the term, was adapted by French social philosopher Jean Baudrillard (1929-2007) to express his critical interpretation of the technological transformation of reality into hyperreality. Baudrillard's social critique provided the premise for the movie *The Matrix* (1999). However, he was made famous for declaring that the Gulf War never happened; TV wars are not a reflection of reality but projections (recreations) of the TV medium.[{3}](#)

Simulacra reduces reality to its lowest point or one-dimension and then recreates reality through attributing the highest qualities to it, like snapshots from family vacation. When primitive people refuse to have their picture taken because they are afraid that the camera steals their souls, they are resisting simulacra. The camera snaps a picture and recreates the image on paper or a digital medium; it then goes to a photo album or a profile page. Video highlights amount to the same thing in moving images; from three dimensions, the camera reduces its object to soulless one-dimensional fabrication.[{4}](#)

Simulacra does not end with the apparent benign pleasures of family vacation and media, although media represents its most recent stage.^{5} Simulacra includes the entire technological environment or complex, its infrastructure, which acts as a false “second nature”^{6} superimposed over the natural world, replacing it with a hyperreal one, marvelously illustrated in the movie *Terminator 2: Judgment Day* (1991). As liquid metal conforms itself to everything it touches, it destroys the original.^{7}

Humanity gradually replaces itself through recreation of human nature by technological enhancements, making the human race more adaptable to machine existence, ultimately for the purpose of space exploration. Transhumanists believe that through the advancements in genetic engineering, neuropharmaceuticals (experimental drugs), bionics, and artificial intelligence it will redesign the human condition in order to achieve immortality. “Humanity+,” as Transhumanists say, will usher humanity into a higher state of being, a technological stairway to heaven, “glorification,” “divinization” or “ascendency” in theological terms.^{8}

God made man in his own image and now mankind remakes himself in the image of his greatest creation (image), the computer. If God’s perfection is represented by the number seven and man’s imperfection by the number six, then the Cyborg will be a five according to the descending order of being; the creature is never equal or greater than the creator but always a little lower.^{9}

Glorious Reduction!^{10}

www.probe.org/machinehead-from-1984-to-the-brave-new-world-order-and-beyond/

Hyperreality

An old tape recording commercial used to say, "Is it real or is it Memorex?" By championing the superiority of recording to live performance the commercial creates hyperreality, a reproduction of an original that appears more real than reality, a replacement for reality with a reconstructed one, purported to be better than the original.

Disneyland serves as an excellent example by creating a copy of reality remade in order to substitute for reality; it confuses reality with an illusion that appears real, "more real than real."[{11}](#) Disney anesthetizes the imagination, numbing it against reality, leaving spectators with a false or fake impression. Main Street plays off an idealized past. The technological reconstruction leads us to believe that the illusion "can give us more reality than nature can."[{12}](#)

Hyperreality reflects a media dominated society where "signs and symbols" no longer reflect reality but are manipulated by their users to mean *whatever*. Signs recreate reality to achieve the opposite effect (metastasis)[{13}](#); for example, in Dallas I must travel west on Mockingbird Lane in order to go to East Mockingbird Lane. Or, Facebook invites social participation when no actual face to face conversation takes place.[{14}](#)

Hyperreality creates a false perception of reality, the glorification of reduction that confuses fantasy for reality, a proxy reality that imitates the lives of movie and TV characters for real life. When reel life in media becomes real life outside media we have entered the high definition, misty region—the Netherlands of concrete imagination—hyperreality![{15}](#)

Hyperreality goes beyond escapism or simply "just entertainment." If that was all there was to it, there would be no deception or confusion, at best a trivial waste of time

and money. Hyperreality is getting lost in the pleasures of escapism and confusing the fantasy world for the real one, believing that fantasy is real or even better than reality. Hyperreality results in the total inversion of society through technological sleight of hand, a cunning trick, a sorcerer's illusion transforming the world into a negative of itself, into its opposite, then calling it progress.

Hyperreality plays a trick on the mind, a self-induced hypnotism on a mass scale, duping us by our technological recreation into accepting a false reality as truth. Like Cypher from the movie *The Matrix* who chose the easy and pleasant simulated reality over the harsh conditions of the "desert of the real" in humanity's fictional war against the computer, he chose to believe a lie instead of the truth.[\[16\]](#)

The Devil is a Liar

A lie plays a trick on the mind, skillfully crafted to deceive through partial omission or concealment of the truth. The lie is the devil's (devil means liar) only weapon, always made from a position of inferiority and weakness (Revelation 20:3, 8). A lie never stands on its own terms as equal to truth; it does not exist apart from twisting (recreating) truth. A lie never contradicts the truth by standing in opposition to it.

A lie is not a negative (no) or a positive (yes), but obscures one or the other. It adds by revealing what is not there—it subtracts by concealing what is there. A lie appears to be what is not and hides what it really is. "Satan disguises himself as an angel of light" (2 Corinthians 11:14).

A lie does not negate (contradict) or affirm truth. Negation (No) establishes affirmation (Yes). Biblically speaking, the no comes before the yes—the cross then the resurrection; law first, grace second. The Law is no to sin (disobedience); the Gospel is yes to faith (obedience). Truth is always a

synthesis or combination between God's no in judgment on sin and His yes in grace through faith in Jesus Christ. "For the Law was given through Moses; grace and truth were realized through Jesus Christ" (John 1:17). Law without grace is legalism; grace without law is license.{17}

www.probe.org/law-and-grace-combating-the-american-heresy-of-pelagianism/

The devil's lie adds doubt to the promise of God; "Indeed, has God said, 'you shall not eat from any tree of the garden'?" (Genesis 3:1 NASB) It hides the promise of certain death; "You surely will not die" (Genesis 3:4). The serpent twists knowledge into doubt by turning God's imperative, "Don't eat!" into a satanic question "Don't eat?"{18}

But it is Eve who recreates the lie in her own imagination. "When the woman saw that the tree was good for food, and that it was a delight to the eyes, and that the tree was desirable to make one wise, she took from its fruit and ate; and she gave also to her husband with her, and he ate" (Genesis 3:6).{19}

Sight incites desire. We want what we see (temptation). Eve was tempted by "the lust of the eyes" (1 John 2:16) after seeing the fruit, then believed the false promise that it would make her wise. "She sees; she no longer hears a word to know what is good, bad or true."{20} Eve fell victim to her own idolatrous faith in hyperreality that departed from the simple trust in God's word.{21}

The Void Machine

Media (television, cell phone, internet, telecommunications) is a void machine.{22} In the presence of a traditional social milieu, such as family, church or school, it will destroy its host, and then reconstruct it in its own hyperreal image (Simulacra). Telecommunication technology is a Trojan Horse

for all traditional institutions that accept it as pivotal to their “progress,” except prison or jail.[{23}](#) The purpose of all institutions is the promotion of values or social norms, impossible through the online medium.

Media at first appears beneficial, but this technology transforms the institution and user into a glorified version of itself. The personal computer, for example, imparts values not consistent with the mission of church or school, which is to bring people together in mutual support around a common goal or belief for learning and spiritual growth (community). This is done primarily through making friends and forming meaningful relationships, quite simply by people talking to each other. Values and social norms are only as good as the people we learn them from. Values must be embodied in order to be transmitted to the next generation.[{24}](#)

Talking as the major form of personal communication is disappearing. Professor of Communications John L. Locke noted that “Intimate talking, the social call of humans, is on the endangered species list.”[{25}](#) People prefer to text, or phone.[{26}](#) Regrettably, educational institutions such as high schools and universities are rapidly losing their relevance as traditional socializing agents where young people would find a potential partner through like interests or learn a worldview from a mentor. What may be gained in convenience, accessibility or data acquisition for the online student is lost in terms of the social bonds necessary for personal ownership of knowledge, discipline and character development.[{27}](#)

An electronic community is not a traditional community of persons who meet face to face, in person, in the flesh where they establish personal presence. Modern communication technologies positively destroy human presence. What philosopher Martin Heidegger called *Dasein*, “being there,” (embodiment or incarnation) is absent.[{28}](#) As Woody Allen put it, “90 percent of life is showing up.”[{29}](#) The presence of

absence marks the use of all electronic communication technology. Ellul argued, "The simple fact that I carry a camera [cell phone] prevents me from grasping everything in an overall perception."[\[30\]](#) The camera like the cell phone preoccupies its users, creating distance between himself and friends. The cellphone robs the soul from its users, who must exchange personal presence for absence; the body is there tapping away, but not the soul! The cell phone user has become a void![\[31\]](#)

The Power of Negative Thinking

According to popular American motivational speakers, the key to unlimited worldly wealth, success and happiness is in the power of positive thinking that unleashes our full potential; however, according to obscure French social critics the key to a meaningful life, lived in freedom, hope and individual dignity is in the power of negative thinking that brings limits, boundaries, direction and purpose.

Negativity gives birth to freedom, expanding our spiritual horizons with possibilities and wise choices, which grounds faith, hope and love in absolute truth, giving us self-definition greater than our circumstances, greater than reality of the senses. To freely choose in love one's own path, identity and destiny is the essence of individual dignity.

According to French social critics Jacques Ellul and Herbert Marcuse, freedom is only established in negation that provides limits and boundaries, which tells us who we are. Technological hyperreality removes all natural and traditional limits in the recreation of humanity in the image of the cyborg. The transhuman transformation promises limitless potential at the expense of individual freedom, personal identity and ultimately human dignity and survival.

www.probe.org/into-the-void-the-coming-transhuman-transformation/

All limitless behavior ends in self-destruction. Human extinction looms over the technological future, like the Sword of Damocles, threatening humanity's attempt to refit itself for immortality in a grand explosion (nuclear war), a slow poisoning (ecocide) or suicidal regressive technological replacement. Stephen Hawking noted recently that technological progress threatens humanity's survival with nuclear war, global warming, artificial intelligence and genetic engineering over the course of the next 100 years. Hawking stated, "We are not going to stop making progress, or reverse it, so we must [recognize] the dangers and control them." {32}

In asserting "NO!" to unlimited technological advance and establishing personal and communal limits to our use of all technology, especially the cell phone, computer and TV, we free ourselves from the technological necessity darkening our future through paralyzing the will to resist. {33}

After we "JUST SAY NO!" {34} to our technological addictions, for instance, after a sabbatical fast on Sunday when the whole family turns off their electronic devices, and get reacquainted, a new birth of freedom will open before us teeming with possibilities. We will face unmediated reality in ourselves and family with a renewed hope that by changing our personal worlds for one day simply by pushing the off button on media technology we can change the future. Through a weekly media fast (negation) we will grow faith in the power of self-control by proving that we can live more abundant lives without what we once feared absolute necessity, inevitable and irresistible. "All things are possible with God" (Mark 10: 27). When we exchange our fear of idols for faith in the Living God the impossible becomes possible and our unlimited potential is released that will change the world forever! {35}

I see trees of green, red roses, too,

I see them bloom, for me and you
And I think to myself
What a wonderful world.

I see skies of blue, and clouds of white,
The bright blessed day, the dark sacred night
And I think to myself
What a wonderful world.

The colors of the rainbow, so pretty in the sky,
Are also on the faces of people going by.
I see friends shaking hands, sayin', "How do you do?"
They're really sayin', "I love you."

I hear babies cryin'. I watch them grow.
They'll learn much more than I'll ever know
And I think to myself
What a wonderful world. [\[36\]](#)

"[I]f man does not pull himself together and assert himself . . . then things will go the way I describe [cyborg condition]." – Jacques Ellul [\[37\]](#)

Notes

1. Jacques Ellul, *The Humiliation of the Word* (Grand Rapids: Eerdmans, 1985), vii.
2. Aerosmith, *Eat the Rich*, "Livin' on the Edge," Sony, 1993.
3. The same is true of the game last night—I caught the highlights on ESPN—no difference really—it never happened! The Presidential debates, my Facebook page, 911, televangelism, the online (electric) church: all reproductions, all exist at the level of Santa Claus in a dreamy, surreal world not really real: hyperreal, really!
4. French social critic Herbert Marcuse (1898-1979) described dimensional reduction in human nature through the process of "mimesis" very similar to Baudrillard's conception of

simulacra (technological simulation) and Ellul's *la technique* (technological order). *Mimesis* eradicates all protest and opposition to the prevailing technological normalcy and silences all conscientious objections to the obvious or self-evident benefits (taken for granted) and blessings of technological progress. Like a frontal lobotomy when a section of the brain is removed that leaves all necessary automatic biological functions but removes the capacity to higher critical thinking, effectively silencing all differences, removing unique personality, individuality, and private space. The person is reduced to *one dimension* without the critical higher thought process or skills. *Mimesis* or mimicry transcends the adjustment phase to new technology known as *Future Shock* and brings the population into a direct and immediate relationship with the technological environment comparable to prehistoric and primitive cultures in their relationship to their natural milieus, climates and habitats. *Mimesis* replaces the traditional social environment with a technological one, an imitation or mimicry (*simulacra*). *Mimesis* removes the ability to feel alienation. Through reduction of the individual to a cell (atomization) in the social body, one never feels out of place, discomfort or disease, etc., because there is no longer any sense of individuality or difference. Anesthetizing the soul kills the pain of maladjustment to modernity leaving all feelings alike; joy is indistinguishable from hate. What do people feel after a lobotomy? They feel nothing, *comfortably numb* describes postmodern sentimentality.

Mimesis reduces the population to impulsive consumers. Material goods tie us to the system. "People recognize themselves in their commodities; they find their soul in their automobile, hi-fi set, split-level home, kitchen equipment. The very mechanism which ties the individual to his society has changed and social control is anchored in the new needs it has produced" (Herbert Marcuse, *One-Dimensional Man: Studies in Advanced Industrial Society* [Boston: Beacon Press, 1964],

9). People are in love with their technology. Consumer objects express passion and spirituality; “For example, cars are not simply neutral transportation objects but beloved expressions of soul.” Their self-image is locked in the kind of cars they drive, houses they live in: “From teen dreaming about a hot set of wheels to the self-imagined sophisticate, it is image that dictates our purchase . . . Most of us can’t imagine why anyone would buy a Hummer except to flaunt his financial ability to conspicuously consume Anyone who doubts the role of image needs only drive a rust bucket” (Lee Worth Bailey, *The Enchantments of Technology* [Chicago: University of Illinois Press, 2005], 7). “Image is everything!” Modern technological materialism has become the antithesis of the Christian way of life. Jesus said, “A man’s life does not consist in the abundance of his possessions” (Luke 12:15).

5. Orders of Simulacra:

Renaissance: Copies of Original

Industrial: Mass Production of Original

Hyperreality: Recreation of Original

Metastasis: Reverse effects of the hyperreal stage of simulacra proliferate, comparable to the spread of cancerous tissue. “Metastasis: the transfer of disease from one organ or part to another not directly connected with it” (Benjamin F. Miller and Claire Brackman Keane *Encyclopedia and Dictionary of Medicine and Nursing* [Philadelphia: Saunders, 1972]). Hyperreality “more real than real” purports to be a technological improvement on nature and “the signs and symbols,” (language) and institutions of traditional society, “better than real;” however, despite the apparent success of the hyperreal stage to deliver on its promise of improvement or “progress,” opposite results threaten social stability. Disneyland gets boring. Media technology isolates people rather than bringing them together. Social media turns out to

be anti-social. The automobile extends the commute to work. The computer increases the average work load and illiteracy, reduces jobs, depersonalizes individuals, kills privacy, creates universal surveillance, makes pornography and depictions of violence readily accessible to children. The cell phone is actually an excellent bomb detonating device. The computer atrophies human intelligence, logic, and thinking (creative and problem solving skills); through societal dependence on the computer people have forgotten how to think for themselves, and solve problems in any other way. The computer is not a simple tool used to organize knowledge, making it readily accessible, but as the centralizing technology through the digitalization process it recreates the world in its own image. Instead of happiness, the technological order is producing mass neurosis evident in the increase in depression, anxiety, attention deficit disorder, anorexia, bulimia, suicide and the mass inability to differentiate between reality and illusion.

Metastasis in the Orders of Simulacra according to Baudrillard also reflects Jacques Ellul's critical technological analysis in his assertion of the law of diminishing returns (law of reverse effects), *The Technological Bluff* (Grand Rapids: Eerdmans, 1990). Once the threshold of reversal in technological progress is reached, a saturation point, beyond which any further advance is completely unnecessary (and thus further progress despite mass optimism) will produce reverse or opposite effects than intended. The technological threshold is reached when new technology is imposed on the population which was unnecessary prior to its invention. When necessity for a new technology appears after its invention the threshold of beneficial effects inverts and harmful consequences, side effects—intended or not—rapidly multiply. There is no use or felt needs for much of the technology developed in the 20th century; TV, computer, jet engine, rockets, atom bomb, cell phone, innumerable widgets and gadgets, so use is found and need artificially created. People have no felt need for a

technology that does not yet exist. When useless technology is developed for its own sake (knowledge for knowledge's sake), rather than liberation it displaces *the good of mankind to the glory of God* as its object or *telos* and becomes an end in itself. The general population never asks for new technology; rather, technology is developed according to the technological imperative—whatever can be done should be done. Its beneficial use is unquestionably assumed and its use promoted through mass advertising and commercials (technological propaganda), and in short order a new necessity is added to the litany of technological requirements. As the list of “must haves” and “can't live without” grows in order to keep pace with the tempo of modern life, *users* voluntarily surrender their freedom for self-imposed technological necessity, blissfully unaware of any potential side-effects or untoward consequences.

The technological condition may be compared to generational slavery. Those born into servitude accept it as normal. The “happy slave” remains so through refusal to recognize his condition as “slave.” He embraces the world as he finds it with all his material needs and appetites satiated. There is no reason to protest, compounded by the fact that he has no ability to do so. A slave will always remain a slave until he recognizes that he is a slave. And without an intellectual horizon to lift him above his condition as a real possibility he will forever remain a slave. The first step to freedom for the slave is to recognize his condition of slavery and the possibility of a different way of life through self-determination, but that is impossible without a degree of abstract analysis and a measure of critical reason. Comparatively, technological determinism imposes its frightful inescapable necessity as a natural order without a meaningful future beyond the present way of life. In stripping society of critical ability to reason and negate that order from a metaphysical view, humanity has lost its only absolute reference point outside its own limited existence and above

its concrete situation from which to criticize technology and bring it under ethical control and moral limitation. God is greater than any technological idol made by human hands and provides an immovable ground from which humanity can reassert control, but mankind's Creator, Savior and Helper does him no good if he does not believe in his power or worse confuses it with the status quo, so that the apocalyptic power of God's confrontational judgment that leveled Babel (Genesis 11), Egypt (Exodus), Jerusalem and Rome is convoluted through blessing the technological utopia as *New Atlantis*.

The idolization of technology follows in the wake of modern science and rationalism but has a dehumanizing effect rather than amelioration. New technology brings new necessity and demands rather than freedom that exacts its price from humanity and nature, resulting in a much more complicated and dangerous world. The Apostle Paul stated that if we have food and shelter we should be content (1 Timothy 6:8). The accumulation of material things beyond meeting basic needs becomes a new burden, an added necessity not there before, resulting in bondage not freedom. People are owned by their possessions, must work harder for their technology and have been reduced to cogs in the wheel of progress rather than individuals with inherent value made in the image of God. From electricity, to phones, appliances to automobiles to computers, cell phones, *ad infinitum*, *ad nauseam* each new technology begins with the promises of convenience and improving modern life by making it faster, then through habitual use it becomes necessary, eventually addictive. From the basic material needs of food and shelter modern life has added dishwashers, microwave ovens, vacuum cleaners, TVs, cars, computers and most recently the cell phone as necessary for life in modern times. The devaluation of human life pays for the technology that is developed for the sake of expanding the frontiers of knowledge and exploration rather than creating the condition of freedom. Human freedom is lost with each new artificial technical necessity, resulting in an

increasingly nihilistic society; where power increases, choice is lost, resulting in increased meaninglessness. Nihilistic sentiment develops along with technological power; "*We know that power always destroys values and meaning . . . Where power augments indefinitely there is less and less meaning*" (Jacques Ellul, *Perspectives on Our Age* [New York: Seabury, 1981], 45). Technological necessity proliferates along with technological power over nature, reducing the scope of available choices, options or way of life that differs from those ensnared in the modern mechanized mainstream. What possibilities for a decent way of life are open to those who own neither car nor home, do not use a cell phone or computer, or possess at least a college degree? How *successful* will any corporate organization, church, school or business be if it does not use modern communication technology, radio, TV, computer or advertising techniques (propaganda) to promote its cause or product? As the world conforms itself to technological necessity, "you must get a cell phone and use a computer or risk getting left behind," it loses touch with the reality outside these devices, which is reduced and recreated online. For example, the traditional "church service" where believers join together in the unity of faith around the communion table as community and family becomes the embarrassing forgery of a lone spectator in front of a one dimensional monitor.

6. Paul Tillich, *The Spiritual Situation in Our Technical Society* (Macon, GA: University Press, 1988), 7. "Tillich describes the creation of a 'second nature' that results from science's attempt to control nature. Second nature in turn subjects man to the same domination he wishes to exert over nature, making himself subject to the very thing he had created to liberate him" (Lawrence J. Terlizzese, *Trajectory of the 21st Century: Essays on Theology and Technology* [Eugene, OR: Resource Publications, 2009, 155]).

7. Baudrillard's description of Simulacra is reminiscence of

Herbert Marcuse's depiction of "Mimesis" in *One-Dimensional Man*. Mimesis: the total identification of the individual with technological environment that mimics, apes or imitates historical social conditions, for example the city replaces nature, the automobile replaces the horse and carriage, TV replaces the family hearth, social media substitutes for personal relationships. [Muk-bang](#) replaces family members at the dinner table, traditional institutions that requires a personal presence, school and church, are rapidly transferring to the online medium. Likewise Jacques Ellul in *The Technological Society* describes technological advancement or "la technique" as creating a new environment, one that overlays both the natural and historical social environments with an urban/industrial/digital one.

8. Braden Allenby and Daniel Sarewitz, *The Techno-Human Condition* (Cambridge, MA: MIT Press, 2011), 1-13; *Humans Need Not Apply*, CGP Grey, 2014. The Transhuman Transformation is the ultimate in works salvation that lifts humanity to the next stage in evolutionary development through technological immortality or digitalized godhood that replaces all his physical corruptions with artificial replacements in the simulated heaven of a computer server. The computer does not dominate the will of humanity, enforcing universal peace through fear of annihilation as in the movie *Colossus: The Forbin Project* (1970), but assimilates humanity digitally and recreates it in its own image or highest ideal. The robots are not taking over, rather humanity is surrendering its will and decisions to the computer in tired resignation of life which has become too difficult by its own design.

9. "O LORD . . . What is man that you are mindful of him or the son of man that you visit him? For you have made him a little lower than the angels and crowned him with glory and honor" (Psalm 8:4, 5). "Angels," Elohim (God) in Psalm 8:5 refers to the divine visitation (theophany) mentioned in verse 4, the Angel of The LORD, i.e., Genesis 18; 19; 22:15;

32:24-32; Exodus 12:12, 13. Humanity was made highest in God's created order, below the creator and above the angelic host in the chain of being; "Don't you know you will judge angels?" (1 Corinthians 6:3). Angels are "ministering spirits sent to minister to the heirs of salvation" (Hebrews 1:14).

10. We are not saying one cannot reduce a complicated argument, book, movie etc., to its main points in outline form. We are saying that reduction does not replace the original, as somehow "better." A well-done outline does not alleviate the audience's responsibility to discover for itself, to pick up and read, but will inspire the audience to do so. Reading Calvin's *Institutes*, or Augustine's *City of God* or Thomas' *Summa Theologica* in PowerPoint or Cliff Notes is comparable to watching the Super Bowl in highlights instead of in its entirety from kickoff.

The proliferation of the digital camera as appendage to the cell phone has created the absurd phenomenon of reduction of reduction in the class room. As the PowerPoint slide has allowed professors to reduce all learning to three pertinent bullet points per slide, so students have followed their cue in picturing the text (taking a picture of the slide). Instead of suffering the laborious and tedious task of jotting down a simple outline in a note book, a helpful mnemonic practice, they take a picture of it, reducing the slide to digital acknowledgement and temporary storage before deletion, in order to make room for the pictures of tomorrow night's Harry Potter costume gala. Education isn't what it used to be, it just isn't!

11. Jean Baudrillard, *Simulacra and Simulation*, 166 ff.

12. Umberto Eco, *Travels in Hyperreality* (New York: HBJ, 1986), 43.

13. The projections of visual media may have their origins in "the desert of the real" as Baudrillard puts it, but what the

spectator sees on his screen, monitor or photograph should not be confused with "reality," but recreated reality mediated through an electronic medium. Marshall McLuhan's famous maxim for media analysis, "The medium is the message," undergirds this critical understanding of media technology. Any fan of live entertainment or sports knows immediately that TV broadcast of a live venue is an entirely different event than being there live behind home plate or on the fifty yard line. Preference for the surreal, sterilized, cartoonish, Apollonian images on TV and in film, rather than seeing the actual blots, blemishes and facial scars of people, perspiring athletes or hearing the crack of the bat is not the central moral issue, which does not come down to preferences, which are already conditioned by excessive media exposure at an early age. The failure to distinguish between reality and hyperreality constitutes the greatest dangers of the technological simulacra. When the general audience mistakes or confuses the hyperreal for reality, it allows itself to be deceived. When it believes what it sees on TV to be the literal unbiased truth, when in fact TV broadcasts a highly opinionated reconstructed version designed to transport its audience to a dream-like existence, the audience loses touch with reality and becomes immune to moral conscience, guilt and remorse for its actions—for example, war, ecological destruction, racism, etc. Group deception and delusion is rooted in personal inability to distinguish fact and fantasy, reality and illusion creating a strange self-hypnotic mass psychosis, easily persuaded by the predominate image projected into its thinking. "Brainwashing" or "mind control" are not the best choice of words, yet the terms still resonate for many people in describing the immediate effects of visual media on the audience. Electronic media bypass the rational process and speaks directly to the emotional or subconscious. Media effects the shaping of behavior through mass appeal of image, a reproduction of reality framed in drama and grounded in the erotic (sex appeal), moving the mass to do something (doing is being), buy, give, join, fight, etc., without the ballast of

critical reflection that will spare a people from rushing headlong into disaster. The irrational nature of the emotional appeal was the cause for Plato's expulsion of artists, musicians and dramatists from his fictional utopia *The Republic*. By allowing irrational appeal free reign, the public loses the appeal to critical reason as the measure of truth and the people become prone to deception and mass manipulation by a tyrant. Likewise Jesus urges all to pause in rational reflection, "to count the cost" like a king going to war or building a tower, before deciding to follow him (Luke 14:25-33).

The failure to discern the difference between reality and illusion in mass and social media is due to the intoxicating effects of hyperreality and the loss of critical reason in the public's media consumption. Electronic media numbs awareness to reality and allows escape to fantasy, as the universal *soma* (perfect drug from Huxley's fictional tale *Brave New World*). The condition of intoxication or "drunkardness" is one of self-induced madness, so the self-hypnotic condition of electronic media creates a similar neurosis. Karl Marx criticized religion as "the opiate of the people," accurate for the masses living in the industrial conditions of the 19th century, but obsolete as a description of the masses since the invention of television, which has replaced religion as the opiate of the people.

When image dominates a societal mindset and learning, emotional (sex) appeal moves the population in mass conformity or group behavior that ousts critical reason in herd mentality, subject to the whims of the image makers, propagandists, clergy, advertisers, etc. Ellul noted two orders of thinking determined by the means of learning: image and language. Image learning presents knowledge as a totality, each image is a world, complete and ready-made, certain of its own truthfulness, imparting its information instantly so long as we occupy the same space as the image. "The image conveys

to me information belonging to the category of evidence, which convinces me without any prior criticism" (Ellul, *The Humiliation of the Word*, 36). The image impresses itself on the character of the learner through unconscious acceptance that does not follow the logical sequence of language from start to finish, beginning to end but produces a haphazard collage of contradicting light totalities that appeal immediately to the moment (instant gratification). Image based learning produces a monolithic mentality or stereotypical thinking and prescribed behavior. Critical reason is never allowed to assert differences; extremes are normalized so that everything is accepted. This is very apparent in the current PC orthodoxy widely accepted in the Millennial generation, the first generation raised on the computer, that stupidly pontificates that any assertion of difference between sexes, races, religion, etc., etc., amounts to "hate-crime." For example, the gay lifestyle is no longer an acceptable alternative to monogamy but now has legal sanction as part of the mainstream establishment, despite its irrational and unnatural character. Islam is accepted as a religion of peace and compatible with Western democracies, yet no proof is ever offered to support this claim from the history of Islam. And the universal inanity of technological neutrality that provides the false sense of individual control over technological use, rapidly degenerates to technological necessity and inevitability of technological progress in actual daily behavior. Technology cannot be both neutral in its character under control of human choices and necessary or not under control of human choices, but autonomous (developing according to its own inner logic) at the same time; yet this inherent contradiction is completely ignored by all advocates of unlimited technological progress, Transhumanists, Futurists or simply all those who feel invested in the latest innovation: intellectuals, preachers, writers, professors, technogeeks, technognostics and technophiles. The smartest people in society appear completely oblivious to the contradiction of believing that technology is neutral in its

essence yet necessary in application, rationalizing its rapid acceleration, not because they are bad people but because their thinking is dominated by the image of unlimited progress and human perfectibility projected onto them from the computer, rather than a rational way of thinking growing out of the book and lecture. Computerization of all human life creates the cardinal value of speed for its own sake (faster is better), which necessarily leads to nonlinear or irrational (emotional) learning through images because it is easy, instant, and unconscious, producing stereotypical categories and behavior. The word expressed in speech and writing produces opposition to image domination of the computer because it is slower, linear and critical.

The second order of thinking Ellul says comes from language or the spoken and written word which must follow an arduous task of connecting letters, words, sentences and thoughts to each other through the process of speaking, reading and writing which follows the contours of logical sequence in step by step growth in knowledge and reason. Language learning does not begin with the self-asserting certainty of the totalitarian image, but develops progressively from "the unknown to uncertain and then from the uncertain to the known." (Ellul, *The Humiliation of the Word*, 36); dialectically including doubt, objection, protest or difference in the attainment of knowledge. Language is rational, self-aware or conscious, certain of what it knows but never exhaustive in its claim to absolute total knowledge, therefore it remains critical or open to differences of opinion and further learning; there is always something new to learn, discover and explore. Language allows for personal identity through individual choices that are free but never absolute or final beyond correction or criticism. In the total world imposed by the image, knowledge is absolute with nothing new possible, therefore it must be accepted uncritically.

Because language is rational it also produces the highest

standards in ethics and morality-rooted individual values and beliefs. Rationalism always produces the greatest moralism. In the ancient world the rational school of philosophy (Stoicism) based on their belief in logos (universal reason) was also the most ethical in their practice of universal peace, and equality. In world religions Buddhism stands as the most rational in its beliefs of simple universal truths leading to practical moral behavior (Four Noble Truths: life is suffering, suffering is caused by selfish desire, suffering is alleviated by limiting selfish desire, curb selfish desire through the practical application of the Eightfold Path). Modern Rationalism culminating in the 19th century was also one of the profoundest in moral character in all strata of society, education, politics, economics and religion. The ethic of love rooted in the Fatherhood of God and Brotherhood of Man was considered the essence of Christianity in the 19th century (Harnack, *What is Christianity?*). The Jewish rabbinical approach to learning through language is legendary for its rationalism and strict legalism as well as its Islamic counterpart in the Muslim devotion to the Koran, Sharia Law and iconoclasm.

In the second order of language, ethics are grounded in personal choices as a product of rational criticism, which allows for meaningful differences of opinion and the free creation of values. In the first order of image learning, all views are standard and all behavior an expression of group conformity. "The image tends . . . to produce conformity, to make us join a collective tendency" (Ellul, *The Humiliation of the Word*, 35). Thus the two orders of thinking are opposed to each other. The first order in totalitarian fashion is in the process of eradicating the second order through purging critical reason from the mindset of the population like a mass spiritual lobotomy that removes part of the brain that contains the higher function of reason and abstract thought process. The image overwhelms the word through reduction and then removal and remaps the collective mind to think

accordingly, freedom of thought is left open as possibility only because most people cannot think for themselves but are programmed through media saturation. Note the drift in social media from glorified email responses on Facebook to the forced shrinkage of the word to 120 characters on Twitter, to finally pictures only on Tumblr, and Instagram. The second order in critical toleration of the image does not want to eradicate it, but put image in its place, not as an expression of truth or reality but a simple illustration in service of the word and higher critical function of human nature through which humanity creates its self-definition, limits and significance. The second order of language thinking does not separate rational discourse in philosophy from a dramatic presentation in literature, or the arts, film or TV, etc. The Twentieth Century French Existentialists demonstrated the compatibility of rational discourse through abstract prose and exposition and the concrete embodiment of their ideas in dramatic forms such as plays, novels and movie illustrations. Jean Paul Sartre, Albert Camus, Gabriel Marcel wrote the most penetrating philosophical analysis of the modern condition of alienation as well as the greatest poetic description of modern despair and hope, for example, compare Sartre's tome Being and Nothingness with his play "No Exit" or Camus' essay on The Myth of Sisyphus to his novel The Stranger. Theologian Paul Tillich argued likewise that art serves as the spiritual barometer of culture. Through rational analysis of art, literature and drama the church will gain a better read on the spiritual climate of the society it hopes to evangelize and better tailor its message of the gospel to the concrete situation expressed through peoples felt needs. Even Jacques Ellul the leading social critic of visual media and advocate of word over image adopted a similar method of point and counter point as the existentialists by pairing the most penetrating sociological analysis of technology, raising the question how to limit autonomous technique and answering it with an allegorical interpretative method of the biblical text under the respectable umbrella of Barthian theology through

his ethic of limits or nonpower. Compare The Technological Society to his biblical exposition of Genesis in The Meaning of the City.

14. On Facebook, friends can number into the thousands. New friends are just a click away; you don't even have to know them or even meet them to be friends. Aristotle said that friends are the people we eat with every day. Simple enough to grasp, but what does an ancient Greek philosopher know compared to the moguls of social media?

15. Baudrillard and Eco validated Gasset's thesis in *Revolt of the Masses* that science and technology sows the seeds of its own demise by elevating the mass of humanity through its values of discovery, invention and discipline, yet the mass revolt against those values that brought them to dominance. This is the same basic thesis that argues we are the victims of our own success as applied to capitalism and the accumulation of wealth. One generation works to achieve a level of wealth that the next generation inherits with all the benefits of wealth but none of the sacrifice of the previous generation. Therefore it squanders it not knowing the value of wealth not having to work for it and being raised in privilege.

Gay Marriage is another recent example of simulacra. The hyperreal replaces the real with a copy made in our own image. Contemporary society is under a spell, thinking it can remake the institution of marriage founded in the Bible between one man and one woman (Genesis 2 and Matthew 19) to include its opposite or whatever the courts deem acceptable; eventually the courts will accept the union of people and their pets. Already the Disney Corporation has changed the name of The Family Channel to Free Form, an ominous precursor to the dissolution of meaning to the sacred word family in American popular culture and its reprobate legal system.

16. Reality and Truth are not coequal or synonymous terms, but

signify different metaphysical orders. Ellul noted that the unity of reality and truth expresses "the unity of being" (Ellul, *Humiliation of the Word*, 96), or the right relationship between the Creator and his creation. Truth belongs to God's essence alone, as the One Eternal Absolute. Reality expresses the multifaceted finite human concrete situation. When our reality aligns with God's truth we experience the peace of redemption that passes understanding, harmonious being. Reality is the realm of sight that leads us away from the truth of the invisible God who cannot be seen and is found only through the word (speech, talk, conversation, discourse, lecture, song). The visible is the realm of false idols incarnated as very real visible powers (gods): Money, the State, and Technology (Ellul, *The Humiliation of the Word*, 94, 95). The order of reality is the order of human life which Nietzsche argued may include error. "Life no argument—We have fixed up a world for ourselves in which we can live—assuming bodies, lines, planes, causes and effects, motion and rest, form and content: without these articles of faith, nobody now would endure life. But that does not mean that they have been proved. Life is no argument; the conditions of life could include error." (Friedrich Nietzsche, *The Gay Science* (New York: Vintage, 1974), 177 [121]). Iconoclasm then becomes the mission of the church as it proclaims the gospel and demolishes spiritual strong holds which is the battle for the mind "destroying speculations . . . raised up against the knowledge of God" (2 Corinthians 10:3-6); "iconoclasm is always essential to the degree that other gods and other representations are manifested . . . Today reality triumphs, has swept everything away and monopolizes all our energy and projects. The image is everywhere, but now we bestow dignity, authenticity and spiritual truth on it. We enclose within the image everything that belongs to the order of truth" (Ellul, *The Humiliation of the Word*, 94, 95).

17. In terms of an ethic of technology biblical truth

translates as limit before use or law before license. For example, When adults set time limits on media use for their children anywhere from twenty minutes to an hour of screen time be it TV, computer or cell phone, they are practicing an ethic of technology.

Social critic Jacques Ellul stated; "The 'yes' makes no sense unless there is also the 'no' . . . the no comes first, death before resurrection. If the 'No!' is not lived in its reality the yes is a nice pleasantry, a comfort one adds to one's material comfort, and as Barth has conclusively shown the No is included in the gospel" Quoted in Lawrence J. Terlizese, *Hope in the Thought of Jacques Ellul* (Cascade: Eugene, OR, 2005), 127; Jacques Ellul, *False Presence of the Kingdom*, 25.

18. Original Divine Command: "From any tree of the Garden you may eat freely, but from the tree of the knowledge of good and evil you shall not eat, for in the day that you eat from it you shall surely die" (Genesis 2:16, 17 NASB).

Satanic Recreation of the original command: "Indeed, has God said, 'You shall not eat from any tree of the garden'"(Genesis 3:1 NASB).

Imperative turns into question through a simple shift in voice emphasis, "Don't eat!" to "Don't eat?", inciting disobedience instead of obedience as its effect, confusing the knowledge of good and evil.

19. The hyperreal replaces the real with a copy made in our own image. A copy is never greater than the original and to believe that a glorified reduction, a snap shot somehow surpasses the original shows just how far along the popular delusion has advanced. Simulacra is portent to antichrist: "The one whose coming is in accord with the activity of Satan, with all power and signs and false wonders, and with all the deception of wickedness for those who perish, because they did not receive the love of the truth so as to be saved. For this

reason God will send upon them a deluding influence so that they will believe what is false in order that they all may be judged who did not believe the truth, but took pleasure in wickedness”(2 Thessalonians 2:9-12). Mass media qualifies as “a deluding influence”: remaking the image of God in the image of an image. “Language is unobtrusive in that it never asserts itself on its own. When it [mass media] uses a loudspeaker and crushes others with its powerful equipment, when the television set speaks, the word is no longer involved, since no dialogue is possible. What we have in these cases is machines that use language as a way of asserting themselves. Their power is magnified, but language is reduced to a useless series of sounds which inspires only reflexes and animal instincts” (Jacques Ellul, *The Humiliation of the Word*, 23).

The first commandment teaches that “You shall not make any graven images . . . you shall not bow down to them nor worship them (Exodus 20:4, 5). The construction of image is always a reduction from an original and imperfectly copies what it claims to represent; presenting a false image of God, an idol. The idol transforms its worshipers into its own image. All those who worship idols become like them (Psalms 115).

By worshiping the creature humanity dehumanizes itself by bowing down to the created order lower than itself. The prohibition against worshiping idols is meant to spare God’s people from corrupting God’s glory by reducing the invisible Creator to the visible creation and enslaving themselves to the works of their own hands. Idolatry exchanges “the glory of the incorruptible God for an image in the form of corruptible man . . .” (Romans 1:23). The idol is the construction of man, representing his ideal of God (image) in his own image, which in turn recreates man as slave in the image of the idol. Here we see perfectly in the biblical model of idolatry, the same Transhumanists enterprise of constructing an ideal image (cyborg) in the image (mankind) of an image (the computer), leading not to human ascendance or godhood but dehumanization

or slavery by placing humanity lower than its own creation (the cyborg condition). Man builds an idol he thinks represents God which in truth is a reduction of the glory of God into the image of the creature and lowers himself through worship of the false image of God making himself a slave to a thing that appears real but really does not exist outside of humanity's faith in its own self-projection.

The first commandment prohibits "graven images" the invisible God cannot be seen in the works of human hands (Acts 17). All images of God are an affront to his holiness and danger to his children. Idols reduce God to the false image which then further reduces worshipers.

Iconoclasm is the central liberation mission of the church in its declaration of the gospel.

"No one can see God and live" (Exodus 33:20). "Images are incapable of expressing anything about God. In daily life as well, the word remains the expression God Chooses. Images are in a completely different domain—the domain that is not God and can never become God on any grounds" (Ellul, *The Humiliation of the Word*, 91).

20. Ellul, *The Humiliation of the Word*, 96.

21. God's revelation comes only through the spoken word received by faith never through sight, which must remain subservient to the oral, spoken invisible message. "Faith comes from hearing and hearing by the word of Christ" (Romans 10:17). "We look not at the things that are seen, but at the things that are not seen; for the things that are seen are temporal, but the things that are not seen are eternal" (2 Corinthians 4:18). "We walk by faith, not by sight (2 Corinthians 5:7). "Faith is the assurance of things hoped for, conviction of things not seen . . . By faith we understand . . . Without faith it is impossible to please God" (Hebrews 11). "The righteousness of God is revealed from faith to faith, as

it is written; 'The righteous live by faith'" (Romans 1:17). "Set your mind on things above [the invisible Christ, "the way, the truth and the life"], not on the things that are on earth [the visible, material, tangible, concrete reality of the present world]." "Fixing our eyes on Jesus the author and perfecter of faith" (Hebrews 12:2). The aural, auditory sense or put simply the ear is the organ of perception and faith never the eyes. Sight brings only doubt; despite popular opinion seeing is not believing, but unbelief. The desire to see the truth is rooted in doubt and unbelief; "Unless I see . . ." doubting Thomas said, ". . . I will not believe" (John 20:25). "Blessed are they who have not seen and yet believe" (John 20:29). "Sight played an enormous role in the Fall and caused all of humanity and language to swing to its side. Under these circumstances, it is understandable that the Bible so often relates sight to sin. Sight is seen as the source of sin, and the eye becomes the link between reality and the flesh. The eye is seen as the focusing lens of the body (but only of the body). The Bible speaks of the lust of the eye and of the eye as the source and means of coveting. Now we know that covetousness is the crux of the whole affair, since sin always depends on it. "You shall not covet" (Ex. 20: 17) is the last of the commandments because it summarizes everything—all the other sins" (Ellul, *The Humiliation of the Word*, 100, 101). Because Eve looked upon the fruit, she lusted after wisdom, the knowledge of good and evil, a possession she desired but did not work for or earn that did not belong to her. "Eve coveted equality with God . . . She coveted autonomy of decision" (Ellul, *The Humiliation of the Word*, 101). Lust is born from sight of the material possession. The Tenth Commandment lists a prohibition of desire on what does not belong to us but is rightfully our neighbor's: his wife, house, domesticated animals and servants, all must first be seen before desired. Today we call these possessions status symbols, spouse, house, cars, money, etc., etc., all the objects of consumer desire that dominate our visual horizon through advertising, commercials and the all-pervasive world

of image, which fills us with materialistic greed.

22. Technological convergence brings TV, computer, cell phone, video game (telecommunications) together as one medium. Professor of Philosophy Andy Clark notes that the cell phone is the gateway to the cyborg condition: "The cell phone is, indeed, a prime, if entry-level cyborg technology" (Andy Clark, *Natural-Born Cyborgs: Minds, Technologies, and the Future of Human Intelligence* [New York: Oxford University Press, 2003], 27). The cell phone has evolved from a clumsy mobile phone into a sleek microcomputer that puts the full resources of the internet at the fingertips of the user.

The computer medium heralds the absolute closing of the human mind and cultural diversity by subverting all ends to its means it creates the condition necessary for total domination of the human spirit. All total systems subvert ends to means in their revolutionary beginning, such as the Napoleonic empire, fascism and communism. "By any means necessary," or "for the good of the cause" becomes the motto of the radical on the road to totalitarian paradise (Serfdom). The computer coopts all nontechnical areas; in the form of "technical aid and support" subverting their ends by overbearing means. As the absolute single point of convergence for all humanity the computer fixes its own organizational categories on every person, discipline (field) or organization that uses it. The passage of admission to digital utopia is technical conformity (surrender). All nontech people and fields must soon learn the ways of the computer, if they expect to survive in the new universal cyber regime (the technological order). Liberal Arts, for instance no longer exists as a separate track or discipline in a dialectical counter balance to Science. Beholden to the computer for success it has sold its spiritual birth right as moral conscience through cultural critic or prophet to the rational establishment. By way of apt analogy, in the past when churches received State support through official recognition as the established religion they became

in effect the court prophets, chaplain's to the king. They "sold out" to the powers that be, forfeiting their divisive voice. Dissent is never allowed in any total system by definition, otherwise it would not be total. Those who profit from the system are not in a position to disagree with its direction without mortal endangerment. The old maxim "never bite the hand that feeds you" was rigorously applied by the official religions in the past. Likewise, rarely is a critical voice heard today through the prodigious production of liberal arts in media, except for science fiction film. The old dichotomy of art and technology embodied in the Intellectual verses the City model has resolved itself in the computer. Chilton Williamson, Jr. noted the subtle reeducation the older generation of writers must endure in order to practice their craft using the computer. "Writing ought to be, technically speaking, among the simplest and natural of human actions. The computer makes it one of the most complex and unnatural ones. It is nothing less than a crime against humanity, and against art, that a writer should be required to learn how to master a machine of any kind whatsoever in order to write a single sentence. But no writer today can succeed in his craft if he does not learn to become a more or less skillful machine operator first." ("Digital Enthusiasm" in *Chronicles* [June 2014, 38.6], 33). The end or goal of writing (to be read by others) has been subverted by means of the computer (Subversion: to corrupt an alien system for different ends from within, for example; primitive Christianity was subverted by the political forces of the later Roman Empire, creating Christendom). Computer subversion of humanity has been repeated simultaneously with writing since the digital revolution in the 1990's.

By giving children at the earliest age possible a computer to play with and master, turning work into play, the technological oligarchy has guaranteed that they will grow to become computer technicians in some degree and has successfully circumvented the nasty reeducation process

necessary to all revolutions in the past. As the product of the digital revolution the Millennial generation has inherited the onerous responsibility of being the first generation raised on the computer as their defining characteristic. They are the first non-national generation, identifiable by digital acuity, video game addiction and the cell phone, rather than by race, gender or creed. The world that they create will ultimately prove their humanity or not.

One machine that can do everything controls everyone, even now as I write an unsolicited advertisement appears on my computer screen telling me that "Technical support is designed to monitor your system for issues." Positively Orwellian! No greater insidious subtlety to seduce the human spirit than the emerging global technological order has appeared since the Tower of Babel!

All total systems are inherently corrupt and eventually self-destruct.

23. Philosopher Michael Foucault builds on Jeremy Bentham's purposed panoptic system theory by arguing that Bentham's proposed universal prison surveillance system that kept prisoners under constant watch has been extended to contemporary society through media saturation. Law Professor Jerry Rosen argues that through social media society has entered a condition he describes as "Omnioptron" where we are all watching each other (*The Naked Crowd*); Ellul, *The Humiliation of the Word*, 152; Reg Whitaker *The End of Privacy: How Total Surveillance Is Becoming a Reality* (New York: New Press, 1999).

24. Hyperreal communities, churches, schools, dating sites do not allow for individual charisma, personal persona, flamboyancy, speech impediments, warts, blemishes, ugliness, beauty, intelligence, everything thing that makes an individual unique disappears behind the brilliance of a cartoon reality.

The modern socialization process once reserved for family, church and community in traditional society has been usurped by media and the State. Socialization is the rather sensitive and all important process through which values are imprinted on youth. Socialization is everything! Society receives its understanding of right and wrong, good and evil in a word normalcy through socialization. In the mission of the church socialization is equal to evangelism. If the church successfully evangelizes a society, converting everyone to the Christian faith, it must then pass those values to the next generation, if it fails to do so it must then start the whole evangelization process over. Regrettably, the American church is learning this lesson the hard way, after surrendering the socialization process of Christian youth to media, and public schools. The most media saturated and technologically adapt generation in human history is rapidly becoming the most nihilistic since late antiquity.

Media transmits collective values directly to the social body by passing the individual consciousness. Mass media transmits its own values of consumption and materialism that traditional family, church and community as social agents cannot compete with according to social critic Herbert Marcuse. Media transmits the values of "efficiency, dream, and romance." "With this education, the family can no longer compete." The father's authority is the first traditional value to fall. (Herbert Marcuse, *Eros and Civilization: A Philosophical Inquiry to Freud* (New York: Vintage 1955, 88).

25. John L. Locke, *The De-Voicing of Society: Why We Don't Talk to Each Other Anymore* (New York: Simon & Schuster, 1998), 19.

26. The only reason people give as to why they use media technology is because of its convenience, it is easier to send an email or text than write a letter and use a postage stamp. However, ease of use and convenience shows lack of understanding as well as accountability. "I use it because it

is easy" is hardly a thought-out moral defense for one's action! And here is where the trap lies for all of us. The history of technology demonstrates that convenient and pervasive use over time slowly turns into necessity. What was once done because it was so easy to do, eventually must be done. TV, computer and most recently the cell phone, these technologies never appeared as necessities but convenience, but now they are irresistible necessities. Convenience turns into necessity because it was so easy to send a text, or email, we have forgotten how to communicate in any other way, or refuse to relearn those old ways. Convenience dulls the spirit and numbs the mind, producing stupidity and apathy by removing all other practices from our intellectual horizon. Beware of anything thing that looks so easy, it is nothing more than a hook to necessity. The old saying, "If it sounds too good to be true it probably is," applies to technology as well. "Whatever appears to make your life easier right now in the long run may make it more difficult." Convenience turns into habit, habit turns into need, need turns into addiction.

27. The friendships forged in traditional institutions create the social support network for an individual throughout his professional career. As an online professor I did not know how to write a letter of recommendation for a student I have never met in person. Education has become so dominated by technical learning, all students in essence are studying to be engineers in their field whether teachers, medical practitioners, social workers etc.; they are taught efficient methods as administrators or managers of large groups of people.

28. Martin Heidegger, *Being and Time* (San Francisco: Harper and Row, 1962).

29. Quoted in Locke, *The De-Voicing of Society*, 43.

30. Ellul, *The Humiliation of the Word*, 122. "Even more, it [the camera] keeps me from proceeding to cultural assimilation, because these two steps can be taken only in a

state of availability and lack of preoccupation with other matters – a state of “being there.” (Ibid).

31. In line with Baudrillard thesis on the orders of simulacra, popular cell phone use, namely texting, demonstrates regressive effects of the latter stage of simulacra: metastasis or reversal of effects. It is quite common to see people texting and even preferring texting to any other mode of communication, especially phone calling, when it is obviously easier to call and talk than it is to text, time wise and in terms of context and amount of content necessary for successful conversation, yet texting is preferred because of its impersonal nature; people prefer the harder task of texting because it is impersonal, however, impersonal communication is less effective to the point of communication.

32. *Radio Times* (January 2016). Hawking said bluntly, “I think the development of full artificial intelligence could spell the end of the human race.” Quoted in “Rise of the Machines” in the *Dallas Morning News* Sunday, February 14, 2016, 1P. Recognizing and controlling the dangers of progress is a call for limits and boundaries to technological acceleration possible only through negation.

33. The fear of living without the necessity that controls us reveals the modern condition of technological determinism. In confronting determinism we must appeal to “the individual’s sense of responsibility . . . the first act of freedom, is to become aware of the necessity” (Ellul, *The Technological Society*, xxxiii).

Necessity (whatever we fear we cannot live without) is always a limitation placed on human nature, such as the basic biological needs to eat and sleep. Necessity limits freedom and therefore power and ability. Death is also a necessity, without which new life and growth cannot take place. However, death is the last enemy, which is defeated finally in the

resurrection of the saints (1 Corinthians 15:50-58). To believe as Transhumanists do that death can be overcome through technological enhancement can only result in abomination. Professor of Computer Science Matthew Dickerson prophetically asks, what if the Transhuman “transformation is based on something that is not true? What will we be transformed into?” (*The Mind and the Machine: What it Means to be Human and Why it Matters*, Grand Rapids, MI: Brazos Press, 2011), xiv.

34. A campaign to “JUST SAY NO!” to further technological advance that threatens human existence, such as artificial intelligence, must be a collective effort for the entire human race, but begins with our own personal individual choices in limiting technological use, i.e. TV, computer, cell phone, and automobiles, and set boundaries to consumption on all consumer products. Resist the digitalization of traditional life through technological transfer of community to the online medium. Despite the convenience of a total online education it is unconscionable and detrimental if online students never encounter a real college classroom, talk face to face with a professor and argue in group discussion with peers. Likewise, the church cannot remain the Body of Christ by shunting its responsibilities to parishioners, new members and seekers by declaring online and televised services equal to a live one. “Do not forsake the assembly of yourselves together” (Hebrews 10:25) prohibits a total digitalization of Christian worship and community. Christ said, “Where two or three have gathered in my name, I am there in the midst of them” (Matthew 18:20). The bodily presence necessary for community conveyed in these passages must not be allegorized by techno-gnostics who equate physical isolation in front of an electric screen to be “just as good” as being there.

35. We are enslaved to what we fear we cannot live without whether it be money, sex or technology. The rich young ruler did not follow Christ because he could not imagine life

without his wealth, the security, comfort and power it bestowed was greater than the promise of eternal life through Jesus Christ. “Children, how hard it is for those who trust in riches to enter the kingdom of God” (Mark 10:24). The disciples were in shock at Jesus’ utter intolerance to devotion to anything other than God: “You cannot serve God and money [technology, power]” (Matthew 6:24). Knowing their own attachment to wealth, they despaired, “Who then can be saved?” (Mark 10:26). It appears impossible to give up what we fear we cannot live without. “What shall we eat? What shall we drink? What shall we wear?” (Matthew 6:25); the perennial anxiety and pursuit of the faithless and fearful enslaved to material (bodily) necessity; “Is not life more than food and the body more than clothing [enhancement]?” (Matthew 6:25). “For after all these things the Gentiles [unregenerate] seek” (Matthew 6:32). “But Lord Jesus, we cannot live without cell phones and computers, any more than we can live without money! Get real, be reasonable—Lord you are asking the impossible of mortal sinners.” And Jesus agrees, “With people it is impossible, but not with God; for all things are possible with God” (Mark 10:27).

The Rise of the Nones –

Reaching the Lost in Today's America

*Steve Cable addresses James White's book *The Rise of the Nones* in view of Probe's research about the church.*

Probe Ministries is committed to updating you on the status of Christianity in America. In this article, we consider James White's book, *The Rise of the Nones, Understanding and Reaching the Religiously Unaffiliated*.^{1} His book addresses a critical topic since the fastest-growing religious group of our time is those who check "none" or "none of the above" on religious survey questions.

Let's begin by reviewing some observations about Christianity in America.

From the 1930's^{2} into the early 1990's the percentage of *nones* in America^{3} was less than 8%. But by 2012, the number had grown to 20% of all adults and appears to be increasing. Even more alarming, among those between the ages of 18 and 30 the percentage grew by a factor of three, from 11% in 1990 to nearly 32% in 2012.

Another study reported Protestantism is no longer the majority in the U.S., dropping from 66% in the 1960's down to 48% in 2012.

The *nones* tend to consider themselves to be liberal or moderate politically, in favor of abortion and same-sex marriage being legal, and seldom if ever attend religious services. For the most part, they are not atheists and are not necessarily hostile toward religious institutions. However, among those who believe in "nothing in particular," 88% are not even looking for a specific faith or religion.

One report concludes, “The challenge to Christianity . . . does not come from other religions, but from a rejection of all forms of organized religions. They’re not thinking about religion and rejecting it; they are not thinking about it at all.”^{4} In fact, the 2011 Baylor survey found that 44% of Americans said they spend no time seeking “eternal wisdom,” and a Lifeway survey found that nearly half of Americans said they never wonder whether they will go to heaven.

As White notes, these changes in attitude come in the wake of a second major attack on traditional Christian beliefs. The first set of attacks consisted of:

- 1. Copernicus attacking the existence of God*
- 2. Darwin attacking God’s involvement in creation, and*
- 3. Freud attacking our very concept of a creator God.*

The second storm of attacks focuses on perceptions of how Christians think in three important areas.

- 1. An over entanglement with politics linked to anti-gay, sexual conservatism, and abrasiveness*
- 2. Hateful aggression that has the church talking in ways that have stolen God’s reputation, and*
- 3. An obsession with greed seen in televangelist transgressions and mega-pastor materialism, causing distrust of the church.*

These perceptions, whether true or not, create an environment where there is no benefit in the public mind to self-identifying with a Christian religious denomination.

Living in a Post-Christian America

A 2013 Barna study^{5} shows America rapidly moving into a post-Christian status. Their survey-based study came to this conclusion: over 48% of young adults are post-Christian, and “The influence of post-Christian trends is likely to increase and is a significant factor among today’s youngest Americans.”^{6}

White suggests this trend is the result of “three deep and fast-moving cultural currents: secularization, privatization, and pluralization.”^{7}

Secularization

Secularization teaches the secular world is reality and our thoughts about the spiritual world are fantasy. White states: “We seem quite content to accept the idea of faith being privately engaging but culturally irrelevant.”^{8} In a society which is not affirming of public religious faith, it is much more difficult to hold a vibrant, personal faith.

Privatization

Privatization creates a chasm between the public and private spheres of life, trivializing Christian faith to the realm of opinion. Nancy Pearcey saw this, saying, “The most pervasive thought pattern of our times is the two-realm view of truth.”^{9} In it, the first and public realm is secular truth that states, “Humans are machines.” The second and private realm of spirituality states, “Moral and humane ideals have no basis in truth, as defined by scientific naturalism. But we affirm them anyway.”^{10}

Pluralization

Pluralization tells us all religions are equal in their lack of ultimate truth and their ability to deliver eternity. Rather speaking the truth of Christ, our post-modern ethic

tells us we can each have our own truth. As reported in our book, *Cultural Captives*[{11}](#), about 70% of evangelical, emerging adults

are pluralists. Pluralism results in making your own suit out of patches of different fabrics and patterns and expecting everyone else to act as if it were seamless.

White sums up today's situation this way: "They forgot that their God was . . . radically other than man . . . They committed religion functionally to making the world better in human terms and intellectually to modes of knowing God fitted only for understanding this world."[{12}](#)

This combination of secularization, privatization and pluralization has led to a mishmash of "bad religion" overtaking much of mainstream Christianity. The underlying basis of the belief systems of *nones* is that there is a lot of truth to go around. In this post-modern world, it is considered futile to search for absolute truth. Instead, we create our own truth from the facts at hand and as necessary despite the facts. Of course, this creates the false (yet seemingly desirable) attribute that neither we, nor anyone else, have to recognize we are sinners anymore. With no wrong, we feel no need for the ultimate source of truth, namely God.

If You Build It, They Won't Come

We've been considering the beliefs and thinking of the *nones*. Can we reach them with the gospel, causing them to genuinely consider the case for Christ?

We are not going to reach them by doing more of the same. Statistics indicate that we are not doing a good job of reaching the *nones*.

As James White notes, "The very people who say they want unchurched people to . . . find Jesus resist the most basic . . . issues related to building a relationship with someone

apart from Christ, . . . and inviting them to an open, winsome, and compelling front door so they can come and see.”[{13}](#)

Paul had to change his approach when addressing Greeks in Athens. In the same way, we need to understand how to speak to the culture we want to penetrate.

In the 1960’s, a non-believer was likely to have a working knowledge of Christianity. They needed to personally respond to the offer of salvation, not just intellectually agree to its validity. This situation made revivals and door-to-door visitation excellent tools to reach lost people.

Today, we face a different dynamic among the *nones*. “The goal is not simply knowing how to articulate the means of coming to Christ; it is learning how to facilitate and enable the person to progress from [little knowledge of Christ], to where he or she is able to even consider accepting Christ.”[{14}](#)

The rise of the *nones* calls for a new strategy for effectiveness. Today, cause should be the leading edge of our connection with many of the *nones*, in terms of both arresting their attention and enlisting their participation.

Up through the 1980s, many unchurched would respond for salvation and then be incorporated into the church and there become drawn to Christian causes. From 1990 through the 2000s, unchurched people most often needed to experience fellowship in the body before they were ready to respond to the gospel. Today, we have *nones* who are first attracted to the causes addressed by Christians. Becoming involved in those causes, they are attracted to the community of believers and gradually they become ready to respond to the gospel.

We need to be aware of how these can be used to offer the good news in a way that can penetrate through the cultural fog. White puts it this way, “Even if it takes a while to get to talking about Christ, (our church members) get there. And they

do it with integrity and . . . credibility. . . Later I've seen those *nones* enfolded into our community and before long . . . the waters of baptism."[{15}](#)

Relating to *nones* may be outside your comfort zone, but God has called us to step out to share His love.

Combining Grace and Truth in a Christian Mind

Every day we are on mission to the unchurched around us. James White suggests ways we can communicate in a way that the *nones* can understand.

We need to take to heart the three primary tasks of any missionary to an unfamiliar culture. First, learn how to communicate with the people we are trying to reach. Second, become sensitized to the new culture to operate effectively within it. Third, "translate the gospel into its own cultural context so that it can be heard, understood, and appropriated."[{16}](#)

The growth of the *nones* comes largely from Mainline Protestants and Catholics, right in the squishy middle where there is little emphasis on the truth of God's word. How can we confront them with truth in a loving way?

The gospel of John tells us, "Grace and truth came through Jesus Christ."[{17}](#) Jesus brought the free gift of grace grounded in eternal truth. As we translate the gospel in today's cultural context for the *nones*, this combination needs to shine through our message. What does it look like to balance grace and truth?

- If we are communicating no grace and no truth, we are following the example of Hinduism.

- If we are high on grace – but lacking in truth, we give license to virtually any lifestyle and perspective, affirming today’s new definition of tolerance.
- On the other hand, “truth without grace: this is the worst of legalism . . . – what many *nones* believe to be the hallmark of the Christian faith.” The real representative of dogma without grace is Islam.” In a survey among 750 Muslims who had converted to Christianity, they said that as Muslims, they could never be certain of their forgiveness and salvation as Christians can.
- Grace is the distinctive message of Christianity but never remove it from the truth of the high cost Christ paid. Jesus challenged the religious thought of the day with the truth of God’s standard. Recognizing we cannot achieve that standard, we are run to the grace of God by faith.

To communicate the truth, we need to respond to the new questions *nones* are asking of any faith. As White points out, “I do not encounter very many people who ask questions that classical apologetics trained us to answer . . . Instead, the new questions have to do with significance and meaning.” Questions such as, “So, what?” and “Is this God of yours really that good?”

We need to be prepared to “give a defense for the hope that is within us” in ways that the *nones* around us can resonate with, such as described in our article *The Apologetics of Peter* on our website.

Opening the Front Door to *Nones*

The *nones* desperately need the truth of Jesus, yet it is a challenge to effectively reach them. “Reaching out to a group of people who have given up on the church, . . . we must renew our own commitment to the very thing they have rejected – the church.”[\[18\]](#) The fact that some in today’s culture have

problems with today's church does not mean that God intends to abandon it.

The church needs to grasp its mandate "to engage in the process of 'counter-secularization'. . . There are often disparaging quips made about organized religion, but there was nothing disorganized about the biblical model."[{19}](#) We all have a role to play in making our church a force for the gospel in our community.

It must be clear to those outside that we approach our task with civility and unity. Our individual actions are not sufficient to bring down the domain of darkness. Jesus told us that if those who encounter the church can sense the unity holding us together they will be drawn to its message.

How will the *nones* come into contact with the unity of Christ? It will most likely be through interaction with a church acting as the church. As White points out, "If the church has a "front door," and it clearly does, why shouldn't it be . . . strategically developed for optimal impact for . . . all *nones* who may venture inside?"[{20}](#) Surveys indicate that 82 percent of unchurched people would come to church this weekend if they were invited by a friend.

One way we have a chance to interact with *nones* is when they expose their children to a church experience. Children's ministry is not something to occupy our children while we have church, but is instead a key part of our outreach to the lost *nones* in our community. "What you do with their children could be a deal breaker."

In today's culture, we cannot overemphasize the deep need for visual communication. Almost everyone is attuned to visually receiving information and meaning. By incorporating visual arts in our church mainstream, "it has a way of sneaking past the defenses of the heart. And *nones* need a lot snuck past

them.”{21}

We need to keep evangelism at the forefront. “This is no time to wave the flag of social ministry and justice issues so single-mindedly in the name of cultural acceptance and the hip factor that it becomes our collective substitute for the clear articulation of the gospel.”{22}

White clearly states our goal, “Our only hope and the heart of the Great Commission, is to stem the tide by turning the nones into wons.”{23}
