

Talking About the Problem of Evil

T.S. Weaver has put together an intellectual response to the problem of evil that includes a theology of evil and suffering, and a philosophical/theological series of proper defenses of God and His righteousness considering evil.

What is Evil?

The problem of evil is famous. This problem is personal because my wife stayed stuck as an agnostic for a long time. An agnostic, by the way, is a person who says they don't know if there is a God. Like so many people, she thought that if you believe in a God who is all good and all-powerful, then the presence of evil and suffering creates a problem.

Atheist philosopher David Hume said, "Epicurus's old questions are yet unanswered. Is he willing to prevent evil, but not able? Then he is impotent. Is he able to but not willing? Then he is malevolent. Is he both able and willing? Whence then is evil?"

Let's address this. I'll give you a roadmap of where we're going. First, we need to address how one can even object to evil. Second, I will talk about what evil is and is not. Then I will talk about some possible reasons God allows evil. Finally, I'll close with God's solution.

To start, if this challenge were raised by an atheist, we need to address the moral argument. If there is right and wrong, then they are grounded in the existence of a good and moral God. Because without an absolute Moral Law, which requires an absolute Moral Law Giver, the atheist has no grounds for a

complaint against evil.

Former atheist C.S. Lewis summarizes how this thinking eventually guided him to Christianity: “My argument against God was that the universe seemed so cruel and unjust. But how had I got this idea of just and unjust? A man does not call a line crooked unless he has some idea of a straight line. What was I comparing this universe with when I called it unjust?”

Evil is not a “thing” that exists; and God is not the cause. Both Augustine and Thomas Aquinas point out that evil is not a real entity in the world. This means evil is not a material or a phenomenon that exists by itself. It’s like darkness, which is not a created thing; it’s the absence of light. Evil describes a deficiency or denial of good. Philosophers call this deficiency a privation. Evil is what occurs once the good is altered or distorted. In Genesis 1 and 2, God told us all that existed was good. Evil was not an innovation, but a distortion. So, God is not the creator or author of evil.

The Best-of-All-Possible-Worlds

Let us consider the best-of-all-possible-worlds argument. The place to start is God’s omniscience. This allows God to understand all possibilities. If God knows all possibilities, God knows all possible worlds. Since God is also completely good, He always wants and works out the best world and the best way.

Leibniz (the philosopher who came up with this defense) wrote, “The first principle of existences is the following proposition: God wants to choose the most perfect.”

The power of this argument is to show that out of every world that a good God could have produced, His decision to generate *this* one means this creation is good.

There are several principles that tie into this defense.

The first major principle is centered on the truth that God acts for worthy causes. Again, God's omniscience presumes that before God decides which world to produce, He understands the value of every possible world. This also implies God always decides on the base of sensible, stable rationales. This is called the "principle of sufficient reason."

To believe God can intercede in what he has formed with sufficient reason, even to avoid or restrict evil, would be like a soldier who abandons his post and knowingly allows enemy infiltration to instead stop a colleague from drinking while in uniform. The soldier ends up allowing a greater evil in order to stop a lesser evil.

Another principle that reinforces this argument is the principle of "pre-established harmony."

Leibniz describes it this way: "For, if we were capable of understanding the universal harmony, we should see that what we are tempted to find fault with is connected to the plan most worthy of being chosen; in a word we should see, and should not believe only, that what God has done is the best."

Human Free Will

Above, we covered the principle of sufficient reason as part of the best-of-all possible worlds. The last principle of the best-of-all-possible-worlds is human free will. For Leibniz, this idea was just a principle in part of his greater defense. For Augustine, C.S. Lewis, and Alvin Plantinga it was an entire defense by itself. In its simplest form, it goes something like this: God set us up not to be machines but free agents with the power to choose.

If God were to make us capable of freely choosing the good, He had to create us also able to freely choose evil. Consequently, our free will can be misused and that is the explanation for evil.

Jean-Paul Sartre communicates this wonderfully: "The man who wants to be loved does not desire the enslavement of the beloved. . . . If the beloved is transformed into an automaton, the lover finds himself alone." God knows that a better world is created, if human beings are infused with free will, even if they decide to behave corruptly.

Were God to force us to make good choices, we would not be making choices at all, but simply implementing God's instructions like when a computer runs a program.

For humans to have the capability to be ethically good, free will is necessary. Morality hangs on our capability to freely choose the good.

Plantinga asserts, "God creates a world containing evil, and he has a good reason for doing so." John Stackhouse Jr. says, "God, to put it bluntly, calculates the cost-benefit ratio and deems the cost of evil to be worth the benefit of loving and enjoying the love of these human beings."

Stackhouse sums up Plantinga's argument like this:

"God desired to love and be loved by other beings. God created human beings with this in view. To make us capable of such fellowship, God had to give us the freedom to choose, because love, though it does have its elements of 'compulsion,' is meaningful only when it is neither automatic nor coerced. This sort of free will, however, entailed the danger that it would be used not to enjoy God's love and to love God in return, but to go one's own way in defiance of both God and one's own best interest."

God created us with free will because our decision to say "yes" to Him is only a real choice if we are also free to say "no" to Him.

The Greater Good

To review, so far, we've addressed how one can even object to evil, in the moral argument. We've talked about what evil is and is not, and the idea of it being a privation. We've talked about some possible reasons God allows evil, which included the best-of-all-possible-worlds argument and the free will defense. Now I want to go over the greater good principle. While all the arguments I've given so far are intellectual and do not necessarily help with the emotional side of evil and suffering, this principle is especially delicate. I say "delicate" because this defense may not help a questioner much if they have been a victim of a seemingly very unwarranted evil, and/or if they are still carrying anger or bitterness.

Again, the topic we are examining is the greater good principle, which argues that certain evils are needed in the world for certain greater goods to happen. To put it another way, certain evils in this world are called for, as greater goods stem after them. For instance, nobody would believe a doctor who cuts out a cancerous tumor is being evil because he made an incision on the patient. The surgery incision is much less evil than letting the tumor develop. The greater good is the patient being cancer-free. Parents who penalize children for poor conduct with the loss of toys or privileges or even giving spankings are instigating pain (particularly from the kid's viewpoint). Although, without this discipline, the other possibility is that the kid will develop into a grownup with no discipline and would consequently face much more suffering. We do not understand in this world all the good God is preparing; therefore, we need to trust that God is good even when we can't see it and we can't understand the larger picture of what He's doing.

Plus, nearly all individuals will award some truth to the saying ascribed to Nietzsche: "Whatever doesn't kill me makes me stronger." Consequently, the principle of allowing pain in

the short term to bring about a greater contentment eventually is legitimate and one we know and use ourselves. That implies there is no mandatory contradiction between God and the reality of evil and suffering.

The Cross

Finally, I end with the cross and the hope of Christianity. Jesus agonized in enduring the nastiest evil that can be thrown at him: denial by His own adored people; abhorrence from the authorities in His own religion; unfairness at the hands of the Roman court; unfaithfulness and disloyalty from His closest friends; the public disgrace of being stripped nude and mocked as outrageous “King of the Jews”; anguish in the agony of crucifixion; and the continuous weight of the lure to despair altogether, to crash these unappreciative beings with shocks of heaven, to recommence with a new race, to assert Himself. Instead, Jesus remained there, embracing into Himself the sins of the world, keeping Himself in position as His foes wreaked their most terrible treatment.

Our faith in a good God is sensible, because Jesus suffered on our behalf, and took the punishment we deserve. *He* understands what it is to suffer. *He* has lived there.

The cross was a world-altering occasion where the love and compassion of God dealt efficiently with the immensity of human sin. His death and resurrection show evil is trounced, and death has been slain. Contemplate the many implications of the atonement: Jesus is the Victor, He has paid our ransom, God’s wrath has been satisfied, and Jesus is the substitution for the offenses we have perpetrated.

As if that is not enough, the Christian narrative ends with faith in the future where complete justice will be done, and all evils will be made right. When Christ returns, He will not once more give in to mortal agencies and quietly accept evil.

He will come back to deliver justice. The Bible's definitive solution to the problem of evil is that evil will be dealt with. God will create a new heaven and a new earth for persons God has loved so long and so well. This is the core of our faith in the middle of pain and suffering.

In conclusion, what I've just presented to you, and what my wife eventually figured out, is that evil is not a thing created by God. A valid complaint against evil cannot be made without the existence of God. God has plausible reasons for allowing evil. And He clearly has a plan to defeat it. All He wants you to do is trust Him.

Historical Criticism and the Bible

Historical criticism of the Bible often threatens believers' faith. Dr. Michael Gleghorn explains that it is often grounded in false assumptions.

What Is Historical Criticism?

Throughout the history of Christianity, students of the Bible have used many different methods of interpreting the text. But since the Enlightenment, one particular method (or rather, family of methods) has been quite influential, especially in the academy.[\[1\]](#) I'm speaking of what is often called *historical criticism*, or the *historical-critical method* of biblical interpretation.

So what is historical criticism, you ask? Although the term gets used in different ways, I will here be using it to refer to a method of biblical interpretation which attempts to read the Bible as a *purely* human document from the distant past. In other words, the historical-critical method does not typically regard the Bible as divinely inspired. It is *merely* a human book, like any other, and should thus be read like any other book.”[\[2\]](#)

In the past (and to some extent even today) scholars liked to portray this method as “scientific” in character, able to obtain “assured” and “objective” interpretive results. But critics tell a different story. For example, Eta Linnemann, who before her conversion to Christianity was a well-respected scholarly advocate of historical-criticism, claims that in practice the so-called “scientific” character of this method is grounded in a prior assumption of naturalism, perhaps even atheism. As Linnemann observes, “Research is conducted . . . if there were no God.”[\[3\]](#)

Another critic of this method is the renowned Christian philosopher Alvin Plantinga. After rehearsing certain principles of historical investigation, which many historical critics would endorse, Plantinga notes that these principles are understood “to preclude” God’s direct involvement in the world.[\[4\]](#) Because of this, he notes, such principles “imply that God has not in fact specially inspired any human authors in such a way that what they write is really divine speech addressed to us; nor has he . . . performed miracles of any other sorts.”[\[5\]](#)

As I’m sure you can see, at least some of the results of this method come about simply because of assumptions the interpreter brings to the text. The problem, however, is that

the assumptions are biased *against* Christianity in *favor* of naturalism. We must thus think rather critically about the historical-critical method. But first, we need a bit of background on how and when this method originated.

The Origins of Historical Criticism

Although many scholars helped develop the historical-critical method, Johann Salomo Semler, an eighteenth-century theologian, is widely regarded as its “father.”^{6} Semler was primarily interested in “critical work” on the canon of biblical writings.^{7} For our purposes, the “canon” can simply be thought of as the books of the Old and New Testaments. The Church regards these books as the divinely inspired Word of God and, hence, completely authoritative for Christian faith and practice.

Semler, however, considered these books (especially those of the Old Testament) to be largely of merely historical interest. They might give us some interesting information about the religion of ancient Israel or (in the case of the New Testament) the beliefs of the early church, but they could not be regarded, at least in their entirety, as the divinely inspired Word of God.^{8} Hence, Semler was led to make a distinction between “the Scriptures and the Word of God.”^{9} Although the Church had always considered the Scriptures to *be* the Word of God, Semler made a distinction between them. In his opinion, “some books belong in the Bible through historical decisions of past ages, but do not make wise unto salvation.”^{10} Books of this sort, he reasoned, can still be called “Scripture” (for they are part of the biblical canon), but they are *not* the Word of God (for in his view, they are not divinely inspired).

Although historical criticism continued to be developed after Semler, it’s easy to see why many consider him to be this method’s “father.” In his own study of the Bible, Semler

generally disregarded any claims that either it or the Church might make regarding its divine inspiration and authority and attempted instead to read the Bible like any other book. In the opinion of theologian Gerhard Maier, it's "the general acceptance" of Semler's view which "has plunged theology into an endless chain of perplexities and inner contradictions."[\[11\]](#) Before we examine such difficulties, however, we must first consider why so many scholars see value in the historical-critical method.

Some Proposed Benefits of Historical Criticism

To begin, virtually everyone agrees that when you're attempting to understand a book of the Bible, it can be helpful to know something about the origin of the book. Who was the author? When did he live? What sorts of things were happening at the time the book was written? Was the author influenced by any of these things, or attempting to respond to them in some way? Who was he writing for? How might they have understood him? Answering such questions can often clarify what the author may have been trying to communicate in his book. Historical critics are right to see this as an important part of understanding the books of the Bible. And most everyone agrees on this point.[\[12\]](#)

More controversial would be the principles of historical investigation originally proposed by Ernst Troeltsch in an essay written in 1898.[\[13\]](#) These principles are still generally embraced (though with some modifications) by historical critics today.[\[14\]](#) Briefly stated, Troeltsch proposed three principles that can simply be called the principles of criticism, analogy, and correlation.[\[15\]](#) Although there's no universal agreement about how these principles should be used in actually doing historical research, historical-critical scholars have generally regarded

these principles as helpful guides in critically evaluating what is written in the Bible in their effort to determine what *really* happened. This is considered a great benefit of historical criticism. For, rather than simply accepting the claims of a biblical author uncritically, Troeltsch's principles provide some help in critically evaluating such reports in order to assess their believability.{16}

Now in one sense this is commendable, for it is good to search for truth about what the Bible is trying to teach us. But there's a problem with how these principles are typically understood by historical-critical scholars. As the Christian philosopher Alvin Plantinga reminds us, such scholars generally take these principles to exclude any "*direct divine action* in the world." {17} That is, such principles forbid us to believe that God has ever directly intervened in the world which He has made. And for Christians, this presents a real difficulty with historical criticism.

Some Problems with Historical Criticism

According to Christian scholars Norman Geisler and William Nix, a fundamental problem with historical criticism is that "it is based on an unjustified antisupernatural bias which it superimposes on the biblical documents." {18} This can easily be seen by examining some of the things which have been written by proponents and advocates of this method.

For example, Rudolf Bultmann, who was interested in "demythologizing" the New Testament, famously wrote, "It is impossible to use electric light . . . and to avail ourselves of modern medical . . . discoveries, and at the same time to believe in the New Testament world of spirits and miracles." {19} Similarly, another theologian has written that whatever the biblical authors may have believed about such things, "we believe that the biblical people lived in the same" world we do, that is "one in which no divine wonders

transpired and no divine voices were heard.”{20}

Now if we ask such scholars why it is that we’re to think that miracles are either unbelievable or impossible, we’ll usually notice rather quickly that the responses are generally short on arguments and long on assumptions. That is, such scholars typically just *assume* that God is not directly involved in the world and that miracles never occur. But if a personal Creator of the universe exists (and there are [good reasons](#) to think that one does), then why should we simply *assume* that He would never directly intervene in the world which He has made? Such intervention would hardly seem *impossible*. And if it produced an effect which would not have come about had nature been left to itself, then this could quite properly be regarded as a miracle.

So it seems to me that if a personal God exists, then miracles are possible. And if miracles are possible, then it is nothing more than “an unjustified antisupernatural bias” (as Geisler and Nix assert) to simply *assume* that the Bible’s reports of miracles are all false and unbelievable. And since historical criticism of the Bible often begins with just such an assumption, it appears to offer us an inadequate method for correctly reading the Bible.

An Alternative to Historical Criticism

Having looked at some problems with historical criticism, we can now consider a preferable alternative, namely, theological interpretation.{21}

So what is theological interpretation? As I’m using the terminology here, it’s a method of reading the Bible like a Christian, with the aim “of knowing God and of being formed unto godliness.”{22} Theological interpretation takes a sober and serious account of what Christianity is, believes, and teaches. It then attempts to read and interpret the Bible as

“a word from God about God.”[{23}](#)

It’s a radically different way of reading the Bible from that practiced by historical critics. Of course, as theologian Russell Reno reminds us, “There is obviously a historical dimension” to the truth found in the Bible. “Nevertheless,” he continues, “to be a Christian is to believe that the truth found in the Bible is the very same truth we enter into by way of baptism, the same truth we confess in our creeds, the same truth we receive in the bread and wine of the Eucharist.”[{24}](#)

But historical criticism attempts to read the Bible in the same way one would read any other book from the ancient world. It assumes that the Bible is merely a human book. The only way to really understand a book of the Bible, then, is to try to understand how it originated and what the original author was trying to say.

Theological interpretation, on the other hand, does not view the Bible as a merely human book. Of course, it realizes that each of the biblical books has a human author. But it also insists, along with the consensual teaching of the Christian community, that each of these books also has a Divine author.[{25}](#) It thus views the Bible as a divinely-inspired document.

Is this a legitimate way to read the Bible? Alvin Plantinga has written extensively on the theory of knowledge.[{26}](#) According to him, the biblical scholar who is also a Christian “has a perfect right to assume Christian belief in pursuing her inquiries.” Doing so, he says, is just as legitimate as assuming the principles of historical criticism.[{27}](#) Indeed, for the Christian it is arguably better—for it allows us to read the Bible in continuity with the tradition and faith we profess and believe.

Notes

1. Gregory Dawes, for example, notes that both form criticism

and redaction criticism would fall under the umbrella of historical criticism. See Gregory Dawes, "'A Certain Similarity to the Devil': Historical Criticism and Christian Faith," in *Interdisciplinary Perspectives on the Authority of Scripture: Historical, Biblical, and Theoretical Perspectives*, ed. Carlos R. Bovell (Eugene, OR: Pickwick Publications, 2011), 354.

2. Benjamin Jowett, "On the Interpretation of Scripture," in Josephine M. Guy, *The Victorian Age: An Anthology of Sources and Documents*. n.p.: Routledge, 1998. eBook Collection (EBSCOhost), EBSCOhost (accessed February 9, 2013), 295.

3. See Eta Linnemann, *Historical Criticism of the Bible: Methodology or Ideology?* trans., Robert Yarbrough (Grand Rapids: Kregel, 2001), 84.

4. Alvin Plantinga, "Two (or More) Kinds of Scripture Scholarship," in *"Behind" the Text: History and Biblical Interpretation*, edited by Craig Bartholomew, C. Stephan Evans, Mary Healy and Murray Rae (Grand Rapids: Zondervan, 2003), 33.

5. Ibid.

6. James C. Livingston, *Modern Christian Thought: The Enlightenment and the Nineteenth Century*, 2nd ed. (Minneapolis: Fortress Press, 2006), 29.

7. Ibid.

8. Peter Stuhlmacher, *Historical Criticism and Theological Interpretation of Scripture: Toward a Hermeneutics of Consent* (Philadelphia: Fortress Press, 1977), 38-40.

9. Edgar Krentz, *The Historical-Critical Method* (Eugene, OR: Wipf and Stock, 2002), 19.

10. Ibid.

11. The first sentence of Maier's book declares, "The general acceptance of Semler's basic concept that the Bible must be treated like any other book has plunged theology into an endless chain of perplexities and inner contradictions." See Gerhard Maier, *The End of the Historical-Critical Method*, trans., Edwin W. Leverenz and Rudolph F. Norden (Eugene, OR: Wipf and Stock, 2001), 11.

12. Plantinga, echoing the language of Robert Gordon, grants

that we might refer to the attempt to answer such questions as a “warranted” form of historical biblical criticism. See Alvin Plantinga, “Reason and Scripture Scholarship: A Response to Robert Gordon and Craig Bartholomew,” in *“Behind” the Text*, 94.

13. For those interested in this essay, see Ernst Troeltsch, “Historical and Dogmatic Method in Theology (1898),” trans. E. Fischhoff, rev. W. Bense in *Religion in History-Ernst Troeltsch: Essays*, trans. J. L. Adams and W. F. Bense (Edinburgh: T. & T. Clark, 1991).

14. Edgar Krentz states, “Contemporary historians use Troeltsch’s three principles, but with significant modifications” (*The Historical-Critical Method*, 56). However, it does not seem necessary to qualify the modifications of Troeltsch’s principles by practicing historical-critical scholars with the adjective “significant,” for (in my opinion, at any rate) they are generally more severe in critically evaluating the sources with which they are dealing than the average historian is with his.

15. For two very helpful discussions of Troeltsch’s principles, see Alvin Plantinga’s discussion of “Troeltschian HBC” in “Two (or More) Kinds of Scripture Scholarship,” in *“Behind” the Text*, 31-35, as well as Gregory Dawes discussion in “‘A Certain Similarity to the Devil’: Historical Criticism and Christian Faith,” in *Interdisciplinary Perspectives on the Authority of Scripture*, 358-70. Although Plantinga and Dawes reach different conclusions about if and how Troeltsch’s principles can be legitimately employed, both discussions are well worth reading.

16. Stuhlmacher, *Historical Criticism and Theological Interpretation of Scripture*, 45.

17. Alvin Plantinga, “Two (or More) Kinds of Scripture Scholarship,” in *“Behind” the Text*, 33.

18. Norman L. Geisler and William E. Nix, *A General Introduction to the Bible: Revised and Expanded* (Chicago: Moody Press, 1986), 440.

and Myth, edited by Hans Werner Bartsch (New York: Harper and Row, 1961), 5.

20. Langdon Gilkey, "Cosmology, Ontology, and the Travail of Biblical Language," reprinted in Owen C. Thomas, ed., *God's Activity in the World: the Contemporary Problem* (Chico, CA: Scholar's Press, 1983), 31; cited in Alvin Plantinga, "Two (or More) Kinds of Scripture Scholarship," in *"Behind" the Text*, 34.

21. Kevin Vanhoozer defines "theological interpretation" as "the process of keeping the canonical practices alive and well in the believing community." A bit later he describes a "canonical practice" as "divinely authorized use of language and literature, which, when learned, presents and forms Christ." As examples of "canonical practice," he discusses, first, the typological, or Christological, interpretation of the Old Testament in light of the person and work of Jesus Christ and, second, prayer. He concludes his discussion by noting, "Christians learn to speak about, to think about, and to live for God by indwelling the diverse canonical practices that comprise the Scriptures. By participating in such practices-interpreting figurally, praying to the Father, and the like-Christians grow in faith toward understanding." This, it seems to me, is a helpful way of fleshing out, in greater detail, all that is involved in the concept and practice of the "theological interpretation" of Scripture. See Kevin Vanhoozer, *The Drama of Doctrine: A Canonical-Linguistic Approach to Christian Theology* (Louisville, KY: Westminster John Knox Press, 2005), 219-226. The citations in this note are from pp. 219 and 226.

Exploring God’s Relationship to Time

Written by David Pattillo and Michael Gleghorn

Introduction

Why does time flow the way it does? Can we alter time, or is it beyond our grasp? Is time travel possible? Is God inside or outside of time? Does everyone experience time the same way we do? When faced with the question, What is time? we encounter one of the most fundamental human inquiries, as well as one of the most difficult philosophical questions. Every person seems to experience the flow of time every single day, yet when asked to define it, we are often at a loss for words. Thus, for the purpose of this article, we shall define time as a relation of events involving earlier than and later than.

Two views of time

When it comes to the philosophy of the nature of time, there are essentially two views: the *dynamic, tensed*, or *A Theory*; and the *static, tenseless*, or *B Theory*. It is traditionally said that on the *A Theory*, the present is ontologically privileged. That is to say, the present is the only thing that is really real; the past has happened and the future will happen. It is much easier to see what distinguishes the *A Theory* when it is compared with the *B Theory*, which holds that all moments are equally real. That is (according to the *B Theory*), from our perspective it is 2007, 1950 is in the past and 2050 is in the future. But for the people in 1950 (who also exist at *that* time), both 2007 and 2050 are in the future. Likewise, for the people in 2050 both 1950 and 2007 are in the past. The *B Theory* holds that it is ignorant to think of our moment of the world as the real moment, or the moment occupying some privileged position. According to the *B Theory*, any tensed idea, or sentence whose verb has tense (i.e., past/present/or future), would actually be more accurate if it were translated into a tenseless idea or sentence (i.e., one that has a tenseless verb and time stamp to say when something happened, rather than a tensed verb) since tensed ideas imply that the present moment of time is superior to, or more real than, all other moments. For instance, according to the *B Theory*, the tensed sentence, JFK was assassinated, would misconstrue reality as if the year 2007 (or any year after 1963) is more real or significant than the years 1907 or 1963, because it has a verb in the past tense. This theory holds that the sentence would be better put On November 22, 1963, at 12:30 P.M. CST JFK *is* assassinated.[\[2\]](#) This tenseless sentence is preferred on the *B Theory* because there is no moment that can claim to be the true present moment; rather, there are just equally real moments. Advocates of the *B Theory* say that reality is one long 4-dimensional block, and we are just experiencing one moment of that block, but all the moments are equally real or

existent. The *A Theory*, on the other hand, would say that *tensed verbs* (verbs in the past/present/future tense) do reflect reality; there really is a past, present, and future, and they are always changing as time flows and the future becomes present and then past.

Which one of these views is correct has vast implications for the way we interpret reality. For example, it will have an effect on the way we understand God and His relation to the world. One might think that this would be the proper time to turn to Scripture to see whether it supports an *A* or *B Theory*. However, its important to recognize the fact that Scripture is not entirely clear with respect to this issue. Therefore, we will postpone looking at the Bible until our discussion of Gods relation to time. For the present, we need to discuss which of the two theories is superior and why.

A vs. B

The most powerful argument for the *A Theory* is its intuitiveness. That is, we experience the flow of time in just as real a way as any other experience in our lives. We very directly experience the present. To say that event *e* is occurring now is no different than saying that event *e* is occurring.[{3}](#) When we look forward to the future or regret the past, we are experiencing the *A Theory* because, if you think about it, on the *B Theory* there is no difference between past, present, and future.[{4}](#) Lastly, when a kid says: I wish it were Christmas morning, or I wish I were already done with this test, he is expressing the *A Theory*. That is, he wishes that the present moment, say t_1 , were replaced by some other moment, say t_2 . This expresses the idea of *temporal becoming* (the idea that the present moment changes as we pass through time), which is an experience of the *A Theory*. As William Lane Craig puts it, We thereby presuppose the reality of temporal becoming, since our wish expresses our belief in a changing and objective present.[{5}](#) Thus the *A Theory* very comfortably

coheres with what we experience in everyday life.

Now, the B theorist may ask, Why accept this experience as anything more than an illusion? To answer this we must briefly digress with a discussion of Alvin Plantinga's *epistemology*, or theory of knowledge. When evaluating beliefs, many skeptics want to reject anything that is not certain. This was especially prominent in the philosophy of Ren Descartes, who rejected all his sense experience because it could have been wrong. After all, when you think about it, we could be in the *Matrix*.^[6] It could be that everything you think is real is just electrical impulses interpreted by your brain. Or it could be that the world was created five minutes ago, and you were created with all the memories you currently have. Or maybe you are the only mind in the universe, and everyone else is just a robot, cleverly designed to give the appearance of having a human mind. And the list of possibilities goes on and on. None of these can be disproven, but should we conclude that we really don't know whether anyone else actually exists? Plantinga doesn't think so. He has developed a theory that labels these and other similar beliefs as *properly basic beliefs*.

Think about it this way. If you are reading this online, the belief that there is a computer in front of you is properly basic; that is, it is a foundational belief formed in correct circumstances. Therefore, you are warranted in believing it until presented with some *defeater* of your belief. In this case, a *defeater* would have to be some good reason to believe that your senses are deceiving you. In other words, according to Plantinga, common sense beliefs about sensory experience, memory, the existence of other minds or other similar beliefs should be regarded as innocent until proven guilty (i.e., judged reliable until proven otherwise). Likewise, our experience of real temporal passing and an objective past, present, and future warrants belief in the *A Theory* until a strong counterargument is offered strong enough to cause us to

doubt this experience.

Another major argument for the *A Theory* is what is known as the *ineliminability of tense*.[\[7\]](#) Simply put, this is the idea that tensed statements imply tensed facts which further imply a tensed reality. B theorists have made numerous attempts to show that tensed sentences can be translated into tenseless sentences that do not imply a tensed reality. However, all these attempts have failed. Craig illustrates:

This point is underlined by the ineptness of some of the supposed tenseless translations of tensed sentences. Take, for example, the tensed sentence It is now 4:30. We can imagine situations in which a persons life would depend on his holding such a belief. But the tenseless counterpart of this sentence is either It is 4:30 at 4:30, which is a mere tautology, or It is 4:30 simultaneous with this utterance, which is useless unless we also know that This utterance is occurring now, which is a tensed belief. In both cases the tenseless versions are insufficient to motivate timely action because they do not inform us whether or not it actually is 4:30.[\[8\]](#)

If tensed sentences lose some meaning when translated into tenseless sentences, then there is some important meaning in tense, namely, that reality is reflected by tense. Therefore, if tenseless sentences cannot capture the facts expressed by tensed sentences, then there must be tensed facts. And thus we have a strong argument for temporal reality.

Next we turn our attention to some problems with the *B Theory* of time. While there are numerous problems, we will discuss just two of them.[\[9\]](#) First, the *B Theory* of time greatly misconstrues some biblical ideas, one example being the doctrine of *creation ex nihilo*. For the B theorist, the universe beginning to exist simply means that it has a starting point, just like a yard stick has a first

inch.{10} The problem is that on this view There is in the actual world no state of affairs of God existing alone without the space-time universe. God never really brings the universe into being; as a whole it co-exists timelessly with Him.{11} So while the universe depends on God, the idea of *creation ex nihilo* is severely stripped of meaning since the universe always timelessly exists with God. That is, in some sense, God and space-time seem to be equally necessary in their existence.

The other major biblical problem is that evil is never really vanquished.{12} On the static theory of time [*B Theory*], evil is never really vanquished from the world: It exists just as sturdily as ever at its various locations in space-time, even if those locations are all earlier than some point in cosmic time (for example, Judgment Day).{13}

Furthermore, events like the crucifixion are never past or done away with. They simply remain timelessly forever, which seems hard to reconcile with Christs victory over death.

A second argument against the *B Theory* has to do with the impossibility of the existence of *actual infinities*. It has now been almost universally agreed upon by mathematicians and philosophers that an actually infinite number of things cannot be actualized in the space-time universe. The idea of *actual infinities* creates many paradoxes. For instance, what is infinity minus infinity? Well mathematically one gets contradictory answers. For example, one could say that the answer is infinity. But the answer could also be 4, or 0, or any other number you want. This led the great mathematician David Hilbert to say, The infinite is nowhere to be found in reality. It neither exists in nature, nor provides a legitimate basis for rational thought...the role that remains for the infinite to play is solely that of an idea.{14}

Thus, what we have in the space-time universe are not *actual infinities*, but *potential infinities*. For example, you can start

counting 1, 2, 3, 4, 5 and continue this process for a potentially infinite time (i.e., you can keep going as long as you want). But you will never reach a moment when you can stand up and exclaim, Im done! Ive counted to infinity! In the same way a line three inches in length can be divided in half, and then in half again, and then in half again, ad infinitum. But it can never actually be divided an infinite number of times. For this reason, in addition to compelling scientific and theological evidence, essentially all philosophers and scientists have now come to believe that time is finite in the past.

However, the future is different. We know that the future is not finite but infinite. We know this both philosophically and biblically by the promise of *everlasting* or *eternal* life. Therefore, most scholars have concluded that the future, like numbers, is potentially infinite. We can keep adding years forever, but we will never reach an end. But this is inconsistent with the *B Theory*. Since every moment of time in fact exists at once, and the future has no end, there is an actually infinite number of years in the future. But since we know that there are no actualized infinities in the real world, we can safely conclude that the *B Theory* is wrong in its description of the future.

So we have seen two strong arguments for the *A Theory*, from our experience of temporal reality and the ineliminability of tense in language, and two ways that the *B Theory* seems clearly implausible, from *creation ex nihilo* and the impossibility of *actual infinities*. Other attempts have been made to revive the *B Theory*, but suffice it to say that they have been answered thoroughly.[{15}](#)

Gods Relation to Time

We now turn to how an infinite God relates to our passage of time. There are some things of which we are certain. First, time began a finite time ago. We know this from the Bible,[{16}](#)

philosophy,{17} and science.{18} Second, we know God neither began to exist, nor will He ever cease to exist.{19} We can further conclude that God existed before time.{20} This is best exemplified in Jude 25: ...To the only God our Savior, through Jesus Christ our Lord, be glory, majesty, dominion and authority, *before all time* and now and forever. Amen.{21} Since we know that God existed before time,{22} we can conclude that without the universe, God existed timelessly.{23}

We then must ask ourselves, how does God relate to the universe since it began? Here again we find two common positions. One is that God is timeless. By this it is meant that God, while the creator and sustainer of the world, was not affected by the creation of the world and remains constant outside the universe, just as He was before the act of creation. The other common position is that God is *temporal*. That does not mean that God is limited by time, but rather that He is intimately related to temporal things. He thus has a past, present, and future, just like other temporal things. Since there is no beginning or end to His existence, this position is also sometimes called *omnitemporality*.

There are two main arguments in favor of Gods *omnitemporality*. First, there is the argument from Gods relation to the universe. When God brought the universe into being, He stood in new relationships that He did not have before. Once the universe exists, He now is the sustainer of and is co-existent with the universe.{24} He could have remained timeless, but since He created the universe He went through an *extrinsic change*.{25} If God undergoes this change, then surely He must be temporal. That is, we can speak of a past, present and future for God. In the past He had one relation and in the present He has another relation. This provides a way to associate God with time, and that is all the omnitemporal view of God requires.

The second major argument for Gods *omnitemporality* comes from

His omniscience specifically, His knowledge of tensed facts.[{26}](#) That is, as the present is constantly changing, true sentences are constantly changing. For instance, there are tenseless truths that are always true such as: The World Trade Centers *are* attacked on September 11, 2001. However, on September 10, 2001, the sentence The World Trade Centers *will* be attacked tomorrow was true, but this statement is not true on September 11th. What is true on September 11th is the statement, The World Trade Centers *are* being attacked today. Finally, any time since then, the true statement has been, The World Trade Centers *were* attacked on September 11th. All of these statements can be true or false depending on when they are made. That is because the verbs relate the sentence to the present. Thus, a God who knows only tenseless truths (as the *tenseless view* of God proposes) would seem to be very ignorant indeed, for there are seemingly limitless things He would not know. However, if God does possess knowledge of the truth of tensed sentences, this would seem to make Him temporal. As Dr. Craig puts it, any being which does know tensed facts cannot be timeless, for his knowledge must be in constant flux, as the tensed facts known by him change.[{27}](#) Thus we have a second powerful argument for God being temporal .

On the other hand, the major argument for Gods timelessness is what is known as the *incompleteness of temporal life*.[{28}](#) This is the idea that temporal life is so limited that a perfect God would not experience it. Certainly the fleetingness of our own lives has led to many existential questions of the meaning of life given that it will all end relatively shortly. Surely God would not be limited in this way. Well, this is a plausible argument and does carry some weight, but I am not sure how much. For one thing, because of Gods complete omniscience and ability to experience whatever He wants, the past is never really lost to God, which makes temporality far less of a limitation. Secondly, since He never ends, and we His children never cease to be in company with Him (assuming

we have received His free gift of eternal life), there really is no need for Him to try to grasp onto fleeting moments as we so often do. So, while this argument seems plausible, it does not seem to me to be remotely powerful enough to call into question the powerful arguments we have for the *omnitemporality* of God.

Thus, it seems we have good reason to think that God is timeless without creation and temporal since creation.[{29}](#) But it is important to remember that He did not have to create. Rather, His free decision to create a temporal world also constitutes a free decision on His part to exist temporally.[{30}](#) Many would now ask how it makes sense for God to exist timelessly and then temporally. It seems plausible to say that time is a relation of events. That is, Gods existence without creation was just simple, unchanging Trinitarian perfection, and it does not make sense to talk about before and after when there was no change. However, at the moment of the creation, we now have an event, and we can start relating events by temporal distance from the creation. Thus we conclude that God existed timelessly, and then created time and space, giving us the first mark of time, and time has been flowing ever since.

So then, we have seen that there is a real past, present, and future. God, though timeless, created, thus giving us temporal relations. We can speak of past, present, and future for God since He is intimately related to temporal things and has temporal knowledge. Since the first event, we now have a flow of time that will never end as we live on into eternity with or without God.

Notes

1. I owe a great credit to both Dr. William Lane Craig for most of the ideas of this paper, and to Michael Gleghorn for help in developing these ideas.
2. I have picked up Dr. William Lane Craig's use of italics to

symbolize a tenseless verb.
