

Was Darwin Wrong? A Rebuttal to the November 2004 National Geographic Cover Story

Our authors examine arguments for evolution commonly brought out by evolutionists. They show these arguments are not as strong as they purport and in many instances make a stronger case for intelligent design. Every person, especially Christians, should be aware of the information presented in this article.

Over the last few decades more and more scientists from every field of discipline have voiced concerns with Darwinian evolution's ability to explain the origin and diversity of life on earth. However, you would not know that from reading a recent article in *National Geographic*. The cover of the November 2004 issue grabs the reader's attention with the question, "Was Darwin wrong?" To few people's surprise, upon turning to the first page of the article you see the boldfaced words, "NO. The evidence for Evolution is overwhelming." But how can this be when so many scientists are in disagreement? Is it possible that the five lines of evidence presented in the article aren't as indisputable as the reader is led to believe? What if each one of these evidences for evolution is fatally flawed? What would evolution have left to stand upon? It is my opinion, as well as many others', that this is indeed the case. Let us critically evaluate each of these five lines of evidence (embryology, biogeography, morphology, paleontology, and bacterial resistance to antibiotics) and see what, if anything, we can conclude from them.

Embryology

First let's examine the so-called evidence from embryology, which Darwin himself considered to be "by far the strongest

single class of facts in favor of" his theory.^{1} *National Geographic* asks the question, "Why does the embryo of a mammal pass through stages resembling stages of the embryo of a reptile?"^{2} This, however, is a loaded question.

This line of evidence presented by *National Geographic* is known as Embryonic Recapitulation, or in other words, as the embryo develops it passes through stages that retrace its evolutionary past. This idea was originally developed in the mid 1800's by Ernst Haeckel, which he illustrated with drawings of embryos of various species. However, as Jonathan Wells points out in his book *Icons of Evolution*, this has been known to be false for over 100 years! Not only were Haeckel's drawings fraudulent but the late Stephen J. Gould called them "the most famous fakes in biology." Furthermore, embryologist Walter Garstang also stated in 1922 that the various stages of embryo development of different species "afford not the slightest evidence" of similarities with other species supposed to be their ancestors, stating that Haeckel's proposal is "demonstrably unsound."^{3} In 1894 Adam Sedgwick wrote, "A species is distinct and distinguishable from its allies from the very earliest stages all through the development."^{4}

So how is *National Geographic's* question, "Why does the embryo of a mammal pass through stages resembling stages of the embryo of a reptile?" a loaded question? Because mammalian embryos never pass through such stages in the first place! Darwin's "strongest" evidence for evolution turns out to be no evidence at all.

Biogeography

Biogeography, as defined by *National Geographic*, "is the study of geographical distribution of living creatures—that is, which species inhabit which parts of the planet and why."^{5} *National Geographic* asks, "Why should [such similar] species inhabit neighboring patches of habitat?"^{6} Why are there

several different species of zebras found in Africa, or dozens of species of honey creepers in Hawaii, or thirteen species of finches in the Galapagos Islands? The answer given is that “similar species occur nearby in space because they have descended from common ancestors.” There is nothing controversial about that. But I don’t believe that this in anyway supports the kind of evolution that *National Geographic* is trying to promote. Allow me to explain by taking a closer look at the term “evolution.”

There are two different kinds of “evolution” within the biological sciences. The first kind of evolution is *macroevolution*, or, big change over time. Macroevolution requires a vast amount of new genetic information and describes the kind of evolution required to make a man out of a microbe. It is this kind of evolution that is being propagated by *National Geographic*.

The second kind of evolution is *microevolution* which describes small changes or variations within a kind. For example, you may breed a pair of dogs and get another dog which is smaller than both its parents. You may then breed the new smaller dog and get an even smaller dog. However, there are limits to this kind of change.[\[7\]](#) No matter how often you repeat this procedure the dog will only get so small. It is also important to note that the offspring will always be a dog. You will never get a non-dog from a dog through this kind of change. Not to mention this kind of evolution tells us nothing about where the dog came from in the first place.

So what about *National Geographic*’s examples? They are all examples of microevolution. Why, for example, are there several species of zebras in Africa? Because they had a common ancestor that probably lived in Africa—a zebra. Or why are there thirteen species of finch on the Galapagos Islands? Because they are all descended from a single pair or group of finches. To use this kind of observation and try to explain where a zebra or finch came from in the first place goes

beyond the data and the scientific method, and enters into the realm of imagination.

Evolutionists are still puzzling over the connection between these two forms of evolution, macro and micro. Perhaps the puzzle remains because macroevolution is just wishful thinking.

Morphology

Morphology is a term referring to “a branch of biology that deals with the form and structure of animals and plants.”[\[8\]](#) It is presented by *National Geographic* as having been labeled by Darwin the “‘very soul of natural history.” So what is this evidence from morphology that lends itself as “proof” for microbes-to-man evolution? Simply put, it is that similarities in shape and design between different species may indicate that those species have originated from a common ancestor by way of descent with modification. *National Geographic* gives a few examples such as the “five-digit skeletal structure of the vertebrate hand,” and “the paired bones of our lower legs” which are also seen “in cats and bats and porpoises and lizards and turtles.”[\[9\]](#)

Perhaps an easier to follow illustration concerning this is evolutionist Tim Berra’s famous illustration which he used in his book *Evolution and the Myth of Creationism*. In it he states the following:

If you look at a 1953 Corvette and compare it to the latest model, only the most general resemblances are evident, but if you compare a 1953 and a 1954 Corvette, side by side, then a 1954 and a 1955 model, and so on, the descent with modification is overwhelmingly obvious. This is what paleontologists do with fossils, and the evidence is so solid and comprehensive that it cannot be denied by reasonable people [emphasis in original].[\[10\]](#)

So why is this illustration famous? It's because Berra, although an evolutionist, unwittingly demonstrated why similar structures across different species is just as naturally attributed to intelligent design. For what do each of these various Corvette models have in common? They were all designed and manufactured by the same company, General Motors. In fact, the Corvette has many design features in common with other automobiles as well, such as four wheels, a gasoline engine, brakes, a steering wheel, etc. Why do most cars share these things, and many others things, in common? Because they are effective and efficient features designed for the proper operation of the vehicle. Maybe this is the same reason we find commonalities between many different kinds of plants and animals.

It must be granted that if evolution were true, then one would expect to see similarities between closely related species. However, as illustrated above, they could also be explained as the result of a common designer. So how can we tell which it is?

There are at least two ways. First, if similar structures did truly descend from a common ancestor, then those structures should have similar developmental pathways. In other words, they should develop in a similar manner while still in the embryonic stage. However, as early as the late 1800's scientists observed that this simply isn't the case. Embryologist Edmund Wilson in 1894 noted that structures which appear similar between adults of different species often differ greatly either in how they form or from where they form, or both.[\[11\]](#)

Secondly, if similar structures are the result of descent with modification, then you would expect the development of those structures to be governed by similar genes. Concerning this very point biologist Gavin de Beer said, "This is where the worst shock of all is encountered . . . the inheritance of homologous structures from a common ancestor . . . cannot be

ascribed to identity of genes.”[{12}](#) In other words, different genes govern the development of similar structures which runs contrary to what evolution would predict.

It would appear then, that morphology, the “‘very’ soul of natural history,” is more the “ghost” of natural history than supporting evidence for evolution. There are certainly many features of organisms resulting from a common ancestry, such as the beak of the Galapagos finches; but that doesn’t mean that the beaks of all birds are also related by common ancestry. Perhaps applying the perspective of Intelligent Design can help clarify the difference.

Paleontology

Paleontology simply put is the study of the fossil record. So how does the fossil record support the “theory” of evolution? According to *National Geographic*, Darwin observed that species presumed to be related tend to be found in successive rock layers.[{13}](#) *National Geographic* asks if this is just coincidental. The answer provided, of course, is a firm no. Rather, they say, it is “because they are related through evolutionary descent.”[{14}](#) Is this conclusion truly supported by scientific observation?

The biggest problem with identifying a gradual change from one species into another within the fossil record is that by and large no such gradual sequence of fossils exists! With the exception of a few disputed examples, such as the horse and whale, what truly stands out in the fossil record is sudden appearance. The late Stephen J. Gould, a world renowned evolutionist, noted concerning this, “The extreme rarity of transitional forms in the fossil record persists as the trade secret of paleontology. The evolutionary trees that adorn our textbooks have data only at the tips and nodes of their branches; the rest is inference, however reasonable, not the evidence of fossils.”[{15}](#) This is especially true within the Cambrian rock layer, dated by evolutionists at over 500

million years old, where complex species appear for the first time with no sign of gradual development from simpler forms.

To illustrate this point, imagine, if you will, that you covered the entire state of Texas with playing cards. If someone were to then go for a walk across Texas and periodically pick up a card at random, what might they begin to think if all they ever picked up were 2s and aces, and never any of the cards in between? He might begin to wonder if those other cards were there at all.

This is precisely what we find within the Cambrian rock layer. We always find fully formed species, like finding just 2s and aces, and never any intermediates, like your 3s, 4s, and so on. In fact, *National Geographic* even acknowledges this problem when it compares the fossil record in general to a film with 999 out of every 1,000 frames missing.[\[16\]](#) It's more likely that there are few if any missing frames; rather those frames never existed in the first place.

Darwin himself, observing the lack of transitional forms within the fossil record, noted this problem to be "perhaps the most obvious and serious objection which can be urged against [his theory of evolution]."[\[17\]](#) Today, with nearly 150 years of advancements in the area of paleontology, the fossil record still fails to meet the expectation of Darwin's theory. This problem goes unaddressed by *National Geographic*.

Bacterial Resistance to Antibiotics

National Geographic derives a fifth line of evidence from more recent scientific data. They state, "These new forms of knowledge overlap one another seamlessly and intersect with the older forms, strengthening the whole edifice, contributing further to the certainty that Darwin was right."[\[18\]](#) Is this really the case? The most lauded of these "new forms of knowledge" is from the study of bacteria that acquire resistance to modern medicines. *National Geographic* states

that “there’s no better or more immediate evidence supporting the Darwinian theory than this process of forced transformation among our inimical germs.”[\[19\]](#)

These adaptations are in fact evidence for change over time, but not the kind that would change a microbe into a man. Rather, all examples of bacterial resistance are that of micro-evolution, i.e. change *within* a kind. For example, a staph infection is caused by a bacterium known as a *Staphylococcus* or “staph” for short. Whenever a staph bacterium acquires resistance to a particular antibiotic, it still remains a staph. It doesn’t change into a different kind of bacterium altogether. In fact, no matter how much it changes, it always remains a staph.

Secondly, when we take a closer look at how bacteria become resistant to a particular treatment, we find something very interesting. Just like in humans, information on how bacteria grow and survive is stored in the bacteria’s DNA. Therefore, if any change is to take place to turn an organism from one kind to another “more complex” kind, such as a microbe into a man, it must add new information to that organism’s DNA. However, that is not what we observe taking place in bacteria at all. New information is *never* created. Existing information may be modified, lost, or even exchanged between bacteria, but never created.

Thirdly, and perhaps most significantly, is that nothing which *National Geographic* presents even begins to explain where the information to make a bacterium came from in the first place. Rather, and to no surprise to the creationists, the study of bacterial resistance testifies to an intelligent Designer who created all living organisms with an ability to adapt to changing environments.

Conclusion

Modern science has indeed offered us great insight into the

complexities of life and the inner workings of all living things. Advances in population genetics, biochemistry, molecular biology, and the human genome will surely result in greater understanding of life on our planet. But unlike what *National Geographic* suggests, it is these advances which have served to convince an increasing number of scientists to abandon Darwin's theory as an explanation for the origin of life on earth. Rather, these advancements point to the necessity of intelligent design as an added tool in the toolbox.

Understanding Our Mormon Neighbors – As Evangelical Christians

Mormon missionaries are sounding more and more like evangelical Christians. Has something changed in Mormon theology? A group of evangelical theologians have opened a dialogue with their Mormon counterparts and argue that the LDS movement is indeed changing. Don Closson considers these changes in Mormon thinking and how it affects our dialogue with our Mormon neighbors.

Mormon Neo-orthodoxy?

Have you noticed that Mormons are sounding more and more like evangelical Christians? In the last few decades individuals inside the Mormon Church, and many outside, have noticed a shift in the content and presentation of the Mormon faith. Certain aspects of Mormon theology, like the physical, limited nature of God, are either downplayed or left unsaid. Other aspects, like salvation by faith in the justifying work of

Jesus Christ, are highlighted. Is something significant happening within Mormonism? Although Mormon theology has been somewhat fluid over the decades, some feel that a new band of Mormon scholars are indeed moving the religion in a new direction and that Christians need to be aware of these changes if we are to have effective dialogue with our Mormon neighbors.

Mormon sociologist Kendall White has been writing about this change in Mormon thinking since the 1960's. He writes that traditional Mormon theology produced in the late nineteenth and early twentieth centuries by B. H. Roberts, James Talmage, and John Widtsoe, centered on an "optimistic humanism, finite theism, and [an] emphasis on human merit in attaining salvation."[\[1\]](#) The new movement, called neo-orthodox Mormonism by some, "stresses the omnipotence and sovereignty of God, human sinfulness and inability to merit salvation, and the necessity of salvation by grace."[\[2\]](#) The primary theological sources for neo-orthodox Mormons are the Bible and the Book of Mormon. The later writings of Joseph Smith, including sections of the Doctrine and Covenants, the Pearl of Great Price, and the King Follett Discourse are seen as less helpful.

White argues that this theological trend is actually a return to the earliest form of Mormon beliefs found in the 1830s. It's interesting to note that, while White admits that Mormon neo-orthodoxy is a valid form of Mormonism, he's not in favor of it. On the other hand, Robert Millet, past dean of Religious Education at Brigham Young University, argues that the neo-orthodox movement is a positive trend and more in line with the teachings found in the Book of Mormon.

In the book *The New Mormon Challenge* evangelical theologian Carl Mosser writes that neo-orthodox Mormons "promote an understanding of the relationship between works and grace that is openly modeled after noted evangelical pastor John MacArthur's expositions of 'Lordship salvation.'"[\[3\]](#) Mosser also argues that it is these neo-orthodox Mormon writers and

teachers who are influencing typical Mormons today rather than those who support a more traditional Mormon theology.

The result is a new Mormon synthesis that may cause the traditional Christian to ask himself, Have the Mormons returned to the historic orthodox Christian faith? In what follows we will highlight some of this new Mormon theology in order to help the reader decide how orthodox neo-orthodox Mormonism really is.

Recent Events and Historical Patterns

It was a bit of a shock recently when I discovered that Ravi Zacharias, a highly respected Christian apologist, had addressed a mixed crowd of Mormons and evangelicals at the Mormon Temple in Salt Lake City. Even more interesting is the fact that after his hour long discussion on the exclusivity of Christ, Zacharias received a standing ovation from the entire crowd. The apologist was introduced by Dr. Richard Mouw, president of Fuller Seminary. Dr. Mouw began his comments by saying "Let me state it clearly, We evangelicals have sinned against you . . ." He added that not every evangelical has sinned against Mormons, but he feels that too often we are guilty of misrepresenting what most Mormons believe and ignoring their pleas when they protest. He went on to argue that traditional Christians and Mormons have enough in common to profit from a dialogue. He explained that, "when my good friend [and Brigham Young University professor] Bob Millet says that his only plea when he gets to heaven is 'the mercy and merit of Jesus Christ,' I want to respond by saying with enthusiasm, 'Let's keep talking!'" Topped off with the music of Michael Card, this was a unique event. It had been over 100 years since the last evangelical spoke in the Temple; Dwight L. Moody preached there in 1871.

When considering the traditionally negative view that evangelical Christians have of Mormons, this kind of event can

be difficult to evaluate. Also challenging are the results of a recent George Barna survey that found 26% of those Mormons that participated were classified as “born again” by their responses. How can this be? Are all these Mormons being disingenuous regarding their true beliefs? Part of the answer lies in the fact that at any given moment there are more first generation converts within Mormonism than there are second generation. Since Mormon evangelism is primarily aimed at the Christian population, it is not surprising that many who attend Mormon worship services have carried with them a more traditional theology and are often there because of the youth programs and the accepting community that often exists within Mormon Wards.

But another part of the explanation is a movement within Mormon circles that began with the presidency of Ezra Taft Benson. It has called Mormons back to their roots by focusing more on the Bible and the Book of Mormon and away from the later writings of Joseph Smith. The leaders of this movement have worked hard to distance themselves from the more speculative thoughts and writings of past LDS authorities.

Many evangelicals are hoping that the Mormon Church will go through something similar to the recent changes in the Reorganized Latter Day Saints Church. This group was an early offshoot from the main LDS Church which never did accept many of the later writings of Smith. In recent years, its numbers have declined significantly because many have turned back towards a traditional evangelical theology.

The Mormon Neo-Orthodox Movement

Stephen Robinson is professor of ancient Scripture at Brigham Young University. He and Craig Blomberg, professor of New Testament at Denver Seminary, co-wrote the book “How Wide the Divide” which explores both the similarities and distance between evangelical and Mormon theology regarding revelation,

the nature of God, the person of Christ, and what one must do to be saved. Robinson passionately implores evangelicals to not give into a caricature of Mormon theology, one that few Mormons actually believe. He argues that there are legitimate reasons for misunderstanding between Mormons and evangelicals. They both use identical theological terms in different ways; in fact the LDS Church as a whole lacks a sophisticated theological language. Also, Mormonism's lack of professional clergy, creeds, catechisms, or theologians in the strict sense often contributes to the confusion.

In his book with Blomberg, Robinson complains that Mormons are chastised because they take the Bible too literally, actually believing everything in it that is written about God. He accuses evangelicals of accepting second and third century explanations of biblical truth that are dependent upon Greek philosophical thought rather than on what the Bible actually says. Both Blomberg and Robinson agree that the two sides hold to a very different description of God and humanity. But they also conclude that many of our differences are found in areas where the Bible is silent and where the Mormon canon has claimed to fill in the void with new revelation.

However, Robinson's greatest concern is that evangelicals take him and other Mormons seriously when they claim to believe certain things to be true. For instance, Robinson believes that "through the atonement of Christ, fallen humanity may be saved by accepting and obeying the gospel of Jesus Christ."[\[4\]](#) He also argues that Mormons believe in the God of the Bible, "the Eternal Father, and in God's Son, Jesus Christ, and in the Holy Ghost."[\[5\]](#) He adds that they accept the biblical description of God as three and also one, but not the post-New Testament attempts to explain how this can be reconciled.

It would be more than impolite to accuse Dr. Robinson of being less than genuine when he personally claims to believe something. However, he admits that there is much theological speculation within Mormon circles and that it can be difficult

to discover exactly what represents official Mormon doctrine.

Let's consider some specific examples of Dr. Robinson's beliefs and compare them to both traditional Mormon and Christian theology.

Robinson describes God as omniscient, omnipresent, infinite, eternal, and unchangeable. However, he also believes that God and man are of the same nature or species, and that God has a body of flesh and blood. He denies that this constitutes a finite theism, a charge often attributed to Mormons. Robinson also states that salvation is only acquired through grace by faith in Jesus Christ. He argues at length that Mormons do not believe that one can be justified by works in the eyes of a righteous and Holy God, but instead that works follow justification and conversion. He attributes evangelical claims that Mormons believe otherwise to confusion about Mormon terminology and a deficient desire to really understand what Mormons teach.

How do these theological positions compare with traditional Mormon thought? Is this a new or neo-orthodox Mormonism? Mormonism has always held that God has attained his position via a path of eternal progression, and comments to that effect by past Mormon leaders seem to conflict with Robinson's statements. For instance, when Mormon Apostle Orson Hyde said that God was once a child who rose step by step to be where he is today, it appears to contradict the idea of an unchangeable deity. Apostle John Widtsoe states the issue even more plainly. He says that God "must now be engaged in progressive development and infinite as God is, he must have been less powerful in the past than he is today."[\[6\]](#)

Robinson argues that there was once a time, before the beginning of our creation, that God was human. But he adds that any speculation about the events of that time is done so without support from the Bible or LDS literature. Robinson is different from earlier Mormons in being unwilling to speculate

on how, or even when God rose from a finite human to an infinite God, but he still believes that it happened.

Robinson's beliefs about God are dramatically different from traditional Christian, and I believe biblical, teachings. The Mormon god is contingent or dependent on matter rather than its creator. He is finite in the sense that there was a time when he was not God, no matter how long ago that might have been. He is obviously not the First Cause or only self-existent being. Even though Robinson refuses to speculate on the origin of God, Mormon views imply that God is the offspring of other Gods, leading to polytheism which the Bible calls idolatry. As God said through Isaiah long ago, "I am the LORD, and there is no other; apart from me there is no God." [\[7\]](#)

Are Mormons Christian?

Above we introduced ideas about salvation from the Mormon scholar Dr. Stephen Robinson, professor of Ancient Scriptures at Brigham Young University. He states that individuals are saved by accepting the gift God has provided in his perfect Son, Jesus Christ. Robinson believes that "If humans accept this gift and enter the gospel covenant by making Christ their Lord, they are justified of their sins, not by their own works and merits, but by the perfect righteousness of Jesus Christ accepted on their behalf." [\[8\]](#) He admits that the LDS Church is thoroughly Arminian, rejecting the Calvinist doctrine of eternal security, but that this shouldn't remove them from the sphere of biblical Christianity.

While not doubting that Dr. Robinson believes all this to be true, it is difficult to interpret Mormon doctrine in light of past statements by Mormon leaders and in Mormon writings. For instance, how do we interpret the Book of Mormon when it states "for we know that it is by grace we are saved, after all we can do"? [\[9\]](#) Or when Joseph Smith writes "We believe

that through the Atonement of Christ, all mankind may be saved, by obedience to the laws and ordinances of the Gospel”?[{10}](#) Even more disconcerting are statements made by Bruce McConkie, a popular Mormon writer. He writes that, “Repentance is a gift from God conferred upon those who earn the right to receive it. It comes by obedience to law.” And again, he writes, it is a gift “reserved for those who abide the law that entitles them to receive it.”[{11}](#) These statements point to an earned salvation based upon individuals fulfilling legalistic obligations, the kind of religion that Paul condemns in the book of Galatians.

Mormon teaching tools, such as the booklet *Gospel Principles*, also make statements that appear to contradict a gospel of grace. In a chapter titled “Freedom to Choose” the book states, “We began to make choices as spirit children in our Heavenly Father’s presence. Our choices there made us worthy to come to earth. Our heavenly Father wants us to grow in faith, power, knowledge, wisdom, and all other good things. If we keep his commandments and make right choices, we will learn and understand. We will become like him.”[{12}](#) Not only does this teach that salvation depends on works during this life, but also on works performed during a pre-existence as spirit beings.

In spite of the recent changes in Mormon theology, a person who holds to the full spectrum of Mormon teachings has a view of God, salvation, and particularly the relationship between mankind and its creator, that is radically different from what traditional Christians believe and what we think the Bible teaches. This is not a reason to stop talking with Mormons; in fact, it is why we need to continue to express the reasons for the hope that we have in Christ.

Mel Gibson's Passion Film Ignites Passions

The storm of controversy surrounding Mel Gibson's film about Jesus death has had many facets. Is the movie anti-Semitic? Too violent for kids? Would Gibsons Jesus get married?

Representatives of the Jewish Anti-Defamation League and the Simon Wiesenthal Center feared provocation of anti-Jewish feelings and violence. Prerelease screenings found warm response from leaders including Vatican officials and Billy Graham. Others remained skeptical.

Much of the controversy centers on two questions about the film and the history it depicts: Were Jewish people

responsible for Jesus death? And, if so, are all Jewish people thereby Christ killers? Anti-Semitism's ugly stains make certain fears understandable.

Raised as a Gentile in Miami, I had many Jewish friends. Miami's Jewish population exceeds that of many cities of Israel. My classmates talked of Hebrew school, synagogue, and bar mitzvahs. In school we sang Hanukkah songs and Christmas carols. My parents taught and modeled respect and tolerance. Anti-Semitism makes my blood boil.

After finding faith as a university student, I explored concerns about anti-Semitism in biblical accounts of Jesus death. Jesus was Jewish, as were his early followers. Jewish people who opposed him aligned against Jewish people who supported him. This was essentially a Jewish-Jewish conflict. One faction pressured Pilate, a Roman ruler, into executing Jesus.

Jewish leaders did not physically hang him on a cross; Roman executioners did that. But some Jewish people were part of the mix.

Should all Jewish people bear the guilt for Jesus execution? Of course not. Neither should all Germans bear guilt for the Holocaust nor all Christians for racism or anti-Semitism, pedophilia, corruption, or other outrageous acts of Christians. We all bear responsibility for our own decisions.

But there is another facet to the guilt question. After I spoke in a University of Miami anthropology class, one student asked if Jews are responsible for the death of Jesus. Absolutely, I replied. Jews are responsible for Jesus death. And so are Christians, Buddhists, Muslims, Hindus, atheists and agnostics.

Jesus said he came to help plug people into God, to give his life as a ransom for many. He believed his death would pay the price necessary to provide forgiveness for all who would

accept it, becoming a bridge linking them to eternity.

According to this perspective, we – all of us – and our flaws are the reason Jesus went to the cross. Are we guilty of physically executing him? No. Was it because of us that he suffered? By his reasoning, yes.

Gibson's film is significant. Of course, I brought my own biases to the screening. I left impressed with the terrible pain Jesus endured, especially poignant because I believe he endured it for me.

Rembrandt, the famous Dutch artist, painted a memorable depiction of the crucifixion. In it, several people help to raise the cross to which Jesus is nailed. Light emphasizes one particular face among the cross-raisers. The face is Rembrandt's, a self-portrait. The painter believed he himself was part of the reason Jesus died.

Gibson told the Associated Press, "I came to a difficult point in my life and meditating on Christ's sufferings, on his passion, got me through it." The Passion film and story are worth considering and discussing among friends of any faith or of no faith.

7 Questions Skeptics Ask About the Validity of Christianity

Rusty Wright considers some common questions skeptics ask about our belief in Christianity. He shows us how to answer

these questions from an informed biblical worldview.

Questions of Faith

Picture the scene. You're discussing your faith with a coworker or neighbor, perhaps over lunch or coffee. You explain your beliefs but your friend questions:

How could a loving God allow evil and suffering? The Bible is full of contradictions. What about people who've never heard of Jesus?

How do you feel about these questions and objections? Anxious? Confused? Defensive? Combative?

Sensitively and appropriately answering questions that skeptics ask you can be an important part of helping them to consider Jesus. Peter told us, "In your hearts set apart Christ as Lord. Always be prepared to give an answer to everyone who asks you to give the reason for the hope that you have. But do this with gentleness and respect."[\[1\]](#) This series looks at seven common questions skeptics ask and gives you some pointers on how to respond. Consider first a story.

As the flight from Chicago to Dallas climbed in the sky, I became engrossed in conversation with the passenger to my left. "Aimee," a French businesswoman, asked me about my work. On learning I was a Christian communicator, she related that a professing Christian had signed a contract with her, attempted to lead her to Christ, then later deceitfully undercut her. "How could a Christian do such a thing?" she asked.

I told her that Christians weren't perfect, that some fail miserably, that many are honest and caring, but that it is Jesus we ultimately trust. Aimee asked question after question: "How can you believe the Bible?" "Why do Christians say there is only one way to God?" "How does one become a Christian?"

I tried to answer her concerns tactfully and explained the message of grace as clearly as I could. Stories I told of personal pain seemed to open her up to consider God's love for her. She did not come to Christ in that encounter, but she seemed to leave it with a new understanding.

Hurting people everywhere need God. Many are open to considering Him, but they often have questions they want answered before they are willing to accept Christ. As Christian communicators seek to blend grace with truth,[{2}](#) an increasing number of skeptics may give an ear and become seekers or believers.

As you interact with skeptics, compliment them where you can. Jesus complimented the skeptical Nathanael for his pursuit of truth.[{3}](#) Listen to their concerns. Your listening ear speaks volumes. It may surprise you to learn that your attitude can be just as important as what you know.

Dealing with Objections

How do you deal with questions and objections to faith that your friends may pose?

When I was a skeptical student, my sometimes-relentless questions gave my Campus Crusade for Christ friends at Duke University plenty of practice! I wanted to know if Christianity was true. After trusting Christ as Savior, I still had questions.

Bob Prall, the local Campus Crusade director, took interest in me. At first his answers irritated me, but as I thought them through they began to make sense. For two years I followed him around campus, watching him interact. Today, as I am privileged to encounter inquisitive people around the globe, much of my speech and manner derive from my mentor.

Consider some guidelines. Pray for wisdom, for His love for inquirers[{4}](#) and for your questioner's heart. If appropriate,

briefly share the gospel first. The Holy Spirit may draw your friends to Christ. Don't push, though. It may be best to answer their questions first.

Some questions may be intellectual smokescreens. Once a Georgia Tech philosophy professor peppered me with questions, which I answered as best I could.

Then I asked him, "If I could answer all your questions to your satisfaction, would you put your life in Jesus' hands?" His reply: "[Expletive deleted] no!"

Okay. This first objection is one you might have heard:

1. It doesn't matter what you believe as long as you are sincere.

I once gave a speech arguing *for* this proposition. Later, I reconsidered. In the 1960s, many women took the drug thalidomide seeking easier pregnancies. Often they delivered deformed babies. Sincerely swallowing two white pills may cure your headache if the pills are aspirin. If they are roach poison, results may differ.

After discussing this point, a widely respected psychologist told me, "I guess a person could be sincere in what he or she believed, but be sincerely wrong." Ultimately faith is only as valid as its object. Jesus demonstrated by His life, death and resurrection that He is a worthy object for faith.[\[5\]](#)

Focus on Jesus. Bob Prall taught me to say, "I don't have answers to every question. But if my conclusion about Jesus is wrong, I have a bigger problem. What do I do with the evidence for His resurrection, His deity and the prophecies He fulfilled? And what do I do with changed lives, including my own?"

I don't have complete answers to every concern you will encounter, but in what follows I'll outline some short

responses that might be useful.

The second question is:

2. Why is there evil and suffering?

Sigmund Freud called religion an illusion that humans invent to satisfy their security needs. To him, a benevolent, all-powerful God seemed incongruent with natural disasters and human evil.

God, though sovereign, gave us freedom to follow Him or to disobey Him. Oxford scholar C.S. Lewis estimated that eighty percent of human suffering stems from human choice. Lewis called pain “God’s megaphone” that alerts us to our need for Him.[{6}](#) This response does not answer all concerns (because God sometimes does intervene to thwart evil) but it suggests that the problem of evil is not as great an intellectual obstacle to belief as some imagine.

Pain’s emotional barrier to belief, however, remains formidable. When I see God, items on my long list of questions for Him will include a painful and unwanted divorce, betrayal by trusted coworkers, and all sorts of disappointing human behavior and natural disasters. Yet in Jesus’ life, death, and resurrection[{7}](#) I have seen enough to trust Him when He says He “causes all things to work together for good to those who love God.”[{8}](#)

3. What about those who never hear of Jesus?

Moses said, “The secret things belong to the LORD.”[{9}](#) Some issues may remain mysteries. God’s perfect love and justice far exceed our own. Whatever He decides will be loving and fair. One can make a case that God will make the necessary information available to someone who wants to know Him. An example: Cornelius, a devout military official. The New Testament records that God assigned Peter to tell him about Jesus.[{10}](#)

A friend once told me that many asking this question seek a personal loophole, a way so they won't need to believe in Christ. That statement angered me, but it also described me. C.S. Lewis in *Mere Christianity* wrote, "If you are worried about the people outside [of faith in Christ], the most unreasonable thing you can do is to remain outside yourself."[{11}](#) If Christianity is true, the most logical behavior for someone concerned about those without Christ's message would be to trust Christ and go tell them about Him.

Here's a tip: When someone asks you a difficult question, if you don't know the answer, admit it. Many skeptics appreciate honesty. Don't bluff. It's dishonest and often detectable.

4. What about all the contradictions in the Bible?

Ask your questioner for specific examples of contradictions. Often people have none, but rely on hearsay. If there is a specific example, consider these guidelines as you respond.

Omission does not necessarily create contradiction. Luke, for example, writes of two angels at Jesus' tomb after the Resurrection.[{12}](#) Matthew mentions "an angel."[{13}](#) Is this a contradiction? If Matthew stated that only one angel was present, the accounts would be dissonant. As it stands, they can be harmonized.

Differing accounts aren't necessarily contradictory. Matthew and Luke, for example, differ in their accounts of Jesus' birth. Luke records Joseph and Mary starting in Nazareth, traveling to Bethlehem (Jesus' birthplace), and returning to Nazareth.[{14}](#) Matthew starts with Jesus' birth in Bethlehem, relates the family's journey to Egypt to escape King Herod's rage, and recounts their travel to Nazareth after Herod's death.[{15}](#) The Gospels never claim to be exhaustive records. Biographers must be selective. The accounts seem complementary, not contradictory.

Time precludes more complex examples here. But time and again,

supposed biblical problems fade in light of logic, history, and archaeology. The Bible's track record under scrutiny argues for its trustworthiness.

5. Isn't Christianity just a psychological crutch?

My mentor Bob Prall has often said, "If Christianity is a psychological crutch, then Jesus Christ came because there was an epidemic of broken legs." Christianity claims to meet real human needs such as those for forgiveness, love, identity and self-acceptance. We might describe Jesus not as a crutch but an iron lung, essential for life itself.

Christian faith and its benefits can be described in psychological terms but that does not negate its validity. "Does it work?" is not the same question as, "Is it true?" Evidence supports Christianity's truthfulness, so we would expect it to work in individual lives, as millions attest.

A caution as you answer questions: Don't offer "proof" but rather evidences for faith. "Proof" can imply an airtight case, which you don't have. Aim for certainty "beyond a reasonable doubt," just as an attorney might in court.

Don't quarrel. Lovingly and intelligently present evidence to willing listeners, not to win arguments but to share good news. Be kind and gentle.[{16}](#) Your life and friendship can communicate powerfully.

6. How can Jesus be the only way to God?

When I was in secondary school, a recent alumnus visited, saying he had found Christ at Harvard. I respected his character and tact and listened intently. But I could not stomach Jesus' claim that "I am the way, and the truth, and the life; no one comes to the Father but through Me."[{17}](#) That seemed way too narrow.

Two years later, my spiritual and intellectual journey had

changed my view. The logic that drew me (reluctantly) to his position involves three questions:

- *If God exists, could there be only one way to reach Him?* To be open-minded, I had to admit this possibility.
- *Why consider Jesus as a candidate for that possible one way?* He claimed it. His plan of rescuing humans – “by grace...through faith...not...works”[{18}](#) was distinct from those requiring works, as many other religions do. These two kinds of systems were mutually exclusive. Both could be false or either could be true, but both could not be true.
- *Was Jesus’ plan true?* Historical evidence for His resurrection, fulfilled prophecy[{19}](#) and deity, and for the reliability of the New Testament[{20}](#) convinced me I could trust His words.

One more common objection:

7. I could never take the blind leap of faith that believing in Christ requires.

We exercise faith every day. Few of us comprehend everything about electricity or aerodynamics, but we have evidence of their validity. Whenever we use electric lights or airplanes, we exercise faith – not blind faith, but faith based on evidence. Christians act similarly. The evidence for Jesus is compelling, so one can trust Him on that basis.

As you respond to inquirers, realize that many barriers to faith are emotional rather than merely intellectual.

As a teenager, I nearly was expelled from secondary school for some problems I helped create. In my pain and anger I wondered, “Why would God allow this to happen?” I was mad at God! In retrospect, I realize I was blaming Him for my own bad choices. My personal anguish at the time kept me from seeing that.

Your questioners may be turned off because Christians haven't acted like Jesus. Maybe they're angry at God because of personal illness, a broken relationship, a loved one's death, or personal pain. Ask God for patience and love as you seek to blend grace with truth. He may use you to help skeptics become seekers and seekers become His children. I hope He does.

Cultural Relativism

Kerby Anderson presents the basics of cultural relativism and evaluates it from a Christian worldview perspective. Comparing the tenets of cultural relativism to a biblical view of ethics shows how these popular ideas fail the reasonableness test.

This article is also available in [Spanish](#).

John Dewey

Any student in a class on anthropology cannot help but notice the differences between various cultures of the world. Differences in dress, diet, and social norms are readily apparent. Such diversity in terms of ethics and justice are also easily seen and apparently shaped by the culture in which we live.

If there is no transcendent ethical standard, then often culture becomes the ethical norm for determining whether an action is right or wrong. This ethical system is known as *cultural relativism*.^[1] Cultural relativism is the view that all ethical truth is relative to a specific culture. Whatever a cultural group approves is considered right within that culture. Conversely, whatever a cultural group condemns is wrong.

The key to cultural relativism is that right and wrong can only be judged relative to a specified society. There is no ultimate standard of right and wrong by which to judge culture.

A famous proponent of this view was John Dewey, often considered the father of American education. He taught that moral standards were like language and therefore the result of custom. Language evolved over time and eventually became organized by a set of principles known as grammar. But language also changes over time to adapt to the changing circumstances of its culture.

Likewise, Dewey said, ethics were also the product of an evolutionary process. There are no fixed ethical norms. These are merely the result of particular cultures attempting to organize a set of moral principles. But these principles can

also change over time to adapt to the changing circumstances of the culture.

This would also mean that different forms of morality evolved in different communities. Thus, there are no universal ethical principles. What may be right in one culture would be wrong in another culture, and vice versa.

Although it is hard for us in the modern world to imagine, a primitive culture might value genocide, treachery, deception, even torture. While we may not like these traits, a true follower of cultural relativism could not say these are wrong since they are merely the product of cultural adaptation.

Clifford Gertz argued that culture must be seen as “webs of meaning” within which humans must live.^{2} Gertz believed that “Humans are shaped exclusively by their culture and therefore there exists no unifying cross-cultural human characteristics.”^{3}

As we will see, cultural relativism allows us to be tolerant toward other cultures, but it provides no basis to judge or evaluate other cultures and their practices.

William Graham Sumner

A key figure who expanded on Dewey’s ideas was William Graham Sumner of Yale University. He argued that what our conscience tells us depends solely upon our social group. The moral values we hold are not part of our moral nature, according to Sumner. They are part of our training and upbringing.

Sumner argued in his book, *Folkways*: “World philosophy, life policy, right, rights, and morality are all products of the folkways.”^{4} In other words, what we perceive as conscience is merely the product of culture upon our minds through childhood training and cultural influence. There are no universal ethical principles, merely different cultural conditioning.

Sumner studied all sorts of societies (primitive and advanced), and was able to document numerous examples of cultural relativism. Although many cultures promoted the idea, for example, that a man could have many wives, Sumner discovered that in Tibet a woman was encouraged to have many husbands. He also described how some Eskimo tribes allowed deformed babies to die by being exposed to the elements. In the Fiji Islands, aged parents were killed.

Sumner believed that this diversity of moral values clearly demonstrated that culture is the sole determinant of our ethical standards. In essence, culture determines what is right and wrong. And different cultures come to different ethical conclusions.

Proponents of cultural relativism believe this cultural diversity proves that culture alone is responsible for our morality. There is no soul or spirit or mind or conscience. Moral relativists say that what we perceive as moral convictions or conscience are the byproducts of culture.

The strength of cultural relativism is that it allows us to withhold moral judgments about the social practices of another culture. In fact, proponents of cultural relativism would say that to pass judgment on another culture would be ethnocentric.

This strength, however, is also a major weakness. Cultural relativism excuses us from judging the moral practices of another culture. Yet we all feel compelled to condemn such actions as the Holocaust or ethnic cleansing. Cultural relativism as an ethical system, however, provides no foundation for doing so.

Melville Herskovits

Melville J. Herskovits wrote in *Cultural Relativism*: “Judgments are based on experience, and experience is

interpreted by each individual in terms of his own enculturation.”^{5} In other words, a person’s judgment about what is right and wrong is determined by their cultural experiences. This would include everything from childhood training to cultural pressures to conform to the majority views of the group. Herskovits went on to argue that even the definition of what is normal and abnormal is relative to culture.

He believed that cultures were flexible, and so ethical norms change over time. The standard of ethical conduct may change over time to meet new cultural pressures and demands. When populations are unstable and infant mortality is high, cultures value life and develop ethical systems to protect it. When a culture is facing overpopulation, a culture redefines ethical systems and even the value of life. Life is valuable and sacred in the first society. Mercy killing might become normal and acceptable in the second society.

Polygamy might be a socially acceptable standard for society. But later, that society might change its perspective and believe that it is wrong for a man to have more than one wife. Herskovits believed that whatever a society accepted or rejected became the standard of morality for the individuals in that society.

He believed that “the need for a cultural relativistic point of view has become apparent because of the realization that there is no way to play this game of making judgment across cultures except with loaded dice.”^{6} Ultimately, he believed, culture determines our moral standards and attempting to compare or contrast cultural norms is futile.

In a sense, the idea of cultural relativism has helped encourage such concepts as multiculturalism and postmodernism. After all, if truth is created not discovered, then all truths created by a particular culture are equally true. This would mean that cultural norms and institutions should be considered

equally valid if they are useful to a particular group of people within a culture.

And this is one of the major problems with a view of cultural relativism: you cannot judge the morality of another culture. If there is no objective standard, then someone in one culture does not have a right to evaluate the actions or morality of another culture. Yet in our hearts we know that certain things like racism, discrimination, and exploitation are wrong.

Evolutionary Ethics

Foundational to the view of cultural relativism is the theory of evolution. Since social groups experience cultural change with the passage of time, changing customs and morality evolve differently in different places and times.

Anthony Flew, author of *Evolutionary Ethics*, states his perspective this way: "All morals, ideas and ideals have been originated in the world; and that, having thus in the past been subject to change, they will presumably in the future too, for better or worse, continue to evolve."[\[7\]](#) He denies the existence of God and therefore an objective, absolute moral authority. But he also believes in the authority of a value system.

His theory is problematic because it does not adequately account for the origin, nature, and basis of morals. Flew suggests that morals somehow originated in this world and are constantly evolving.

Even if we concede his premise, we must still ask, Where and when did the first moral value originate? Essentially, Flew is arguing that a value came from a non-value. In rejecting the biblical idea of a Creator whose character establishes a moral standard for values, Flew is forced to attempt to derive an *ought* from an *is*.

Evolutionary ethics rests upon the assumption that values are

by nature constantly changing or evolving. It claims that it is of value that values are changing. But is *this* value changing?

If the answer to this question is no, then that would mean that moral values don't have to always change. And if that is the case, then there could be unchanging values (known as absolute standards). However, if the value that values change is itself unchanging, then the view is self-contradictory.

Another form of evolutionary ethics is *sociobiology*. E. O. Wilson of Harvard University is a major advocate of sociobiology, and claims that scientific materialism will eventually replace traditional religion and other ideologies.[{8}](#)

According to sociobiology, human social systems have been shaped by an evolutionary process. Human societies exist and survive because they work and because they have worked in the past.

A key principle is the reproductive imperative.[{9}](#) The ultimate goal of any organism is to survive and reproduce. Moral systems exist because they ultimately promote human survival and reproduction.

Another principle is that all behavior is selfish at the most basic level. We love our children, according to this view, because love is an effective means of raising effective reproducers.

At the very least, sociobiology is a very cynical view of human nature and human societies. Are we really to believe that all behavior is selfish? Is there no altruism?

The Bible and human experience seem to strongly contradict this. Ray Bohlin's [article](#) on the Probe Web site provides a detailed refutation of this form of evolutionary ethics.[{10}](#)

Evaluating Cultural Relativism

In attempting to evaluate cultural relativism, we should acknowledge that we could indeed learn many things from other cultures. We should never fall into the belief that our culture has all the answers. No culture has a complete monopoly on the truth. Likewise, Christians must guard against the assumption that their Christian perspective on their cultural experiences should be normative for every other culture.

However, as we have already seen, the central weakness of cultural relativism is its unwillingness to evaluate another culture. This may seem satisfactory when we talk about language, customs, even forms of worship. But this non-judgmental mindset breaks down when confronted by real evils such as slavery or genocide. The Holocaust, for example, cannot be merely explained away as an appropriate cultural response for Nazi Germany.

Cultural relativism faces other philosophical problems. For example, it is insufficient to say that morals originated in the world and that they are constantly changing. Cultural relativists need to answer how value originated out of non-value. How did the first value arise?

Fundamental to cultural relativism is a belief that values change. But if the value that values change is itself unchanging, then this theory claims an unchanging value that all values change and evolve. The position is self-contradictory.

Another important concern is conflict. If there are no absolute values that exist trans-culturally or externally to the group, how are different cultures to get along when values collide? How are we to handle these conflicts?

Moreover, is there ever a place for courageous individuals to

challenge the cultural norm and fight against social evil? Cultural relativism seems to leave no place for social reformers. The abolition movement, the suffrage movement, and the civil rights movement are all examples of social movements that ran counter to the social circumstances of the culture. Abolishing slavery and providing rights to citizens are good things even if they were opposed by many people within society.

The Bible provides a true standard by which to judge attitudes and actions. Biblical standards can be used to judge individual sin as well as corporate sin institutionalized within a culture.

By contrast, culture cannot be used to judge right and wrong. A changing culture cannot provide a fixed standard for morality. Only God's character, revealed in the Bible provides a reliable measure for morality.

American Government and Christianity – A Biblical Worldview Perspective

Kerby Anderson looks at how a Christian, biblical framework operated as a critical force in establishing our constitution and governmental system. The founders views on the nature of man and the role of government were derived from their biblical foundation.

America's Christian Roots

The founding of this country as well as the framing of the key political documents rests upon a Christian foundation. That doesn't necessarily mean that the United States is a Christian nation, although some framers used that term. But it does mean that the foundations of this republic presuppose a Christian view of human nature and God's providence.

In previous articles we have discussed “The Christian Roots of the Declaration and Constitution” [on the Web as [“The Declaration and the Constitution: Their Christian Roots”](#)] and provided an overview of the books [On Two Wings](#) and [One Nation Under God](#). Our focus in this article will be to pull together many of the themes of these resources and combine them with additional facts and quotes from the founders.

First, what was the perspective of the founders of America? Consider some of these famous quotes.

John Adams was the second president of the United States. He saw the need for religious values to provide the moral base line for society. He stated in a letter to the officers of the First Brigade of the Third Division of the Militia of Massachusetts:

We have no government armed with power capable of contending with human passions unbridled by morality and religion. Avarice, ambition, revenge, or gallantry, would break the strongest cords of our Constitution as a whale goes through a net. Our Constitution was made only for a moral and religious people. It is wholly inadequate to the government of any other. [{1}](#)

In fact, John Adams wasn’t the only founding father to talk about the importance of religious values. Consider this statement from George Washington during his Farewell Address:

And let us with caution indulge the supposition, that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect that national morality can prevail in exclusion of religious principle. [{2}](#)

Two hundred years after the establishment of the Plymouth

colony in 1620, Americans gathered at that site to celebrate its bicentennial. Daniel Webster was the speaker at this 1820 celebration. He reminded those in attendance of this nation's origins:

Let us not forget the religious character of our origin. Our fathers were brought hither by their high veneration for the Christian religion. They journeyed by its light, and labored in its hope. They sought to incorporate its principles with the elements of their society, and to diffuse its influence through all their institutions, civil, political, or literary.[*{3}*](#)

Religion, and especially the Christian religion, was an important foundation to this republic.

Christian Character

It is clear that the framers of this new government believed that the people should elect and support leaders with character and integrity. George Washington expressed this in his Farewell Address when he said, "Of all the dispositions and habits which lead to political prosperity, Religion and Morality are indispensable supports."

Benjamin Rush talked about the religious foundation of the republic that demanded virtuous leadership. He said that, "the only foundation for a useful education in a republic is to be laid on the foundation of religion. Without this there can be no virtue, and without virtue there can be no liberty, and liberty is the object and life of all republican governments."[*{4}*](#)

He went on to explain that

A Christian cannot fail of being a republican . . . for every precept of the Gospel inculcates those degrees of humility, self- denial, and brotherly kindness which are directly

opposed to the pride of monarchy. . . . A Christian cannot fail of being useful to the republic, for his religion teaches him that no man "liveth to himself." And lastly a Christian cannot fail of being wholly inoffensive, for his religion teaches him in all things to do to others what he would wish, in like circumstances, they should do to him.[{5}](#)

Daniel Webster understood the importance of religion, and especially the Christian religion, in this form of government. In his famous Plymouth Rock speech of 1820 he said,

Lastly, our ancestors established their system of government on morality and religious sentiment. Moral habits, they believed, cannot safely be trusted on any other foundation than religious principle, nor any government be secure which is not supported by moral habits. . . .Whatever makes men good Christians, makes them good citizens.[{6}](#)

John Jay was one of the authors of the Federalist Papers and became America's first Supreme Court Justice. He also served as the president of the American Bible Society. He understood the relationship between government and Christian values. He said, "Providence has given to our people the choice of their rulers, and it is the duty, as well as the privilege and interest of our Christian nation to select and prefer Christians for their rulers."[{7}](#)

William Penn writing the *Frame of Government* for his new colony said, "Government, like clocks, go from the motion men give them; and as governments are made and moved by men, so by them they are ruined too. Wherefore governments rather depend upon men, than men upon governments. Let men be good, and the government cannot be bad."[{8}](#)

The founders believed that good character was vital to the health of the nation.

New Man

Historian C. Gregg Singer traces the line of influence from the seventeenth century to the eighteenth century in his book, *A Theological Interpretation of American History*. He says,

Whether we look at the Puritans and their fellow colonists of the seventeenth century, or their descendants of the eighteenth century, or those who framed the Declaration of Independence and the Constitution, we see that their political programs were the rather clear reflection of a consciously held political philosophy, and that the various political philosophies which emerged among the American people were intimately related to the theological developments which were taking place. . . . A Christian world and life view furnished the basis for this early political thought which guided the American people for nearly two centuries and whose crowning lay in the writing of the Constitution of 1787.[{9}](#)

Actually, the line of influence extends back even further. Historian Arnold Toynbee, for example, has written that the American Revolution was made possible by American Protestantism. Page Smith, writing in the *Religious Origins of the American Revolution*, cites the influence of the Protestant Reformation. He believes that

The Protestant Reformation produced a new kind of consciousness and a new kind of man. The English Colonies in America, in turn, produced a new unique strain of that consciousness. It thus follows that it is impossible to understand the intellectual and moral forces behind the American Revolution without understanding the role that Protestant Christianity played in shaping the ideals, principles and institutions of colonial America.[{10}](#)

Smith argues that the American Revolution “started, in a

sense, when Martin Luther nailed his 95 theses to the church door at Wittenburg.” It received “its theological and philosophical underpinnings from John Calvin’s *Institutes of the Christian Religion* and much of its social theory from the Puritan Revolution of 1640-1660.{11}

Most people before the Reformation belonged to classes and social groups which set the boundaries of their worlds and established their identities. The Reformation, according to Smith, changed these perceptions. Luther and Calvin, in a sense, created a re- formed individual in a re-formed world.

Key to this is the doctrine of the priesthood of the believer where each person is “responsible directly to God for his or her own spiritual state... The individuals who formed the new congregations established their own churches, chose their own ministers, and managed their own affairs without reference to an ecclesiastical hierarchy.”{12}

These re-formed individuals began to change their world including their view of government and authority.

Declaration of Independence

Let’s look at the Christian influence on the Declaration of Independence. Historian Page Smith points out that Thomas Jefferson was not only influenced by secular philosophers, but was also influenced by the Protestant Reformation. He says,

Jefferson and other secular-minded Americans subscribed to certain propositions about law and authority that had their roots in the Protestant Reformation. It is a scholarly common-place to point out how much Jefferson (and his fellow delegates to the Continental Congress) were influenced by Locke. Without disputing this we would simply add that an older and deeper influence – John Calvin – was of more profound importance.{13}

Another important influence was William Blackstone. Jefferson drew heavily on the writings of this highly respected jurist. In fact, Blackstone's *Commentaries on the Laws of England* were among Jefferson's most favorite books.

In his section on the "Nature of Laws in General," Blackstone wrote, "as man depends absolutely upon his Maker for everything, it is necessary that he should, in all points, conform to his Maker's will. This will of his Maker is called the law of nature."[{14}](#)

In addition to the law of nature, the other source of law is from divine revelation. "The doctrines thus delivered we call the revealed or divine law, and they are to be found only in the Holy Scriptures." According to Blackstone, all human laws depended either upon the law of nature or upon the law of revelation found in the Bible: "Upon these two foundations, the law of nature and the law of revelation, depend all human laws."[{15}](#)

Samuel Adams argues in "The Rights of the Colonists" that they had certain rights. "Among the natural Rights of the Colonists are these: First, a Right to Life; second, to Liberty; third, to Property; . . . and in the case of intolerable oppression, civil or religious, to leave the society they belong to, and enter into another. When men enter into society, it is by voluntary consent."[{16}](#) This concept of natural rights also found its way into the Declaration of Independence and provided the justification for the American Revolution.

The Declaration was a bold document, but not a radical one. The colonists did not break with England for "light and transient causes." They were mindful that they should be "in subjection to governing authorities" which "are established by God" (Rom. 13:1). Yet when they suffered from a "long train of abuses and usurpations," they believed that "it is the right of the people to alter or abolish [the existing government] and to institute a new government."

Constitution

The Christian influence on the Declaration is clear. What about the Constitution?

James Madison was the chief architect of the Constitution as well as one of the authors of the *Federalist Papers*. It is important to note that as a youth, he studied under a Scottish Presbyterian, Donald Robertson. Madison gave the credit to Robertson for “all that I have been in life.”[{17}](#) Later he was trained in theology at Princeton under the Reverend John Witherspoon. Scholars believe that Witherspoon’s Calvinism (which emphasized the fallen nature of man) was an important source for Madison’s political ideas.[{18}](#)

The Constitution was a contract between the people and had its origins in American history a century earlier:

One of the obvious by-products [of the Reformation] was the notion of a contract entered into by two people or by the members of a community amongst themselves that needed no legal sanctions to make it binding. This concept of the Reformers made possible the formation of contractals or, as the Puritans called them, “covenanted” groups formed by individuals who signed a covenant or agreement to found a community. The most famous of these covenants was the Mayflower Compact. In it the Pilgrims formed a “civil body politic,” and promised to obey the laws their own government might pass. In short, the individual Pilgrim invented on the spot a new community, one that would be ruled by laws of its making.[{19}](#)

Historian Page Smith believes, “The Federal Constitution was in this sense a monument to the reformed consciousness. This new sense of time as potentiality was a vital element in the new consciousness that was to make a revolution and, what was a good deal more difficult, form a new nation.”[{20}](#)

Preaching and teaching within the churches provided the justification for the revolution and the establishment of a new nation. Alice Baldwin, writing in *The New England Clergy and the American Revolution*, says,

The teachings of the New England ministers provide one line of unbroken descent. For two generations and more New Englanders had . . . been taught that these rights were sacred and came from God and that to preserve them they had a legal right of resistance and, if necessary a right to . . . alter and abolish governments and by common consent establish new ones.[{21}](#)

Christian ideas were important in the founding of this republic and the framing of our American governmental institutions. And I believe they are equally important in the maintenance of that republic.

“What Do You Say When People Call Christians Hypocrites?”

I was just wondering... when people call Christians hypocrites, what is a good response? Isn't everyone a hypocrite in one way or another? I mean, I TRY not to be one, but like all humans, I mess up. Thankfully I am a Christian and have God's forgiveness. What is a quick reply that I can give people who accuse me of hypocrisy?

That is a tough accusation, for sure. Too bad it's so often accurate.

I would agree with the person that many Christians are indeed hypocrites, and it saddens God greatly. But you might remark that the church is supposed to be a hospital for sick people, not a museum for perfect people.

Sometimes, the “Christians are hypocrites” charge is nothing but a smokescreen, which is why I would ask if they have any personal experience with it, or if it's just something they've heard and they're using it to keep distance between themselves and Christians. Or, more accurately, between themselves and God.

If someone were to make that comment to me, I would respond with, “Is that something you've just heard, or have you had a personal experience with someone in a church who hurt you?” I'd try to find out the heart of the matter. Sometimes people just need for someone to know and acknowledge that they were hurt by a Christian who brought dishonor to the name of Christ, and they would appreciate a compassionate and regretful response. I have been able to say, “I am so sorry you had to experience that. So is God.”

I would also ask, in humility, “Have I done anything to make you see hypocrisy in me that I need to ask forgiveness for?”

And then be prepared to LISTEN to the answer!

Hope this helps!

Islam and Christianity: Common Misconceptions Reveal Their Stark Differences

Muslims and Christians often misunderstand what the other actually believes about God and salvation. Don Closson attempts to clear up some of these misconceptions.

This article is also available in [Spanish](#).

In a recent meeting of evangelical leaders, anti-Islamic comments made by Christians in the Western media were denounced as “dangerous” and “unhelpful.” Ted Haggard, President of the National Association of Evangelicals stated that “Since we are in a global community, no doubt about it, we must temper our speech and we must communicate primarily through actions.”^{1} Another prominent president of a Christian relief agency added that “It’s very dangerous to build more barriers when we’re supposed to be following [the] one who pulled the barriers down,” an obvious reference to the sacrificial death of Christ. They also concluded that it was “nave” to merely dialogue “with Muslims in a way that minimized theological and political differences.”^{2}

So what kind of exchange of ideas is helpful between

Christians and Muslims? We might start by beginning to clear up some of the common misconceptions that each hold about the other. This has become more important recently due to heightened religious passions since 9/11 and the war in Iraq. Muslims, both here in America and abroad, are highly suspicious of America's intentions in the world and some Americans see every Muslim as a potential terrorist who threatens our freedom and democracy. There are obviously reasons behind both of these perceptions. America does tend to favor Israel over its Arab neighbors, and Muslims have committed atrocities against civilians around the world, but this only means that we must work harder at communicating clearly with Muslims when we have opportunity. The over one billion Muslims in the world constitute a large part of the mission field given to us by the Lord's Great Commission. We cannot turn away from them simply because of the difficulties we face.

That said, we need to realize that both Muslims and Christians hold to ideas about the other that are either completely wrong or merely too broadly applied. Some of these misconceptions are cultural issues and some are theological. Culturally, there are significant differences in how Islam and Christianity relate to society and government. Gender roles are also a source of confusion. Theologically, there is much to clarify regarding the respective roles of Jesus and Muhammad in each religious tradition. There is also misunderstanding regarding the origins and transmission of the sacred texts, the Koran and the Bible. Although the religions share commonalities—one God, the reality of a spiritual dimension, a universal moral order, and a final judgment—Islam and Christianity differ significantly in the details and in the most crucial issue of how one is justified before God.

Jesus and Muhammad

Let's look at some common misconceptions that people have

about Islam and Christianity, beginning with how people often confuse the roles that Jesus and Muhammad play in their respective traditions.

Christians often make the mistake of equating the place that Muhammad has in Islam with the role played by Jesus in Christianity. Although Muslims believe that Muhammad is the final prophet from Allah, most do not teach that he was sinless. On the other hand, Muslims see Muhammad's life and example as near to perfection as one can get. One Muslim scholar has noted, "Know that the key to happiness is to follow the sunna [Muhammad's actions] and to imitate the Messenger of God in all his coming and going, his movement and rest, in his way of eating, his attitude, his sleep and his talk..."[\[3\]](#) Every action of Muhammad is considered a model for believers. Some Muslims even avoid eating food that Muhammad disdained. At the same time, Muslims are offended at the term "Mohammedanism" sometimes used as a reference to Islam. It is not Muhammad's religion; he is only a messenger of Allah. Muslims believe that Muhammad's messages revived and reformed religious truth that had been lost.

Even so, any disparaging words aimed at Muhammad will be taken very seriously by a Muslim. As William Cantrell Smith once said, "Muslims will allow attacks on Allah: there are atheists and atheistic publications, and rationalistic societies; but to disparage Muhammad will provoke from even the most 'liberal' sections of the community a fanaticism of blazing vehemence."[\[4\]](#)

Muslims accuse Christians of elevating Jesus in an inappropriate manner. They argue that Jesus was just a prophet to the Jews, and that he heralded the coming of Muhammad as the seal of the prophets. The problem with this view is that it doesn't fit the earliest historical data we have regarding the life and teachings of Christ. There is considerable manuscript evidence for the authenticity and early date of the New Testament. In these early manuscripts, Jesus claims to

have the powers and authority that only God could possess. These teachings and events were recorded by eyewitnesses or by second generation Christians like Luke who was a close companion to Paul.

What is missing is an early text that affirms what Muslims claim about Jesus. Muslims argue that the New Testament has been corrupted and that texts supporting the idea that Jesus is the Son of God were a later addition. But again, the burden of proof for this accusation is one the Muslim apologist must bear. However, they do not provide any evidence for when or where the early manuscripts became corrupted. Muslims argue that the New Testament depiction of Christ and of his death and resurrection cannot be correct because the Koran teaches otherwise. Although Christians affirm the importance and authority of revelation, true revelation will be confirmed by history.

The Bible and the Koran

There is an inherent problem when we consider the nature and content of the Bible and the Koran. Both traditions claim that their book is the result of divine revelation, and both maintain that their books have been preserved through the centuries with a high degree of accuracy. For instance, when touring a local Islamic center, I was told by the guide that the modern Koran contains the exact words given by Muhammad to his followers with absolutely no mistakes. Christians maintain that the Bible we possess is 99% accurate and has benefited from over 100 years of textual criticism and the possession of thousands of early manuscripts. The problem is that the Koran and the Bible make contradictory truth claims about the life and ministry of Jesus Christ and what God expects from those who love and follow Him.

The Islamic view of the Bible is complicated by the fact that the Koran tells Muslims to accept both the Hebrew Scriptures and the "*Injil*," or the gospel of Jesus, and even calls the

“Book,” or Bible, the “word of God” in Sura 6:114-115.[\[5\]](#) On the other hand, Muslim apologists argue that both the Old and New Testaments have been corrupted and contain little if any truth about God and His people. They contend that a lost gospel of Jesus has been replaced with Matthew, Mark, Luke, and John.

This view contains a number of problems. The Koran calls the Bible the word of God, and acknowledges that it is a revelation from God. It also teaches that Jesus was a prophet and that his teaching has authority. Finally, when the Koran was given by Muhammad it supported the New Testament of Muhammad’s time by telling Muslims to go to Christians, who had been reading the Bible, to affirm Muhammad’s message.[\[6\]](#) If this is so, we can assume that Muhammad believed that the Bible available in the seventh century was accurate. The Bible we use today is virtually unchanged from the Bible in the seventh century. In fact, it is probably more faithful to the earliest manuscript evidence. If the Bible of Muhammad’s time was accurate, why isn’t today’s copy? Again, Muslims must do more than just claim that errors have occurred in the Bible, they must be able to show us when and where the errors occurred.

The Koran suffers from textual questions as well. Between Muhammad’s death and the compilation of the Koran, some of what Muhammad had recited as revelation had already been lost due to the death of companions who had memorized specific passages.[\[7\]](#) Later, when multiple versions of the Koran caused controversy among Muslims, the Caliph Uthman ordered Zaid bin Thabit to collect all the copies in use, create a standard version and destroy the rest.

We have reasonably good copies of both the original Bible and the Uthmanic version of the Koran. However, both documents cannot represent revelation from God because the messages they contain cannot be reconciled.

Human Nature, Gender, and Salvation

Islam and Christianity view the human predicament differently. According to Islam, when Adam sinned he asked for forgiveness and it was granted by Allah. A Muslim author writes, “...Islam teaches that people are born innocent and remain so until each makes him or herself guilty by a guilty deed. Islam does not believe in ‘original sin’; and its scripture interprets Adam’s disobedience as his own personal misdeed—a misdeed for which he repented and which God forgave.”^{8} In fact, it is common among Muslims to see human failings as the result of forgetfulness or as merely making mistakes. People are frail, imperfect, constantly forgetful of God, and even intrinsically weak, but they do not have a sin nature. As a result, salvation is won by diligently observing the religious rituals prescribed by the five pillars of Islam, reciting the confession or Shahada, prayer, fasting, divine tax, and the pilgrimage to Mecca.

The Bible teaches that Adam’s sin has affected all humanity. Romans 5:12 reads, “Therefore, just as sin entered the world through one man, and death through sin, and in this way death came to all men, because all sinned. . . .” Paul later adds that, “Consequently, just as the result of one trespass was condemnation for all men, so also the result of one act of righteousness was justification that brings life for all men. For just as through the disobedience of the one man the many were made sinners, so also through the obedience of the one man the many will be made righteous.” We are made righteous not by doing good works but by faith in the substitutionary death of Christ on our behalf. Jesus bore our penalty for sin; he literally stood in our place and took our punishment.

Not only do Muslims and Christians have different views on human nature and salvation, but they also have dissimilar perceptions about gender. Although both religions teach that men and women have equal status before God, in reality the

experience of women differs greatly under the two systems. The Christian doctrine of the Trinity, which Islam rejects, helps Christians to understand how women can be equal to men and yet accept a submissive role in the family. The incarnate Jesus took on the submissive role of a Son and yet he was still fully God. There is no similar doctrine in Islam that teaches role differentiation between men and women and yet encourages gender equality before God. Islam places men over women in a way that Christianity does not. Islam allows for polygamy, and while men can marry non-Muslims, women cannot. Muslim men can divorce with a simple proclamation, women cannot. And although women have inheritance rights, they are always inferior to a man's. Finally, Muslim women do not enjoy equal legal rights, and Muslim men are instructed to strike their wives if they are disloyal.

Religion and the State

How do the two traditions view the role of religion in society?

Christians in the West often view Islam through the lens of Western tolerance. In America especially, we are used to the separation of church and state, and assume that people everywhere enjoy such freedom. Many Muslims neither experience such separation nor see it as a good thing. For those who take the Koran seriously, Islam and Islamic law regulate all of life. The history of Islam supports the idea that the state should be involved in both the spread of Islam and the enforcement of religious duties by individual Muslims in Islamic societies.

Beginning with Muhammad, who was both a religious and political leader, down through the Caliphs and Islamic Empires, there has been little separation between religious and political law enforcement. Today in Saudi Arabia, the Committee for the Promotion of Virtue and the Prevention of Vice (*mutawwa'in*, in Arabic) patrol public places in order to

enforce religious laws, particularly the dress and habits of women in public.

In fact, the ultimate goal of many Muslims is what might be called a worldwide Islamic peace enforced by Islamic law. When Muslims talk of Islam being a religion of peace, it is often understood that this peace will occur only when Islam rules the world with Islamic law applied universally. As Syrian born Harvard professor Bassam Tibi has written, "...the quest of converting the entire world to Islam is an immutable fixture of the Muslim worldview. Only if this task is accomplished, if the world has become a 'Dar al-Islam [house of Islam],' will it also be a 'Dar al-Salam,' or a house of peace."[\[9\]](#)

Unfortunately, Christianity has at times had similar views regarding the use of government to enforce religious laws. Between the fourth century and the Reformation, the Christian practice of religious tolerance was spotty at best. But the growth of the separation of church and state in the West, which greatly enhanced religious tolerance, has led to another misconception. Muslims often assume that everyone in the West is a Christian. When they see the sexual immorality, drug use, and decline of the family in Western nations, they assume that this is what Christianity endorses. Christians need to be careful to separate themselves from the culture in which they live and help Muslims to see that our secular governments and society have mostly rejected Christian virtues. It is also helpful to communicate to Muslims that becoming a Christian is more than believing certain things to be true regarding Jesus and the Bible. It is about becoming a new creature in Christ through the indwelling and power of the Holy Spirit. It is about trusting in the sacrificial death of Christ on the cross.

Freudian Slip

His “True Enemy”

In 1937, shortly before World War II, a Jewish doctor had a colleague who urged him to flee Austria for fear of Nazi oppression. The doctor replied that his “true enemy” was not the Nazis but “religion,” the Christian church. What inspired such hatred of Christianity in this scientist?[\[1\]](#)

His father Jakob read the Talmud and celebrated Jewish festivals. The young boy developed a fond affection for his Hebrew Bible teacher and later said that the Bible story had “an enduring effect” on his life. A beloved nanny took him to church as a child. He came home telling even his Jewish parents about “God Almighty”. But eventually the nanny was accused of theft and dismissed. He later blamed her for many of his difficulties, and launched his private practice on Easter Sunday as (some suggest) an “act of defiance.”

Anti-Semitism hounded the lad at school. Around age twelve, he was horrified to learn of his father's youthful acquiescence to Gentile bigotry. "Jew! Get off the pavement!" a so-called "Christian" had shouted to the young Jakob after knocking his cap into the mud. The son learned to his chagrin that his dad had complied.

In secondary school, he abandoned Judaism for secular science and humanism. At the University of Vienna, he studied the atheist philosopher Ludwig Feuerbach and carried his atheism into his career as a psychiatrist. Religion for him was simply a "wish fulfillment," a fairy tale invented by humans to satisfy their needy souls.

This psychiatrist was Sigmund Freud. He became perhaps the most influential psychiatrist of history, affecting medicine, literature, language, religion and culture. Obsessed with what he called the "painful riddle of death," he once said he thought of it daily throughout life. His favorite grandson's death brought great grief: "Everything has lost its meaning to me..." he wrote. "I can find no joy in life." He called himself a "godless Jew." In 1939, he slipped into eternity, a willful overdose of morphine assuaging his cancer's pain.

What factors might have influenced Freud's reaction to Christianity? Have you ever been discouraged about life or angry with God because of a major disappointment or the way a Christian has treated you? In the next section, we'll consider Freud's encounter with bigotry.

Anti-Semitism

Have you ever observed a Christian acting in un-Christlike ways? How did you feel? Disappointed? Embarrassed? Disgusted? Maybe you can identify with Sigmund Freud.

When Freud was about ten or twelve, his father Jakob told him that during his own youth, a "Christian" had knocked Jakob's

cap into the mud and shouted "Jew! Get off the pavement!" Jakob had simply picked up his cap. Little Sigmund found his father's acquiescence to Gentile bigotry unheroic. Hannibal, the Semitic general who fought ancient Rome, became Sigmund's hero. Hannibal's conflict with Rome came to symbolize for Freud the Jewish-Roman Catholic conflict.[{2}](#)

In his twenties, Freud wrote of an ugly anti-Semitic incident on a train. When Freud opened a window for some fresh air, other passengers shouted for him to shut it. (The open window was on the windy side of the car.) He said he was willing to shut it provided another window opposite was opened. In the ensuing negotiations, someone shouted, "He's a dirty Jew!" At that point, his first opponent announced to Freud, "We Christians consider other people, you'd better think less of your precious self."

Freud asked one opponent to keep his vapid criticisms to himself and another to step forward and take his medicine. "I was quite prepared to kill him," Freud wrote, "but he did not step up...[{3}](#)

Sigmund's son Martin Freud recalled an incident from his own youth that deeply impressed Martin. During a summer holiday, the Freuds encountered some bigots: about ten men who carried sticks and umbrellas, shouted "anti-Semitic abuse," and apparently attempted to block Sigmund's way along a road. Ordering Martin to stay back, Sigmund "without the slightest hesitation ... keeping to the middle of the road, marched towards the hostile crowd." Martin continues that his "...father, swinging his stick, charged the hostile crowd, which gave way before him and promptly dispersed, allowing him free passage. This was the last we saw of these unpleasant strangers." Perhaps Sigmund wanted his sons to see their father boldly confronting bigotry rather than cowering before it, as he felt his own father had done.[{4}](#)

Jews in Freud's Austria suffered great abuse from so-called

Christians. No wonder he was turned off toward the Christian faith. How might disappointment and loss have contributed to Freud's anti-Christian stance?

Suffering's Distress

Have you ever been abandoned, lost a loved one, or endured illness and wondered, "Where is God?" Perhaps you can relate to Freud.

Earlier, I spoke about Freud's Catholic nanny whom he loved dearly, who was accused of theft and was dismissed. As an adult, Freud blamed this nanny for many of his own psychological problems.^{5} The sudden departure—for alleged theft—of a trusted Christian caregiver could have left the child with abandonment fears^{6} and the adult Freud with disdain for the nanny's faith. Freud wrote, "We naturally feel hurt that a just God and a kindly providence do not protect us better from such influences [fate] during the most defenseless period of our lives."^{7}

Freud's daughter, Sophie, died suddenly after a short illness. Writing to console her widower, Freud wrote: "...it was a senseless, brutal stroke of fate that took our Sophie from us . . . we are . . . mere playthings for the higher powers."^{8}

A beloved grandson died at age four, leaving Freud depressed and grief stricken. "Fundamentally everything has lost its meaning for me," he admitted shortly before the child died.^{9}

Freud's many health problems included a sixteen-year bout with cancer of the jaw. In 1939, as the cancer brought death closer, he wrote, "my world is . . . a small island of pain floating on an ocean of indifference."^{10} Eventually a gangrenous hole in his cheek emitted a putrid odor that repulsed his beloved dog but attracted the flies.^{11}

Like many, Freud could not reconcile human suffering with a benevolent God. In a 1933 lecture, he asserted:

It seems not to be the case that there's a power in the universe which watches over the well-being of individuals with parental care and brings all their affairs to a happy ending. On the contrary, . . . Obscure, unfeeling, unloving powers determine our fate.[{12}](#)

Freud's suffering left him feeling deeply wounded. Could that be one reason he concluded that a benevolent God does not exist? Do you know people whose pain has made them mad at God, or has convinced them He doesn't exist? Intellectual doubt often has biographical roots.

Spiritual Confusion

Hypocritical Christians angered Sigmund Freud. The deaths of his loved ones and his own cancer brought him great distress. His loss and suffering seemed incompatible with the idea of a loving God. So what did he think the main message of the Christian faith was?

In the book, *The Future of An Illusion*, his major diatribe against religion, Freud outlined his understanding of Christianity. He felt it spoke of humans having a "higher purpose"; a higher intelligence ordering life "for the best"; death not as "extinction" but the start of "a new kind of existence"; and a "supreme court of justice" that would reward good and punish evil.[{13}](#)

Freud's summary omits something significant: an emphasis on human restoration of relationship to God by receiving His free gift of forgiveness through Jesus' sacrificial death on the cross for human guilt.

Discussions of the biblical message often omit or obscure this important concept. I used to feel I had to earn God's love by my own efforts. Then I learned that from a biblical perspective, no one can achieve the perfection necessary to gain eternal life.[{14}](#) Freud's view of Christianity at this

point seemed to be missing grace, Jesus, and the cross.

Two years after he wrote *The Future of An Illusion*, he seemed to have a clearer picture of Christian forgiveness. He wrote that earlier he had “failed to appreciate” the Christian concept of redemption through Christ’s sacrificial death in which he took “upon himself a guilt that is common to everyone.”[\[15\]](#)

Freud also attacked the intellectual validity of Christian faith.[\[16\]](#) He objected to arguments that one should not question the validity of religion and that we should believe simply because our ancestors did. I don’t blame him. Those arguments don’t satisfy me either. But he also felt the biblical writings were untrustworthy. He shows no awareness of the wealth of evidence supporting, for example, the reliability of the New Testament documents or Jesus’ resurrection.[\[17\]](#) His apparent lack of familiarity with historical evidence and method may have been a function of his era, background, academic pursuits or profession.

Perhaps confusion about spiritual matters colored Freud’s view of the faith. Do you know anyone who is confused about Jesus’ message or the evidence for its validity?

Freud’s Christian Friend

Freud often despised Christianity, but he was quite fond of one Christian. He actually delayed publication of his major criticism of religion for fear of offending this friend. Finally, he warned his friend of its release.[\[18\]](#) Oskar Pfister, the Swiss pastor who had won Freud’s heart, responded, “I have always believed that every man should state his honest opinion aloud and plainly. You have always been tolerant towards me, and am I to be intolerant of your atheism?”[\[19\]](#) Freud responded warmly and welcomed Pfister’s published critique. Their correspondence is a marvelous example of scholars who differ doing so with grace and

dignity, disagreeing with ideas but preserving their friendship. Their interchange could well inform many of today's political, cultural and religious debates.

Freud's longest correspondence was with Pfister. It lasted 30 years.[{20}](#) Freud's daughter and protégé, Anna, left a glimpse into the pastor's character. During her childhood, Pfister seemed "like a visitor from another planet" in the "totally non-religious Freud household." His "human warmth and enthusiasm" contrasted with the impatience of the visiting psychologists who saw the family mealtime as "an unwelcome interruption" in their important discussions. Pfister "enchanted" the Freud children, entering into their lives and becoming "a most welcome guest."[{21}](#)

Freud respected Pfister's work. He wrote, "[Y]ou are in the fortunate position of being able to lead . . . [people] to God."[{22}](#)

Freud called Pfister "a remarkable man a true servant of God, . . . [who] feels the need to do spiritual good to everyone he meets. You did good in this way even to me."[{23}](#)

"Dear Man of God," began Freud after a return home. "A letter from you is one of the best possible things that could be waiting for one on one's return."[{24}](#)

Pfister was a positive influence for Christ. But in the end, so far as we know, Freud decided against personal faith.

People reject Christ for many reasons. Hypocritical Christians turn some off. Others feel disillusioned, bitter, or skeptical from personal loss or pain. Some are confused about who Jesus is and how to know Him personally. Understanding these barriers to belief can help skeptics and seekers discern the roots of their dilemmas and prompt them to take a second look. Examples like Pfister's can show that following the Man from Nazareth might be worthwhile after all.

Notes

“How Do I Find Someone to Mentor Me?”

Hello Ray!

I am not sure if you know who I am, but I was one of the participants in your singles conference at _____.

I just spent some time on the Probe website and was reading one of Lou Whitworth's [articles on being God's man](#) (king, warrior, mentor and friend).

I know you spoke to us about having a mentor in your life. Since then, I have heard two of our pastors and Chuck Swindoll speak about the need for mentoring as well. I am really trying to allow God's will to direct my life and this subject keeps coming up. I believe this is a step He wants me to take, but I am not sure how to go about it. Would it be possible for you to help me find a mentor? If not, would you know someone who could help me?

Any assistance you could provide me is be sincerely appreciated.

Hi _____,

A mentor generally needs to be someone who is at least 10 to 15 years older and someone whose walk with the Lord you respect. Asking someone to be your mentor can be a little intimidating. But just asking if you can meet together to pray and enjoy some fellowship sounds a lot more doable to other men. Is there anyone you admire from afar? If no one comes to mind I would suggest inquiring of a pastor for suggestions. They often know of older saints who would be willing to enter into this kind of relationship but don't know of anyone interested.

It's a real problem in the church and there are a lot of men willing to be mentored but a shortage of those willing to share their life's lessons with someone younger (often for fear of not looking so good in the process—a mentor needs to be real enough to admit failures but also have a healthy view of their strengths). They have no model to follow themselves. All that to say it is not likely that this will be a quick and easy search. Above all pray for the Lord's direction and for Him to prepare someone even now.

I commend you for sensing this need and reaching out to try and fill it!

Respectfully,

Ray Bohlin
