

No Reason to Fear: Examining the Logic of a Critic

Rick Wade uses the faulty arguments in Sam Harris' book Letter to a Christian Nation to show why Christians don't have to be afraid of the new atheists' assault on our faith.

Getting Started

Sometimes we Christians shy away from books which attack our beliefs because we're afraid we can't answer the objections. That's understandable. Often the authors of such books carry impressive credentials. It's easy to feel intimidated.

Another response which is the opposite of fearful avoidance is haughty dismissal. Sometimes we act as if our position is so obviously true that others can be dismissed as downright stupid and hardly worth bothering with. Even if the opponents' arguments *are* bad, that's no reason to adopt an arrogant attitude. It's especially bad when the dismissive Christian hasn't even bothered to read the book!

A better response, I think, is to use such occasions to grow in understanding and to exercise one's apologetic "muscles" by working at answering the challenges posed. So, for example, when a doctrine is challenged, by studying the subject, we grow in our knowledge of Christian beliefs and (here's the uncomfortable part) we are sometimes corrected in our understanding. Another advantage is preparation for real face-to-face encounters with critics. Responding to arguments in a book means there isn't the pressure of a person staring at you, waiting for an answer (and fully expecting one; critics do have such a high view of us!).

In this article I'm going to use Sam Harris's book *Letter to a*

Christian Nation to give some suggestions about what to look for in such books.[\[1\]](#) I won't try to address every challenge. Others have given more extensive responses.[\[2\]](#)

I titled this essay "No Reason to Fear" for a good reason. The challenges of critics throughout the ages have not been able to prove Christianity false, and those of modern day critics won't either. Most of their arguments have already been answered. When we brace ourselves and start reading a critic's book, we often find that the arguments don't pack that great a punch after all, much like the neighborhood bully who the other boys are afraid of but really have no reason to be.

Of course, we can't always answer seemingly good objections, and certainly can't answer them all to the atheist's satisfaction. I'll go further than that. I don't think we *have* to answer every objection. There will always be objections. But it's as intellectually wrong to drop one's convictions because of a few unanswered criticisms as it is to hold to such convictions for no reason at all. Atheists obviously don't abandon their beliefs so easily, and they shouldn't expect us to either.

Fallacious Arguments

If we're going to engage books like *Letter to a Christian Nation* responsibly, we have to be ready to hear some good criticisms of our beliefs or actions. We have to accept the fact that there are some hard things to deal with in our beliefs, especially the problem of evil. We need to admit our inability to give satisfying answers to all objections if we're going to expect that kind of openness from critics. Also, it is often Christians who come under attack rather than Christianity. Harris spends a lot of time here. Christians have done some bad things, and they need to be acknowledged.

More to the point for this article, Christians can sometimes

give bad arguments for what they believe. I'm not suggesting that we have to bow to all the demands of skeptics; there are several theories of the proper use of evidences and logical arguments and personal experience, and some formulations are unreasonable. It *is* to say, however, that we must use good reasoning when we make a case.

The problem with using poor reasoning is that it undermines one's case. That's what we find in Harris's book, and that will be our focus here. When we read a case for a particular belief, we should keep a lookout for such things as questionable assumptions, logical fallacies, and incorrect facts. Harris's book is plagued with fallacious arguments, a surprising turn since he presents his side as being that of reason. So I'm going to spend most of my time on those and mention the other things when appropriate.

Don't let the term "logical fallacies" put you off, like they're things only specialists can understand. It's just another name for poor reasoning. So, for example, if you make the claim that Christianity is the only true religion, and someone responds that you only believe that because you grew up in a Christian nation, you could cry "Foul!" You're making a universal claim; where you're from is irrelevant. If it's true, it's true in India and China and the US and everywhere else, too. This is a kind of fallacy of false cause. No one is a Christian because he lives in a Christian nation. We are Christians because we have believed Jesus' claims that are universal. It also reflects the current mood according to which religions are human constructs, and Christianity is just one such religion among many.

Although fallacious arguments can have *psychological* force (when we don't spot them and they seem correct), they have no *logical* force. Their conclusions should not be believed.

Are We Really So Evil?

Harris's favorite target in his attack on religion is its supposed immorality. He tells us that "Christians have abused, oppressed, enslaved, insulted, tormented, tortured, and killed people in the name of God for centuries, on the basis of a theologically defensible reading of the Bible."[\[3\]](#) Well, *that's* a surprise! Not that Christians have done bad things, but that such acts are *theologically defensible*! Such things are sanctioned by God because He, too, does such things. Harris accuses Christians of picking and choosing sections of Scripture that present a more loving God while ignoring the truly telling ones which reveal a God who condones slavery and the beating and killing of rebellious children.

But Harris is guilty of this picking and choosing himself. He commits the fallacy which is called the *neglect of relevant evidence*. To be fair, he does note that "it is undeniable that many people of faith make heroic sacrifices to relieve the suffering of other human beings."[\[4\]](#) But he doesn't bother listing them. He gives no space to the great work done by Christians in the fields of medicine, literacy, agriculture, famine relief, etc. He ignores the good work of organizations like Mercy Ships which takes life-changing medical help to people in third world nations in the name of Christ.

Well, he doesn't completely ignore missionary efforts. One of his favorite rants is against the evils perpetrated by missionaries. They waste time preaching about such things as the virgin birth when there is important work to be done. The most memorable accusation is when he charges missionaries who preach against the use of condoms with "genocidal" piety![\[5\]](#) "Genocidal!" Maybe a little exaggeration there? (And, by the way, while it's true that Christian medical missionaries do present the gospel to people—which they should, since one's eternal life is more important than one's temporal life—I've never heard of any who withhold medical help from people in

need until they first preach a sermon on the virgin birth.)

In another place Harris commits the fallacy called *causal oversimplification*. As he sees it, religion is the cause of conflicts in Palestine, the Balkans, Sudan, Nigeria, and other countries. Religion is so unnatural and wrong-headed to atheists, that it becomes an easy target for casting blame.

I'm going to give a bit more space to this charge since it's a very popular one these days.

In 2004, the BBC published what it called a "War Audit" which was conducted to determine how significant religion has been in war, at least in the last century.[\[6\]](#) In the article "God and War: An Audit and an Exploration," authors Greg Austin, Todd Kranock and Thom Oommen report that

at a philosophical level, the main religious traditions have little truck with war or violence. All advocate peace as the norm and see genuine spirituality as involving a disavowal of violence. It is mainly when organised religious institutions become involved with state institutions or when a political opposition is trying to take power that people begin advocating religious justifications for war.

They continue:

After reviewing historical analyses by a diverse array of specialists, we concluded that there have been few genuinely religious wars in the last 100 years. The Israel/Arab wars from 1948 to now, often painted in the media and other places as wars over religion, or wars arising from religious differences, have in fact been wars of nationalism, liberation of territory or self-defense.

Regarding Islamic terrorism, the authors write:

The Islamist fundamentalist terror war is largely about political order in the Arab countries, and the presence of

US forces in Saudi Arabia. It is not about religious conversion or a clash of religions. Nevertheless, bin Laden claims a religious duty in executing the war. . . .

It is mainly when organised religious institutions become involved with state institutions that people begin advocating religious justifications for war.

We need to go back to the wars of Arab expansion, the Crusades and the Reformation Wars for genuine wars over religion.

The authors—or as they call themselves, compilers—of this article include tables which give death tolls in different categories of wars. The writers say that the tables

show that the overwhelming majority of wars and the overwhelming majority of the victims of such wars cannot be classified primarily according to religious causes or religious beliefs. There have been horrific examples though where particular communities have been *targeted because of their religious faith* [italics mine], and these atrocities have been perpetrated by the three most 17 vicious and blood-thirsty regimes ever to hold power: Stalin's Russia, Mao's China and Hitler's Germany.

It's interesting that Harris tries so hard to make religion a source of violence when, as this report indicates, it is often the religious who are targeted by violence.[{7}](#)

A Few More

Sam Harris's book is titled *Letter to a Christian Nation*, not simply because he's against Christianity. He wants all religion to come to an end. It just happens that Christianity is the most prominent religion in America. Because he lumps all religions together, he can smear Christianity with the evils of Islam by implication.

This is a fallacy. It's called the fallacy of *over-generalization* (or *converse accident*). If evil is done in the name of Islam, and Islam is a religion, then every religion is prone to evil. Thus, what counts against Islam counts against Christianity, too. (If one is reluctant to group Christianity with other religions, then one might see here the fallacy of *faulty comparison*, or what is more commonly called "comparing apples to oranges.")

Another argument Harris presents employs a fallacy we've already discussed, the fallacy of *causal oversimplification*. Harris commits this fallacy when he tells us that "the anti-Semitism that built the Nazi death camps was a direct inheritance from medieval Christianity." {8}

The reality of Christian anti-Semitism through the ages cannot be denied. However, Harris's evaluation is simplistic. It is very easy to narrowly focus on the very real anti-Semitism of Christians and ignore other very significant factors. For example, Harris fails to tell us that the Jews were persecuted quite apart from Christianity and even before Christianity came into existence. For example, serious tensions between the Jews and the Greeks of Alexandria in the first century B.C. spilled over into the next century. Things got so bad that Jews were forced to live in one section of the city. Their houses were broken into and looted. Synagogues were burned, and women were dragged to the theater and forced to eat pork. Historian H. I. Bell reports that "men, women, and even children [were] beaten to death, dragged living through the streets, or flung on to improvised bonfires." {9} He also ignores the shift from religious persecution to racial persecution which occurred in the nineteenth century, notably in Russia.

Of course, this doesn't prove that Hitler *didn't* get his anti-Semitism from Christians; but it *does* mean that one should not immediately assume that Christian prejudice is at the root of anti-Semitism. There have been other causes as well. A

significant factor in Hitler's hatred of the Jews was the strong influence of *Darwinism* that led him to think that people who were racially or eugenically inferior needed to be eliminated from the evolving human race.[{10}](#)

Although some people already believed in the inferiority of some races, and although Darwinism wasn't Hitler's sole inspiration, Historian Richard Weikart writes, "Darwinism was a central, guiding principle of Nazi ideology, especially of Hitler's own world view." Weikart quotes Richard Evans, a historian at Cambridge University: "The real core of Nazi beliefs lay in the faith Hitler proclaimed in his speech of September 1938 in science—a Nazi view of science—as the basis for action. Science demanded the furtherance of the interests not of God but of the human race, and above all the German race and its future in a world ruled by ineluctable laws of Darwinian competition between races and between individuals." Weikart continues: "This is not a controversial claim by anti-evolutionists, but it is commonly recognized by scholars who study Nazism."[{11}](#)

A Fundamental Commitment to Atheism

One of the questionable assumptions in *Letter to a Christian Nation* is Sam Harris's assertion that "there is no question that human beings evolved from nonhuman ancestors."[{12}](#) Of course, there is indeed a question about this, a question raised by highly educated scientists easily as qualified as Mr. Harris.

It's no wonder, really, that Harris makes such bold statements. He is prevented from allowing the possibility of divine creation by his basic worldview commitments. He admits that he doesn't know why the universe exists, but he's confident there's no God behind it. That sounds like a philosophical presupposition. What evidence or reasons does he give for it? Harris might like to pretend that his beliefs are

based solely on the “trinity” of science, reason, and nature, but his naturalism cannot be established by these. Rather, it informs his use of them.

One of the (potentially!) maddening things about the arguments of atheists these days is their frequent silence with respect to any justification of their own basic worldview commitments. Harris goes so far as to claim that atheism isn't really a belief; that there shouldn't even *be* the word “atheism.”[\[13\]](#) Although “atheism” has long been understood to mean the belief that there is no God, many atheists today deny that. It isn't the belief that there is no God; it's simply an absence of belief in God.[\[14\]](#) It's a kind of “default” position, a “zero” belief, where everyone should be until given sufficient reasons to believe in God. Thus, the atheist has nothing to defend or prove.

But really, folks. Who's going to believe that atheists are belief-less about God, that they don't actually believe that there is no God? It's astonishing the effort they put forth in arguing against religious belief if indeed they have no belief at all.

However, we can go back and forth with atheists about whether they truly deny the existence of God, or we can let that stand and simply ask what they *do* believe about ultimate reality, for surely they believe *something*. It's simply false to assume that atheism is some kind of zero belief, that it involves no metaphysical commitments. If one denies God, one must have some other view about ultimate reality. Naturalism is a metaphysical position, and it has serious problems of its own.[\[15\]](#) If Christians are responsible to give good reasons for their belief in Christian theism, naturalistic atheists must give reasons for their naturalism.

Sam Harris speaks as a voice on high, shouting down to us poor, ignorant people who are stuck in our absurd religious beliefs. It's hard to imagine anyone with thoughtful

convictions changing his or her beliefs based on this book. He's preaching to the choir. Now that you have a few tips on what to look for, you might want to take a look at the book, and hear the rest of the "sermon."

Christian Worldview and Social Issues

Biblical Principles

How can we apply a Christian worldview to social and political issues? I would like to set forth some key biblical principles that we can apply to these issues.

A key biblical principle that applies to the area of bioethics is the sanctity of human life. Such verses as Psalm 139:13-16 show that God's care and concern extends to the womb. Other verses such as Jeremiah 1:5, Judges 13:7-8, Psalm 51:5 and Exodus 21:22-25 give additional perspective and framework to this principle. These principles can be applied to issues ranging from [abortion](#) to [stem cell research](#) to [infanticide](#).

A related biblical principle involves the equality of human beings. The Bible teaches that God has made "of one blood all nations of men" (Acts 17:26). The Bible also teaches that it is wrong for a Christian to have feelings of superiority (Phil. 2). Believers are told not to make class distinctions between various people (James 2). Paul teaches the spiritual equality of all people in Christ (Gal. 3:28; Col. 3:11). These principles apply to [racial relations](#) and [our view of government](#).

A third principle is a biblical perspective on marriage. Marriage is God's plan and provides intimate companionship for

life (Gen. 2:18). Marriage provides a context for the procreation and nurture of children (Eph. 6:1-2). And finally, marriage provides a godly outlet for sexual desire (1 Cor. 7:2). These principles can be applied to such diverse issues as artificial reproduction (which often introduces a third party into the pregnancy) and [cohabitation](#) (living together).

Another biblical principle involves sexual ethics. The Bible teaches that sex is to be within the bounds of marriage, as a man and the woman become one flesh (Eph. 5:31). Paul teaches that we should “avoid sexual immorality” and learn to control our own body in a way that is “holy and honorable” (1 Thess. 4:3-5). He admonishes us to flee sexual immorality (1 Cor. 6:18). These principles apply to such issues as [premarital sex](#), [adultery](#), and [homosexuality](#).

A final principle concerns government and our obedience to civil authority. Government is ordained by God (Rom.13:1-7). We are to render service and obedience to the government (Matt. 22:21) and submit to civil authority (1 Pet. 2:13-17). Even though we are to obey government, there may be certain times when we might be forced to obey God rather than men (Acts 5:29). These principles apply to issues such as [war](#), [civil disobedience](#), [politics](#), and [government](#).

Communicating in a Secular Culture

How can we communicate biblical morality effectively to a secular culture? Here are a few principles.

First, we must interpret Scripture properly. Too often, Christians have passed off their sociological preferences (on issues like abortion or homosexual behavior) instead of doing proper biblical exegesis. The result has often been *a priori* conclusions buttressed with improper proof-texting.

In areas where the Bible clearly speaks, we should exercise our prophetic voice as we seek to be salt and light (Matt.

5:13-16). In other areas, concessions should be allowed.

The apostle Paul recognized that the first priority of Christians is to preach the gospel. He refused to allow various distinctions to hamper his effectiveness, and he tried to “become all things to all men” that he might save some (1 Cor. 9:22). Christians must stand firm for biblical truth, yet also recognize the greater need for the unsaved person to hear a loving presentation of the gospel.

Second, Christians should carefully develop biblical principles which can be applied to contemporary social and medical issues. Christians often jump immediately from biblical passages into political and social programs. They wrongly neglect the important intermediate step of applying biblical principles within a particular social and cultural situation.

Third, Christians should articulate the moral teachings of Scripture in ways that are meaningful in a pluralistic society. Philosophical principles like the “right to life” or “the dangers of promiscuity” can be appealed to as part of common grace. Scientific, social, legal, and ethical considerations can be useful in arguing for biblical principles in a secular culture.

Christians can argue in a public arena against abortion on the basis of scientific and legal evidence. Medical advances in embryology and fetology show that human life exists in the womb. A legal analysis of the Supreme Court’s *Roe v. Wade* decision shows the justices violated a standard principle of jurisprudence. The burden of proof is placed on the life-taker and the benefit of the doubt is given to the life-saver.

This does not mean we should sublimate the biblical message. But our effectiveness in the public arena will be improved if we elaborate the scientific, social, legal, and ethical aspects of a particular issue instead of trying to articulate

our case on Scripture alone.

Christians should develop effective ways to communicate biblical morality to our secular culture. Law and public policy should be based upon biblical morality which results from an accurate interpretation of Scripture and a careful application to society.

Christian Principles in Social Action

How should Christians be involved in the social and political arena? Here are a few key principles.

First, Christians must remember that they have a dual citizenship. On the one hand, their citizenship is in heaven and not on earth (Phil. 3:17–21). Christians must remind themselves that God is sovereign over human affairs even when circumstances look dark and discouraging. On the other hand, the Bible also teaches that Christians are citizens of this earth (Matt. 22:15–22). They are to obey government (Rom. 13:1–7) and work within the social and political circumstances to affect change. Christians are to pray for those in authority (1 Tim. 2:1–4) and to obey those in authority.

Jesus compared the kingdom of heaven to leaven hidden in three pecks of meal (Matt. 13:33). The meal represents the world, and the leaven represents the Christian presence in it. We are to exercise our influence within society, seeking to bring about change that way. Though the Christian presence may seem as insignificant as leaven in meal, nevertheless we are to bring about the same profound change.

Second, Christians must remember that God is sovereign. As the Sovereign over the nations, He bestows power on whom He wishes (Dan. 4:17), and He can turn the heart of a king wherever He wishes (Prov. 21:1).

Third, Christians must use their specific gifts within the social and political arenas. Christians have different gifts and ministries (1 Cor. 12:4–6). Some may be called to a higher level of political participation than others (e.g., a candidate for school board or for Congress). All have a responsibility to be involved in society, but some are called to a higher level of social service, such as a social worker or crisis pregnancy center worker. Christians must recognize the diversity of gifts and encourage fellow believers to use their individual gifts for the greatest impact.

Fourth, Christians should channel their social and political activity through the church. Christians need to be accountable to each other, especially as they seek to make an impact on society. Wise leadership can prevent zealous evangelical Christians from repeating mistakes made in previous decades by other Christians.

The local church should also provide a context for compassionate social service. In the New Testament, the local church became a training ground for social action (Acts 2:45; 4:34). Meeting the needs of the poor, the infirm, the elderly, and widows is a responsibility of the church. Ministries to these groups can provide a foundation and a catalyst for further outreach and ministry to the community at large.

Christians are to be the salt of the earth and the light of the world (Matt. 5:13–16). In our needy society, we have abundant opportunities to preach the gospel of Jesus Christ and meet significant social needs. By combining these two areas of preaching and ministry, Christians can make a strategic difference in society.

Fallacies and Tactics

Let's now focus on some [logical fallacies and tactics](#) used against Christians. We need to exercise discernment and be on

alert for these attempts to sidetrack moral and biblical reflection on some of the key issues of our day.

The first tactic is *equivocation*. This is the use of vague terms. Someone can start off using language we think we understand and then veer off into a new meaning. If you have been listening to the Probe radio program for any time, you are well aware of the fact that religious cults are often guilty of this. A cult member might say that he believes in salvation by grace. But what he really means is that you have to join his cult and work your way toward salvation. Make people define the vague terms they use.

This tactic is used frequently in bioethics. Proponents of embryonic stem cell research often will not acknowledge the distinction between adult stem cells and embryonic stem cells. Those trying to legalize cloning will refer to it as "somatic cell nuclear transfer." Unless you have a scientific background, you will not know that it is essentially the same thing.

A second tactic is what is often called "*card stacking*." That is when an opponent has a selective use of evidence. Don't jump on the latest bandwagon and intellectual fad without checking the evidence. Many advocates are guilty of listing all the points in their favor while ignoring the serious points against it.

For example, the major biology textbooks used in high school and college never provide students with evidence against evolution. Jonathan Wells, in his book [*Icons of Evolution*](#), shows that the examples that are used in most textbooks are either wrong or misleading. Some of the examples are known frauds (such as the Haeckel embryos) and continue to show up in textbooks decades after they were shown to be fraudulent.

A third tactic is "*appeal to authority*." That means a person is relying on authority to the exclusion of logic and

evidence. Just because an expert says it doesn't necessarily make it true. We live in a culture that worships experts, but not all experts are right. Hiram's Law says, "If you consult enough experts, you can confirm any opinion."

Those who argue that global warming is caused solely by human activity often say that "the debate in the scientific community is over." But an Internet search of critics of the theories behind global warming will show that there are many scientists with credentials in climatology or meteorology who have questions about the theory. It is not accurate to say that the debate is over when the debate still seems to be taking place.

A fourth tactic often used against Christians is known as an *ad hominem* attack. This is Latin for "against the man." People using this tactic attack the person instead of dealing with the validity of their argument. Often the soundness of an argument is inversely proportional to the amount of *ad hominem* rhetoric. If there is evidence for the position, proponents usually argue the merits of the position. When evidence is lacking, they attack the critics.

Christians who want public libraries to filter pornography from minors are accused of censorship. Citizens who want to define marriage as between one man and one woman are called bigots. Scientists who criticize evolution are subjected to withering attacks on their character and scientific credentials. Scientists who question global warming are compared to holocaust deniers.

Another tactic is the *straw man argument*. This is done by making your opponent's argument seem so ridiculous that it is easy to attack and knock down. Liberal commentators say that evangelical Christians want to implement a religious theocracy in America. That's not true. But the hyperbole works to marginalize Christian activists who believe they have a

responsibility to speak to social and political issues within society.

A sixth tactic is *sidestepping*. This is done when someone dodges the issue by changing the subject. Ask a proponent of abortion whether the fetus is human and you are likely to see this technique in action. He or she might start talking about a woman's right to choose or the right of women to control their own bodies. Perhaps you will hear a discourse on the need to tolerate various viewpoints in a pluralistic society. But you probably won't get a straight answer to an important question.

A final tactic is the "*red herring*." That means to go off on a tangent (and is taken from the practice of luring hunting dogs off the trail with the scent of a herring). Proponents of embryonic stem cell research rarely will talk about the morality of destroying human embryos. Instead they will go off on a tangent and talk about the various diseases that could be treated and the thousands of people who could be helped with the research.

Be on the alert when someone in a debate changes the subject. They may want to argue their points on more familiar ground, or they may know they cannot win their argument on the relevant issue at hand.

A person with discernment will recognize these tactics and beware. We are called to develop discernment as we tear down false arguments raised up against the knowledge of God. By doing this we will learn to take every thought captive to the obedience to Christ (2 Cor. 10:4-5).

Christian Discernment

We are confronted with ethical choices and moral complexity. We must apply biblical principles to these social and political issues. And we must avoid the pitfalls and logical fallacies that so often accompany these issues.

This article is also available in [Spanish](#).

Turn on a television or open a newspaper. You are immediately presented with a myriad of ethical issues. Daily we are confronted with ethical choices and moral complexity. Society is awash in controversial issues: abortion, euthanasia, cloning, race, drug abuse, homosexuality, gambling, pornography, and capital punishment. Life may have been simpler in a previous age, but now the rise of technology and the fall of ethical consensus have brought us to a society full of moral dilemmas.

Never has society needed biblical perspectives more to evaluate contemporary moral issues. And yet Christians seem less equipped to address these topics from a biblical perspective. The Barna Research Group conducted a national survey of adults and concluded that only four percent of adults have a biblical worldview as the basis of their decision-making. The survey also discovered that nine percent of born again Christians have such a perspective on life.^{[\[1\]](#)}

It is worth noting that what George Barna defines as a biblical worldview would be considered by most people to be basic Christian doctrine. It doesn't even include aspects of a biblical perspective on social and political issues.

Of even greater concern is the fact that most Christians do not base their beliefs on an absolute moral foundation. Biblical ethics rests on the belief in absolute truth. Yet surveys show that a minority of born again adults (forty-four

percent) and an even smaller proportion of born again teenagers (nine percent) are certain of the existence of absolute moral truth.^{2} By a three-to-one margin adults say truth is always relative to the person and their situation. This perspective is even more lopsided among teenagers who overwhelmingly believe moral truth depends on the circumstances.^{3}

Social scientists as well as pollsters have been warning that American society is becoming more and more dominated by moral anarchy. Writing in the early 1990s, James Patterson and Peter Kim said in *The Day America Told the Truth* that there was no moral authority in America. “We choose which laws of God we believe in. There is absolutely no moral consensus in this country as there was in the 1950s, when all our institutions commanded more respect.”^{4} Essentially we live in a world of moral anarchy.

So how do we begin to apply a Christian worldview to the complex social and political issues of the day? And how do we avoid falling for the latest fad or cultural trend that blows in the wind? The following are some key principles to apply and some dangerous pitfalls to avoid.

Biblical Principles

A key biblical principle that applies to the area of bioethics is the sanctity of human life. Such verses as Psalm 139:13-16 show that God’s care and concern extend to the womb. Other verses such as Jeremiah 1:5, Judges 13:7-8, Psalm 51:5 and Exodus 21:22–25 give additional perspective and framework to this principle. These principles can be applied to issues ranging from abortion to stem cell research to infanticide.

A related biblical principle involves the equality of human beings. The Bible teaches that God has made “of one blood all nations of men” (Acts 17:26). The Bible also teaches that it

is wrong for a Christian to have feelings of superiority (Philippians 2). Believers are told not to make class distinctions between various people (James 2). Paul teaches the spiritual equality of all people in Christ (Galatians 3:28; Colossians 3:11). These principles apply to racial relations and our view of government.

A third principle is a biblical perspective on marriage. Marriage is God's plan and provides intimate companionship for life (Genesis 2:18). Marriage provides a context for the procreation and nurture of children (Ephesians 6:1-2). And finally, marriage provides a godly outlet for sexual desire (1 Corinthians 7:2). These principles can be applied to such diverse issues as artificial reproduction (which often introduces a third party into the pregnancy) and cohabitation (living together).

Another biblical principle involves sexual ethics. The Bible teaches that sex is to be within the bounds of marriage, as a man and the woman become one flesh (Ephesians 5:31). Paul teaches that we should "avoid sexual immorality" and learn to control our own body in a way that is "holy and honorable" (1 Thessalonians 4:3-5). He admonishes us to flee sexual immorality (1 Corinthians 6:18). These principles apply to such issues as premarital sex, adultery, and homosexuality.

A final principle concerns government and our obedience to civil authority. Government is ordained by God (Rom.13:1-7). We are to render service and obedience to the government (Matt. 22:21) and submit to civil authority (1 Pet. 2:13-17). Even though we are to obey government, there may be certain times when we might be forced to obey God rather than men (Acts 5:29). These principles apply to issues such as war, civil disobedience, politics, and government.

Biblical Discernment

So how do we sort out what is true and what is false? This is a difficult proposition in a world awash in data. It underscores the need for Christians to develop discernment. This is a word that appears fairly often in the Bible (1 Samuel 25:32-33; 1 Kings 3:10-11; 4:29; Psalm 119:66; Proverbs 2:3; Daniel 2:14; Philippians 1:9 [NASB]). And with so many facts, claims, and opinions being tossed about, we all need to be able to sort through what is true and what is false.

Colossians 2:8 says, "See to it that no one takes you captive through philosophy and empty deception, according to the tradition of men, according to the elementary principles of the world, rather than according to Christ." We need to develop discernment so that we are not taken captive by false ideas. Here are some things to watch for:

1. Equivocation – the use of vague terms. Someone can start off using language we think we understand and then veer off into a new meaning. Most of us are well aware of the fact that religious cults are often guilty of this. A cult member might say that he believes in salvation by grace. But what he really means is that you have to join his cult and work your way toward salvation. Make people define the vague terms they use.

This tactic is used frequently in bioethics. Proponents of embryonic stem cell research often will not acknowledge the distinction between adult stem cells and embryonic stem cells. Those trying to legalize cloning will refer to it as "somatic cell nuclear transfer." Unless you have a scientific background, you will not know that it is essentially the same thing.

2. Card stacking – the selective use of evidence. Don't jump on the latest bandwagon and intellectual fad without checking the evidence. Many advocates are guilty of listing all the points in their favor while ignoring the serious points

against it.

The major biology textbooks used in high school and college never provide students with evidence against evolution. Jonathan Wells, in his book *Icons of Evolution*, shows that the examples that are used in most textbooks are either wrong or misleading.^[5] Some of the examples are known frauds (such as the Haeckel embryos) and continue to show up in textbooks decades after they were shown to be fraudulent.

Another example would be the Y2K fears. Anyone who was concerned about the potential catastrophe in 2000 need only read any of the technical computer journals in the 1990s to see that no computer expert was predicting what the Y2K fear mongers were predicting at the time.

3. Appeal to authority – relying on authority to the exclusion of logic and evidence. Just because an expert says it, that doesn't necessarily make it true. We live in a culture that worships experts, but not all experts are right. Hiram's Law says: "If you consult enough experts, you can confirm any opinion."

Those who argue that global warming is caused by human activity often say that "the debate in the scientific community is over." But an Internet search of critics of the theories behind global warming will show that there are many scientists with credentials in climatology or meteorology who have questions about the theory. It is not accurate to say that the debate is over when the debate still seems to be taking place.

4. Ad hominem – Latin for "against the man." People using this tactic attack the person instead of dealing with the validity of their argument. Often the soundness of an argument is inversely proportional to the amount of ad hominem rhetoric. If there is evidence for the position, proponents usually argue the merits of the position. When evidence is lacking,

they attack the critics.

Christians who want public libraries to filter pornography from minors are accused of censorship. Citizens who want to define marriage as between one man and one woman are called bigots. Scientists who criticize evolution are subjected to withering attacks on their character and scientific credentials. Scientists who question global warming are compared to holocaust deniers.

5. Straw man argument – making your opponent's argument seem so ridiculous that it is easy to attack and knock down. Liberal commentators say that evangelical Christians want to implement a religious theocracy in America. That's not true. But the hyperbole works to marginalize Christian activists who believe they have a responsibility to speak to social and political issues within society.

Those who stand for moral principles in the area of bioethics often see this tactic used against them. They hear from proponents of physician assisted suicide that pro-life advocates don't care about the suffering of the terminally ill. Proponents of embryonic stem cell research level the same charge by saying that pro-life people don't care that these new medical technologies could alleviate the suffering of many with intractable diseases. Nothing could be further from the truth.

6. Sidestepping – dodging the issue by changing the subject. Politicians do this in press conferences by not answering the question asked by the reporter, but instead answering a question they wish someone had asked. Professors sometimes do that when a student points out an inconsistency or a leap in logic.

Ask a proponent of abortion whether the fetus is human and you are likely to see this tactic in action. He or she might start talking about a woman's right to choose or the right of women

to control their own bodies. Perhaps you will hear a discourse on the need to tolerate various viewpoints in a pluralistic society. But you probably won't get a straight answer to an important question.

7. Red herring – going off on a tangent (from the practice of luring hunting dogs off the trail with the scent of a herring fish). Proponents of embryonic stem cell research rarely will talk about the morality of destroying human embryos. Instead they will go off on a tangent and talk about the various diseases that could be treated and the thousands of people who could be helped with the research.

Be on the alert when someone in a debate changes the subject. They may want to argue their points on more familiar ground, or they may know they cannot win their argument on the relevant issue at hand.

In conclusion, we have discussed some of the key biblical principles we should apply to our consideration and debate about social and political issues. We have talked about the sanctity of human life and the equality of human beings. We have discussed a biblical perspective on marriage and on sexual ethics. And we have also talked about a biblical perspective on government and civil authority.

We have also spent some time talking about the importance of developing biblical discernment and looked at many of the logical fallacies that are frequently used in arguing against a biblical perspective on many of the social and political issues of our day.

Every day, it seems, we are confronted with ethical choices and moral complexity. As Christians it is important to consider these biblical principles and consistently apply them to these issues. It is also important that we develop discernment and learn to recognize these tactics. We are called to develop discernment as we tear down false arguments

raised up against the knowledge of God. By doing this we will learn to take every thought captive to the obedience to Christ (2 Corinthians 10:4-5).
