

Biblical Interpretation

Earlier this month at the meeting of the International Society of Christian Apologetics there was a robust discussion of inerrancy and hermeneutics. Those are scholarly words for the belief that the Bible is without error and needs to be interpreted according to sound practices of biblical interpretation.

There is a practical aspect of this debate that affects you and the way you read and interpret the Bible. If you have been a Christian for any length of time, you have probably had someone ask: Do you take the Bible literally? Before you answer, I would recommend you ask that person what they mean by literally.

Here is a helpful sentence: "When the literal sense makes good sense, seek no other sense lest it result in nonsense." Obviously the context helps in understanding how to interpret a passage.

After all, the Bible uses various figures of speech. Jesus told parables. Jesus used metaphors and proclaimed that He is the vine, the door, and the light of the world. There are types and symbols and allegories. If you are reading a section in the Bible that describes historical events, you expect the historical record to be accurate. If you are reading poetic literature like the Psalms, you should not be surprised that God is described as a shepherd, a sun and a shield.

Here is another helpful sentence: "When the literal sense does not make good sense, we should seek some other sense lest it lead to nonsense." We should reject a literal sense when it contradicts the moral law, physical law, or supernatural law.

When Jesus says in Matthew 5:30 to cut off your hand, that is not to be taken literally because it violates moral law. When Jesus talks about those who swallow a camel in Matthew 23:24,

that violates a physical law. When we read in Jonah 3:10 that God repented or changed His mind, we know that violates a supernatural law, because God does not change His mind (Numbers 23:19).

But in most cases, we are to read the Bible in the literal sense because seeking some other sense will result in nonsense. That's just common sense.
