

Addressing Anxiety in Tumultuous Times

Byron Barlowe connects the dots between the universal problem of anxiety, what brain science is teaching us about our minds, and how Scripture and spiritual disciplines can help. In a world consumed by violent riots and trauma surrounding the Covid virus, this is a timely topic that God and science speak to well.

Millions of people worldwide are battling anxiety in a tumultuous time. The Coronavirus pandemic response has created a new abnormal: heightened fear of sickness and death, economic damage, and social isolation. Loneliness is the number one health crisis in America according to many epidemiologists, psychiatrists, and social scientists.[\[1\]](#) While we're all still reeling from this, racial strife has erupted into looting, killings, and anarchy in American streets.

Mental health is an increasing concern too. One study found that during the spring 2020 mass quarantine, prescriptions for anti-anxiety meds spiked.[\[2\]](#) A San Francisco area hospital has seen more deaths by suicide than by Covid-19, prompting a call for an end to mass shutdowns.[\[3\]](#) *It's been a perfect storm of stress.*

Are there real solutions *right now*? Yes, brain science is confirming the truths and promises proclaimed in Scripture in exciting ways! We have wonderfully adaptive minds—especially when they are focused on God. These built-in mind-morphing capabilities show the genius of our design as Image-bearers of God. Audiologist, cognitive researcher and outspoken Christian Dr. Caroline Leaf writes, “As an individual, you are capable of making mental and emotional change in your life. Through

your thinking, you can actively recreate thoughts and, therefore, knowledge in your mind.”[\[4\]](#)

And this has profound implications for true hope. Leaf continues: “Thoughts are real, physical things that occupy mental real estate. Moment by moment, every day, you are changing the structure of your brain through your thinking [it’s happening right now as you read]. *When we hope, it is an activity of the mind that changes the structure of our brain in a positive and normal direction.*”[\[5\]](#) The biblical book of Hebrews defines faith as “the substance of things hoped for, the evidence of things not seen” (Hebrews 11:1). The thankful, attentive, willfully hopeful mind creates positive emotions, thoughts, and acts of the will. In other words, we *significantly control whether we have a healthy soul.*

Dallas Willard writes, “The transformation of the self away from a life of fear and insufficiency takes place as we fix our mind upon God as he truly is.” As Scripture teaches, “Be transformed by the renewing of your mind.” In this article we’ll explore this transformation.

Morphing Your Mind—It’s Mostly Up to You!

Everyday stress is hard enough—but what about work-related anxiety? Money? Riots, memories of abuse, bullying, and abandonment? We have little control over family, culture or epidemics. But we can make amazing internal changes through our responses. Science and Scripture *agree* on this.

The transforming mind-renewal encouraged by Scripture is possible for us all, especially for people who have invited God to lead their lives. We can intentionally train our minds to reshape our brains—we are *not* perpetual victims of our past or circumstances. Nor are humans mere products of matter in motion. Dr. Caroline Leaf, author of *Switch on Your Brain*, claims that “Choice is real, and free will exists. You are able to stand outside yourself, observe your own thinking,

consult with God, and [work with him to] change the negative, toxic thought or grow a healthy, positive thought. When you do this, your brain responds with a positive neurochemical rush and structural changes that improve your intellect, health, and peace.”{6}

Even traumatic memories can be starved, defanged, broken down, and replaced. Brought into conscious awareness, they can become plastic enough to be recreated. Leaf explains that “Neurons that don’t get enough signal (that is, rehearsing of the negative event) will start firing apart, wiring apart, pulling out, and destroying the emotion attached to the trauma.” Also, desirable brain chemicals that bond and remold chemical connections, increase focus and attention, and increase feelings of peace and happiness begin to weaken traumatic memories even more. So bad memories, hatred, hurt, and other negative thoughts and emotions that form toxic beliefs: “If they stop firing together, they will no longer wire together. This leads to . . . rebuilding new ones.”{7}

Ideas have consequences and our beliefs guide our behavior. In the words of King Solomon, “As a man thinks in his heart, so he is.”{8} That is, we construct frameworks of beliefs and *then* speak and act from them.

Science seems to confirm this biblical view of self-control. Measuring magnetic fields, electrical impulses, chemical effects, photons, vibrations, and quantum energy paints a picture of intricately [networking] neurotransmitters, proteins, and energy—that is, signals—that change the brain’s landscape.{9} This “neuroplasticity [seems to be] God’s design for renewing the mind.”{10}

And there’s nothing magic about it: overcoming anxiety can be helped a lot through habits of the mind, heart, and soul.

Mindfulness & Meditation—Self-Control and Seeking God in Silent Solitude

It's no wonder that the concept of "mindfulness" has become a "thing" these days. Meditation and concentration are new-old survival skills. How do they work?

Dr. J.P. Moreland, noted philosopher and author of *Finding Quiet: My Story of Overcoming Anxiety and The Practices That Brought Peace*, candidly shares his struggles with anxiety and the need he had for medications. He also discovered the power of seeking God in self-directed solitude. He emphasizes sustained habits of the praising, thankful, and self-controlled soul.

Mindful meditation is not like taking a drug, is not a quick fix, or denying the senses to rid oneself of desire.^{11} "By charting new pathways in the brain, mindfulness can change the banter inside our heads from chaotic to calm."^{12} New habits are formed over time. When it comes to our minds, "practice doesn't make perfect; it makes permanent."^{13}

Remaining at rest via the practice of spiritual disciplines takes advantage of our mind's ability to "move into a highly intelligent, self-reflective, directed state." And the more often we go there, the more "we get in touch with the deep, spiritual part of who we are." This exercise switches brain modes in a way that can create wisdom and potential connection with God.^{14} As Jesus taught his disciples, "Keep awake (give strict attention, be cautious and active) and watch and pray, that you may not come into temptation."^{15} We can mentor our own minds, settle our souls, habituate our hearts, and free our spirits to respond to God. Brain science is catching up on this reality.

So, what's going on physically when we stop to meditate in focused solitude and silence? A post at *Mindful.org* claims, "The impact that mindfulness exerts on our brain is borne from

routine: a slow, steady, and consistent reckoning of our realities, and the ability to take a step back, become more aware, more accepting, less judgmental, and less reactive. . . . Mindfulness over time can make the brain, and thus [ourselves], more efficient regulators, with a penchant for pausing to respond to our world instead of mindlessly reacting.”{16} How different would social media conversations be—especially on politics and race—if more people practiced patient contemplation!

Various regions of our brains change while meditating. The “fight or flight” area actually shrinks in size.{17} It’s a real chill pill!

God keeps “him in perfect peace whose mind is stayed on You, because he trusts in You.”{18}

Thankfulness and Happiness—Healthy Habits of the Mind & Heart

In trying times, we all want to return to happiness. It’s a God-given right to pursue it, according to America’s founders. The biblical worldview recognizes the inherent brokenness of both creation and human beings, so it is no surprise that confusion, discord, and tragedy—along with evil spiritual powers—“steal, kill, and destroy”{19} our joy. What can be done?

Christian philosopher J.P. Moreland writes, “You have it in your power to begin a regimen of choices, assuming you would choose the right things, and form a habit of this that can *substantially improve your happiness and decrease or get rid of anxiety*. There really is hope.”{20} Our non-conscious mind turns thoughts over and over. Through spiritual disciplines, we bring these into our conscious awareness, which manipulates actual proteins, creating overhauled memories. Intentionally bringing God to mind—His attributes, the wonder of creation and His blessings, promises, answered prayers—such a focus

leads to a cycle of good thinking, feeling, and *knowing* that turns into believing real truth. Faith is a gift so we're not alone in doing this. But it is up to us to put to use the gifts described here to "work out [our] salvation with [reverence and proper humility]."[\[21\]](#)

Remember, we have a strong influence in reshaping our own brains—especially with God's help. Secular scientists are discovering the wonderful power of thankfulness. Scientific studies prove seven benefits according to *PsychologyToday.com*. Gratitude improves relationships, physical and mental health, sleep, self-esteem, and mental resilience. It even reduces aggression, the urge for revenge. Scripture aligns with physical reality again when it tells us: "Don't worry about anything; instead, pray about everything. Tell God what you need and thank him for all he has done. Then you will experience God's peace, which exceeds anything we can understand. His peace will guard your hearts and minds as you live in Christ Jesus."[\[22\]](#)

Moreland jokes, "If we're not careful, we may even come to think we were designed to flourish best when we are thankful and grateful! Yet as exciting as these psychological studies are, we didn't need them to know the importance and value of expressing gratitude and thanksgiving to God. The Bible insists on this . . . [it's] filled to overflowing with exhortations to be grateful to God and express thanksgiving to him."[\[23\]](#) As King David famously prayed in Psalm 23, "Surely goodness and mercy shall follow me all the days of my life"—he trusted a good God to lead, protect, and bless him. That's joy far beyond happiness!

Takeaways & Practical Applications

Brain networks form an inner life of the mind. We can switch between various networks constantly. Like a mom monitoring kids running around inside several contained rooms, this enables us to control the controllable—our reactions to events

and circumstances. Brain scans confirm how we capture and police rogue thoughts in ways prescribed in Scripture: “We . . . take every thought captive to obey Christ.”[\[24\]](#)

UCLA researchers address how our habitual non-conscious thoughts can drive anxiety–negative self-talk like:

- “I’ll be in real trouble if...”
- “What if so and so happens next week?”
- “I’ll probably fail that exam!”

“It’s what we say to ourselves in response to any particular situation that mainly determines our mood and feelings.”[\[25\]](#)

“Forming a new habit requires doing things you may not want to do in the early stages of formation,” as any coach or teacher will tell you.

For retraining our brains, experts have devised methods like **The Four Step Solution**:

It goes as follows:[\[26\]](#)

Step 1: Relabeling: call out thoughts as having no necessary connection with reality: tell yourself “That is a destructive lie.” Call on Proverbs 4:23, “Guard your heart above all else, for it is the source of life.”[\[27\]](#)

Step 2: Reframing: take the power out of the bad thoughts. Reset your perception of the deceptive message by being mindful that it exists, its content, and how you are now feeling by correctly categorizing the distorted message. Bad self-talk includes:

- all or nothing thinking (for example: “it was a *total* failure”)
- overgeneralizing

- singling out one thing to focus on
- catastrophizing (or making too big a deal out of things) and
- discounting the positive

Reframing them creates stable memories formed by repeated updating.

Step 3: Refocusing: Set your mind on anything else—distract yourself from the negative thoughts. Stop obsessing! Get into “the flow” of something. Focus elsewhere. And don’t ruminate about the message—analyzing it will deepen the grooves in your brain.

Step 4: Revaluing: After a while, reflect on how you did Steps 1-3. Recommit to repeat these steps throughout the day.

Over 21 days, a “newly formed neural network” will decay in less than a month: thoughts are like muscles that atrophy and die or get stronger with use.[{28}](#) Starve the bad, feed the good.

As Paul instructed the Philippian church, dwell on what is good and pure, true and worthy of praise.[{29}](#)

Contemplative Prayer

June 16, 2011

Dear Renea,

I work with a wide variety of Christians in a largely Evangelical area. Some of them are particularly skittish and nervous about the concept of contemplative prayer. Some claim it's nowhere to be found in Scripture.

What would you say to such a person?

Dear V,

This is a great question! I confess, because I've never been uncomfortable with contemplative prayer, I've never really considered the need to make a defense for it. Simply let your Bible fall open at random; the chances of it opening to a psalm about meditating on the Lord or his statues are pretty high.

I would also want to say that there are lots of elements in our contemporary worship habits which are not mentioned in Scripture, that Scripture does not have an explicit list of how we should do church or how we should manage our personal spiritual disciplines. The Bible provides us with broad principles, which gives us a lot of freedom (and a lot of responsibility to apply those principals with integrity).

I would also be tempted to say (though this is often a really tough sell, especially for those already skittish about such things) that as believers, we are in the business of redeeming culture. Every person is made in God's image and has God's law written on his or her heart. A cultural practice such as Eastern/New Age meditation, is certainly a misdirected spiritual behavior because it isn't directed toward the One True God. It isn't that there is no value in that practice; on the contrary, I believe Western Christianity has quite a lot to learn from Eastern spirituality, especially since our spiritual roots are Middle Eastern. So we have the power (and responsibility) to redirect what is misdirected, to re-orient reality toward the Kingdom of God.

People are often more hard-nosed about Eastern practices because it is so other to us Westerners (and the Southern Hemisphere has yet to have any influence anywhere near what the East has in our society). So, it's scary, unfamiliar. We're afraid of it, so we throw the proverbial baby out on the street and slam the window shut. To be fair however, our generation didn't have to deal with New Ageism when it first became a phenomenon. We haven't had to watch, helplessly, as many of our friends became swept up in its deception. So we want to remember to be gracious toward one another's fears and intolerance.

Keep asking good questions,
Renea
