

Is the World Flat? How Should Christians Respond in Today's Global World

Drawing from Thomas Friedman's book, The World is Flat, Kerby Anderson looks at some of the major new factors in our world which cause not only countries and companies, but also individuals to think and act globally. Most of the factors discussed are givens against which Kerby helps us to consider their impact on Christianity and the spread of the gospel on a global basis.

Introduction

Is the world flat? The question is not as crazy as it might sound in light of the book by Thomas Friedman entitled *The World is Flat: A Brief History of the Twenty-First Century*. His contention is that the global playing field has been leveled or flattened by new technologies.

In fourteen hundred and ninety-two when Columbus sailed the ocean blue, he used rudimentary navigational equipment to prove that the earth was *round*. More than 500 years later, Friedman discovered in a conversation with one of the smartest engineers in India that essentially the world was *flat*. Friedman argues that we have entered into a third era of globalization, which he calls Globalization 3.0 that has flattened the world.

The first era of globalization (he calls Globalization 1.0) lasted from when Columbus set sail until around 1800. "It shrank the world from a size large to a size medium. Globalization 1.0 was about countries and muscles."[\[1\]](#) The key change agent in this era was how much muscle your country had (horsepower, wind power, etc.). Driven by such factors as

imperialism and even religion, countries broke down walls and began the process of global integration.

The second era (he calls Globalization 2.0) lasted from 1800 to 2000 with interruptions during the Great Depression and World Wars I and II. "This era shrank the world from size medium to a size small. In Globalization 2.0, the key agent of change, the dynamic force driving global integration, was multinational companies."[\[2\]](#) At first these were Dutch and English joint-stock companies, and later was the growth of a global economy due to computers, satellites, and even the Internet.

The dynamic force in Globalization 1.0 was *countries* globalizing, while the dynamic force in Globalization 2.0 was *companies* globalizing. Friedman contends that Globalization 3.0 will be different because it provides "the newfound power for *individuals* to collaborate and compete globally."[\[3\]](#)

The players in this new world of commerce will also be different. "Globalization 1.0 and 2.0 were driven primarily by European and American individuals and businesses. . . . Because it is flattening and shrinking the world, Globalization 3.0 is going to be more and more driven not only by individuals but also by a much more diverse—non-Western, non-white—group of individuals. Individuals from every corner of the flat world are being empowered."[\[4\]](#)

The Flatteners

Friedman argues in his book that the global playing field has been flattened by new technologies.

The first flattener occurred on November 9, 1989. "The fall of the Berlin Wall on 11/9/89 unleashed forces that ultimately liberated all the captive peoples of the Soviet Empire. But it actually did so much more. It tipped the balance of power across the world toward those advocating democratic,

consensual, free-market-oriented governance, and away from those advocating authoritarian rule with centrally planned economies.”[\[5\]](#)

The economic change was even more important. The fall of the Berlin Wall encouraged the free movement of ideas, goods, and services. “When an economic or technological standard emerged and proved itself on the world stage, it was much more quickly adopted after the wall was out of the way.”[\[6\]](#)

Thomas Friedman also makes a connection between the two dates 11/9 and 9/11. He noted that in “a world away, in Muslim lands, many thought [Osama] bin Laden and his comrades brought down the Soviet Empire and the wall with religious zeal, and millions of them were inspired to upload the past. In short, while we were celebrating 11/9, the seeds of another memorable date—9/11—were being sown.”[\[7\]](#)

A second flattener was Netscape. This new software played a huge role in flattening the world by making the Internet truly interoperable. Until then, there were disconnected islands of information.

We used to go to the post office to send mail; now most of us send digitized mail over the Internet known as *e-mail*. We used to go to bookstores to browse and buy books, now we browse digitally. We used to buy a CD to listen to music, now many of us obtain our digitized music off the Internet and download it to a MP3 player.

A third flattener was work flow software. As the Internet developed, people wanted to do more than browse books and send e-mail. “They wanted to shape things, design things, create things, sell things, buy things, keep track of inventories, do somebody else’s taxes, and read somebody else’s X-rays from half a world away. And they wanted to be able to do any of these things from anywhere to anywhere and from any computer to any computer—seamlessly.”[\[8\]](#)

All the computers needed to be interoperable not only between departments within a company but between the systems of any other company. Work flow software made this possible.

Where will this lead? Consider this likely scenario. When you want to make a dentist appointment, your computer translates your voice into a digital instruction. Then it will check your calendar against the available dates on the dentist's calendar. It will offer you three choices, and you will click on the preferred date and hour. Then a week before your appointment, the dentist's calendar will send you an e-mail reminding you of the appointment. The night before your appointment, a computer-generated voice message will remind you.

The fourth flattener is open-sourcing. Open-source comes from the idea that groups would make available online the source code for software and then let anyone who has something to contribute improve it and let millions of others download it for free.

One example of open-source software is Apache which currently powers about two-thirds of the websites in the world. Another example of open-sourcing is blogging. Bloggers are often one-person online commentators linked to others by their common commitments. They have created essentially an open-source newsroom.

News bloggers were responsible for exposing the bogus documents use by CBS and Dan Rather in a report about President Bush's Air National Guard service. Howard Kurtz of *The Washington Post* wrote (Sept 20, 2004): "It was like throwing a match on kerosene-soaked wood. The ensuing blaze ripped through the media establishment as previously obscure bloggers managed to put the network of Murrow and Cronkite on the defensive."

Another example of open-sourcing is the Wikipedia project

which has become perhaps the most popular online encyclopedia in the world. Linux is another example. It offers a family of operating systems that can be adapted to small desktop computers or laptops all the way up to large supercomputers.

A fifth flattener is outsourcing. In many ways, this was made possible when American companies laid fiber-optic cable to India. Ultimately, India became the beneficiary.

India has become very good at producing brain power, especially in the sciences, engineering, and medicine. There are a limited number of Indian Institutes within a population of one billion people. The resulting competition produces a phenomenal knowledge meritocracy. Until India was connected, many of the graduates would come to America. "It was as if someone installed a brain drain that filled up in New Delhi and emptied in Palo Alto."[\[9\]](#)

Fiber-optic cable became the ocean crosser. You no longer need to leave India to be a professional because you can plug into the world from India.

A sixth flattener was offshoring. Offshoring is when a company takes one of its factories that is operating in Canton, Ohio and moves the whole factory to Canton, China.

When China joined the World Trade Organization, it took Beijing and the rest of the world to a new level of offshoring. Companies began to shift production offshore and integrate their products and services into their global supply chains.

The more attractive China makes itself offshoring, the more attractive other developed and developing countries have to make themselves. This created a process of competitive flattening and a scramble to give companies the best tax breaks and subsidies.

How does this affect the United States? "According to the U.S.

Department of Commerce, nearly 90 percent of the output from U.S.-owned offshore factories is sold to foreign consumers. But this actually stimulates American exports. There is a variety of studies indicating that every dollar a company invests overseas in an offshore factory yields additional exports for its home country, because roughly one-third of global trade today is within multi-national companies.”[\[10\]](#)

The seventh flattener is supply chaining. “No company has been more efficient at improving its supply chain (and thereby flattening the world) than Wal-Mart; and no company epitomizes the tension the supply chains evoke between the consumer in us and the worker in us than Wal-Mart.”[\[11\]](#)

Thomas Friedman calls Wal-Mart “the China of companies” because it can use its leverage to grind down any supplier to the last halfpenny. And speaking of China, if Wal-Mart were an individual economy, it would rank as China’s eighth-biggest trading partner, ahead of Russia, Australia and Canada.

An eighth flattener is what Friedman calls *insourcing*. A good example of this is UPS. UPS is not just delivering packages, the company is doing logistics. Their slogan is Your World Synchronized. The company is synchronizing global supply chains.

For example, if you own a Toshiba laptop computer under warranty that you need fixed, you call Toshiba. What you probably don’t know is that UPS will pick up your laptop and repair it at their own UPS-run workshop dedicated to computer and printer repair. They fix it and return it in much less time than it would take to send it all the way to Toshiba.

A ninth flattener is in-forming. A good example of that is Google. Google has been the ultimate equalizer. Whether you are a university professor with a high speed Internet connection or a poor kid in Asia with access to an Internet café, you have the same basic access to research information.

Google puts an enormous amount of information at our fingertips. Essentially, all of the information on the Internet is available to anyone, anywhere, at anytime.

Friedman says that, “In-forming is the ability to build and deploy your own personal supply chain—a supply chain of information, knowledge, and entertainment. In-forming is about self-collaboration—becoming your own self-directed and self-empowered researcher, editor, and selector of entertainment, without having to go to the library or movie theater or through network television.”[\[12\]](#)

A tenth flattener is what he calls “the steroids.” These are all the things that speed the process (computer speed, wireless).

For example, the increased speed of computers is dazzling. The Intel 4004 microprocessor (in 1971) produced 60,000 instructions per second. Today’s Intel Pentium 4 Extreme has a maximum of 10.8 billion instructions per second.

The wireless revolution allows anyone portable access to everything that has been digitized anywhere in the world. When I was at graduate school at Yale University, all of us were tied to a single mainframe computer. In order to use the computer, I had to hand computer cards to someone in the computer lab in order to input data or extract information. Now thanks to digitization, miniaturization, and wireless I can do all of that and much more from my home, office, coffee shop, airport—you name it.

Biblical Perspective

Although futurists have long talked about globalization and a global village, many of these forces have made that a reality. At this point it might be valuable to distinguish between *globalization* and *globalism*. Although these terms are sometimes used interchangeably, I want to draw some important

distinctions. Globalization is used to describe the changes taking place in society and the world due to economic and technological forces. Essentially, we have a global economy and live in the global village.

Globalism is the attempt to draw us together into a new world order with a one world government and one world economy. Sometimes this even involves a desire to develop a one world religion. In a previous article ([“Globalism and Foreign Policy”](#)), I addressed many of the legitimate concerns about this push towards global government. We should be concerned about political attempts to form a new world order.

On the other hand, we should also recognize that globalization is already taking place. *The World is Flat* focuses on many of the positive aspects of this phenomenon, even though there are many critics would believe it may be harmful.

Some believe that it will benefit the rich at the expense of the poor. Some believe it will diminish the role of nations in deference to world government. These are important issues that we will attempt to address in future articles.

For now, let's look at some important implications of a flat world. First, we should prepare our children and grandchild for global competition. Thomas Friedman says that when he was growing up his parents would tell him “Finish your dinner. People in China and India are starving.” Today he tells his daughters, “Girls, finish your homework—people in China and India are starving for your jobs.”[\[13\]](#)

Another implication is the growing influence of the two countries with the largest populations: China and India. Major companies are looking to these countries for research and development. The twentieth century was called “the American Century.” It is likely that the twenty-first century will be “the Asian Century.”

These two countries represent one-third of the world's

population. They will no doubt transform the entire global economy and political landscape.

Students of biblical prophecy wonder if these two countries represent the “Kings of the East” (Rev. 16:12). In the past, most of the focus was only on China. Perhaps the Kings (plural) represent both China and India.

A final implication is that this flattened world has opened up ministry through the Internet and subsequent travel to these countries. Probe Ministries, for example, now has a global ministry. In the past, it was the occasional letter we received from a foreign country. We now interact daily with people from countries around the world.

Last month the Probe website had nearly a quarter of a million visitors from over 140 countries. These online contacts open up additional opportunities for speaking and ministry overseas.

The flattening of the world may have its downsides, but it has also opened up ministry in ways that were unimaginable just a few years ago. Welcome to the flat world.

UN Conferences

Habitat II and Sustainable Development

Although United Nations conferences have been taking place frequently over the last two decades, most Americans have ignored the proceedings and their ominous implications. Recent conferences in Cairo, Beijing, and Istanbul have been a vivid reminder of the radical ideology of the UN and the threat it poses to our faith, family, and freedom.

The direction of the last few conferences illustrates this point. The 1992 Earth Summit in Rio de Janeiro established an environmental foundation for all the UN's radical social and economic agendas. The 1994 Cairo Conference focused on population control and attempted to push abortion and contraception as solutions to the perceived "problem" of overpopulation. The 1995 Women's Conference in Beijing, China, proved to be the most radical of all. It continued to push abortion as a human right and attempted to make sexual orientation a human right by promoting the idea that genders are not clearly defined but are socially constructed. The White House has already created an Inter-Agency Council to implement the Beijing platform in the private sector and every executive agency.

The recently completed conference in Istanbul, Turkey, built

upon the foundation of the other conferences and was the culmination of the conferences. Wally N'Dow, Secretary General of Habitat II, predicted that the conference would be a "new beginning that will reflect and implement the actions called for at the unprecedented continuum of global conferences that have marked this closing decade of the century." He said that "a new global social contract for building sustainable human settlements must be forged" for the "new global urban world order." Mindful of the controversy surrounding the other conferences, he declared, "There will be no roll-back of any of the conferences, including Beijing."

Habitat II focused on the problems of urban centers. Its goal was to create "economically, socially and environmentally thriving urban communities" in order to better the lives of people living in third-world countries. Although the goals were commendable, the agenda of the conference participants went far beyond urban blight.

A key concept in the Habitat II agenda was sustainable development. In the school curriculum developed by the UN, sustainable development was defined as "meeting the needs of the present generation without damaging the Earth's resources in such a way that would prevent future generations from meeting [their needs]." It includes "changing wasteful consumption patterns" and "emphasizing equitable development" in order to "bridge the gap between rich and poor countries." In practice, sustainable development is a radical concept that will limit the amount of food, energy, or general resources that citizens of a nation can consume. Rather than consuming what they can afford, "rich" nations (like the U.S.) might only be allowed to consume what they need to stay alive.

One UN publication declares that we "must learn to live differently" and calls for this international agency to "ensure that the benefits of development are distributed equally." To achieve this so-called "equal distribution," there must be a redistribution of wealth throughout the

planet. The UN has already drafted specific plans for implementing sustainable development in the U.S. In spite of the frightening implications of these conferences, U.S. taxpayers have been footing the bill for them and their radical agendas.

Habitat II: Global Taxes and National Sovereignty

The most recent conference in Istanbul, Turkey, known as Habitat II is illustrative of another major concern: namely, the threat these conferences pose to our national sovereignty.

Habitat II called for national governments to manage economic systems. These include public and private investment practices, consumption patterns, and public policy. UN Secretary Boutros Boutros Ghali told the first plenary session that he wanted the conference to be a "Conference of Partners."

Another section was devoted to the international community and its involvement with national governments. The Global Plan of Action calls for the international community to force changes in the world's economic structures.

The UN also intends to reach sustainable development by changing the structure of national governments. In fact, the Habitat agenda depends upon UN oversight of national, regional, state, and local governments. The document asks city administrators to re-design their regulations, political systems, and judicial and legislative procedures. It was no accident that the conference was filled with mayors from many U.S. cities as well as from cities around the world.

The Habitat document proposed that "government at all levels should encourage . . . walking, cycling, and public transport . . . through appropriate pricing . . . and regulatory measures." Governments are charged with the responsibility of

encouraging citizens to walk, ride bicycles, or take public transportation. This would be accomplished by the heavy taxation and burdensome regulations often found in socialist economies.

UN Secretary General Boutros Boutros Ghali has also called for global taxes on international currency transactions, energy, and travel to fund the United Nations. During the conference, the U.S. was harshly criticized for being delinquent in its payment to the UN. It currently owes \$1.5 billion. Currently the U.S. pays about 25 percent of the UN budget and nearly 40 percent of the "peacekeeping" costs. The UN hopes that in the next few years they are able to implement this global tax so they can be free of U.S. influence and enact their radical global agenda.

This global tax proposed by Boutros Boutros Ghali would be received from international currency transactions, energy shipments, and international travel. If implemented, it would remove the UN's dependence on sovereign nations. No longer would the United States or other countries have a check and balance against an international organization. The UN could pay for its activities, fund UN peacekeeping forces, and conduct many of its affairs independently of the United States.

Canadian developer Maurice Strong is often considered a likely candidate to become the future Secretary General of the United Nations. He has called for a shift in our current thinking. He has stated that this change in thinking "will require a vast strengthening of the multilateral system, including the United Nations. . . . We must now forge a newEarth Ethic' which will inspire all people and nations to join in a new global partnership of North, South, East and West."

This global vision should especially concern Christians mindful of end-times prophecy. At the time when the world seems to be moving swiftly towards global government, the

prospects of a stronger United Nations autonomous of sovereign nations is a scary scenario. This bolder and stronger United Nations would further erode U.S. sovereignty and strengthen the hand of world leaders who are promoting globalist visions of a one-world government.

UN Conferences: Four Areas of Concern

Now I want to discuss the possible effects of the UN conferences on our families and communities. I see several issues on great concern to Christians.

The first issue is education. Many of the concepts from Habitat II, like "sustainable development," have already infiltrated America's schools. Textbooks promote global citizenship and minimize national sovereignty. Other textbooks blame rich northern countries (like the U.S.) for retarding the growth and development in lesser developed countries. "Tolerance" and "global peace" are emphasized as the ultimate aims of society. The Goals 2000 federal program for education in this country provides the perfect mechanism to transmit these global UN philosophies into school curricula. A second issue is the impact on families. The Habitat II conference continued the UN attempt to redefine the family. Many UN leaders see the traditional family as an obstacle to UN dominance.

The Habitat II platform stated that "in different cultural, political and social systems, various forms of the family exist." Many participants asked that "sexual orientation" be included as a civil rights category. In many ways, this merely extended the concept promoted during the Beijing Women's Conference that gender be defined not as male and female, but as one of five genders that are socially constructed. Habitat II also promoted "gendered cities" which are to be organized in terms of "gender roles." The third issue has to do with population. The UN Population Fund says that population growth is a key inhibitor of sustainable growth. UN recommendations

of population control are based upon the faulty premise that the world is in the midst of a population explosion that cannot be controlled. Participants raised the fear of losing resources even though there is empirical evidence to the contrary.

Because of the UN's anti-population bias, the Habitat II document emphasizes "sustainable development" as the mechanism for population control. Thus, "family planning" is a key concept, and the document therefore emphasizes surgical abortions and chemical abortions (RU-486). The Habitat platform specifically mentions "reproductive health services" for women in human settlements and calls for government management of economic and population growth.

A final issue concerns the area of ecology and pollution. At the 1992 UN Earth Summit, Canadian developer Maurice Strong stated, "It is clear that current lifestyles and consumption of large amounts of frozen convenience foods, use of fossil fuels, appliances, home and workplace air conditioners and suburban housing are not sustainable." Many believe Maurice Strong will probably succeed Boutros Boutros Ghali as UN Secretary General and are rightly concerned about his New Age views on ecology. The Habitat II document encourages nations to use heavy taxation and various regulations to ensure that citizens walk, ride bicycles, and take public transportation.

The threats posed by these UN Conferences (including the recent conference in Istanbul) are real. American citizens must fight these radical ideas and ensure that our politicians do not give away our sovereignty on the pretext of easing ecological problems. We should be good stewards of the environment, but we should not place that responsibility in the hands of those in the United Nations who want to use it as a tool for global dominance.

Globalism and the Traditional Family

Now I would like to turn our attention to the goals of the globalists. Though they are a diverse and eclectic group of international bankers, politicians, futurists, religious leaders, and economic planners, they are unified in their desire to unite the planet under a one-world government, a single economic system, and a one-world religion. Through various governmental programs, international conferences, and religious meetings, they desire to unite the various governments of this globe into one single network.

Although this can be achieved in a variety of ways, the primary focus of globalists is on the next generation of young people. By pushing global education in the schools, they believe they can indoctrinate them to accept the basic foundations of globalism. According to one globalist, global education seeks to “prepare students for citizenship in the global age.” Globalists believe that this new form of education will enable future generations to deal effectively with population growth, environmental problems, international tensions, and terrorism.

But several obstacles stand in the way of the globalists' goals. Consequently, they have targeted three major institutions for elimination because their continued existence impedes their designs to unite the world under a single economic, political, and social global network.

The three institutions under attack by globalists today are: the traditional family, the Christian church, and the national government. Each institution espouses doctrines antithetical to the globalist vision. Therefore, globalists argue, these institutions must be substantially modified or replaced.

The traditional family poses a threat to globalism for two reasons. First, it is still the primary socializing unit in our society. Parents pass on social, cultural, and spiritual

values to their children. Many of these values such as faith, hard work, and independence collide with the designs of globalists who envision a world in which tolerance for religion, dependence on a one-world global community, and international cooperation are the norm. These values are not taught in traditional American families, therefore globalists seek to change the family.

Second, parental authority in a traditional family clearly supersedes international authority. Children are taught to obey their parents in such families. Parents have authority over their children, not a national or international governmental entity. Globalists, therefore, see the traditional, American family as an enemy, not as a friend.

Well-known humanist and globalist Ashley Montagu speaking to a group of educators declared that, "The American family structure produces mentally ill children." From his perspective, the traditional family which teaches such things as loyalty to God and loyalty to country is not producing children mentally fit for the global world of the twenty-first century.

One of the reasons globalist educators advocate childhood education begin at earlier and earlier ages is so that young children can be indoctrinated into globalism. The earlier they can communicate their themes to children, the more likely will be the globalists' success in breaking the influence of the family.

But the traditional family is just one of the institutions globalists seek to change. We must now turn our attention to globalistic attacks on these other institutions.

Globalism Opposes Christianity and Nationalism

We have seen that globalists oppose the traditional family,

but we must also be aware that they believe that the Christian church and a sense of national identity are contrary to their vision.

Globalists feel that the Christian church threatens their global program because of its belief in the authority of the Bible. Most other religious systems (as well as liberal Christianity) pose little threat. But Christians who believe in God, in sin, in salvation through faith in Jesus Christ alone, stand in the way of the globalist vision for a one-world government and a one-world religion.

The coming world religion will merge all religions and faiths into one big spiritual amalgam. Hinduism and Buddhism are syncretistic religions and can easily be merged into this one-world religion. But orthodox Christianity cannot.

Jesus taught that "I am the way, and the truth, and the life; no one comes to the Father, but through Me" (John 14:6). Globalists, therefore, see Christianity as narrow, exclusive, and intolerant. Paul Brandwein even went so far as to say that, "Any child who believes in God is mentally ill." Belief in a personal God to which we owe allegiance and obedience cannot remain if globalists are to achieve their ultimate vision.

National governments also threaten globalism. If the goal is to unite all peoples under one international banner, any nationalism or patriotism blocks the progress of that vision.

Globalist and architect Buckminster Fuller once said that, "Nationalism is the blood clot in the world's circulatory system."

Among nations, the United States stands as one of the greatest obstacles to globalism. The European community has already acquiesced to regional and international plans, and other emerging nations are willingly joining the international community. By contrast, the United States remains independent

in its national fervor and general unwillingness to cooperate with international standards. Until recently, Americans rejected nearly everything international, be it an international system of measurements (metric system) or an international agency (such as the United Nations or the World Court).

The globalist solution is to promote global ideas in the schools. Dr. Pierce of Harvard University speaking to educators in Denver, Colorado, said, "Every child in America who enters schools at the age of five is mentally ill, because he comes to school with allegiance toward our elected officials, toward our founding fathers, toward our institutions, toward the preservation of this form of government." Their solution, therefore, is to purge these nationalistic beliefs from school children so they will come to embrace the goals of globalism.

All over the country programs on Global Education, Global History, and Global Citizenship are springing up. Children are being indoctrinated into a global way of thinking. Frequently these programs masquerade as drug awareness programs, civics programs, or environmental programs. But their goal is just the same to break down a child's allegiance to family, church, and country, and to replace this allegiance with the globalists' vision for a one-world government, a one-world economic system, and a one-world religion. These then are three institutions the globalists believe must be modified or destroyed if they are to achieve their globalist vision. Christians must, therefore, be diligent to defend their family, their church, and their country.

Globalism and Foreign Policy

A small but powerful group of internationalists is bent on bringing every aspect of our world society under one, universal political system. The philosophy behind this movement is known as globalism. In this article we will be looking at the subject and describing how it has been promoted by the Bush and Clinton administrations. First, I would like to begin by looking at the goals of globalists. Though they are a diverse and eclectic group of international bankers, politicians, futurists, religious leaders, and economic planners, they are unified in their desire to unite the planet under a one-world government, a single economic system, and a one-world religion. Through various governmental programs, international conferences, and religious meetings, they desire to unite the various governments of this globe into one single network.

Although this can be achieved in a variety of ways, the primary focus of globalists is on the next generation of young people. By pushing global education in the schools, they believe they can indoctrinate students to accept the basic foundations of globalism. According to one leader of this movement, global education seeks to "prepare students for citizenship in the global age." They believe that this new form of education will enable future generations to deal effectively with population growth, environmental problems, international tensions, and terrorism.

But something stands in the way of the designs of the globalists. As a result, they have targeted for elimination three major institutions whose continued existence impedes their plans to unite the world under a single economic, political, and social global network.

Three Institutions Under Attack

The three institutions under attack by globalists today are: the traditional family, the Christian church, and the national government. Each institution espouses doctrines antithetical to the globalist vision. Therefore, they argue, these institutions must be substantially modified or replaced.

The traditional family poses a threat to globalism for two reasons. First, it is still the primary socializing unit in our society. Parents pass on social, cultural, and spiritual values to their children. Many of these values such as faith, hard work, and independence collide with the designs of globalists. Instead, they envision a world where the norm is (1) tolerance for religion, (2) dependence on a one-world global community, and (3) international cooperation. Because these values are not generally taught in traditional American families, the globalists seek to change the family.

Second, parental authority in a traditional family clearly supersedes international authority. Children are taught to obey their parents in such families. Parents have authority over their children, not a national or international governmental entity. Globalists, therefore, see the traditional, American family as an enemy not a friend.

Well-known humanist and globalist Ashley Montagu speaking to a group of educators declared that, "The American family structure produces mentally ill children." From his perspective, the traditional family which teaches such things as loyalty to God and loyalty to country is not producing children mentally fit for the global world of the twenty-first century.

One of the reasons globalist educators advocate childhood education begin at earlier and earlier ages is so that young children can be indoctrinated into globalism. The earlier they can communicate global themes to children, the more likely

they are at breaking the influence of the family.

The Christian church, because of its belief in the authority of the Bible, is another institution globalists feel threatens their global vision. Most other religions as well as liberal Christianity pose little threat. But Christians who believe in God, in sin, in salvation through faith in Jesus Christ alone, stand in the way of globalist plans for a one-world government and a one-world religion.

The coming world religion will merge all religions and faiths into one big spiritual amalgam. Hinduism and Buddhism are syncretistic religions and can easily be merged into this one-world religion. But orthodox Christianity cannot.

Jesus taught that "I am the way, and the truth, and the life; no one comes to the Father, but through Me" (John 14:6). Globalists, therefore, see Christianity as narrow, exclusive, and intolerant. Paul Brandwein even went so far as to say that, "Any child who believes in God is mentally ill." Belief in a personal God to which we owe allegiance and obedience cannot be tolerated if globalists are to achieve their ultimate vision.

National governments also threaten globalism. If the goal is to unite all peoples under one international banner, any nationalism or patriotism blocks the progress of that vision. Globalist and architect, Buckminster Fuller once said that, "Nationalism is the blood clot in the world's circulatory system."

Among nations, the United States stands as one of the greatest obstacles to globalism. The European community has already acquiesced to regional and international plans, and other emerging nations willingly join the international community.

By contrast, the United States remains independent in its national fervor and general unwillingness to cooperate with international standards. Until recently, Americans rejected

nearly everything international; be it an international system of measurements (metric system) or an international agency (such as the United Nations or the World Court).

The globalists' solution is to promote global ideas in the schools. Dr. Pierce of Harvard University speaking to educators in Denver, Colorado, said, "Every child in America who enters schools at the age of five is mentally ill, because he comes to school with allegiance toward our elected officials, toward our founding fathers, toward our institutions, toward the preservation of this form of government." Their answer is to purge these nationalist beliefs from school children so they will come to embrace the goals of globalism.

All over the country programs on Global Education, Global History, and Global Citizenship are springing up. Children are being indoctrinated into a global way of thinking. Frequently these programs masquerade as drug awareness programs, civics programs, environmental programs. But their goal is just the same: to break down a child's allegiance to family, church, and country. And to replace this allegiance to the globalist vision for a one-world government, a one-world economic system, and a one-world religion.

New World Order

The term "New World Order" has been used by leading establishment media and think tanks. These groups advocate a world government, a merging of national entities into an international organization that centralizes political, economic, and cultural spheres into a global network.

Those promoting this idea of a new world order are a diverse group. They include various political groups, like the Club of Rome, the Council on Foreign Relations, and the Trilateral Commission. The concept has also been promoted by foreign policy groups, secret societies, and international bankers.

Historically internationalists have used the term to describe their desire to unite the world political, economically, and culturally, and it is hardly a recent phenomenon. After World War I, President Woodrow Wilson pushed for the world's first international governmental agency: the League of Nations. Yet despite his vigorous attempt to win approval, he failed to get the United States to join the League of Nations.

But by the end of World War II, the world seemed much more willing to experiment with at least a limited form of world government through the United Nations. President Harry Truman signed the United Nations Charter in 1945, and a year later John D. Rockefeller, Jr., gave the U.N. the money to purchase the eighteen acres along the East River in New York City where the U.N. building sits today.

For the last forty years, globalists have tried to use the U.N. and other international organizations to birth this new world order. Yet most of their actions have been to no avail. Except for its peace-keeping action during the Korean War, most of the time the U.N. has been nothing more than an international debate society.

Although the U.N. has not provided internationalists with much of a forum for international change, that does not mean they have not been making progress in their desire to unite the world. Through political deals and treaties of economic cooperation, internationalists have been able to achieve many of their goals.

How these goals fit within the current political context is unclear. But we already have an emerging world order in Europe through the European Economic Community. This European Community is more than just a revised Common Market. Europeans are beginning to speak of themselves as Europeans rather than as Germans or as English. They have developed various cooperative arrangements including a common European currency.

Even more surprising is talk of a United European Community that stretches from the Atlantic to the Eastern end of the former Soviet Union. In his book *Perestroika*, Mikhail Gorbachev proposed a United Europe stretching "from the Atlantic to the Urals." And Pope John Paul II, during a mass held in Germany, appealed for a United Europe "from the Atlantic to the Urals."

Other signs of a change in thinking came when former President Bush delivered his September 1990 speech to a joint session of Congress when he referred four times to a "new world order." Supposedly the reason for all of this talk of a new world order is a changing world situation. Lessening tensions in Eastern Europe and increasing tensions in the Middle East are the supposed reason for President Bush talking about a new world order. But, as we have already noted, this term precedes any of the recent world events.

Notice how *Newsweek* magazine described the genesis of President Bush's vision of the new world order: "As George Bush fished, golfed and pondered the post cold-war world in Maine last month, his aides say that he began to imagine a new world order."

It went on to say that "It is a vision that would have chilled John Foster Dulles to the marrow: the United States and the Soviet Union, united for crisis management around the globe." Perhaps it would have surprised former government leaders, but it is noteworthy that nearly all secular media and most politicians seem ready to embrace the concept of a new world order.

When President Bush addressed the joint houses of Congress, this is how he expressed his vision: "The crisis in the Persian Gulf, as grave as it is, also offers a rare opportunity to move toward an historic period of cooperation. Out of these troubled times, our fifth objective—a new world order—can emerge; a new era, freer from the threat of terror,

stronger in the pursuit of justice, and more secure in the quest for peace. An era in which the nations of the world, east and west, north and south, can prosper and live in harmony.”

Recently President Clinton has proposed a variation of this idea. He describes it as global multilateralism. When the Clinton foreign policy team took office, they wanted to extend President Bush’s ideal of a new world order. Dedicated to the rapid expansion of U.N.-sponsored “peace keeping operations,” the Clinton team began developing agreements to deploy American troops to hot spots around the globe. The goal was to upgrade the professionalism of the U.N. troops and placement of American troops under U.N. commanders using U.N. rules of engagement.

All seemed to be going well for the Clinton policy until U.S. troops in Somalia got cut down in an ambush, and Americans discovered that the operation was led by a Pakistani General. Suddenly, American fathers and mothers wanted to know why their sons’ lives were put at risk by placing U.S. troops in harm’s way and by placing them under U.N. command.

The Clinton policy of global multilateralism attempts to honor the U.N. request for a standing rapid deployment force under the secretary-general’s command. But what it ends up doing is calling for American servicemen to risk life and limb for ill-defined causes in remote places under foreign leaders with constrained rules of engagement. The loss of American sovereignty and the undermining of strategic interests of the United States is significant.

What’s the solution? We need a foreign policy based upon American interests, not the ideals of the globalists.

Practical Suggestions

We must challenge the goals and vision of globalists. In an

effort to unite all peoples under a one-world government, one-world economic system, and one-world religion, globalists will attack the traditional family, the Christian church, and the American government. We, therefore, must be willing and able to meet the challenge. Here are some important action steps we must take to prevent the advance of globalism in our communities.

First, we must become informed. Fortunately a number of books have been written which provide accurate information about the goals and strategy of globalism.

Second, find out if globalism is already being taught in your school system. Materials from groups like the Center for Teaching International Relations at the University of Denver are already being used in many school districts. Look for key words and names that may indicate that global education is being used in your district.

Other names for global education are: International Studies, Multicultural International Education, Global R.E.A.C.H. (Respecting our Ethnic and Cultural Heritage), Project 2000, Welcome to Planet Earth, and World Core Curriculum. Key buzzwords for globalists include: global consciousness, interdependence, and new world order.

Third, express your concerns to educators and leaders in your community. Often educators teaching globalism are unaware of the implications of their teaching. Globalism in attempting to unite nations and peoples will have to break down families, churches, and governments. Educate them about the dangers of globalism and its threat to the foundations upon which your community rests. Encourage them to be better informed about the true goals of globalists and the danger they pose to our society.

Fourth, Christians should be in prayer for those in government. We are admonished in 1 Timothy 2 to pray for

leaders and others in authority. Pray that they will have discernment and not be lead astray by the designs of globalists.

Finally, I believe Christians should question the current interest many of our leaders have in developing a new world order. What are our leaders' calling for us to do? Are they proposing that the United States give up its national sovereignty? Will we soon be following the dictates of the U.N. Charter rather than the U.S. Constitution?

These are questions we should all be asking our leaders. What does President Clinton intend with his policy of global multilateralism? What role will the United States play? Aren't we merely being moved towards the globalists' goal of a one-world government, a one-world economy, and a one-world religion?

Moreover, what will this new world order cost the American taxpayer? From the operations of Desert Storm to the more recent military actions in Somalia, Bosnia, and Haiti we can see a trend. American troops do the fighting and the American people pay the bill. If we do not re-evaluate our foreign policy, it may end up costing the American taxpayer plenty.

If you have concerns, I would encourage you to write or call and express your thoughts. Congress and the President need to know that you have questions about current attempts to move us into a new world order.
