

Comparing Religious Practices of Worldwide Muslims and American Christians

More Cultural Research from Steve Cable

In a prior [blog post](#), we looked at how Muslims in the Eastern Hemisphere reported their adherence to the five pillars of Islamic religious practice. We saw that the percentage who reported faithfully applying four of the five pillars was low, especially given the importance of these pillars in enhancing one's chance of entering paradise.

In this post, let us consider some basic practices that someone who is concerned about following the teaching of any religion should follow.

Once again, for Muslims we are using a 2012 Pew Research Center survey of Muslims involving more than 30,000 face-to-face interviews in 26 countries across North Africa, Asia, the Middle East and Eastern Europe. In looking at the data, we will consider age and geographic regions of North Africa, Middle East, Eastern Europe, the 'Stans (e.g. Kazakhstan, Uzbekistan), and South Asia.

For this comparison of faiths and regions, we selected the following questions used in the Pew survey:

- 1. How important is religion in your life? Very important*
- 2. On average, how often do you attend the mosque for Salah and Jum'ah Prayer? Once a month or more*
- 3. Outside of attending religious services, how often do you pray? Once a day or more*
- 4. How often do you read or listen to the Qur'an? At least once a week*
- 5. Do you give zakat, that is, give a set percentage of your*

wealth to charity or the mosque? Yes

6. How much does the way you live your life reflect the Hadith and Sunna, that is, the sayings and actions of the Prophet? A lot {1}

For someone serious about practicing their faith, this list should be critical to understanding and applying one's faith and also fairly easy to apply. The results from the survey are as follows:

Serious About Basic Religious Practice					
Age	North Africa	Middle East	Eastern Europe	The 'Stans	South Asia
18 – 29	9%	14%	3%	1%	19%
30 plus	15%	20%	6%	2%	27%

The most obvious result is that the percentages are very low. Across all the respondents, only 12% of them practice these six activities. So, the vast majority of Muslims are at best nominal practitioners of a religious life. We also see a significant difference between geographic regions. In Eastern Europe and the 'Stans, we see that virtually no one is committed to these six practices. Those surveyed in South Asia, i.e. Bangladesh, Indonesia, Malaysia, and Thailand, are most likely to be serious about these basic religious practices, where one in four report following all six of the practices above.

We also see a difference based on age in all geographic regions. Across all five geographic regions, those who are 30 years old and beyond report levels of religious practice from 40% to over 100% greater than for those 18 to 29 years old.

For a similar look at Christians in the United States, we are using the Portraits of American Life Study (PALS) from 2012. From that study, we utilize a similar set of questions to define a basic religious practice:

1. How important is religion or religious faith to you personally? Extremely important
2. How often do you attend worship services, not including weddings or funerals? At least twice a month
3. How often have you typically prayed, not including before meals and at religious services? At least once a day
4. How often have you typically read the Bible in the past 12 months? At least once a week
5. During the year 2011, what was the total dollar value of all donation made to your local congregation? Age 30+ value > \$999, Age 20 – 29 value > \$399
6. I try hard to live all my life according to my religious beliefs.

As you can see, these questions are very similar to those asked in the Pew survey of Muslims. The results from this survey are as follows:

Serious About Basic Religious Practice			
Age	Evangelical	All Christian	
20 – 29	7.3%	4.8%	
30 plus	16.7%	10.1%	

These results are very close to the results for Muslims—somewhat less than North Africa, the Middle East, and South Asia, and somewhat more than the ‘Stans. Similar to the results for the Muslims, emerging adults are significantly less likely than those over 30 to be serious about their religious practice. Nine out of ten Christians in America are not serious enough about their walk with God to practice the basics needed for an active Christian life.

It is safe to say that most American Christians and Muslims in the Eastern hemisphere are identified with a religion which they don’t really understand and don’t spend the time and effort necessary to gain understanding and live according to

its principles.

Note

1. The next possible answer was “a little” which seems way too weak to reflect a serious practice of Islam.

Basic Religious Practices of Worldwide Muslims

More Cultural Research from Steve Cable

Between October 2011 and November 2012, Pew Research Center conducted a major survey of Muslims involving more than 30,000 face-to-face interviews in 26 countries across North Africa, Asia, the Middle East and Eastern Europe. Since Probe has been evaluating similar surveys about the beliefs and practices of Christians and other faiths in America, we wanted to analyze

the data in this large survey to see how the beliefs and practices of Muslims in the eastern hemisphere relate to Christians in America. We also wanted to see how Muslim beliefs and practices varied across different regions. To do this, we divided the data into five geographic regions: North Africa, Middle East, Europe, the 'Stans (e.g. Kazakhstan, Uzbekistan), and South Asia.

To evaluate the religious practices of Muslims, a reasonable place to start would be the Five Pillars of Islam. “Muslims hope that by completing these duties of Islam, Allah will favor them and grant them entrance into heaven.”^{1} In other words, performing these duties are necessary but not sufficient to gain the reward of eternal life in heaven. These five pillars are:

1. Declaring “There is no god but Allah and Muhammad is His prophet.”
2. Praying five times each day in Arabic quoting from the Qur'an
3. Fasting during daylight hours of the month of Ramadan
4. Giving 2.5% of their income for the poor and for the cause of Islam
5. Completing the hajj, a ritual pilgrimage to Mecca

Because the hajj is a once in a lifetime event and according to the survey data is most likely to occur after the age of 60 (if at all), only the first four pillars are considered in our analysis. The results divided into age groups and regions of the world are as follows:

% Practicing Four of the Pillars of Islam					
Age	North Africa	Middle East	Eastern Europe	The 'Stans	South Asia

18 – 29	49%	41%	10%	11%	49%
30 plus	58%	57%	16%	17%	60%

As shown, the geographical groups vary significantly. The composite of all those surveyed is 40% of the respondents claim to practice these four pillars. While not miniscule, this does indicate that the vast majority of those who claim to be Muslim are not seriously attempting to gain favor with Allah by adhering to these four key pillars of the faith.

One startling thing we note from this table is that the Eastern European (e.g. Russia, Bosnia, Turkey) Muslims and those from the 'Stans do not practice the four pillars to the same degree as other areas surveyed. In those areas, less than 1 in 7 practice the four pillars, while in the other areas it is more than half of the people. In general, Eastern European Muslims and those in the 'Stans do not practice the four pillars, much less the five pillars, of Islam. Given this, one may argue that the Islam practiced in these parts of the world is not Islam at all, but rather another religion with a historical name, Islam, which may at some point in the past been the dominant religion.

The second fact that stands out in the table is the difference in practice versus age. From our earlier blog post on religious beliefs, the results showed very little difference between those ages 18 – 29 and the rest of the respondents, but this is not the case for religious practice. In Eastern Europe and the 'Stans those over the age of 30 are more than 50% more likely to practice the four pillars than are those aged 18 to 29. In the other areas of North Africa, the Middle East, and South Asia, the older adults are 18% to 37% more likely to practice the key pillars of Islam. In fact, if we compare those ages 18 to 29 with those 60 and older these ratios grow to more than 150% and 31% to 50% respectively.

It appears that the younger adults are not as committed to carrying out these practices as their elders. We can only

speculate on whether this difference will diminish as they get older. This difference may in fact shrink over time because, as noted earlier, there is virtually no difference in the percent of young adults and the percent of older adults who profess a Muslim worldview.

The results found for this aspect of religious practice are generally consistent with those reported for [religious beliefs](#) (i.e., a Muslim worldview). We find the majority of those who claim to be Muslim to NOT hold a Muslim worldview and do not practice the five pillars of Islam. In our next post, we will compare Muslim religious practice with Christian religious practice in the United States.

Basic Religious Beliefs of

Worldwide Muslims

More Cultural Research from Steve Cable

Between October 2011 and November 2012, Pew Research Center conducted a major survey of Muslims involving more than 30,000 face-to-face interviews in 26 countries in Africa, Asia, the Middle East and Europe. The survey asked people to describe their religious beliefs and practices, and sought to gauge respondents' knowledge of and attitudes toward other faiths, as well as some of their attitudes concerning cultural issues.

Since Probe has been commissioning and evaluating similar surveys about the beliefs and practices of Christians and other faiths in America, we wanted to analyze the data in this large survey to see how the beliefs of Muslims in the eastern hemisphere relate to Christians in America. We also wanted to see how Muslim beliefs varied across different regions. To do this, we divided the data into five geographic regions: North Africa, Middle East, Europe, the 'Stans (e.g. Kazakhstan, Uzbekistan), and South Asia.

If you have read [Cultural Captives](#) or been following [my blog posts](#), you know that one of the metrics we have been following is the percentage of Americans with a Christian worldview. One survey we analyzed recently is the Portraits of American Life Study (PALS) 2012. That survey shows that American Christians holding a biblical worldview were 33% of 18- to 29-year-old self-professed evangelicals, [{1}](#) and 46% of those over 30. When we consider all professing Christians (i.e. evangelical, mainline and Catholic), we find 20% of 18- to 29-year-olds and 32% of those over 30 hold a biblical worldview. For the PALS, the definition used for a biblical worldview is:

1. *I definitely believe in God*
2. *Jesus is the Son of God and physically rose from the dead*
3. *The Bible is fully inspired by God*

4. *Heaven exists where people live with God forever*
5. *There is a Hell where people experience pain as punishment for their sin*
6. *The Devil, demons, or evil spirits exist*
7. *What is morally right or wrong should be determined by God's law*

For Muslims, using questions asked in the Pew survey, we defined a Qur'anic worldview to include the following responses:

1. *I believe in one God, Allah, and his prophet Muhammad*
2. *I know a great deal about the Muslim religion and its practices*
3. *In Heaven, people who have led good lives are eternally rewarded*
4. *In Hell, people who have led bad lives and die without being sorry are eternally punished*
5. *I believe in angels and in jinns (spirit beings similar to demons)*
6. *I believe Islam is the one, true faith leading to eternal life in heaven*

The results of the survey showing those Muslims who agreed to all the above points are as shown in the table below.

	North Africa	Middle East	Europe	The 'Stans	South Asia
18 – 29	33.2%	24.1%	12.3%	4.0%	28.2%
30 plus	35.3%	30.4%	11.8%	4.8%	27.5%

What do we see in this data? First, the vast majority of Muslims living in the Eastern Hemisphere do not hold to a strong Qur'anic worldview. North Africa, the Middle East and South Asia all show about one third with a Qur'anic worldview. These numbers are much like those for a Christian worldview in the U.S. In Europe and the 'Stans, we see only about one in

ten and one in twenty, respectively, hold a strong Qur'anic worldview. One might speculate that the European downturn is due to the general decline in religious interest in Europe, and the low percentage in the 'Stans is due to a lack of teaching in their heart language.[{2}](#)

In understanding these low responses, one should consider that on the whole, only about 40% of Muslims claim to know a great deal about their religion and its practices. This lack of knowledge is probably a major factor in why only about 20% of them hold a strong Qur'anic worldview. This view is consistent with my personal experience in South Asia where I found that most of the people in a Muslim country were born into their faith culture and had never considered in any depth what it really meant.

One other interesting note is that in all areas other than the Middle East, the percentage of those aged 18 to 29 with a strong Qur'anic worldview is almost identical to those over 30 years of age. In contrast, among Christians in America, only one in five of those aged 18 to 29 have a biblical worldview while one in three of those age 30 and over have a biblical worldview.

It should also be noted that among Muslims, over three out of four of them believe that Islam is the one true faith leading to eternal life. But among American Christians, only one out of five believe Jesus is the only way to receive eternal life. Even though a minority of Muslims claim to know what their religion teaches, the vast majority believe that what it teaches is the only way to eternal life. Even though they believe it is the only way, only about one in five believe that members of their religion "have a duty to try and convert others to their religious faith."

I imagine that many Americans think that Muslims hold to a common set of beliefs throughout the world. As we have seen from this survey, that is not the case. The majority of

Muslims do not understand the basic tenets of Islam as taught in the Qur'an. Surprisingly, most of them admit it, saying that they do not know a great deal about the Muslim religion. Next week, we will look at their religious practices which tend to be more consistent than their religious beliefs.

Notes

1. Evangelicals include those associated with an evangelical denomination including historically Black Protestant churches.
2. Please note that this is only speculation on my part; there is no information in the Pew survey to enlighten us on this question.
