

Crime in America

Case #1: Polly Klaas of Petaluma, California, was abducted from her suburban home during a sleepover with two friends on October 1, 1993, and subsequently murdered. Her alleged assailant, Richard Allen Davis, had been sentenced to sixteen years in prison for kidnapping, but was released in June after serving only eight years of that sentence.

Case #2: Michael Jordan's father, James Jordan, was fatally shot in the chest on Interstate 95 in North Carolina on July 23, 1993. Charged with the murder were Larry Martin Demery and Daniel Andre Green. Demery had been charged in three previous cases involving theft, robbery, and forgery. He was awaiting trial for bashing a convenience-store clerk in the head with a cinder block during a robbery. Green had been paroled after serving two years of a six- year sentence for attempting to kill a man by smashing him in the head with an axe, leaving his victim in a coma for three months.

Americans are scared, and they are angry. The scary orgy of violent crime has made average citizens afraid to walk the streets in front of their homes. And this fear has fueled a public cry to end the killing fields in America. Americans have had enough, and they want to know why known criminals were let back out on the streets so they could kill Polly Klaas and James Jordan.

In America, the crime clock continues to click: one murder every 22 minutes, one rape every 5 minutes, one robbery every 49 seconds, and one burglary every 10 seconds. And the cost of crime continues to mount: \$78 billion for the criminal justice system, \$64 billion for private protection, \$202 billion in loss of life and work, \$120 billion in crimes against business, \$60 billion in stolen goods and fraud, \$40 billion from drug abuse, and \$110 billion from drunk driving. When you add up all the costs, crime costs Americans a stunning \$675

billion each year.

In addition to the financial cost is the psychological cost of devastated lives and a loss of security. In recent months, even apathetic Americans have been shaken from their false sense of security as they have seen criminals invade nearly every sanctuary where they felt they were safe: their cars (James Jordan); their public transit (the Long Island Rail Road murders by Colin Ferguson); and even their bedrooms (the abduction of Polly Klaas).

Past solutions seem ineffective. Massive spending on social programs, massive spending on prisons, and sweeping changes in sentences seem to have little effect. No wonder there is such anger and a clamor for change.

Current Trends in Crime

1.The Crime Rate Is Increasing.

The recent string of heinous crimes does not represent a sudden wave of crime in America. Violent crime actually has been steadily increasing since the 1960s (though violent crime rates did dip for a time during the early 1980s). But in addition to the steady increase of crime has been the changing nature of these crimes. For example, there has been a pronounced increase in the prevalence of stranger-on-stranger robberies and drive-by shootings.

2. Teenagers Are Responsible for a Disproportionate Share of Violent Crime.

The violent-crime rate seems to rise and fall in tandem with the number of teens in the population. But recently, teen violence has exploded (murder arrests of teens jumped 92 percent since 1985) during a period in which the teen population remained steady or declined.

3.The Median Age of Criminals Is Dropping.

The perception that criminals are getting younger is backed up by statistics. In 1982, 390 teens ages 13-15 were arrested for murder. A decade later, this total jumped to 740.

4. A Majority of the Crimes Are Committed by Habitual Criminals.

Criminologist Marvin Wolfgang compiled arrest records for males born and raised in Philadelphia (in 1945 and in 1958). He found that just 7 percent in each age group committed two-thirds of all violent crime. This included three-fourths of the rapes and robberies, and nearly all of the murders. They also found that this 7 percent had five or more arrests before the age of 18.

5. Crime Does Pay: Most Criminals Are Not Caught or Convicted.

Consider these statistics compiled by professor Morgan Reynolds (Texas A&M University) concerning burglary:

- *500,000 burglaries take place each month*
- *250,000 of these are reported to the police*
- *35,000 arrests are made*
- *30,450 prosecutions take place*
- *24,060 are convicted*
- *6,010 are sent to prison; the rest paroled*

Of the 500,000 burglaries, only 6,000 burglars went to jail! And if this 1 percent effectiveness ratio isn't disturbing enough, professor Reynolds found that the average time served was only 13 months.

How to Fight Crime

1. Put More Police on the Street.

The statistics from professor Reynolds illustrate the problem for burglary. Similar statistics exist for other major crimes including murder. Today 3.3 violent crimes are committed for every police officer. Twenty-five years ago, the ratio was exactly opposite. It is not surprising that we have an epidemic of crime in this country when the chances of being caught, prosecuted and convicted are so low. The average criminal has no reason to fear law enforcement. The obvious solution is to increase the deterrent through more police and swift and sure punishments.

2. Put More Criminals in Prison.

The premise is simple: a criminal in prison cannot shoot your family. While the idea of incarceration is not new, some of the recent findings are. A 1992 publication by the Justice Department entitled, "The Case for More Incarceration" showed the following:

- *That incarceration is cheaper than letting a criminal out on the streets.*
- *That although the crime rate is high, the rate of increase has been going down since we started putting more people in prison.*
- *That blacks and whites are treated equally and that the*

vast majority of law-abiding African-Americans would gain most from more incarceration of criminals because African-Americans are more likely to be victims of violent crime.

Putting criminals behind bars keeps them off the streets and is less expensive to society than letting them back out on the street.

3. Focus on Habitual Criminals.

The same publication by the Justice Department also found that much violent crime is committed by people who have already been in the criminal justice system. This included those who have been arrested, convicted, or imprisoned, or who are on probation or parole. The chronic offender has had 5 or more arrests by the age of 18 and has gotten away with dozens of other crimes.

Police departments that target “serious habitual offenders” and put them behind bars have found the number of violent crimes as well as property crimes drops significantly. Arresting, prosecuting, convicting, and incarcerating this small percentage of criminals will make communities safer.

4. Keep Violent Criminals in Prison Longer.

Most citizens are shocked to find out that violent criminals serve only 5.5 years for murder or 3 years for rape. But those are the sobering statistics wrought from lenient early-release practices.

Government statistics (for 36 states and the District of Columbia) show that although violent offenders received an average sentence of seven years and eleven months imprisonment, they actually served an average of only two years and eleven months in prison—or only 37 percent of their imposed sentences. The statistics also show that, typically, 51 percent of violent criminals were discharged from prison in

two years or less, and 76 percent were back on the streets in four years or less.

We need to revise our current parole and probation procedures. Criminals who know how to work the system can be set free on bond, on their own recognizance, for re-habilitation, or for supervision. Three out of four people serving a criminal sentence are currently on probation or parole. In other words, they are out on the streets ready to commit another crime!

Many states are enacting "truth in sentencing" laws that require violent criminals to serve at least 85 percent of their prison sentence before becoming eligible for parole or other early release possibilities. Other states and the federal government are considering "three strikes and you're out." These laws mandate that those convicted of three violent crimes be put in jail for life.

Incarceration incapacitates violent criminals and keeps them off the streets, but it also deters would-be criminals. Criminologists have shown that an increase in arrest rates reduces the crime rate, and they have also demonstrated that an increase in sentence length also decreases crime rates. Catching more criminals, convicting more criminals, and keeping more criminals behind bars will reduce the crime rate.

5. Focus National and State Resources on Criminals, Not Weapons.

Many politicians seem to think that crime can be fought through gun control rather than criminal control.

No matter where you come down on the issue of gun control, consider the following statistics. Only 1 percent of all guns purchased in America are ever used in the commission of a crime. And of those 1 percent, 5 out of 6 were obtained illegally. At its best, any gun control bill is only going to affect a very small portion of the criminal element.

6. Provide Alternative Sentencing for Non-Violent Offenders.

Criminals who are not a physical threat to society should not be locked up with violent criminals but should be sentenced to projects that will pay back the community. Criminals should pay restitution to their victims and the community. Locking up violent criminals makes sense; locking up non-violent criminals does not. Currently it costs more to warehouse a criminal for one year than it does to send the brightest student to Harvard University. Alternative sentencing for non-violent offenders will reduce taxpayer cost and generate funds which can provide restitution for the crime committed.

7. Develop Community Programs Which Deter Crime.

Many cities have introduced curfews prohibiting minors from being on the streets from 10 P.M. to 6 A.M. Exceptions are made for those passing through town or on their way to or from a political or religious event.

Some neighborhoods have found erecting roadblocks effective in reducing crime. Drug dealing drops dramatically when police check for driver's licenses and when local citizens write down license plate numbers and film activities with hand-held videos. Setting up a neighborhood crime watch program has also been a major deterrent to crime in many neighborhoods.

Citizens and legislators need to take back the streets. If we implement these common sense measures in the legislature and in our communities, we can make our streets safe again.
