Why Empires Fall

Kerby Anderson looks at six insightful books and videos exploring alarming parallels between the U.S. and failed empires of history.

Collapse of Empires

If you study world history, you realize that empires come and go. In this article I want to look at what has happened to some of the major empires because we can also learn about what is happening today in our country. I will be quoting from recent books that have documented the decline and fall of empires.

First, I will merely quote from a recent YouTube video{1} that describes a pattern in history that has destroyed three global superpowers in the last 500 years: Spain, Britain, and the Soviet Union. Today, the U.S. is following a similar pattern.

In 1590, Spain was the richest empire on earth. Spain controlled half the world's gold and silver. Spain's military dominated Europe. Their currency was accepted everywhere. Yet within 80 years, the Spanish government was bankrupt.

The Spanish coin that was supposed to be pure silver became 50% copper, then 75% copper. By 1600 Spanish coin contained barely any silver. Inflation exploded. Spain went into a debt spiral and borrowed constantly. Manufacturing declined. Agriculture stagnated.

In 1914, Britain ruled the largest empire in human history. At the time, it was said that the sun never set on British empire. Britain controlled 25% of the land surface. The pound sterling was the global reserve currency. Yet within 40 years, the empire was gone. The currency collapsed.

Britain had too many military commitments around the world. They won World War I, but at a terrible cost. By 1931, Britain had to abandon the gold standard. The pound lost 25% of its value overnight.

In 1991, the Soviet Union still seemed dominant. It was another superpower. It had nuclear weapons, global influence, and satellites spanning the globe. Yet the Soviet Union ceased to exist 900 days later due to economic implosion.

The idea that nations follow a pattern as they collapse isn't new. Decades ago, I did a week of radio programs on "The Decline of a Nation." A decade later, I did another week on "When Nations Die" because of a book that was published with that title.

What is new is how this video explains the seven stages of collapse and applies them to previous empires. But the key point of the video is the reality that America has already completed five of the seven stages. We aren't approaching the pattern but are within it.

As I often suggest, we can resolve some of these issues, but the first step is to admit that we are following this pattern of collapse. Below we will be looking at some of the reasons other empires fell and connect it to what is happening in our world today.

End of Everything

Now we will look at the book by Victor Davis Hanson, *The End of Everything: How Wars Descend into Annihilation.*{2}

In his book he provides four historical examples: the city-state of Thebes, ancient Carthage, Byzantine Constantinople, and the Aztec Empire. The leaders believed their illustrious pasts would be enough to prevent their destruction. Alexander the Great, Roman Scipio, Muslim Mehmet, and the Spanish conquistador Cortés proved them wrong.

He explains that the leveling of Thebes by Alexander the Great, the erasure of Carthage by Scipio, the conquest and transformation of Constantinople by Sultan Mehmet, and the obliteration of the Aztecs all marked the end of cultures and civilizations.

Alexander, for example, brought an end to classical Greece. The fall of Constantinople marked the end of the Mediterranean world as the nexus of European commerce. And the largest Christian cathedral in the West became the greatest mosque in the Islamic world.

The book is a warning to us today, but I also realize that few people will read his book. That is why I would encourage you to watch his five-minute video summary produced by Hillsdale College.{3}

He says his book "is about the existential destruction of the losing side in a war. This is very rare in history. It doesn't happen very often. But when it does, it should enlighten us how it does why it does, and can it happen again?"

He explains that he wrote his book "not just as a historical journey to document the rare cases of a targeted nation being completely destroyed, but as a warning that human nature doesn't change." We naively assumed that globalization would create a common humanity and bring an end to global conflict. Instead, he "noticed that there were more and more existential threats coming from autocratic regimes."

He reminds us that the same mentalities and delusions that doomed the Thebans, Carthaginians, the Byzantines, and the Aztecs are still with us today. Even as they were about to be slaughtered, some may still have been thinking, "It cannot happen here."

He wants us to be aware that what happened in the past could happen in the future. We need to learn from the past and protect ourselves in the future. This is a sobering call for

contemporary readers to heed the lessons of obliteration, lest we blunder into catastrophe once again. He reminds us that the world needs a strong America so that we can prevent "the end of everything."

Peak Human

Let's now turn to examine the book *Peak Human,*{4} written by historian Johan Norberg.

His book explains what we can learn from the rise and fall of "golden ages." He describes seven of humanity's greatest civilizations from ancient Athens and the Roman Republic to Renaissance Italy, the Dutch Republic, and today's Anglosphere.

Each had their golden age and contributed to our world today. Ancient Greece gave us democracy and the rule of law. From the Muslim world came algebra and modern medicine. The Dutch Republic gave us economic ideas and some of the greatest artistic movements.

He explained that he picked these civilizations because each of them exemplifies what can be described as a golden age. This was a period of innovations that revolutionized many fields and sectors in a short period of time. The characteristics are cultural creativity, scientific discoveries, technological achievements, and economic growth.

He laments that human history is a long list of deprivations and horrors. But it is also the source of the knowledge, institutions, and technologies that have set most of humanity free from such horrors. It requires raw material, but the citizens needed to be free to experiment and innovate, without being subject to feudal lords, centralized governments, or raving armies.

In a recent interview with John Stossel{5}, he talked about how Rome inspired our form of government, a republic with a

system of checks and balances. “There is a reason why we have a Senate, and they meet in the Capitol,” Norberg explained. “We borrow these ideas from the Romans.”

Of course, these empires fell. “The emperors wanted to become popular by handing out free stuff to people. Originally, this started small. You just handed the very poor means of subsistence. But it was popular, so the group that lived on the public’s expense grew larger all the time.”

Eventually the ever-expanding system of entitlements became too much. Norberg observed, “Romans could conquer the world, but they couldn’t do entitlement reform.” To pay for this, the Roman emperors devalued their currency by putting less gold and silver in each coin. He concluded that, “Inflation was much worse than barbarian invaders.”

This sounds like our world today. Modern governments, including our own, make more financial promises than they can keep. To pay for it, they print more money. We have been living in a golden age, but the question before us today is whether it will continue.

Loss of Moral Values

In this section we will look at an essay by Allen Mashburn who reminds us that “Societies That Surrender Moral Foundation Historically Self-Destruct.”{6}

This is not a new idea. Decades ago, I did a week of radio programs on “The Decline of a Nation.” A decade later, I did another week on “When Nations Die” because of a book that was published with that title. And more recently I even did a week of programs based on a book that compared America to Rome.

The reason for Mashburn’s article were several events that took place during Pride Month. He “never envisioned a day where transvestites would lecture us on human biology, or sterilizers would pose as health professionals advocating for

human rights. It seems that our nation has descended into a state of utter madness, where men can now claim pregnancy and the number of genders rivals the alphabet."

Those issues are just a few of the many legitimate concerns which point to the well-documented decline and fall of other civilizations. Greece tolerated and even celebrated immoral behavior. And "the decline of the Roman Empire can be attributed to the abandonment of strong familial bonds and moral values in favor of weakness and laxity." He observes that the similarity between Rome and America is alarming.

Of course, the pattern we recognize in Greece and Rome can be seen in other civilizations in the past. That would include the Egyptians, the Babylonians, the Persians, and even the nation of Israel. In Isaiah 5:20 we read that God pronounced judgment on Israel. "Woe to those who call evil good and good evil, who put darkness for light and light for darkness, who put bitter for sweet and sweet for bitter."

Of course, there is another side of this equation. Mashburn reminds us that "whenever a nation upholds high moral standards, it reaches the pinnacle of success." Yes, it is true that nations decline when they lose a moral foundation for society. But they also flourish when it upholds morality and integrity while also supporting and encouraging strong families.

He also quotes from the book, *Christians in the Wake of the Sexual Revolution*, by Randy Alcorn. He warns that unless our country experiences spiritual repentance and undergoes a profound reversal of moral values, we risk inviting the same judgment that befell Sodom and Gomorrah.

That is why Christians should devote themselves to daily prayers for our nation's spiritual and moral well-being. The only way to reverse this downward moral spiral is for a spiritual revival and spiritual repentance in this country.

America's Expiration Date

Finally, we will look at a book by Cal Thomas, *America's Expiration Date*.{7}

He asks, what is America's future? The book came out years ago but has a new preface and is more relevant today. He was on my radio program to talk about the fall of empires and the future of the United States.

He begins with an observation by Sir John Glubb, who wrote *The Fate of Empires and the Search for Survival*. He noticed an interesting historical fact. The average age of a nation or empire's greatness is only 250 years. Most nations lose their way in a relatively short amount of time.

Using that ruler, Cal Thomas gives us a history lesson of the Persian Empire, the Roman Empire, the Byzantine Empire, the Arab Empire, the Spanish Empire, the Ottoman Empire, the British Empire, and the Russian Empire. He concludes with the United States.

Each empire fell for different reasons, but they are lessons to us today. Sometimes they fell because they became too prosperous and thus too apathetic. Sometimes they fell because the empire was over extended. Most had a period of decadence and decline. The Spanish empire was so riven with conflict, they were never invaded because other countries saw nothing worth conquering.

Persia's decline was due to class struggle. The common people, who were not part of the upper class, began organizing riots and revolts. Kings became greedy and started stealing from the nation's wealth rather than sharing the wealth with the people. The social structure collapsed.

As we have discussed above, Rome's fall was gradual. The familiar saying, "Rome wasn't built in a day." Neither was it destroyed in a day. As the Roman empire grew, more money

needed to be provided to the military. The empire's infrastructure suffered. And the common people suffered because the ruling class cared more about what was on the next horizon than what was at home.

He does believe that there is still time to resurrect the republic, but the answer can't be found in politicians. Our future doesn't depend on the White House, but instead is dependent on what we do in our house.

Cal Thomas ends his book with valuable suggestions. First, set standards of decency and morality for your yourself and your family. Reevaluate the education of your children. Don't send them to schools or universities that have largely become propaganda centers for secular progressives. Gather with other believers to worship, celebrate, and to encourage one another. Daily obey the call to "go and make disciples" (Matthew 28:19), often witnessing with words and actions.

How Reason Can Lead to God – Part 2

Dr. Michael Gleghorn continues to make a compelling case for how reason can lead us, step by step, to the logical conclusion of God's existence based on the book How Reason Can Lead to God.

Foundation of Mind

In this article we're continuing our examination of Christian philosopher Josh Rasmussen's book, *How Reason Can Lead to God.*{1} In my previous article, I introduced the book and showed how Rasmussen began constructing a "bridge of reason" that led to "an independent, self-sufficient, . . . eternally powerful foundation of all reality."{2}

But Rasmussen goes further, arguing that there must also be "a certain *mind-like* aspect" to this foundation.{3} And that's what we'll explore in this article. We're going to follow Rasmussen's lead as he takes us over the "bridge of reason." And once we've taken that final step, we'll see that it's led us not to some cold, calculating, "mind-like" reality, but to a very "special treasure."{4}

But to begin, why does Rasmussen think that the foundation of

all reality must be "mind-like"? To answer that question, consider that one of the things the foundation has produced is *you*—and *you* have a mind. As Rasmussen notes, "you are capable of thinking, feeling, and making decisions."{5} Indeed, if you're awake and functioning normally, you have some awareness of what is going on "around" you—and even of what is going on "within" you. That's because you possess a conscious (even *self-conscious*) mind. How is this to be explained?

According to Rasmussen there are only two live options: either minds ultimately originate from some sort of "mind-like" or "mental" reality, or else they arise solely from a physical process.{6} Is one of these options better than the other? Rasmussen thinks so, and points to "a construction problem" with the matter-to-mind option.{7} Here's the problem. Just as a black steel pipe cannot be constructed out of emerald green toothpaste, so a self-conscious mind cannot be constructed from mindless particles. Particles just aren't the right thing for constructing the thoughts, feelings, and purposes of a mind. In order to construct a mind, "mental materials" are needed. Hence, the foundation of all reality *must be* mind-like in order to account for the unique features of self-conscious human minds.{8}

But at this point, some may raise an objection. After all, if we say there's a construction problem going from matter to minds, then wouldn't there also be a problem in saying that an immaterial mind created the material world? The answer is "No."

Foundation of Matter

Above, we argued that one can't explain the thoughts and intentions of human minds by appealing only to material particles. There must rather be an ultimate mind at the foundation of all reality.

But of course, human beings also have *bodies*. And your body (including your brain) is an example of incredible material complexity. Not only that, but in order for you to be physically alive, the "fundamental parameters" of the universe must be delicately balanced, or "fine-tuned," with a precision that is mind-boggling. As physicist Alan Lightman observes, "If these fundamental parameters were much different from what they are, it is not only human beings who would not exist. No life of any kind would exist."{9}

How should we account for such complexity? Can we explain it in terms of chance?{10} That's wildly implausible. And better explanations are available. After all, one could *try* to explain the words of your favorite novel by appealing to "chance." But is that "the *best* explanation?"{11} Isn't it far more likely that an intelligent mind selected and ordered the words of that story with the intention of communicating something meaningful to others? While the chance hypothesis is *possible*, is it really *probable*? If we're interested in truth, shouldn't we prefer the *best* explanation?

So what *is* a better explanation for the material complexity that we observe—not only in our bodies, but in the fine-tuning of the universe that allows for our existence? If the ordering of the letters and words in your favorite novel is best explained by an intelligent mind, then what about the biological complexity of human beings? Scientists have observed "that molecular biology has uncovered an analogy between DNA and language." In short, "The genetic code functions exactly like a language code."{12} And just as the words in a novel require an intelligent *author*, the genetic code requires an intelligent *designer*.

Hence, a *foundational mind* offers a good explanation not only for human *minds*, but for the complexity of human *bodies* as well. Moreover, a foundational mind also provides the best explanation for objective moral values.

Foundation of Morals

What is the best explanation for our moral experience in the world? How might we best account for our sense of right and wrong, good and evil? So far, we've seen two reasons for thinking that the ultimate foundation of reality is "mind-like." First, a foundational mind best explains the existence of *human* minds. Second, it also offers the best explanation for the staggering material complexity of the human body and the exquisite "fine-tuning" of the universe that allows for our existence. Might a foundational mind also provide the best explanation for our moral experience? Rasmussen thinks so, and he offers potent reasons for us to think so too.{13}

Consider our sense of right and wrong. How should this be explained? Rasmussen proposes that our "moral senses are a *window* into a moral landscape."{14} Just as our sense of sight helps us perceive objects in the physical world, so our moral sense helps us perceive values in the moral world. Of course, just as our sense of sight may not be perfect, such that a tree appears blurry or indistinct, so also our moral sense may not be perfect, such that a particular action may not be clearly seen as right or wrong. But in each case, even imperfect "sight" can provide *some* reliable information about both the material and moral landscapes.{15}

How might we best explain both the moral landscape and our experience of it? "Can the particles that comprise a material landscape, with dirt and trees, produce standards of good and bad, right and wrong?"{16} It's hard to see how undirected particles could do such a thing. And naturally, they could have no *reason* to do so.

On the other hand, a foundational mind with a moral nature could account for *both* the moral landscape *and* our experience of it. As Rasmussen observes, such a being would account for moral values because of its moral nature.{17} Further, such a being would have both a *reason* and *resources* to create moral

agents (like us) with the ability to perceive these values.{18} Its reason for creating such agents is that we're valuable.{19} A mind-like foundation thus offers a better explanation for human moral experience than mindless particles ever could.

Foundation of Reason

Human minds are special for their ability to reason. This ability helps us think correctly. When we reason correctly, we can begin with certain basic truths and infer yet other truths that logically follow from these. For example, from the basic truths that "all men are mortal" and "Socrates is a man" we can logically infer the further truth that "Socrates is mortal."

But here an interesting puzzle arises. Where does our ability to reason come from? How might we account for the origin of human reason? And one of the interesting topics tackled by Josh Rasmussen in his book, *How Reason Can Lead to God,* is the origin of reason itself. What's the best explanation for this incredible ability?

If the universe sprang into being "from nothing, with no mind behind it," then not only human minds, but even rationality itself, must ultimately come from mindless material particles.{20} But as Rasmussen observes, "If people come only from mindless particles, then *reasoning* comes from non-reason."{21} But could reason really come from non-reason? Is that the *most plausible* explanation? Or might a *better* explanation be at hand?

The atheistic scientist J. B. S. Haldane once observed, "If my mental processes are determined wholly by the motions of atoms in my brain, I have no reason to suppose that my beliefs are true . . . and hence I have no reason for supposing my brain to be composed of atoms."{22} For Haldane, if human reason

arises entirely from a non-rational historical and physical process, then we have little reason to think that our beliefs are true.

Fortunately, there's a way out of this difficulty. We can suggest that human reason comes from an ultimately *rational* foundation. In that case, reason comes from reason. We've already seen that the best way to account for minds, matter, and morals is by positing a foundational Mind as the source of all reality. And this is also the best way to account for human reason as well. As Rasmussen notes, "by anchoring reason in the nature of the foundation, we can explain how the foundation of all existence can be the foundation of minds, matter, morals . . . and reason itself."{23}

In the next section we will follow Rasmussen "to the treasure at the end of the bridge of reason."{24}

Perfect Foundation

In this article we've seen that a foundational Mind offers the best explanation for the existence of human minds and bodies, moral concepts, and even reason itself. In my previous article, we saw that this foundation is also independent, self-sufficient, and eternally powerful. Today, with some final help from the Christian philosopher Josh Rasmussen, we want to pull together the various strands of this discussion to see what unifies the various features of this foundation into a single, coherent being. What sort of being might all these features point to? According to Rasmussen, they all point to a *perfect* being. But why does he think so?

Rasmussen argues that a perfect being must have two essential features. First, it must have no defects, or imperfections. And second, it must have "supreme value."{25} In other words, a perfect being cannot possibly be improved.

But why think the foundation of all reality is a perfect

being? Simply put, the concept of perfection enables us to account for all the characteristics of this being that reason has revealed to us. Perfection accounts for this being's independent, self-sufficient, and eternally powerful nature. It also accounts for how this being can be the ultimate foundation of other minds, astonishing material complexity, morality, and reason itself. As Rasmussen observes, "Perfection unifies all the attributes of the foundation" and "successfully predicts every dimension of our world."{26}

A perfect being is thus the foundation of "every good and perfect gift" that we possess and enjoy, and must surely be described as "the greatest possible treasure."{27} Moreover, since this being possesses "the maximal concentration of goodness, value, and power imaginable," it can only properly be termed "God."{28} Thus, by following the "light of reason" to the end of the "bridge of reason," we have arrived not at meaninglessness or despair, but at "the greatest possible treasure," the self-sufficient, eternally powerful, supremely rational, and perfectly good, Creator God.

If you would like to explore the work of Josh Rasmussen further, I would recommend reading his book, *How Reason Can Lead to God: A Philosopher's Bridge to Faith*. You can also visit his website at joshualrasmussen.com.

How Reason Can Lead to God – Part 1

Dr. Michael Gleghorn makes a compelling case for how reason can lead us, step by step, to the logical conclusion of God's existence.

In 2019 the Christian philosopher Josh Rasmussen published a little book with the intriguing title, *How Reason Can Lead to God: A Philosopher's Bridge to Faith.* Rasmussen earned his Ph.D. in philosophy from the University of Notre Dame and currently teaches philosophy at Azusa Pacific University.

The book, dedicated to Rasmussen's "skeptical friends," aims "to mark out a pathway . . . that can inspire a greater vision of the ultimate *foundation* of everything."{1} Now admittedly, this is a tall order. And it leads Rasmussen into some deep philosophical waters. Still, he claims to be writing for a broad audience of truth-seekers—and he has largely managed to make the book accessible to the educated layperson. One reviewer characterized the result of Rasmussen's effort as both an "original presentation of cutting-edge philosophy of religion, and an engaging personal invitation to reason one's way to God."{2}

Now I realize that you may be thinking, "Well, this doesn't

apply to me. I'm not interested in such 'heady' things as this." But do you know someone who is? Perhaps a son or daughter, spouse or co-worker? If so, you'll want to keep reading, for this may be just the sort of thing they need. Rasmussen wrote the book for those who need to think their way carefully through the issues. The sort of person who is not content to dodge difficult questions or settle for superficial answers.

Several philosophers have praised Rasmussen's efforts. Robert Koons, of the University of Texas at Austin, describes the book as "winsome and engaging, drawing the reader into a thrilling adventure . . . of the existence and nature of reality's ultimate foundation."{3} And J. P. Moreland, of Biola University, compares the study with C. S. Lewis's *Mere Christianity* and claims that "Rasmussen's argument for God is developed with such precision and care that, quite frankly, it could not be improved."{4}

With praise like this for Rasmussen's book, I hope you'll agree that it's worth our time and effort to take a deeper look at its contents. What *is* Rasmussen's argument for God? How does he develop it? Why does he refer to it as a "bridge to faith"? What sort of materials does he use in constructing his "bridge"? We'll begin our inquiry in the same place that Rasmussen does, with the deceptively simple observation that *something exists*.{5}

The Blob of Everything

Let's begin by considering the book's subtitle: *A Philosopher's Bridge to Faith.* What sort of bridge is this? As you might expect, since Rasmussen is a philosopher, this is a "bridge of reason." But it has an interesting destination, for it leads not to skepticism, but to faith.{6}

Rasmussen constructs his bridge very carefully. He wants every

step in his construction project to be reasonable. In order to accomplish this, he seeks to use quality materials and first-rate tools. His
materials are statements that anyone can see are clearly true. His tools “are rules of logic.” By carefully selecting his materials, and conscientiously using his tools, he constructs “a bridge of reason that leads . . . to a special treasure.”{7}

Rasmussen begins his project with the claim that something exists. Although few will object to such a claim, some may still have doubts. After all, what if everything you think you experience is just an
illusion? Well, in that case, “the experience of your illusion exists.” Moreover, *you* exist. If you didn’t, you couldn’t have any doubts about reality. In order to have such doubts, you must *first* exist. Thus, Rasmussen’s first claim, that something exists, seems quite secure.{8}

Next, Rasmussen bundles every existing thing, of whatever sort, into a comprehensive whole, which he aptly dubs the “blob of everything.” This “blob” includes every existing thing, the totality of reality. Since every existing thing is included in the “blob of everything,” there is nothing “outside” or “beyond” it. It is *everything*. Hence, the blob cannot have its cause, or reason for being, in anything outside it (for, of course, there *isn’t* anything outside the blob of *everything*).{9}

Now this is strange! My car, cat, and computer were each created by causes beyond themselves. My car had a car maker. My cat had parents. But something about the “blob of everything” isn’t like this. It has what Rasmussen calls a *foundational layer* that doesn’t depend on anything outside itself for its existence. We’ll consider the nature of this “foundation” more carefully next.{10}

Probing the Foundation

As we just noted, there isn't *anything* outside "the blob of everything." And hence, there isn't anything *outside* the blob that could cause, or explain, its existence.

What are we to make of this? Notice, first, that since the blob includes *everything* that exists, it includes many things that depend on other things for their existence. For example, the blob contains things like weasels, watches, and waffles and each of *these* things depend on *other* things for their existence. Baby weasels depend on mommy and daddy weasels. Watches and waffles depend on watch- and waffle-makers.

But notice: not everything in the blob can be like this. After all, if everything in the blob depended on something else for its existence, then we would have a serious problem—for the "blob of everything" does not depend on anything else for *its own* existence. Attempting to build such a blob using only dependent materials (that is, materials that depend on something outside themselves for their existence) would commit what Rasmussen calls a "construction error."{11} One cannot construct an independent, self-sufficient reality (like the "blob of everything), using only dependent parts. That would be like trying to construct a black steel pipe using nothing but toothpaste! No matter how much toothpaste you have, you will never construct a black steel pipe with such materials.{12}

So here's the problem. The "blob of everything" includes many things with a dependent nature (like weasels, watches, and waffles). At the same time, the blob (as a whole) depends on nothing outside
itself for *its* existence. How is this possible? Clearly, the blob must contain some special ingredient that does not depend on anything else for its existence. Rasmussen calls this ingredient the "foundation."{13} It has an independent, self-sufficient, necessary nature. It's the sort of thing that *must*

exist, no matter what.{14} It must therefore be eternal (i.e. without beginning or end) and provide "an ultimate foundation for everything else."{15}

Eternal Power

This "foundation" that is self-sufficient doesn't need a cause for its existence. It exists on its own. It's the sort of thing that *must* exist, that cannot *not* exist. And for this reason, the foundation must be eternal. That is, it must have always existed. Finally, it must also be powerful. But why?

Well, consider first that "power exists." Rasmussen observes that there are only two ways of explaining this. The first suggests that power "came into existence from nothing." The second says that power is eternal and has always existed. Which way is more reasonable?{16}

Well, suppose that power came into existence from nothing. The difficulty here is that something cannot come from nothing without a cause. And if there isn't anything, then there cannot be a cause. Moreover, we must remember that "nothing" is *not* anything. It is the absence of anything. It thus has no potential to produce anything. It has no power or potential because it *isn't* anything. Something cannot come from nothing, then, because "nothing" has no power or potential to produce anything.{17}

Thus, Rasmussen claims that reason itself drives us to suggest "a power that exists on its own, by its own nature." In other words, since power exists, and since it can only come from something powerful, there must be an *eternal power*. That is, there must be a power that has always existed. This power never *became* powerful; it *has always been* powerful. Fortunately, this conclusion agrees with reason, unlike the view that power came from nothing.{18}

Rasmussen sums it up this way: "The foundational power is

eternal."{19} Now this is quite astonishing. By thinking very carefully and following the light of reason, we have arrived at a foundation of all reality that is independent, self-sufficient, necessary, and eternally powerful. But we can go even further. By considering some of the things that the foundation has produced, we can learn even more about its nature.

Implications

Let's recap: beginning with the simple (and undeniably true) statement that *something exists*, we have watched Rasmussen carefully construct a bridge of reason that has led (so far) to an independent, self-sufficient, eternally powerful foundation of all reality. But Rasmussen goes still further. For if this foundation is the ultimate source of all other things, then we can learn something about the nature of the foundation by considering some of what it has produced.

For example, it is doubtless true that one of the most important things the foundation has produced is *you*—a human being. But what sort of thing are you? And what might this tell us about the foundation's nature?

Rasmussen examines four aspects of human beings that reveal some important characteristics of the foundation.{20} First, human beings have minds. We are not like rocks, papers, or scissors. We are self-conscious beings, aware of our own existence. We can think, feel, make plans, and work to accomplish them. Second, we have bodies. We are not disembodied minds, souls, or spirits. There is a complex physical (and physiological) dimension to our being. Third, we are moral agents. We experience a moral dimension to our existence. We sense that some things are good and that others are evil. We recognize that it is good to be kind to other persons and bad to harm them. Finally, we are rational agents. We can "see" or discern certain logical and mathematical

truths. For example, we can "see" that two plus two equals four and that "nothing is both true and false at the same time."{21}

If we ultimately depend for our existence on a self-sufficient and eternal foundation, then what might this tell us about that which brought us into being? Although the details will have to wait for the next article, the various characteristics of human beings mentioned above point to "a certain *mind-like* aspect of the foundation."{22} Indeed, we might even say that these characteristics reveal a foundation with mental, moral, rational—and even personal attributes!

Our goal for the next article, then, is to consider each of these characteristics in greater detail, showing how each one plausibly leads to a personal foundation of existence.

Your Work Matters to God

Sue Bohlin helps us look at work from a biblical perspective. If we apply a Christian worldview to our concept of work, it takes on greater significance within the kingdom of God.

 *This article is also available in Spanish.*

Many Christians hold a decidedly unbiblical view of work. Some view it as a curse, or at least as part of the curse of living in a fallen world. Others make a false distinction between what they perceive as the sacred—serving God—and the secular—everything else. And others make it into an idol, expecting it to provide them with their identity and purpose in life as well as being a source of joy and fulfillment that only God can provide.

In their excellent book *Your Work Matters to God*,{1} Doug Sherman and William Hendricks expose the wrong ways of thinking about work, and explain how God invests work with intrinsic value and honor. Rick Warren echoes this idea in his blockbuster *The Purpose Driven Life* when he writes, "Work becomes worship when you dedicate it to God and perform it with an awareness of his presence."{2}

First, let's explore some faulty views of work: the secular view, some inappropriate hierarchies that affect how we view work, and work as merely a platform for doing evangelism.

Those who hold a secular view of work believe that life is divided into two disconnected parts. God is in one spiritual dimension and work is in the other *real* dimension, and the two have nothing to do with each other. God stays in His corner of the universe while I go to work and live my life, and these different realms never interact.

One problem with this secular view is that it sets us up for disappointment. If you leave God out of the picture, you'll have to get your sense of importance, fulfillment and reward from someplace else: work. Work is the answer to the question, "Who am I, and why am I important?" That is a very shaky foundation—because what happens if you lose your job? You're

suddenly a “nobody,” and you are not important because you are not employed.

The secular view of work tends to make an idol of career. Career becomes the number one priority in your life. Your relationship with God takes a back seat, family takes a back seat, even your relationship with other people takes a back seat to work. Everything gets filtered through the question, “What impact will this have on my career?”

The secular view of work leaves God out of the system. This is particularly unacceptable for Christians, because God calls us to make Him the center of our life.{3} He wants us to have a biblical worldview that weaves Him into every aspect of our lives, including work. He wants to be invited into our work; He wants to be Lord of our work.{4}

Inappropriate Hierarchies: Soul/Body, Temporal/Eternal

In this article, we’re examining some faulty views of work. One comes from believing that the soul matters more than the body. We can wrongly believe that God only cares about our soul, and our bodies don’t really matter. The body is not important, we can think: it is only temporal, and it will fade and die. But if that view were true, then why did God make a physical universe? Why did He put Adam and Eve in the garden to cultivate and keep it? He didn’t charge them with, “Go and make disciples of all nations which aren’t in existence yet, but they will be as soon as you guys go off and start making babies.” No, He said, “Here’s the garden, now cultivate it.” He gave them a job to do that had nothing to do with evangelism or church work. There is something important about our bodies, and God is honored by work that honors and cares for the body—which, after all, is His good creation.

Another wrong way of thinking is to value the eternal over the temporal so much that we believe *only* eternal things matter.

Some people believe that if you work for things that won't last into eternity—jobs like roofing and party planning and advertising—you're wasting your time. This wrong thinking needs to be countered by the truth that God created two sides to reality, the temporal and the eternal. The natural universe God made is very real, just as real as the supernatural universe. Asking which one is real and important is like asking which is real, our nine months in our mother's womb or life after birth? They are both real; they are both necessary. We have to go through one to get to the other.

Those things we do and make on earth DO have value, given the category they were made for: *time*. It's okay for things to have simply temporal value, since God chose for us to live in time before we live in eternity. Our work counts in both time and eternity because God is looking for faithfulness *now*, and the only way to demonstrate faithfulness is within this physical world. Spiritual needs are important, of course, but first physical needs need to be met. Try sharing the gospel with someone who hasn't eaten in three days! Some needs are temporal, and those needs must be met. So God equips people with abilities to meet the needs of His creation. In meeting the legitimate physical, temporal needs of people, our work serves people, and people have eternal value because God loves us and made us in His image.

The Sacred/Spiritual Dichotomy; Work as a Platform for Evangelism

Another faulty view of work comes from believing that spiritual, sacred things are far more important than physical, secular things. REAL work, people can think, is serving God in full-time Christian service, and then there's everything else running a very poor second. This can induce us to think either too highly of ourselves or too lowly of ourselves. We can think, "Real work is serving God, and then there's what others do" (which sets us up for condescension), or "Real work is

serving God, and then there's what I have to do" (which sets us up for false guilt and a sense of "missing it").

It's an improper way to view life as divided between the sacred and the secular. ALL of life relates to God and is sacred, whether we're making a business presentation or changing soiled diapers or leading someone to faith in Christ. It's unwise to think there are sacred things we do and there are secular things we do. It all depends on what's going on in our hearts. You can engage in what looks like holy activity like prayer and Bible study with a dark, self-centered, unforgiving spirit. Remember the Pharisees? And on the other hand, you can work at a job in a very secular atmosphere where the conversation is littered with profanity, the work is slipshod, the politics are wearisome, and yet like Daniel or Joseph in the Old Testament you can keep your own conversation pure and your behavior above reproach. You can bring honor and glory to God in a very worldly environment. God does not want us to do holy things, He wants us to be holy people.

A final faulty view of work sees it only as a platform for doing evangelism. If every interaction doesn't lead to an opportunity to share the gospel, one is a failure. Evangelism should be a priority, true, but not our *only* priority. Life is broader than evangelism. In Ephesians 1, Paul says three times that God made us, not for evangelism, but to live to the praise of His glory.{5} Instead of concentrating only on evangelism, we need to concentrate on living a life that honors God and loves people. That is far more winsome than all the evangelistic strategies in the world. Besides, if work is only a platform for evangelism, it devalues the work itself, and this view of work is too narrow and unfulfilling.

Next we'll examine at how God wants us to look at work. You might be quite surprised!

How God Wants Us to See Work

So far, we have discussed faulty views of work, but how does God want us to see it? Here's a startling thought: we actually work for God Himself! Consider Ephesians 6:5-8, which Paul writes to slaves but which we can apply to employees:

> Slaves, obey your earthly masters with respect and fear, and with sincerity of heart, just as you would obey Christ. Obey them not only to win their favor when their eye is on you, but like slaves of Christ, doing the will of God from your heart. Serve wholeheartedly, *as if you were serving the Lord, not men*, because you know that the Lord will reward everyone for whatever good he does, whether he is slave or free.

It's helpful to envision that behind every employer stands the Lord Jesus. He sees everything we do, and He appreciates it and will reward us, regardless of the type of work we do. I learned this lesson one day when I was cleaning the grungy bathtub of a family that wouldn't notice and would never acknowledge or thank me even if they did. I was getting madder by the minute, throwing myself a pity party, when the Lord broke into my thoughts. He quietly said, "I see you. And I appreciate what you're doing." Whoa! In an instant, that totally changed everything. Suddenly, I was able to do a menial job—and later on, more important ones—as a labor of love and worship for Jesus. I know He sees and appreciates what I do. It forever changed my view of work.

God also wants us to see that work is His gift to us. It is not a result of the Fall. God gave Adam and Eve the job of cultivating the garden and exercising dominion over the world *before* sin entered the world. We were created to work, and for work. Work is God's good gift to us!

Listen to what Solomon wrote:

> After looking at the way things are on this earth, here's what I've decided is the best way to live: Take care of yourself, have a good time, and make the most of whatever job you have for as long as God gives you life. And that's about it. That's the human lot. Yes, we should make the most of what God gives, both the bounty and the capacity to enjoy it, accepting what's given and delighting in the work. It's God's gift![{6}]

Being happy in our work doesn't depend on the work, it depends on our attitude. To make the most of our job and be happy in our work is a gift God wants to give us!

Why Work is Good

In this article we're talking about how to think about work correctly. One question needs to be asked, though: Is all work equally valid? Well, no. All legitimate work is an extension of God's work of maintaining and providing for His creation. Legitimate work is work that contributes to what God wants done in the world and doesn't contribute to what He doesn't want done. So non-legitimate work would include jobs that are illegal, such as prostitution, drug dealing, and professional thieves. Then there are jobs that are legal, but still questionable in terms of ethics and morality, such as working in abortion clinics, pornography, and the gambling industry. These jobs are legal, but you have to ask, how are they cooperating with God to benefit His creation?

Work is God's gift to us. It is His provision in a number of ways. In *Your Work Matters to God*, the authors suggest five major reasons why work is valuable:

1. Through work we serve people. Most work is part of a huge network of interconnected jobs, industries, goods and services that work together to meet people's physical needs. Other jobs meet people's aesthetic and spiritual needs as well.

2. Through work we meet our own needs. Work allows us to exercise the gifts and abilities God gives each person, whether paid or unpaid. God expects adults to provide for themselves and not mooch off others. Scripture says, “If one will not work, neither let him eat!”{7}

3. Through work we meet our family’s needs. God expects the heads of households to provide for their families. He says, “If anyone does not provide for his relatives, and especially for his immediate family, he has denied the faith and is worse than an unbeliever.”{8}

4. Through work we earn money to give to others. In both the Old and New Testaments, God tells us to be generous in meeting the needs of the poor and those who minister to us spiritually. {9}

5. Through work we love God. One of God’s love languages is obedience. When we work, we are obeying His two great commandments to love Him and love our neighbor as we love ourselves.{10} We love God by obeying Him from the heart. We love our neighbor as we serve other people through our work.

We bring glory to God by working industriously, demonstrating what He is like, and serving others by cooperating with God to meet their needs. In serving others, we serve God. And that’s why our work matters to God.

Historical Cycles

Kerby Anderson provides an overview of four world-changing cycles: a political/cultural cycle, a generational cycle, a technological cycle, and a financial cycle.

Are there cycles in history? Yes, even though there is a linear trajectory in history, there are generational cycles we can observe. No doubt you have heard the phrase: "Hard times create strong men, strong men create good times, good times create weak men, weak men create hard times." Or you may have heard: "History doesn't repeat itself, but it often rhymes." And you may have heard the phrase "the fourth turning" that predicts a crisis at the end of a four-fold cycle.

We are going to look at four of the most often quoted cycles: a political/cultural cycle, a generational cycle, a technological cycle, and a financial cycle. Today we take for granted democracy, capitalism, and the industrial revolution. These

political, economic, and technological realities were not always in our world but came about because of revolutions.

One of the most significant revolutions took place 250 years ago. Andrew Wilson talks about this in his book, *Remaking the World*. He describes 1776 as "a year that witnessed seven transformations taking place—globalization, the Enlightenment, the Industrial Revolution, the Great Enrichment, the American Revolution, the rise of post-Christianity, and the dawn of Romanticism."

Some of the events in 1776 we know. That was the year the Declaration of Independence was ratified. It was the year when Adam Smith published the *Wealth of Nations* in 1776. It was also the year of James Watt's invention of the steam engine that spawned the industrial revolution. Both capitalism and the industrial revolution led to a significant increase in life expectancy and the rise of social development.

In this article as we discuss each of these four cycles, we should remember this interesting fact: all these cycles seem to be converging today. The last time these cycles converged in 1776, the world changed.

We are fortunate to live in such a time as this (Esther 4:14). We should be like the sons of Issachar (1 Chronicles 12:32) who were "men who understood the times, with knowledge of what Israel should do."

What does the future hold? Only God knows. As the song goes, "He's got the whole world in His hands." We may not know the future, but we can trust in the One who knows the future.

I think we are likely headed for a massive change in the future. But it is difficult to predict what political event or economic spark might inflame our world. Therefore, we should all be in prayer for our leaders and prepare ourselves for possible turmoil ahead.

Political/Cultural Cycle

Let us look at what appears to be an eighty-year political/cultural cycle. (It actually seems to average out to about 84 years). Go back to 1848 and you have Karl Marx publishing the *Communist Manifesto* and other works. The political and social impact of his Marxist perspective swept through Europe, changed the political structure of many countries, and is still an influence today. This idea not only introduced a new way of viewing the world but was also responsible for removing the monarchy from most nation states.

Another important political change happened 84 years later in the 1930s. In Europe, you have the rise of Adolf Hitler and Benito Mussolini. In this country, you had the election of Franklin D. Roosevelt who signed into law a significant number of New Deal programs that vastly expanded the scope of government and are influential in our lives today. It is worth remembering that the federal government wasn't as large as it is today. Roosevelt was responsible for the creation of so many of the alphabet soup of programs and federal agencies. The following decades were the era of big government.

If you add another 84 years, you come to 2016. In Europe, you have the political battle known as Brexit and the beginning of some populist uprisings. In this country, you also had the rise of populism and a reaction to the size and scope of big government. That was best illustrated by the election of Donald Trump.

It was also a time of turmoil. In Europe, we had the farmer protests in the Netherlands and the yellow jacket protests in France. In the U.S., we had BLM protests and Antifa protests.

There is also a longer cycle that describes the rise and fall of empires. General John Glubb notices that most empires last about 250 years. If you apply that to the U.S., you find that we are entering the end of that cycle. One key date is 1776.

That not only marks the beginning of the nation (Declaration of Independence) but the promotion of capitalism (Adam Smith and the publication of *The Wealth of Nations*). By the way, if you go back about 250 years before that you come to the Protestant Reformation that began when Martin Luther nailed the 95 theses to the Wittenberg Door.

We are fortunate to live in such a time as this (Esther 4:14). We should be like the sons of Issachar (1 Chronicles 12:32) who were "men who understood the times, with knowledge of what Israel should do."

What does the future hold? It appears we are likely headed for a massive change in the future.

Generational Cycle

We now turn to looking at a generational cycle.

More than a quarter century ago, William Strauss and Neil Howe wrote their bestselling book, *The Fourth Turning: An American Prophecy*. In it, they argued that history could be understood as coming in turnings, which have cycles of four. Each cycle spans a length longer than human life, roughly 80 to 100 years. That unit of time was what the ancients called the saeculum. These four turnings of the saeculum comprise the historical rhythm of growth, maturation, entropy, and destruction.

The first turning is a High – an upbeat era of strengthening institutions and weakening individualism. That is when a new civic order develops and the old values decay. The second turning is an Awakening – which is a passionate era of spiritual upheaval. This is when the civic order comes under attack from new values. The third turning is an Unraveling – which is a downcast era of strengthening individualism and weakening institutions. This is when the old civil order decays and new values develop. The fourth turning is a Crisis

– which is a decisive era of secular upheaval. The values regime propels the replacement of the old civil order with a new one.

The authors predicted that political, economic, and social upheavals would rattle the United States in and around the 2020s. The 2008 economic crisis and the changes just described from 2016 seemed to support the predictions made in the book.

Last year, Neil Howe wrote *The Fourth Turning Is Here*. The title tells it all. We are in crisis as illustrated by a government that does not seem to function, low public trust in just about any institution, political polarization, moral and legal chaos, and a collapse of families. He reminds us of the Abraham Lincoln quote that "a house divided against itself cannot stand" and that the government "will become all one thing, or all the other." He also reminds us of other fourth turning crises in America: World War II, the Civil War, and the American Revolution.

We are fortunate to live in such a time as this (Esther 4:14). We should be like the sons of Issachar (1 Chronicles 12:32) who were "men who understood the times, with knowledge of what Israel should do."

What does the future hold? It appears we are likely headed for a massive change in the future.

Technological Cycle

Let's look at a technological cycle.

There appears to be about a fifty-year technological cycle, in which we see important technological revolutions. In the late 18th century, we saw the beginnings of what today we refer to as the industrial revolution. Most people lived on farms. This revolution brought people out of the farms into the cities and factories.

Fifty years later was the age of steam and railways that changed the world significantly. Up until that time, we had manpower and horsepower. Trains that run on steam and steam ships changed the world in significant ways. Now people could move faster and carry heavier loads over a longer distance.

Fifty years after that we had steel and electricity. Steel was important in buildings. Brick buildings could only be a few stories high. Steel allowed designers to create skyscrapers and to build bridges over larger sections of water. Electricity literally lit up the dark night and provided numerous conveniences that we take for granted today.

Fifty years after that we had oil, automobiles, and a revolution in mass production. Automobiles provided people with the ability to go wherever they wanted without having to walk, ride a horse, or catch a train. Advances in mass production enhanced the industrial revolution and made possible the vast array of products available to us today.

By the 1970s, we came into the age of information and telecommunications. This came about with the development of the transistor and then the microchip. Our digital world developed because of these inventions.

Today, we find ourselves in a world of fast computers, artificial intelligence, and genetic engineering. We have social media, but we also have social media censorship. We have creative graphics, but we also have deep fakes and growing questions about what is real and what is fake. We can genetically treat and cure diseases, but we can also genetically engineer humans. How much of this will be driven by politics or economics? It is worth noting this latest technological cycle raises significant questions and also coincides with the political cycles and the generational cycle.

We are fortunate to live in such a time as this (Esther 4:14).

We should be like the sons of Issachar (1 Chronicles 12:32) who were “men who understood the times, with knowledge of what Israel should do.”

What does the future hold? It appears we are likely headed for a massive change in the future.

Financial Cycle

In this article we have looked at four important historical cycles. Now we conclude by covering a financial cycle. You will notice that some of the financial cycles parallel the technological revolutions.

America moved from an agricultural society to an industrial economy to an information society.

If you look at the wealth cycles of nations, you notice something interesting about which currency was dominant. The financial superpower changes over time, on average about 100 years. Perhaps you have seen a chart that shows these changes:

Portugal – Portuguese Real (15th century)
Spain – Spanish Real (16th century)
Netherlands – Dutch Guilder (17th century)
France – Franc (18th century)
Britain – Pound sterling (19th century)
U.S. – U.S. dollar (20th century)

Where are we today? The U.S. and other countries around the world are experiencing a debt crisis. One significant reason for this is the fact that the dollar is no longer “good as gold.” For 5,000 years, money was gold. But protecting it and transporting it was difficult. Banks and nations held the gold and created paper certificates that represented the value. Sometimes, the amount of paper currency was not always backed by gold.

The greatest problem came in the 20th century. In 1944, the

Bretton Woods conference fixed gold at $35 per ounce. But by 1971, President Nixon closed the gold window and we have seen over the last fifty-plus years that the value of the dollar has continually declined. Also, the possibility of the U.S. dollar remaining the reserve currency in the world is questionable.

At the same time, this country and other countries are facing a significant debt crisis. It is easy to spend more when all you need to do is print more money. That leads to inflation and a devaluation of your currency.

When faced with a debt crisis, you only have a few options. You can default on the debt, which some nations have done. You can tax the citizens, but there isn't enough wealth in any nation to cover the size of those national debts. You could cut spending, but few politicians would ever consider that option. Instead, most countries (including the U.S.) print more money. Unfortunately, that can only last for so long. Just look at Weimar Germany or Zimbabwe or Venezuela.

We are fortunate to live in such a time as this (Esther 4:14). We should be like the sons of Issachar (1 Chronicles 12:32) who were "men who understood the times, with knowledge of what Israel should do."

What does the future hold? It appears we are likely headed for a massive change in the future.

Ancient Perspectives on

Happiness

After examining several pagan view of happiness from the ancient world, Dr. Michael Gleghorn argues for the view of Christian philosopher Augustine.

The Declaration of Independence says that all men "are endowed by their Creator with certain unalienable rights," including "life, liberty and the pursuit of happiness."{1} Although we could say a lot about this statement, I want to focus on that very last phrase: the pursuit of happiness. What exactly is happiness? And how should we pursue it in order to have the best chance of attaining it? These questions not only interest us, they also interested some of the greatest thinkers from the far-flung past.

So what *is* happiness? An online dictionary says that happiness "results from the possession . . . of what one considers good."{2} A good start, but it raises another question, namely, what should we consider *good*? Many things can be described as *good*: a cat, a job, a lover, and a book may all qualify. And each of these things might even make us *happy* . . . at least, for a while. But is there a *good* that offers us genuine and lasting happiness? If so, what is it? Now we're getting closer to what the ancients were interested in knowing about happiness.

Of course, as you can probably guess, many different answers were proposed. A few thought that happiness could be found in the pleasures of the flesh. But most believed you needed something a bit more . . . *lofty*, shall we say, in order to experience *real* happiness, things like friendship, peace of mind, virtue, and even God. One thing they virtually all agreed on was that a truly good and happy life ought to be lived with a sense of mission or purpose. Hence, the ancients did not think about happiness primarily in terms of just

“having a good time.” Instead, they thought there was an important *moral* component to happiness. As Christian theologian Ellen Charry notes, for the ancients, happiness “comes from using oneself consistently, intentionally, and effectively, and hence it is a moral undertaking.”{3}

The link between morality and happiness has, I fear, become rather under-appreciated in our own day. But important as it is, many (including myself) don’t believe that this can be the *final* word on happiness. So in an effort to find out what is, we’ll spend the rest of this article looking first at some of the most important pagan perspectives on happiness from the ancient world before concluding with a Christian proposal by possibly the greatest theologian in the early church, a man named Augustine.{4}

Epicureanism

Let’s begin with Epicureanism. Epicurus lived from 341–270 B.C. and is often viewed as the poster boy for a hedonistic lifestyle. A popular gourmet cooking site, epicurious.com, creatively plays off this reputation to celebrate the pleasures of a great meal.{5} But as we’ll see, Epicurus was not the total “party animal” that people often think.{6}

Although he rightly regarded physical pleasure as a good thing, and believed that it was natural for us to want it, he personally thought that friendship and mental tranquility were even better. It was these latter sources of happiness, and not merely the pleasures of the flesh, which Epicurus thought of as the greatest goods. In order to attain them, he even commended a life of virtue. After all, it’s the virtuous person, living at peace with his neighbors, who generally has far less cause for fear and worry than someone who’s been up to no good. Such a person is thus more likely to experience the true joys of friendship and mental tranquility than his non-virtuous counterpart.{7}

As you can probably see, there are aspects of Epicureanism that even a Christian can appreciate. But there are problems with this view as well. For example, while Epicurus did not deny either God or the gods, he did teach that they were rather unconcerned about human affairs, and he denied that there would be a final judgment. For him, death was simply the end of existence and you didn't need to worry that God would judge you for your deeds in an afterlife. But these ideas made many people uncomfortable.

For instance, the Roman philosopher Cicero (106-43 B.C.) reacted strongly against Epicureanism in his book *The Nature of the Gods.* And Lactantius, an early Christian writer (A.D. 250-325), believed that only the fear of God "guards the mutual society of men."{8} In his view, if people think they aren't accountable to God, society will likely be in trouble. Hence, many thinkers worried that Epicureanism might lead to an amoral—or even *immoral*—pursuit of pleasure as the highest good of life. And unfortunately, this "can just as easily lead to debauchery and . . . selfishness as it can to the simple, honest life style of Epicurus."{9}

So while the Epicurean view of happiness has some things in its favor, there are several reasons for rejecting it.

Stoicism

Stoicism was another important school of thought that addressed the issue of human happiness. In the ancient world, it "was the single most successful and longest-lasting movement in Greco-Roman philosophy."{10} The Stoics' manly, morally tough philosophy of life had broad appeal in the ancient world. It attracted slaves like Epictetus (ca. A.D. 55-ca. 135) as well as the Roman emperor, Marcus Aurelius (A.D. 121-180). Even many of the early church fathers admired the Stoic emphasis on moral virtue and integrity.{11}

So what did the Stoics think about human happiness? According

to Ellen Charry, the Stoics viewed “the goal of life” as human flourishing. This was understood, however, not in terms of having a long life or being financially successful. Rather, it was viewed “as maintaining one’s dignity and grace whatever may happen.”{12} The Stoics understood that things don’t always work out as we want. Life throws us many curve balls and, if we’re not prepared, we’re bound to be disappointed.

Their solution? In a statement reminiscent of the Buddha’s teaching, the Stoic Epictetus declared, “Demand not that events happen as you wish, but wish them to happen as they do happen, and you will get on well.”{13} We often don’t have any control over what goes on around us. But we can control how we react to it. By knowing the good and morally virtuous thing to do, and by consistently choosing to do this, one attains the highest happiness of which human beings are capable; namely, “the enjoyment of self that comes from the conviction that one is living a principled life of the highest integrity.”{14} This, in a nutshell, is the Stoic conception of human happiness.

But there are some problems with this view. Although Christians will readily cheer the Stoic commitment to a life of moral virtue, they’ll nonetheless deny that such a life is ever really possible apart from the grace of God. As the Christian theologian Augustine observed, Stoicism fails to adequately address the problem of human sinfulness. Moreover, he thought, it holds out the false hope that one can achieve happiness through self-effort. But as Augustine wisely saw, only God can make us truly happy. Hence, while there’s much to admire about Stoicism, as a philosophy of human happiness it must ultimately disappoint.{15}

Neo-Platonism

Having now surveyed Epicureanism and Stoicism, and found each of them wanting, we must next turn to Neo-Platonism to see if it fares any better.

Probably the most important Neo-Platonist philosopher was a man named Plotinus, who lived in the third century A.D. Plotinus believed that in the beginning was the One, "the supreme transcendent principle" and the "ground of all being."{16} Everything which now exists ultimately originated from the One through a series of emanations. Since everything proceeds from the One *not* by a process of creation, but rather by a process of emanation, "Creator and creation . . . are not sharply distinguished in Plotinus's account."{17}

Although this is certainly different from the biblical view, in which there *is* a clear distinction between Creator and creation, it would probably not be fair to simply call Plotinus a pantheist—that is, someone who believes that "all" of reality is "Divine." According to one scholar, Plotinus tried "to steer a middle course" between pure pantheism (on the one hand) and creation by God (on the other).{18} But since everything that exists emanates or proceeds from the One, Plotinus's view is certainly *close* to pantheism. And it is thus quite different from the biblical doctrine of creation.

But how is this relevant to Plotinus's perspective on the nature of human happiness? According to Plotinus, since everything (including mankind) emanates out of the One, human beings can only truly find happiness by realizing their "oneness" with the One. In Plotinus's view, "Happiness resides in a person's realization that she is one with divinity."{19} According to Plotinus, then, realizing one's "oneness" with the One is the key to human happiness.

Are there any problems with this view? Although there's much to admire about Neo-Platonism, and while it was quite influential in the early church, it was never entirely accepted, and that for several reasons. From a Christian perspective, Neo-Platonism ultimately has a defective view of God, creation, human nature, the meaning of salvation, and what happens to a person after death. In other words, while

the system is very religious, it's *not* Christianity. And thus, while we can agree with Plotinus that happiness can only be found in God, we must nonetheless reject his system on the grounds that he's not pointing us to the one *true* God.

Augustinianism

Having previously surveyed some of the most important perspectives on happiness from the ancient world, we'll now bring our discussion to a close by briefly considering the thought of Augustine, one of the greatest theologians of the early church. Augustine lived from A.D. 354 to 430 and was familiar with the various perspectives on happiness which we've already examined.

Like the Epicureans, he believed that our happiness is at least tangentially related to our physical well-being. Like the Stoics, he believed that a life of integrity and moral virtue was important for human happiness. And like the Neo-Platonist philosopher Plotinus, Augustine thought that true human happiness could only be found in God.

Nevertheless, Augustine views each of these perspectives as ultimately inadequate for all who long to experience *lasting* human happiness (and Augustine thinks that's pretty much all of us). After all, neither physical well-being nor a virtuous life can grant us lasting happiness if our existence ends at death. And while he agrees with Plotinus that happiness can only be found in God, Augustine (like all Christians) is convinced that Plotinus ultimately has a defective view of God.{20}

So where is true and lasting happiness to be found? Ellen Charry sums up Augustine's view quite nicely when she writes, "Happiness is knowing, loving, and enjoying God securely."{21} In Augustine's view, happiness is a condition in which one's desires are realized. Happy is he who has what" he wants," he writes in his little book on happiness.{22} But he also

believed that what we all really want is the *everlasting* possession of the *greatest* good that can be had. That is, we want the best that there is—and we want it forever!

But since the greatest good can only be God, the source and foundation of every other good there is (or ever will be), it seems that what we ultimately want, whether we realize it or not, is God! And if we not only want the best that there is, but want it forever, it seems that we must ultimately want the very thing God freely offers us in Christ, namely, everlasting life in the presence of God. The psalmist urges us to "taste and see that the Lord is good" (Psalm 34:8). And those who do are promised joy in His presence and "eternal pleasures" at His right hand (Psalm 16:11).

This, then, is Augustine's view on human happiness. In my opinion, it's far and away the best perspective that we've examined in this article, and I hope you'll think so, too.

Four Killer Questions: Power Tools for Great Question-Asking

Sue Bohlin provides helpful information for use in helping sharpen the question-asking skills of fellow believers as well as in evangelism. These "understanding questions" help Christians sharpen their biblical worldview and help unbelievers delve into the inconsistencies of their own worldview.

Dr. Jeff Myers of Bryan College and Summit Ministries shares our passion for helping others develop a biblical worldview. One of the tools he offers in developing critical thinking skills is how to use the right question at the right time.

He suggests four "killer questions" to help anyone think critically.{1} The first question is, *What do you mean by that?* In other words, define your terms. The second question is, *Where do you get your information?* The third is, *How do you know that's true?*, and the fourth killer question is, *What if you're wrong?*

Dr. Myers tells this story:

“A friend took a group of third graders to the Denver Museum of Natural History.

“Before he took them inside, he knelt down on their level and said, ‘Kids, if anybody in this museum tells you anything, I want you to ask them, *how do you know that’s true?*‘ Giving this question to a third grader is the intellectual equivalent of giving them a surface-to-air missile. These kids walked into the museum; all they knew was, Ask: *How do you know that’s true?*

“A paleontologist was going to show them how to find a fossil. Apparently they had intentionally buried a fossil down in the soil sample and she said, ‘We’re going to find it.’ Very clever, right? No, not with this crowd. ‘Cause they started asking questions like, ‘Well, how do you know there’s a fossil down in there?’ ‘Well, because we just know there’s a fossil down there.’ ‘Why do you want to find it?’ ‘Well, because we want to study it.’ ‘Why do you want to study it?’ ‘We want to find out how old it is.’ Well, how old do you think it is?’ ‘About 60 million years old.’

“‘Lady, how do you know that is true?'”

“She patronized them. She said, ‘Well, you see, I’m a scientist, I study these things, I just know that.’ They said, ‘Well, how do you know that’s true?’ Anytime she said anything at all they just asked, ‘How do you know that’s true?’ What happened next proves that truth is stranger than fiction. She threw down her tools, glared at these children, and said, ‘Look, children, *I don’t know, OK?* I just work here!'”{2}

Question #1: What do you mean by that?

The first question is, *What do you mean by that?* You want to get the other person to define his terms and explain what he is saying. If you don’t make sure you understand what the other person means, you could end up having a conversation

using the same words but meaning very different things.

When I was a new believer, I was approached on the street by some people collecting money for a ministry to young people. I asked, naively, “Do you teach about Jesus?” They said, rather tentatively, “Yesss. . . .” I gave them some money and asked for their literature (which was in the reverse order of what I should have done). Only later did I learn that they did indeed teach about Jesus—that He was the brother of Satan! I wish I had had this first killer question back then. I would have asked, “What do you teach about Jesus? Who is He to you?”

Get the other person’s definition. Let’s say you’re talking to a neighbor who says, “I don’t believe there is a God.” Don’t quarrel with him: “Oh yes there is!” “No, there’s not.” Second Timothy 2:24-25 says not to quarrel with anyone. Just start asking questions instead. “What do you mean by ‘God’? What’s your understanding of this God who isn’t there?” Let him define that which does not exist! You may well find out that the god he rejects is a mean, cold, abusive god who looks a lot like his father. In that case, you can assure him that you don’t believe in that god either. The true God is altogether different. If it were me, at this point I wouldn’t pursue the existence of God argument, but rather try to understand where the other person is coming from, showing the compassion and grace of God to someone bearing painful scars on his soul.

Let’s say someone says she is for a woman’s right to choose abortion. You can ask, “What do you mean by ‘woman’? Only adult women? What if the baby is a girl, what about her right to choose? What do you mean by ‘right’? Where does that right come from?” Do you see how asking *What do you mean by that?* can expose problems in the other person’s perspective?

Question #2: Where do you get your

information?

The question *Where do you get your information?* is particularly important in today's culture, where we drown in information from a huge array of sources. Information is being pumped at us from TV, radio, music, Websites, email, blogs, billboards, movies, and conversations with people who have no truth filters in place at all. Consider the kind of responses you could get to the question, *Where do you get your information?*

"I heard it somewhere." Well, how's that for reliable? Follow with another killer question, *How do you know it's true?*

"Everybody says so." That may be so, but is it true? If you say something loud enough, often enough, and long enough, people will believe it's true even if it isn't. For example, "everybody says" people are born gay. Doesn't everybody know that by now? That's what we hear, every day, but where is the science to back up that assertion? Turns out, there is none. Not a shred of proof that there is a gay gene.

Someone else may say, "I read it somewhere." So ask, in a legitimate newspaper or magazine? Or in a tabloid? Elvis is not alive, and you can't lose twenty-five pounds in a week. You might have read it somewhere, but there is a word for that kind of writing: *fiction*.

Did you see it on the internet? That could be a single individual with great graphics abilities pumping out his own totally made-up stuff. Or it could be a trustworthy, legitimate website like Probe.org.

Did you see it on TV? Who said it, and how trustworthy is the source? Was it fact, or opinion? Be aware of the worldview agenda behind the major media outlets. Former CBS reporter Bernard Goldberg exposed the leftist leanings of the media in his book *Bias: A CBS Insider Exposes How the Media Distort the*

News. Most of what you see on TV is what the Bible calls "the world," and we are to be discerning and skeptical of the values and information it pumps out.

Don't be fooled by someone sounding confident and self-assured. Many people feel confident without any basis for feeling that way. Ask, *Where do you get your information?* It's a great killer question.

Question #3: How do you know that's true?

The third killer question is, *How do you know that's true?* This is probably the most powerful question of them all. It puts the burden of proof on the other person.

Most people aren't aware of what they assume is true; there's simply no other way to see the world. They often believe what they believe without asking if it's true, if it aligns with reality. If you respectfully ask killer questions like *How do you know that's true?*, all of a sudden it can begin to occur to folks that what they believe, they believe by faith. But where is their faith placed?

Sometimes, the kindest thing we can do for people is gently shake up their presuppositions and invite them to think.

The reigning philosophy in science today is materialism, the insistence that the physical universe is all that exists. Something is only real if it can be measured and quantified. We need to ask, *How do you know* there is nothing outside the matter-space-time-energy continuum? *How do you know* that the instruments of physical measurement are the only ones that matter? *How do you know* there isn't something non-physical, which cannot be measured with physical measuring tools? If all you have is a ruler, how do you measure weight? (And if all you have is a ruler, and someone wants to talk about weight, it would be easy to deny there is such a thing as weight, only height and length, a lot like the materialists' insistence

that since we can't measure the supernatural, it doesn't exist.)

At the heart of the debate over stem cell research is the question of the personhood of a human embryo. Those who insist that it's not life until implantation need to be asked, *How do you know that's true?* It's genetically identical to the embryo ten minutes before implantation. How do you know those are only a clump of cells and not a human being?

Postmodern thought says that no one can know truth. This philosophy has permeated just about every college campus. To the professor who asserts, "No one can know truth," a student should ask, *How do you know that's true?* If that sounds slightly crazy to you, good! A teacher who says there is no truth, or that if there is, no one can know it, says it because he or she believes it to be true, or they wouldn't be saying it!

We get hostile email at Probe informing us of how stupid and biased we are for believing the Bible, since it has been mistranslated and changed over the centuries and it was written by man anyway. When I ask, "How do you know this is true?", I don't get answers back. Putting the burden of proof on the other person is quite legitimate. People are often just repeating what they have heard from others. But we have to be ready to offer a defense for the hope that is in us as well.{3} Of course, when we point to the Bible as our source of information, it's appropriate to ask the killer question, "How do you know that's true?" Fortunately, there is a huge amount of evidence that today's Bible is virtually the same as the original manuscripts. And there is strong evidence for its supernatural origins because of things like fulfilled prophecy. Go to the "Reasons to Believe" section of Probe.org for a number of articles on why we can trust that the Bible is really God's word.

There are a lot of mistaken, deceived people who believe in

reincarnation and insist they remember their past lives. Shirley MacLaine claims to have been a Japanese Geisha, a suicide in Atlantis, an orphan raised by elephants, and the seducer of Charlemagne.{4} Here's where this killer question comes in. If you lose your life memories when you die, *how do you know* your past lives are real? When you're born into a new body and your slate is wiped clean, *how do you know* it's you?

So many people have embraced a pragmatic, expedient standard of, "Hey, it works for me." "It works for me to cheat on my taxes, as long as I don't get caught." "It works for me to spend hours on porn sites late at night since my wife doesn't know how to check the computer's history." "It works for me to keep God in his corner of the universe while I do my own thing; I'll get religious later in life." Well, *how do you know* it works? You haven't seen the whole, big picture. You can't know the future, and you can't know how tomorrow's consequences will be reaped from today's choices.

Let me add a caveat here. The underlying question behind *How do you know that's true?* is really, "Why should I believe you?" It can be quite disconcerting to be challenged this way, so be sure to ask with a friendly face and without an edge in your voice.

Question #4: What if you're wrong?

One benefit of this question is that it helps us not to "sweat the small stuff." There are a lot of issues where it just doesn't matter a whole lot if we're wrong. If you're agonizing over a restaurant menu, trying to figure out the best entree, what if you're wrong? It doesn't matter. You can probably come back another time. If you can't, because you're traveling and you'll never have another chance, is it going to wreck your life? Absolutely not.

Many of our youth (and, sadly, adults as well) believe that having sex is just part of being social. Many of them believe

that sex qualifies as recreation, much like going to an amusement park. They need to be challenged: *What if you're wrong?* Besides the high probability of contracting a number of sexually transmitted diseases, there is the ongoing heartache of the discovery that "casual" sex isn't, because of its lasting impact on the heart.

The ultimate question where this matters is, *What do you believe about God?* What do you do with Jesus' statement "I am the way, the truth, and the life; no one comes to the Father except by Me"?{5} What if you believe there is no God, or that you can live however you want and God will let you into heaven because you're not a mass murderer? We need to ask, *What if you're wrong?* You will be separated from God forever!

It's only fair for Christ-followers to ask that of ourselves. What if *we're* wrong? What if we're actually living an illusion that there is a God and a purpose to life? I would say, "You know what? I still lived a great life, full of peace and purpose and fulfillment. Ultimately, if there were no God, it wouldn't matter—nothing would matter at all!—but I still loved my life. Either way, if I'm right or I'm wrong, I win."

These four killer questions are powerful to spark meaningful conversation and encourage yourself, and others, to think critically. Use them wisely, be prepared for some interesting conversations . . . and have fun!

Talking About the Problem of Evil

T.S. Weaver has put together an intellectual response to the problem of evil that includes a theology of evil and suffering, and a philosophical/theological series of proper defenses of God and His righteousness considering evil.

What is Evil?

The problem of evil is famous. This problem is personal because my wife stayed stuck as an agnostic for a long time. An agnostic, by the way, is a person who says they don't know if there is a God. Like so many people, she thought that if you believe in a God who is all good and all-powerful, then the presence of evil and suffering creates a problem.

Atheist philosopher David Hume said, "Epicurus's old questions are yet unanswered. Is he willing to prevent evil, but not able? Then he is impotent. Is he able to but not willing? Then he is malevolent. Is he both able and willing? Whence then is evil?"

Let's address this. I'll give you a roadmap of where we're going. First, we need to address how one can even object to evil. Second, I will talk about what evil is and is not. Then I will talk about some possible reasons God allows evil.

Finally, I'll close with God's solution.

To start, if this challenge were raised by an atheist, we need to address the moral argument. If there is right and wrong, then they are grounded in the existence of a good and moral God. Because without an absolute Moral Law, which requires an absolute Moral Law Giver, the atheist has no grounds for a complaint against evil.

Former atheist C.S. Lewis summarizes how this thinking eventually guided him to Christianity: "My argument against God was that the universe seemed so cruel and unjust. But how had I got this idea of just and unjust? A man does not call a line crooked unless he has some idea of a straight line. What was I comparing this universe with when I called it unjust?"

Evil is not a "thing" that exists; and God is not the cause. Both Augustine and Thomas Aquinas point out that evil is not a real entity in the world. This means evil is not a material or a phenomenon that exists by itself. It's like darkness, which is not a created thing; it's the absence of light. Evil describes a deficiency or denial of good. Philosophers call this deficiency a privation. Evil is what occurs once the good is altered or distorted. In Genesis 1 and 2, God told us all that existed was good. Evil was not an innovation, but a distortion. So, God is not the creator or author of evil.

The Best-of-All-Possible-Worlds

Let us consider the best-of-all-possible-worlds argument. The place to start is God's omniscience. This allows God to understand all possibilities. If God knows all possibilities, God knows all possible worlds. Since God is also completely good, He always wants and works out the best world and the best way.

Leibniz (the philosopher who came up with this defense) wrote, "The first principle of existences is the following

proposition: God wants to choose the most perfect."

The power of this argument is to show that out of every world that a good God could have produced, His decision to generate *this* one means this creation is good.

There are several principles that tie into this defense.

The first major principle is centered on the truth that God acts for worthy causes. Again, God's omniscience presumes that before God decides which world to produce, He understands the value of every possible world. This also implies God always decides on the base of sensible, stable rationales. This is called the "principle of sufficient reason."

To believe God can intercede in what he has formed with sufficient reason, even to avoid or restrict evil, would be like a soldier who abandons his post and knowingly allows enemy infiltration to instead stop a colleague from drinking while in uniform. The soldier ends up allowing a greater evil in order to stop a lesser evil.

Another principle that reinforces this argument is the principle of "pre-established harmony."

Leibniz describes it this way: "For, if we were capable of understanding the universal harmony, we should see that what we are tempted to find fault with is connected to the plan most worthy of being chosen; in a word we should see, and should not believe only, that what God has done is the best."

Human Free Will

Above, we covered the principle of sufficient reason as part of the best-of-all possible worlds. The last principle of the best-of-all-possible-worlds is human free will. For Leibniz, this idea was just a principle in part of his greater defense. For Augustine, C.S. Lewis, and Alvin Plantinga it was an

entire defense by itself. In its simplest form, it goes something like this: God set us up not to be machines but free agents with the power to choose.

If God were to make us capable of freely choosing the good, He had to create us also able to freely choose evil. Consequently, our free will can be misused and that is the explanation for evil.

Jean-Paul Sartre communicates this wonderfully: “The man who wants to be loved does not desire the enslavement of the beloved. . . . If the beloved is transformed into an automaton, the lover finds himself alone.” God knows that a better world is created, if human beings are infused with free will, even if they decide to behave corruptly.

Were God to force us to make good choices, we would not be making choices at all, but simply implementing God’s instructions like when a computer runs a program.

For humans to have the capability to be ethically good, free will is necessary. Morality hangs on our capability to freely choose the good.

Plantinga asserts, “God creates a world containing evil, and he has a good reason for doing so.” John Stackhouse Jr. says, “God, to put it bluntly, calculates the cost-benefit ratio and deems the cost of evil to be worth the benefit of loving and enjoying the love of these human beings.”

Stackhouse sums up Plantinga’s argument like this:

“God desired to love and be loved by other beings. God created human beings with this in view. To make us capable of such fellowship, God had to give us the freedom to choose, because love, though it does have its elements of ‘compulsion,’ is meaningful only when it is neither automatic nor coerced. This sort of free will, however, entailed the danger that it would be used not to enjoy God’s love and to love God in return, but

to go one's own way in defiance of both God and one's own best interest."

God created us with free will because our decision to say "yes" to Him is only a real choice if we are also free to say "no" to Him.

The Greater Good

To review, so far, we've addressed how one can even object to evil, in the moral argument. We've talked about what evil is and is not, and the idea of it being a privation. We've talked about some possible reasons God allows evil, which included the best-of-all-possible-worlds argument and the free will defense. Now I want to go over the greater good principle. While all the arguments I've given so far are intellectual and do not necessarily help with the emotional side of evil and suffering, this principle is especially delicate. I say "delicate" because this defense may not help a questioner much if they have been a victim of a seemingly very unwarranted evil, and/or if they are still carrying anger or bitterness.

Again, the topic we are examining is the greater good principle, which argues that certain evils are needed in the world for certain greater goods to happen. To put it another way, certain evils in this world are called for, as greater goods stem after them. For instance, nobody would believe a doctor who cuts out a cancerous tumor is being evil because he made an incision on the patient. The surgery incision is much less evil than letting the tumor develop. The greater good is the patient being cancer-free. Parents who penalize children for poor conduct with the loss of toys or privileges or even giving spankings are instigating pain (particularly from the kid's viewpoint). Although, without this discipline, the other possibility is that the kid will develop into a grownup with no discipline and would consequently face much more suffering. We do not understand in this world all the good God is

preparing; therefore, we need to trust that God is good even when we can't see it and we can't understand the larger picture of what He's doing.

Plus, nearly all individuals will award some truth to the saying ascribed to Nietzsche: "Whatever doesn't kill me makes me stronger." Consequently, the principle of allowing pain in the short term to bring about a greater contentment eventually is legitimate and one we know and use ourselves. That implies there is no mandatory contradiction between God and the reality of evil and suffering.

The Cross

Finally, I end with the cross and the hope of Christianity. Jesus agonized in enduring the nastiest evil that can be thrown at him: denial by His own adored people; abhorrence from the authorities in His own religion; unfairness at the hands of the Roman court; unfaithfulness and disloyalty from His closest friends; the public disgrace of being stripped nude and mocked as outrageous "King of the Jews"; anguish in the agony of crucifixion; and the continuous weight of the lure to despair altogether, to crash these unappreciative beings with shocks of heaven, to recommence with a new race, to assert Himself. Instead, Jesus remained there, embracing into Himself the sins of the world, keeping Himself in position as His foes wreaked their most terrible treatment.

Our faith in a good God is sensible, because Jesus suffered on our behalf, and took the punishment we deserve. *He* understands what it is to suffer. *He* has lived there.

The cross was a world-altering occasion where the love and compassion of God dealt efficiently with the immensity of human sin. His death and resurrection show evil is trounced, and death has been slain. Contemplate the many implications of the atonement: Jesus is the Victor, He has paid our ransom,

God's wrath has been satisfied, and Jesus is the substitution for the offenses we have perpetrated.

As if that is not enough, the Christian narrative ends with faith in the future where complete justice will be done, and all evils will be made right. When Christ returns, He will not once more give in to mortal agencies and quietly accept evil. He will come back to deliver justice. The Bible's definitive solution to the problem of evil is that evil will be dealt with. God will create a new heaven and a new earth for persons God has loved so long and so well. This is the core of our faith in the middle of pain and suffering.

In conclusion, what I've just presented to you, and what my wife eventually figured out, is that evil is not a thing created by God. A valid complaint against evil cannot be made without the existence of God. God has plausible reasons for allowing evil. And He clearly has a plan to defeat it. All He wants you to do is trust Him.

The Contrasting Worldviews in 'That Hideous Strength'

Dr. Michael Gleghorn demonstrates how C.S. Lewis's 'That Hideous Strength' illustrates the cosmic war of good and evil through supernatural spiritual warfare.

A Study in Contrasts

In this article we're concluding a three-part series examining C.S. Lewis's "Cosmic Trilogy."{1} We've already looked at *Out*

of the Silent Planet and *Perelandra*, which you can find on our website at Probe.org. Now we turn to *That Hideous Strength*, the third and final novel of the trilogy, originally published in 1945. In many ways, the story is a study in contrasts between two very different communities characterized by two very different worldviews.{2}

On the one hand there is the National Institute for Coordinated Experiments (or N.I.C.E.), which might initially appear to embrace a naturalistic worldview, but which is actually governed by a kind of pragmatism that accepts whatever is useful for advancing its own nefarious purposes. On the other hand, there is the community at St. Anne's, which is generally animated by a Christian worldview.

Ransom, the hero of the first two novels, comes into this story as the "Head" or "Director" of St. Anne's, and he's a very different leader than the "Head" of the N.I.C.E. (as we'll see later). Whereas the first two novels largely took place on Mars and Venus respectively, this story takes place on Earth, specifically in England, sometime after World War 2.{3}

That Hideous Strength is a long novel. It covers a lot of ground and deals with an incredible variety of ideas and issues. Because of this, we can only hit a few of the highlights here.

With this in mind, let's begin by noticing two important statements on the book's title page. First, the book's subtitle: "A Modern Fairy-Tale for Grown-Ups." This tells us something about the genre of the story. It's intended as a kind of "fairy-tale." But this is a "fairy-tale" for *grown-ups.* And indeed, much of this novel would be inappropriate for children.

Second, there's a quotation from the 16th century Scottish poet, Sir David Lyndsay. In fact, the title of Lewis's book is

taken from this quotation, for Lyndsay mentions “that hyddeous strength” with reference to the Tower of Babel, a story originally told in Genesis 11. The Tower of Babel, you may recall, was a monument to human pride and rebellion against the Lord. In response, the Lord came down in judgment and confused the languages of those building the tower, and they were subsequently scattered over the face of the earth.

If we are to correctly interpret Lewis’s novel, then, we must not lose sight of these two clues. Lewis intends this story as a kind of modern-day “fairy-tale” that, in one way or another, also alludes to something like the Tower of Babel.

Supernatural Influences

Above, I mentioned Lewis’s subtitle for the novel: “A Modern Fairy-Tale for Grown-Ups.” This, I said, tells us something about the genre of the story. Lewis intended the story as a kind of fairy-tale. But what *are* fairy-tales, and how might this help us interpret Lewis’s novel?

On the English-Studies website, we learn that fairy-tales “are types of literature . . . featuring magical elements, mythical creatures, and moral lessons. Characterized by simple . . . characters, these stories typically involve a protagonist overcoming challenges with the help of magic or supernatural aid.”{4} As we’ll see, this description fits Lewis’s novel fairly well.

Consider, for example, the concluding statement about “overcoming challenges with the help of magic or supernatural aid.” In Lewis’s novel, Ransom and the community at St. Anne’s overcome the challenges posed by the National Institute of Coordinated Experiments (or N.I.C.E.) with help *both* magical *and* supernatural. From the depths of Arthurian legend, Merlin the magician returns to lend his aid to St. Anne’s. Moreover, the community is also helped by powerful angelic authorities

who can best be described as something like a cross between Christian archangels and Roman gods or goddesses.{5} Hence, Mercury, Venus, Mars, Jupiter, and Saturn all descend from the heavens to help the community in its time of need.

And this helps us see an important contrast between St. Anne's and the N.I.C.E., for it turns out that *both* are receiving a kind of supernatural aid, though the source of that aid is very different. The Christian community at St. Anne's is receiving supernatural aid from loyal, angelic, servants of God. The N.I.C.E., however, is receiving aid from dark spirits, who are in rebellion against God. The leaders of the N.I.C.E. refer to these spirits as "macrobes," and recognize that they are "more intelligent than Man."{6} While the good spirits communicate to the company of St. Anne's through Ransom, the "Head" of that community, the evil spirits communicate to the leaders of the N.I.C.E. through the decapitated "Head" of a former criminal, which is being artificially preserved in a laboratory. We thus begin to see how the contrasting worldviews of these two communities have led them into very different spiritual alliances.

Science and Magic

One of the strangest aspects of C. S. Lewis's novel, *That Hideous Strength*, concerns the return of Merlin to help the community of St. Anne's in their battle against the National Institute of Coordinated Experiments (or N.I.C.E.). Stranger still is the fact that the leaders of the N.I.C.E. initially hope to recruit Merlin to their *own* side in this struggle. But isn't the N.I.C.E. a scientific institute? Why would its leaders want to enlist the aid of an enigmatic magician from the days of King Arthur? It would seem that the governing principles of the N.I.C.E. are really rather different from what one might expect from a scientific institute.

Consider, for example, the character of William Hingest. Lewis

describes him as “a physical chemist” and one of only two men at his college “who had a reputation outside England.”{7} Hingest is a true scientist. But when he visits the N.I.C.E. to find out more about it, he quickly decides to leave. As he tells Mark Studdock, another character in the novel, “I came here because I thought it had something to do with science. Now that I find it’s something more like a political conspiracy, I shall go home.”{8}

Hingest realizes that the N.I.C.E. is quite different from a scientific institute. He rightly senses that there is something dark and corrupt at the institute’s core. As readers, we learn that the leaders of the N.I.C.E. are actually taking orders from demonic spirits. They want to recruit Merlin because they hope to make use of his powers to advance their own agenda. What they fail to realize, however, is that in the world of Lewis’s novel, Merlin is a Christian, and he joins forces with the company at St. Anne’s.

In his book, *The Abolition of Man*, Lewis described the birth of magic and applied science as “twins.” Both desired “to subdue reality to the wishes of men,” but only science was successful.{9} In Lewis’s novel, however, the leaders of the Institute have stumbled upon a source of power that might arguably trump that of science, namely, the demonic “macrobes.” They want Merlin because he will increase their power still further. The leaders of the N.I.C.E. are not really interested in truth, beauty, or goodness, but only in the power “to subdue reality” to their own wishes. Like the ancient builders of Babel, they are in prideful rebellion against the Lord. And this is why, in Lewis’s “fairy-tale” novel, their work also must be destroyed.{10}

The Problem of Violence

C. S. Lewis’s novel, *That Hideous Strength*, has often been criticized for its alarming depictions of violence. Near the

end of the novel, when the leaders of the National Institute of Coordinated Experiments (or N.I.C.E.) are destroyed by Merlin and the heavenly powers, Lewis describes their deaths in rather grisly detail. Some are trampled and torn apart by wild animals, others are shot or decapitated, and one character chooses to be incinerated by his own hands.{11} Why does Lewis include such horrific scenes?

David Downing has a good discussion of this issue in his book, *Planets in Peril: A Critical Study of C.S. Lewis's Ransom Trilogy*. He first observes that "Lewis was writing" this novel "during the bleakest years of World War II and that he draws explicit parallels between the leaders of N.I.C.E. and the Nazis."{12} He notes that, like the Nazis, the N.I.C.E. also rely upon a "secret police" force. Like the Nazis, they too "control the press . . . use criminals for barbaric medical experiments" and "dream of creating a master race." Hence, just as it was necessary for the Allies to fight and defeat the Nazis, so also it is necessary for Ransom, Merlin, and the heavenly powers to fight and defeat the N.I.C.E.

But was it necessary for Lewis to describe the deaths of his villains in such "gruesome detail"?{13} Why not simply have the angelic-god Jupiter destroy the leaders of the N.I.C.E. with a well-aimed thunderbolt? Why does Lewis insist on narrating their deaths in such graphic terms? Downing argues that Lewis was using Dante's *Inferno* as a "subtext" for this novel.{14} He shows how the journey of Mark Studdock (a major character in the novel) into the heart of the N.I.C.E. parallels Dante's journey through the nine circles of hell.{15} As Downing observes, the leaders of the N.I.C.E. joined forces with dark spirits. They thus experience a dark end to their earthly pilgrimage.{16}

The violence in *That Hideous Strength* makes more sense when we remember the comparisons Lewis makes between the N.I.C.E. and the Nazis, as well as the many literary connections between his own story and Dante's *Inferno*. Moreover, we must not

forget that such violence fits in rather well with Lewis's description of the story as a kind of "fairy-tale." Fairy tales, after all, often have a dark side, and Lewis's tale is no exception.

Babel and the Word of God

C. S. Lewis intended the final novel of his "Cosmic Trilogy," *That Hideous Strength*, to be read as a kind of fairy tale with allusions to the biblical Tower of Babel. We've mentioned several ways in which Lewis's novel resembles a fairy tale, but we've said little about its allusions to the Tower of Babel. Although Lewis draws several connections between the National Institute for Coordinated Experiments (or N.I.C.E.) and the Tower of Babel, we here have time to mention only a couple.

The story of the Tower of Babel occurs in Genesis 11. In that story, all humanity speaks the same language, and they determine to build "a city and a tower with its top in the heavens" (Genesis 11:4). They do this in order to "make a name" for themselves. But the Lord, who has told humanity to "fill the earth" (Genesis 9:1), comes down and confuses their language, thus dispersing them throughout the world (Genesis 11:8-9).

Like the builders of Babel, the leaders of the N.I.C.E. also want to "make a name" for themselves. The N.I.C.E. aims to achieve something like the deification of humanity, though this will only be accomplished by the destruction of virtually everything that makes human life worthwhile (and only a few, and eventually perhaps just one person, will be the beneficiary of their evil schemes).{17} For this reason, God permits some of His loyal servants, the Heavenly Powers, to descend to earth and bring linguistic confusion to the leaders of the N.I.C.E., thus forcing them to abandon their project.{18}

Merlin the magician, who has joined forces with Ransom and the community at St. Anne's, is the human instrument through which the Heavenly Powers work to release the "curse of Babel" upon the N.I.C.E. The leaders of this institute have joined forces with dark spirits to achieve their ends. Hence, once the "curse of Babel" is in full force among them, Merlin 7calls out over the din of confusion: "They that have despised the word of God, from them shall the word of man also be taken away."{19} The inability of the leaders of the N.I.C.E. to understand one another plays a significant role in ending their tyranny, thus saving humanity from their evil intentions.

In *That Hideous Strength*, Lewis has contrasted two very different communities, with two very different worldviews. Presented as a kind of fairy-tale, with allusions to the biblical Tower of Babel, he has developed an intriguing story about the ongoing battle between good and evil.

Notes

1. Wayne Shumaker uses this terminology in the title of his essay, "The Cosmic Trilogy of C. S. Lewis," in *The Longing for a Form: Essays on the Fiction of C. S. Lewis*, ed. Peter J. Schakel (Kent State University Press, 1977), 51-63.

Religious Trends Over the Last Decade

Probe VP Steve Cable examines some of the findings of the Probe Survey 2020: The Changing Face of Christianity in America.

Religious Trends Over the Last Fifty Years

In late 2020, Probe administered a new survey{1} to over 3,000

Americans ages 18 through 55 as a follow up to our 2010 survey{2}. Comparing these two surveys reveals a striking decline in Christian religious beliefs and practice across America over the last decade. Before focusing on these changes, let's begin with a foundational question.

How have young adult religious affiliations changed over the last five decades?

As documented in the General Social Surveys{3} from 1970 through 1990, their religious affiliations remained fairly constant. Since then, there have been significant changes.

The most dramatic change is found in young adults under thirty who select a non-Christian affiliation. This group grew from about one fifth of the population in 1990 to almost half today. Those non-Christians from other religious faiths{4} such as Judaism, Islam, and Mormonism, grew slightly up to about 10% of the U.S. young adult population. At the same time, **the Unaffiliated (i.e. Atheist, Agnostic or Nothing in Particular) almost tripled** to over a third of the population. Among the Unaffiliated, the Nothing in Particular category had by far the largest growth. The Pew Research surveys show an even greater increase, growing from 27% in 1996 to 59% in 2020.

Now bringing in the data from GSS 2010 survey, we learn that 26% of those in their twenties were Unaffiliated in 2010, growing to 30% of those in their thirties in 2018. This result means that more people in their twenties became Unaffiliated in their thirties. This result runs directly counter to the supposition of many that the growth in Unaffiliated would dissipate as young adults age and return to churches to raise their families.

Conversely, **Christian groups declined** with Other

Protestants{5} dropping by half, from about one in four down to less than one in eight young adult Americans. Catholics also experienced major losses, dropping by one quarter down to less than one in five young adult Americans over this thirty-year period.

Although less affected, the Evangelical affiliation also experienced a drop in recent years. GSS reported a small decline in young adult, born again Protestants, from about one in four down to around one in five Americans. Pew Research{6} reported a steeper decline in young adult Evangelicals, from 28% in 2007 down to 20% in 2019.

Perhaps this decline is a winnowing out of those whose Christian beliefs are not vital to their lives. In which case, a greater percentage of born again Christians should hold a strong biblical worldview now in 2020 than in 2010. In the next section, we will explore this topic to find out the truth of the matter.

Born Again Young Adults and a Biblical Worldview

In the next sections, we will be focusing on Born Again Christians in our Probe results. A Born Again Christian is someone who says:

1. I have made a personal commitment to Jesus that is still important in my life today and
2. I will go to heaven because I confessed my sins and accepted Jesus Christ as my savior.

We can compare the responses of Born Again Christians to those of Other Protestants and Catholics.

What portion of these three groups have a Basic Biblical Worldview strongly affirming that:

1. God is the all-powerful, all knowing, perfect creator who rules the world today.{7}
2. The Bible is totally accurate in all of its teachings.
3. A person cannot be good enough to earn a place in heaven.
4. While on earth, Jesus committed no sins like other people do.

All four concepts above are key components of God's redemptive plan. For example, Jesus being sinless made it possible for his death to redeem us.{8} Or, if the Bible is inaccurate in some of its teachings how could we know that it is correct in teaching about redemption?

In 2020 for those ages 18 through 39, one of four Born Again Christians, one of twenty Other Protestants and one of one hundred Catholics affirmed all four of these foundational beliefs. The statement least likely to be affirmed by all three groups was "a person cannot earn a place in heaven". Perhaps many have been influenced by the current postmodern thinking that what's not true for you can be true for someone else.

Only Born Again Christians had a sizable minority of one fourth affirming this worldview. In contrast, nearly half of Born Again Christians affirmed it in 2010. Clearly, this last decade had a serious impact on the perception of what it means to be a Christian.

We see a similar drop when comparing those ages 18 to 29 in 2010 with the same cohort now 30 to 39 in 2020, once again belying the notion that young adults will return to a conservative faith in their thirties. Instead of a noticeable increase as the cohort aged, we see a sizeable drop in those who affirm these key Christian doctrinal statements.

As the percent of true Christians drops, the ability to reach out with the gospel is surely reduced. However, Christians in the Roman Empire in AD 60 were an even smaller portion. Three

hundred years later virtually the entire empire was nominally Christian. If we "proclaim the excellencies of Him who called us out of darkness into His marvelous light{9}," God will bring many to repentance.

Born Again Young Adults and Pluralism

Pluralism is the belief that there are multiple ways to be right with God. **Pluralism and Christianity are not compatible**. Jesus clearly stated, "*No one comes to the Father except through me*."{10} The
high price paid through Jesus' life and death excludes the possibility of Jesus being one of several options. As the Apostle Paul wrote, "*There is salvation in no other name under heaven . . . by which we must be saved*."{11}

What does Probe's new survey reveal about pluralism? Confronted with the statement, "Muhammad, Buddha and Jesus all taught valid ways to God," how did American Christians respond? Do they align with clear biblical teaching by strongly disagreeing? For those ages 18 through 39, we found that about one third of Born Again Christians, one in eight Other Protestants, and one in twenty Catholics did so. An overwhelming majority of Christians chose to accept a belief that devalues the death and resurrection of our Lord. Once again, only Born Again Christians had a sizeable minority of one third who agreed with Jesus and the New Testament.

Looking back to 2010, was there a significant change among Born Again Christians during this decade? For the same age group, the percent in 2010 strongly disagreeing was almost one half, compared to the one third in 2020. So, more Christians than ever have no reason to share their faith with people of other religions. As the need for evangelism increases, the number of Christians who believe evangelism is even needed by people of other religions decreases.

The age group 18 to 29 saw 45% choosing a non-pluralist view in 2010 with that same age cohort (now 30 to 39) dropping to 35% in 2020. Once again, we see that as Born Again Christians are maturing, more of them are abandoning rather than clinging to the strong truth of the gospel of Jesus Christ.

To counter this slide with the young adults we know, please:

1. Pray for the Lord to send laborers into the harvest, opening their to the infinite value of the gospel.

2. Explain that the chasm is so great only God can make a way of reconciliation. As Paul wrote, "*God desires all men to be saved and to come to the knowledge of the truth. For there is one God and one intermediary between God and humanity, Jesus . . . who gave himself as a ransom for all . . .*"
{12}

3. Explain that your accepting pluralism will not get your non-Christian friends into heaven. Only the truth of Christ presented to them by willing lips has power over their eternal destiny.

Young Adults and Jesus Our Savior

Probe's new survey shows that professing to be born again does not equate to orthodox biblical beliefs. In this section, we will see this borne out in beliefs about Jesus Christ.

First, why did Jesus die on a cross? The Bible is clear Jesus chose the cross**. "He did it to redeem us by taking our sins and our punishment upon Himself."** Close to nine out of ten 18- to 39-year-old, Born Again Protestants selected this answer.{13} All Christian leaders should want their people to know Jesus' role in their redemption, even those with a works-based gospel. Yet less than two thirds of Other Protestants and Catholics selected that answer.

Many said either the Jewish or Romans leaders caused Jesus' death. But Christians should know that prior attempts by those groups were supernaturally thwarted.

Second, "Jesus will return to this earth to save those who await his coming."

This statement comes from scripture, *" . . . so Christ, having been offered once to bear the sins of many, will appear a second time, . . . to save those eagerly waiting for him."*{14} As you can see, this verse answers both questions. The apostle Paul wrote, *"For the Lord himself will come down from heaven . . . and the dead in Christ will rise first."*{15}

Around two thirds of Born Again Protestants strongly agree that Jesus will return to save. Apparently, the remaining third are not sure.

For other Christian groups, only about one third of them strongly agreed.

The third question is: "When he lived on earth, Jesus committed sins like other people."

The Bible clearly states, *"God made the one who did* ***not know sin*** *to be sin for us so that in Him we would become the righteousness of God."*{16} God laid our sins upon Jesus in his earthly death. If Jesus were a sinner like you and I, His death would have been for His own sin.

Once again, about one third of Born Again Protestants did not select Disagree Strongly. Having this large group who don't understand biblical Christianity is disappointing.

Young adult Born Again Protestants drop down to about one half when looking at **all three questions together**. It appears the other half are trusting Jesus to save them, without a good understanding of who Jesus is. All other Christian groups drop to one in ten or less professing these truths about Jesus.

Finally, we find nine out of ten people with a Basic Biblical Worldview also select a biblical answer for the three Jesus questions. This shows a strong correlation between a Basic Biblical Worldview and an understanding of Jesus' purpose.

Are the Unaffiliated Uncommitted Christians?

In this section we will access Probe's 2020 survey to learn about those identifying as Agnostic or Nothing in Particular. We will call them AGNIPS. Perhaps, as some have suggested, a significant percentage are really Christians not affiliated with any denomination.

Among those ages 18 through 39, one in five are AGNIPS. About one third of these were Protestants as children but only three out of one hundred profess to being born again. So, it appears unlikely that any significant portion of the AGNIPS are latent Born Again Christians.

Of course, many people professing to be Christians do not qualify as Born Again. So perhaps many AGNIPS are latent Other Protestants or Catholics. Let's look at three different metrics to see if this proposition is supported by data.

First, look at a nominal level of religious activity: pray at least daily and read your Bible at least weekly. I think anyone not doing these has little interest in their faith. For this young adult segment, 35% of Born Again Christians and almost 30% of Other Protestants and Catholics *but* less than 5% of AGNIPS perform these activities. Compared to professing Christians, the AGNIPS have very few doing these activities.

Looking only at AGNIPS who were affiliated with a Protestant faith as a child, we find only 3% performing these activities.

A second metric: how about those who believe God is creator and active in the world and do not believe good works will get

them into heaven? We find: 33% Born Again Christians, 4% Other Protestants and Catholics, around 0.5% of all AGNIPS and only 0.4% of AGNIPS with a childhood Protestant affiliation.

Finally, of those who strongly agrees with the statement, "I believe that the only path to a true relationship with God is through Jesus Christ." Once again: 64% of Born Again Christians, 28% of Other Protestants and Catholics, 5% of all AGNIPS and 5% of AGNIPS with a childhood Protestant affiliation.

All of these metrics agree that very few young adults who are Agnostics or Nothing in Particular appear to have latent Christian beliefs. Even those who were affiliated with a Protestant church as a child did not have a higher level of affiliation with Christian beliefs.

Over this last decade, among Born Again Christians, a basic biblical worldview and understanding of Jesus is decreasing while pluralism is increasing. And the growing AGNIP population is far removed from Christian thought. Those who follow Christ, must respond by speaking the truth about Christ in our churches, our neighborhoods, and the world. We cannot expect any of these groups to just come back to a solid Christian belief. We must reach out to them.

Notes

1. Our new 2020 survey looks at Americans from 18 through 55 from all religious persuasions. Although still focused on looking at religious beliefs and attitudes toward cultural behaviors, we expanded the scope surveying 3,106 Americans ages 18 through 55. Among those responses, there are 717 who are Born Again allowing us to make meaningful comparisons with our 2010 results while also comparing the beliefs of Born Again Christians with those of other religious persuasions.
2. Our previous survey, the 2010 Probe Culturally Captive Christians survey, was limited to Born Again American's ages 18 through 40. This survey of 817 people was focused on a

obtaining a deeper understanding of the beliefs and behaviors of young adult, Born Again Christian Americans. For a detailed analysis of the outcomes of our 2010 survey and other surveys from that decade, go to our book Cultural Captives: The Beliefs and Behavior of American Young Adults

3. General Social Survey data was downloaded from the Association of Religion Data Archives, www.TheARDA.com, and were collected by the National Opinion Research Center.

4. Note that the Other Religions category includes Christian cults (e.g. Mormon, Jehovah's Witnesses), Jews, and other world religions.

5. Protestants who did not profess to being born again

6. U.S. Religious Landscape Survey 2007, U.S. Religious Landscape Survey 2014, Religious Knowledge Survey 2019 Pew Forum on Religion & Public Life (a project of The Pew Research Center). The Pew Research Center bears no responsibility for the analyses or interpretations of the data presented here. The data were downloaded from the Association of Religion Data Archives, www.TheARDA.com, and were collected by the Pew Research Center.

7. Other answers to select from:

- God created but is no longer involved with the world today.
- God refers to the total realization of personal human potential.
- There are many gods, each with their different power and authority.
- God represents a state of higher consciousness that a person may reach.
- There is no such thing as God.
- Don't know

8. See for example 2 Corinthians 5:21, Hebrews 4:15

9. 1 Peter 2:9

10. John 14:6

11. Acts 4:12

12. 1 Timothy 2:4-6
13. Other answers included:

- He threatened the Roman authority’s control over Israel.
- He threatened the stature of the Jewish leaders of the day.
- He never died on a cross.
- He failed in his mission to convert the Jewish people into believers.

14. Hebrews 9:27-28 ESV
15. 1 Thessalonians 4:16
