

Science and Faith Conference

Sue Bohlin

Are science and faith at war? Does science undermine or corroborate belief in God? Does faith suppress or inspire scientific research? Explore these questions and more at this two-day conference held at the Riley Conference Center on the campus of Southwestern Baptist Theological Seminary in Fort Worth, Texas.

Featured speakers include Dr. William Dembski, author of *The Design Revolution* and other books; Dr. Stephen Meyer, author of *Signature in the Cell: DNA and the Evidence for Intelligent Design*; Dr. Jay Richards, co-author of *The Privileged Planet: How Our Place in the Cosmos Is Designed For Discovery*; and Dr. John West, author of *Darwin Day in America: How Our Politics and Culture Have Been Dehumanized in the Name of Science*.

Sessions will explore a Biblical theology of nature; the role of Christianity in the founding of modern science; the impact of Darwinian Evolution on ethics, society, Biblical studies and theology; and the scientific evidence for intelligent design and its implications for theism.

This conference will be of special interest to seminary students, college students, and pastors and other church leaders. At the end of the conference there will be breakout sessions for students, pastors, and church leaders on how to incorporate science and faith issues into one's church, ministry, or career.

Probe president Dr. Ray Bohlin, a Fellow of the Discovery Institute, is one of the speakers.
