

Spiritual Disciplines and the Modern World

Don Closson

The spiritual disciplines help us cooperate with God in our transformation into the likeness of Christ. Don Closson discusses disciplines of abstinence and of engagement.

This article is also available in [Spanish](#).

Spirituality and the Body

As a seminary student I was given the assignment to read a book on Christian spirituality called the *Spirit of the Disciplines* by Dallas Willard.^{1} I obediently read the book and either wrote a paper on it or took a test that covered the material (I can't recall which), but the book didn't have a major impact on my life at that time. Recently, over a decade later, I have gone back to the book and found it to be a jewel that I should have spent more time with. In the book, Willard speaks to one of the most important issues facing individual Christians

and churches in our time: “How does one live the Spirit-filled life promised in the New Testament?” How does the believer experience the promise that Jesus made in Matthew 11:29-30: “Take my yoke upon you and learn from me, for I am gentle and humble in heart, and you will find rest for your souls. For my yoke is easy and my burden is light”?

Willard argues that modernity has given us a culture that offers a flood of self-fulfillment programs in the form of political, scientific, and even psychological revolutions. All promise to promote personal peace and affluence, and yet we suffer from an “epidemic of depression, suicide, personal emptiness, and escapism through drugs and alcohol, cultic obsession, consumerism, and sex and violence”^{2} Most Christians would agree that the Christian faith offers a model for human transformation that far exceeds the promises of modern scientific programs, but when it comes to delineating the methods of such a transformation there is often confusion or silence.

Christians frequently seek spiritual maturity in all the wrong places. Some submit themselves to abusive churches that equate busyness and unquestioning subservience with Christ-likeness. Others look for spirituality through syncretism, borrowing the spiritualism of Eastern religions or Gnosticism and covering it with a Christian veneer.

According to Willard, Christians often hope to find Christ’s power for living in ways that seem appropriate but miss the mark; for example, through a “sense of forgiveness and love for God” or through the acquisition of propositional truth. Some “seek it through special experiences or the infusion of the Spirit,” or by way of “the presence of Christ in the inner life.” Others argue that it is only through the “power of ritual and liturgy or the preaching of the Word,” or “through the communion of the saints.” All of these have value in the Christian life but do not “reliably produce large numbers of people who really are like Christ.”^{3}

We evangelicals have a natural tendency to avoid anything that hints of meritorious works, works that might somehow justify us before a holy God. As a result, we reduce faith to an entirely mental affair, cutting off the body from the process of living the Christian life.

In this article we will consider a New Testament theology of human transformation in order to better understand what it means to become a living sacrifice to God.

A Model for Transformation

Faith in Jesus Christ brings instant forgiveness along with the promise of eventual glorification and spending eternity with God. However, in between the believer experiences something called sanctification, the process of being set apart for good works. Something that is sanctified is holy, so it makes sense that the process of sanctification is to make us more like Christ.

Even though the Bible talks much of spiritual power and becoming like Christ, many believers find this process of sanctification to be a mystery. Since the Enlightenment, there has been a slow removal from our language of acceptable ways to talk about the spiritual realm. Being rooted in this age of science and materialism, the language of spiritual growth sounds alien and a bit threatening to our ears, but if we want to experience the life that Jesus promised, a life of spiritual strength, we need to understand how to appropriate God's Spirit into our lives.

According to Willard, "A 'spiritual life' consists in that range of activities in which people cooperatively interact with God—and with the spiritual order deriving from God's personality and action. And what is the result? A new overall quality of human existence with corresponding new powers." [\[4\]](#) To be spiritual is to be dominated by the Spirit of God. Willard adds that spirituality is another reality, not just a "commitment" or "life-style." It may result in personal and social

change, but the ultimate goal is to become like Christ and to further His Kingdom, not just to be a better person or to make America a better place to live.

The Bible teaches that to become a spiritual person one must employ the *disciplines* of spirituality. “The disciplines are activities of mind and body purposefully undertaken to bring our personality and total being into effective cooperation with the divine order.” [\[5\]](#) Paul wrote in Romans 6:13 that the goal of being spiritual is to offer our body to God as instruments of righteousness in order to be of use for His Kingdom. Moving towards this state of usefulness to God and His Kingdom depends on the actions of individual believers.

Many of us have been taught that this action consists primarily in attending church or giving towards its programs. As important as these are, they fail to address the need for a radical inner change that must take place in our hearts to be of significant use to God. The teaching of Scripture and specifically the life of Christ tells us that the deep changes that must occur in our lives will only be accomplished via the disciplines of abstinence such as fasting, solitude, silence, and chastity, and the disciplines of engagement such as study, worship, service, prayer, and confession. These disciplines, along with others, will result in being conformed to the person of Christ, the desire of everyone born of His Spirit.

Salvation and Life

When I first read in the Bible that Jesus offered a more abundant life to those who followed Him, I thought that He was primarily describing a life filled with more happiness and purpose. It does include these things, but I now believe that it includes much more. Salvation in Christ promises to radically change the nature of life itself. It is not just a promise that sometime in the far distant future we will experience a resurrected body and see a new heaven and new earth. Salvation in Christ promises a life characterized by the highest ideals of thought and actions as epitomized by the life of Christ Himself.

Although there is no program or classroom course that can guarantee to give us this new life in Christ, it can be argued that in order to live a life like Jesus we need to do the things that Jesus did. If Jesus had to “learn obedience through the things which he suffered” (Hebrew 5:8 KJV), are we to expect to act Christ-like without the benefit of engaging in the disciplines that Jesus did?

In *The Spirit of the Disciplines*, Willard argues that there is a direct connection between practicing the spiritual disciplines and experiencing the salvation that is promised in Christ. Jesus prayed, fasted, and practiced solitude “not because He was sinful and in need of redemption, as we are, but because he had a body just as we do.” {6} The center of every human being’s existence is his or her body. We are neither to be neo-Platonic nor Gnostic in our approach to the spiritual life. Both of these traditions play down the importance of the physical universe, arguing that it is either evil or simply inferior to the spiritual domain. But as Willard argues, “to withhold our bodies from religion is to exclude religion from our lives.”

Although our spiritual dimension may be invisible, it is not separate from our bodily existence. *Spirituality*, according to Willard, is “a relationship of our embodied selves to God that has the natural and irrepressible effect of making us alive to the Kingdom of God—here and now in the material world.” {7} By separating our Christian life from our bodies we create an unnecessary sacred/secular gulf for Christians that often alienates us from the world and people around us.

The Christian faith offers more than just the forgiveness of sins; it promises to transform individuals to live in such a way that responding to events as Jesus did becomes second nature. What are these spiritual disciplines, and how do they transform the very quality of life we experience as followers of Jesus Christ?

The Disciplines of Abstinence

Although many of us have heard horror stories of how spiritual disciplines have been abused and misused in the past, Willard believes that “A discipline for the spiritual life is, when the dust of history is blown away, nothing but an activity undertaken to bring us into more effective cooperation with Christ and his Kingdom.” {8} He reminds us that we discipline ourselves throughout life in order to accomplish a wide variety of tasks or functions. We utilize discipline when we study an academic or professional field; athletes must be disciplined in order to run a marathon or bench press 300 lbs. Why, then, are we surprised to learn that we must discipline ourselves to be useful to God?

Willard divides the disciplines into two categories: disciplines of abstinence, and disciplines of engagement. Depending on our lifestyle and past personal experiences, we will each find different disciplines helpful in accomplishing the goal of living as a new creature in Christ. Solitude, silence, fasting, frugality, chastity, secrecy, and sacrifice are disciplines of abstinence. Given our highly materialistic culture, these might be the most difficult and most beneficial to many of us. We are more familiar with the disciplines of engagement, including study, worship, celebration, service, prayer, and fellowship. However, two others mentioned by Willard might be less familiar: confession and submission.

Abstinence requires that we give up something that is perfectly normal—something that is not wrong in and of itself, such as food or sex—because it has gotten in the way of our walking with God, or because by leaving these things aside we might be able to focus more closely on God for a period of time. As one writer tells us, “Solitude is a terrible trial, for it serves to crack open and burst apart the shell of our superficial securities. It opens out to us the unknown abyss that we all carry within us . . .” {9} Busyness and superficial activities hide us from the fact that we have little or no inward experience with God. Solitude frees us from social conformity, from being conformed to the patterns of this world that Paul warns us about in Romans 12.

Solitude goes hand in hand with silence. The power of the tongue and the damage it can do is taken very seriously in the Bible. There is a quiet inner strength and confidence that exudes from people who are great listeners, who are able to be silent and to be slow to speak.

The Disciplines of Engagement

Thus, the disciplines of abstinence help us diminish improper entanglements with the world. What about the disciplines of engagement?

Although study is not often thought of as a spiritual discipline, it is the key to a balanced Christian walk. Calvin Miller writes, “Mystics without study are only spiritual romantics who want relationship without effort.” [{10}](#) Study involves reading, memorizing, and meditation on God’s Word. It takes effort and time, and there are no shortcuts. It includes learning from great Christian minds that have gone before us and those who, by their walk and example, can teach much about the power available to believers who seek to experience the light burden that abiding in Jesus offers.

Few Christians deny the need for worship in their weekly routines, even though what constitutes worship has caused considerable controversy. Worship ascribes great worth to God. It is seeing God as He truly is. Willard argues that we should focus our worship through Jesus Christ to the Father. He writes, “When we worship, we fill our minds and hearts with wonder at him—the detailed actions and words of his earthly life, his trial and death on the cross, his resurrection reality, and his work as ascended intercessor.” [{11}](#)

The discipline of celebration is unfamiliar to most of us, yet Willard argues that it is one of the most important forms of engagement with God. He writes that “We engage in celebration when we enjoy ourselves, our life, our world, in conjunction with our faith and confidence in God’s greatness, beauty, and goodness. We concentrate on our life and world as God’s work and as God’s gift to us.” [{12}](#)

Although much of the scriptural argument for holy celebration is found in the festivals of the Old Testament and the book of Ecclesiastes, Jesus was accused of being a glutton and a drunkard because he chose to dine and celebrate with sinners.

Christian fellowship and confession go hand in hand. It is within the context of fellowship that Christians build up and encourage one-another with the gifts that God has given to us. It is also in this context that we practice confession with trusted believers who know both our strengths and weaknesses. This level of transparency and openness is essential for the church to become the healing place of deep intimacy that people are so hungry for.

Walking with Jesus doesn't mean just knowing things about Him; it means living as He lived. This includes practicing the spiritual disciplines that Jesus practiced. As we do, we will be changed through the Spirit to be more like Him and experience the rest that He has offered to us.

Addressing Anxiety in Tumultuous Times

Byron Barlowe

Byron Barlowe connects the dots between the universal problem of anxiety, what brain science is teaching us about our minds, and how Scripture and spiritual disciplines can help. In a world consumed by violent riots and trauma surrounding the Covid virus, this is a timely topic that God and science speak to well.

Millions of people worldwide are battling anxiety in a tumultuous time. The Coronavirus pandemic response has created a new abnormal: heightened fear of sickness and death, economic damage, and social isolation. Loneliness is the number one health crisis in America according to many epidemiologists, psychiatrists, and social scientists.[{1}](#) While we're all still reeling from this, racial strife has erupted into looting, killings, and anarchy in American streets.

Mental health is an increasing concern too. One study found that during the spring 2020 mass quarantine, prescriptions for anti-anxiety meds spiked.[{2}](#) A San Francisco area hospital has seen more deaths by suicide than by Covid-19, prompting a call for an end to mass shutdowns.[{3}](#) *It's been a perfect storm of stress.*

Are there real solutions *right now*? Yes, brain science is confirming the truths and

promises proclaimed in Scripture in exciting ways! We have wonderfully adaptive minds—especially when they are focused on God. These built-in mind-morphing capabilities show the genius of our design as Image-bearers of God. Audiologist, cognitive researcher and outspoken Christian Dr. Caroline Leaf writes, “As an individual, you are capable of making mental and emotional change in your life. Through your thinking, you can actively recreate thoughts and, therefore, knowledge in your mind.” {4}

And this has profound implications for true hope. Leaf continues: “Thoughts are real, *physical* things that occupy mental real estate. Moment by moment, every day, you are changing the structure of your brain through your thinking [it’s happening right now as you read]. *When we hope, it is an activity of the mind that changes the structure of our brain in a positive and normal direction.*” {5} The biblical book of Hebrews defines faith as “the *substance* of things hoped for, the evidence of things not seen” (Hebrews 11:1). The thankful, attentive, willfully hopeful mind creates positive emotions, thoughts, and acts of the will. In other words, *we significantly control whether we have a healthy soul.*

Dallas Willard writes, “The transformation of the self away from a life of fear and insufficiency takes place as we fix our mind upon God as he truly is.” As Scripture teaches, “Be transformed by the renewing of your mind.” In this article we’ll explore this transformation.

Morphing Your Mind—It’s Mostly Up to You!

Everyday stress is hard enough—but what about work-related anxiety? Money? Riots, memories of abuse, bullying, and abandonment? We have little control over family, culture or epidemics. But we can make amazing internal changes through our responses. Science and Scripture *agree* on this.

The transforming mind-renewal encouraged by Scripture is possible for us all, especially for people who have invited God to lead their lives. We can

intentionally train our minds to reshape our brains—we are *not* perpetual victims of our past or circumstances. Nor are humans mere products of matter in motion. Dr. Caroline Leaf, author of *Switch on Your Brain*, claims that “Choice is real, and free will exists. You are able to stand outside yourself, observe your own thinking, consult with God, and [work with him to] change the negative, toxic thought or grow a healthy, positive thought. When you do this, your brain responds with a positive neurochemical rush and structural changes that improve your intellect, health, and peace.”[{6}](#)

Even traumatic memories can be starved, defanged, broken down, and replaced. Brought into conscious awareness, they can become plastic enough to be recreated. Leaf explains that “Neurons that don’t get enough signal (that is, rehearsing of the negative event) will start firing apart, wiring apart, pulling out, and destroying the emotion attached to the trauma.” Also, desirable brain chemicals that bond and remold chemical connections, increase focus and attention, and increase feelings of peace and happiness begin to weaken traumatic memories even more. So bad memories, hatred, hurt, and other negative thoughts and emotions that form toxic beliefs: “If they stop firing together, they will no longer wire together. This leads to . . . rebuilding new ones.”[{7}](#)

Ideas have consequences and our beliefs guide our behavior. In the words of King Solomon, “As a man thinks in his heart, so he is.”[{8}](#) That is, we construct frameworks of beliefs and *then* speak and act from them.

Science seems to confirm this biblical view of self-control. Measuring magnetic fields, electrical impulses, chemical effects, photons, vibrations, and quantum energy paints a picture of intricately [networking] neurotransmitters, proteins, and energy—that is, signals—that change the brain’s landscape.[{9}](#) This “neuroplasticity [seems to be] God’s design for renewing the mind.”[{10}](#)

And there’s nothing magic about it: overcoming anxiety can be helped a lot

through habits of the mind, heart, and soul.

Mindfulness & Meditation—Self-Control and Seeking God in Silent Solitude

It's no wonder that the concept of "mindfulness" has become a "thing" these days. Meditation and concentration are new-old survival skills. How do they work?

Dr. J.P. Moreland, noted philosopher and author of *Finding Quiet: My Story of Overcoming Anxiety and The Practices That Brought Peace*, candidly shares his struggles with anxiety and the need he had for medications. He also discovered the power of seeking God in self-directed solitude. He emphasizes sustained habits of the praising, thankful, and self-controlled soul.

Mindful meditation is not like taking a drug, is not a quick fix, or denying the senses to rid oneself of desire.^{11} "By charting new pathways in the brain, mindfulness can change the banter inside our heads from chaotic to calm."^{12} New habits are formed over time. When it comes to our minds, "practice doesn't make perfect; it makes permanent."^{13}

Remaining at rest via the practice of spiritual disciplines takes advantage of our mind's ability to "move into a highly intelligent, self-reflective, directed state." And the more often we go there, the more "we get in touch with the deep, spiritual part of who we are." This exercise switches brain modes in a way that can create wisdom and potential connection with God.^{14} As Jesus taught his disciples, "Keep awake (give strict attention, be cautious and active) and watch and pray, that you may not come into temptation."^{15} We can mentor our own minds, settle our souls, habituate our hearts, and free our spirits to respond to God. Brain science is catching up on this reality.

So, what's going on physically when we stop to meditate in focused solitude and

silence? A post at *Mindful.org* claims, “The impact that mindfulness exerts on our brain is borne from routine: a slow, steady, and consistent reckoning of our realities, and the ability to take a step back, become more aware, more accepting, less judgmental, and less reactive. . . . Mindfulness over time can make the brain, and thus [ourselves], more efficient regulators, with a penchant for pausing to respond to our world instead of mindlessly reacting.” {16} How different would social media conversations be—especially on politics and race—if more people practiced patient contemplation!

Various regions of our brains change while meditating. The “fight or flight” area actually shrinks in size. {17} It’s a real chill pill!

God keeps “him in perfect peace whose mind is stayed on You, because he trusts in You.” {18}

Thankfulness and Happiness—Healthy Habits of the Mind & Heart

In trying times, we all want to return to happiness. It’s a God-given right to pursue it, according to America’s founders. The biblical worldview recognizes the inherent brokenness of both creation and human beings, so it is no surprise that confusion, discord, and tragedy—along with evil spiritual powers—“steal, kill, and destroy” {19} our joy. What can be done?

Christian philosopher J.P. Moreland writes, “You have it in your power to begin a regimen of choices, assuming you would choose the right things, and form a habit of this that can *substantially improve your happiness and decrease or get rid of anxiety*. There really is hope.” {20} Our non-conscious mind turns thoughts over and over. Through spiritual disciplines, we bring these into our conscious awareness, which manipulates actual proteins, creating overhauled memories. Intentionally bringing God to mind—His attributes, the wonder of creation and His blessings, promises, answered prayers—such a focus leads to a cycle of good

thinking, feeling, and *knowing* that turns into believing real truth. Faith is a gift so we're not alone in doing this. But it is up to us to put to use the gifts described here to "work out [our] salvation with [reverence and proper humility]." [{21}](#)

Remember, we have a strong influence in reshaping our own brains—especially with God's help. Secular scientists are discovering the wonderful power of thankfulness. Scientific studies prove seven benefits according to *PsychologyToday.com*. Gratitude improves relationships, physical and mental health, sleep, self-esteem, and mental resilience. It even reduces aggression, the urge for revenge. Scripture aligns with physical reality again when it tells us: "Don't worry about anything; instead, pray about everything. Tell God what you need and thank him for all he has done. Then you will experience God's peace, which exceeds anything we can understand. His peace will guard your hearts and minds as you live in Christ Jesus." [{22}](#)

Moreland jokes, "If we're not careful, we may even come to think we were designed to flourish best when we are thankful and grateful! Yet as exciting as these psychological studies are, we didn't need them to know the importance and value of expressing gratitude and thanksgiving to God. The Bible insists on this . . . [it's] filled to overflowing with exhortations to be grateful to God and express thanksgiving to him." [{23}](#) As King David famously prayed in Psalm 23, "Surely goodness and mercy shall follow me all the days of my life"—he trusted a good God to lead, protect, and bless him. That's joy far beyond happiness!

Takeaways & Practical Applications

Brain networks form an inner life of the mind. We can switch between various networks constantly. Like a mom monitoring kids running around inside several contained rooms, this enables us to control the controllable—our reactions to events and circumstances. Brain scans confirm how we capture and police rogue thoughts in ways prescribed in Scripture: "We . . . take every thought captive to obey Christ." [{24}](#)

UCLA researchers address how our habitual non-conscious thoughts can drive anxiety—negative self-talk like:

- “I’ll be in real trouble if...”
- “What if so and so happens next week?”
- “I’ll probably fail that exam!”

“It’s what we say to ourselves in response to any particular situation that mainly determines our mood and feelings.” [{25}](#)

“Forming a new habit requires doing things you may not want to do in the early stages of formation,” as any coach or teacher will tell you.

For retraining our brains, experts have devised methods like **The Four Step Solution**:

It goes as follows: [{26}](#)

Step 1: Relabeling: call out thoughts as having no necessary connection with reality: tell yourself “That is a destructive lie.” Call on Proverbs 4:23, “Guard your heart above all else, for it is the source of life.” [{27}](#)

Step 2: Reframing: take the power out of the bad thoughts. Reset your perception of the deceptive message by being mindful that it exists, its content, and how you are now feeling by correctly categorizing the distorted message. Bad self-talk includes:

- all or nothing thinking (for example: “it was a *total* failure”)
- overgeneralizing
- singling out one thing to focus on

- catastrophizing (or making too big a deal out of things) and
- discounting the positive

Reframing them creates stable memories formed by repeated updating.

Step 3: Refocusing: Set your mind on anything else—distract yourself from the negative thoughts. Stop obsessing! Get into “the flow” of something. Focus elsewhere. And don’t ruminate about the message—analyzing it will deepen the grooves in your brain.

Step 4: Revaluing: After a while, reflect on how you did Steps 1-3. Recommit to repeat these steps throughout the day.

Over 21 days, a “newly formed neural network” will decay in less than a month: thoughts are like muscles that atrophy and die or get stronger with use.[{28}](#) Starve the bad, feed the good.

As Paul instructed the Philippian church, dwell on what is good and pure, true and worthy of praise.[{29}](#)
