

# Did Adam Really Exist?

*Were Adam and Eve really the first pair of humans? Rick Wade responds to theistic evolution and OT scholar Peter Enns' belief the human race did not begin with Adam.*

## Paul and Adam

In 2011, *Christianity Today* reported on the growing acceptance of theistic evolution in the evangelical community and one possible implication of it. If humans did evolve along with other species, was there a real historical first couple? Did Adam and Eve really exist?

✖ In this article I'll address a couple of theological problems this claim raises and a question of interpretation. I'll look at the views of evangelical Old Testament scholar Peter Enns who denies a historical Adam; not, however, to single him out as a target, but rather because he raises the important issues in his writings.

Enns denies a historical Adam for two main reasons. One is that, as far as he is concerned, the matter of evolution is settled. There was no first human couple.[\[1\]](#) The other is his belief that Genesis 1 describes the origins of the world in the mythological framework of the ancient Near East, and thus isn't historical, and that Genesis 2 describes the origins of *Israel*, not *human* origins.[\[2\]](#) So Genesis doesn't intend to teach a historical Adam and Eve, and evolutionary science has proved that they couldn't have existed.

Let's begin with the question of how sin entered the world if there were no Adam.

In Romans chapter 5, the apostle Paul says sin, condemnation, and death came through the act of a man, Adam. This is contrasted with the act of another man, Jesus, which brought

grace and righteousness.

However, if there were no historical Adam, where did sin come from? Enns says the Bible doesn't tell us.<sup>{3}</sup> The Old Testament gives no indication, he says, "that Adam's disobedience is the cause of universal sin, death, and condemnation, as Paul seems to argue."<sup>{4}</sup> Paul was a man of his time who drew from a common understanding of human beginnings to explain the universality of sin. Enns acknowledges universal sin and the need for a Savior.<sup>{5}</sup> He just doesn't know how this situation came about. The fact that Adam didn't exist, Enns believes, does nothing to take away from Paul's main point, namely, that salvation comes only through Christ for all people, both Jews and Gentiles. Is this true?

## **Paul and Adam: A Response**

There are a few problems with this interpretation. First, there is a logical problem. Theologian Richard Gaffin points out that, in Rom. 5:12, 17, and 18, a connection is made between the "one man" through whom sin came and the "all" to whom it was spread. If sin really didn't come in through the "one"—Adam—and spread to the "all"—you and me—how do we take seriously Paul's further declaration that "one man's act of righteousness leads to justification and life for all"?

Second, there is a piling on of error in Paul's claim. One of Enns' foundational beliefs is that God used human understanding to convey His truths in Scripture. God spoke through the myths of the ancient world when He inspired the writing of Genesis.<sup>{6}</sup> If Enns is correct, one would expect that God was using the Genesis myth to reveal something true in Paul's claim about Adam. In other words, the Old Testament story would be opened up so a truth would be revealed. However, Paul's first point, that sin came through Adam to the race (Rom. 5:12), is in fact false, according to Enns. The

following truth, about righteousness coming through Christ, is beside the point here. Paul's assertion about Adam isn't simply a *historical* one; it is a *doctrinal* one, too. The traditional teaching of the church regarding the source of sin, death, and condemnation is therefore false. Paul delivered a false teaching based upon a non-historical myth. He should have left Adam out of his discussion. It does nothing to buttress his claim about Christ.

Enns says that this matter of the origin of sin is "a vital issue to work through, . . . one of the more pressing and inevitable philosophical and theological issues before us."[\[7\]](#) One has to wonder, though: if Paul didn't have the answer, and he was taught by Christ directly, and if the rest of Scripture is silent about such an important matter, can we really think we can ferret out the solution ourselves?

## Paul's Use of the Old Testament

The use of the Old Testament in the New Testament is of great significance in this matter. How does Paul get the point he made out of Genesis if it isn't true?

Peter Enns believes the problem is related to the way Paul interpreted and used the Old Testament. Paul lived in an era which is now called Second Temple Judaism. Writers in this era, Enns says, "were not motivated to reproduce the intention of the original human author" in the text under consideration.[\[8\]](#) Thus, we see Old Testament texts used in seemingly strange ways in the New Testament, strange if what we expect is a direct reproduction or a further development or deeper explanation of the Old Testament writer's original intent. Texts could be taken completely out of context or words could be changed to make the text say something the New Testament writer wanted to say. In this way, Enns believes, Paul used the Old Testament creatively to explain the universality of sin and of the cross work of Christ.

Some scholars speak of “christocentric” interpretation of the Old Testament. Enns prefers the term “christotelic” which refers to the idea that Christ is the *completion* of the Old Testament or the *end* toward which the Old Testament story was headed. Regarding Adam, Enns writes, “Paul’s Adam is a vehicle by which he articulates the gospel message, but his Adam is still the product of a creative handling of the story.”[\[9\]](#) Paul presents Adam as a historical person, and then makes the further creative claim that Adam’s sin is the reason we all sin. Neither of these are true, but this does no harm to the most important part of the text where Paul claims that salvation for all people came through Christ.

None of this should be problematic for us, in Enns’ opinion, for he believes this view of the Bible is similar to our view of the Incarnation of Christ. In Jesus there are both humanity and divinity. Likewise, the Bible is a coming together of the divine and the human. God used the methods of Paul’s day to convey the gospel message.

## **Paul’s Use of Old Testament: A Response**

How can we respond to this view of Paul’s use of the Adam story?

Enns believes “that the NT authors [subsumed] the OT under the authority of the crucified and risen Christ.”[\[10\]](#) However, Jesus never referred to the Old Testament in a way that showed the Old Testament incorrect as it stood. Even His “but I say to you” in the Sermon on the Mount appears to be more a matter of teaching the depths of the laws than a correction of the Old Testament text. He upheld the authority of the Old Testament such as when he said, “Do not think that I have come to abolish the Law or the Prophets; I have not come to abolish them but to fulfill them” (Mt. 5:17).”[\[11\]](#)

Bruce Waltke is an evangelical Old Testament scholar who

accepts theistic evolution but who disagrees with Enns on this matter. He wonders why Jesus rebuked the disciples on the road to Emmaus (Luke 24:25-27) for not understanding the plain language of Scripture if the plain historical sense isn't sufficient.[{12}](#) He argues that Enns' method of interpretation can't be supported by Scripture.

Paul said the gospel he preached was "in accordance with the Scriptures" (1 Cor. 15:3-4) by which he meant the Old Testament.[{13}](#) Elsewhere he said that the Old Testament Scriptures are "profitable for teaching" in 2 Tim. 3:16-17.[{14}](#)

New Testament scholar Richard Bauckham disagrees with the belief that Paul followed the interpretive methods of his day. The apostles weren't guilty of reading into the Old Testament ideas held independently of it. He says, "They brought the Old Testament text into relationship with the history of Jesus in a process of mutual interpretation from which some of their profoundest theological insights sprang."[{15}](#)

In fact, it was the apostles' high esteem for the Old Testament that forced them to come to grips with the Trinitarian nature of God given the claims of Jesus.[{16}](#)

This doesn't mean, however, that it's always easy to understand how the apostles used the Old Testament. However, what the apostles taught was understood to be in continuity with what they had received before, not as a correction of it.

## **The Matter of Inspiration**

It is inevitable that a discussion of the denial of the historical Adam will turn to the doctrine of the inspiration of Scripture. Old Testament scholar Peter Enns believes that Paul's incorrect use of Adam "has no bearing whatsoever on the truth of the gospel."[{17}](#) That's true, but it has a lot to do with how we understand inspiration and its bearing on Paul's

writings.

The apostle Paul said that "all Scripture is inspired" or "breathed out" by God (2 Tim. 3:16). Peter explains further that "no prophecy of Scripture comes from someone's own interpretation. . . . but men spoke from God as they were carried along by the Holy Spirit" (2 Pet. 1:20-21).

Paul, who claimed in 1 Thess. 2 that his teachings were the word of God (v. 13), intended to explain how sin and condemnation came into the world in Romans 5. Elsewhere, Peter spoke of Paul's writings as Scripture (2 Pet. 3:15-16). If Paul's explanation of this "vital issue," in Enns' words, was wrong, was it, then, of Paul's own interpretation? Either it came from the Holy Spirit and was inspired Scripture, or it was merely Paul's interpretation and was not. Which is it?

Old Testament scholar Bruce Waltke writes this: "A theory that entails notions that holy Scripture contains flat out contradictions, ludicrous harmonization, earlier revelations that are misleading and/or less than truthful, and doctrines that are represented as based on historical fact, but in fact are based on fabricated history, in my judgment, is inconsistent with the doctrine that God inspired every word of holy Scripture."[\[18\]](#)

It might be objected here that I am confusing inspiration with interpretation. These are different things. However, if it is understood that all of Scripture comes from God who cannot lie, then we have to let that set limits on how we interpret Scripture. Interpretations that include false doctrines cannot be correct.

It seems to me that Enns has put himself into a difficult position. His conviction of the truth of human evolution isn't his only reason for denying the historical Adam, but it puts the traditional understanding of Adam and his place in Paul's theology out of bounds for him. It would be better to hold to

what the church has taught for centuries rather than to the tentative conclusions of modern scientists.

## **"Was Man Created Twice, in Genesis 1 and Genesis 2?"**

**Why does it seem like man was created twice? Once in Genesis 1:27 and a second time in 2:7.**

My own view is this. Genesis 1 is an overview of the entire creation event. Genesis 2 is a more detailed and specific description of God's creation of mankind. Thus, whereas Genesis 1 mentions the creation of man only briefly, Genesis 2 goes into significantly more detail. The two accounts are not contradictory, but complementary. Genesis 2 simply elaborates on the creation of man in particular.

An excellent website that deals with all sorts of biblical and theological issues is The Biblical Studies Foundation at [www.netbible.com/index.htm](http://www.netbible.com/index.htm). I use this site quite often and regularly recommend it to others as well.

Shalom,

# **“Is the Genesis Story of ‘The Sons of God’ True?”**

**Pertaining to the old days when the watchers went astray and married women and bore giants—are these stories of any truth?**

**In the days of Noah, when a man in years was nearing his death, say a just man, are there any hints as to what awaited them in the afterlife of that period?**

**Is there something, or has there ever been something, commented on in scripture which disturbs the dead in their rest?**

Thank you for writing Probe Ministries. My own understanding of Genesis 6:1-4 leads me to believe that “the sons of God” mentioned here were indeed fallen angels. Whether or not the offspring of their union with the daughters of men were the giants referred to in v. 4 is difficult to say. The text may indicate that at least some of these giants existed prior to the sexual union of the sons of God with the daughters of men. For my part, I certainly believe these stories are true. It is quite possible that the sons of God in Genesis 6 are the angels referred to by both Jude (v. 6) and Peter (2 Pet. 2:4).

There is not a great deal of biblical revelation concerning the afterlife of the righteous in the days of Noah. But here is something to consider. In Genesis 5:21-24 we have the story of Enoch. Verse 24 states, “And Enoch walked with God; and he was not, for God took him.” Although this verse does not give us much information, it certainly suggests an afterlife in the

presence of God for the just and righteous who, like Enoch, walked with God. [Note: also see [Probe Answers Our E-Mail: Is There a Specific Reference to Heaven or Hell in the OT?](#) ]

Finally, although I'm not entirely sure what you are asking about in your third question, there is an account in 1 Samuel 28 about King Saul and a medium, in which Saul asks the medium to call up the prophet Samuel from the dead. In this case, God allowed Samuel to return to deliver to Saul a message of judgment against both he and Israel. When Samuel appears, he asks Saul, "Why have you disturbed me by bringing me up?" (v. 15). Thus, this may be the sort of example you were looking for. Of course, it's important to point out that this is an exceptional event. Normally, the dead are not permitted to return to the land of the living after death (see Luke 16:19-31). However, in particular cases the sovereign Lord may, for His own purposes, permit such a thing (as in the case of Samuel).

God bless you,

# Genesis Unbound

## A New and Different Genesis 1

Have you ever read a book that totally changed the way you thought about something? Or heard an idea that gave you a completely new picture of something you thought you knew well? This essay is about just such a book.

Most of us know the verses of Genesis 1 so well we could

recite parts of them from memory. Some have studied them for years and read shelves of books about what the first chapters of Genesis mean. But what if someone suggested that most of what you have thought and pictured and been told about those early chapters might not be quite right? Would you reach for the red tag of "Heresy" to slap on the book? Would you be sure that the author could not possibly be right? In this discussion we are reviewing a new book called *Genesis Unbound*, and it may well cause you to reexamine what you thought Genesis 1 and 2 are about.

The author, Dr. John Sailhammer, is not a newcomer to theology. Educated at Dallas Theological Seminary and UCLA, Dr. Sailhammer taught at Trinity Evangelical Divinity School. He now teaches at Northwestern College. He has written several well-respected books on the first five books of the Bible (the Pentateuch) and is considered an excellent conservative Old Testament scholar. The commentary on Genesis in Zondervan's *Expositor's Bible Commentary* is by Dr. Sailhammer. His recent book gives a surprisingly new, and yet very old, look at the first chapters of Genesis.

To lay the groundwork for any new view, it is important to understand the prevailing view first. Sailhammer helpfully provides five basic assumptions that he says make up the core beliefs of nearly all the current views.

The first of these core assumptions is that the first verse of Genesis 1, "In the beginning God created the heavens and the earth," refers to the creation of some sort of unformed mass that God will make into a universe as the six days progress.

The second assumption that almost all commentators make about Genesis 1 is that the "light" created on day one was something unique and temporary for dividing the days until the fourth day when God would create the sun, moon, and stars.

Third, it is generally assumed that the sun, moon, and stars

were actually created on the fourth day.

Fourth, until recent science began to question the assumption, it has been almost universally believed that the days of Genesis 1 were normal, 24-hour days. Some placed a gap between the first and second verses, to place all of the geological ages, but this was not a widely held view. In our century it is common to make the days long ages so the Bible will agree with the consensus of modern geology.

Lastly, the earth that God is making ready for man in Genesis 1 has almost always been seen as the whole planet. Accordingly, verse one is about the creation of the whole universe, and verse two begins a description of how God fashioned the earth for (1) the creatures He was about to make, and (2) a home for the two people He would make in His own image.

But suppose there were some assumptions in this list that we did not need to make? How would that change our view of these first chapters of Genesis? Next we will consider how a Jewish reader of Moses' time might have understood Genesis 1.

## **The Forming of the Promised Land**

We all make assumptions when we read or hear something; we cannot think without a structure. But sometimes we make unnecessary assumptions that hinder our understanding. Of the five assumptions that many make about Genesis 1, could some be unnecessary baggage? The first assumption was that "In the beginning God created the heavens and the earth" describes an initially chaotic state out of which God would create the material world. But suppose instead that this verse actually described God's creation of heaven and earth? Dr. Sailhammer carefully develops the view that in the Old Testament, the Hebrew word for "In the beginning" often describes a period of indeterminate time. Genesis 10:10 says "And the beginning of his kingdom was Babel and Erech and Accad and Calneh."

Jeremiah 28:1 describes "The beginning of the reign of Zedekiah king of Judah, in the fourth year." Genesis Unbound suggests that we picture God creating the whole universe, "the heavens and the earth," over some unspecified time in the past.

When we begin verse two, "And the earth was formless and void," Sailhammer says it is not talking about the whole of planet earth. What are Moses' five books about? The nation of Israel. What is the whole theme of the Pentateuch? How God chooses a people and takes them to the promised land He has made for them. Why not give "earth" in verse two its other meaning of "land"? And specifically "The Land." God, through Moses, is telling us how He prepared the Promised Land for the people He already knew He would choose.

Startling?

Why, then, was the land "formless and void?" It wasn't! Genesis Unbound contends that this assumption crept in with the first Greek translation of the Bible, the Septuagint. It translates the Hebrew into Greek as "unseen and unformed" in order to harmonize the Bible with the view of the Greeks, who believed the world was formed out of chaos, so the translators wanted to seem relevant and mirrored that idea! According to Dr. Sailhammer, it would be better to translate the phrase as "an uninhabitable wasteland." God had not yet prepared it for man, but it was not chaos either. God was preparing to take the "wasteland" and make it the "promised land."

On day two, God prepares the sky for the land He will soon begin to make ready. The word often translated "firmament" Sailhammer suggests actually refers to what we would call the sky. And the waters above the firmament are the clouds that God sets in the sky. Interestingly, this is exactly what John Calvin thought. He wrote, "To my mind, this is a certain principle, that nothing is here treated of but the visible form of the world. He who would learn astronomy . . . let him

go elsewhere.”

On day three, God gathers together the seas and makes the dry land appear. The land is brought out of the water to make a fit place for Adam and Eve. The water settles into rivers and lakes. The Hebrew word for any body of water can be translated “sea.” Here it is plural, while if it referred to the ocean it would be singular.

Then God creates “fruit trees.” In Sailhammer’s understanding, that is what the words describe, not all kinds of vegetation.

At the end of the third day, the Promised Land has been prepared with clouds in the sky, rivers and lakes, and fruit trees for food.

## **The Filling of the Land**

The book *Genesis Unbound* presents what seems at first a completely new understanding of Genesis 1. But by seeing the chapter as God preparing the Promised Land, first for Adam and Eve, and eventually for His chosen nation Israel, many problems are avoided. Dr. Sailhammer takes the days to be normal 24-hour days, but sees the creation of the whole universe as having taken place in the first verse, over some unstated period of time in the past. Then God focuses in on His preparation of a place for His last creation to live.

Now, on day four, God gives a new purpose to the sun, moon, and stars that have been shining since He created them “in the beginning.” On day four, God declares they are to guide the people He is about to make. They will act as measures of time; they will serve humanity. There have been no people placed on earth yet, so the sun has merely been a star in the sky. Now God speaks, and the host of heaven takes on a new function as celestial markers. On the first three days, God created the land and places for things. Now He is declaring what is to fill each part of the stage, and what their functions will be.

On day five the same word for “create” that was used in verse one occurs again: bara. Why does God use this word again? Dr. Sailhammer suggests that Moses is drawing our attention back to 1:1 to remind us that only God can create things out of nothing. But on day five, when God populates this new land He has made, it is with animals and birds that are descendants of those He made on day one. God speaks, His creation responds, He sees it is good and blesses His creation.

Day six is the climax of the account, and the center of God’s activity. From nothing God has created the universe in Genesis 1:1. He has prepared a special land and populated it with His creations. And then we come to man.

Here God changes His whole approach. He now announces, “Let us make man in Our image.” And in order for the creation to fully bear His image, He makes them male and female. Sailhammer makes an interesting point here as he discusses why the text suddenly says “Let us.” He sees a reflection of God’s character in the fact that it takes both a male and female before God’s image can be born by humans. Just as men and women complement one another, so too the “us” points to the relationships that exist within the Godhead. So, in Dr. Sailhammer’s fascinating argument in *Genesis Unbound*, when God sets out to create “in His image” for the first time, He first creates a special land for them, then appoints the sun, moon, and stars to a new purpose, fills the land, sky, and waters with creatures, and creates a garden for Adam and Eve to live in.

Some might object that God doesn’t seem to do very much. But, Sailhammer argues that God had already created everything out of nothing in Genesis 1:1. Now, God speaks ten times (just as He spoke the Ten Commandments) and makes a land perfect for humans to live in. He creates for Adam and Eve a garden. And that garden will someday be the very land that God promises to Abraham, and eventually brings the nation of Israel to, for as we will see next, Eden is the land of Israel.

## Does Genesis 2 Contradict Genesis 1?

At last we come to day seven. God has created a place for each of His creations, and just as He instructs His creation to do in the Ten Commandments, God Himself is said to “rest.”

He has taken a wild land, unfit for people, and made it into a literal garden spot. Now, in a pattern that He sets for His creation to follow, He takes a day of rest. This becomes deeply significant later on when Moses receives the Ten Commandments. In Exodus 20:11 God says “For in six days the LORD made the sky, the earth, and the seas and all that is in them, and rested on the seventh day.” Thus the divine pattern is also to be the human plan. Even now that we are burdened with the effects of the Fall, even in our rebelliousness, God still wants His creation to rest, and take time to bless our Creator.

Then what are we to make of Genesis 2? Many modern scholars have spoken of two creation accounts and seen this as an inconsistency or an error in the Bible. The usual answer has been that the account in Genesis 2 is a narrowing of focus from chapter 1, looking just at the creation of man and woman in detail. If this is so, Dr. Sailhammer asks, then why not see Genesis 1 as describing the same place as Genesis 2, Eden? Thus he continues his argument into chapter 2.

In Genesis 2:5-6, some have seen a contradiction with the first chapter. How can there be no shrubs or plants or rain? What *Genesis Unbound* sees in these verses is a comparison being set up between before and after the Fall. There are no “shrubs of the field” or “plants of the field” because these would come as a result of Adam and Eve’s disobedience. These are the “thorns and thistles” and “plants of the field” that Adam is told he must work to cultivate in Genesis 3:18-19.

When the text says “it had not rained on the earth,” it is a contrast to when God will “send rain on the earth” during the

Flood. And there was “no man to cultivate the ground” because this too would come as a result of the Fall in Genesis 3:23. So the text is already preparing us for what the results of man’s disobedience will be, even as the Garden is being made.

Dr. Sailhammer also finds the large amount of space devoted to locating Eden of considerable significance. While modern commentators have despaired of ever locating the exact place, he sees the length of the description as indicative that at least Moses expected people to recognize where Eden was located.

The primary way that Eden is located is by the rivers that flow from it. And what are those rivers? One of them is the Pishon, a river now unknown. But the second is the Gihon, which flows around the land of Cush. Since Cush is roughly the same as Egypt, might not the river Gihon be the Nile River of Egypt? And the other two rivers are the Tigris and the Euphrates. Sailhammer thinks it is not coincidence that two of these rivers are exactly the ones that God uses to explain to Abraham where the promised land will be (Gen. 15:18).

Next we will consider why Eden and Israel are so closely connected, and whether Genesis should be read as poetry or not.

## **Genesis Unbound and the Rest of Scripture**

Dr. John Sailhammer’s new book *Genesis Unbound* has many novel explanations of Genesis 1 and 2. But at the same time, it both helps us see how a Hebrew reader might have understood what Moses wrote and answers a number of puzzling questions that most of us have had about the text. One of these questions is, “What became of Eden after God devoted so much care to making it?”

Earlier we looked at how the rivers God uses to describe where Eden was, are much the same as the ones He uses to tell

Abraham where the promised land was to be. Think of the parallels. In the same way that God prepares a special place for Adam and Eve, a place they will be driven out of if they are disobedient, so too, He promises first Abraham, and then the whole nation of Israel a special place, that they will be driven out of if they are disobedient. In fact, both are sent the same direction, to the east, when they do disobey. And then, where will the Messiah come to? Exactly the same area as the first Adam lived! And where is the New Jerusalem of Revelation 21 located? Just where God placed the first Jerusalem, which was in the same place that He created for Adam and Eve: Eden!

In this view, the whole Bible ties together in a way that makes complete sense and has God wasting nothing as He prepares a land for His people. The blessings and curses that form so much a part of the later books of the Pentateuch, can now be seen as being foreshadowed in God's initial command to Adam and Eve.

But should we even be reading Genesis so literally? After all, isn't Genesis really poetry? As an Old Testament scholar, Sailhammer makes short work of the argument. What is it that characterizes all Hebrew poetry? Parallelism and meter. Parallelism is the use of two lines to express the same idea in two ways. For example:

The Lord is a great God  
And a great king above all gods.

These express the same thought in two related ways. Hebrew poetry also has a certain meter, where either the number of words or symbols will be approximately the same between two lines. Does Genesis 1 or 2 fit that pattern? Absolutely not. And in fact, Sailhammer chides Evangelicals, who, to try to take these chapters less literally, speak of "poetry-like" language. As he says, this seems like "little more than an attempt to dismiss the obvious intent of these narratives to

tell us, in literal terms, what actually happened at creation.”

In conclusion, he considers the question, “Is the Big Bang being described in Genesis 1:1?” Interestingly enough, his answer is a fairly firm, “No.” As he pointedly comments, “When understood as the Big Bang, creation becomes just another example of the forces of the physical world we see around us today. . . . Our world, however, cannot be traced back to the divine act of creation. Science and history will always be separated from the divine acts of creation.”

You will have to read all of Dr. Sailhammer’s provocative book to make up your own mind. But at least give him the chance to make his case directly from the text. *Genesis Unbound* is a book to stir your thinking, and should be read slowly. But go back and read Genesis to be reminded of God’s greatness in His creation.

## **Why We Believe in Creation (and Not Unguided Evolution)**

*Dr. Ray Bohlin explains why our understanding of the origins of life is directly related to our understanding of God. A Christian understands that God created us intentionally. We are not the result of some random, evolutionary accident. A consistent biblical worldview will be seen in how we consider the question of creation.*

# The Historical Nature of Genesis

I am often asked why the creation/evolution controversy is so important. Tempers flare, sometimes explosively, over this issue. Some people think, there are enough problems with the image of evangelicals without creating unnecessary controversies. Is it just a matter of interpreting Genesis? If so, then let the theologians debate the issues and leave me out. But let's not obscure the simple message of the gospel. Others wonder, is it just a scientific argument? If so, then why should I care about the controversy? I'm not a scientist. Well, I think much more is at stake than that. It has to do with the very nature and character of God!

We must realize that the book of Genesis is the foundation of the entire Bible. The word Genesis means "beginnings." Genesis tells the story of the beginning of the universe, solar system, earth, life, man, sin, Israel, nations, and salvation. An understanding of Genesis is crucial to our understanding of the rest of Scripture.

For example, Genesis chapters 1-11 are quoted or referred to more than 100 times in the New Testament alone. And it is over these chapters that the primary battle for the historicity of Genesis rages. All of the first eleven chapters are referred to in the New Testament. Every New Testament author refers somewhere to Genesis 1-11.

Jesus Himself, on six different occasions, refers to each one of the first seven chapters of Genesis, thus affirming His belief in their historical nature. He refers back to Adam and Eve to defend His position on marriage and divorce in Matthew 19:3-6. He makes His argument a historical one when He says that "from the beginning" God created them male and female. Jesus affirms that Adam and Eve were real people. Jesus' comments are in an historical context.

Jesus affirms the historicity of Cain and Abel in Matthew

23:29-36. In this passage, Jesus connects the blood of righteous Abel to the blood of the prophet Zechariah. The murder of Zechariah at the door of the Temple was within the last 400 years and was clearly historical. If this was historical, then so was the murder of Abel!

Jesus confirms the historical nature Noah and the Flood in Matthew 24:37-39. The time before Noah is related to the time that Christ returns. If the flood is just a story to communicate a pre-New Testament vision of the gospel, then is Jesus return just another story to communicate some other spiritual truth? The historicity of Genesis 1-11 is tied to many aspects of Jesus' teachings.

In many ways it is difficult to separate the book of Genesis, even the first eleven chapters, from the rest of Scripture, without literally rejecting the inspiration of Scripture and the divine nature of Jesus. It is hardly possible to assume that Jesus was knowingly deceiving these pre-modern people in order to communicate the gospel in a context they understood.

How can the first 11 chapters be separated from even the rest of Genesis? The time of Abraham has been verified by archaeology. The places, customs, and religions spoken in Genesis related to Abraham are accurate. The story of Abraham begins in Genesis 12. If Genesis 1 is mythology and Genesis 12 history, where does the allegory stop and the history begin in the first 11 chapters? It is all written in the same historical narrative style.

## **The Nature of the Evolutionary Process**

Many believers do indeed call Genesis 1-11 allegory or myth. They boldly declare that God simply used evolution as His method to create! The purpose of the creation account is only to promote God as a transcendent all-powerful God who is completely different from the gods of the surrounding Near East cultures of that time. This is called theistic evolution.

Without question, God could create by any means He chose. But is the God of the Scriptures the god of evolution?

My simple answer to that question is **no!** At least not the evolution which is communicated in today's textbooks and university classrooms. The nature of the evolutionary process is contrary to the nature of God.

The principles behind evolution are ideas such as the selfish gene, and survival of the fittest. An offshoot of evolutionary thinking is the relatively new field of sociobiology. In another essay ([Sociobiology: Evolution, Genes and Morality](#)), I defined sociobiology as the biological basis for ALL social behavior. In other words, our behaviors are the result natural selection as much as our physical characteristics.

For instance, if you ask a sociobiologist the question, why do we love our children, he or she will answer that "we love our children because it works." It is an effective means to raise productive offspring, so it was "selected for" over time. Ultimately, then, from this perspective, all behavior is selfish. Everything we do is geared toward furthering our own survival and the production and the survival of our own offspring. Our behaviors have been selected over time to aid in our survival and reproduction and that's all.

Evolution is a wasteful, inefficient process. Carl Sagan says that the fossil record is filled with the failed experiments of evolution. Evolutionary history is littered with dead-ends and false starts. Stephen Jay Gould characterizes the nature of the evolutionary process as one of contingency history. Organisms survive primarily by chance rather than some inherent superiority over other organisms. There is no purpose, no goal, no meaning at all.

The question has to be, would God use such a method? A person's character is reflected in his or her work. Not just in what is produced, but the process also is indicative of the

mind that is at work. For instance, the paintings of Vincent van Gogh reveal a troubled mind, not just in the subjects he painted but also in the colors he used and character of the brush strokes. And you don't have to be an art critic to see this in his paintings, particularly those just before he took his own life.

God is a person and thus has character. We should see God's character in His work as well as in His method. First, let's take a brief look at the revelation of God's character.

Jesus is the perfect manifestation of God's character. Jesus said, "Anyone who has seen me has seen the Father" (John 14:9-11). Not only that, but Jesus is the Person of the Godhead that brought about the creation. Colossians 1:16 reads, "All things were created by Him, for Him, and through Him." John 1:3—"Nothing came into being apart from Him." Hebrews 1:2—"By Whom and through Whom the worlds were created."

Since Jesus is a person and is also the creator, then if Jesus used evolution as his method to create, then we should see a correlation between the character of Jesus and the process of evolution.

## **The Personal Character of Jesus the Creator**

If Jesus used evolution as His method of creation, then His character must be reconcilable with the evolutionary process. We discussed above the nature of the evolutionary process. Now I want to take a brief look at the character of God. A detailed unveiling of Jesus' character is found in Matthew 5. This is not an ideal we are to strive for, but a picture of what can happen in the life of a believer who is fully yielded to Christ.

In Matthew 5:3, Jesus says, "Blessed are the poor in spirit."

This phrase describes one who allowed himself to be trodden down. Jesus exemplified a security in Himself that did not become offended when He was put down. An evolutionarily successful organism seeks its own interests, not the interests of others.

In verse 5, Jesus says, "Blessed are the gentle." The mild, patient and long-suffering are not likely to succeed in an evolutionary world. The meek are pushed aside by the self-assertive. Ultimately it is the strong, the fit and the selfish that are the ones who succeed!

In verse 7, Jesus says, "Blessed are the merciful." The struggle for existence is never motivated by mercy. Mercy could only be tolerated if shown towards a member of the same species that shares a significant proportion of their genes. To be merciful outside your immediate family unit may compromise your survival or the survival of your offspring, neither of which is productive in an evolutionary world.

In verse 9, Jesus says, "Blessed are the peacemakers." Jesus also said we should love our enemies. In many mammals, such as lions and gorillas, the first act of a new dominant male following his ascent to power is to kill the younger offspring sired by the previous dominant male. This has the double effect of removing offspring from the group that are not his, and bringing their mothers into heat so he can mate with them to produce his own offspring. This is selfish natural selection at work. Where is the mercy, the gentleness, the peacemaking in these events?

The struggle for existence among living organisms today is a result of sin entering a perfect creation and is not the method of bringing that creation into existence.

Romans 8:19-22 reveals that nature is groaning in the pains of childbirth, because of being subjected to futility, for redemption from the curse. Nature is in turmoil. Organisms do

struggle for survival. Competition is often fierce. While there are many examples of cooperation in nature, it can always be explained in terms of selfish gain and cooperation is the easiest way to obtain the desired end. Organisms do act selfishly. But ***to hear nature's groaning and interpret it as the song of creation is to be ignorant of both God and nature!***

Some Christians debate the effects of the fall and how far back into earth history the effects can be realized. But the point is that something happened at the fall. This passage makes clear that the creation does not function today as God intended it to and it is not the creation's fault. The creation was subjected to futility because of man's sin.

When we take the time to investigate whether the God revealed in the Scriptures is the same God who created through the evolutionary process as it is currently understood, the answer is clear. The God of the Scriptures is not the god of evolution.

## **A Modern Twist on Theistic Evolution**

In a modern formulation, some theistic evolutionists are declaring that not only **could** God use evolution, but He **must** use some form of evolution to create. These individuals indicate that there is a "functional integrity" to the universe that God created initially and for God to intervene in any way, is to admit that He made a mistake earlier. And of course, God does not make mistakes. Physics professor Howard van Till from Calvin College describes:

...a created world that has no functional deficiencies, no gaps in its economy of the sort that would require God to act immediately, temporarily assuming the role of creature to perform functions within the economy of the creation that other creatures have not been equipped to perform."  
[*Christian Scholars Review*, vol. XXI:I (September 1991), p. 38].

Diogenes Allen from Princeton Theological Seminary put it this way:

According to a Christian conception of God as creator of a universe that is rational through and through, there are no missing relations between the members of nature. If, in our study of nature, we run into what seems to be an instance of a connection missing between members of nature, the Christian doctrine of creation implies that we should keep looking for one" [*Christian Belief in a Postmodern World* (Louisville: Westminster /John Knox Press, 1989), p. 53].

A loose paraphrase might be, "If you find evidence of a miracle, you need to keep looking for a naturalistic explanation." This view of creation seems awfully close to deism or semi-deism. Theistic evolutionists deny this, of course, by reminding us that, unlike deism, they firmly believe that God continuously upholds the universe. If He were to completely withdraw as deism holds, the universe would come apart.

But the Bible, particularly the gospels, is full of miracles. The Lord Jesus was born as a human baby in a stable, He changed water into wine, healed blindness and leprosy, fed multitudes on scraps of food, raised people from the dead, died on a cross, and rose from the dead Himself. The response is that this is salvation history which is entirely different from natural history. Diogenes Allen put it this way:

In general we may say that God creates a consistent set of law-like behaviors. As part of that set there are the known physical laws. These laws apply to a wide variety of situations. But in certain unusual situations such as creating a chosen people, revealing divine intentions in Jesus, and revealing the nature of the kingdom of God, higher laws come into play that give a different outcome than normal physical laws which concern different situations. The normal physical laws do not apply because we

are in a domain that extends beyond their competence.

It is true that we do not invoke God to account for repeatable observable events such as apples falling from trees. But what could be more unusual and beyond the competence of physical laws than the creation of life, the creation of coded information in DNA, the creation of a human being? Even in this framework, it seems reasonable to assume that these events could also be a part of salvation history. What we end up with, however, is a view that says that the activity of the Creator cannot be detected in any of the workings of nature. Once again, the God of the Scriptures is not the god of evolution.

## **The Theology of Romans 1**

The world of nature that is left to us by those who believe in theistic evolution is indistinguishable from that of the philosophical naturalist or even the pantheist. Whether you accept Genesis 1 and 2 as being historical or not, the clear tenor of the narrative is of a God who interacts with his creation, not one who just lets it unwind according to some preconceived plan. How is a scientist supposed to see God in the creation if all there is, from his perspective, is natural mechanisms?

The pantheist could see this perspective as compatible with his view of the natural world as well. The pantheist sees god as an impersonal force that is present all throughout nature. god is all and in all. All is one. Matter itself contains the inherent ability to bring about complexity according to the mind which permeates all of nature. Similarly, theistic evolution requires that matter contains within itself, by God's creative design, the full capacity to actualize all of the physical and biological complexities that exist. The distinctions of Christian theism become blurred.

Finally, if God created through evolution, what are we to do

with Romans 1:18-20? Paul says:

For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who suppress the truth in unrighteousness, because that which is known about God is evident within them; for God made it evident to them. For since the creation of the world His invisible attributes, His eternal power and divine nature, have been clearly seen, being understood through what has been made, so that they are without excuse.

The fact that God exists, and even a few things about His power and nature, is clearly understood by observing the natural world, that which He created. If God's method of creation is indistinguishable from that of a naturalist or a pantheist, where is this so-called evidence?

Princeton theologian, Diogenes Allen, says that "even though nature does not establish God's existence, nature points to the possibility of God. That is, it raises questions which science cannot answer and which philosophy has been unable to answer" (*Christian Belief in a Postmodern World*, p.180). But Romans declares that his invisible nature, eternal power, and deity are **clearly seen through what has been made!** This is more than raising questions! If God has created through naturalistic evolution then men and women have quite a few excuses. If natural processes are all that is needed, who needs God?

One final note. It has been interesting to me that, as I have observed theistic evolutionists throughout my academic career, I have found that evolutionists have little tolerance for theistic evolutionists because if you accept evolution, then why do you need God? Perhaps even more importantly, they are puzzled about why one would continue to believe in the God of the Bible if you have concluded that He used inefficient, chancey, contingent, and messy natural selection as His method. Even they see the incompatibility of the two.

In summary, Genesis and creation are central to Scripture and Jesus appears to have believed in an historical and interactive creation. Evolution is contrary to the nature and character of God. And, if natural processes are all that is needed for creation, then men are indeed full of excuses to the existence of God, contrary to Romans 1.
