

# Evidence for God's Existence

*Romans chapter 1 says that God has planted evidence of Himself throughout His creation so we are without excuse. Sue Bohlin looks at different types of evidence indicating that God really does exist.*

## A “Just Right” Universe

There's so much about the universe, and our world in particular, that we take for granted because it works so well. But Christian astronomer Dr. Hugh Ross has cited twenty-six different characteristics about the universe that enable it to sustain life. And there are thirty-three characteristics about our galaxy, our solar system, and the planet Earth that are finely-tuned to allow life to exist.<sup>{1}</sup> I do well to make the meat, potatoes, vegetables, and bread all come out at the same time for dinner; we're talking about fifty-nine different aspects all being kept in perfect balance so the universe hangs together and we can live in it!

Our Earth, for instance, is perfectly designed for life. It's the “just right” size for the atmosphere we need. Its size and corresponding gravity hold a thin, but not too thin, layer of gases to protect us and allow us to breathe. When astronaut John Glenn returned to space, one of the things that struck him was how thin and fragile our atmosphere is (only 50 miles above the Earth). If our planet were smaller it couldn't support an atmosphere, like on Mercury. If it were larger, like Jupiter, the atmosphere would contain free hydrogen, which is poison for us.<sup>{2}</sup> Earth is the only planet we know of that contains an atmosphere that can support human, animal, and plant life.

The Earth is also placed at a “just right” distance from the sun and the other planets in our solar system. If we were closer to the sun, we'd burn up. If we were farther away, we'd

freeze. Because Earth's orbit is nearly circular, this slightly elliptical shape means that we enjoy a quite narrow range of temperatures, which is important to life. The speed of Earth's rotation on its axis, completing one turn every 24 hours, means that the sun warms the planet evenly. Compare our world to the moon, where there are incredible temperature variations because it lacks sufficient atmosphere or water to retain or deflect the sun's energy.

Speaking of the moon, it's important that there is only one moon, not two or three or none, and it's the "just right" size and distance from us. The moon's gravity impacts the movement of ocean currents, keeping the water from becoming stagnant.[\[3\]](#)

Water itself is an important part of a "just right" world. Plants, animals and human beings are mostly made of water, and we need it to live. One of the things that makes Earth unique is the abundance of water in a liquid state.

Water has surface tension. This means that water can move upward, against gravity, to bring liquid nutrients to the tops of the tallest plants.

Everything else in the world freezes from the bottom up, but water freezes from the top down. Everything else contracts when it freezes, but water expands. This means that in winter, ponds and rivers and lakes can freeze at the surface, but allow fish and other marine creatures to live down below.

The fact that we live on a "just right" planet in a "just right" universe is evidence that it all was created by a loving God.

## **The Nagging Itch of "Ought"**

As a mother, I was convinced of the existence of a moral God when my children, without being taught, would complain that something wasn't "fair." Fair? Who taught them about fair? Why

is it that no one ever has to teach children about fairness, but all parents hear the universal wail of “That’s not fa-a-a-a-a-air!” The concept of fairness is about an internal awareness that there’s a certain way that things ought to be. It’s not limited to three-year-olds who are unhappy that their older siblings get to stay up later. We see the same thing on “Save the Whales” bumper stickers. Why should we save the whales? Because we ought to take care of the world. Why should we take care of the world? Because we just should, that’s why. It’s the right thing to do. There’s that sense of “ought” again.

Certain values can be found in all human cultures, a belief that we act certain ways because they’re the right thing to do. Murdering one’s own people is wrong, for example. Lying and cheating is wrong. So is stealing. Where did this universal sense of right and wrong come from? If we just evolved from the apes, and there is nothing except space, time, and matter, then from where did this moral sense of right and wrong arise?

A moral sense of right and wrong isn’t connected to our muscles or bones or blood. Some scientists argue that it comes from our genes – that belief in morality selects us for survival and reproduction. But if pressed, those same scientists would assure you that ultimate right and wrong don’t exist in a measurable way, and it’s only the illusion of morality that helps us survive. But if one researcher stole another’s data and published results under his own name, all the theories about morality as illusion would go right out the window. I don’t know of any scientist who wouldn’t cry, “That’s not fair!” Living in the real world is a true antidote for sophisticated arguments against right and wrong.

Apologist Greg Koukl points out that guilt is another indicator of ultimate right and wrong. “It’s tied into our understanding of things that are right and things that are wrong. We feel guilty when we think we’ve violated a moral

rule, an “ought.” And that feeling hurts. It doesn’t hurt our body; it hurts our souls. An ethical violation is not a physical thing, like a punch in the nose, producing physical pain. It’s a soulish injury producing a soulish pain. That’s why I call it ethical pain. That’s what guilt is – ethical pain.”[\[4\]](#)

The reason all human beings start out with an awareness of right and wrong, the reason we all yearn for justice and fairness, is that we are made in the image of God, who is just and right. The reason we feel violated when someone does us wrong is that a moral law has been broken – and you can’t have a moral law without a moral law giver. Every time we feel that old feeling of, “It’s not fa-a-a-a-a-air!” rising up within us, it’s a signpost pointing us to the existence of God. He has left signposts pointing to Himself all over creation. That’s why we are without excuse.

## **Evidence of Design Implies a Designer**

If you’ve ever visited or seen pictures of Mount Rushmore (South Dakota USA), you cannot help but look at the gigantic sculpture of four presidents’ faces and wonder at the skill of the sculptor. You know, without having to be told, that the natural forces of wind and rain did not erode the rock into those shapes. It took the skilled hands of an artist.

William Paley made a compelling argument years ago that the intricacies of a watch are so clearly engineered that it cannot be the product of nature: a watch demands a watchmaker. In the same way, the more we discover about our world and ourselves, the more we see that like an expertly-fashioned watch, our world and we ourselves have been finely crafted with intentional design. And design implies a designer.

Since we live in our bodies and take so much of our abilities for granted, it's understandable that we might miss the evidence of design within ourselves – much like a fish might be oblivious to what it means to be wet. Dr. Phillip Bishop at the University of Alabama, challenges us to consider what would happen if we commissioned a team of mechanical engineers to develop a robot that could lift 500 pounds. And let's say we also commissioned them to design a robot that could play Chopin. They could probably do that. But what if we asked them to come up with a robot that could do both, and limit the robot's weight to 250 pounds, and require that it be able to do a variety of similar tasks? They'd laugh in our faces, no matter how much time or money we gave them to do it. But you know, all we'd be asking them to do is to come up with a very crude replication of former football player Mike Reid.[\[5\]](#)

Probably the greatest evidence of design in creation is DNA, the material of which our genes are made, as well as the genetic material for every living thing on the planet. One of the startling discoveries about DNA is that it is a highly complex informational code, so complex that scientists struggle hard to decipher even the tiniest portions of the various genes in every organism. DNA conveys intelligent information; in fact, molecular biologists use language terms – code, translation, transcription – to describe what it does and how it acts. Communication engineers and information scientists tell us that you can't have a code without a code-maker, so it would seem that DNA is probably the strongest indicator in our world that there is an intelligent Designer behind its existence.

Dr. Richard Dawkins, a professor of biology who writes books and articles praising evolution, said in his book *The Blind Watchmaker*, "Biology is the study of complicated things that give the appearance of having been designed for a purpose."[\[6\]](#) Even those who desperately fear the implications of design keep running into it.

Those who deny the evidence of a designer are a lot like the foolish fisherman. If he fails to catch a fish, he says, "Aha! This proves there are no fish!" He doesn't want to consider the possibility that it might be he is an inept fisherman. Since science cannot measure the intangible or the supernatural, there are many people who say, "Aha! There is no Creator." [\[7\]](#) Foolish fishermen deny the evidence that God exists and has left His fingerprints all over creation.

## **The Reliability of the Bible**

Every religion has its own holy book, but the Bible is different from all the others. It claims to be the very Word of God, not dropped out of the sky but God-breathed, infused with God's power as He communicated His thoughts and intent through human writers.

The Bible was written over a period of 1500 years, by about forty different writers, on three different continents. They addressed a wide variety of subjects, and yet the individual books of the Bible show a remarkable consistency within themselves. There is a great deal of diversity within the Bible, at the same time displaying an amazing unity. It presents an internally consistent message with one great theme: God's love for man and the great lengths to which He went to demonstrate that love.

If you pick up any city newspaper, you won't find the kind of agreement and harmony in it that is the hallmark of the biblical books. A collection of documents that spans so much time and distance could not be marked by this unity unless it was superintended by one Author who was behind it all. The unity of the Bible is evidence of God's existence.

One other aspect of the Bible is probably the greatest evidence that God exists and that He has spoken to us in His holy book: fulfilled prophecy. The Bible contains hundreds of details of history which were written in advance before any of

them came to pass. Only a sovereign God, who knows the future and can make it happen, can write prophecy that is accurately and always – eventually – fulfilled.

For example, God spoke through the prophet Ezekiel against the bustling seaport and trade center of Tyre. In Ezekiel 26:3-6, He said He would bring nations against her: “They shall destroy the walls of Tyre and break down her towers; and I will scrape her soil from her, and make her a bare rock.” Ezekiel 26-28 has many details of this prophecy against Tyre, which would be like Billy Graham announcing that God was going to wipe New York off the map.

Tyre consisted of two parts, a mainland city and an island a half- mile offshore. The first attack came from the Babylonian king Nebuchadnezzar, who laid siege to Tyre for thirteen years. Finally, his battering rams broke through the walls, and he tore down the city’s towers. But the island part of the city wasn’t yet destroyed, because this prophecy was fulfilled in stages. For 250 years it flourished, until Alexander the Great set his sights on Tyre. Even without a navy, he was able to conquer this island city in what some consider his greatest military exploit. He turned the ruined walls and towers of Old Tyre into rubble, which he used to build a causeway from the mainland to the island. When he ran out of material, he scraped the soil from the land to finish the land- bridge, leaving only barren rocks where the old city used to be. He fulfilled the prophecy, “They will break down your walls and destroy your pleasant houses; your stones and timber and soil they will cast into the midst of the waters”(Ez. 26:12).

Fulfilled prophecy is just one example of how God shows He is there and He is not silent. How else do we explain the existence of history written in advance?

## **Jesus: The Ultimate Evidence**

The most astounding thing God has ever done to show His

existence to us is when He passed through the veil between heaven and earth and came to live among us as a man.

Jesus Christ was far more than just a great moral teacher. He said things that would be outrageous if they weren't true, but He backed them up with even more outrageous signs to prove they were. Jesus claimed not to speak for God as a prophet, but to be God in human flesh. He said, "If you've seen Me, you've seen the Father" (John 14:9), and, "The Father and I are one" (John 10:30). When asked if He was the Messiah, the promised Savior, He said yes.[\[8\]](#) He told his contemporaries, "Before Abraham was, I am" (John 8:58). The fact that His unbelieving listeners decided then to kill Him shows that they realized He was claiming to be Yahweh, God Almighty.

When Jesus told His followers that He was the Good Shepherd (John 10:11-18), they would immediately be reminded of a passage in the book of Ezekiel where Yahweh God pronounced Himself shepherd over Israel (Ez. 34:1-16). Jesus equated Himself with God.

But words are cheap, so Jesus backed up His words with miracles and signs to validate His truth-claims. He healed all sorts of diseases in people: the blind, the deaf, the crippled, lepers, epileptics, and even a woman with a twelve-year hemorrhage. He took authority over the demons that terrorized and possessed people. He even raised the dead.

Jesus showed His authority over nature, as well. He calmed a terrible storm with just a word. He created food out of thin air, with bread and fish left over! He turned water into wine. He walked on water.

He showed us what God the Father is like; Jesus was God with skin on. He was loving and sensitive, at the same time strong and determined. Children and troubled people were drawn to Him like a magnet, but the arrogant and self-sufficient were threatened by Him. He drenched people with grace and mercy

while never compromising His holiness and righteousness.

And after living a perfect life, He showed His love to us by dying in our place on a Roman cross, promising to come back to life. Who else but God Himself could make a promise like that and then fulfill it? The literal, bodily resurrection of Jesus Christ is the final, greatest proof that there is a God, that Jesus is God Himself, and that God has entered our world and showed us the way to heaven so we can be with Him forever. He said, "I am the way, the truth, and the life; no one comes to the Father except by Me" (John 14:6).

God exists, and He has spoken. He made a "just right" universe that is stamped with clues of its Maker. He placed eternity in our hearts, as Ecclesiastes tells us, and all people have a strong moral streak because we are made in the image of a moral God. The evidence of design in our bodies, our world and the universe is a signpost pointing to a loving, intelligent Designer behind it all. The unity of the Bible and the hundreds of fulfilled prophecies in it show the mind of God behind its creation. And we've looked at the way Jesus punched through the space-time continuum to show us what God looks like, and opened the doorway to heaven. Jesus is the clearest evidence of all that God does exist.

# Tactics for an Ambassador: Defending the Christian Faith

*Most Christians equate evangelism with conflict: an all-out assault on the beliefs and values of others. In our relativistic, live-and-let-live culture, even the most motivated believer feels like he's committing a crime by entering into a spiritual discussion. Are there ways to take the anxiety out of evangelism?*

The idea of doing Christian apologetics, a fancy word for defending the Christian faith, has lost some luster among church goers. The word conjures up images of conflict, anxiety, and even anger. But most of all, it generates thoughts of inadequacy and lack of confidence among those called to “give an answer” (1 Pet. 3:15) for the hope we have in Christ. Most people are trying to avoid conflict and the emotional fatigue that comes with defending a controversial set of beliefs that are often ridiculed in our culture.

We live in an era that values diversity and tolerance above all other virtues. Anyone claiming to have true knowledge about important things like the nature of God, good and evil, or the purpose of

human existence will be accused of intolerance and a mean spirited attempt to impose their beliefs on their neighbors. You are allowed to believe almost anything today, as long as you don't claim that it is true in any universal sense.

Part of the reason that Christians in American churches do so little evangelism is that they are convinced that it constitutes a spiritual invasion, an attack on the beliefs of a friend or neighbor who will resist this apologetic assault with everything he or she has to offer. They also believe that they will have failed miserably unless every encounter ends with someone trusting in Christ. It's either total victory or utter defeat, and there are no innocent bystanders.

Gregory Koukl's book *Tactics* helps to give Christians the right perspective on evangelism and apologetics.[\[1\]](#) He argues that the D-day invasion model for evangelism is counterproductive, and that seeing oneself as an ambassador for Christ makes more sense. We need fewer frontal assaults and more embassy meetings. The skills necessary to be a successful ambassador are quite different from those of an infantryman. Persuasion rather than conquest motivate the ambassador, and

one's style of communication can be as important as the content being conveyed.

According to Koukl, an effective ambassador for Christ must master three skill-sets. First, a Christian ambassador should possess a clear understanding of the message being offered by his sovereign King. Second, he needs to exhibit a personal character that reinforces the message he's been charged with, not distract from it. Finally, an ambassador needs sufficient wisdom to know how to communicate his message in a manner that draws people into dialogue and then to keep the conversation

going. This kind of wisdom translates into specific tactics for communicating the gospel of Jesus Christ to a culture that has been preconditioned against the message.

## **Why Do We Need Tactics?**

In his second letter to the church in Corinth, Paul says that we are Christ's ambassadors and that God has entrusted us with a message of reconciliation to a lost world (2 Cor. 5:20). But, although we have good news to share, Christians often don't feel capable or confident to share it.

Being tactical has to do with the way one arranges his or her resources. The effective tactician knows when to be aggressive and when to hold back and gather information. Commanders on a battlefield don't unleash every weapon available at the beginning of a conflict, nor do ambassadors immediately unveil all of their arguments.

Apologists know that one of their most important tactics is the well placed question. Picking up important personal information about someone's background and worldview provides critical insight into the best way to steer the conversation. The ability to ask good questions, combined with good listening skills, helps to avoid stereotyping people in ways that can cause the conversation to end suddenly. It also shows that you care about someone as an individual, not just as, for example, a Mormon or a Muslim. Even when someone labels oneself, let's say as a Hindu, it's important to discover what that term means to them. Hinduism contains a wide variety of possible beliefs and it would be counterproductive to argue against something that this person doesn't adhere to. As you can imagine, being a good listener and shaping your comments to fit the individual will most likely have a greater impact on them than just memorizing a tract and delivering it regardless of the setting.

Employing wise tactics implies a thoughtful rather than emotional approach to conversations. Emotions can quickly get the best of us, especially if we are unprepared to respond to the questions and challenges that we may encounter. Good planning helps us to accomplish our goal of guiding people to the truth about Jesus. It can also help us to avoid provoking someone to anger. Once people get angry they rarely hear our defense of the gospel. It's even worse if we get angry.

Some might respond to this call for wise tactics in sharing Christ by saying that you cannot argue someone into heaven. I would respond that you cannot love someone into heaven either. Neither arguments, or love, or a simple telling of the gospel alone will win someone to heaven. Only the Holy Spirit can change someone's heart, but it doesn't follow that God doesn't use these methods to build His kingdom.

## **Becoming Sherlock Holmes**

Sometimes we Christians are tempted to dump our entire theological systems on anyone willing stay put long enough to listen. This doctrinal dump might be a light load for some but a train load for others. The problem is that we are often trying to answer questions that people haven't even thought up yet and we can add confusion and distractions to the gospel message without even being aware of it. How can we avoid making this mistake?

When we sense that a conversation is headed toward spiritual territory, perhaps our first inclination should be to ask good questions so that we better understand the person we desire to share Christ with. Good questions protect us from jumping to conclusions and to deal with the actual beliefs a person holds rather than some straw man position that we might prefer to attack. They also have the tendency to naturally promote further dialogue and shape the discussion.

Once a person makes a statement regarding what they believe to be true, good questions can be particularly helpful. If someone tells you that it is irrational to believe in God because there is no proof that He exists, you now have an opportunity to ask key questions that will make your eventual responses far more effective. The first category of questions seeks further information and clarification. For instance, you might ask “What do you mean by God?” or “What evidence would you count as proof towards His existence?” You might ask if he knows anyone who believes in God and whether or not they might have good reasons for doing so. Asking someone how they arrived at a conclusion or how they know something to be the case helps to differentiate between simple assertions of belief and reasons for holding that belief. People often make statements of belief without much forethought, and when challenged they find that they have little more than an emotional attachment to their view.

Don't panic if you run into someone who is prepared to defend his or her views. Even if they have an extensive argument supporting their position, good questions can get you out of the hot seat and provide time to build a stronger case for your next encounter. You might ask them to slow down and present their case in detail so that you can understand it better. You can also tell them that you want time to consider their position and will get back to them with a response. Giving someone the podium to clearly present their beliefs is usually well received. Listen carefully to what is said and then do your homework.

## **Suicidal Arguments**

One of the more interesting parts of *Tactics* are Koukl's chapters on ideas that commit suicide. These are commonly called self-refuting ideas or ideas that defeat themselves. A fancier description is that they are self-referentially incoherent. It doesn't take long to encounter one of these

arguments when talking to people about religion.

A simple example of a suicidal view is expressed by the comment, "There is no truth," or the more humble version, "It is impossible to know something that is true for everyone, everywhere." This statement fails its own criteria for validity by denying universal truth claims and then making a truth claim implied to be universal. If what the statement professes is true, then it is false. It commits suicide because it violates the law of non-contradiction which prohibits something from being both true and false at the same time.

Christians who are highly influenced by a postmodern view of truth often make self-defeating arguments as well. Koukl gives the example of a teacher in a Christian college classroom asking her students if they are God. When no hands went up she proclaimed that since they are not God they only have access to truth with a small t; only God knows Truth with a capital T. The implication is that small t truth is personal and limited. A student might ask the teacher if what she just offered is truth with a small t; if so, why should the students accept the teacher's limited personal view of reality over the student's perceptions?

Another argument that's quite popular and self-defeating is, "People should never impose their values on someone else." A quick response might be, "Does that express your values?" Of course it does. Then ask the person why he is imposing his values on you. His statement violates the criteria of validity that it tries to establish.

Even comments that seem to make sense at first suffer from suicidal tendencies. For instance, some have argued that since men wrote the Bible, and given that people are imperfect, the Bible is flawed and not inspired by God. The problem is that although people are imperfect it does not follow that everything they say or write is flawed. In fact, if everything

a human says or writes is flawed, then this comment about the Bible is flawed. Just because people are capable of error, it doesn't mean that they will always commit error.

Helping people to see that their truth claims might be contradictory must be done gently. The point is not to merely defeat their position, but to help them to become open to other ways of thinking about an issue. It is in this context of gentle persuasion that the Holy Spirit can change a heart.

## **Sharpening Your Skills**

The list of self-defeating truth claims can get rather long. For instance, it is common to hear people say something like "science is the only source for truth." The problem with this statement is that it is not scientific. There are no scientific experiments that one can perform which establish that science is the only source of truth. It is a self-defeating statement.

It is also quite popular to assume that all religions are basically the same and equally true. If this is the case, then Christianity is true. However, a basic teaching of Christianity is that the core teachings of other religions are false and that Jesus is the only source of salvation. Again, the statement defeats itself.

Ideas that commit practical suicide include the notion that it's wrong to ever condemn someone, and that God doesn't take sides. The first comment is a condemnation of all who condemn others. The second assumes that God is on their side, even though God doesn't take sides. If you think through these ideas you can be ready to gently point out their self-contradictory nature and move on to subjects more profitable.

When dealing with difficult ethical issues like abortion or homosexuality, it is always helpful to have a preplanned set of tactics. Koukl gives the example of a Christian who is

asked his views about homosexuality by a lesbian boss. He begins his response by asking if the boss is tolerant of diverse points of view. Does she respect convictions different from her own? Of course, true tolerance means putting up with someone you disagree with. Since very few people want to label themselves as intolerant, they will usually affirm their support of the practice, protecting you from being attacked for giving your viewpoint.

Gregory Koukl's book contains many more great ideas about responding to attacks on Christian belief. At the end of the book he leaves us with what he calls the ambassador's creed. An ambassador should be ready to represent Christ. He should be patient with those who disagree. He should be reasonable in his defense. And, finally, he should be tactical, adapting his approach to each unique person that God brings into his path. Our wise use of tactics should improve the "acoustics" in a conversation so that people can hear the gospel well.
