

The Apologetics of Peter – A Logical Argument for the Deity of Christ

Steve Cable explains how the apostle Peter showed himself to be a master apologist, not the bumbling, brash fisherman he used to be.

Peter – A Leader in Apologetics

How many times have you heard the Apostle Peter portrayed as the brash fisherman whose mouth was always several steps ahead of his brain? According to many sermons, Peter's life motto may have been "Open mouth, insert foot!" Certainly Peter did not hesitate to speak his mind which sometimes landed him in trouble and sometimes resulted in commendation (Matt 16:23; Matt 16:17). I suspect we often focus on Peter's foibles because we feel that if Jesus could love and use Peter then perhaps there is hope for us as well. Others have been known to say, "I guess I take after Peter" as an excuse for thoughtless words or actions which dishonor Christ.

However, if we look at Peter's entire life journey as recorded in Scripture, we see a life that set an incredible example of love, zeal, compassion, courage and *effective apologetics*. Wait a minute! Peter, a leader in apologetics? That field is only for egghead theologians, not an uneducated fisherman like Peter, right?

Yes, absolutely Peter was a leader in this area. Here are several reasons why we can be sure that Peter was a leading apologist for Christianity.

1. Peter recognized the evidence pointing to Jesus as the Christ early on. When others doubted Jesus' teaching, Peter declared, "To whom shall we go, you (Jesus) have the words of eternal life" (John 6:68). As an eyewitness of Jesus' teaching, signs and miracles, Peter, through the Father's revelation of His Son, went on to declare, "You are the Christ, the Son of the Living God" (Matt 6:16).

2. Beginning at Pentecost, Peter took on the role as the primary spokesperson presenting a reasoned argument for the gospel before the Jewish masses, the Jewish authorities and the first Gentile converts.

3. It appears that Peter was the one Paul approached to discuss his theology and arguments for the gospel before Paul began sharing them with the entire Roman world (Gal 1:18). In his second epistle, Peter equates the letters of Paul with the "rest of Scripture," giving them his approval as "God breathed" (2 Pet 3:15-16; 1:20-21).

4. Peter is the one that commanded us to be prepared to give an effective, reasoned argument for our faith, introducing the term "apologetics" to our vocabulary as important for every believer as he told the believers in Asia, "always being ready to make a defense to everyone who asks you to give an account for the hope that is in you, yet with gentleness and reverence" (1 Peter 3:15-16).

Peter was never shy about taking the lead. If we are to obey this command to be prepared with a reasoned defense, it behooves us to look at the example and teaching of Peter.

In this article, we will examine the apologetics of Peter to help us grow in our ability to give a reasoned defense. Peter was following the example and instruction of his Teacher, Jesus.^{1} (For a detailed discussion on Jesus' example, check out "The Apologetics of Jesus" probe.org/apologetics-of-jesus and other resources at probe.org.)

Peter's Defense – Credible Witnesses for the Gospel

Peter commands each of us to be prepared to give an effective reasoned argument for our hope in Christ. Is it possible that this uneducated fisherman was a master at this craft? Let's begin our examination of how Peter went about making an argument for the gospel.

I have been greatly blessed by studying Peter's sermons and testimony in Acts and his letters to the churches in Asia. From that study, we find that Peter focused on five aspects in his comprehensive defense of the gospel:

- 1. Credible witnesses*
- 2. Compelling evidence*
- 3. Confronting objections with consistent reasoning*
- 4. Changed lives*
- 5. Clear conclusion*

Let's look at each of these aspects in turn to see what we can learn to make us better at giving a reasonable explanation for our faith in Christ.

First, Peter based his argument on the basis of credible witnesses. He pointed his audience to four primary witnesses:

- 1. The eyewitnesses to Jesus' life*
- 2. The audience's own personal knowledge of Jesus*
- 3. The testimony of Scripture*
- 4. The Holy Spirit*

Peter and the other apostles were eyewitnesses of Jesus' life, death, resurrection and ascension. Speaking to a crowd in the temple shortly after Pentecost, he said, "[Jesus' resurrection is] a fact to which we are witnesses" (Acts 3:15). In Caesarea, he told the Gentile Cornelius, "We are witnesses of all the things He did both in the land of the Jews and in Jerusalem" (Acts 10:34-48). Much later, writing to the believers in Asia, Peter explains, "For we did not follow cleverly devised tales when we made known to you the power and coming of our Lord Jesus Christ, but we were eyewitnesses of His majesty" (2 Peter 1:16-17). Multiple eyewitness accounts of an event provide credibility, so Peter points to "we," not just "me," in each occasion.

Peter also called upon the experience of his listeners. In his sermon at Pentecost, he points to the signs Jesus did stating, "just as you yourselves know" (Acts 2:22). In other words, your own experience supports what I am telling you about Jesus.

Peter uses the Scriptures as an important expert witness. In Acts, Peter refers to the witness of the Scriptures nine different times, explaining how the scriptural prophecies are fulfilled in Jesus. He told his listeners, "But the things which God announced beforehand by the mouth of all the prophets, that His Christ would suffer, He has thus fulfilled" (Acts 3:18).

Addressing a Jewish audience, Peter did not have to defend the credibility or accuracy of the Scriptures as you may be compelled to do today. But when he addressed the church in Asia, he wrote, "So we have the prophetic word made more sure, to which you do well to pay attention as to a lamp shining in a dark place" (2 Peter 1:19). He pointed out that his eyewitness experience with Jesus gives him even greater confidence in the Scriptures.

Finally Peter highlighted the critical testimony of the Holy

Spirit in explaining the miracle of Pentecost and in front of the Jewish leaders. As he told those leaders, "And we are witnesses of these things; and so is the Holy Spirit whom God has given to those who obey Him" (Acts 5:32).

At this point, you may be thinking, "I don't have the advantages Peter had. I am not an eyewitness, the person I am sharing was not around when Jesus was performing signs and miracles, and they also think the Bible is full of myths. I am zero for three when it comes to pointing to credible witnesses." You may be right, but the principles still apply to us today. Even though you are not an eyewitness, you possess written testimony from eyewitnesses who would not change their testimony even under the threat of death. The Gospels and the letters of Peter and John are eyewitness accounts. And, you are an eyewitness of what faith in Jesus has meant in your own life.

I have a friend who is a retired teacher and volunteer hospital chaplain. A number of years ago, his late wife was in the hospital recovering from a severe internal infection which nearly took her life. When the attending physician came by her room to arrange for her release, she thanked him for her recovery. The physician replied, "Don't thank me. Thank God." She responded, "How am I supposed to thank God? I don't even believe in God." The physician said, "To find the answer to that question, I would like to give you a prescription. When you get home, read the first three chapters of the Gospel of John."

When she got home, she was surprised to discover that John was located in the middle of the Bible. She told her husband, "This is strange; shouldn't I start with Genesis?" But you see, this physician had been asked to give a defense for the hope that was in him and he began by pointing her to an eyewitness. Shortly, after reading these chapters in John, she placed her faith in Christ. Her husband told me that he personally knows of at least thirty people who are now

Christians because this physician said, "Don't thank me. Thank God," and introduced her to the eyewitness John.

We can also point out that no one refuted Peter when he told this large crowd that they were well aware that God had performed many miraculous signs through Jesus, and the Jewish authorities did not refute it either. We can also call upon the listeners' own experience with life. They were not around to see Jesus perform miracles, but they did have experience with the futility of sin and the struggle with hopelessness.

In our defense of the gospel, we can point out that there is universal agreement that all of these prophecies fulfilled by Jesus were written hundreds of years before Jesus' life. The fact that Jesus fulfilled those prophecies lends credence to both the Scriptures and to Jesus' claim to be the Messiah. [\[2\]](#)

Peter's Defense – Compelling Evidence for the Gospel

Of course, credible witnesses are not sufficient to make a convincing argument. If the evidence they report is circumstantial or inconclusive the argument is undermined. The testimony of Honest Abe Lincoln would not be very helpful if all he had to say was, "It was dark and I couldn't really see what happened." Peter made his argument by honing in on the following compelling evidence for the gospel:

- 1. Jesus did not live an ordinary life. God attested to Jesus' special position "with miracles and wonders and signs."*
- 2. Jesus suffered a highly public death by crucifixion.*
- 3. God raised Him up again.*

First, the signs Jesus performed lend credence to the possibility of the resurrection. As Peter wrote to the

Christians in Asia, “For when He received honor and glory from God the Father, such an utterance as this was made to Him by the Majestic Glory, ‘This is My beloved Son with whom I am well-pleased’ – and we ourselves heard this utterance made from heaven when we were with Him on the holy mountain” (2 Peter 1:17-18).

I have the opportunity to share the gospel with international students who have little prior knowledge about Jesus and Christianity. As we look together at the accounts of Jesus’ miracles, I ask them, “What would your response be if you witnessed these events? What would you think about Jesus?” Usually the response is, “I would want to find out more about him. How is he able to do these things? He is not a normal person.”

The second piece of evidence is essential to the argument. If Jesus did not actually die on the cross, His resurrection is a farce. In every defense, Peter states that we know that Jesus was put to death on a cross (Acts 2:23; 3:15; 4:10; 5:30; 10:39; 1 Pet 1:3; 3:18). Jesus’ crucifixion resulted in real physical death. Jesus did not escape death; he experienced death to pay for our sins. The Jewish leaders did not try to refute Peter’s assertion that Jesus had died on that cross.

The crowning piece of evidence is that “God raised Jesus from the dead” (Acts 3:15). Peter wants his audience to know that this is an indisputable fact. Peter told Cornelius and his household, “[we] ate and drank with Him after He arose from the dead” (Acts 10:41).

Jesus’ resurrection is the heart of the gospel and of any defense of the gospel. Consequently, it is the central theme of Peter’s message. [\[3\]](#)

Peter’s Defense – Confronting Objections

with Consistent Reasoning

Some Christian speakers suggest that being “fools for Christ” (1 Cor 4:10) means that we do not need to address objections with logical arguments. This is odd since the person they are quoting, Paul, based his ministry and his letters on giving a rational argument for the Christian faith. Perhaps even more compelling is that the uneducated fisherman, Peter, also confronted objections using logical reasoning. He knew that a good argument addresses both the evidence clearly supporting the conclusion and also any evidence which appears to counter the conclusion.

Let’s look at three specific objections on the minds of his listeners that Peter addressed in Acts and his letters.

The first objection he addressed is the popular notion that the Messiah would come in triumph and in power; certainly not in suffering and death. In his arguments, Peter reminds the listeners that the prophets clearly state that the one who will bring healing and restoration will suffer (Acts 2:23; 3:18; 4:11; 1 Pet. 1:10-11; 2:21-24). He told the crowd in the temple, “God announced beforehand by the mouth of all the prophets, that His Christ would suffer” (Acts 3:18). He pointed the rulers and the elders to Psalm 118 when he declared, “[Jesus is] the stone which was rejected by you the builders, but which became the chief corner stone” (Acts 4:11).

The second objection is that the Scriptures do not teach the resurrection of the dead. The Jews were looking for a descendant of David who would reign forever as the Messiah. Peter used Psalms written by David to show that the God had revealed that the Messiah would die but not be abandoned to Hades or suffer decay and be raised to sit at the right hand of God (Ps. 16:8-11; 132:11; 110:1).

Later in his life, Peter took on a new objection which was not

an issue in his early defense. This third objection was that Jesus had not returned to the earth as He promised. Peter knew that some scoffers were saying, "Why should we believe that Jesus is going to return? It has been years since His death and the world just keeps going along just as it always has." Peter responds by

- 1. identifying the false assumption in the scoffers' argument,*
- 2. providing an important perspective on the question, and*
- 3. explaining the rationale for delaying Jesus' return.*

The false assumption is that God has not dramatically intervened in the past. Peter reminds them that God destroyed human civilization through the flood and the scoffers of that time did not believe God would act against them either.

The important perspective is that God does not view time in the way humans do. "But do not let this one fact escape your notice, beloved, that with the Lord one day is like a thousand years, and a thousand years like one day" (2 Peter 3:8-9).

The rationale is God's mercy as Peter wrote: "The Lord is not slow about His promise, as some count slowness, but is patient toward you, not wishing for any to perish but for all to come to repentance" (2 Peter 3:9).

Although you may need to address one of these three specific topics at sometime, the important point is that Peter did not gloss over the objections. He did not just say, "I am an eyewitness. Jesus is the resurrected Messiah. Repent and believe." He addressed the concerns he knew were on the minds of his audience with consistent rational arguments.

Peter's Defense – The Testimony of Changed Lives

Peter knew that an effective argument for the gospel, for our hope, needs to include visible as well as oral arguments. Peter emphasized current evidence that his audience could experience or observe at that time.

For example, at Pentecost his sermon is in response to the crowd drawn to the spectacle of the disciples praising God in many different languages. He points out that this event is the fulfillment of the prophecy in Joel. Then the body of his message leads to the point that “[Jesus] has poured forth this which you both see and hear” (Acts 2:33).

Similarly, in the temple he points to the healing of the lame man as evidence that Jesus is the resurrected Prince of Life (Acts 3:15-16).

In his first letter to the churches in Asia, Peter explains that our purpose as God's special people is to “proclaim the excellencies of Him who called you out of darkness into His marvelous light” (1 Pet 2:9). One way we fulfill our purpose is by always being ready to give a reasoned argument for our faith. However, Peter teaches us that it is much more than a verbal or written argument. According to the body his letter, we proclaim Jesus' excellencies by

- 1. our excellent behavior,*
- 2. our loving relationships,*
- 3. our response to suffering,*
- 4. our servant's heart, and*
- 5. our devotion to prayer.*

These living arguments are essential elements supporting any

effective argument explaining our living hope in Jesus. Peter put it this way: “always being ready to make a defense to everyone who asks you to give an account for the hope that is in you, yet with gentleness and reverence; and keep a good conscience so that in the thing in which you are slandered, those who revile your good behavior in Christ will be put to shame (1 Peter 3:15-16). A good conscience and good behavior are directly tied to the effectiveness of our defense. Peter also highlights the importance of presenting our argument with gentleness and a genuine concern and respect for the other person as someone created in the image of God and loved by Jesus.

Peter’s Defense – A Clear Conclusion

Sometimes we get so enthused about the argument that we forget the purpose. We always want to point people to the fact that they can receive a living hope through faith in the resurrection of Jesus. Peter always kept his conclusion in mind. Let’s look at how he presented the conclusion.

To the crowd at Pentecost, he said, “Therefore let all the house of Israel know for certain that God has made Him both Lord and Christ – this Jesus whom you crucified. . . Repent, and each of you be baptized in the name of Jesus Christ for the forgiveness of your sins; and you will receive the gift of the Holy Spirit” (Acts 2:36-39).

To the crowd in the temple, he said, “Therefore repent and return, so that your sins may be wiped away” (Acts 3:19).

To the Jewish leaders, he proclaimed, “And there is salvation in no one else; for there is no other name under heaven that has been given among men by which we must be saved” (Acts 4:12).

To Cornelius and his household, he concluded, “through His name everyone who believes in Him receives forgiveness of

sins” (Acts 10:43).

To the church in Asia, he reminded, “Blessed be the God and Father of our Lord Jesus Christ, who according to His great mercy has caused us to be born again to a living hope through the resurrection of Jesus Christ from the dead” (1 Peter 1:3).

Peter wanted them to understand the importance of Jesus life, death, and resurrection to their eternal future. His clear conclusions invited a response from each individual.

Our examination of the preaching and teaching of Peter has shown him to be a master apologist for the gospel. If we want to follow in his footsteps, we study his example preparing ourselves to give an effective argument consisting of

- 1. credible witnesses*
- 2. compelling evidence*
- 3. confronting objections with consistent reasoning*
- 4. changed lives, and a*
- 5. clear conclusion.*

Then when people say that you are acting like Peter, it should be a testimony to your effective witness for our Lord Jesus Christ.

Notes

1. For a detailed discussion on Jesus’ example, check out Pat Zukeran’s “The Apologetics of Jesus,” probe.org/apologetics-of-jesus) and other resources at probe.org.

No Reason to Fear: Examining the Logic of a Critic

Rick Wade uses the faulty arguments in Sam Harris' book Letter to a Christian Nation to show why Christians don't have to be afraid of the new atheists' assault on our faith.

Getting Started

Sometimes we Christians shy away from books which attack our beliefs because we're afraid we can't answer the objections. That's understandable. Often the authors of such books carry impressive credentials. It's easy to feel intimidated.

Another response which is the opposite of fearful avoidance is haughty dismissal. Sometimes we act as if our position is so obviously true that others can be dismissed as downright stupid and hardly worth bothering with. Even if the opponents' arguments *are* bad, that's no reason to adopt an arrogant attitude. It's especially bad when the dismissive Christian hasn't even bothered to read the book!

A better response, I think, is to use such occasions to grow in understanding and to exercise one's apologetic "muscles" by working at answering the challenges posed. So, for example,

when a doctrine is challenged, by studying the subject, we grow in our knowledge of Christian beliefs and (here's the uncomfortable part) we are sometimes corrected in our understanding. Another advantage is preparation for real face-to-face encounters with critics. Responding to arguments in a book means there isn't the pressure of a person staring at you, waiting for an answer (and fully expecting one; critics do have such a high view of us!).

In this article I'm going to use Sam Harris's book *Letter to a Christian Nation* to give some suggestions about what to look for in such books.[{1}](#) I won't try to address every challenge. Others have given more extensive responses.[{2}](#)

I titled this essay "No Reason to Fear" for a good reason. The challenges of critics throughout the ages have not been able to prove Christianity false, and those of modern day critics won't either. Most of their arguments have already been answered. When we brace ourselves and start reading a critic's book, we often find that the arguments don't pack that great a punch after all, much like the neighborhood bully who the other boys are afraid of but really have no reason to be.

Of course, we can't always answer seemingly good objections, and certainly can't answer them all to the atheist's satisfaction. I'll go further than that. I don't think we *have* to answer every objection. There will always be objections. But it's as intellectually wrong to drop one's convictions because of a few unanswered criticisms as it is to hold to such convictions for no reason at all. Atheists obviously don't abandon their beliefs so easily, and they shouldn't expect us to either.

Fallacious Arguments

If we're going to engage books like *Letter to a Christian Nation* responsibly, we have to be ready to hear some good

criticisms of our beliefs or actions. We have to accept the fact that there are some hard things to deal with in our beliefs, especially the problem of evil. We need to admit our inability to give satisfying answers to all objections if we're going to expect that kind of openness from critics. Also, it is often Christians who come under attack rather than Christianity. Harris spends a lot of time here. Christians have done some bad things, and they need to be acknowledged.

More to the point for this article, Christians can sometimes give bad arguments for what they believe. I'm not suggesting that we have to bow to all the demands of skeptics; there are several theories of the proper use of evidences and logical arguments and personal experience, and some formulations are unreasonable. It *is* to say, however, that we must use good reasoning when we make a case.

The problem with using poor reasoning is that it undermines one's case. That's what we find in Harris's book, and that will be our focus here. When we read a case for a particular belief, we should keep a lookout for such things as questionable assumptions, logical fallacies, and incorrect facts. Harris's book is plagued with fallacious arguments, a surprising turn since he presents his side as being that of reason. So I'm going to spend most of my time on those and mention the other things when appropriate.

Don't let the term "logical fallacies" put you off, like they're things only specialists can understand. It's just another name for poor reasoning. So, for example, if you make the claim that Christianity is the only true religion, and someone responds that you only believe that because you grew up in a Christian nation, you could cry "Foul!" You're making a universal claim; where you're from is irrelevant. If it's true, it's true in India and China and the US and everywhere else, too. This is a kind of fallacy of false cause. No one is a Christian because he lives in a Christian nation. We are Christians because we have believed Jesus' claims that are

universal. It also reflects the current mood according to which religions are human constructs, and Christianity is just one such religion among many.

Although fallacious arguments can have *psychological* force (when we don't spot them and they seem correct), they have no *logical* force. Their conclusions should not be believed.

Are We Really So Evil?

Harris's favorite target in his attack on religion is its supposed immorality. He tells us that "Christians have abused, oppressed, enslaved, insulted, tormented, tortured, and killed people in the name of God for centuries, on the basis of a theologically defensible reading of the Bible."[3](#) Well, *that's* a surprise! Not that Christians have done bad things, but that such acts are *theologically defensible*! Such things are sanctioned by God because He, too, does such things. Harris accuses Christians of picking and choosing sections of Scripture that present a more loving God while ignoring the truly telling ones which reveal a God who condones slavery and the beating and killing of rebellious children.

But Harris is guilty of this picking and choosing himself. He commits the fallacy which is called the *neglect of relevant evidence*. To be fair, he does note that "it is undeniable that many people of faith make heroic sacrifices to relieve the suffering of other human beings."[4](#) But he doesn't bother listing them. He gives no space to the great work done by Christians in the fields of medicine, literacy, agriculture, famine relief, etc. He ignores the good work of organizations like Mercy Ships which takes life-changing medical help to people in third world nations in the name of Christ.

Well, he doesn't completely ignore missionary efforts. One of his favorite rants is against the evils perpetrated by missionaries. They waste time preaching about such things as

the virgin birth when there is important work to be done. The most memorable accusation is when he charges missionaries who preach against the use of condoms with “genocidal” piety!{5} “Genocidal!” Maybe a little exaggeration there? (And, by the way, while it’s true that Christian medical missionaries do present the gospel to people—which they should, since one’s eternal life is more important than one’s temporal life—I’ve never heard of any who withhold medical help from people in need until they first preach a sermon on the virgin birth.)

In another place Harris commits the fallacy called *causal oversimplification*. As he sees it, religion is the cause of conflicts in Palestine, the Balkans, Sudan, Nigeria, and other countries. Religion is so unnatural and wrong-headed to atheists, that it becomes an easy target for casting blame.

I’m going to give a bit more space to this charge since it’s a very popular one these days.

In 2004, the BBC published what it called a “War Audit” which was conducted to determine how significant religion has been in war, at least in the last century.{6} In the article “God and War: An Audit and an Exploration,” authors Greg Austin, Todd Kranock and Thom Oommen report that

at a philosophical level, the main religious traditions have little truck with war or violence. All advocate peace as the norm and see genuine spirituality as involving a disavowal of violence. It is mainly when organised religious institutions become involved with state institutions or when a political opposition is trying to take power that people begin advocating religious justifications for war.

They continue:

After reviewing historical analyses by a diverse array of specialists, we concluded that there have been few genuinely religious wars in the last 100 years. The Israel/Arab wars

from 1948 to now, often painted in the media and other places as wars over religion, or wars arising from religious differences, have in fact been wars of nationalism, liberation of territory or self-defense.

Regarding Islamic terrorism, the authors write:

The Islamist fundamentalist terror war is largely about political order in the Arab countries, and the presence of US forces in Saudi Arabia. It is not about religious conversion or a clash of religions. Nevertheless, bin Laden claims a religious duty in executing the war. . . .

It is mainly when organised religious institutions become involved with state institutions that people begin advocating religious justifications for war.

We need to go back to the wars of Arab expansion, the Crusades and the Reformation Wars for genuine wars over religion.

The authors—or as they call themselves, compilers—of this article include tables which give death tolls in different categories of wars. The writers say that the tables

show that the overwhelming majority of wars and the overwhelming majority of the victims of such wars cannot be classified primarily according to religious causes or religious beliefs. There have been horrific examples though where particular communities have been targeted because of their religious faith [italics mine], and these atrocities have been perpetrated by the three most 17 vicious and blood-thirsty regimes ever to hold power: Stalin's Russia, Mao's China and Hitler's Germany.

It's interesting that Harris tries so hard to make religion a source of violence when, as this report indicates, it is often

the religious who are targeted by violence. [{7}](#)

A Few More

Sam Harris's book is titled *Letter to a Christian Nation*, not simply because he's against Christianity. He wants all religion to come to an end. It just happens that Christianity is the most prominent religion in America. Because he lumps all religions together, he can smear Christianity with the evils of Islam by implication.

This is a fallacy. It's called the fallacy of *over-generalization* (or *converse accident*). If evil is done in the name of Islam, and Islam is a religion, then every religion is prone to evil. Thus, what counts against Islam counts against Christianity, too. (If one is reluctant to group Christianity with other religions, then one might see here the fallacy of *faulty comparison*, or what is more commonly called "comparing apples to oranges.")

Another argument Harris presents employs a fallacy we've already discussed, the fallacy of *causal oversimplification*. Harris commits this fallacy when he tells us that "the anti-Semitism that built the Nazi death camps was a direct inheritance from medieval Christianity." [{8}](#)

The reality of Christian anti-Semitism through the ages cannot be denied. However, Harris's evaluation is simplistic. It is very easy to narrowly focus on the very real anti-Semitism of Christians and ignore other very significant factors. For example, Harris fails to tell us that the Jews were persecuted quite apart from Christianity and even before Christianity came into existence. For example, serious tensions between the Jews and the Greeks of Alexandria in the first century B.C. spilled over into the next century. Things got so bad that Jews were forced to live in one section of the city. Their houses were broken into and looted. Synagogues were burned,

and women were dragged to the theater and forced to eat pork. Historian H. I. Bell reports that “men, women, and even children [were] beaten to death, dragged living through the streets, or flung on to improvised bonfires.”[{9}](#) He also ignores the shift from religious persecution to racial persecution which occurred in the nineteenth century, notably in Russia.

Of course, this doesn't prove that Hitler *didn't* get his anti-Semitism from Christians; but it *does* mean that one should not immediately assume that Christian prejudice is at the root of anti-Semitism. There have been other causes as well. A significant factor in Hitler's hatred of the Jews was the strong influence of *Darwinism* that led him to think that people who were racially or eugenically inferior needed to be eliminated from the evolving human race.[{10}](#)

Although some people already believed in the inferiority of some races, and although Darwinism wasn't Hitler's sole inspiration, Historian Richard Weikart writes, “Darwinism was a central, guiding principle of Nazi ideology, especially of Hitler's own world view.” Weikart quotes Richard Evans, a historian at Cambridge University: “The real core of Nazi beliefs lay in the faith Hitler proclaimed in his speech of September 1938 in science—a Nazi view of science—as the basis for action. Science demanded the furtherance of the interests not of God but of the human race, and above all the German race and its future in a world ruled by ineluctable laws of Darwinian competition between races and between individuals.” Weikart continues: “This is not a controversial claim by anti-evolutionists, but it is commonly recognized by scholars who study Nazism.”[{11}](#)

A Fundamental Commitment to Atheism

One of the questionable assumptions in *Letter to a Christian Nation* is Sam Harris's assertion that “there is no question

that human beings evolved from nonhuman ancestors.”[{12}](#) Of course, there is indeed a question about this, a question raised by highly educated scientists easily as qualified as Mr. Harris.

It’s no wonder, really, that Harris makes such bold statements. He is prevented from allowing the possibility of divine creation by his basic worldview commitments. He admits that he doesn’t know why the universe exists, but he’s confident there’s no God behind it. That sounds like a philosophical presupposition. What evidence or reasons does he give for it? Harris might like to pretend that his beliefs are based solely on the “trinity” of science, reason, and nature, but his naturalism cannot be established by these. Rather, it informs his use of them.

One of the (potentially!) maddening things about the arguments of atheists these days is their frequent silence with respect to any justification of their own basic worldview commitments. Harris goes so far as to claim that atheism isn’t really a belief; that there shouldn’t even *be* the word “atheism.”[{13}](#) Although “atheism” has long been understood to mean the belief that there is no God, many atheists today deny that. It isn’t the belief that there is no God; it’s simply an absence of belief in God.[{14}](#) It’s a kind of “default” position, a “zero” belief, where everyone should be until given sufficient reasons to believe in God. Thus, the atheist has nothing to defend or prove.

But really, folks. Who’s going to believe that atheists are belief-less about God, that they don’t actually believe that there is no God? It’s astonishing the effort they put forth in arguing against religious belief if indeed they have no belief at all.

However, we can go back and forth with atheists about whether they truly deny the existence of God, or we can let that stand and simply ask what they *do* believe about ultimate reality,

for surely they believe *something*. It's simply false to assume that atheism is some kind of zero belief, that it involves no metaphysical commitments. If one denies God, one must have some other view about ultimate reality. Naturalism is a metaphysical position, and it has serious problems of its own.^{15} If Christians are responsible to give good reasons for their belief in Christian theism, naturalistic atheists must give reasons for their naturalism.

Sam Harris speaks as a voice on high, shouting down to us poor, ignorant people who are stuck in our absurd religious beliefs. It's hard to imagine anyone with thoughtful convictions changing his or her beliefs based on this book. He's preaching to the choir. Now that you have a few tips on what to look for, you might want to take a look at the book, and hear the rest of the "sermon."

The Technological Simulacra [no footnotes]

What Saccharine is to Sugar, or The Technological Simulacra: On the Edge of Reality and Illusion

"Anyone wishing to save humanity today must first of all save the word." – Jacques Ellul

Simulacra

Aerosmith sings a familiar tune:

*"There's something wrong with the world today,
I don't know what it is,
there's something wrong with our eyes,
we're seeing things in a different way
and God knows it ain't [isn't] his;
there's melt down in the sky. We're living on the edge."*

What saccharine is to sugar, so the technological simulacra is to nature or reality—a technological replacement, purporting itself to be better than the original, more real than reality, sweeter than sugar: hypersugar.

[This article with footnotes](#)

Simulacra, (*Simulacrum*, Latin, pl., *likeness, image, to simulate*): or simulation, the term, was adapted by French social philosopher Jean Baudrillard (1929-2007) to express his critical interpretation of the technological transformation of reality into hyperreality. Baudrillard's social critique provided the premise for the movie *The Matrix* (1999). However, he was made famous for declaring that the Gulf War never happened; TV wars are not a reflection of reality but projections (recreations) of the TV medium.

Simulacra reduces reality to its lowest point or one-dimension and then recreates reality through attributing the highest qualities to it, like snapshots from family vacation. When primitive people refuse to have their picture taken because they are afraid that the camera steals their souls, they are resisting simulacra. The camera snaps a picture and recreates the image on paper or a digital medium; it then goes to a photo album or a profile page. Video highlights amount to the same thing in moving images; from three dimensions, the camera reduces its object to soulless one-dimensional fabrication.

Simulacra does not end with the apparent benign pleasures of family vacation and media, although media represents its most

recent stage. Simulacra includes the entire technological environment or complex, its infrastructure, which acts as a false “second nature” superimposed over the natural world, replacing it with a hyperreal one, marvelously illustrated in the movie *Terminator 2: Judgment Day* (1991). As liquid metal conforms itself to everything it touches, it destroys the original.

Humanity gradually replaces itself through recreation of human nature by technological enhancements, making the human race more adaptable to machine existence, ultimately for the purpose of space exploration. Transhumanists believe that through the advancements in genetic engineering, neuropharmaceuticals (experimental drugs), bionics, and artificial intelligence it will redesign the human condition in order to achieve immortality. “Humanity+,” as Transhumanists say, will usher humanity into a higher state of being, a technological stairway to heaven, “glorification,” “divinization” or “ascendency” in theological terms.

God made man in his own image and now mankind remakes himself in the image of his greatest creation (image), the computer. If God’s perfection is represented by the number seven and man’s imperfection by the number six, then the Cyborg will be a five according to the descending order of being; the creature is never equal or greater than the creator but always a little lower. [\[9\]](#)

Glorious Reduction!

www.probe.org/machinehead-from-1984-to-the-brave-new-world-order-and-beyond/

Hyperreality

An old tape recording commercial used to say, “Is it real or

is it Memorex?" By championing the superiority of recording to live performance the commercial creates hyperreality, a reproduction of an original that appears more real than reality, a replacement for reality with a reconstructed one, purported to be better than the original.

Disneyland serves as an excellent example by creating a copy of reality remade in order to substitute for reality; it confuses reality with an illusion that appears real, "more real than real." Disney anesthetizes the imagination, numbing it against reality, leaving spectators with a false or fake impression. Main Street plays off an idealized past. The technological reconstruction leads us to believe that the illusion "can give us more reality than nature can."

Hyperreality reflects a media dominated society where "signs and symbols" no longer reflect reality but are manipulated by their users to mean *whatever*. Signs recreate reality to achieve the opposite effect (metastasis); for example, in Dallas I must travel west on Mockingbird Lane in order to go to East Mockingbird Lane. Or, Facebook invites social participation when no actual face to face conversation takes place.

Hyperreality creates a false perception of reality, the glorification of reduction that confuses fantasy for reality, a proxy reality that imitates the lives of movie and TV characters for real life. When reel life in media becomes real life outside media we have entered the high definition, misty region—the Netherlands of concrete imagination—hyperreality!

Hyperreality goes beyond escapism or simply "just entertainment." If that was all there was to it, there would be no deception or confusion, at best a trivial waste of time and money.

Hyperreality is getting lost in the pleasures of escapism and confusing the fantasy world for the real one, believing that fantasy is real or even better than reality. Hyperreality results in the total inversion of society through technological sleight of hand, a cunning trick, a sorcerer's illusion transforming the world into a negative of itself, into its opposite, then calling it progress.

Hyperreality plays a trick on the mind, a self-induced hypnotism on a mass scale, duping us by our technological recreation into

accepting a false reality as truth. Like Cypher from the movie *The Matrix* who chose the easy and pleasant simulated reality over the harsh conditions of the "desert of the real" in humanity's fictional war against the computer, he chose to believe a lie instead of the truth.

The Devil is a Liar

A lie plays a trick on the mind, skillfully crafted to deceive through partial omission or concealment of the truth. The lie is the

devil's (devil means liar) only weapon, always made from a position of inferiority and weakness (Revelation 20:3, 8). A lie never stands on its own terms as equal to truth; it does not exist apart from twisting (recreating) truth. A lie never contradicts the truth by standing in opposition to it.

A lie is not a negative (no) or a positive (yes), but obscures one or the other. It adds by revealing what is not there—it subtracts by concealing what is there. A lie appears to be what is not and hides what it really is. "Satan disguises himself as an angel of light" (2 Corinthians 11:14).

A lie does not negate (contradict) or affirm truth. Negation (No) establishes affirmation (Yes). Biblically speaking, the no comes

before the yes—the cross then the resurrection; law first, grace second. The Law is no to sin (disobedience); the Gospel is yes to faith (obedience). Truth is always a synthesis or combination between God's no in judgment on sin and His yes in grace through faith in Jesus Christ. "For the Law was given through Moses; grace and truth were realized through Jesus Christ" (John 1:17). Law without grace is legalism; grace without law is license.

www.probe.org/law-and-grace-combating-the-american-heresy-of-pelagianism/

The devil's lie adds doubt to the promise of God; "Indeed, has God said, 'you shall not eat from any tree of the garden'?" (Genesis 3:1

NASB) It hides the promise of certain death; "You surely will not die" (Genesis 3:4). The serpent twists knowledge into doubt by turning God's imperative, "Don't eat!" into a satanic question "Don't eat?"

But it is Eve who recreates the lie in her own imagination. "When the woman saw that the tree was good for food, and that it was a delight to the eyes, and that the tree was desirable to make one wise, she took from its fruit and ate; and she gave also to her husband with her, and he ate" (Genesis 3:6).

Sight incites desire. We want what we see (temptation). Eve was tempted by "the lust of the eyes" (1 John 2:16) after seeing the fruit, then believed the false promise that it would make her wise. "She sees; she no longer hears a word to know what is good, bad or true." Eve fell victim to her own idolatrous faith in hyperreality that departed from the simple trust in God's word.

The Void Machine

Media (television, cell phone, internet, telecommunications)

is a void machine. In the presence of a traditional social milieu, such as family, church or school, it will destroy its host, and then reconstruct it in its own hyperreal image (Simulacra). Telecommunication technology is a Trojan Horse for all traditional institutions that accept it as pivotal to their "progress," except prison or jail. The purpose of all institutions is the promotion of values or social norms, impossible through the online medium.

Media at first appears beneficial, but this technology transforms the institution and user into a glorified version of itself. The personal computer, for example, imparts values not consistent with the mission of church or school, which is to bring people together in mutual support around a common goal or belief for learning and spiritual growth (community). This is done primarily through making friends and forming meaningful relationships, quite simply by people talking to each other. Values and social norms are only as good as the people we learn them from. Values must be embodied in order to be transmitted to the next generation.

Talking as the major form of personal communication is disappearing. Professor of Communications John L. Locke noted that "Intimate talking, the social call of humans, is on the endangered species list." People prefer to text, or phone. Regrettably, educational institutions such as high schools and universities are rapidly losing their relevance as traditional socializing agents where young people would find a potential partner through like interests or learn a worldview from a mentor. What may be gained in convenience, accessibility or data acquisition for the online student is lost in terms of the social bonds necessary for personal ownership of knowledge, discipline and character development.

An electronic community is not a traditional community of persons who meet face to face, in person, in the flesh where they establish

personal presence. Modern communication technologies positively destroy human presence. What philosopher Martin Heidegger called *Dasein*, "being there," (embodiment or incarnation) is absent. As Woody Allen put it, "90 percent of life is showing up." The presence of absence marks the use of all electronic communication technology. Ellul argued, "The simple fact that I carry a camera [cell phone] prevents me from grasping everything in an overall perception." The camera like the cell phone preoccupies its users, creating distance between himself and friends. The cellphone robs the soul from its users, who must exchange personal presence for absence; the body is there tapping away, but not the soul! The cell phone user has become a void!

The Power of Negative Thinking

According to popular American motivational speakers, the key to unlimited worldly wealth, success and happiness is in the power of positive thinking that unleashes our full potential; however, according to obscure French social critics the key to a meaningful life, lived in freedom, hope and individual dignity is in the power of negative thinking that brings limits, boundaries, direction and purpose.

Negativity gives birth to freedom, expanding our spiritual horizons with possibilities and wise choices, which grounds faith, hope and love in absolute truth, giving us self-definition greater than our circumstances, greater than reality of the senses. To freely choose in love one's own path, identity and destiny is the essence of individual dignity.

According to French social critics Jacques Ellul and Herbert Marcuse, freedom is only established in negation that provides limits and boundaries, which tells us who we are. Technological

hyperreality removes all natural and traditional limits in the recreation of humanity in the image of the cyborg. The transhuman transformation promises limitless potential at the expense of individual freedom, personal identity and ultimately human dignity and survival.

www.probe.org/into-the-void-the-coming-transhuman-transformation/

All limitless behavior ends in self-destruction. Human extinction looms over the technological future, like the Sword of Damocles, threatening humanity's attempt to refit itself for immortality in a grand explosion (nuclear war), a slow poisoning (ecocide) or suicidal regressive technological replacement. Stephen Hawking noted recently that technological progress threatens humanity's survival with nuclear war, global warming, artificial intelligence and genetic engineering over the course of the next 100 years. Hawking stated, "We are not going to stop making progress, or reverse it, so we must [recognize] the dangers and control them."

In asserting "NO!" to unlimited technological advance and establishing personal and communal limits to our use of all technology, especially the cell phone, computer and TV, we free ourselves from the technological necessity darkening our future through paralyzing the will to resist.

After we "JUST SAY NO!" to our technological addictions, for instance, after a sabbatical fast on Sunday when the whole family turns off their electronic devices, and get reacquainted, a new birth of freedom will open before us teeming with possibilities. We will face unmediated reality in ourselves and family with a renewed hope that by changing our personal worlds for one day simply by pushing the off button on media technology we can change the future. Through a weekly media fast (negation) we will grow faith in the power of self-

control by proving that we can live more abundant lives without what we once feared absolute necessity, inevitable and irresistible. "All things are possible with God" (Mark 10: 27). When we exchange our fear of idols for faith in the Living God the impossible becomes possible and our unlimited potential is released that will change the world forever!

I see trees of green, red roses, too,
I see them bloom, for me and you
And I think to myself
What a wonderful world.

I see skies of blue, and clouds of white,
The bright blessed day, the dark sacred night
And I think to myself
What a wonderful world.

The colors of the rainbow, so pretty in the sky,
Are also on the faces of people going by.
I see friends shaking hands, sayin', "How do you do?"
They're really sayin', "I love you."

I hear babies cryin'. I watch them grow.
They'll learn much more than I'll ever know
And I think to myself
What a wonderful world.

"[I]f man does not pull himself together and assert himself . . . then things will go the way I describe [cyborg condition]." – Jacques Ellul

Machinehead: From 1984 to the Brave New World Order and Beyond

Wherever the survival of humanity is threatened we find the work of Satan. In the previous century that was Fascism, then Mutually Assured Destruction during the Cold War. Today, Satan hides behind the ascendancy of the global Empire of Technology: assimilation of humanity into the machine, creating a new planetary being: the Cyborg. I believe people best understand large conglomerates when personalized, such as, referring to the Federal Government as "Uncle Sam," so I have chosen to name the Brave New World Order: Machinehead!

Post-Orwellian World

Say good bye to Orwell's nightmare world of 1984![\[1\]](#) And welcome to Machinehead: the Brave New World Order and beyond!

Machinehead is what I call the technological idol or the planetary being taking shape in the convergence of human and computer intelligence, a global cyborg. "Machine" is defined as *one global system with many subsystems*.

Experts already recognize the global system as a superorganism, one life-form made of billions and billions of individual parts or cells like an anthill or beehive, with one mind and one will. Thus, the global machine consists of millions of subsystems interfacing one over-system. Mankind acts as agent for the global machine's ascendancy, creating a technological god in its own image.

The suffix "head" refers to the *divine essence* as in "Godhead" (Forasmuch then as we are the offspring of God, we ought not to think that the Godhead is like unto gold, or silver, or stone, graven by art and man's device. Acts 17: 29).

Machinehead is the replacement of all traditional views of God with the new Living God of the Machine, best illustrated by the recent movie *Transcendence* (2014), which depicts the computer's awaking to consciousness in one mind and will, the Singularity!

Two prophets of modernity plead in dire warning for us to reconsider modern faith in expansive government and escalating technological acceleration. The first and most notable was master political satirist and critic George Orwell (1903-1950), famous for *Animal Farm* and *1984*, and the second, English literatus Aldous Huxley (1894-1963), author of *Brave New World (BNW)*.

Orwell envisioned the end of history in the all-powerful political dictatorship of *Oceania* marked by perpetual war, omnipresent government surveillance, thought control, and the ubiquitous media projection of Big Brother.

Orwell gave us the foundation of the current age in Cold War politics, but does not serve as guide to the future, which belongs, if humanity allows it, to the apparent benign technophilia of *Brave New World* that follows upon Orwell's cruel political combat boot in the face!

The Cold War Era and *1984*

Orwell divided his fictional geopolitical borders into three grids: *Oceania*, *Eurasia* and *Eastasia*, shadowing accurately Cold War divisions between Western and Eastern Bloc countries allied behind NATO (*Oceania*) and Warsaw pact nations (*Eurasia*), leaving the Third World (*Eastasia*) as pawns (proxy wars) for interminable power battles between the two Super Powers (Super States). Perpetual war characterized normative relations between the super states in *1984* with the objective to further consolidate the State's power over its own citizens. The threat of war inspires fear in the population and offers government the opportunity and justification for

further largesse and control. War insures a permanent state of crisis, leaving the population in desperation for strong leadership and centralized command and control.

The wars of *1984* were a side note to the main thrust of the novel, omnipotent government control. The novel introduced the world to the ominous character Big Brother. The central drama takes place in *Airstrip One*, the capital of *Oceania*, formerly London, England, where Winston Smith the protagonist struggles to maintain his dignity as an individual, under the crushing gears of Fascist government.

Popular criticism asserts that Orwell had Stalinism in the cross hairs in his novel. However, that interpretative ruse acts as an escape clause for the West to disavow any participation in totalitarianism. Most Americans falsely assume that *1984* applied to the Soviet Union and not NATO. Eurasia (the Eastern bloc) was a mere literary foil. Orwell's social criticism applies to all forms of totalitarianism, especially the subtle power structure of the West hidden behind democratic rhetoric, media bias, and an acute lack of national self-criticism. *Oceania* was Orwell's analogy and commentary on the future of the West after World War II. The NATO alliance, founded in 1949 the same year Orwell published *1984*, was the target of Orwell's criticism—not the Soviet Union.

***Brave New World* Order in the 21st Century: The Imperial Machine**

Huxley's novel *Brave New World* foresaw a techno heaven on earth that knows nothing of wars, political parties, religion or democracy, but caters to creature comforts, maximization of pleasure and minimization of pain; total eradication of all emotional and spiritual suffering through the removal of free choice by radical conditioning from conception in the test tube to blissful euthanasia.

Television was the controlling technology in 1984, so in *BNW* control is asserted through media, education and a steady flow of *soma*—the perfect drug and chemical replacement for Jesus. “Christianity without tears” was how Mustapha Mond the World Controller described *soma*. “Anybody can be virtuous now. You can carry at least half your morality around in a [pill] bottle.”[\[2\]](#)

Spiritual perfection commanded by Jesus, “Be ye perfect, even as your heavenly father is perfect” (Matthew 5:48), will be given to all through genetic programming, sustained through chemical infusion and mental conditioning (propaganda). If 1984 was about power for the sake of power, *BNW* emphasizes the kinder, gentler technological dictatorship that does not promise happiness, but delivers it to all whether they want it or not!

Brave New World Order amounts to technological totalitarianism, analogous to Huxley’s “World State” motto: “Community, Identity, Stability.”[\[3\]](#)

The “imperial machine” as it has been called by political scientists acts outside the traditional political process and in tandem with it when needed with no central geographical location or person or groups with any discernable hierarchical structure that directs it; the United States, Great Britain, United Nations, The People’s Republic of China or The European Union are not the power brokers of 21st century Empire, but its pawns.

Technological Empire rules as an all-encompassing, all-pervasive power, shaping human destiny in its own image.

Transvaluation of Man and Machine

A titanic transvaluation (reversal in the meaning of values) between superstructure (intangible ideological system: beliefs, convictions, morality, myth, etc.) and infrastructure

(tangible urban development: roads, buildings, houses, cars, machines, etc.) begun with the Industrial Revolution will finally be complete some time during the 21st century. Infrastructure replaces superstructure. Technology has become our belief, religion and hope, what was once a means (technology) to an end (human progress) has replaced the end with the means. Technology replaces humanity as the goal of progress; technology for technology's sake not for the good of mankind or God's glory.

The reversal of meaning is found everywhere in postmodern society beginning with the death of God and unfolding in lock step to the death of man, progress, democracy and Western Civilization; concomitantly paired with an equal ascendancy of all things technological, until the machine ultimately replaces humanity.

Marxist regimes were fond of calling their systems "democratic" or "republic" such as *the People's Republic of China* despite the fact that the *Dictatorship of the Proletariat* bears the opposite meaning. The majestic word *Liberal*, once meant freedom from government interference and rule by inner light of reason in the seventeenth century, had come to be synonymous with government regulation and planning by the twentieth century.

The cruelest irony in the transvaluation process is that the triumph of mankind over nature and tradition in the modern world has resulted in his replacement by the machine. Humanism of the modern period promoted the Rational as ideal type of Man. This ideal was already adapted to the machine as *1984* and *Brave New World* illustrated through the removal of faith and the attenuation of human nature to mechanical existence. French Intellectual Jacques Ellul argued further that "This type [of man] exists to support technique [technological acceleration] and serve the machine, but eventually he will be eliminated because he has become superfluous . . . the great

hope that began with the notion of human dominance over the machine ends with human replacement by the machine.”[\[4\]](#)

The Devil’s Logic

What we fear will happen is already here because we fear it; it will overtake us according to our fears; it will recede according to our love. (1 John 2)

Human Replacement does not necessarily mean total human extinction, a cyborg race that fundamentally alters human nature will cause a pseudo-extinction—meaning part of humanity, the Machine Class, those most fit for technological evolution will ascend to the next stage, leaving the great majority behind. The movie *Elysium* (2011) offers an excellent illustration: the technological elite, who reap all the benefits from technological advance control the earth from an orbiting space station. H. G. Wells in his famous novel *The Time Machine* painted a similar picture of human evolution that branched into two different species: the hideous cannibalistic Morlocks, “the Under-grounders,” their only principle was necessity, feeding off the beautiful, yet docile Eloi, “the Upper-worlders,” whose only emotion was fear.[\[5\]](#)

When fear dominates our thinking, love is absent from our motives. To say, “It is necessary” in defense of technological practice, abdicates choice, giving unlimited reign to technological acceleration, i.e. abortion, government surveillance, or digital conversion. “Fear” and “necessity” are the devil’s logic. Necessity imposes itself through fear of being left behind by “technological progress.”

Necessity is not the Mother of Invention, but the Father of Lies! New technology becomes necessity only after it is invented. There is no conscious need for what does not yet exist. Technological need establishes itself through habitual use creating dependence and finally normalcy in the next generation who cannot relate to a past devoid of modern

technological essentials.

“Thy will be done on earth as it is in heaven,” serves as our mandate, if we wish to create a future of universal love and empathy instead of universal speed and memory.

Knowledge without wisdom leads to disaster. “Where is the wisdom lost in knowledge?”^{6} Wisdom is the loving use of knowledge. Love counsels limits to knowledge for the liberation of all. Fear dictates limitless necessity, enslaving all.

A choice faces us. Say “yes!” to God and “no!” to *limitless* advance. Otherwise mankind faces replacement by the new digital god: Machinehead!

Predictions for the 21st

Century

From our 2015 vantage point, let's look back at predictions made in 1999 about trends which would shape this century. Although far from the end of this century, we can make a preliminary assessment of these predictions. Were they on the right track or are they already veering from current reality?

For this exercise, we drew on predictions made by seventeen scholars in 1999, published in *First Things: A Monthly Journal of Religion and Public Life*.[\[1\]](#) They discussed what they were expecting in this next century.

Past vs. Future

Some of the scholars took the approach of looking at prior centuries to see what they could learn to help them predict future trends.

Writer Charlotte Allen[\[2\]](#) began by stating, "Palm-reading the lifestyles of the future usually sets you up to be proved wrong," and looked at the last two millennia to prove her point. First, someone predicting the future in the year 1 BC would probably talk about the Roman Empire and how it was entrenched and likely to remain the dominant power. But, of course the big event of the millennium was the beginning and growth of Christianity, still impacting our world today, while the Roman Empire is only a memory. Then she notes that the future of European civilization looked grim in the year 1000, but "it turned out to be the century of European expansion and great advances in science and economics."

Looking ahead, she had a fairly negative outlook for the West:

“The combination of the new people and a fading sense of common values seems to spell disaster . . .” But on a worldwide scale, she saw us trending toward a great religious revival, the same trend that changed the outcomes of the previous two millennia.

Assessing her forecast today, we continue to see a fading sense of common values in our society and can only hope that a great religious revival will occur.

Another forecaster, political scientist Andrew Bacevich,[{3}](#) sees Americans becoming very self-centered in their view of the world. At the beginning of the last century, Woodrow Wilson brought in the idea of American global preeminence. At the end, Bill Clinton modified this sentiment to, “the allure of globalization lies in . . . the promise of gain without pain.” Bacevich believes this attitude of taking advantage of our position in the world order will continue to grow throughout this century.

However, now President Obama has brought a new idea—denying that America should be globally preeminent but rather, just one of many nations, an idea offering the promise of pain without gain. We suffer the pain of conflict with no real expectation of gaining greater respect for democracy.

The Role of Religion

One area of interest in 1999 predictions is how the role of Christianity may change. Three of our forecasters touched on this subject.

Physicist Stephen Barr[{4}](#) believed little progress will be made in answering top questions of science. Questions such as “What is consciousness, and how does it fit into . . . the physical world?” However, he believed we will make strides reconciling science and religion. He stated, “For many, the scientific spirit came to be defined in opposition to faith.

This hostility . . . really involves an inner contradiction that is coming to the surface.” It would become clear to most scientists that there is more to this existence than physical science. “By proclaiming the truth about man, religion will be found to be not an enemy of reason, . . . but perhaps its last defender.”

Theologian Peter Leithart^{5} believed this century will see the West becoming the primary mission field for Christians from places like South Korea. He wrote, “The same nations swearing fealty to Christ a millennium ago are now among the most secular on the earth.” Success in the West may only come after the current situation is reduced to rubble through removing the constraints once held in place by common Christian values. In which case, “the West will have to relearn the habits of Christian civilization from those once considered barbarians.”

Psychiatrist and author Jeffrey Satinover^{6} believed the teachings of the Third Reich are prevailing over the teachings of Christ. “Mercy killing, abortion, infanticide, [all] once seen as repulsive has been transformed into . . . beauty.” He sees our best universities focused on teaching a perverted view of fairness. “The American mind isn’t just being closed, it’s being evacuated,” i.e., filled with inconsistent thinking. The system which should be promoting truth and protecting us from such politically correct drivel is religion. As he pointed out, “God Himself is doing just fine, but His earthly defenders are on the ropes . . . [after all] genuine religion claims for itself the ability to know what’s true,” and yet we are not proclaiming or defending truth. Without the broader truth of Christianity, we may lose our identities completely.

Three very different pictures were forecast. One, optimistically, believes religion will be the last defender of reason, while another believes our hope lies in becoming a mission field, and a third worries that Christianity may be

discarded. Fifteen years into this millennium, it appears the latter two are closer to the trajectory of society, but the optimistic view is still a possibility when fueled by the prayers of believers.

Key Drivers in this Century

Some predictions made in 1999 about this century deal with the underlying forces shaping this century.

Philosopher and theologian William Dembski^{7} predicted that “information is the primary stuff of the coming age.” In the last century, the computer helped introduce an age where the amount of information we were able to use increased dramatically. But information may be far more fundamental in this universe. Should information be regarded as “a basic property of the universe, alongside matter and energy”? In other words, rather than information being something created by man, it may be a primary contributor to the creation and being of the universe.

Information as a driving factor of the material universe helps us to understand how our conscious thoughts are a part of it as well. As Dembski quotes physicist Paul Davies, “If matter turns out to be a form of organized information, then consciousness may not be so mysterious after all.”

Why is this concept important to religion and faith? If information is not primary, the world is seriously hampered in what it can reveal. We’ve seen this with the rise of modern science revealing nothing about God except that God is a lawgiver. But if information is the primary stuff, then there are no limits whatsoever on what the world can in principle reveal.

However, another prognosticator, journalist Hilton Kramer,^{8} warned that dealing with the deluge of information will be a critical factor in maintaining a healthy life and society in

this century. He stated, "All the portents point to an acceleration of the merry, mindless, technology-driven surrender to the complacent nihilism that has already overtaken so many of the institutions of cultural life. . . our democratic society has lost the power to protect . . . from the evil effect of this cultural imperative." The sea of information has the effect of removing the idea of a standard of truth for righteous living. With so many competing standards vying for their attention, many have given up on pursuing any concept of truth. This thinking has a devastating effect on life based upon Jesus, the one who said, "For this reason I was born . . . to testify to the TRUTH." (John 18:37) For the church, "everything will depend on its ability to marshal a principled resistance to the influence of popular culture" and the sea of inconsistent information.

One sixth of the way through this century, we see both the importance of information as a fundamental force and the difficulty we have dealing with the vast amount of information constantly vying for our attention. Both of these forecasts are continuing along a path to fruition in this century.

Relating to Religion

Let's consider next the perversion of tolerance and the future of ecumenism.

Author Glenn Tinder^{9} posited that the meaning of tolerance had shifted from "a willingness to put up with the characteristics of others" to a distinctly different stand "that all beliefs should be considered equally true, except for any belief that states your beliefs are correct and another's are wrong." He wrote, "Tolerance easily becomes acquiescence in the submergence of truth into a shifting variety of opinions. . . [this view] cannot be acceptable to . . . Christians . . . challenged . . . to develop an attitude toward the religious and cultural confusions surrounding them that is tolerant" in a way that is distinct from today's new

tolerance.

Tinder suggested using the term “forbearance,” reflecting a view imbued with brotherly love, a recognition of a diversity of views, and an understanding that one should speak out for the truth as one knows it. “In an era that says to us every day, ‘there is no Truth,’ the art of forbearance might at least help us resist the temptations of relativism.”

In 2015, the post-modern definition of tolerance continues to hold sway. But a discernible trend to use another term to describe the loving attitude Christians have toward others has not appeared. The fight against promoting any set of ideas as equally valuable is continuing but with no discernible progress.

Princeton University law professor Robert George^{10} looked back to the Second Vatican Council in 1965 when many mainline Protestants and Catholics were wondering if it were a precursor to ultimate reunification of the Christian Church. Surprisingly, by 1999 it was not the left talking of ecumenicalism, but rather the religious right. The consistency of moral positions in the Catholic Church and in evangelical circles had blossomed into a genuine spiritual engagement.

“How can there be genuine spiritual fellowship between people who sincerely consider each other to be in error on profoundly important religious questions?” George suggested it was genuine because it took religious faith and religious differences seriously.

Their common goal of combatting the increasing rise of non-Christian thought would cause them to work together. He stated, “I am even hopeful of its capacity to survive victories—though that of course is the far greater challenge.”

Today, in 2015, cooperation continues between conservative Catholics and evangelicals on moral issues in our world. Some

Catholic and evangelical leaders released the Manhattan Declaration calling for the sanctity of human life, the dignity of marriage, and freedom of religion. And, in 2011, the organization, Evangelicals and Catholics Together, released a statement supporting religious liberty.

What Rules Our World

We have been looking at predictions made for this century in 1999 about factors that would rule our world situation today and in the future.

Theologian Paul Griffiths^{11} noted that at the end of the first millennium, the primary institutional form was the church. During the second millennium, it was joined by the nation-state and corporations. Entering the third millennium, “the forces . . . are now primarily economic and secondarily political” with the churches existing at the margin of society.

He predicted the significance of corporations will advance as nation-states decline, making us a world not defined by what we believe, but by what we consume. Hopefully “as the bankruptcy . . . of the corporate promise begins . . . to become evident, people turn . . . to the churches with renewed passion.” To become anything other than a religious preference box on a census form, churches must look to provide a message that offers a hope of resistance.

Today, we are more driven by consumption. Time will tell if Griffiths is right and this trend will ultimately lead us back to the church with renewed passion.

Legal scholar Robert Bork^{12} predicted the “rule of law” will no longer have independent moral force of its own. Bureaucracies will lay down most of what governs with little accountability to the people. Elections and legislative deliberation will be disconnected from the real governance,

making politics simply entertainment. “Democracy will consist of the chaotic struggle to influence decision makers who are not responsive to elections.”

Today, we are seeing the President and bureaucracy taking away the legislative authority of the Congress. If anything, this process seems to be picking up steam in the first half of 2015. If this trend remains unchecked, Bork’s prediction will come to fruition.

Francis Cardinal George^{13} foresaw a major shift in the forces of global conflict. Where most conflicts were between states, in this new century we will see the clash between modern Western states, Asian civilizations and Islamic civilization. Uncertainty about the intentions of other civilizations will produce fear between them. For example, the post-modernity of the West directly attacks the pre-modern, faith-based culture of the Islamic societies.

George felt Christians should be open to Muslim cooperation in “addressing the moral failures of modernity.” The church could take the lead in creating a “globalization of solidarity.”

So far in this century, the clash between the West and Islamic civilizations is at the forefront of world relationships with no significant signs of a breakthrough in understanding or compromise.

Looking back over the last fifteen years, many of these predictions from 1999 are roughly on track. These pundits did not paint an encouraging view of the future. It is incumbent on evangelicals to pray fervently and work diligently to change western society for Christ over the next 85 years.

The Purpose of Life

Paul Rutherford looks at the purpose of life from his Christian perspective as well as Buddhism, Hinduism, Islam and Hollywood.

On a warm day recently I visited my alma mater. And between the hallowed halls of old, a chance encounter reconnected me with an old friend. Eager for news, she asked me what I'd done since graduating, and my easy reply included mission work and how much I enjoy it. She smiled and said, "That's great, as long as you're happy." Have you had this type of conversation before?

If you have, then perhaps you also understand my consternation at my friend's response. I don't do mission work to be happy. I do it to honor and please the Lord Jesus Christ. On some level I felt misunderstood. Yet, her response indicates, I think, a prominent view held in our culture that

happiness is what really matters. As far as her response is concerned, I could just as well have taken a job at a coffee shop, so long as I was happy.

Her response, while not uncommon, demonstrates a prevailing value in our culture today—pluralism. Mankind's ultimate purpose can be attained through multiple acceptable means, be they religion, economics, or otherwise.

You might be saying to yourself, "How did you get from your friend's comment about your happiness to mankind's ultimate purpose?" Good question. I skipped a few steps. When my friend bases her approval of what others do on their happiness, that means that what they *do* to be happy matters less than the fact that they *are* happy. Being happy then becomes the primary purpose or aim in life. You see? Happiness becomes a sort of general unit of measure for life's success. Since I am happy in life, I received my friend's stamp of approval.

But what is our ultimate purpose? Isn't that the million dollar question! And it's precisely the question I want to explore in this article. The answer you give will depend on your perspective. So I'll consider several different perspectives, or worldviews, including my own, Christianity. Contrary to current thinking, the fact that there are different perspectives which result in differing meanings to life does not mean that all perspectives are equally true or even valid. Truth is found in Scripture so that's where we look to discover the true meaning of life.

As a Christian, I believe the ultimate purpose in life is salvation; that is, after I die I want to be with God for eternity.

"Being with God for eternity is great," you might say. "But how does one do that?" That's a great question. Certainly not all Christians will state it the same way, but the answer is believing in Jesus Christ of Nazareth as God who died for your

sins and rose again to new life (cf. 1 Cor. 15:3-4). A Christian living out this principle patterns his life and relationships after Jesus Christ—serving, loving, and teaching.

Christianity is unmistakably present in America, but obviously this isn't the case in every culture. Next we'll consider mankind's purpose according to a very different worldview closer to home than you might think: Buddhism.

Buddhism

I was at a diner last week grabbing a late night burger with my friend from Bible study, and I mentioned a desire to start a new workout regimen. He handed me a business card for a place doing some new form of [yoga](#), apparently really good for you.

Is it me, or does yoga seem to be increasing in currency among Christians as just one more way to work out?

It's totally fine for Christians to practice yoga as physical exercise, isn't it? The answer is too complex to say here, but the sheer fact that we pose the question underscores the unmistakable impression yoga has made on American culture.

What if I did practice yoga? What if I were a practicing Buddhist? Would that make a difference anyway? I think so.

To ask a larger question, what is our ultimate purpose? Once again, the answer depends upon your perspective. For the yoga-practicing Buddhist, the answer is nothing. Literally. The ultimate purpose for life is to cease to exist, or what is called *nirvana*.

Traditionally understood to be from India, yoga is a discipline of the mind and the body, and is actively practiced today by both Buddhists and Hindus.^{1} But increasingly, Americans have jettisoned the spiritual disciplines of yoga,

ignoring its spiritual aspects, in favor of the sheerly physical, often in lieu of the morning jog.

Now, ceasing to exist, or *nirvana*, may seem more like an anti-purpose for life because it is defined by not living rather than that for which one lives. Nevertheless, much thought and action is involved in this monumental goal of *nirvana*.

One such step in attaining *nirvana* is realizing the second of the Four Noble Truths: all frustration in life arises from desire. Did that make your head spin? It makes mine spin. Simply put, frustration is an unmet expectation or desire, so frustration's origin then, is desire.

Life is filled with desires—food, shelter, or clothing may be the first to come to mind—but there are a myriad of others from cars, to jewelry, technology, even relationships.

Follow me here. Since desire leads to frustration, the best way to eliminate frustration is to eliminate desire. This is precisely the path to *nirvana*, the elimination of desire. Therefore, we must cease to exist in order to free ourselves from this frustration or suffering.

Do you see the difference in life's purpose? The ultimate purpose in life for the Christian is to be with God for eternity, but for a Buddhist it's to cease to exist. Very different indeed.

Hinduism

Fifty singers gather on a Sunday morning in Queens. The director groups them together and gives them one final word of instruction before they begin. Listeners don't entirely fall silent. Priests in the background continue to laugh among themselves, as the choir begins, "Om! Ganesha Sharanam!"

Notice something different about this picture? It may not fit your expectations. That's because this choir isn't singing

praise to Jesus Christ; they aren't even in a church. Rather they're Hindus worshipping in their New York temple.

Surprised? So were many of the devotees gathered that Sunday morning in late August 2009, the New York Times reported.^{2} Most of the faithful Hindus worshipping there for years had never before heard a Hindu choir. It is a mix of both Hindu and Christian traditions.

This story testifies to the strange and wonderful effects of very different religions meeting in a single culture, and undoubtedly demonstrates the pervasiveness of Hinduism in American culture today.

Choirs seem so commonplace in America. How can a Hindu, like those mentioned earlier, have never heard one in his own religion before? The answer lies in the difference between Hindu and Christian worship.

Hindu worship tends to be much more individualistic. And while predominantly occurring at a temple rather than at one's home, Hindu worship is more focused on prayers and rituals rather than on an assembly or gathering as a Christian understands a church service.

Take a step back. Ask a larger question. Why does the Hindu go to temple? What's his motivation? The answer? To appease a myriad of gods in hopes of being reincarnated in the next life as a higher life form. If you're a human being listening to this right now, then you've already had thousands of good lifetimes prior, combined to bring you to your current form.

To be fair, Hinduism is a huge religion with over one billion practitioners, spanning thousands of years, and existing in multiple different cultures. Some scholars believe it is the oldest recorded religion. So to ascribe the Hindu's motivation as wanting to please the gods is a drastic oversimplification, but is nonetheless true for many if not most Hindus.

You see, for the Hindu the world exists eternally. People die and are reborn all the time in a never-ending cycle. The ultimate purpose for life, then, is to be freed from the never-ending cycle of rebirth and become one with Brahma, or the ultimate singularity of the universe. This release is called *moksha*. It's achieved by offering sacrifices to the gods, including prayers, and right living.

Does this sound like your life? If not, you're probably not Hindu. This further underscores the fact that all religions at their core may not all be the same.

Islam

"Boycott Facebook" reads the placard of an Islamist protestor in Karachi.

Late spring 2010 in Pakistan, a Facebook page declares, "Everybody Draw Mohammed Day!" A Pakistani high court deems the material highly offensive, and the entire Facebook website was shut down within its borders as a result, the *Wall Street Journal* reports.^{3}

Ban Facebook! You may find yourself asking, why would anyone ever do that? What about rights to free speech, or exercise of religion? Doesn't a Facebook ban deny people just such rights? Well, under a government far less liberal in doling out these liberties, claiming rights quickly makes a sticky situation.

But the short answer to the motivation for banning Facebook is because they're Muslim, and as such they regard as sacred Mohammed, their most famed prophet. He's so sacred, in fact, that to depict him in a portrait is a kind of blasphemy. Hence art from Muslim cultures is either calligraphy or geometric (think mosaics).

There is more going on here beneath the surface, leading an entire country to ban Facebook. It's not just reverence for a significant religio-cultural phenomenon, or even devotion to

their faith. No, it goes deeper than that. Muslims have a different perspective from most Westerners on how this world operates at its most fundamental level.

For the Muslim there is one God, Allah. He is the supreme unquestioned creator and Lord of the universe who revealed his intentions for mankind through his prophet Mohammed. Reverence for Allah is paramount, even above the value of the individual. This leads Muslims to value obedience to Allah over freedoms of the individual. In this case obedience is not portraying Mohammed.

You may respond by posing once again the previous question: what about a man's right to speech or religion? But for the Muslim, you're simply asking the wrong question. A better question the Muslim would ask is, what about putting Mohammed in his proper place, and by extension obeying Allah?

The ultimate purpose in life for a Muslim is to obey Allah and to be rewarded after life by entering paradise. Unlike Christians, Muslims do not believe mankind is sinful and in need of a savior, but only needs to perform the right actions, of which we are certainly capable. While Muslims hope for the mercy of Allah, the right to enter paradise is a result of obedience, not his grace. So central is this unmitigated obedience to Muslims, that many give their lives to defend Allah and their way of life.

Rights to free speech aside, when given the choice between a Facebook ban and martyrdom, suddenly Facebook deprivation doesn't seem so bad.

Hollywood

An honest working man returns home from a rough day at the office. He's a struggling ad specialist for a sports magazine. He's in his mid-thirties, single, and completely eligible. But the right woman just hasn't come along. He's a handsome,

brown-haired man with kind blue eyes and a knack for making you want to trust him when he flashes you his easy smile. We long for him to find satisfaction in someone as we trace the story of his search.

One night he meets a dashing young lady. Our hearts jump for him. A relationship ensues and they grow closer. One night in desperation to express his deepest and truest feelings for the gal, he confesses, "You complete me." Perhaps now you realize I'm describing the story from Hollywood's hit 1996 film, *Jerry Maguire*.

We've been considering the ultimate purpose of man from different perspectives, and, with an ever-increasing number of Americans considering themselves not religious, I've gone to a secular source for consideration: Hollywood.

Jerry Maguire's famous confession, "You complete me" is a wonderful illustration of mankind's ultimate purpose being himself, or what is called humanism. Maguire realizes something is missing in his life. He longs for satisfaction, for joy, for love, but his seeming inability to find it causes him pain. We realize that the world in which we live is broken and imperfect, and who would disagree?

Maguire finds in this woman, in this relationship, the completion of himself. He looks to her to be what he cannot be himself. In so doing, he creates out of her a savior. He looks to her to save him from his misery of singleness and heartache. He needs her in order to be whole himself.

This story is a clear demonstration of mankind looking to himself to be his ultimate purpose. I am generalizing a bit to choose words from a single film, but many messages from Hollywood films don't contradict this theme. We want to be able to save ourselves. Isn't that the American ideal: pulling oneself up by one's bootstraps?

Beware what Hollywood would have us believe, that our ultimate

purpose is ourselves, and only we can save ourselves. Hollywood would have us believe that life can be found in relationships, people, or even ourselves. It's a lie. Jesus said, "I am the way, the truth, and the life" (John 14:6). Only Jesus can save mankind. Serving Him is the only purpose that will bring satisfaction and joy in life, only in Him alone.

"What is my ultimate purpose?" That's the question. The answers we've considered from different perspectives range from happiness to appeasing the gods. Why does it matter? Because your ultimate purpose determines how you live, and while we may all be alike, since we are all human, when it comes to what really matters in life, we are very different indeed.

Putting Beliefs Into Practice Revisited: Twenty-somethings

and Faithful Living

Rick Wade updates his earlier discussion of 3 major ingredients necessary for Christians' faithful living: convictions, character, and community.

A Turning Point

In recent months Probe has focused more and more attention on the state of the younger generations in the evangelical church regarding their fidelity to basic Christian doctrines and Christian practices like prayer and church attendance. Our concern has deepened as we've become more aware of the fact that, not only is the grasp on Christian beliefs and practices loosening, but that some unbiblical beliefs and practices in our secular culture are seen as acceptable for Christians.

With this in mind it seems appropriate to revisit a [program](#) I wrote over ten years ago on the necessity of linking our beliefs with the way we live in order to practice a healthy Christian life. It was based on Steven Garber's book *The Fabric of Faithfulness*.^{1} Garber's book was written with college students in mind. However, the principles are the same for people in other stages of life as well.

The Fabric of Faithfulness was written to help students in the critical task of establishing moral meaning in their lives. By "moral meaning" he is referring to the moral significance of the general direction of our lives and of the things we do with our days. "How is it," he asks, "that someone decides which cares and commitments will give shape and substance to life, for life?"^{2}

In this article I want to look at three significant factors

which form the foundations for making our lives fit our beliefs: convictions, character, and community.[{3}](#)

For many young people, college provides the context for what the late Erik Erikson referred to as a *turning point*, “a crucial period in which a decisive turn *one way or another* is unavoidable.”[{4}](#) However, as sociologists Christian Smith and Patricia Snell report, graduation from college is no longer the marker for the transition of youth to adult.[{5}](#) Steve Cable notes that “most young adults assume that they will go through an extended period of transition, trying different life experiences, living arrangements, careers, relationships, and viewpoints until they finally are able to stand on their own and settle down. . . . Some researchers refer to this recently created life phase as ‘emerging adulthood,’ covering the period from 18 to 29.”[{6}](#)

Telos and Praxis

The young adult years are often taken as a time to sow one’s wild oats, to have lots of fun before the pressures (and dull routine!) of “real life” settle in. Too much playing, however, delays one’s preparation for those pressures. In addition, bad choices can be made during that time that will negatively affect the course of one’s life.

Theologian Jacques Ellul gives this charge to young people:

“Remember your Creator during your youth: when all possibilities lie open before you and you can offer all your strength intact for his service. The time to remember is not after you become senile and paralyzed! . . . You must take sides earlier—when you can actually make choices, when you have many paths opening at your feet, before the weight of necessity overwhelms you.”[{7}](#)

Living in a time when so many things seem so uncertain, how do we even *begin* to think about setting a course for the future?

Steven Garber uses a couple of Greek words to identify two foundational aspects of life which determine its shape to a great extent: *telos* and *praxis*. *Telos* is the word for the end toward which something is moving or developing. It is the goal, the culmination, the final form which gives meaning to all that goes before it. The goal of Christians is to be made complete in Christ as Paul said in Colossians 1:28: "Him we proclaim, warning everyone and teaching everyone with all wisdom, that we may present everyone mature [or complete or perfect] in Christ." This over-arching *telos* or goal should govern the entirety of our lives.

Garber's second word, *praxis*, means action or deed.^{8} Jesus uses the word in Matthew 16:27 when he speaks of us being repaid according to our deeds or *praxis*.

While everyone engages in some kind of *praxis* or deeds, in the postmodern world there is little thought given to *telos* because many people believe no one can *know* what is ultimately real, what is eternal, and thus where we are going. We are told, on the one hand, that our lives are completely open and free and the outcome is totally up to us, but, on the other, that our lives are determined and it doesn't matter what we do. How are we to make sense of our lives if either of those is true?

Where we begin is the basic beliefs that comprise the *telos* of the Christian; i.e., our convictions.

Convictions: Where It Begins

When we think of our "end" in Christ we're thinking of something much bigger and more substantive than just where we will spend eternity. We're thinking of the goal toward which history is marching. In His eternal wisdom God chose to sum up all things in Christ (Eph. 1:10). New Testament scholar J. B. Lightfoot wrote that this refers to "the entire harmony of the universe, which shall no longer contain alien and discordant

elements, but of which all the parts shall find their centre and bond of union in Christ.”[{9}](#) It is the *telos* or “end” of Christians to be made perfect parts of the new creation.

Who is this Jesus and what did he teach? He said that He is the only way to God, and that our connection with Him is by faith, but a faith that results in godly living. He talked about sin and its destruction, and about true faith and obedience. What Jesus said and did provide the content and ground of our convictions, and these convictions provide the ground and direction for the way we live. These aren’t just religious ideas we’ve chosen to adopt. They are true to the way things are.

Garber tells the story of Dan Heimbach who served on President George H. W. Bush’s Domestic Policy Council. Heimbach sensed a need while in high school to be truly authentic with respect to his beliefs. He wanted to know if Christianity was really true. When serving in Vietnam he began asking himself whether he could really live with his convictions. He says,

“Everyone had overwhelmingly different value systems. While there I once asked myself why I had to be so different. With a sense of tremendous internal challenge I could say that the one thing keeping me from being like the others was that deep down I was convinced of the truth of my faith; this moment highlighted what truth meant to me, and I couldn’t turn my back on what I knew to be true.”[{10}](#)

Christian teachings that we believe give meaning to our existence; they provide an intellectual anchor in a world of multiple and conflicting beliefs, and give direction for our lives. For a person to live consistently as a Christian, he or she must know at least basic Christian doctrines, and be convinced that they are “true truth” as Francis Schaeffer put it: what is really true.

Character: Living It Out

So our beliefs must be grounded in Christ. But we can't stop there. Not only do we need to receive as true what Jesus taught, we also need to live it out as He did. After telling the Corinthians to do all things to the glory of God, Paul added that they should "be imitators of me as I am of Christ" (1 Cor. 11:1).

Morality is inextricably wedded to the way the world is. A universe formed by matter and chance cannot provide moral meaning. The idea of a "cosmos without purpose," says Garber, "is at the heart of the challenge facing students in the modern world."[\[11\]](#) This is a challenge for all of us, student and non-student. Such a world provides no rules or structure for life. Christianity, on the other hand, provides a basis for responsible living for there is a God back of it all who is a moral being, who created the universe and the people in it to function certain ways. To not live in keeping with the way things are is to invite disaster.

If we accept that Christianity *does* provide for the proper development of character in the individual based on the truth of its teachings, we must then ask *how* that development comes about. Garber believes an important component in that process is a mentor or guide.

Grace Tazelaar graduated from Wheaton College, went into nursing, and later taught in the country of Uganda as it was being rebuilt following the reign of Idi Amin. At some point she asked a former teacher to be her spiritual mentor. Says Garber, "This woman, who had spent years in South Africa, gave herself to Grace as she was beginning to explore her own place of responsible service." Grace saw her mentor's beliefs worked out in real life.[\[12\]](#)

The White Rose was a group of students in Germany who opposed Nazism. Brother and sister Hans and Sophie Scholl were

strongly influenced in their work by Carl Muth, a theologian and editor of an anti-Nazi periodical. One writer noted that “The Christian Gospel became the criterion of their thought and actions.” Their convictions carried them to the point of literally losing their heads for their opposition.

Being a mentor involves more than teaching others how to have quiet times. They need to see how Christianity is fleshed out in real life, and they need encouragement to extend themselves to a world in need in Jesus’ name, using their own gifts and personalities.

Community: A Place to Grow

Garber adds one more important element to the mix of elements important in being a Christian. We’ve looked at the matter of convictions, the beliefs we hold which give direction and shape to our lives. Then we talked about the development of character, the way those beliefs are worked out in our lives. Community is the third part of this project of “weaving together belief and behavior” (the sub-title of Garber’s book), the place where we see that character worked out in practice.

Christian doctrines can seem so abstract and distant. How does one truly hold to them in a world which thinks so differently? Bob Kramer, who was involved in student protests at Harvard in the ‘60s, said he and his wife learned the importance of surrounding themselves with people who also wanted to connect *telos* with *praxis*. He said, “As I have gotten involved in politics and business, I am more and more convinced that the people you choose to have around you have more to do with how you act upon what you believe than what you read or the ideas that influence you. The influence of ideas has to be there, but the application is something it’s very hard to work out by yourself.”[\[13\]](#)

The Christian community (or the church), if it’s functioning

properly, can provide a solid plausibility structure for those who are finding their way. To read about love and forgiveness and kindness and self-sacrifice is one thing; to see it lived out within a body of people is quite another. It provides significant evidence that the convictions are valid. “We discover who we are,” says Garber, “and who we are meant to be—face to face and side by side with others in work, love and learning.”^{14}

During their university years and early twenties, if they care about the course of their lives, young people will have to make major decisions about what they believe and what those beliefs mean. Garber writes, “Choices about meaning, reality and truth, about God, human nature and history are being made which, more often than not, last for the rest of life. Learning to make sense of life, for life, is what the years between adolescence and adulthood are all about.”^{15}

Convictions, character, and community are three major ingredients for producing a life of meaningful service in the kingdom of God, for putting together our *telos* and our *praxis*.

Crimping Consciences: Texas

City Railroads Pro-Gay Ordinance

Byron Barlowe blogs about the his city's Anti-Discrimination ordinance intended to give full recognition to the LGBT community at the expense of those who disagree.

New Anti-Discrimination Policy Approved

According to the [Dallas Morning News Plano Blog](#), "In a split vote Monday, the Plano City Council passed the controversial Equal Rights Policy [ERP] over the objections of many residents in the standing-room-only crowd.

The amendment to the city's 1989 anti-discrimination policy extends protections from housing, employment and public accommodation discrimination to include sexual orientation, gender identity and other categories" like veterans. While no one objected to the inclusion of veterans, an overwhelming number of surprised and very lately aware (as in, the day of) citizens voiced strong opposition. These objections, while noted, seemed to make little to no difference to the city council and certainly to Mayor Harry LaRosiliere, who was so eager to vote for the statute that he went out of order during proceedings.

As a Plano resident who publicly urged the council to vote "No" on the measure, I offer some reflections on the issue—both local and larger—from a biblically informed worldview.

Good Intentions: Trying to Legislate Values *Directly*

Rather than seeking to legislate merely out of a set of values—an unavoidable reality—the Plano City Council clearly

tried to impose a set of values directly onto the public by adopting this more expansive anti-discrimination ordinance. Such legislative overreach has become part and parcel of an increasingly politically correct polity known as the United States of America. Plano is now more PC. While this kind of ordinance is not only inadvisable because it cannot hope to work well, it also steps beyond the scope of a proper role of government.

IT CANNOT WORK BECAUSE . . .

We often hear the phrase “You can’t legislate morality.” Well, yes and no. While the very nature of human law at its root is a delineation of and codification of right vis a vis wrong—that is, strictures or incentives administered by the state as a morally informed code of conduct—it is also true that government cannot successfully impose morality, per se, onto the consciences of their citizens.

Yet, that is precisely what such ordinances as Plano’s ERP seeks to do. Plano’s “out” regarding the problem of conscientious objection? City Attorney Paige Mims assures us that if anyone outside of the many exempted statuses has a moral or religious objection, they can go through a waiver process. This is, on its face, an undue imposition on businesspeople who don’t fall under exempted categories like education, non-profit or religious. Recent legal precedent (see Hobby Lobby case) makes clear that religious businesses do not somehow lay down their rights of conscience when they go into business.

ROLE OF GOVERNMENT. . .

When government entities try to arbitrate motives, for example hate crimes laws that purport to regulate actions based on the attitudinal intent of the actor, it steps into a sphere where it does not, indeed it cannot, belong. In other words, it takes on a godlike sovereignty to righteously discern between this and that intention. Can’t be done. Not righteously. Not fairly.

People—including city legal departments and judges—are fallible humans who lack the innate ability to administer justice based primarily or solely on someone’s internal motivation. “The purposes of a person’s heart are deep waters, but one who has insight draws them out” (Proverbs 20:5). Drawing out the “purposes” of a man’s or woman’s heart is certainly not a governmental role. But this is what it takes to know motives, a role only God claims full access to, and a role traditionally reserved for clergy, other spiritual advisers and psychologists.

Here is a pithy bunch of [biblical worldview teaching on the role of government](#).

Biblically, the proper role of government is founded in limits primarily written in Romans 13. As I understand it, a biblical worldview on government’s role is limited to: fighting wars, passing and enforcing laws concerning public human interactions and that’s about it. Anything else falls under the jurisdiction of religious and social institutions. Government: stay out!

I’m not arguing for such a state of affairs as an absolute in the real world, but as a plumb line to measure when government has stepped over its proper boundaries. In the case of Plano’s ERP government has overstepped.

Progressivism on Parade

The subtext of public deliberations on Plano’s ERP was plainly a progressive agenda. Why else would a city seek to get “ahead of the curve” on a social issue such as gender bias or sexual identity discrimination or whatever the euphemism is today? (Refer above to the value of limited role of government, which was expressed repeatedly to the council by citizens of Plano.) The council, challenged that there are no known cases of such discrimination, seemed to shrug dismissively and invoke the need to “get ahead of” the issue.

“The issue of equality is a basic human rights issue and the choice for some to focus on a person’s sexuality is conflating the issue,” said the Mayor. Conflating what with what? Either the mayor misunderstands the term “conflating” (making things the same) or he’s basically accusing objectors of the very thing that has been foisted upon them—namely, making one’s sexual choices (not their true sexuality) the determiner of human rights. This is like watching someone start a fight over a piece of land and then accusing the one attacked of starting that same fight over that very piece of land!

Questioning the need for the statute was otherwise met with a not-so-veiled sense of accusation, an implication of inherent bias on the part of the objectors, despite an overall congenial atmosphere. So, if I question the veracity of the claim to need such a policy or ask for reasonable cause, I am automatically anti-gay? That’s patently false and unfair. Yet that was the sense of things in a politically correct undercurrent that is the zeitgeist of our day.

Worldview War

This is the serious game begun back in the 1970s by Marshall Kirk and Hunter Madsen who spelled out the propaganda project of the gay lobby in a book titled [*After the Ball: How America Will Conquer Its Fear & Hatred of Gays in the 90s*](#). Now that their jamming (name-calling, guilt by association and other tactics) have worked so well, only an implicit inference need be made at such meetings as Monday night’s. It has a chilling—no—a virtual shutdown effect.

Yet, many citizens displayed aplomb when speaking on the Constitution and related matters. Businesspeople appealed to the unfairness of having to seek redress through a voucher system. One person well said in response: “The Constitution is my waiver.” First Amendment (or any other) rights do not require special permission. It’s government’s role merely to ensure them, which Plano may think it’s doing by elevating

ever more special interests to protected status. That is an upside-down approach that's illegitimate no matter how much case law exists or how many other cities and companies enact similar policies.

The “We’re Just Following” Fallacy

An admittedly very arguable point I'd like to add: Mayor LaRosiliere and City Attorney Mims claimed that other major cities in Texas have such statutes on the books. Hence we are not, as implicated, “out front” taking legal risks, but rather are following others' lead. This seems disingenuous.

Are we “out in front” of the issue or are we, as strongly emphasized by the Mayor, simply one in a fairly long line of municipalities trying to codify fair treatment to people of all lifestyles and segments? One could make the case that Plano is in the vanguard overall but not first in implementation. However, that is unsatisfactory to many. You can't ultimately have it both ways: either you're progressive on social issues (which does not truly reflect Plano well) or you're just falling in line with current legal trends.

The “Gay Gene” at the Bottom of the Debate

One thing is sure: *increased expansion of rights and privileges to previously unaddressed parties is the trend in our culture—and lots of it has to do with sexuality in a newly politicized way.* But we thought government was supposed to get out of our bedrooms?

Any claim to that distinction has been lost with the adoption of the near-universal belief in what amounts to a “[gay gene](#)”—that a person inherently possesses a sexual identity that may indeed be homosexual or of other varieties. This, over and against a mere proclivity or attraction to the same sex, which leaves room for choice, which is an ethical issue.

Remove choice regarding homosexuality, you remove any basis of objection. Remove objection, you can run roughshod over any cultural restraints on the free and damaging expression of sexuality outside the bounds of its Inventor, God. Remove those restrictions, celebrate the lifestyle, then codify and impugn those who disagree, and the After the Ball agenda is a complete success.

Monday night's meeting was an incremental victory toward this end, whether or not players on the city council or either side of the issue realized it. Regarding objectors' motives, it's one thing to care for individuals whose sexual identity is in question or those who act out a gay lifestyle and it's another kind of thing entirely to exercise one's rights to oppose codification of these choices and lifestyles. I and many of my friends there that night were doing one while we practice the other in private situations, too.

There is no cognitive dissonance or hypocrisy here—one can do both public square advocacy of conservative values and also outreach to individuals who struggle in a certain area of sin—namely other-than-heterosexual-wed sex. True Christlike love does not affirm that which the Bible condemns, but shows grace nonetheless.

There is a Precedent for Unintended Consequences and Abuse

Plano's ERP sets up the same oppression of religious objectors that has been seen already across the U.S. with cake bakers, wedding venue owners and others who—for reasons of conscience—refuse to do business with certain parties in select situations like gays getting married. Yes, exemptions were written into Plano's ordinance, but does anyone seriously believe these will stand up under judicial scrutiny in this day and age? The erosion of rights continues—and saying so, again, is not to be confused with [intolerance](#).

This brand of identity politics is rooted in the cultural adoption of the doctrine of a gay gene (“God or nature made me this way!”), which is at a worldview level, where most objectors to the statute were coming from. We object to the underlying presupposition that homosexuality is not utterly tied up with choice, which is so fundamental to opposition to the gay rights issue. (I almost come off as a throwback rube for even bringing it up in today’s enlightened culture—which furthers my point!)

The Condescension that Falsely Pits Feelings vs. Facts

Monday night’s proceedings—at least from the point of view of the city council—were saturated with what has been called the Sacred / Secular Split. On this view, there are basically two levels of discourse: an area of public life informed largely by science but also by enlightened social values (invariably liberal / progressive / non-traditional ones) balanced unevenly by a lesser valued, private world of emotional / psychological / religious sentiments.

The former—where real knowledge resides—should supposedly be the domain of public policy. The latter—again, a private set of often closely held feelings and values that should have no sway in the public arena yet the existence of which are somewhat guarded by government and other institutions—are to be tolerated as inevitable but will hopefully catch up with social contracts like those being forged by the gay lobby and societal institutions across the waterfront. The notion is: “You have a right to your private opinion. Just don’t bring it into the public square.”

This attitude, this taken-for-granted starting place was most evident in closing remarks made by several city council members—all of whom happened to vote for the policy. One council member waxed eloquent on his world travels, noting

that the most advanced societies he'd run across made it a point never to discriminate. (I don't know where he's been, but perhaps his hotel's staff might beg to differ—just guessing.)

More poignantly, he and another council member who said that her Christian faith informed her “yes” vote, was only one more who joined a chorus of comments like:

“There were lots of strong feelings on the topic of discussion tonight” and

“This is a very emotional issue for many. . . .”

The plain inference was that objections were raised out of the private, sacred area of life, laden with “emotion” and “feelings” while effective debate occurred on the level of law, fact and agreed-upon societal norms (at least the evolving kind that our “City of Excellence” wants to be known for).

Pronouncements by a clergy woman (Disciples of Christ) who serves as an officer of a Plano Gay-Lesbian-Bisexual-Transgender association, the mayor and at least one more gay advocate that the passage of the ERP was just “the right thing to do” obviously paints the vast majority of citizens as those who want to do the wrong thing. According to Mayor LaRosiliere, “Providing equal rights to everyone is the right thing to do.” Rights to what? Rights in displacement of whose rights? The task in a pluralistic society is to find that fairest middle ground—and that failed Monday night.

Apparently bigotry, at least ignorance, was the only thing standing in the way of Plano's ERP. Thank you for the condescension. Which leads to my final point: the race card was deftly played by none other than Mayor LaRosiliere where it has no place. And the Mayor did precisely what he accused others of doing, that is . . .

. . . Conflating Race & Sexual Lifestyle

Plano's Mayor ended deliberations (or nearly did) with [a speech](#) on the equivalency of historical human rights movements to the current push for special privileges for sexual identities and lifestyles. His well-written story arc was centered on the question, "Why are we doing this now?" In a series of juxtaposed historical references, he posed the question he deemed was being needlessly asked about Plano's Equal Rights Protection ordinance: **Why pass this now if there is no case on record of any discrimination?** In the case of the infamous Dredd-Scott Supreme Court decision that ruled blacks were 3/5 of a person one might ask, he said, "Why are we doing this now?"

"If we spoke in 1919," LaRosiliere continued, "to allow women to vote, the question would be, 'Why are you oppressing me and making me subject to this now.'" He went on to paint discrimination against the Irish in early 19th Century New York and segregation in the South in the 20th Century as morally equivalent instances comparable to the current situation—ostensibly oppression of gay, lesbian and transgender citizens.

Very cleverly devised rhetorical device, that. But it **presupposes a moral equivalency that a black man sitting beside me rejected outright.** This gentlemen from Nigeria was so confused by the proceedings and the Mayor's speech capping them off that he was convinced the entire issue at hand was racism! When I asked him this question, he unequivocally answered "No!": "Do you think that homosexual identity is the same kind of thing as you being black or being from Nigeria?"

"No!"

And rightly, **my new African friend—who is a Christian—was bothered by the conflation of the two and the use of such rhetoric to elevate a class of people based on their sinful**

behavior and identity to it as the basis to extend so-called human rights. We all have the right to fair treatment as humans made in God's image. We do not have a right to socially engineer law to force the compromise of conscience that is being carried out by Plano's new ordinance.

As I pleaded with the council not to allow, we will surely read about this case going to court, being found unconstitutional and otherwise unlawful and costing this taxpayer and all others unnecessarily.

Ideas, worldviews, do indeed have consequences.

The Development of Modern Culture – Critical Role of Christianity Downplayed

Steve Cable explodes 5 myths about history, showing Christianity's true critical role in the progress and development of culture.

Is our history really what you have been taught in school? For at least the last five decades in schools across this nation, most of us have digested a similar litany of facts about the development of the Western world. Among these commonly accepted facts are these five:

1. The Roman Empire introduced and maintained a period of relative peace in which innovation and free thought could flourish.

2. The Dark Ages, coming after the fall of the Roman Empire, was a period of over 500 years during which the European world languished in feudalism and ignorance.

3. The Protestant Reformation, fueled by the invention of the printing press, introduced a new era of religious freedom.

4. The Scientific Revolution was the result of Europe casting aside religious “superstitions” during the so-called Enlightenment.

5. Protestant missionaries were a negative, colonizing influence on the non-Western world.

In his recent book, entitled *How the West Won: The Neglected Story of the Triumph of Modernity*, Rodney Stark, Distinguished Professor of the Social Sciences at Baylor University, questions these “historical facts” from our childhood along with many others. His premise, based on the current state of historical data and analysis, is that the conventional wisdom about the history of the western world was tainted by the prejudices and lack of knowledge of the early historical writers. His view is backed up by the research and writings of many contemporary scholars. He clearly points out that what is taught in our schools lags far behind the common knowledge held by top researchers in the field. It is interesting to note that this phenomenon is very similar to the difference between high school textbooks on the evolution of man and the current state of research into the origins of life.

Stark concludes that contrary to the conventional wisdom of high school textbooks, the worldview that developed as a result of following after the God revealed in Christian

scripture was critical to the advent of our modern age. Only a society steeped in the message of an all-powerful, loving, creator of this universe was postured to take on the scientific and societal endeavors which are crucial to our society today. According to Stark, our modern world is not the result of key people freeing themselves from the chains of religious intolerance to pursue knowledge and truth, but rather the result of people seeking to better understand this universe created out of nothing into an orderly something by our Lord and God.

In the remainder of this article, we will look at these five key concepts of our history still taught to our students today and see how contemporary research has significantly modified or completely discredited them.

The Impact of Greece, Judaism, and Rome

Apart from periods of Jewish history, most of the world before 600 B.C. was controlled by systems of government that awarded the elite few at the expense of the rest of society. In China, India and Egypt societies had this common theme: "Wealth is subject to devastating taxes and the constant threat of usurpation; the challenge is to keep one's wealth, not to make it productive."[\[1\]](#) Their rulers strived to make it so. Stark pointed this out: "As Ricardo Caminos put it about the ancient Egyptians, 'Peasant families always wavered between abject poverty and utter destitution.' If the elite seizes all production above the minimum needed for survival, people have no motivation to produce more."[\[2\]](#)

Beginning around 600 B.C., the Greek city-states prior to the reigns of Phillip of Macedonia and his son, Alexander the Great, were the first to offer a different economic model on a large scale. "The major benefit of Greek democracy was sufficient freedom so that individuals could benefit from innovations making them more productive, with the collective result of economic progress."[\[3\]](#) This unprecedented freedom

was partly the result of Greece having an unfavorable geography with an abundance of mountains, no abundance of natural resources, and no large navigable river. This geography helped to promote the large number of small, independent city states. "Thus, having an unfavorable geography contributed to the greatness of Greece, for disunity and competition were fundamental to everything else." {4} Once Greece was under the rule of the Macedonians and later the Romans, the scale of innovation in the areas of democracy, economic progress, the arts, and technology slowed dramatically.

Unlike other peoples near the cities of Greece, the Jews were greatly impacted by the Greek philosophers. Why? The God the Jews worshipped was "conscious, concerned and rational" {5} and as such the Jewish theologians were committed to reasoning about God from the things God revealed through Scripture. At this time the vast majority of Jews lived in the Diaspora outside of Palestine. And so, like the Apostle Paul, these Jews were exposed to Greek thought filtered through their understanding of Scripture.

Of course, the early Christians accepted this view of God but also added the idea that our knowledge of God and of his creation is progressive. {6} Understand that our early Christian fathers did not wholeheartedly embrace Greek ideas, choosing to show how Christian doctrines were much more rational. But they did embrace the ideas of reason and logic which were behind Greek philosophy. This train of thought by our Christian fathers set the stage for the development and advances of science. As Stark notes, "The truth is that science arose only because the doctrine of the rational creator of a rational universe made scientific inquiry plausible." {7}

The rule of the Roman Empire provided centuries of relative peace and free travel throughout the Mediterranean area. This *pax Romana* facilitated the spread of Christianity across the

Mediterranean world and thus played an important role in the growth of Christianity. However, Stark suggests that “the Roman Empire as at best a pause in the rise of the West, and more plausibly a setback.”{8}

Most of us probably view the Roman Empire as an expanded version of the great age of Greece where advancements were common in philosophy, commerce and technology. Stark points out that as a large, centrally controlled empire, Rome had plenty of labor and a large distance between the privileged few and the laboring masses. Consequently, the art and literature of the Roman period was fundamentally Greek. There were very few technological innovations developed during this period. In fact, “the Romans made little or no use of some known technologies, e.g. water power.”{9} They preferred to use manual labor rather than employ labor saving devices.

Stark suggests that two events during the period of Roman control were important to the development of our modern culture: the Christianization of the empire and the fall of Rome. “It was Rome that fell, not civilization. . . the millions of residents of the former empire did not suddenly forget everything they knew. To the contrary, with the stultifying effects of Roman repression now ended, the glorious journey toward modernity resumed.”{10}

The Not-So-Dark Ages

My understanding of the Dark Ages as a student from the 1970's is probably similar to yours. It was pictured as a time in which European culture took a step backward from the advances of the Roman Empire and made little or no progress in advancing culture, economics, philosophy, or technology. It was a time characterized by wars and the stultifying oppression of the Catholic Church. Many historians of the past wrote that the fall of Rome cast Europe into this dismal age, aided by Christianity which celebrated poverty and urged contentment.

Stark, along with most modern historians, take a far different view of this period of Western history. Stark puts it this way: "The fall of Rome was, in fact, the most beneficial event in the rise of Western civilization, precisely because it unleashed creative competition among the hundreds of independent political units, which, in turn resulted in rapid and profound progress."[11](#)

In this culture of independent political units, trade developed and expanded rapidly, the average person ate better and grew larger than in the past because the people could now put to personal use the wealth Rome had previously squeezed from them. "Perhaps the most remarkable aspect of the Dark Ages myth is that it was imposed on what was actually 'one of the great innovative eras of mankind.'"[12](#) During this period technology was developed and put into use "on a scale no civilization had previously known."[13](#)

One of the strongest influences during this period came from the Scandinavians, the Vikings. "The Viking merchants traveled a complex network of trade routes extending as far as Persia. . . (The) Vikings had excellent arms, remarkable ships, and superb navigational skills . . . Their boats were far superior to anything found elsewhere on earth at that time."[14](#) Our history lessons, however, placed an emphasis on great empires rather than movements impacting our way of life. "Not only have they continued to regret the fall of Rome, but they remember Charlemagne as the man who almost 'saved' Europe. In fact, the Scandinavians were as civilized as the Franks, while William the Conqueror was certainly as able as Charlemagne, and considerably more tolerant."[15](#)

One of the major events during this period was the rise of capitalism as an economic driver. Capitalism can only exist in societies with free markets, secure property rights and the right of individuals to work where they wish. The Christian West, out from under the yoke of the Roman Empire, was the only society where this move was possible. As Stark explains,

“Of the major world faiths, only Judaism and Christianity have devoted serious and sustained attention to human rights, as opposed to human duties. Put another way, the other great faiths minimize individualism and stress collective obligations. They are . . . cultures of shame rather than cultures of guilt. There is not even a word for freedom in the languages in which their scriptures are written.”[\[16\]](#) Counter to the position of earlier historians who put the advent of capitalism much later in history, capitalism not only thrived during this period but had been fully debated by theologians who on the whole gave it general approval.

You may remember being taught that during these Dark Ages that Islamic scholarship and technological innovation kept society moving forward in the areas of science and technology. In fact, Stark points out, “The ‘Golden Era’ of Islamic science and learning is a myth. Some Muslim-occupied societies gave the appearance of sophistication only because of the culture sustained by their subject peoples – Jews and various brands of Christianity.”[\[17\]](#) In fact when they later cleansed their society of these other people, they soon fell back into a state where any technology was bought from the West and in many cases had to be operated by Westerners. One area where this was revealed on multiple occasions was in the area of military strategy and technology. In numerous battles between A.D. 1200 and 1600, Western forces on land and on the oceans typically inflicted casualties upon their Muslim foes at a rate ranging from 10 to 1,000 Muslim casualties for every casualty among the Western forces.

“Despite the record of Muslim failure against Western military forces, far too many recent Western historians promulgate politically correct illusions about Islamic might, as well as spurious claims that once upon a time Islamic science and technology were far superior to that of a backward and intolerant Europe.”[\[18\]](#)

“In 1148 all Christians and Jews were ordered to convert to

Islam or leave Moorish Spain immediately, on pain of death. . . . And as (they) disappeared, they took the “advanced” Muslim culture with them. What they left behind was a culture so backward that it couldn’t even copy Western technology but had to buy it and often even had to hire Westerners to use it.”[\[19\]](#)

What we had been taught were Dark Ages of no progress were actually a period of great progress in the development of individual freedom and the concept of capitalism.

The Reformation and Religious Freedom

Martin Luther, the catalytic figure of the Reformation, asserted that salvation is God’s gift, freely given, and gained entirely by faith in Jesus as the redeemer. Each person must establish his or her own personal relationship with God. This new emphasis on individual freedom and responsibility was certainly consistent with the key aspects of Western modernity. But the way these ideas played out in society were a different matter.

The popular view promulgated by English and German historians was that the Protestant Reformation, which roughly occurred between A.D. 1515 and 1685, was facilitated by the printing press and the spread of literacy, resulting in a “remarkable revival of popular piety and the spread of religious liberty.” You were probably taught that this new view of piety, placing the responsibility of a relationship with God squarely on the shoulders of the individual rather than on the intervening work of the Church, created a new environment of religious tolerance and personal piety. This environment was invigorating to the concepts of scientific and economic progress. However, the real situation was far different from this idealistic view promulgated by English and German historians. Far from introducing religious liberty to the masses, the Protestant Reformation was more about switching one monopoly religion for another.

Stark points out three ways in which earlier historians and sociologists have misrepresented what went on in the spread of the Protestant Reformation. These historians and probably your high school history textbook, taught the following about the Reformation:

1. The Reformation introduced an era of religious freedom in Europe
2. The Reformation was able to spread rapidly because of the newly invented printing press
3. The Reformation's spread was partially a result of its attractiveness to the common man.

On the first point, rather than introducing an era of religious freedom, the Reformation produced competing monopoly religions. Depending upon the area in which one lived, the pressure to conform to the religion adopted by that region was immense. So what determined whether your region would be Catholic or Protestant? If the area's current Catholic hierarchy was not operating under the rule of local rulers or councils, the rulers were very likely to convert to a Protestant view, thereby removing the influence of the Catholic Church in their domain. Importantly, it allowed them to loot church property in the name of religion. As Stark point out, "It is all well and good to note the widespread appeal of the doctrine that we are saved by faith alone, but it also must be recognized that Protestantism prevailed only where the local rulers or councils had not already imposed their rule over the Church. Pocketbook issues prevailed." [\[20\]](#)

Was it the printing press that allowed the Reformation to spread rapidly? If so, one would expect that cities with printing presses producing Luther's pamphlets and his Bible, would be most likely to align with Protestantism. Yet what we find is a negative correlation between towns with printers who had published Luther's Bible and those towns which had

converted to Protestantism. The printing press was certainly a factor in spreading Luther's theology, but if it was the dominant factor we should see a strongly positive correlation, not a negative one. "Indeed, assessments of the impact of printed materials on the success of the Lutheran Reformation too often overlook a critical factor: no more than five percent of Germans in this era could read." [\[21\]](#)

Finally, a widely held belief is that the Lutheran Reformation touched the hearts of the masses, resulting in a huge revival in personal faith and piety. However, most people were not personally impacted by the theological arguments between Catholicism and Protestantism. The common man in Germany at that time was, at best, semi-Christian. As Stark points out, "Eventually even Martin Luther admitted that neither the tidal wave of publications nor all the Lutheran preachers in Germany had made the slightest dent in the ignorance, irreverence, and alienation of the masses. Luther complained in 1529, "Dear God, help us! . . . The common man, especially in the villages, knows absolutely nothing about Christian doctrine; and indeed many pastors are in effect unfit and incompetent to teach. Yet they all are called Christians, are baptized, and enjoy the holy sacraments – even though they cannot recite either the Lord's Prayer, the Creed or the Commandments. They live just like animals."

The Scientific Revolution and Christianity

The term "Scientific Revolution" was coined, referring to the period in the sixteenth and seventeenth century beginning with Copernicus and ending with Newton, when the rate of scientific advancement was thought to have increased dramatically. However, modern historians say that no such revolution occurred, although the role of science definitely matured during that period of time. Many of us remember being taught three aspects of this so-called revolution that we want to

consider:

1. Most key scientific contributors had freed themselves from the rigid dogmas of faith.
2. The Protestant Reformation had freed society from “the dead hand of the Catholic Church,” thereby making real scientific thinking possible.
3. Real science could not occur in universities controlled by the churches.

However, Rodney Stark points out that current evidence indicates that all of these claims are false, stating, “Indeed, Christianity was essential to the rise of science, which is why science was a purely Western phenomenon.”[\[22\]](#)

Of the 52 most prominent contributors to scientific advancement during this period, we find that 60% of them were devout believers in Christianity. Only one of them was a skeptic toward the message of Christianity. And the rest were classified as conventionally religious. So, the idea promoted by contemporary philosophers that scientific advancement was the result of freeing themselves from belief in the dogmas of the faith could not be further from the truth.

Of these 52 leaders of the scientific community, 26 were Protestant and 26 were Catholic. This equal distribution belies the common wisdom that the Protestant revolution allowed real scientific thinking to begin to take root. It appears that prior advances in scientific thought had prepared the minds of these individuals to advance the frontiers even further, regardless of whether they were Protestant or Catholic. Both faiths believed in God as the Intelligent Designer of a rational universe, and a rational universe was one that could be understood through the application of the scientific method.

As noted earlier, most modern historians sided with the

statement, "Not only were the universities of Europe not the foci of scientific activity . . . but the universities were the principal centers of opposition for the new conceptions of nature which modern science constructed." {23} Actually, 92% of these leaders in scientific research spent an extended period of time of ten years or more in the universities. Nearly half of them served as university professors during their careers. In fact, the distinguished historian of science Edward Grant stated, "The medieval university laid far greater emphasis on science than does its modern counterpart." {24}

Stark wrote, "Science only arose in Christian Europe because only medieval Europeans believed that science was possible and desirable. And the basis of their belief was their image of God and his creation." {25} As the distinguished mathematician and scientist, Johannes Kepler stated, "The chief aim of all investigations of the external world should be to discover the rational order and harmony imposed on it by God and which he revealed to us in the language of mathematics." {26} Thus, the so-called scientific revolution occurred not in spite of Christianity but rather directly because a Christian worldview beckoned them to study the nature of our world more closely.

Protestant Missionaries and the Rise of Western Democracies

Protestant missionaries are often portrayed as the villains of imperialistic expansion. They have often been portrayed as having a greater interest in converting their charges to Western culture than introducing them to eternal life through Jesus Christ. However, their personal and public publications do not support this negative view. On the contrary, "Missionaries undertook many aggressive actions to defend local peoples against undue exploitation by colonial officials." {27}

Beyond correcting this distorted view of missionary purpose,

modern historians have discovered an interesting impact. A recent study has shown that the rise and spread of stable democracies in the non-Western world can be attributed primarily to the impact of Protestant missionaries. According to a study by sociologist Robert Woodberry, [{28}](#) the impact of these missionaries far exceeds that of fifty other control variables such as gross domestic product and whether or not a nation was a British colony. One would think that having a healthy amount of production per individual would be one of the biggest factors leading to a stable democratic government. But the data shows that it has been much more important to have the teaching and leadership development provided by Protestant missionaries.

In addition, the greater number of Protestant missionaries per capita in a nation in 1923, the lower that nation's infant-mortality rate in 2000. In this case, the effect of having Protestant missionaries was more than nine times as large as the effect of current GDP per capita. In other words, having a history of Protestant missionaries is much more important than having a large amount of money in determining a low infant-mortality rate.

Conclusion

Many of us have been given the impression by educators that the scientific, governmental, and societal advances we enjoy are the result of enlightened people taking off their religious blinders and thinking more clearly about these topics. Sociologist Rodney Stark presents compelling data, arguing that in fact it was the unique worldview of Christianity that created societies in which new ideas could foment and flourish. This Christian worldview was fundamental to the advances in economics, science and government common in our current world. Understanding the worldview that fueled the advances making up our modern world is important if we are to continue to move ahead responsibly.

Ancient Perspectives on Happiness

After examining several pagan view of happiness from the ancient world, Michael Gleghorn argues for the view of Christian philosopher Augustine.

The Declaration of Independence says that all men "are endowed by their Creator with certain unalienable rights," including "life, liberty and the pursuit of happiness."^{1} Although we could say a lot about this statement, I want to focus on that very last phrase: the pursuit of happiness. What exactly is happiness? And how should we pursue it in order to have the best chance of attaining it? These questions not only interest us, they also interested some of the greatest thinkers from the far-flung past.

So what *is* happiness? An online dictionary says that happiness "results from the possession . . . of what one considers good."^{2} A good start, but it raises another question, namely, what should we consider *good*? Many things can be described as *good*: a cat, a job, a lover, and a book may all qualify. And each of these things might even make us *happy* . . . at least, for a while. But is there a *good* that offers us genuine and lasting happiness? If so, what is it? Now we're getting closer

to what the ancients were interested in knowing about happiness.

Of course, as you can probably guess, many different answers were proposed. A few thought that happiness could be found in the pleasures of the flesh. But most believed you needed something a bit more . . . *lofty*, shall we say, in order to experience *real* happiness, things like friendship, peace of mind, virtue, and even God. One thing they virtually all agreed on was that a truly good and happy life ought to be lived with a sense of mission or purpose. Hence, the ancients did not think about happiness primarily in terms of just “having a good time.” Instead, they thought there was an important *moral* component to happiness. As Christian theologian Ellen Charry notes, for the ancients, happiness “comes from using oneself consistently, intentionally, and effectively, and hence it is a moral undertaking.”[{3}](#)

The link between morality and happiness has, I fear, become rather under-appreciated in our own day. But important as it is, many (including myself) don't believe that this can be the *final* word on happiness. So in an effort to find out what is, we'll spend the rest of this article looking first at some of the most important pagan perspectives on happiness from the ancient world before concluding with a Christian proposal by possibly the greatest theologian in the early church, a man named Augustine.[{4}](#)

Epicureanism

Let's begin with Epicureanism. Epicurus lived from 341–270 B.C. and is often viewed as the poster boy for a hedonistic lifestyle. A popular gourmet cooking site, epicurious.com, creatively plays off this reputation to celebrate the pleasures of a great meal.[{5}](#) But as we'll see, Epicurus was not the total “party animal” that people often think.[{6}](#)

Although he rightly regarded physical pleasure as a good

thing, and believed that it was natural for us to want it, he personally thought that friendship and mental tranquility were even better. It was these latter sources of happiness, and not merely the pleasures of the flesh, which Epicurus thought of as the greatest goods. In order to attain them, he even commended a life of virtue. After all, it's the virtuous person, living at peace with his neighbors, who generally has far less cause for fear and worry than someone who's been up to no good. Such a person is thus more likely to experience the true joys of friendship and mental tranquility than his non-virtuous counterpart.[{7}](#)

As you can probably see, there are aspects of Epicureanism that even a Christian can appreciate. But there are problems with this view as well. For example, while Epicurus did not deny either God or the gods, he did teach that they were rather unconcerned about human affairs, and he denied that there would be a final judgment. For him, death was simply the end of existence and you didn't need to worry that God would judge you for your deeds in an afterlife. But these ideas made many people uncomfortable.

For instance, the Roman philosopher Cicero (106-43 B.C.) reacted strongly against Epicureanism in his book *The Nature of the Gods*. And Lactantius, an early Christian writer (250-325 A.D.), believed that only the fear of God "guards the mutual society of men."[{8}](#) In his view, if people think they aren't accountable to God, society will likely be in trouble. Hence, many thinkers worried that Epicureanism might lead to an amoral—or even *immoral*—pursuit of pleasure as the highest good of life. And unfortunately, this "can just as easily lead to debauchery and . . . selfishness as it can to the simple, honest life style of Epicurus."[{9}](#)

So while the Epicurean view of happiness has some things in its favor, there are several reasons for rejecting it.

Stoicism

Stoicism was another important school of thought that addressed the issue of human happiness. In the ancient world, it “was the single most successful and longest-lasting movement in Greco-Roman philosophy.”[{10}](#) The Stoics’ manly, morally tough philosophy of life had broad appeal in the ancient world. It attracted slaves like Epictetus (ca. A.D. 55-ca. 135) as well as the Roman emperor, Marcus Aurelius (A.D. 121-180). Even many of the early church fathers admired the Stoic emphasis on moral virtue and integrity.[{11}](#)

So what did the Stoics think about human happiness? According to Ellen Charry, the Stoics viewed “the goal of life” as human flourishing. This was understood, however, not in terms of having a long life or being financially successful. Rather, it was viewed “as maintaining one’s dignity and grace whatever may happen.”[{12}](#) The Stoics understood that things don’t always work out as we want. Life throws us many curve balls and, if we’re not prepared, we’re bound to be disappointed.

Their solution? In a statement reminiscent of the Buddha’s teaching, the Stoic Epictetus declared, “Demand not that events happen as you wish, but wish them to happen as they do happen, and you will get on well.”[{13}](#) We often don’t have any control over what goes on around us. But we can control how we react to it. By knowing the good and morally virtuous thing to do, and by consistently choosing to do this, one attains the highest happiness of which human beings are capable; namely, “the enjoyment of self that comes from the conviction that one is living a principled life of the highest integrity.”[{14}](#) This, in a nutshell, is the Stoic conception of human happiness.

But there are some problems with this view. Although Christians will readily cheer the Stoic commitment to a life of moral virtue, they’ll nonetheless deny that such a life is ever really possible apart from the grace of God. As the

Christian theologian Augustine observed, Stoicism fails to adequately address the problem of human sinfulness. Moreover, he thought, it holds out the false hope that one can achieve happiness through self-effort. But as Augustine wisely saw, only God can make us truly happy. Hence, while there's much to admire about Stoicism, as a philosophy of human happiness it must ultimately disappoint.[{15}](#)

Neo-Platonism

Having now surveyed Epicureanism and Stoicism, and found each of them wanting, we must next turn to Neo-Platonism to see if it fares any better.

Probably the most important Neo-Platonist philosopher was a man named Plotinus, who lived in the third century A.D. Plotinus believed that in the beginning was the One, "the supreme transcendent principle" and the "ground of all being."[{16}](#) Everything which now exists ultimately originated from the One through a series of emanations. Since everything proceeds from the One *not* by a process of creation, but rather by a process of emanation, "Creator and creation . . . are not sharply distinguished in Plotinus's account."[{17}](#)

Although this is certainly different from the biblical view, in which there *is* a clear distinction between Creator and creation, it would probably not be fair to simply call Plotinus a pantheist—that is, someone who believes that "all" of reality is "Divine." According to one scholar, Plotinus tried "to steer a middle course" between pure pantheism (on the one hand) and creation by God (on the other).[{18}](#) But since everything that exists emanates or proceeds from the One, Plotinus's view is certainly *close* to pantheism. And it is thus quite different from the biblical doctrine of creation.

But how is this relevant to Plotinus's perspective on the nature of human happiness? According to Plotinus, since

everything (including mankind) emanates out of the One, human beings can only truly find happiness by realizing their “oneness” with the One. In Plotinus’s view, “Happiness resides in a person’s realization that she is one with divinity.”[\[19\]](#) According to Plotinus, then, realizing one’s “oneness” with the One is the key to human happiness.

Are there any problems with this view? Although there’s much to admire about Neo-Platonism, and while it was quite influential in the early church, it was never entirely accepted, and that for several reasons. From a Christian perspective, Neo-Platonism ultimately has a defective view of God, creation, human nature, the meaning of salvation, and what happens to a person after death. In other words, while the system is very religious, it’s *not* Christianity. And thus, while we can agree with Plotinus that happiness can only be found in God, we must nonetheless reject his system on the grounds that he’s not pointing us to the one *true* God.

Augustinianism

Having previously surveyed some of the most important perspectives on happiness from the ancient world, we’ll now bring our discussion to a close by briefly considering the thought of Augustine, one of the greatest theologians of the early church. Augustine lived from A.D. 354 to 430 and was familiar with the various perspectives on happiness which we’ve already examined.

Like the Epicureans, he believed that our happiness is at least tangentially related to our physical well-being. Like the Stoics, he believed that a life of integrity and moral virtue was important for human happiness. And like the Neo-Platonist philosopher Plotinus, Augustine thought that true human happiness could only be found in God.

Nevertheless, Augustine views each of these perspectives as ultimately inadequate for all who long to experience *lasting*

human happiness (and Augustine thinks that's pretty much all of us). After all, neither physical well-being nor a virtuous life can grant us lasting happiness if our existence ends at death. And while he agrees with Plotinus that happiness can only be found in God, Augustine (like all Christians) is convinced that Plotinus ultimately has a defective view of God.[{20}](#)

So where is true and lasting happiness to be found? Ellen Charry sums up Augustine's view quite nicely when she writes, "Happiness is knowing, loving, and enjoying God securely."[{21}](#) In Augustine's view, happiness is a condition in which one's desires are realized. Happy is he who has what" he wants," he writes in his little book on happiness.[{22}](#) But he also believed that what we all really want is the *everlasting* possession of the *greatest* good that can be had. That is, we want the best that there is—and we want it forever!

But since the greatest good can only be God, the source and foundation of every other good there is (or ever will be), it seems that what we ultimately want, whether we realize it or not, is God! And if we not only want the best that there is, but want it forever, it seems that we must ultimately want the very thing God freely offers us in Christ, namely, everlasting life in the presence of God. The psalmist urges us to "taste and see that the Lord is good" (Psalm 34:8). And those who do are promised joy in His presence and "eternal pleasures" at His right hand (Psalm 16:11).

This, then, is Augustine's view on human happiness. In my opinion, it's far and away the best perspective that we've examined in this article, and I hope you'll think so, too.
