

# Confucius – A Christian Perspective

## The Life of Confucius

Born in 550 B.C., Confucius is considered the greatest of all Eastern philosophers. His teachings are foundational to Asian cultures. His writings, *The Five Classics*, a collection of ancient Chinese literature, and *The Four Books*, a collection of his and his disciples' teachings, were for centuries the standard curriculum for Chinese education.

Confucius' teachings and biography were written many years after his death and were edited by his disciples. Although historians present various accounts of his life, there are some basic facts about which we are reasonably sure. From these basic facts, it is possible to outline the major events of his life.

Confucius lived during the Chou Dynasty (1100 B.C. to 256 B.C.) He was born in northern China in the Lu province into a family of humble circumstances. His father died at a young age. Confucius began studying under the village tutor and, at the age of fifteen, devoted his life to study. He married at twenty but soon divorced his wife and had an aloof relationship with his son and daughter. In his twenties, he became a teacher and gathered a group of loyal disciples.

At this time, the land was divided among feudal lords. The moral and social order was in a state of decay. Confucius sought a way to restore both cultural and political order. He believed that reform would be accomplished by educating the leaders in the classics and his philosophy. He therefore sought a political position of influence, from which he could implement his principles.

When Confucius was fifty years old, tradition teaches that the Duke of Lu appointed him to a cabinet position. Several historians believe he eventually ascended to higher positions of public office. Due to political disagreements and internal conflicts, he resigned his post at fifty-five and left the province of Lu. He then traveled from state to state for thirteen years, seeking to persuade political leaders to adopt his teachings. Although many lords respected him, no one gave him a position. Discouraged by the lack of response, he devoted his final years to teaching and writing. Before his death in 479 B.C., he expressed his discouragement and disillusionment regarding his career.

However, his disciples were able to gain significant positions in government after his death. They modified his teachings and added their own insights and centuries such that Confucianism later shaped Chinese culture by becoming the official religion of China. The values he espoused of education, family loyalty, work ethic, value of traditions, conformity to traditional standards, honoring of ancestors, and unquestioning obedience to superiors remain entrenched in Asian culture.

There is much to appreciate regarding the life and teachings of Confucius. Christians would agree with his philosophy of ethics, government responsibility, and social conduct on several points. These similarities provide bridges upon which we can build meaningful dialogue with those in East Asian Cultures. These values make East Asian people open to the message of Christ. Despite the similarities in ethics, there are some major differences between Christianity and Confucianism that are important to identify. This work will highlight these differences and provide ways we can effectively share Christ with those in East Asian cultures.

## **The Metaphysics of Confucius**

Confucianism, as its founder taught, is not a religion in the traditional sense; rather, it is an ethical code. Chinese

culture was steeped in the religion of animism, a belief that gods and spirits dwelt in natural formations. Along with an animistic worldview, there was a belief in ancestor worship. The spirits of the dead needed to be honored and cared for by the living family members.

However, Confucius avoided spiritual issues in his teachings. Although he believed in spirits and the supernatural, he did not feel the need to devote extensive efforts in teaching about them. Rather, he was humanistic and rationalistic in his outlook. According to David Noss, author of *A History of the World's Religions*, Confucius' "position on matters of faith was this: whatever seemed contrary to common sense in popular tradition and whatever did not serve any discoverable social purpose, he regarded coldly." [\[1\]](#) The answer to the cultural and social problems was found in humanity itself, not in anything supernatural. This is further exhibited in the following three references:

1) A disciple of Confucius wrote, "The master never talked of prodigies, feats of strength, disorders or spirits" [\[2\]](#)

2) Confucius himself stated, "To devote oneself earnestly to one's duty to humanity, and while respecting the spirits, to keep aloof from them, may be called wisdom." [\[3\]](#)

3) In the Waley translation of the *Analects*, Confucius stated, "Our master's views concerning culture and the outward insignia of goodness, we are permitted to hear; but about man's nature and the ways of heaven, he will not tell us anything at all." [\[4\]](#)

In the Confucian system a divine being does not have a significant role; his philosophy is man-centered and relies on self-effort. Man is sufficient to attain the ideal character through education, self-effort, and self-reflection. His system articulated the proper conduct in relationships, ceremony, and government. The core problem of mankind

according to Confucius is that people are not educated and do not know how to conduct themselves properly in their societal roles. The chief goal of life is to become educated and live a moral life.

However, Confucius acknowledges a supreme power which established the moral order of the universe. This he refers to as the "Mandate of Heaven." The "Mandate of Heaven" may also refer to fate and events occurring in life which are beyond the control of the individual. The just ruler and the virtuous man live in accord with this moral order. This is the moral order that lies behind the Confucian ethical system. One must be careful not to violate the will of heaven. Confucius wrote, "He who put himself in the wrong with Heaven has no means of expiation left."<sup>{5}</sup> Some scholars believe the uses of the term reveals that Confucius was referring at times to a supreme being.<sup>{6}</sup> After his death, Confucianism evolved, combining with Chinese traditional religions and Buddhism to add a spiritual component.

In contrast, Christianity is God-centered. It is built on a relationship with a personal God who is involved in the world. Confucius focused on life here on this earth. Jesus focused on life in eternity. For Jesus, what happens in eternity has ramifications for life here on earth. In Matthew 6:19 Jesus stated, "Do not store up for yourselves treasures on earth, where moth and rust destroy, and where thieves break in and steal. But store up for yourselves treasure in heaven where moth and rust do not destroy and where thieves do not break in and steal." Here we see a contrast in the perspectives of Jesus and Confucius.

## **The Ethics of Confucius**

Three key principles are emphasized in the teachings of Confucius: the principle of Li, the principle of Jen, and the principle of Chun-Tzu. The term Li has several meanings which are often translated as propriety, reverence, courtesy,

ritual, or the ideal standard of conduct. It is what Confucius believed to be the ideal standard of religious, moral, and social conduct.

The second key concept is the principle of Jen. It is the fundamental virtue of Confucian teaching. Jen is the virtue of goodness and benevolence. It is expressed through recognition of value and concern in others regardless of their rank or class. In the *Analects*, Confucius summarizes the principle of Jen in this statement often called the silver rule: "Do not do to others what you would not like them to do to you."[{7}](#) Li provides the structure for social interaction; Jen makes it a moral system.

The third important concept is that of Chun-Tzu, the idea of the true gentleman. It is the man who lives by the highest ethical standards. The gentleman displays five virtues: self-respect, generosity, sincerity, persistence, and benevolence.[{8}](#) His relationships are described as follows: as a son he is always loyal, as a father he is just and kind, as an official he is loyal and faithful, as a husband he is righteous and just, and as a friend, he is faithful and tactful.[{9}](#) If all men lived by the principles of Li and Jen and strove to the character of the true gentlemen, justice, and harmony would rule the empire.

The Christian would find himself in agreement with many of Confucius' ethical principles and virtues. A Christian would also agree with many of the character qualities of the true gentleman and seek to develop those qualities.

What accounts for the similarity in ethics in Confucianism and other religious systems is that which Paul states in Romans 2: within every man there exists a God-given conscience or natural law that guides our moral conduct. This is because we are created in the image of God, and thus we reflect His character. However, similarity in ethical codes does not mean the religions are the same.

The key difference can be identified by examining the silver rule of Confucius in contrast with the greatest commandment of Christ. Confucian law is summarized by the silver rule; however, Jesus summarizes his teachings this way: "Love the Lord your God with all your heart, with all your soul, and with all your mind. This is the first and greatest commandment. And the second is like it: Love your neighbor as yourself" (Matthew 22:38.) Confucius believed that in order to truly achieve the principles of Li, Jen, and the character of the true gentleman, one must look within oneself. Jesus takes His teaching a step further. All His principles revolve first around a relationship with God. We only truly love our fellow man and live the righteous life God calls us to after our nature is transformed by the work of God's Holy Spirit which comes to indwell all who trust in Christ.

## Nature of Man

The Confucian philosophy is built on the foundational belief in the goodness of human nature.<sup>{10}</sup> The *Analects* state, "The Master said, 'Is goodness indeed so far away? If we really wanted goodness, we should find that it was at our side.'"<sup>{11}</sup> He further taught that all individuals are capable of attaining the highest virtue. He stated, "Has anyone ever managed to do Good with his whole might even as long as the space of a single day? I think not. Yet I for my part have never seen anyone give up such an attempt because he had not the strength to go on."<sup>{12}</sup> In other words, all individuals are capable through self-effort to attain the ideal goodness.

Confucian disciple Mencius further develops this stating, "Man's nature is naturally good just as water naturally flows downward."<sup>{13}</sup> This innate goodness can be developed and actualized through education, self-reflection, and discipline. Study in the six arts, which include ceremony, music, archery, charioteering, writing, and mathematics, develop one's character.

However, despite man being naturally good, Confucius faced reality honestly. He questioned whether it was possible to ever truly attain to the level of the true gentleman. Confucius stated, "I for my part have never yet seen one who really cared for goodness, nor one who really abhorred wickedness."[{14}](#) He said of himself, "As to being a divine sage or even a good man, far be it from me to make any such claim."[{15}](#) He further stated, "The master said, the ways of the true gentleman are three. I myself have met with success in none of them."[{16}](#) However, if man by nature is good, why can we not attain that which should be natural to us?

The Bible is built on a contrasting view of man. It teaches that man is created in the image of God and was thus originally good. However, because of the fall in Genesis 3, man is now sinful and in rebellion toward God. Therefore, his natural tendency is to disobey the commandments of God, and he is driven to please himself. Paul states in Romans 7:18, "I have the desire to do good, but I cannot carry it out." As Confucius observed, no man is able to live up to the standards of the "True Gentleman" or God's commands because man's nature is sinful and in need of transformation.

According to the Bible, good education is a positive step toward helping man change, but it falls short. Man is in need of a heart transformation. Life transformation occurs when a person enters into a personal relationship with God through His Son Jesus Christ. One's nature is transformed because God's Spirit indwells an individual. Although the Christian is not capable of living out the principles of God's law flawlessly, he is not left to live a holy life on his own strength. God provides man the indwelling of His Holy Spirit to enable man to live in obedience to God's law.

## **Relationships**

Central to Confucius' teaching are relationships and social roles. There are five great relationships.[{17}](#) If these

attitudes are practiced, there will be harmony among all:

- 1. Kindness in the father and obedient devotion in the son*
- 2. Gentility in the eldest brother and humility and respect in the younger*
- 3. Righteous behavior in the husband and obedience in the wife*
- 4. Humane consideration in elders and deference in juniors*
- 5. Benevolence in rulers and loyalty of ministers and subjects*

The most important relationship is the family as it is the basic unit of all humanity. Consistent with the pantheistic world view, he did not believe in an individual self or soul. Rather, roles and relationships define a person. The goal of living is to achieve harmony by acting appropriately within those roles and relationships because the harmony of relationships within the family can extend into the life of the community and the world. The way individuals relate to their family members influences how they treat members of the community. This, in turn, affects relationships beyond the community. Thus, harmonious family relationships lead to harmonious relationships in the community. If there is discord in the family, this will likewise carry over into the community.

In the family unit, the father is the key figure. He must be a good example to his sons. It is the son's duty to obey without questioning and honor his father even after his father's death. When the father dies, obedience is then given to the oldest brother. Confucius stated, "Meng I Tzu asked about the treatment of parents. The Master said, 'Never disobey! . . . While they are alive, serve them according to ritual. When they die, bury them according to ritual and sacrifice to them

according to ritual.'”[{18}](#)

Confucius taught that government should be for the people. Feudal lords are to be responsive to the needs of the people they govern. If the rulers lived by the highest principles, the people would then follow, and there would be reform from the greatest to the least. The duty of those in subordinate positions is to be unquestioningly loyal to their superior. Confucius stated, “It is said that if good people work for a country for a hundred years, it is possible to overcome violence and eliminate killing. This saying is indeed true.”[{19}](#) Confucius believed that a good society would be achieved through education.

There are points of agreement between Confucius and the Bible. Confucius believed the virtues he espoused are lived out in relationships. The same is true for Christianity; our relationship with God is reflected in our relationships with one another. The truth of the Christian life is lived out in a community, not in isolation. The family is the key social unit, and the father is the leader of the family. However, Christianity takes relationships one step further than Confucius. Not only can we have the five relationships espoused by Confucius, we can also have a personal relationship with God. It is from this connection that our earthly relationships find their greatest meaning.

## **A Final Critique**

There is much in the teachings of Confucius that I have found commendable. His moral values often parallel those taught in the Bible. As previously mentioned, the Bible teaches that we are created in the image of God, and, therefore, we reflect His moral character. His moral law code is embedded on our hearts (Rom. 2). Most people of Asian descent may not be strict adherents to Confucianism, but they are all influenced by his philosophy. Anyone seeking to serve in Asian cultures would find it worthwhile to read his works. Confucianism is

very adaptable and fluid in its structure. That has been a weakness, but it has also a strength of the system since it allows Confucianism to join other inclusive religious systems. There are several significant differences, and, I believe, deficiencies within Confucian philosophy.

First, Confucianism falls short as a comprehensive life view because it fails to address several key issues. The Confucian system does not answer the key questions such as, Why does the universe exist? How do we explain its origin? What is the meaning of mankind's existence in the universe? What happens after death? These are universal questions that must be addressed. Man is a spiritual being, and this philosophy leaves one spiritually void. The Bible teaches that God has set eternity in the heart of men (Eccl. 3:11.) The longing for spiritual answers is a universal need. For this reason, Confucian philosophy eventually combined with Chinese Folk religion and Buddhism. Nonetheless, it still fails to provide complete answers.

Second, Confucius taught there was an overarching morality and will called the "Mandate of Heaven" which guided the universe. The Mandate of Heaven is the moral order established by heaven. Some believe Confucius was referring to an impersonal force; others believe he was referring to a personal being. In either case, Confucius felt the heavens (or the one in heaven) do not communicate with people. Confucius stated, "Heaven does not speak; yet the four seasons run their course thereby, the hundred creatures, each after its kind, are born thereby. Heaven does no speaking!"<sup>{20}</sup> in contrast, the Bible teaches that we can have a relationship with the one who established the moral order. God is involved with creation and has made the way for a relationship with Him possible through His son (Jn. 3:16). The creator of all things has communicated with us through His Word and His Son. He also invites us to commune with Him in prayer and intimate fellowship. The imagery of the Shepherd and His sheep found in Psalm 23 and John 10 reflect

His desire for a close relationship with us.

Third, Confucius built his philosophy on the belief that man is basically good. However, despite this, Confucius honestly admitted that no one had attained the level of the true gentleman. Confucius stated, "I for my part have never yet seen one who really cared for goodness, nor one who really abhorred wickedness."[\[21\]](#) He said of himself, "...the Ways of the true gentleman are three. I myself have met with success in none of them."[\[22\]](#) If man is good by nature, we must ask why we cannot attain what should be natural to us.

The Bible is built on a contrasting view of man. It teaches that man is created in the image of God but fallen in sin and rebellious toward God. Therefore, his natural tendency is to disobey the commandments of God and please himself. Paul states in Romans 7:18, "I have the desire to do good, but I cannot carry it out." Good education is a positive step toward helping man change, but it falls short. Man is in need of a heart transformation. Life transformation occurs when a person enters into a personal relationship with God and God's Spirit transforms one's nature through the indwelling and enabling power of His Holy Spirit.

## **Conclusion**

Confucius teaches many valuable ethical principles that are consistent with Biblical teaching. This offers Christians a good way to build bridges with many in East Asian cultures. However, the spiritual void in Confucianism is a great weakness; however, it provides a wonderful opportunity to present the case for Christianity.

Christianity offers a comprehensive life view, for it explains the nature of God, our relationship to Him, the origin of creation, and what happens after death. In Confucian teaching, one cannot communicate with the creator, but in Christianity, the Creator invites us and makes the way possible for a

relationship with Him through His Son Jesus. Finally, true transformation of one's nature will not occur through education, but rather through the Holy Spirit indwelling the believer in Christ.

# Rome and America – Comparing to the Ancient Roman Empire

*Kerby Anderson looks at the comparisons between modern America and ancient Rome, i.e. the Roman Empire. Do Americans have a worldview more like ancient Romans than the biblical worldview spelled out in the Bible? In some ways, yes, and in other ways, not so much.*

## Similarities

The philosopher George Santayana once said: “Those who cannot remember the past are condemned to repeat it.” To which I might add that those who remember Santayana’s maxim also seem condemned to repeat the phrase.

Ask anyone if they see similarities between Rome and America, and they are likely to respond with a resounding, “Yes!” But I have also found that people who see similarities between Rome and America see different similarities. Some see similarities in our moral decay. Others see similarities in pride, arrogance, and hubris. But all seem to agree that we are repeating the mistakes of the past and need to change our ways.

In his book *Are We Rome?*, Cullen Murphy argues that there are many similarities between the Roman Empire and America.[\[1\]](#) But he also believes that the American national character couldn’t be more different from Rome. He believes those differences can help us avoid Rome’s fate.

Let’s begin by looking at some of the political, geographical, and demographic similarities.[\[2\]](#)

1. Dominant powers: “Rome and America are the most powerful actors in their world, by many orders of magnitude. Their power includes both military might and the ‘soft power’ of language, culture, commerce, technology, and ideas.”
2. Approximately equal in size: “Rome and America are comparable in physical size—the Roman Empire and its Mediterranean lake would fit inside the three million square miles of the Lower Forty-eight states, though without a lot to spare.”
3. Global influence: “Both Rome and America created global structures—administrative, economic, military, cultural—that the rest of the world and their own citizens came to take for granted, as gravity and photosynthesis are taken for granted.”
4. Open society: “Both are societies made up of many

peoples—open to newcomers, willing to absorb the genes and lifestyles and gods of everyone else, and to grant citizenship to incoming tribes from all corners of the earth.”

5. Culturally similar: “Romans and Americans can’t get enough of laws and lawyers and lawsuits. . . . They relish the ritual humiliation of public figures: Americans through comedy and satire, talk radio and Court TV; the Romans through vicious satire, to be sure, but also, during the republic, by means of the *ensorial nota*, the public airing, name by name, of everything great men of the time should be ashamed of.”

6. Chosen people: “Both see themselves as chosen people, and both see their national character as exceptional.”

While there are many similarities, there are also profound differences between Rome and America. Before we look at the six major parallels that Murphy talks about, we need to remind ourselves that there are many distinct differences between Rome and America.

## Differences

It is no real surprise that people from different political and religious perspectives see similarities between Rome and America. While some see similarities in moral decay, others see it in military might or political corruption. Although there are many similarities between Rome and America, there are some notable differences.

Cullen Murphy points out these significant differences. [\[3\]](#)

1. Technological advancement: “Rome in all its long history never left the Iron Age, whereas America in its short history has already leapt through the Industrial Age to the Information Age and the Biotech Age.”

2. Abundance: “Wealthy as it was, Rome lived close to the

edge; many regions were one dry spell away from famine. America enjoys an economy of abundance, ever surfeit; it must beware the diseases of overindulgence.”

3. Slavery: “Rome was always a slaveholding polity with the profound moral and social retardation that this implies; America started out as a slaveholding polity and decisively cast slavery aside.”

4. Government: “Rome emerged out of a city-state and took centuries to let go of a city-state’s method of governance; America from early on began to administer itself as a continental power.”

5. Social classes: “Rome had no middle class as we understand the term, whereas for America the middle class is the core social fact.”

6. Democracy: “Rome had a powerful but tiny aristocracy and entrenched ideas about the social pecking order; even at its most democratic, Rome was not remotely as democratic as America at its least democratic, under a British monarch.”

7. Entrepreneurship: “Romans looked down upon entrepreneurship, which Americans hold in the highest esteem.”

8. Economic dynamism: “Rome was economically static; America is economically transformative.”

9. Technological development: “For all its engineering skills, Rome generated few original ideas in science and technology; America is a hothouse of innovation and creativity.”

10. Social equality: “On basic matters such as gender roles and the equality of all people, Romans and Americans would behold one another with disbelief and distaste.”

While it is true that Rome and America have a vast number of similarities, we can also see there are significant differences between the two. We therefore need a nuanced view

of the parallels between the two civilizations and recognize that these differences may be an important key in understanding the future of the United States.

## Six Parallels

Murphy sees many parallels between the Roman Empire and America in addition to the above.[{4}](#) The following are larger, more extensive, parallels.

The first parallel is perspective. It actually involves “the way Americans see America; and more to the point, the way the tiny, elite subset of Americans who live in the nation’s capital see America—and see Washington itself.”

Like the Romans, Americans tend to see themselves as more important than they are. They tend to have an exaggerated sense of their own presence in the world and its ability to act alone.

A second parallel involves military power. Although there are differences, some similarities stand out. Both Rome and America start to run short of people to sustain their militaries and began to find recruits through outside sources. This is not a good long-run solution.

A third parallel can be lumped under the term privatization. “Rome had trouble maintaining a distinction between public and private responsibilities.” America is currently in the midst of privatizing functions that used to be public tasks.

A fourth parallel concerns the way Rome and America view the outside world. In a sense, this is merely the flip side of the first parallel. If you believe your country is exceptional, you tend to devalue others. And more importantly, you tend to underestimate another nation’s capabilities. Rome learned this in A.D. 9 when three legions were ambushed by a smaller German force and annihilated.[{5}](#) The repercussions were significant.

The question of borders is a fifth parallel. The boundary of Rome “was less a fence and more a threshold—not so much a firm line fortified with ‘Keep Out’ signs as a permeable zone of continual interaction.” Compare that description to our border with Mexico, and so can see many similarities.

A final parallel has to do with size and complexity. The Roman Empire got too big physically and too complex to manage effectively. The larger a country or civilization, the more “it touches, and the more susceptible it is to forces beyond its control.” To use a phrase by Murphy: “Bureaucracy is the new geography.”[{6}](#)

Cullen Murphy concludes his book by calling for greater citizen engagement and for us to promote a sense of community and mutual obligation. The Roman historian Livy wrote, “An empire remains powerful so long as its subjects rejoice in it.” America is not beyond repair, but it needs to learn the lessons from the Roman Empire.

## **Decline of the Family**

What about the moral decline of Rome? Do we see parallels in America? I have addressed this in previous articles such as “[The Decline of a Nation](#)” and “[When Nations Die.](#)”[{7}](#) Let’s focus on the area of sexuality, marriage, and family.

In his 1934 book, *Sex and Culture*, British anthropologist Joseph Daniel Unwin chronicled the historical decline of numerous cultures, including the Roman Empire. He found that cultures that held to a strong sexual ethic thrived and were more productive than cultures that were “sexually free.”[{8}](#)

In his book *Our Dance Has Turned to Death*, Carl Wilson identifies the common pattern of family decline in civilizations like the Roman Empire.[{9}](#) It is significant how these seven stages parallel what is happening in America.

In the first stage, men ceased to lead their families in worship. Spiritual and moral development became secondary. Their view of God became naturalistic, mathematical, and mechanical.

In the second stage, men selfishly neglected care of their wives and children to pursue material wealth, political and military power, and cultural development. Material values began to dominate thought.

The third stage involved a change in men's sexual values. Men who were preoccupied with business or war either neglected their wives sexually or became involved with lower-class women or with homosexuality. Ultimately, a double standard of morality developed.

The fourth stage affected women. The role of women at home and with children lost value and status. Women were neglected and their roles devalued. Soon they revolted to gain access to material wealth and also freedom for sex outside marriage. Women also began to minimize having sex relations to conceive children, and the emphasis became sex for pleasure.

In the fifth stage, husbands and wives competed against each other for money, home leadership, and the affection of their children. This resulted in hostility and frustration and possible homosexuality in the children. Many marriages ended in separation and divorce.

In the sixth stage, selfish individualism grew and carried over into society, fragmenting it into smaller and smaller group loyalties. The nation was thus weakened by internal conflict. The decrease in the birthrate produced an older population that had less ability to defend itself and less will to do so, making the nation more vulnerable to its enemies.

Finally, unbelief in God became more complete, parental authority diminished, and ethical and moral principles

disappeared, affecting the economy and government. Because of internal weakness and fragmentation, the society came apart.

We can see these stages play out in the decline of the Roman Empire. But we can also see them happening before our eyes in America.

## **Spiritual Decline**

What about the spiritual decline in Rome and America? We can actually read about the spiritual decline in Rome in Paul's letter to the church in Rome. In the opening chapter he traces a progression of spiritual decline that was evident in the Hellenistic world of his time.

The first stage is when people turn from God to idolatry. Although God has revealed Himself in nature to all men so that they are without excuse, they nevertheless worship the creation instead of the Creator. This is idolatry. In the past, this took the form of actual idol worship. In our day, it takes the form of the worship of money or the worship of self. In either case, it is idolatry. A further example of this is a general lack of thankfulness. Although they were prospered by God, they were ungrateful. And when they are no longer looking to God for wisdom and guidance, they become vain and futile and empty in their imaginations. They no longer honor God, so their foolish hearts become darkened. In professing to be wise, they have become fools.

The second stage is when men and women exchange their natural use of sex for unnatural uses. Here Paul says those four sobering words, "God gave them over." In a society where lust-driven sensuality and sexual perversion dominate, God gives them over to their degrading passions and unnatural desires.

The third stage is anarchy. Once a society has rejected God's revelation, it is on its own. Moral and social anarchy is the natural result. At this point God has given the sinners over

to a depraved mind and so they do things which are not proper. This results in a society which is without understanding, untrustworthy, unloving, and unmerciful.

The final stage is judgment. God's judgment rightly falls upon those who practice idolatry and immorality. Certainly an eternal judgment awaits those who are guilty, but a social judgment occurs when God gives a nation over to its sinful practices.

Notice that this progression is not unique to the Hellenistic world the apostle Paul was living in. The progression from idolatry to sexual perversion to anarchy to judgment is found throughout history.

In the times of Noah and Lot, there was the idolatry of greed, there was sexual perversion and promiscuity, there was anarchy and violence, and finally there was judgment. Throughout the history of the nation of Israel there was idolatry, sexual perversion, anarchy (in which each person did what was right in his own eyes), and finally judgment.

Are there parallels between Rome and America? I have quoted from secular authors, Christian authors, and a writer of much of the New Testament. All seem to point to parallels between Rome and America.

# Charity and Compassion: Christianity Is Good for Culture

*Byron Barlowe looks at the impact of Christianity on the world. He concludes that applying a Christian, biblical worldview to the issues that we face in our world has resulted in a great amount of good. Apart from the eternal aspect of Christianity, people applying Christian principles to worldly issues have benefited all mankind.*

## Christian Religion: Good or Bad for Mankind?

Standing on the jetway boarding a flight out of Cuzco, Peru, I overheard an American college student say to his companion, "See that older guy up there? He's a professor. Came here to give lectures on Christianity. Can you believe that?" In an apparent reference to abuses perpetrated on local Indians by the *conquistadors* centuries earlier, he added, "Haven't Christians done enough to these people?"

He didn't know that I was the professor's companion. Turning around, I said, "Excuse me, I couldn't help but overhear. I'm with the professor and, yes, we were giving lectures at the

university from a Christian worldview. But did you know that all these people in between us were helping with humanitarian aid in the poorest villages around here all week?"

He sheepishly mumbled something about every story having two sides. But his meaning was clear: what good could possibly come from Christians imposing their beliefs on these indigenous people? Their culture was ruined by their kind and should be left alone. Popular sentiments, but are they fair and accurate?

The church—and those acting in its name—has had its moments of injustice, intrigue, even murder. Unbiblical excesses during the Inquisitions, the Crusades, and other episodes are undeniable. Yet these deviations from the teachings of Christ and the Bible are overwhelmingly countered by the church's good works and novel institutions of care, compassion, and justice.

Carlton Hayes wrote, "From the wellspring of Christian compassion, our Western civilization has drawn its inspiration, and its sense of duty, for feeding the hungry, giving drink to the thirsty, looking after the homeless, clothing the naked, tending the sick and visiting the prisoner." As one writer put it, missionaries and other Christians lived as if people mattered.[\[1\]](#) Revolutionary!

Christianity exploded onto a brutal, heartless Greco-Roman culture. Believers in this radical new religion set a new standard for caring for the ill, downtrodden, and abused, even at risk of death. Through their transformed Christlike outlooks, they established countercultural ways that lead to later innovations: orphanages, hospitals, transcendent art and architecture, and systems of law and order based on fairness, to name a few. In the early church, every congregation had a list of needy recipients called a *matriculum*. Enormous amounts of charity were given.[\[2\]](#) "Pagan society, through its excesses, teetered on the brink of extinction. Christianity,

however, represented . . . a new way.”{3}

Compassion and charity are biblical ideals. “Early Christians set a model for their descendents to follow, a model that today’s modern secular societies try to imitate, but without Christian motivation.”{4} We take for granted the notion that it’s good to help the needy and oppressed, but wherever it’s found, whether in religious or secular circles, it can be traced right back to Jesus Christ and His followers.

## **Answering Atheists: Is Religion Evil?**

“Religion poisons everything,” carps militant atheist Christopher Hitchens. Fellow atheist Richard Dawkins claims that “there’s not the slightest evidence that religious people . . . are any more moral than non-religious people.” True? Not according to social scientists from Princeton and other top universities.

As citizens, religious people generally shine. According to Logan Paul Gage, “for every 100 altruistic acts—like giving blood—performed by non-religious people, the religious perform 144.” Also, those active in religion in the U.S. volunteer in their communities more.{5} A Barna study reports that “more than four out of five (83%) gave at least \$1000 to churches and non-profit entities during 2007, far surpassing . . . any other population segment studied...”{6} This echoes studies from the past few decades.

Furthermore, studies show that religious youth have more self-control against cigarettes, alcohol and marijuana. “Religion also correlates with fewer violent crimes, school suspensions and a host of other negative behaviors.”{7}

It appears that Dawkins is very wrong. He lamented that “faith is . . . comparable to the smallpox virus but harder to eradicate.” People who care about our culture will hope he’s right about how hard religion is to eliminate, especially

Christianity.[{8}](#)

So, what about the evil perpetrated by the church? Early Christians were admirable in their display of compassion and charity. But haven't the centuries since witnessed a parade of continual religious wars (including "Christian wars"), persecutions, and mayhem? Among Christianity's sins: forced conversions, expansion by so-called "Christian states" mingled with genocide, execution of accused heretics and witches, and the ever infamous Crusades. Regrettable, inexcusable, but largely overblown.

Dinesh D'Souza writes that this popular refrain also "greatly exaggerates [crimes of] religious fanatics while neglecting or rationalizing the vastly greater crimes committed by secular and atheist fanatics."[{9}](#) Historian Jonathan Riley-Smith disputes that the Crusaders were rapists and murderers. He and other historians document that they were pilgrims using their own funds to liberate long-held Christian lands and defend Europe against Muslim invaders.[{10}](#)

What about heretics who were burned at the stake? Author Henry Kamen claims that "much of the modern stereotype of the Inquisition is essentially made up. . . . Inquisition trials . . . were fairer and more lenient than their secular counterparts."[{11}](#)

Atheism is associated with far more death and destruction than religion is, particularly Christianity. In *Death by Government*, R.J. Rummel writes "Almost 170 million men, women and children have been shot, beaten, tortured, knifed, burned, starved, frozen, crushed or worked to death; buried alive, drowned, hung, bombed or killed in any other of a myriad of ways governments have inflicted death on unarmed, helpless citizens and foreigners."[{12}](#) Rummel directly attributes eighty-four percent of these to atheistic "megamurderers" like Stalin, Hitler, and Mao.

For perspective, consider that “the Crusades, Inquisition and the witch burnings killed approximately 200,000 people” over five hundred years. These deaths, tragic and unjust as many were, only comprise one percent of the deaths caused by atheist regimes during a few decades. That’s a ninety-nine to one ratio of death tied directly to the atheist worldview.[{13}](#)

History shows that atheism, not Christianity, is the view that is bad—even murderous—for society.

## **Compassion: Christian Innovation in a Cruel World**

Christianity is unique. No other religion or philosophy values *and practices wholesale* taking care of the young, sick, orphaned, oppressed, and widowed, hands-on and sacrificially.

To ancient Greeks and Romans, life was cheap. Infanticide—baby killing— was “condoned and practiced for centuries without guilt or remorse [and] extolled by Greco-Roman mythologies.” This ungodly practice was opposed by Christians, whose compassionate example eventually caused Roman emperors to outlaw it.[{14}](#) First-century art shows believers rescuing unwanted Roman babies from the Tiber River. They raised them as their own.

Emperors pronounced death sentences on a whim, even beyond gladiatorial games. This was the ultimate extension of *paterfamilias*: a father had the right to kill his own child if she displeased him. Life was expendable, even among families![{15}](#)

Abortion, human sacrifice, and suicide were also part of societies unaffected by God’s love. How different from the scriptural doctrine that all are made in God’s image and deserve life and dignity.

Slaves and the poor were on their own. One exhaustive survey

of historical documents “found that antiquity has left no trace of organized charitable effort.”[{16}](#)

The ancient code was: “leave the ill to die.” Roman colonists in Alexandria even left their friends and next of kin behind during a plague.[{17}](#) Japanese holy men kept the wealthy from relieving the poor because they believed them to be “odious to the gods.”[{18}](#)

By contrast, Jesus expanded the Jewish obligation of compassion well beyond family and tribe even to enemies. His parable of the Good Samaritan exploded racial and social boundaries.[{19}](#) Scripture says that Jesus “had compassion on them and healed their sick.” Christ’s disciples went around healing and teaching as their master had. Believers were instructed to care for widows, the sick, the disabled and the poor, and also for orphans. “Justin Martyr, an early defender of Christianity, reveals that collections were taken during church services to help the orphans,” writes Alvin Schmidt. By the time of Justinian, churches were operating old folks’ homes called *gerontocomia*. Before Christianity, homes for the aged didn’t exist. Now, such nursing homes are taken for granted.[{20}](#)

Schmidt notes that “Christianity filled the pagan void that largely ignored the sick and dying, especially during pestilences.” Greeks had diagnostic centers, but no nursing care. Roman hospitals were only for slaves, gladiators, and occasionally for soldiers. Christians provided shelters for the poor and pilgrims, along with medical care. Christian hospitals were the first voluntary charitable institutions.[{21}](#)

A pagan Roman soldier in Constantine’s army was intrigued by Christians who “brought food to his fellow soldiers who were afflicted with famine and disease.” He studied this inspiring group who displayed such humanity and was converted to the faith. He represents much of why the early church grew despite

bouts of severe persecution.[{22}](#)

Basic beliefs—or worldviews—lead to basic responses. The Christian response to life and suffering changed the world for good.

## **Early Church Charity vs. Self-Serving Greco-Roman Giving**

In ancient Greece and Rome, charity was unknown, except for gaining favors and fame. This stood in stark contrast to Jesus' thinking. He rebuked the Pharisees, whose good deeds were done for public acclaim. Christ's ethic of sharing with any and all and helping the underprivileged brought a revolution that eventually converted the entire Roman Empire.

*Caritas*, root word of *charity*, “meant giving to relieve economic or physical distress without expecting anything in return,” writes Schmidt, “whereas *liberalitas* meant giving to please the recipient, who later would bestow a favor on the giver.”[{23}](#) Pagans almost never gave out of what we today would ironically call true *liberality*.

In contrast, for Christ-followers part of worship was hands-on charity. They celebrated God's redemption this way, giving and serving both individually and corporately. Cyril, bishop of Jerusalem in the fifth century, sold church ornaments to feed the poor. (Another contrast: the Hindu worldview assumes that neediness results from bad deeds in a past life.)

Ancient culture was centered on elitism. The well-off and privileged gave not out of any sense of caring, but out of what Aristotle termed “liberality, in order to demonstrate [their] magnanimity and even superiority.” They funded parks, statues, and public baths with their names emblazoned on them. Even the little philanthropy the ancients did was seldom received by the needy. Those who could pay back in some way

received it.{24}

Historian Kenneth Scott Latourette noted that early Christians *innovated* five ways in their use of their own funds for the general welfare:

First, those who joined were *expected to give* to their ability level, both rich and poor. Christ even called some to give all they had to the poor. St. Francis of Assisi, Pope Gregory the Great, and missionary C.T. Studd all did as well.

Second, they had a *new motivation*: the love for and example of Christ, who being rich became poor for others' sakes (2 Corinthians 8:9).{25}

Third, Christianity like Judaism, created *new objects of giving*: widows, orphans, slaves, the persecuted.

The fourth Christian innovation was *personalized giving*, although large groups were served. Also, *individuals* did the giving, not the government. "For the most part, the few Roman acts of relief and assistance were isolated state activities, 'dictated much more by policy than by benevolence'."{26}

Last, Christian generosity was not solely for insiders.{27} This was truly radical. The emperor known as Julian the Apostate complained that since Jews never had to beg and Christians supported both their own poor and those outside the church, "those who belong to us look in vain for the help we should render to them."{28}

Believers sometimes fasted for charity. The vision was big: ten thousand Christians skipping one hundred days' meals could provide a million meals, it was figured. Transformed hearts and minds imitated the God who left the throne of heaven to serve and die for others.{29}

Even W.E. Lecky, no friend to Christianity, wrote, "The active, habitual, and detailed charity of private persons,

which is such a conspicuous feature in all Christian societies, was scarcely known in antiquity.”[{30}](#) That is, until Christians showed up.

## Medieval and Modern Manifestations

This way of thinking and living continued in Medieval times. Third century deacon St. Laurence was ordered by a Roman official to bring some of the treasures of the church. He showed up with poor and lame church members. For this affront to Roman sensibilities, he was roasted to death on a gridiron. Today, a Florida homeless shelter named after St. Laurence provides job help and basic assistance to the downtrodden.

### The Generous Middle Ages

The Middle Ages saw Christian compassion grow. In the sixth, seventh and eighth centuries, Italian clergy “zealously defended widows and orphans.”[{31}](#) Ethelwold, bishop of Winchester in the tenth century “sold all of the gold and silver vessels of his cathedral to relieve the poor who were starving during a famine.”[{32}](#)

Furthermore, according to Will Durant,

*The administration of charity reached new heights in the twelfth and thirteenth centuries. . . . The Church shared in relieving the unfortunate. Almsgiving was universal. Men hopeful of paradise left charitable bequests. . . . Doles of food were distributed [three times a week] to all who asked. . . . In one aspect the Church was a continent-wide organization for charitable aid.*[{33}](#)

### From Hospitals to the Red Cross

Christian hospitals spread to Europe by the eighth century. By the mid-1500s, thirty-seven thousand Benedictine monasteries cared for the ill. Arab Muslims even followed suit.

Christianity was changing the world, even beyond the West.

The much-maligned Crusaders founded healthcare orders, helping Muslims *and* Christians. This led to the establishment of insane asylums. By the 1400s, hospitals across Europe were under the direction of Christian bishops who often gave their own money. They cared for the poor and orphans and occasionally fed prisoners—an all-purpose institution of care.

“Christian aid to the poor did not end with the early church or the Middle Ages,” says Schmidt.<sup>{34}</sup> By the latter years of the nineteenth century, local Christian churches and denominations built many hospitals.

Medical nursing, a Christian innovation in ancient times, took leaps forward through the influence of Christ-follower Florence Nightingale. In 1864, Red Cross founder Jean Henri Dunant confessed on his deathbed, “I am a disciple of Christ as in the first century, and nothing more.”<sup>{35}</sup>

### **Child Labor Laws**

The Industrial Revolution in England ushered in a shameful exploitation of children, even among those naming the Christian faith. Kids as young as seven worked in horrible conditions in coal mines and chimneys.

Compassionate believers like William Wilberforce and Charles Dickens rallied their callous countrymen to pass Parliamentary laws against the worst child labor. The real superman of this cause was Lord Shaftesbury, whose years of tireless “pleadings, countless speeches, personal sacrifices and dogged persistence” resulted in “a number of bills that vastly improved child labor conditions.” His firm faith in Christ spurred him and a nation on to true compassion.<sup>{36}</sup> This had a ripple effect across Western nations. Child labor has been outlawed in the West but continues strongly in nations less affected by Christian culture.

## And Still Today . . .

This attitude of charity and compassion continues today in Christian societies like the Salvation Army and Christian groups who aided Hurricane Katrina victims so much better than the government.<sup>{37}</sup> Many more can be named. As someone said, “Christian ideals have permeated society until non-Christians, who claim to live a “decent life” without religion, have forgotten the origin of the very content and context of their “decency”.<sup>{38}</sup>

# Answering Arguments for Same-Sex Marriage – A Christian Worldview Perspective

*Kerby Anderson considers the arguments in favor of same-sex marriage from a biblical worldview perspective. He shows that arguments such as tolerance, equal rights, and no impact on others do not hold up under critical examination. As Christians, we can love those who live a different lifestyle without allowing them to claim their lifestyle is identical and harmless to society.*

## Shouldn't We Be Tolerant?

As more and more states are either legalizing same-sex marriage or willing to recognize same-sex marriages from other states, it is crucial that Christians know how to answer arguments for same-sex marriage. We will look at some of these arguments and provide answers from my book, *A Biblical Point of View on Homosexuality*.[\[1\]](#)

One of the first arguments for same-sex marriage is that we should be tolerant. We used to live in a society where the highest value was a word with a capital T. It was the word Truth. Today, we live in a society that has switched that word for another word with a capital T: [Tolerance](#).

Should we be tolerant of other people and their lifestyles?

The answer to that depends upon the definition of "tolerance." If by tolerance someone means we should be civil to other people, then the answer is a resounding "yes." In fact, civility should be the hallmark of Christians. Jesus expressed the goal of civility when he taught that "You shall love your neighbor as yourself" (Matthew 22:39).

Civility also includes being gracious even in the midst of disagreement or hostility. Other people may be disagreeable, and we are free to disagree with them. But we should disagree in a way that gives grace. Often such a gentle response can change a discussion or dialogue. Proverbs 15:1 reminds us that "a gentle answer turns away wrath."

Civility also requires humility. A civil person acknowledges that he or she does not possess all wisdom and knowledge. Therefore, one should listen to others and consider the possibility that they might be right and that he is wrong. Philippians 2:3 says, "Do nothing from selfishness or empty conceit, but with humility of mind let each of you regard one another as more important than himself."

There is also an important distinction we should make between judging a person and judging their sinful behavior. Some have said that the most frequently quoted Bible verse is no longer John 3:16 but Matthew 7:1. It is where Jesus says, "Do not judge, or you too will be judged." People misuse this verse all the time to say you should not judge anything another person does.

The context of this verse is important. It seems that what Jesus was condemning was a critical or judgmental spirit. It is a judging spirit when someone believes they are superior to you. Jesus was obviously not saying that people should not make judgments. A few verses later Jesus calls certain people "pigs" and "dogs" (Matthew 7:6). He even calls some "wolves in sheep's clothing" (Matthew 7:15). There are many passages in the Bible that admonish us to use sound judgment and

discernment (1 Kings 3:9; Proverbs 15:14; 1 Corinthians 12:10; Philippians 1:9-10).

The Bible says that Jesus was “full of grace and truth” (John 1:14) and provides a model we should follow. We should model both biblical compassion and biblical convictions when considering the issue of homosexuality and same-sex marriage.

## **Don't Homosexuals Deserve Equal Rights?**

Each person in our society deserves equal rights. But redefining marriage is not about equal rights but about adding special rights to our laws and Constitution. Currently we all have the same right to marry a person of the opposite sex who is of a certain age and background. We don't give people the right to marry their siblings. We don't give people the right to marry a young child. As a society we have placed certain limits on marriage but give everyone the equal right to marry under those specified conditions.

When we redefine marriage, then all sorts of new relationships will also vie for social acceptance. Already the legalization of same-sex marriage in one state had resulted in the call for the legalization of polygamy. Some gay activists are calling for the legalization of polyamory (multiple sexual relationships with multiple partners).

We should also realize that the government is not prohibiting homosexuals from engaging in their behavior or even having a partner. All government is saying is that it is not going to redefine marriage to include same-sex relationships. And when citizens of this country have been given an opportunity to vote on a constitutional amendment in their state defining marriage, they have overwhelmingly approved of the traditional definition of marriage.

As we have already noted, the push for same-sex marriage has been more about respect and acceptance than it has been about

rights. If government recognizes the legal validity of gay marriage, then that places government's "seal of approval" on homosexuality.

Often when gay activists are calling for equal rights, they are really asking for special benefits. Homosexuals have the same right to marry as heterosexuals. They have the right to marry a qualified person (age, marital status) of the opposite sex. Homosexuals and heterosexuals cannot marry someone of the same sex, someone who is too young, someone who is already married, etc.

But the activists argue that because they cannot marry someone of the same sex, they lose out on certain benefits. But that is not a justification for redefining marriage. It may be a justification for reconsidering the benefits we provide as a society, but it isn't a justification for changing the definition of marriage.

Consider the issue of visitation rights. Gay activists argue that government needs to grant same-sex marriage rights to homosexuals so they will have visitation rights. But again, this may be an argument for changing the laws concerning visitation, but it isn't an argument for redefining marriage.

A bigger question is whether this is really a problem. In this day where major corporations and governmental entities are granting domestic partnership rights, it is difficult to see this as a problem. If such a case were brought to light people could use public pressure to force the hospital to change its policies.

## **Isn't Homosexual Marriage Like Interracial Marriage?**

When objections are raised about legalizing same-sex marriage, proponents argued that the same concerns were said about

interracial marriage. For years gay activists have tried to hitch their caboose to the civil rights train. While many in the African-American community have found this comparison offensive, the tactic is still used on a fairly regular basis.

There are significant differences between interracial marriage and same-sex marriage. First, removing certain state laws banning interracial marriage did not call for a *redefinition* of marriage but merely an *affirmation* of marriage. Traditional marriage is not about equal rights but about establishing norms for sexual relationships within society. We ban discrimination based on race because it is an immutable characteristic that each person has from the moment of conception. And the word "race" appears in the Constitution.

A person who participates in homosexual *behavior* is different from someone who is born with an immutable *characteristic*. As many people have pointed out, there are no former African-Americans or former Asian-Americans. But there are hundreds of people who have left homosexuality.

Actually, interracial marriage and same-sex marriage differ from one another at the most fundamental level. The genetic difference between various races is insignificant biologically. A recent study of human genetic material of different races concluded that the DNA of any two people in the world would differ by just 2/10ths of one percent.[\[2\]](#) And of this variation, only six percent can be linked to racial categories. The remaining ninety-four percent is "within race" variation. And the moral difference between the races is also insignificant since the Bible teaches that God has made all of us "from one blood" (Acts 17:26, KJV).

But even though race and ethnicity are insignificant to marriage, gender is fundamental to marriage. There is a profound biological difference between a man and a woman. Marriage is defined as a bond between a man and a woman.

The Supreme Court case of *Loving v. Virginia* struck down state laws prohibiting interracial marriage, arguing that marriage is one of the “basic civil rights of man.”[\[3\]](#) The Supreme Court of Minnesota later ruled in *Baker v. Nelson* that race and homosexual behavior are not the same.

To legalize same-sex marriage is to change the very nature and definition of marriage. And there is good reason to believe that is exactly what gay activists want. Michelangelo Signorile is a leading voice in the homosexual community. He explained in *OUT* magazine that the real goal in legalizing same-sex marriage was to radically transform marriage.[\[4\]](#)

He later goes on in the article to admit that the idea of the “freedom to marry” was actually a suggestion from the Los Angeles PR firm which they thought would be successful because it would play well in the heterosexual world.

## **Does Same-Sex Marriage Hurt Traditional Marriage?**

One of the arguments against legalization of same-sex marriage is that it will have an adverse effect on traditional marriage. Proponents of same-sex marriage argue that it will not have any impact. They ask, “How can my marriage to someone of the same sex have any impact at all on your marriage?” So what would be the consequences of same-sex marriage?

First, when the state sanctions gay marriage, it sends a signal of legitimacy throughout the culture. Eventually marriage becomes nothing more than sexual partnership and the sanctity of marriage and all that goes with it is lost.

When same-sex marriage is legalized, the incidences of cohabitation increases. This is not theory but sociological fact. Essentially, Europe has been engaged in a social experiment with same-sex marriage for decades.

Stanley Kurtz has written numerous articles documenting the impact of same-sex marriage on traditional marriage in the Scandinavian countries. When the governments of Sweden and Norway permitted same-sex marriage, he noted a trend away from marriage. According to Kurtz: "Marriage is slowly dying in Scandinavia." A majority of children in Sweden and Norway are born out of wedlock, and sixty percent of first-born children in Denmark have unmarried parents.[{5}](#)

A second consequence of same-sex marriage legalization would be the complete redefinition of marriage and the introduction of a variety of marital relationships. Already we are seeing court cases attempting to legalize polygamy. The most prominent case involved Utah polygamist Tom Green. He and his lawyer used the Supreme Court case of *Lawrence v. Texas* as a legal foundation for his marriage to multiple wives.[{6}](#) It is interesting to note that when the Supreme Court rendered its decision in the *Lawrence* case, Justice Antonin Scalia warned that the decision could lead to the legalization of same-sex marriage and the redefinition of marriage.[{7}](#)

Traditional marriage rests on the foundation of biblical teaching as well as cultural tradition. Theology, legal precedent, and historical experience all support the traditional definition of marriage. Once you begin to redefine marriage, any sexual relationship can be called marriage.

Third, the redefinition of marriage will ultimately destroy marriage as we know it. For many gay activists, the goal is not to have lots of same-sex marriages. Their goal is to destroy the institution of marriage.

Stanley Kurtz believes that once same-sex marriage is legalized, "marriage will be transformed into a variety of relationship contracts, linking two, three or more individuals (however weakly or temporarily) in every conceivable combination of male and female."[{8}](#)

# Does Legalization of Same-Sex Marriage Really Affect Families?

Those who oppose same-sex marriage often point to the connection between marriage and family. Traditional marriage provides a moral and legal structure for children. Proponents of gay marriage point out that many marriages do not have children. Thus, the connection is irrelevant.

While it is true that some marriages do not result in children due to choice or infertility, that does not invalidate the public purpose of marriage. Marriage, after all, is a public institution that brings together a father and mother to bring children into the world. Individuals may have all sorts of private reasons for marrying, but there is an established public purpose for marriage.

If couples choose not to have children or are not able to have children, it does not invalidate this public purpose. There is a distinction between purpose and use. Over the years I have written a number of books. I would like to believe that every person who has a copy of one of my books has read it. I know that is not true. Some sit on shelves and some sit in boxes. Others sit in used bookstores. The fact that some people don't read my books doesn't mean they were not intended to be read.

Likewise, we shouldn't assume that the connection between marriage and family is insignificant simply because some couples do not or cannot have children. One of the public purposes of traditional marriage is procreation.

At the center of every civilization is the family. There may be other social and political structures, but civilizations survive when the family survives. And they fall apart when the family falls apart. Michael Novak, former professor and winner of the Templeton Prize for Progress in Religion, put it this way: "One unforgettable law has been learned through all the oppressions, disasters, and injustices of the last thousand

years: if things go well with the family, life is worth living; when the family falters, life falls apart.”{9}

Marriage between a man and a woman produce children that allow a civilization to exist and persist. Marriage begins the foundation of a family. Families are the foundation of a civilization.

## Notes

# The Mitchell Report: Christian Response to Steroids in Sports

*Heather Zeiger considers the question of how Christians should respond to the revelations regarding steroid use in sports. The Mitchell report is one example accompanied by many others such as the U.S. Anti-Doping Agency report on cyclist, Lance Armstrong. Heather takes a biblical worldview perspective on this issue taking into consideration their impact on our bodies, our perception of the world, and the perception of young people on what is acceptable in our society. As a Christian, there are numerous reasons not to take steroids and not to glorify the accomplishments of those who do.*

Former Senator George Mitchell was charged to investigate and document the prevalence of steroid and human growth hormone use in Major League Baseball. The objective of the report was not only to bring to light the steroid problem, but to offer solutions to help eradicate its use and abuse. Senator Mitchell specifically wanted “the media to focus less on names and more on central conclusions and recommendations of the report.”[\[1\]](#)

Later this month and in February, hearings before the House Committee on Oversight and Reform will be held to determine if stronger penalties for steroid use and more rigorous testing are appropriate. The committee will also investigate whether certain athletes are guilty of using performance enhancing drugs. This has brought the topic of steroid abuse in sports to the forefront of the media, providing an excellent opportunity for discussion.

Sport is an important part of life. The Apostle Paul wrote about running and boxing, and used it as an analogy for the

Christian walk.<sup>{2}</sup> And unlike the Gnostics who despise the body, we honor it as part of our *imago dei* or being created in God's image (for more information see [Bodybuilding: Edifying Thoughts About Our Bodies](#) by Michael Gleghorn). So as Christians, we embrace playing sports and exercise. But like so many things, there is a way to play sports that is consistent with a Christian worldview and a way that is not. There are both physical and biblical reasons why steroid use is dangerous and unethical.

## What are Steroids?

The first reported use of performance enhancers was in 776 B.C.<sup>{3}</sup> when athletes would eat sheep testicles to increase their testosterone levels. Today athletes don't use sheep, but the intention is still to increase their testosterone beyond natural levels. Steroids are chemicals that are either a form of testosterone or a testosterone precursor. *Anabolic androgenic steroids* (AAS)<sup>{4}</sup> increase muscle mass and muscle recovery by producing five to thirty times the testosterone that the typical male body produces.<sup>{5}</sup> Athletes who abuse steroids do see an increase in muscle mass and/or speed, and at first, will see improvements in their performance. ESPN's *The Dope on Steroids* reports that steroids can make the body as much as 50 percent more muscular than is possible without them.<sup>{6}</sup>

Using steroids to increase muscle strength is illegal, but there are many forms of steroids that remain undetectable in drug tests making it difficult to regulate their use. Furthermore, players have also abused another illegal, undetectable drug called *human growth hormone*, which is not a steroid, but is often used in conjunction with steroids to make a player bigger and to speed injury recovery.<sup>{7}</sup> Random drug testing creates controversy over privacy violations, and announced tests are easy to beat. By using water-based steroids, it only takes a couple of weeks for players' bodies

to dilute the chemicals to undetectable levels.

While steroids do produce short-term results, the side effects and long-term effects can be devastating.

## **The Problem**

### **Side-Effects**

Physical side-effects from steroid use include increases in cholesterol, acne on arms and back, increase in blood pressure, stiffening of heart tissue, increased production of body hair yet decreased production of scalp hair, stunted growth, hypogonadism (diminished hormonal or reproductive functioning in the testes or the ovaries), sexual dysfunction, and increased risks for both strokes and heart attacks. Psychological side effects include aggressiveness, depression, and addiction/dependence. See [Dangers of Steroid Abuse](#) for a more detailed look at these and other possible side-effects to steroid abuse.

### **Influence on Teens**

Athletes are role models for kids, and some studies indicate that athletes are second only to parents in their influence on teen choices. I remember watching track and field as a child and later as a teenager and being captivated by the runners. They had this combination of grace and strength that I admired, so I eventually took up running.

Kids turn to athletes for inspiration all the time, but the problem is they also believe that the athletes are successful because they use steroids. Take this testimonial from [www.steroidabuse.com](http://www.steroidabuse.com) as an example:

*For me, taking steroids was a natural move. I was an athlete in high school and got a college scholarship to play football at a major university. Between my senior year of high school and my freshman year of college I started my first cycle*

*because I thought I needed to be faster. I took injectable testosterone and winstrol. I figured that winstrol must be good because it's what Ben Johnson got busted using. I wanted to be fast like him.*

*I was getting stronger at every workout and feeling great. I had heard that steroids can make your joints weaker but I figured Ben Johnson didn't have that problem, so it was probably just a rumor.*[{8}](#)

Another testimonial discusses how a parent's obsession with his son, Corey, and his athletic success eventually lead him to administering steroids to Corey when he was only 13. He thought this was how the pros compete. In the end, Corey, now 18, comments about his steroid experience:

*As Corey tries to scrounge together enough money to get his own place, one point still gnaws at him: He firmly believes he could have been a champion without pharmacological enhancement.*

*Soft-spoken and reserved, Corey wavers among embarrassment, regret and awe when he reflects on his fractured teenage years and his experiment with steroids. "People make it sound like these medications are only performance-enhancing, but they have a huge mental impact as well," he says. "By the time I was done, I was a wreck..."*[{9}](#)

And as the Mitchell Report stated, "After the Associated Press reported Mark McGwire was using androstenedione (a testosterone precursor)...sales of that substance increased by over 1000%."[{10}](#) Athletes have a strong influence on people, especially teens.

# The Christian Worldview

When the news of Barry Bonds' alleged steroid use broke last summer, *Newsweek* commentator George Will observed that "Athletes who are chemically propelled to victory do not merely overvalue winning, they misunderstand why winning is properly valued... In fact, it becomes a display of some chemists' virtuosity and some athlete's bad character." He later adds that "the athlete's proper goal is to perform unusually well, not unnaturally well."[{11}](#) We have a moral foundation for these points in God's word.

First of all, steroids cause the body to be enhanced beyond what it was designed to do. We believe that God has designed us with his purposes in mind, and he has gifted people with different talents and abilities. From an engineering perspective, he put the parts together with a particular design in mind, so when a steroid user becomes stronger than that for which he was designed, the rest of the parts, his joints, tendons, and ligaments, become damaged.[{12}](#)

Secondly, steroids are often taken for cosmetic reasons—usually by men obsessed with acquiring a certain physique. As we see from Scripture, this is a disproportionate view of the human body. The Bible tells us to offer our bodies as living sacrifices.[{13}](#) And as we see in Luke 12:22-34, Jesus tells us not to worry over what we will eat or drink and what to wear, that He will provide what is necessary. This puts the body in its proper perspective as something to care for, but not something to obsess over.

Lastly, there is a character issue here. Consider the Apostle Paul's view of weakness, which we could apply to physical weakness as well:

*So to keep me from being too elated by the surpassing greatness of the revelations, a thorn was given me in the flesh, a messenger of Satan to harass me, to keep me from*

*being too elated. Three times I pleaded with the Lord about this, and that it should leave me. But he said to me, "My grace is sufficient for you, for my power is made perfect in weakness." Therefore I will boast all the more gladly of my weaknesses, so that the power of Christ may rest upon me. For the sake of Christ, then, I am content with weakness, insults, hardships, persecutions, and calamities. For when I am weak, then I am strong. (2 Corinthians 12:7-10, ESV).*

As Christians, we believe in being good stewards of our health, but there is a difference between "therapeutic" and "enhancement." Therapeutic medical advancements alleviate the effects of the fall of man, such as death and suffering. Enhancements involve man trying to become what he deems as "better" than how God made him, which essentially was the very cause of the fall. Obviously, there is gray area here, but this helps us make some distinctions. As we see from Paul's statements, the human idea of weakness is not necessarily God's idea of weakness. God's view is that in our weakness Christ is glorified.

# The Changing American Family

*Kerby Anderson looks at the latest data on the American family and highlights trends that are changing the nature of family in America as well as debunking some sensationalist headlines. From a biblical worldview perspective, Christians should be concerned about these trends which reflect an ongoing breakdown of family in America.*

## Introduction

Are we headed toward a post-marital society where marriage is rare and the traditional family is all but extinct? One would certainly think so by reading some of the stories that have appeared lately. A *New York Times* headline in 2003 warned of

“marriage’s stormy future” and documented the rise in the number of nontraditional unions as well as the rising percentage of people living alone.[{1}](#) A 2006 *New York Times* article documented the declining percentage of married couples as a proportion of American households and thus declared that married households are now a minority.[{2}](#) And a 2007 headline proclaimed that “51% of women are now living without a spouse.”[{3}](#)

Well, let’s take a deep breath for a moment. To borrow a phrase from Mark Twain, rumors about the death of marriage and family are greatly exaggerated. But that doesn’t mean that marriage as an institution is doing well and will continue to do well in the twenty-first century.

Let’s first take on a few of these headlines pronouncing the end of marriage. The October 2006 *New York Times* headline proclaimed that “To Be Married Means to Be Outnumbered.” In other words, married households are now a minority in America and unmarried households are the majority. But the author had to manipulate the numbers in order to come to that conclusion. This so-called “new majority” of unmarried households includes lots of widows who were married. And this claim only works if you count households and not individuals. For example, if you have two households—one with two married people and three children and another with a single widow living alone—they would be split between one married household and one unmarried household. But one household has five people, and the other household has one person.

What about the January 2007 *New York Times* headline proclaiming that “51% of Women Are Now Living Without a Spouse”? Columnist and radio talk show host Michael Medved called this journalistic malpractice([{4}](#)) and the ombudsman for the *New York Times* took his own paper to task for the article.[{5}](#) The most recent available figures showed that a clear majority (56%) of all women over the age of twenty are currently married.

So how did the author come to the opposite conclusion? It turns out that the author chose to count more than ten million girls between the ages of fifteen and nineteen as “women.” So these so-called “women” are counted as women living without a spouse (never mind that they are really teenage girls living at home with their parents). This caused the ombudsman for the *New York Times* to ask this question in his op-ed: “Can a 15-year-old be a ‘Woman Without a Spouse’?”[{6}](#)

It is also worth mentioning, that even with this statistical sleight of hand, you still cannot get to the conclusion that a majority of women are living without a spouse. The article’s author had to find a way to shave off an additional 2% of the married majority. He did this by including those women whose “husbands are working out of town, are in the military, or are institutionalized.”[{7}](#)

## **Conflicting Attitudes about Marriage and Family**

It is certainly premature to say that married couples are a minority and women living without a husband are a majority. But there has been a definite trend that we should not miss and will now address. The definition of marriage and the structure of family in the twenty-first century is very different from what existed in the recent past.

A few decades ago, marriages were the foundation of what many commentators referred to as “the traditional family.” Now marriages and families are taking some very unfamiliar shapes and orientations due to different views of marriage and family.

Americans are not exactly sure what to think about these dramatic changes in marriage and family. On the one hand, they believe that marriage and family are very important. A *Better Homes and Garden* survey found that their readers rated their

relationship to their spouse as the single most important factor in their personal happiness.[{8}](#) And a MassMutual study on family values (taken many years ago) reported that eight out of ten Americans reported that their families were the greatest source of pleasure in their lives—more than friends, religion, recreation, or work.[{9}](#)

On the other hand, Americans are much less sanguine about other people's marriages and families. I call this the "Lake Wobegon effect" where "all the women are strong, all the men are good looking, and all the children are about average." In other words, *their* marriage and family are fine, but the rest of the marriages and families are *not*. While the MassMutual Family Values Study found that a majority (81%) pointed to their family as the greatest source of pleasure, it also found that a majority (56%) rated the family in the U.S. "only fair" or "poor." And almost six in ten expected it to get *worse* in the next ten years. The survey concluded that "Americans seem to see the family in decline everywhere but in their own home."[{10}](#)

Similar results can be found in many other nationwide polls. A Gallup poll found that Americans believe the family is worse off today than it was ten years ago. And they believed it would be worse off in the future as well.[{11}](#) Americans also demonstrated their ambivalence toward marriage and family not only in their attitudes but their actions. One trend watcher predicted more than a decade ago in an article in *American Demographics* that marriage would become in the 1990s and the twenty-first century "an optional lifestyle."[{12}](#)

## Changing Trends in Marriage

While it may be too early to put the institution of marriage on the endangered species list, there is good reason to believe that changing attitudes and actions have significantly transformed marriage in the twenty-first century. The current

generations are marrying later, marrying less, and divorcing more than previous generations.

A major transition in attitudes toward marriage began with the baby boom generation. From 1946 to 1964, over seventy-six million babies were born. By the 1960s the leading edge of the baby boom generation was coming of age and entering into the years when previous generations would begin to marry. But baby boomers (as well as later generations) did not marry as early as previous generations. Instead, they postponed marriage until they established their careers. From the 1960s to the end of the twenty-first century, the median age of first marriage increased by nearly four years for men and four years for women.

Some of those who postponed marriage ended up postponing marriage indefinitely. An increasing proportion of the population adopted this "marriage is optional" perspective and never married. They may have had a number of live-in relationships, but they never joined the ranks of those who married. For them, singleness was not a transition but a lifestyle.

Over the last few decades, the U.S. Census Bureau has documented the increasing percentage of people who fit into the category of "adults living alone." These are often lumped into a larger category of "non-family households." Within this larger category are singles that are living alone as well as a growing number of unmarried, cohabiting couples who are "living together." The U.S. Census Bureau estimated that in 2000 there were nearly ten million Americans living with an unmarried opposite-sex partner and another 1.2 million Americans living with a same-sex partner.

These numbers are unprecedented. It is estimated that during most of the 1960s and 1970s, only about a half a million Americans were living together. And by 1980, that number was just 1.5 million.[\[13\]](#) Now that number is more than twelve

million.

[Cohabiting](#) couples are also changing the nature of marriage. Researchers estimate that half of Americans will cohabit at one time or another prior to marriage.[{14}](#) And this arrangement often includes children. The traditional stereotype of two young, childless people living together is not completely accurate; currently, some 40% of cohabiting relationships involve children.[{15}](#)

Couples often use cohabitation to delay or forego marriage. But not only are they postponing future marriage, they are increasing their chance of marriage failure. Sociologists David Popenoe and Barbara Dafoe Whitehead, in their study for the National Marriage Project, wrote: "Cohabitation is replacing marriage as the first living together experience for young men and women." They conclude that those who live together before they get married are putting their future marriage in danger.[{16}](#)

Finally, we should note the impact of cohabitation on [divorce](#). When the divorce rate began to level off and even slightly decline in the 1980s, those concerned about the state of marriage in America began to cheer. But soon the cheers turned to groans when it became obvious that the leveling of the divorce rate was due primarily to an increase in cohabitation. Essentially the divorce rate was down because the marriage rate was down. Couples who break up before they marry don't show up as divorce statistics.

Many marriages today are less permanent than in previous decades. There have always been divorces in this country, but what used to be rare has now become routine. Changing attitudes toward marriage and divorce in this country are reflected in the changing divorce rate.

A graph of the divorce rate shows two significant trends. One is a sharp increase in divorces in the late 1960s that

continued through the 1970s. The second is a leveling and even a slight decline in the 1980s. Both are related to the attitudes of the baby boom generation toward marriage and divorce.

The increasing divorce rate in the 1970s was due to both attitude and opportunity. Baby boomers did not stay married as long as their parents due to their different attitudes towards marriage and especially their attitude toward commitment in marriage. It is clear from the social research that the increase in the divorce rate in the 1970s did not come from empty nesters (e.g., builders) finally filing for divorce after sending their children into the world. Instead it came from young couples (e.g., baby boomers) divorcing even before they had children. [{17}](#)

The opportunity for divorce was also significant. When increasing numbers of couples began seeking divorce, state legislatures responded by passing no-fault divorce laws. Essentially a married person could get a divorce for any reason or no reason at all.

Economic opportunity was also a significant factor in divorce. During this same period, women enjoyed greater economic opportunities in the job market. Women with paychecks are less likely to stay in a marriage that was not fulfilling to them and have less incentive to stay in a marriage. Sociologist David Popenoe surveying a number of studies on divorce concluded that “nearly all have reached the same general conclusion. It has typically been found that the probability of divorce goes up the higher the wife’s income and the closer that income is to her husband’s.” [{18}](#)

The second part of a graph on divorce shows a leveling and even a slight decline. The divorce rate peaked in 1981 and has been in decline ever since. The reasons are twofold. Initially, the decline had to do with the aging of the baby boom generation who were entering into those years that have

traditionally had lower rates of divorce. But long term the reason is due to what we have already discussed in terms of the impact of cohabitation on divorce. Fewer couples are untying the knot because *fewer couples are tying the knot*.

## Changing Trends in Family

We have already mentioned that starting with the baby boom generation and continuing on with subsequent generations, couples postponed marriage. But not only did these generations postpone marriage, they also postponed procreation. Unlike the generations that preceded them (e.g., the builder generation born before the end of World War II), these subsequent generations waited longer to have children and also had few children. Lifestyle choice was certainly one factor. Another important factor was cost. The estimated cost of raising a child during this period of time rose to over six figures. Parents of a baby born in 1979 could expect to pay \$66,000 to rear a child to eighteen. For a baby born in 1988, parents could expect to pay \$150,000, and that did not include additional costs of piano lessons, summer camp, or a college education.[{19}](#)

When these generations did have children, often the family structure was very different than in previous generations. Consider the impact of divorce. Children in homes where a divorce has occurred are cut off from one of the parents and they suffer emotionally, educationally, and economically.

Judith Wallerstein in her research discovered long-term psychological devastation to the children.[{20}](#) For example, three out of five children felt rejected by at least one parent. And five years after their parents' divorce, more than one-third of the children were doing markedly worse than they had been before the divorce. Essentially she found that these emotional tremors register on the psychological Richter scale many years after the divorce.

The middle class in this country has been rocked by the one-two punch of divorce and illegitimacy, creating what has been called the “feminization of poverty.” U.S. Census Bureau statistics show that single moms are five times more likely to be poor than are their married sisters.[{21}](#)

An increasing percentage of women give birth to children out of wedlock. This increase is due in large part to changing attitudes toward marriage and family. In a society that is already changing traditional patterns (by postponing marriage, divorcing more frequently, etc.), it is not surprising that many women are avoiding marriage altogether. Essentially, the current generation disconnects having children and getting married. In their minds, they separate parenthood from marriage, thus creating an enormous increase in the number of single parent homes.

Greater social acceptance of out-of-wedlock births, divorce, and single parenting tends to reinforce the trends and suggests that these percentages will increase in the future. Young adults who contemplate marriage may be less inclined to do so because they were raised in a home where divorce occurred. A young woman raised by a single mom may be less inclined to marry when they are older, convinced that they can raise a child without the help of a husband. Better employment options for young women even encourage them to “go it alone.”

These changes in attitudes and changes in the structure of marriage and family have created a very different family in the twenty-first century. One writer imagined the confusion that children would feel in this futuristic scenario:

*On a spring afternoon, half a century from today, the Joneses are gathered to sing “Happy Birthday” to Junior. There’s Dad and his third wife, Mom and her second husband, Junior’s two half brothers from his father’s first marriage, his six stepsisters from his mother’s spouse’s previous unions, 100-year-old Great Grandpa, all eight of Junior’s current*

*“grandparents,” assorted aunts, uncles-in-law and stepcousins. While one robot scoops up the gift wrappings and another blows out the candles, Junior makes a wish . . . that he didn’t have so many relatives.* [{22}](#)

# **Redeeming Darwin: The Intelligent Design Controversy**

*Dr. Bohlin, as a Christian scientist, looks at the unwarranted opposition to intelligent design and sees a group of neo-Darwinists struggling to maintain the orthodoxy of their position as the evidence stacks up against them. In this article, he summarizes what's happening in academia and the*

*lack of sound scientific basis for their attacks against intelligent design proponents.*

## **What's All the Fuss?**

There's a strange phenomenon popping up around the country. Scientists are stepping out of their laboratories and speaking to the media about something that has them quite concerned. It's not the threat of a new flu pandemic; it's not the threat of nuclear weapons proliferation, or even the possible threat of global warming. It's something called Intelligent Design.

In this article we will explore what has so many people upset about Intelligent Design. To do that we will need to establish just what ID is and what the major complaints are about evolution that may be answered by a theory like ID. We will take a closer look at some of the most common examples of ID from astronomy and biology. Then we will take a closer look at the cultural confusion and reaction to this rather simple hypothesis.

So what are scientists and journalists saying? A *Baltimore Sun* reporter put it this way: "In the border war between science and faith, the doctrine of 'intelligent design' is a sly subterfuge—a marzipan confection of an idea presented in the shape of something more substantial."[\[1\]](#)

In other words, Intelligent Design is little more than a sugar cookie promising more than it can deliver.

A science journal editorial said this: "The attack on Darwinism by supporters of Intelligent Design is a straightforward attack on science itself. Intelligent Design is not science because it proposes a supernatural designer as explanation for evolutionary change."[\[2\]](#)

Uh-oh! Science and the supernatural indeed rarely go well together, at least over the last 150 years. But is that what ID actually says? We'll explore that a little later but for

now let's find out what's really at stake in this debate over evolution and Intelligent Design.

One college textbook said this: "Evolution is a scientific fact. That is, the descent of all species, with modification, from common ancestors is a hypothesis that in the last 150 years or so has been supported by so much evidence, and has so successfully resisted all challenges, that it has become a fact."[\[3\]](#)

Let's look at a few reasons why some scientists are skeptical of the confidence shown by so many other scientists about Darwinian evolution.[\[4\]](#)

## **Is There Scientific Proof for Evolution?**

Evolution is always portrayed as a slow gradual process. Organisms are portrayed as so well adapted to their environment that they could only afford to change very slowly. But one of the most dramatic events in earth history is something called the Cambrian explosion. The Cambrian is a period of earth history that many earth scientists and paleontologists estimate to have begun over 540 million years ago.[\[5\]](#)

Instead of slow steady evolutionary change, we see a sudden burst of change. The subtitle to a *Time* magazine article put it this way: "New discoveries show that life as we know it began in an amazing biological frenzy that changed the planet almost overnight."[\[6\]](#)

For most of the previous 3 billion years of earth history only single-celled organisms were found. "For billions of years, simple creatures like plankton, bacteria and algae ruled the earth. Then, suddenly, life got very complicated."[\[7\]](#)

So the appearance of most of the major categories of animals happened in a very short period of time, some say less than five million years, when it should have taken tens and maybe

even hundreds of millions of years. One geologist who helped pinpoint the very short time frame of the Cambrian explosion expressed this challenge: “We now know how fast fast is. And what I like to ask my biologist friends is, how fast can evolution get before they start feeling uncomfortable?”[\[8\]](#)

The evolutionary process that biologists study in nature today is far slower than what is found in the Cambrian explosion. This is evidence that doesn't fit the theory. Yet the Cambrian explosion is left out of most textbooks.

Another problem for evolution is its dependence on mutations to bring about major changes in organisms. But for all our studies of mutations we haven't seen much change. The late French evolutionist, Pierre Paul Grasse, said, “What is the use of their unceasing mutations? . . . a swing to the right, a swing to the left, but no final evolutionary effect.”[\[9\]](#)

Mutations only produce alternate forms of what already exists. New functions don't suddenly arise by mutations.

## **Evidence for Intelligent Design, Part One**

Intelligent Design is an intellectual movement that challenges Darwinism and its dependence on random/chaotic processes coupled with selection. If people are not alerted to the fact that Darwinism is less than sufficient, then other theories are wasting their time. They will never get a fair hearing.

Intelligent Design is also a scientific research program that investigates the effects of intelligent causes, which are effects of high specificity coupled with extremely small probabilities.

Now that was a mouthful. What do I mean by high specificity coupled with small probability? Think of the lottery. Someone always wins the lottery despite the long odds. So improbable things do indeed happen.

But let's make this specific. Let's say your sister wins the lottery. Now that is someone you specifically know; but again someone always wins the lottery so the fact that it's your sister doesn't warrant any special attention.

Now let's make things a bit less probable and much *more* specific. Let's say your sister wins the lottery not once but three weeks in a row. Now what are you thinking? Like most people you're thinking something is not right. The same person doesn't win the lottery three weeks in a row.

You suspect cheating. You suspect Intelligent Design. Someone with a clever mind is somehow manipulating the lottery.

In astronomy, it has been assumed for several decades that our earth is not likely to be very special. As huge as the universe is, with billions of galaxies, each with billions of stars, surely there are thousands if not millions of planets like ours that are suitable for life.

But lately, more and more planetary astronomers, astrophysicists, cosmologists, and philosophers are realizing that earth is actually quite unique. The recipe for earth is more than just a planet plus mild temperatures plus water.

Our earth is 93,000,000 miles from the sun. Five percent closer and we would be a hothouse like Venus with no chance for life. If we were twenty percent farther away, we would be a frozen wasteland like Mars. We're just right. Liquid water is necessary for life and our earth has an abundance all year long.

## **Evidence for Intelligent Design, Part Two**

It's really quite amazing to realize that biologists universally recognize the design of living things. Oxford biologist and atheist Richard Dawkins said on page one of his book *The Blind Watchmaker*: "Biology is the study of complicated things that give the appearance of having been

designed for a purpose.”[{10}](#)

Now notice he said, “give the appearance of having been designed for a purpose.” Living things certainly look designed, but according to Dawkins, it’s an illusion. He spends the rest of his book trying to show how mutation and natural selection, the “blind watchmaker,” has created this illusion.

But he does admit things look designed. Well, if it looks designed, maybe it is.

Michael Behe introduced the concept of irreducible complexity in his book *Darwin’s Black Box*. Something is irreducibly complex if it is composed of two or more *necessary* parts. Remove one part and function is not just impaired but destroyed. His well-known example is a mousetrap.

A mousetrap is composed of five integral parts: the platform to which everything is attached, the hammer which does the dirty work, the spring which provides the force, the holding bar to keep the hammer in tension, and finally the catch to keep the holding bar in tenuous position. Remove any one of these parts and the mousetrap is not just less efficient; it ceases to function at all. All five parts are necessary. You can’t build a mousetrap by natural selection by adding one piece at a time because it has no function to select until all five parts are together.

Behe showed that the cell, Darwin’s “Black Box,” is filled with irreducibly complex molecular machines that could not be built by natural selection. In Darwin’s time, scientists could only see the cell under very low power microscopes that told little about what was going on inside. It was a black box. Over the last fifty to sixty years, the cell has been revealing its secrets. We have discovered a maze of complexity and information.

If it looks designed, maybe it is!

## **ID, Science, Education, and Creation**

The legitimacy of Intelligent Design as science was at the heart of a recent federal court case, pitting a group of parents and students against the school board from Dover, Pennsylvania. The Dover School Board adopted a policy that mandated a statement be read before all biology classes, indicating that evolution was a theory that needed critical evaluation and that intelligent design was a rival theory that students could seek information about from the library.

Judge Jones not only struck down the policy as unconstitutional, he went further to declare that ID is not science and was motivated purely by religion since it was just a repackaged creationism. His written opinion was scathing. This of course delighted proponents of evolution and many have declared that ID now is dead.

Judge Jones claimed that ID simply is not science and is religiously motivated; therefore it should not even be mentioned in a high school science classroom.

The first question that should occur to you is, Why does a federal judge with no training in science use his courtroom as a means of determining what is and is not science? This problem has been referred to as the demarcation problem. How do we demarcate science from non-science? People putting down ID often refer to it as “pseudo-science” or simply “unscientific.” But philosopher of science Larry Laudan writes, “If we would stand up and be counted on the side of reason, we ought to drop terms like ‘pseudo-science’ and ‘unscientific’ from our vocabulary; they are just hollow phrases which do only emotive work for us.”[\[11\]](#)

Judge Jones claims that ID has been refuted by mainstream scientists. He cites the work of Kenneth Miller in particular. This is rather strange indeed. For ID to be refuted means that it has been tested by science and found wanting. If it is

testable scientifically to the degree that it can be refuted, then it is science after all. This logical contradiction does not seem to occur to Judge Jones.

ID uses empirical data to demonstrate the plausibility of a design inference. It's as scientific as Darwinism.

# Sex and Violence on Television – A Christian Worldview Perspective

*Kerby Anderson takes a reasoned look at the amount of sex and violence portrayed on television and comes away with a sobering understanding of the intensity of the problem. From a biblical perspective, this level of consumption of disturbing images will result in a deadening of even Christian hearts to the clear call of Scripture to a life of purity in mind and action.*

## The Extent of the Problem

Is there too much sex and violence on television? Most Americans seem to think so. One survey found that seventy-five percent of Americans felt that television had “too much sexually explicit material.” Moreover, eighty-six percent believed that television had contributed to “a decline in values.”[\[1\]](#) And no wonder. Channel surfing through the television reveals plots celebrating premarital sex, adultery, and even homosexuality. Sexual promiscuity in the media appears to be at an all-time high. A study of adolescents (ages twelve to seventeen) showed that watching sex on TV influences teens to have sex. Youths were more likely to initiate intercourse as well as other sexual activities.[\[2\]](#)

A study by the Parents Television Council found that prime time network television is more violent than ever before. In addition, they found that this increasing violence is also of

a sexual nature. They found that portrayals of violence are up seventy-five percent since 1998.[{3}](#)

The study also provided expert commentary by Deborah Fisher, Ph.D. She states that children, on average, will be exposed to a thousand murders, rapes, and assaults per year through television. She goes on to warn that early exposure to television violence has “consistently emerged as a significant predictor of later aggression.”[{4}](#)

A previous study by the Parents Television Council compared the changes in sex, language, and violence between decades. The special report entitled *What a Difference a Decade Makes* found many shocking things.[{5}](#)

First, on a per-hour basis, sexual material more than tripled in the last decade. For example, while references to homosexuality were once rare, now they are mainstream. Second, the study found that foul language increased five-fold in just a decade. They also found that the intensity of violent incidents significantly increased.

These studies provide the best quantifiable measure of what has been taking place on television. No longer can defenders of television say that TV is “not that bad.” The evidence is in, and television is more offensive than ever.

Christians should not be surprised by these findings. Sex and violence have always been part of the human condition because of our sin nature (Romans 3:23), but modern families are exposed to a level of sex and violence that is unprecedented. Obviously, this will have a detrimental effect. The Bible teaches that “as a man thinks in his heart, so is he” (Proverbs 23:7, KJV). What we see and hear affects our actions. And while this is true for adults, it is especially true for children.

# Television's Impact on Behavior

What is the impact of watching television on subsequent behavior? There are abundant studies which document that what you see, hear, and read does affect your perception of the world and your behavior.

The American Academy of Pediatrics in 2000 issued a "Joint Statement on the Impact of Entertainment Violence on Children." They cited over one thousand studies, including reports from the Surgeon General's office and the National Institute of Mental Health. They say that these studies "point overwhelmingly to a causal connection between media violence and aggressive behavior in some children."[{6}](#)

In 1992, the American Psychological Association concluded that forty years of research on the link between TV violence and real-life violence has been ignored, stating that "the 'scientific debate is over' and calling for federal policy to protect society."[{7}](#)

A 1995 poll of children ten to sixteen years of age showed that children recognize that "what they see on television encourages them to take part in sexual activity too soon, to show disrespect for their parents, [and] to lie and to engage in aggressive behavior." More than two-thirds said they are influenced by television; seventy-seven percent said TV shows too much sex before marriage, and sixty-two percent said sex on television and in movies influences their peers to have sexual relations when they are too young. Two-thirds also cited certain programs featuring dysfunctional families as encouraging disrespect toward parents.

The report reminds us that television sets the baseline standard for the entire entertainment industry. Most homes (ninety-eight percent) have a television set. And according to recent statistics, that TV in the average household is on more than eight hours each day.[{8}](#)

By contrast, other forms of entertainment (such as movies, DVDs, CDs) must be sought out and purchased. Television is universally available, and thus has the most profound effect on our culture.

As Christians we need to be aware of the impact television has on us and our families. The studies show us that sex and violence on TV can affect us in subtle yet profound ways. We can no longer ignore the growing body of data that suggests that televised imagery does affect our perceptions and behaviors. So we should be concerned about the impact television (as well as other forms of media) has on our neighbors and our society as a whole.

## **Sex on Television**

Most Americans believe there is too much sex on television. A survey conducted in 1994 found that seventy-five percent of Americans felt that television had “too much sexually explicit material.” Moreover, eighty-six percent believed that television had contributed to “a decline in values.”[{9}](#) As we documented earlier, sexual promiscuity on television is at an all-time high.

I have previously written about the subject of pornography and talked about the dangerous effects of sex, especially when linked with violence.[{10}](#) Neil Malamuth and Edward Donnerstein document the volatile impact of sex and violence in the media. They say, “There can be relatively long-term, anti-social effects of movies that portray sexual violence as having positive consequences.”[{11}](#)

In a message given by Donnerstein, he concluded with this warning and observation: “If you take normal males and expose them to graphic violence against women in R-rated films, the research doesn’t show that they’ll commit acts of violence against women. It doesn’t say they will go out and commit

rape. But it does demonstrate that they become less sensitized to violence against women, they have less sympathy for rape victims, and their perceptions and attitudes and values about violence change.”{12}

It is important to remember that these studies are applicable not just to hard-core pornography. Many of the studies used films that are readily shown on television (especially cable television) any night of the week. And many of the movies shown today in theaters are much more explicit than those shown just a few years ago.

Social commentator Irving Kristol asked this question in a *Wall Street Journal* column: “Can anyone really believe that soft porn in our Hollywood movies, hard porn in our cable movies and violent porn in our ‘rap’ music is without effect? Here the average, overall impact is quite discernible to the naked eye. And at the margin, the effects, in terms most notably of illegitimacy and rape, are shockingly visible.”{13}

Christians must be careful that sexual images on television don’t conform us to the world (Rom. 12:2). Instead we should use discernment. Philippians 4:8 says, “Finally, brothers, whatever is true, whatever is noble, whatever is right, whatever is pure, whatever is lovely, whatever is admirable, if anything is excellent or praiseworthy, think about such things.”

Sex on television is at an all-time high, so we should be even more careful to screen what we and our families see. Christians should be concerned about the images we see on television.

## **Violence on Television**

Children’s greatest exposure to violence comes from television. TV shows, movies edited for television, and video games expose young children to a level of violence

unimaginable just a few years ago. The American Psychological Association says the average child watches eight thousand televised murders and one hundred thousand acts of violence before finishing elementary school.[{14}](#) That number more than doubles by the time he or she reaches age eighteen.

At a very young age, children are seeing a level of violence and mayhem that in the past may have been seen only by a few police officers and military personnel. TV brings hitting, kicking, stabbings, shootings, and dismemberment right into homes on a daily basis.

The impact on behavior is predictable. Two prominent Surgeon General reports in the last two decades link violence on television and aggressive behavior in children and teenagers. In addition, the National Institute of Mental Health issued a ninety-four page report, *Television and Behavior: Ten Years of Scientific Progress and Implications for the Eighties*. They found "overwhelming" scientific evidence that "excessive" violence on television spills over into the playground and the streets.[{15}](#) In one five-year study of 732 children, "several kinds of aggression, conflicts with parents, fighting and delinquency, were all positively correlated with the total amount of television viewing."[{16}](#)

Long-term studies are even more disturbing. University of Illinois psychologist Leonard Eron studied children at age eight and then again at eighteen. He found that television habits established at the age of eight influenced aggressive behavior throughout childhood and adolescent years. The more violent the programs preferred by boys in the third grade, the more aggressive their behavior, both at that time and ten years later. He therefore concluded that "the effect of television violence on aggression is cumulative."[{17}](#)

Twenty years later Eron and Rowell Huesmann found the pattern continued. He and his researchers found that children who watched significant amounts of TV violence at the age of eight

were consistently more likely to commit violent crimes or engage in child or spouse abuse at thirty.<sup>{18}</sup> They concluded that “heavy exposure to televised violence is one of the causes of aggressive behavior, crime and violence in society. Television violence affects youngsters of all ages, of both genders, at all socioeconomic levels and all levels of intelligence.”<sup>{19}</sup>

Violent images on television affect children in adverse ways and Christians should be concerned about the impact.

## **Biblical Perspective**

Television is such a part of our lives that we often are unaware of its subtle and insidious influence. Nearly every home has a television set, so we tend to take it for granted and are often oblivious to its influence.

I’ve had many people tell me that they watch television, and that it has no impact at all on their worldview or behavior. However the Bible teaches that “as a man thinks in his heart, so is he” (Proverbs 23:7). What we view and what we think about affects our actions. And there is abundant psychological evidence that television viewing affects our worldview.

George Gerbner and Larry Gross, working at the Annenberg School of Communications in the 1970s, found that heavy television viewers live in a scary world. “We have found that people who watch a lot of TV see the real world as more dangerous and frightening than those who watch very little. Heavy viewers are less trustful of their fellow citizens, and more fearful of the real world.”<sup>{20}</sup> Heavy viewers also tended to overestimate their likelihood of being involved in a violent crime. They defined heavy viewers as those adults who watch an average of four or more hours of television a day. Approximately one-third of all American adults fit that category.

And if this is true of adults, imagine how television violence affects children's perceptions of the world. Gerbner and Gross say, "Imagine spending six hours a day at the local movie house when you were twelve years old. No parent would have permitted it. Yet, in our sample of children, nearly half of the twelve-year-olds watch an average of six or more hours of television per day." This would mean that a large portion of young people fit into the category of heavy viewers. Their view of the world must be profoundly shaped by TV. Gerbner and Gross therefore conclude, "If adults can be so accepting of the reality of television, imagine its effect on children. By the time the average American child reaches public school, he has already spent several years in an electronic nursery school."[\[21\]](#)

Television viewing affects both adults and children in subtle ways. We must not ignore the growing body of data that suggests that televised imagery does affect our perceptions and behaviors. Our worldview and our subsequent actions are affected by what we see on television. Christians, therefore, must be careful not to let television conform us to the world (Romans 12:2), but instead should develop a Christian worldview.

# Dealing with Doubt in Our Christian Faith

*Dr. Michael Gleghorn points out that it is not having doubts about our Christian faith that is an issue, but rather how we respond to that doubt. Attacking this issue from a biblical worldview perspective, Michael helps us understand our doubts and respond to them as an informed Christian.*

## Help! My Doubts Scare Me!

Have you ever doubted your faith? We all have doubts from time to time. We may doubt that our boss *really* hit a hole-in-one at the golf course last weekend, or that our best friend *really* caught a fish as big as the one he claimed to catch, or that the strange looking guy on that late night TV show was *really* abducted by alien beings from a distant galaxy! Sometimes the things we doubt aren't really that important, but other times they are. And the more important something is to us, the more personally invested we are in it, the scarier it can be to start having doubts about it. So when Christians begin to have doubts about something as significant as the truth of their Christian faith, it's quite understandable that this might worry or even frighten them.

Reflecting on this issue in *The Case for Faith*, Lee Strobel wrote:

For many Christians, merely having doubts of any kind can be scary. They wonder whether their questions disqualify them being a follower of Christ. They feel insecure

because they're not sure whether it's permissible to express uncertainty about God, Jesus, or the Bible. So they keep their questions to themselves—and inside, unanswered, they grow and fester . . . until they eventually succeed in choking out their faith. [{1}](#)

So what can we do if we find ourselves struggling with doubts about the truth of Christianity? Why do such doubts arise? And how can we rid ourselves of these taunting Goliaths?

First, we must always remember that sooner or later we'll probably *all* have to wrestle with doubts about our faith. As Christian philosopher William Lane Craig observes, "Any Christian who is intellectually engaged and reflecting about his faith will inevitably face the problem of doubt." [{2}](#) Doubts can arise for all sorts of reasons. Sometimes they're largely intellectual. We might doubt that the Bible is *really* inspired by God or that Jesus was *really* born of a virgin. But doubts can take other forms as well. If a person has experienced great sorrow or disappointment, such as personal wounds from family or friends, the loss of a job, a painful divorce, the death of a loved one, or the loss of health, they may be seriously tempted to doubt the goodness, love, and care of their heavenly Father. [{3}](#)

Whenever they come and whatever form they take, we must each deal honestly with our doubts. To ignore them is to court spiritual disaster. But facing them can lead ultimately to a deeper faith. As Christian minister Lynn Anderson has said, "A faith that's challenged by adversity or tough questions . . . is often a stronger faith in the end." [{4}](#)

## **It's Not All in Your Head!**

Sometimes people have sincere doubts about the truth of Christianity, intellectual obstacles that hinder them from placing their trust in Christ. In such cases, Christians have

an obligation to respond to the person's doubts and make a humble and thoughtful defense for the truth of Christianity. Nevertheless, as Craig observes, it's important to realize that "doubt is never a purely intellectual problem." Like it or not, there's always a "spiritual dimension to the problem that must be recognized."[\[5\]](#) Because of this, sometimes a person's objections to Christianity are really just a smokescreen, an attempt to cover up the *real* reason for their rejection of Christ, which is often an underlying moral or spiritual issue.

I once heard a story about a Christian apologist who spoke at a university about the evidence for Christianity. Afterward, a student approached him and said, "I honestly didn't expect this to happen, but you satisfactorily answered all my objections to Christianity." The apologist was a bit startled by such a frank admission, but he quickly recovered himself and said, "Well that's great! Why not give your life to Christ right now, then?" But the student said, "No. I'm not willing to do that. I would have to change the way I'm living, and I'm just not ready to do that right now."

In this case all the student's reasons for doubting the Christian faith had, by his own admission, been satisfactorily answered. What was really holding him back were not his doubts about the truth of Christianity, but a desire to live life on his own terms. To put it bluntly, he didn't want God meddling in his affairs. He didn't want to be morally accountable to some ultimate authority. The truth is that a person's intellectual objections to Christianity are *rarely* the whole story. As Christian scholar Ravi Zacharias observed, "A man rejects God neither because of intellectual demands nor because of the scarcity of evidence. A man rejects God because of a moral resistance that refuses to admit his need for God."[\[6\]](#)

Unfortunately, Christians aren't immune to doubting their faith for similar reasons. I know of a young man who had

converted to Christianity, but who's now raising various objections to it. But when one looks beneath the surface, one sees that he's currently involved in an immoral lifestyle. In order to continue living as he wants, without being unduly plagued by a guilty conscience, he must call into question the truth of Christianity. For the Bible tells him plainly that he's disobeying God. Of course, ultimately no one is immune to doubts about Christianity, so we'll now consider some ways to guard our hearts and minds.

## **I Believe, Help My Unbelief!**

As He came down the mountain, Jesus was met by a large crowd of people. A father had brought his demon-possessed son to Jesus' disciples, but they were not able to cast the demon out. In desperation the father appealed to Jesus, "If You can do anything, take pity on us and help us!" Jesus answered, "If You can! All things are possible to him who believes." The father responded, "I do believe; help my unbelief."[{7}](#)

Can you identify with the father in this story? I know I can. Oftentimes as Christians we find that our faith is in precisely the same state as this father's. We genuinely believe, but we need help with our unbelief. It's always been an encouragement to me that after the father's admission of a faith mixed with doubt, Jesus nonetheless cast out the demon and healed the man's son.[{8}](#) But of course no Christian should be content to remain in this state. If we want to grow in our faith and rid ourselves of doubts, what are some positive steps we can take to accomplish this?

Well, in the first place, it's helpful to be familiar with the "principle of displacement." As Sue "Archimedes" Bohlin, one of my colleagues, has written:

The Bible teaches the principle of "displacement." That is, rather than trying to make thoughts shoo away, we are

told to replace them with what is good, true, and perfect (Phil. 4:8). As the truth comes in the lies are displaced—much like when we fill a bathtub too full of water, and when we get in, our bodies displace the water, which flows out over the top of the tub.{9}

Once we grasp this principle, a number of steps for dealing with doubt quickly become evident. For one thing, we can memorize and meditate upon Scripture. We can also listen attentively to good Christian music. Paul speaks to the importance of both of these in Colossians 3:16: “Let the word of Christ dwell in you richly as you teach and admonish one another with all wisdom, and as you sing psalms, hymns and spiritual songs with gratitude in your hearts to God.”

In addition, we can read good Christian books that provide intelligent answers to some of the questions we might be asking. Great Christian scholars have addressed almost every conceivable objection to the truth of Christianity. If you have nagging doubts about some aspect of your faith, there’s almost certainly a work of Christian scholarship that speaks to it in detail. Finally, we must never forget that this is a spiritual battle. So let’s remember to put on the full armor of God so we can stand firm in the midst of it!{10}

## Faith and Reason

How can we [know if Christianity is really true?](#) Is it by reason, or evidence, or mystical experience? Dr. Craig has an answer to this question that you might find a bit surprising.{11} He distinguishes between *knowing* Christianity is true and *showing* that it’s true. Ideally, one attempts to *show* that Christianity is true with good arguments and evidence. But Craig doesn’t think that this is how we *know* our faith is true. Rather, he believes that we can *know* our faith is true because “God’s Spirit makes it evident to us that our faith is true.”{12}

Consider Paul's statement in Romans 8:16, "The Spirit himself testifies with our spirit that we are God's children." Since every believer is indwelt by God's Spirit, every believer also receives the Spirit's testimony that he is one of God's children. This is sometimes called the "assurance of salvation." Dr. Craig comments on the significance of this:

Salvation entails that God exists, that Christ atoned for our sins . . . and so forth, so that if you are assured of your salvation, then you must be assured of . . . these other truths as well. Hence, the witness of the Holy Spirit gives the believer an immediate assurance that his faith is true.{13}

Now this is remarkable. For it means we can *know* that Christianity is true, wholly apart from arguments, simply by attending to the witness of the Holy Spirit. And this is so not only for believers but for unbelievers, too. For the Spirit convicts the unbelieving world of sin, righteousness, and judgment, particularly the sin of unbelief.{14} So when we're confronted with objections to Christianity that we can't answer, we needn't worry. First, answers are usually available if one knows where to look. But second, the witness of the Spirit trumps any objections we might encounter.

Consider an illustration from the Christian philosopher Alvin Plantinga. Suppose I'm accused of stealing a document out of a colleague's office. Suppose I have a motive, an opportunity, and a history of doing such things. Suppose further that someone thought they saw me lurking around my colleague's office just before the document went missing. There's much evidence against me. But in fact, I didn't steal the document. I was on a walk at the time. Now should I doubt my innocence since the evidence is against me? Of course not! For I *know* I'm not guilty!{15}

Similarly, writes Dr. Craig, "I needn't be shaken when objections come along that I can't answer."{16} For my faith

isn't ultimately based on arguments, but on the witness of God's Spirit.

## Stepping into the Light

We've seen that both Christians and non-Christians can have doubts about the truth of Christianity. We've also seen that such doubts are never *just* an intellectual issue; there's *always* a spiritual dynamic that's involved as well. But since we'll probably never be able to fully resolve every single doubt we might experience, I would like to conclude by suggesting one final way to make our doubts flee before us, much as roaches flee to their hidden lairs when one turns on the light!

In John 7:17 Jesus says, "If anyone chooses to do God's will, he will find out whether my teaching comes from God or whether I speak on my own." Here, Jesus frankly encourages us to put His teachings to the test and see for ourselves whether He really speaks for God or not. As biblical scholar Merrill Tenney comments, "Spiritual understanding is not produced solely by learning facts or procedures, but rather it depends on obedience to known truth. Obedience to God's known will develops discernment between falsehood and truth."[{17}](#) Are we *really* serious about dealing with our lingering doubts? If so, Jesus says that if we resolutely choose to do God's will, we can know if His teaching is really from God!

Sadly, however, many of us will *never* take Jesus up on His challenge. No matter how loudly we might *claim* to want to rid ourselves of doubt, the truth is that many of us just aren't *willing* to do God's will. But if you are, then Jesus says that "you will know the truth, and the truth will set you free."[{18}](#) In other words, we can know by *experience* that Jesus is from God, that His teachings are true, and that He really is who He claimed to be!

As Christian philosopher Dallas Willard observes, the issue ultimately comes down to what we *really* want:

The Bible says that if you seek God with all your heart, then you will surely find him. Surely find him. It's the person who wants to know God that God reveals himself to. And if a person doesn't want to know God—well, God has created the world and the human mind in such a way that he doesn't have to. [\[19\]](#)

The psalmist encourages us to “taste and see that the Lord is good.” [\[20\]](#) If we do, we can know not only that God is good, but also that He exists. And even if we still have some lingering doubts and unanswered questions in the back of our minds, as we surely will, they'll gradually fade into utter insignificance as we become more intimately acquainted with Him who loves us and who reconciled us to Himself through the death of His Son! [\[21\]](#)

# **Crime and Punishment – A Christian View of Dostoevsky's Classic Novel**

*Michael Gleghorn looks at the famous novel through a Christian worldview lens to see what truths Dostoevsky may have for us. We learn that this great novel records the fall of man into a degraded state but ends with the beginning of his restoration through the ministry of a selfless, Christian woman.*

## Introduction and Overview

In 1866 the Russian novelist Fyodor Dostoevsky published *Crime and Punishment*, one of his greatest novels. It's a penetrating study of the psychology of sin, guilt, and redemption, and it haunts the reader long after the final page has been read. It tells the story of an intelligent, but impoverished, young Russian intellectual named Raskolnikov. Under the unfortunate influence of a particularly pernicious theory of society and human nature, he exalts himself above the moral law, grievously transgresses it by committing two murders, "and plunges into a hell of persecution, madness and terror."[\[1\]](#)

Raskolnikov had conceived of himself as a great and extraordinary man, on the order of a Napoleon. He tried to convince himself that he wasn't bound by the same tired old moral code that the vast mass of humanity lives in recognition of, if not obedience to—the merely *ordinary* men and women who accomplish little and amount to less. Nevertheless, after committing his horrible crime, he finds that he cannot escape his punishment: he cannot silence his sensitive and overburdened conscience. In the end, when he can stand it no longer, he decides to confess his crime and accept suffering as a means of atonement.

Joseph Frank observes that Dostoevsky, the author of this story, had "long been preoccupied with the question of crime and conscience."[\[2\]](#) In one of his letters, Dostoevsky describes his story as the "psychological report of a crime."[\[3\]](#) The crime is committed, he says, by "a young man, expelled from the university . . . and living in the midst of the direst poverty." Coming under the influence of "the strange, 'unfinished' ideas that float in the atmosphere," he decides to murder an old pawnbroker and steal her money. Dostoevsky describes the old woman as "stupid and ailing," "greedy" and "evil." Why, it would hardly be a crime at all to murder such a wretched person! What's more, with the money

from his crime, the young man can “finish his studies, go abroad,” and devote the rest of his life to the benefit of humanity!

Inspired by these thoughts, the young man goes through with the crime and murders the old woman. But, notes Dostoevsky, “here is where the entire psychological process of the crime is unfolded. Insoluble problems confront the murderer, unsuspected and unexpected feelings torment his heart . . . and he finishes by *being forced* to denounce himself.”

This, in brief, is the story of *Crime and Punishment*. In what follows, we’ll take a closer look at the theory which led Raskolnikov to commit his crime. Then we’ll consider why the theory proved false when Raskolnikov actually attempted to put it into practice.

## **The Ordinary and Extraordinary**

Raskolnikov committed two murders, in part simply to see if he really has the bravado to put his theories into practice. But what are these ideas? Where do they come from? And why do they lead Raskolnikov to such heinous actions?

Essentially, Raskolnikov’s theory, which was partially developed in an article on crime that he had written, holds that all men, by a kind of law of nature, are divided into two distinct classes: the *ordinary* and the *extraordinary*. This theory, which finds some of its philosophical roots in the writings of men like Hegel and Nietzsche, claims that ordinary men exist merely for the purpose of reproduction by which, at length, the occasional, extraordinary man might arise. Raskolnikov declares, “The vast mass of mankind is mere material, and only exists in order by some great effort, by some mysterious process, by means of some crossing of races and stocks, to bring into the world at last perhaps one man out of a thousand with a spark of independence.” The man of

genius is rarer still, “and the great geniuses, the crown of humanity, appear on earth perhaps one in many thousand millions.”{4}

The distinctive features of the ordinary man are a conservative temperament and a law-abiding disposition. But extraordinary men “all transgress the law.” Indeed, says Raskolnikov, “if such a one is forced for the sake of his idea to step over a corpse or wade through blood, he can . . . find . . . in his own conscience, a sanction for wading through blood.”{5} So the extraordinary man has the right—indeed, depending on the value of his ideas, he may even have the duty—to destroy those who stand in his way. After all, Raskolnikov observes, such ideas may benefit “the whole of humanity.”{6} But how can we know if we are merely ordinary men, or whether, perhaps, we are extraordinary? How can we know if we have the *right* to transgress the law to achieve our own ends?

Raskolnikov admits that confusion regarding one’s class is indeed possible. But he thinks “the mistake can only arise . . . among the ordinary people” who sometimes like to imagine themselves more advanced than they really are. And we needn’t worry much about that, for such people are “very conscientious” and will impose “public acts of penitence upon themselves with a beautiful and edifying effect.”{7}

But as we’ll see, it’s one of the ironies of this novel that Raskolnikov, who committed murder because he thought himself extraordinary, made precisely this tragic mistake.

## **A Walking Contradiction**

James Roberts observes that Raskolnikov “is best seen as two characters. He sometimes acts in one manner and then suddenly in a manner completely contradictory.”{8} Evidence for this can be seen throughout the novel. In this way, Dostoevsky

makes clear, right from the beginning of his story, that Raskolnikov is *not* an extraordinary man, at least not in the sense in which Raskolnikov himself uses that term in his theory of human nature.

In the opening pages of the novel, we see Raskolnikov at war with himself as he debates his intention to murder an old pawnbroker. "I want to attempt a thing *like that*," he says to himself.[{9}](#) Then, after visiting the old woman's flat, ostensibly to pawn a watch, but in reality as a sort of "dress rehearsal" for the murder, he again questions himself: "How could such an atrocious thing come into my head? What filthy things my heart is capable of. Yes, filthy above all . . . loathsome!"[{10}](#)

This inner battle suggests that Raskolnikov has mistaken himself for an *extraordinary* man, a man bound neither by the rules of society, nor the higher moral law. But in fact, he's actually just a conscientious *ordinary* man. The portrait Dostoevsky paints of him is really quite complex. He often appears to be a sensitive, though confused, young intellectual, who's been led to entertain his wild ideas more as a result of dire poverty and self-imposed isolation from his fellow man, rather than from sheer malice or selfish ambition.

In fear and trembling he commits two murders, partly out of a confused desire to thereby benefit the rest of humanity, and partly out of a seemingly genuine concern to really live in accordance with his theories. Ironically, while the murders are partly committed with the idea of taking the old pawnbroker's money to advance Raskolnikov's plans, he never attempts to use the money, but merely buries it under a stone. What's more, Raskolnikov is portrayed as one of the more generous characters in the novel. On more than one occasion, he literally gives away all the money he has to help meet the needs of others. Finally, while Raskolnikov is helped toward confessing his crime through the varied efforts of Porfiry

Petrovich, the brilliant, yet compassionate, criminal investigator, and Sonia, the humble, selfless prostitute, nevertheless, it's primarily Raskolnikov's own tormented conscience that, at length, virtually forces him to confess to the murders.

So while Raskolnikov is guilty, he's not completely lost. He still retains a conscience, as well as some degree of genuine compassion toward others. Dostoevsky wants us to see that there's still hope for Raskolnikov!

## **The Hope of Restoration**

After Raskolnikov commits the two murders, he finds himself confronted with the desperate need to be reconciled with God and his fellow man. From the beginning of the story, Raskolnikov is portrayed as somewhat alienated from his fellows. But once he commits the murders, he experiences a decisive break, both spiritually and psychologically, from the rest of humanity. Indeed, when he murders the old pawnbroker and her sister, something within Raskolnikov also dies. The bond that unites him with all other men in a common humanity is destroyed—or “dies”—as a sort of poetic justice for murdering the two women.

This death, which separates Raskolnikov both from God and his fellow man, can only be reversed through a miracle of divine grace and power. In the novel, the biblical paradigm for this great miracle is the story of the raising of Lazarus. Just as Lazarus died, and was then restored to life through the miraculous power of God in Christ, so also, in Dostoevsky's story, Raskolnikov's “death” is neither permanent nor irreversible. He too can be “restored to life.” He too can be reconciled with God and man.

While this theme of death and restoration to life is somewhat subtle, nevertheless, Dostoevsky probably intended it as one

of the primary themes of the novel. In the first place, it is emphasized by Sonia, Porfiry Petrovich, and Raskolnikov's own sister, that only by confessing his crime and accepting his punishment can Raskolnikov again be *restored* to the rest of humanity. In this way, Dostoevsky repeatedly emphasizes the "death" of Raskolnikov.

In addition, the raising of Lazarus is mentioned at least three times in the novel. One time is when, in the midst of a heated discussion, Porfiry specifically asks Raskolnikov if he believes in the raising of Lazarus, to which Raskolnikov responds that he does.[{11}](#) This affirmation foreshadows some hope for Raskolnikov, for the fact that he believes in this miracle at least makes possible the belief that God can also work a miracle in his own life. Secondly, the only extended portion of Scripture cited in the novel relates the story of Lazarus. In fact, it's Raskolnikov himself, tormented by what he's done, who asks Sonia to read him the story.[{12}](#) Finally, at the end of the novel, the raising of Lazarus is mentioned yet again, this time as Raskolnikov recollects Sonia's previous reading of the story to him.[{13}](#) Interestingly, this final reference to the raising of Lazarus occurs in the context of Raskolnikov's own "restoration to life."

## Restored to Life

Near the end of the novel, Raskolnikov at last goes to the police station and confesses to the murders: "*It was I killed the old pawnbroker woman and her sister Lizaveta with an axe and robbed them.*"[{14}](#) He is sentenced to eight years in a Siberian labor prison. Sonia, true to her promise, selflessly follows him there. Early one morning she comes to visit Raskolnikov. Overcome with emotion, he begins weeping and throws himself at her feet. Sonia is terrified. "But at the same moment she understood . . . . She knew . . . that he loved her . . . and that at last the moment had come."[{15}](#) God's love, mediated through Sonia, had finally broken through

to Raskolnikov: "He had risen again and he . . . felt in it all his being."[{16}](#)

Although Raskolnikov had previously been something of an outcast with his fellow inmates, nevertheless, on the day of his "restoration," his relations with them begin to improve. Dostoevsky writes:

*He . . . fancied that day that all the convicts who had been his enemies looked at him differently; he had even entered into talk with them and they answered him in a friendly way. He remembered that now, and thought it was bound to be so. Wasn't everything now bound to be changed?*[{17}](#)

What's more, Dostoevsky also implies that Raskolnikov is being restored to relationship with God. Picking up the New Testament that Sonia had given him, "one thought passed through his mind: 'Can her convictions not be mine now? Her feelings, her aspirations at least . . .'"[{18}](#) And Dostoevsky then concludes his great novel by stating: "But that is the beginning of a new story—the story of the gradual renewal of a man, the story of his gradual regeneration, of his passing from one world into another, of his initiation into a new unknown life."[{19}](#)

So by the end of the novel, Raskolnikov, as a type of Lazarus, has experienced his own "restoration to life." He is ready to begin "his initiation into a new unknown life." And interestingly, the grace which brings about Raskolnikov's restoration is primarily mediated to him through the quiet, humble love of Sonia, a prostitute. Just as God was not ashamed to have his own Son, humanly speaking, descended from some who were murderers and some who were prostitutes—for it was just such people He came to save—so also, in Dostoevsky's story, God is not ashamed to extend His forgiveness and grace to a prostitute, and through her to a murderer as well. *Crime and Punishment* thus ends on a note of hope, for the guilty can

be forgiven and the dead restored to life!
