

The Iran and Israel Conflict Crisis: 4 Insights Relating to the U.S., Israel, and the Middle East

Iran and Israel Conflict Crisis and Regional Security

Iran nuclear threat: Does it pose a threat to the U.S., Israel, and the Middle East? What can we learn about the Iran and Israel conflict?

Many Americans might wonder why the president has focused so much attention on Iran. After all, it is a country 6,000 miles away in the Middle East. Some may also conclude that military action against Iranian leadership might not be warranted since the previous administration did not deploy troops or significant military hardware to the region.

Two years ago, however, the Biden administration considered action after more than 160 attacks on U.S. troops took place in Iraq, Syria, and Jordan. There were also about 40 clashes with the Houthis in the Red Sea. Iran funded many of these attacks, either directly or indirectly. They were part of a mounting proxy battle between the U.S. and Iran.

At the time, reporters asked what President Biden would do. Some argued that the U.S. and Iran have essentially been at war for decades. Even the Pentagon press secretary

acknowledged that this was true if one considers the larger conflict. To understand why reporters were asking this question, we need to review some history.

Modern History of Iran

The conflict between Iran and the United States can be traced back to 1953, when the U.S. cooperated in overthrowing Iranian Prime Minister Mohammad Mossadegh. Afterward, the Shah of Iran (Mohammad Reza Pahlavi) was placed in power.

The U.S. viewed the Shah as a key ally and a pillar of security in the Middle East. His pro-Western government advanced Western interests and served as a Cold War counterbalance to Soviet influence. The United States supported Iran through significant arms sales and strong economic ties, despite concerns about the Shah's authoritarian rule.

The turning point came in 1979 when the Shah was overthrown by radical Islamic clerics led by Ayatollah Khomeini. The Iranian Revolution transformed the U.S. from an ally into "The Great Satan" in the eyes of the new regime.

This hostility became clear when the Iranian Revolutionary Guard seized the U.S. Embassy and took 52 American diplomats hostage. They were not released until President Reagan was sworn in on January 20, 1981. This crisis marked the beginning of what many view as a half-century-long undeclared conflict between Iran and the United States.

The U.S. strategy had been to promote stability in the Middle East. That effort became increasingly difficult because of Iran's growing influence. Complicating matters further, Saudi Arabia supported anti-Western Islamic movements such as the Muslim Brotherhood, while Turkey—though a NATO member—began positioning itself as a leader of a renewed Islamic political

vision in the region.

Iran has engaged in a proxy war against the U.S. for decades. In April 1983, Iranian-backed Hezbollah forces bombed the U.S. Embassy in Beirut, killing 63 people. Later that year, Hezbollah bombed the U.S. Marine barracks in Beirut, killing 241 service members.

Despite these attacks, decisive retaliation never fully materialized. Iranian influence continued to expand through proxy groups across the region.

During the Iraq War following 9/11, evidence showed that Iran was supplying weapons and support that contributed to American casualties. While the U.S. was focused on Iraq as the primary enemy, Iranian operatives and Iranian-manufactured munitions were also responsible for attacks on U.S. troops.

Iran is often described as the chief sponsor of terrorism in the Middle East. It funds groups such as Hamas, Hezbollah, and the Houthis, which regularly target Israel and U.S. interests. Israeli and American responses to these groups are now reshaping the balance of power in the region.

Missiles and Nuclear Weapons

Iran possesses the largest stockpile of ballistic missiles in the Middle East. Many of these missiles have a range of up to 2,000 kilometers, allowing them to strike Israel and other countries throughout the region.

Iran has also demonstrated its long-term intentions toward Western nations. Earlier this century, it launched ballistic missiles from ships in the Caspian Sea. Although the test missile did not carry a nuclear warhead, it demonstrated how such a weapon could be deployed.

A missile detonated high in the atmosphere could create an

electromagnetic pulse (EMP), potentially destroying the U.S. electrical grid and causing catastrophic damage.

If Iran were to acquire nuclear weapons, it would destabilize the Middle East and surrounding regions. However, the latest assessment from Tulsi Gabbard suggests that Iran is not currently building a nuclear weapon and that its supreme leader has not authorized such a program since it was suspended in 2003. Some officials, however, dispute this assessment.

The Donald Trump administration resumed talks with Iran after withdrawing from the nuclear accord several years earlier. Initial negotiations produced few concrete results. Meanwhile, a United Nations nuclear watchdog reported that Iran violated nuclear nonproliferation agreements.

Iran maintains that its nuclear development is intended for civilian energy. However, the discovery of secret nuclear sites has raised concerns that the program may have military ambitions.

Tensions escalated when Iran launched a massive ballistic missile attack on Israel following Israeli strikes on Iranian targets.

In June 2025, Israel launched **Operation Rising Lion**, targeting key nuclear and military facilities, including an enrichment site. The strike lacked the bunker-busting capability needed to fully destroy the facility.

Soon afterward, the United States launched **Operation Midnight Hammer**, striking several Iranian nuclear locations. The administration announced that the sites had been "obliterated." Yet satellite imagery later suggested Iran had begun rebuilding portions of its nuclear infrastructure.

Diplomatic talks between the United States and Iran have produced few breakthroughs. Negotiations aim to limit uranium

enrichment, restrict missile development, and address human rights concerns within Iran.

Since diplomacy failed, the Trump administration began military endeavors. However, many Americans remain wary of another prolonged conflict in the Middle East. Limited strikes might damage nuclear facilities, but meaningful regime change would likely require a large-scale ground invasion.

Religious Component

Another reason [Iran's nuclear ambitions](#) raise concern is the religious worldview of its leadership.

Most Iranians are Shia Muslims, and a significant branch follows the tradition known as the “**Twelvers**.” This sect recognizes twelve divinely appointed leaders known as Imams.

According to their belief system, the twelfth Imam—often called the Mahdi or messianic figure—is currently in hiding and will return during a time of global conflict.

Just as Christianity has an eschatology, or doctrine of the end times, Shia Islam also holds an apocalyptic worldview. However, its narrative is essentially the reverse of what Christians read in the book of Revelation.

Twelver theology teaches that global conflict may precede the arrival of the Mahdi. Some analysts fear that extremist interpretations of this belief could view large-scale conflict—including potential attacks on Israel or the United States—as a way to usher in that messianic era.

During the Cold War, the United States relied on the doctrine of **Mutually Assured Destruction (MAD)** to deter nuclear war. The Soviet Union would not launch nuclear weapons because retaliation would guarantee its destruction.

Critics argue that radical religious interpretations might weaken this deterrence model. Some Twelver believers might assume divine intervention would protect them from destruction.

Author Joel C. Rosenberg explored this scenario in his political thriller *The Twelfth Imam*.

Yet there is another side to this story. Reports indicate that Christianity is growing rapidly in Iran, with some describing the Iranian church as the fastest-growing Christian movement in the world.

Christians should continue praying for Iranian believers who often face persecution. We should also pray for U.S. leaders and their allies as they navigate these complex challenges.

The Persian people are an ancient civilization that deserves peace and freedom. Unfortunately, many Iranians suffer under economic sanctions and harsh authoritarian leadership.

They deserve both our prayers and our compassion.

Men With Bibles

September 2, 2011

God works in miraculous ways to get His Word to believers who need it. I thought I might share a story I read years ago in a book entitled *Unsolved Miracles*. John VanDiest of Multnomah Publishers compiled a number of stories, and the following one I think would be of great encouragement to you.

“In a village in the mountains of Iran, a number of new believers heard that they could find out more about Jesus if they could get the book the Christians called the Bible. One night, a man had a dream that if he went down to the highway, some men would come by who would be able to give him a Bible.

“The next day, he gathered a little offering of money from among the believers in the village, and made his way down the mountainside to the highway that ran through the area. He sat on a rock and began to wait.

“Some time later, two men in a car just ‘happened’ to pick up a shipment of Bibles across the border. They were driving along the same highway when the steering on their car suddenly locked. They couldn’t move it more than an inch.

“They finally nudged the steering wheel just enough to get the car over to the side of the road. They got out and put up the hood to figure out what was wrong. A man sitting on a nearby rock called out to them, ‘Are you the men with the Bibles?’

“Stunned that this man should know, they admitted, ‘Well, yes we do have Bibles.’ The old man gave them all the money he had collected, bought as many Bibles as he could, and made his way back to the village.

“The men with the Bibles then went back to determine what was wrong with their car, but could find nothing. They shrugged their shoulders, got in, and drove away.”

Isn’t that a wonderful story? I believe it is just a glimpse of the wonderful ways God is getting His Word to His people even in remote parts of the earth. I’m Kerby Anderson, and that’s my point of view.
