Prometheus, God and Film: 10 Science Fiction Movies with a Theological Theme

Dr. Terlizzese looks to see if we can find a Christian worldview perspective or, at least, questions which need theological answers in a number of popular science fiction movies. He finds some good themes and bad themes and offers advice on how to view movies of all types.

Sci-fi films have never been more popular than they are today. Witness this summer's offerings: *Prometheus* (see below), *Chronicle*, *The Hunger Games* even the comic book—inspired *Avengers* and the romantic comedy *Seeking a Friend for the End of the World* feature elements of science fiction. And like most arts and literature, they contain elements of theology. This genre borrows a basic aspect of the Christian worldview concerning the value and meaning of individuals in a world of technological conformity.

Sci-fi combines a somewhat biblical understanding of mankind with an almost religious belief in technological progress. This fuels the popular fear that technology will rob people of their souls or individuality. The modern technological worldview is rooted in *materialism*: it affirms that people are basically machines who can be objectified, categorized and manipulated as any other object in nature. One film scholar notes this connection:

> *Scientism opened the doors for a mechanical view of mankind. . . . We are no longer special, no longer sacred — neither the form (body) nor the mind. "Let us conclude boldly then that man is a machine, and that there is only one substance, differently modified, in the whole world. What will all the weak reeds of divinity, metaphysic, and nonsense of the*

schools avail against this firm and solid oak?"[Le Mettrie].
[Sci-fi] arises out of the tension between this kind of
"rude" scientism and the Christian cosmology. Scientism
"robs" humans of their very humanity and makes them out to be
biological machines, much like the alien children in Village
of the Damned. *{1}*

Reaching a Popular Audience

The sci-fi genre asks, What is human nature?{2} In light of
technological advance, how we define humanity becomes more
crucial as technology changes not just the natural world, but
humanity itself. It has become imperative not only for
philosophers, but for everyone to ask, how is technological
advance transforming human nature? The failure to perceive
change caused by new technology creates a serious problem for
an age so enormously influenced by it. Sci-fi movies serve as
a philosophical treatise for average people who are not
professionally trained, raising questions and issues that
would otherwise be lost on the common person because of their
intolerable abstraction.

The movies speak the common language of our times. When
teachers want to make an idea concrete or illustrate a point,
they grope for an example from a popular movie. Most people
love movies and to be able to relate abstract concepts through
such a relevant medium will certainly create a profound
effect.

We normally think of sci-fi as promoting innovative technology
that holds out optimistic promise for the future of mankind.
This is generally true of print media produced by popular
writers like Jules Verne, H. G. Wells or Isaac Asimov. However
sci-fi film has taken another tack by appealing to commonly
held suspicions of technological progress. An optimistic view
of progress views new technology as a liberating force
destined to lift the burdens of work, cure disease, improve

communication and free humanity from natural limits. A pessimistic view takes the opposite direction; instead of liberation it fears that new technology will create a new form of enslavement and dehumanization that will rob people of their individuality or their very souls.

Given the popularity of movies and the latent theological premise of many sci-fi films, the following list presents an incomplete, but important sample of theology in sci-fi movies. It is intended to help Christians read the movies from more than a literalist perspective by paying attention to the metaphors and symbols that constitute their meaning. These movies may contain objectionable material, but more importantly, resonate with redemptive themes worth analyzing.

Movies are cultural day dreams, serving as modern folklore and morality tales. They signify a shared message of hope or fear not always transparent without analysis. So let's get started!

Prometheus, 2012

Humanoid aliens seed earth with their DNA that creates humanity. They leave clues behind on how to find them in a distant galaxy. When earthlings discover their origins they uncover a plan for human extinction, revealing that the gods are hostile towards their own children. The movie raises classic theological and philosophical questions such as, Where did we come from? Why are we here? And, where are we going? Though never distinguishing between wishful thinking or religious truth claims, it presents faith as a choice for meaning, even in the face of the most hostile conditions. The cross remains a prominent and enduring symbol of hope and human redemption. Humans are worth saving and are not genetic mistakes that deserve extinction.

The Terminator, 1984

Robots represent both hope and fear of technological aspirations. They symbolize the incredible potential of

technological capability and human replacement. Robots are mechanical people that embody the fears of extreme rationalization. Cartesian philosophy identified reason as the definition of human nature, which takes its final form in the computer. Robots are nothing more than embodied computers. Sometimes the movies picture them as our slaves and protectors. Robots enable people to live work—free lives as with Robby the Robot from *Forbidden Planet* (1956) who undoubtedly depicts the most iconic and loveable of all movie robots. However, most robots represent something evil and ominous as in *The Terminator.*

The premise states that computer intelligence Sky Net became self-aware and immediately perceived humanity as a threat and initiated a nuclear strike. Some people survived to fight back and achieved ultimate victory led by the messianic figure John Conner sent to rescue humanity from techno—enslavement and termination. Human victory over the machines necessitated that Sky Net send a robot agent back in time to eliminate the mother of the rebel leader. Commentators read the plot as loosely based on the story of the Birth of Christ. *The Terminator* encapsulates the abiding fear that mankind will one day destroy itself through the use of its own technology. That which was meant to enhance human life will one day annihilate it. The need for salvation remains paramount as the last installment *Terminator Salvation* (2009) indicates.

The Matrix, 1999

In the not too distant future Artificial Intelligence (AI) becomes self—aware and identifies humanity as a threat and initiates a war, a common theme in science fiction. Humanity burns the atmosphere to create perpetual darkness in order to block the sun and deny the machines a power source. The machines respond by turning people into batteries and growing them in a huge incubator, kept alive in a vegetative state through feeding them the blood of the previous generation and by sending false impressions to the brain that simulate a

normal existence. Billions of people are given fabricated lives in a huge computer—simulated world called the Matrix. Zion, the only surviving human city, awaits deep underground for their savior Neo, rescued from the Matrix and believed to possess the power to fight the machines within the Matrix and free mankind.

In addition to the obvious messianic overtones the series presents a complicated patchwork of different religious ideas from Christianity and Buddhism to Greek mythology as a counterpoint to the Cartesian philosophy that reason alone ultimately defines human nature. The computer best embodies the logical conclusion of rational thought and the loss of human freedom that results from the universal acceptance of rationalism. *The Matrix* demonstrates an acute historical irony in rejecting rationalism and looking to premodern religious ideas to define human nature and provide meaning to life, even though these ideas are considered anachronistic in a secular and technological age.

The Book of Eli, 2010

The Book of Eli presents an explicitly Christian message of obedience to the voice of God in describing the spiritual journey and act of faith by the blind nomad Eli. Set in a post—apocalyptic world of the near future, a drifter finds his purpose in life through committing to memory the *King James Bible*, then spending thirty years traveling across the wasteland to an unknown destination. Along the way Eli encounters a ruthless mayor seeking the power of the book for his own political ends. In addition to the spiritual journey the movie depicts the dark side of faith when used to control and manipulate others.

The Invasion, 2007

The Invasion is an excellent remake of the original science fiction masterpiece *Invasion of the Body Snatchers* (1956, 1979) in which spores from outer space take over human bodies

by emptying them of free will and any unique qualities as individuals, making everyone soulless and identical. The message is clear: that a world without free will may be more peaceful and happy, but would be horribly inhuman. What price are we willing to pay for peace, security and harmony? If these qualities are not derived from love then we do not have a world worth living in. In the absence of freedom, a nightmarish world of automatons pretending to be humans assumes control. They are bodies without souls. In the chilling words of the original movie, "Love, desire, ambition, faith—without them life's so simple."[{3}](#) This may be life in unison, but it is more like the life of a grove of trees all getting along rather nicely. This movie franchise argues for the idea that love and choice are essential aspects of our humanity without which life loses it purpose.

Planet of the Apes, 1968

This 1960's protest film decries the potential genocide of nuclear war. Astronauts find themselves stranded on a strange planet where apes rule humans. The movie has several themes including the debate between evolution and creation, science and religion, church and state relations as well as racism and offers an accurate commentary on humanity as a creature that wages war on all those around it including himself. It is rare to find any movie that weaves so many themes into its message, while not revealing its main point until its climactic surprise ending.

The Day the Earth Stood Still, 1951

We do not need to see films based on the Gospels in order to find Christ at the movies. The presence of a Christ—like figure is usually signified when a heroic character with extraordinary powers dies and comes back to life, such as in the case of Klatuu, the representative of a galactic alliance who visits earth during the Cold War and warns that we must turn our efforts to peace or face annihilation because earth

poses a threat to the rest of the galaxy. Humanity's technical abilities now exceed its self-control, which will end in disaster if it does not turn to peaceful ends.

Star Wars, 1977

Science fiction generally focuses on the power of reason and technology. *Star Wars* follows a different tack, making faith and religion central. The movie sets the action in the familiar device of good vs. evil, but adds the dimension of faith being more powerful than technical ability in the promotion of both good and evil. The *Star Wars* franchise contrasts with that other perennially popular space melodrama *Star Trek,* which often belittles notions of God, faith and religion. Based on the secular humanism of its creator Gene Roddenberry, technology or human potential trumps faith and religion. In contrast, *Star Wars* derives from the ecumenical ideas of George Lucas, where faith represented by "the force"—for better or worse—is more powerful than raw technological ability.

Close Encounters of the Third Kind, 1977

Everyman Roy Neary experiences a close encounter with a UFO that sends him on a journey to discover its meaning. In the process he acts erratically, causing his wife Ronnie to leave him with their three children. The further he delves into the mystery, the more he discovers the truth behind his encounter: that extraterrestrials have visited earth and are seeking him out along with a select group of others. The movie vaguely resembles John Bunyan's famous allegory of the Christian life, *Pilgrim's Progress*. Aliens often represent transcendence in the movies, either as angelic messengers or demonic powers. *Close Encounters* may be interpreted as a spiritual journey that seeks out a higher purpose in life beyond mundane existence.

2001: A Space Odyssey, 1968

2001 lives up to its reputation as the greatest science fiction movie ever made. The movie begins with a tribe of hominids on the brink of starvation. An extraterrestrial force endows them with the gift of technology in the form of animal bones used to hunt for food and murder their opponents. The action then moves to outer space when the murder weapon is flung into the air and transforms into a space ship, suggesting continuity between the earliest technology and the most advanced.

Mankind finds itself on the brink of encountering extraterrestrial (ET) life near Jupiter. A small crew travels to the location of a beacon with the assistance of an onboard supercomputer, the HAL 9000, who (he is strangely human) becomes threatened by the crew who want to turn off his higher cognitive ability. HAL murders the crew except for one member who escapes and finishes the mission. After his encounter with the ET, Commander Bowman converts into an angelic figure, or star child who returns to earth. Director Stanley Kubrick comments on the meaning of this scene when he says of Bowman, "He is reborn, an enhanced being, a star child, an angel, a superman, if you like, and returns to earth prepared for the next leap forward in man's evolutionary destiny."{4}

The star child is the first of a new race representing a spiritual rather than technological change. "Kubrick's vision reveals technology as a competitive force that must be defeated in order for humans to evolve."{5} The message of *2001* is that, though technology assists humanity in survival, it also threatens human existence.

A Final Word

Humanity now needs a spiritual transformation, not more technology, in order to survive. Although we find this theological message in an unusual source, it still represents an important warning we have yet to heed.

Redeeming The Hunger Games: From a Christian Worldview Perspective

Although not explicitly anti-Christian, The Hunger Games presents a very disturbing future world where children are forced to fight one another to the death. Sue Bohlin presents solid, biblically based concepts on how we are to consider movies in general and redeeming questions we should ask of this movie if one chooses to see it. Viewing movies with the

intent of understanding the worldview behind the movie can help us present our Christian worldview in a way that communicates with the people around us.

Should Christians read (or see) *The Hunger Games*? Some people make strong arguments for avoiding any contact with the books or movie. No one will lie on their deathbed and say, "Oh, how I regret missing *Hunger Games*." But this is the latest "big thing" to hit our culture; is there a way for Christ-followers to redeem it and not simply consume it as entertainment?

This separatist (and unrealistic) position confirms an unhealthy false dichotomy between "things of the world" and "things of the spirit realm." We need to see the world as one reality where Christ rules over all and has something to say about everything. It would be better to ask, "How does the Bible relate to *Hunger Games*?" It would be better to compare biblical truths and biblical values to any body of work people are reading or viewing or listening to, the way that we can better judge the crookedness of a stick by laying it next to a straightedge.

Developing our critical thinking skills protects us from absorbing and internalizing ungodly ideas, creating yet more "cultural captives" who are more conformed to the surrounding cultures than the Word and character of God.

"It's just a story. . ."

Many people dismiss concern over blockbuster novels and movies by saying, "Come on, it's just a story, it's *fiction!*" But we need to be *more* careful about how we process ideas and images that come through story, since most people's defenses are down with this genre, and they just absorb the story without thinking or analyzing. That's a major contributing factor to cultural captivity in the church—people have been absorbing

the ideas and values of the culture through music, TV, movies, books, and even just personal conversation, without comparing them to what God says.

When people take in and digest *Hunger Games* as mere entertainment, their unthinking discernment puts them in the same category as the Capitol spectators who have no concept of the atrocity of human beings being sacrificed for their diversion. But if you are deeply troubled by its depiction of the broken reality of life in a fallen world, if you are able to think about the implications of the story, then you are interacting with the books and movie with wisdom.

I think the best way to build wisdom and develop critical thinking is by asking questions that help us evaluate what we read or see.

For example, something is terribly wrong in the world that author Suzanne Collins paints in *Hunger Games*. Our souls rebel against the evil, the sense of "not right-ness" in it. We need to ask ourselves (and others), *What is the "terribly wrong"? And where did that sense of right and wrong come from?* I suggest that the visceral reaction comes from the imprint of God, the *imago Dei,* on our souls. The rightness of the image of God on our souls contrasts painfully with the crookedness of the dystopian world of *Hunger Games.*

The presence of evil and sin in the books is not bad in and of itself; as in the Bible, they are never glorified or promoted. The result is that most readers/viewers react along moral lines: murder and betrayal are bad, sacrifice and loyalty are good. This is a legitimate and edifying use of literature and film.

Questions to Ask

My colleague Todd Kappelman, an accomplished literature and film critic, suggests several thoughtful questions to ask

about films and books:

• How important is life to the director/writers etc.? Are the tough issues dealt with or avoided?

• Is there a discernible philosophical position in the film? If so, what is it, and can a case be made for your interpretation?

• Is the subject matter of the film portrayed truthfully? Here the goal is to determine if the subject matter is being dealt with in a way that is in agreement with or contrary to the experiences of daily reality.

• Is there a discernible hostility toward particular values and beliefs? Does the film seek to be offensive for the sake of sensationalism alone?

• Is the film technically well made, written, produced and acted?{1}

Christian thinker Leland Ryken proposes three more questions that the Christian ask when interpreting a work of art:

• Does the interpretation of reality in this work conform or fail to conform to Christian doctrine or ethics? (The answer may be mixed for a given work.)

• If some of the ideas and values are Christian, are they inclusively or exclusively Christian? That is, do these ideas encompass Christianity and other religions or philosophic viewpoints, or do they exclude Christianity from other viewpoints?

• If some of the ideas and values in a work are Christian, are they a relatively complete version of the Christian view, or are they a relatively rudimentary version of Christian belief on a given topic?{2}

Our good friend Dan Panetti from Prestonwood Christian Academy has assembled a deeply insightful white paper for parents to use in talking about *Hunger Games* with their children, to help them build a biblical worldview analysis of something students are intent on reading or seeing anyway. (And it's not just older students, either. One of my friends' eight-year-old son insisted on going to see the movie. His mother told me, "He was attracted by the movie trailers and he knew people reading the book. He was enticed by the action, but kids killing kids did bother him [but not that much].")

I am grateful for Dan's generosity in allowing us to share his questions in this article, and to make his entire PDF document available for you on our website here. Below are three of the nine major themes he highlights for discussion. I invite you to read through his paper to sharpen your own critical thinking skills!

And that's how we redeem *The Hunger Games.*

The Hunger Games Trilogy Parent Book Discussion

by Dan Panetti, Prestonwood Christian Academy — Plano, Texas

Substitutionary Atonement

The most important theme of this book, in my opinion, is the concept of substitutionary atonement (or penal substitution).

God made him who had no sin to be sin [or be a sin offering] for us, so that in him we might become the righteousness of God. — 2 Corinthians 5:21

Katniss voluntarily takes the place of her sister Primrose as the "tribute" from District 12—essentially Katniss took the place of Primrose replacing her sister's life with her own. Compare this story to the story of the sacrifice of Jesus in our place. While Katniss is willing to give her own life to

protect her younger sister, Jesus was willing to give His life as a ransom for ours…while we were yet sinners—still IN rebellion against His Father! While Prim was young, "innocent" and weak and Katniss was far more skilled and able to defend herself; it was Jesus who was perfect and sinless dying for us!

Violence

The primary complaint aired about *The Hunger Games* (both the books and the movie) related primarily to the violence; and, yes, the books and movie do have a violent theme and depictions. The first question is whether the violence is appropriate or simply gruesome for effect. Both Collins (the author) and those responsible for the movie do a remarkable job of actually restraining the emphasis on the violence. This does not mean that the books and movie are appropriate for all ages—quite to the contrary. But in discussing this concept with your own children you can point out the fact that there are times in human history when people have had to stand up and fight for what they believe in. Engraved into the wall of the Korean War Veterans Memorial is the statement, "Freedom is not free." Katniss lives under an oppressive government and is forced to fight not only to protect herself and those she loves, but in the second and third book she fights for an ideal of something that is greater than just herself. Later we will discuss the ideals of the Founding Fathers of our nation and their decision to throw off an oppressive government agreeing to pledge their lives, their fortunes and their sacred honor. Unlike previous generations, this generation is not as familiar with the cost of freedom born by those who give their lives in service to our nation. *The Hunger Games* reminds us that there are some things that are worth fighting for—and even dying for — meaning there will be a certain level of violence along the way.

Freedom is a fragile thing and is never more than one generation away from extinction. It is not ours by

inheritance; it must be fought for and defended constantly by each generation, for it comes only once to a people. Those who have known freedom, and then lost it, have never known it again. ~ Ronald Reagan

Ethical Dilemmas

One of the most fascinating aspects of *The Hunger Games* is the presentation of numerous ethical dilemmas — questions where you could ask yourself, "What would I do if I were in that situation?"

Examples of ethical dilemmas for conversation purposes:

Is lying wrong? Is lying always wrong? Would you be willing to lie to protect the life of another person? Would you be willing to lie to save your own life?

Obviously Katniss finds herself faced with these fascinating ethical dilemmas and she has choices to make. Whether she is inside the arena fighting for her life or leading a rebellion against President Snow and the oppressive government, Katniss is often faced with the choice of either having to lie or someone (including herself) having to pay the ultimate price of their lives!

Is killing wrong? Is killing another person always wrong? Would you be able to kill another person to save the life of someone you loved? Would you be able to take the life of another person to save your own life?

Again Katniss finds herself faced with these difficult situations. At the end of *The Hunger Games*, Katniss and Peeta decide that they would rather die than kill one another—and although Katniss hopes that those in control would rather have two victors than none, the reality is that both Katniss and Peeta take the poisonous berries with the intent of killing themselves.

Katniss struggles with this dilemma when she makes an alliance with Rue and when she remembers that Thresh let her live when he could have killed her. Why is it so difficult for Katniss to take the life of another while others in the arena appear to be so cavalier and nonchalant about it?

If you want to discuss more about ethical dilemmas, I suggest you read *The Hiding Place* by Corrie tem Boom. Corrie and her family were Dutch Christians who helped hide numerous Jews during WWII. Eventually Corrie and her family were arrested and sent away to concentration camps — her father and sister both died in a concentration camp.

As Christians we should look to God's Word for guidance in making decisions about life. Psalm 119:105 reminds us that God's Word "is a lamp to our feet and a light for our path." Proverbs 3:5-6 tells us to "Trust in the Lord with all your heart and lean not on your own understanding; in all your ways acknowledge him, and he will make your paths straight." Wise counsel is also strongly encouraged in Scripture. Proverbs 15:22 says, "Plans fail for lack of counsel, but with many advisers they succeed."
