

# **“Gosnell”: The Doctor Who Snuffed Out Babies and His Silencing Accomplices**

“Were you guys at the ‘Gosnell’ showing?” asked the older gentleman at the urinal next to me. “Have you ever been in a theater where nobody speaks as they leave the movie?” Two very unusual events had just occurred: the reaction he mentioned and men talking at the toilet! A men’s room discussion ensued, focusing on the heaviness of the topic: abortion and baby killing.

Despite unseasonable cold and rain, my wife and I had sat with a few others in the local theater late on a weeknight. It was the last chance to see a film that’s been just as shut down as the discussion of its topic: killing of babies born alive by an abortionist so unprincipled that he was foresworn by fellow abortionists and pro-abortion advocates. The perpetrator: Dr. Kermit Gosnell. The film bears his name. It is also subtitled, maybe exaggeratedly, “The Trial of America’s Biggest Serial Killer.” But who cares if a few others killed more humans than he did over 30 years’ time? Gosnell is deservedly serving three life sentences for first degree murder for offing who knows how many newborns as a “service” to poor women.

As we exited the theater, I had nearly commented about the palpable silence, but realized the gravity of the moment and stopped myself. Perhaps it would take a while to process the newly resurrected horror. The alternate thought occurred to me that, even with a likely self-selecting audience of pro-lifers, silence is what got us to the cultural situation we are in regarding abortion. Would anyone even comment?

The “right to choose” has now been superseded by a debate about personhood of fetuses and babies. Christians often

remain silent. Many believe fetal sonogram pictures have dealt a blow to the euphemisms. Turns out, it's a picture that sealed Gosnell's doom.

The story tells itself, so the film simply needed to be believable. The superbly cast "Gosnell" pulls it off, with characters as diverse as inner-city young women employed by the mad doctor to a suburbanite prosecutor and mother of five to the queerly eccentric, self-justified Gosnell himself. (The lead actor is the actual Gosnell's doppelganger!) A well-played Emo blogger may have made the difference in prosecuting the deranged doctor, while the mainstream press was absent without leave. Cable TV-level cursing lends a less religious, more real-to-life tone, but it seemed a bit overdone.

"Gosnell's" biggest strength, unfortunately, is the unraveling of a chamber of horrors haunted by the abortionist's classical piano playing and taste for exotic flowers. It is surreal. This cat- and exotic turtle-loving, soft dictator's demise began as a drug case. In a classic storyline, the DEA (Drug Enforcement Agency) and FBI encroach on a local police investigation, forcing the investigation down the cul-de-sac of a mere drug bust. As a law unto himself, Gosnell had become a dealer. No one was prepared for the baby body bags and slime of Gosnell's "clinic." That is, the headlines and court case were stranger than fiction—and more disturbing than most. Frankly, the pre-Halloween release seems appropriate. Still, the obvious moral implications and the inevitable appeal to conscience provides a critical reality check for all time, something that cuts through the slogans and euphemisms surrounding abortion.

That tension between the practice no one talks about and the inherent law of right and wrong within human hearts at times splits the screen. The pro-abortion prosecutor subtly rethinks her position as she cuddles her new baby. The most telling scene is the courtroom practice session with the defense lawyer, brilliantly played by Nick Searcy. Here, Gosnell

unequivocally states that he has no respect for laws about training healthcare workers up to code. More chillingly, he declares that his diagnosis of fetal-and live-birth babies' viability is the definitive opinion. In other words, the doctor totally violated the classical "do no harm" doctrine of medicine as aided and abetted by authorities, wantonly violated laws designed to protect women, and played God with babies' lives even beyond the allowance of Roe-liberalized abortion laws. But truth has a way of emerging. And history repeats itself in a way.

How so? The up-to-the-minute story, which smells as fishy as Gosnell's clinic and the cover-up-by-negligence that kept him in grim business for a third of a century, is a tale of viewpoint discrimination. The little-known fight to stanch this movie's release and cancel showings parallels the way that authorities ignored—by decree—the egregious crimes of Gosnell. This week, headlines like ["'Gosnell' Filmmakers: Theaters Dropping Movie, Preventing People From Buying Tickets"](#) emerged on Christian news web sites—and nowhere else, apparently. "John Sullivan, the film's producer and marketing director, said, 'The fact that we've been dropped from theaters where the movie is the number 6 or number 9 movie is just something you don't see. 'It's hard not to believe it isn't about the content of the movie'." [{1}](#) Despite an excellent opening run, Facebook ticket-buyers report refunds from AMC outlets without explanation and in explicable screening cancellations.

It still seems as if there's a conspiracy to shut down knowledge of the facts. The spirit of the grand jury-convening judge who demanded the case not be about abortion lives on. Recently, NPR played the same card, avoiding the hot button term "abortion." [The Daily Beast reports](#) that "National Public Radio's own past reporting called Kermit Gosnell an 'abortion doctor.' But when the makers of a new film ["Gosnell"] wanted to pay to use the phrase on air, no dice." According to actual

events, which comprise most of the screenplay, health officials had direct orders from the governor's office not to follow up on complaints about the clinic.

Gosnell's "hellhole" of an abortion mill defied imagination. It was a nasty nest of cat filth and biohazards. Turns out, lots of that biological "waste" were the bodies of infants killed both in the womb past legal dates, whom the butcher-doctor "snipped" in the neck after they were delivered. "As liberal commentator Kirsten Powers wrote at USA Today back in 2013, 'Infant beheadings. Severed baby feet in jars. A child screaming after it was delivered alive during an abortion procedure. Haven't heard about these sickening accusations? It's not your fault.' Powers continued, 'Since the murder trial of Pennsylvania abortion doctor Kermit Gosnell began . . . there has been precious little coverage of the case that should be on every news show and front page.'" Years later, the crickets can still be heard. Gosnell's gruesome methods boggled the mind of jurors and moviegoers. Still, the trial was not allowed to "be a case about abortion." Nor the film. Yeah, right.

So, the docudrama about a "prolific serial killer" seems to be merely another extension of the strange silence induced by a biased system and a duped public. On a radio interview, the producer said he had to raise funds himself, as with other such independent conservative films. He has faced astonishing resistance at every turn in the four-year process of creating and releasing "Gosnell." Studios supposedly balk because of controversy, but conservatives know that there is more viewpoint discrimination than anything at work. One would almost think that there are tweaked consciences being defended.

In a monumental scene, the prosecutor shows the gruesome picture of a late-term born-alive baby boy who had been executed by Gosnell. Courtroom fact-finding, arguments, and persuasive appeals gave way to the impact of a picture, worth

many more than a thousand words. May the light of day shine on the awful picture of death-dealing in and out of the womb in the court of public opinion and individual hearts and minds. "Gosnell" provides a revealing and compelling picture that will hopefully live on despite the spotty and embattled theater releases.

## Arguments Against Abortion

*Kerby Anderson helps us understand that concerns about abortion are more than just a fundamentalist backlash. He reviews arguments from a Christian, biblical perspective and then introduces arguments from medical, legal and philosophical points of views as well. He concludes, "The Bible and logic are on the side of the Christian who wants to stand for the sanctity of human life."*

### Biblical Arguments Against Abortion

In this essay we will be discussing arguments against abortion. The first set of arguments we will consider are biblical arguments.

That being said, we must begin by acknowledging that the Bible doesn't say anything about abortion directly. Why the silence of the Bible on abortion? The answer is simple. Abortion was

so unthinkable to an Israelite woman that there was no need to even mention it in the criminal code. Why was abortion an unthinkable act? First, children were viewed as a gift or heritage from the Lord. Second, the Scriptures state—and the Jews concurred—that God opens and closes the womb and is sovereign over conception. Third, childlessness was seen as a curse.

One of the key verses to understand in developing a biblical view of the sanctity of human life is Psalm 139. This psalm is the inspired record of David's praise for God's sovereignty in his life. He begins by acknowledging that God is omniscient and knows what David is doing at any given point in time. He goes on to acknowledge that God is aware of David's thoughts before he expresses them. David adds that wherever he might go, he cannot escape from God, whether he travels to heaven or ventures into Sheol. God is in the remotest part of the sea and even in the darkness. Finally David contemplates the origin of his life and confesses that God was there forming him in the womb:

For you created my inmost being; you knit me together in my mother's womb. I praise you because I am fearfully and wonderfully made; your works are wonderful, I know that full well. My frame was not hidden from you when I was made in the secret place. When I was woven together in the depths of the earth, your eyes saw my unformed body. All the days ordained for me were written in your book before one of them came to be (vv. 13-16).

Here David speaks of God's relationship with him while he was growing and developing before birth. Notice that the Bible doesn't speak of fetal life as mere biochemistry. The description here is not of a piece of protoplasm that becomes David: this is David already being cared for by God while in the womb.

In verse 13, we see that God is the Master Craftsman

fashioning David into a living person. In verses 14 and 15, David reflects on the fact that he is a product of God's creative work within his mother's womb, and he praises God for how wonderfully God has woven him together.

David draws a parallel between his development in the womb and Adam's creation from the earth. Using figurative language in verse 15, he refers to his life before birth when "I was made in secret, and skillfully wrought in the depths of the earth." This poetic allusion harkens back to Genesis 2:7 which says that Adam was made from the dust of the earth.

David also notes that "Thine eyes have seen my unformed substance." This shows that God knew David even before he was known to others. The term translated *unformed substance* is a noun derivative of a verb meaning "to roll up." When David was just forming as a fetus, God's care and compassion already extended to him. The reference to "God's eyes" is an Old Testament term used to connote divine oversight of God in the life of an individual or group of people.

Next, we will consider additional Old Testament passages that provide a biblical argument against abortion.

## **Additional Old Testament Arguments Against Abortion**

Now that we've looked at Psalm 139, the most popular argument against abortion, let's look at two other Old Testament passages.

Another significant passage is Psalm 51. It was written by David after his sin of adultery with Bathsheba and records his repentance. David confesses that his sinful act demonstrated the original sin that was within him, "Surely I have been a sinner from birth, sinful from the time my mother conceived me" (Ps. 51:5). David concludes that from his time of conception, he had a sin nature. This would imply that he

carried the image of God from the moment of conception, including the marred image scarred from sin.

Human beings are created in the image and likeness of God (Gen. 1:26-27; 5:1; 9:6). Bearing the image of God is the essence of humanness. And though God's image in man was marred at the Fall, it was not erased (cf. 1 Cor. 11:7; James 3:9). Thus, the unborn baby is made in the image of God and therefore fully human in God's sight.

This verse also provides support for what is called the traducian view of the origin of the soul. According to this perspective, human beings were potentially in Adam (Rom. 5:12, Heb. 7:9-10) and thus participated in his original sin. The "soulish" part of humans is transferred through conception. Therefore, an unborn baby is morally accountable and thus fully human.

Another argument against abortion can be found in the Old Testament legal code, specifically Exodus 21:22-25.

If men who are fighting hit a pregnant woman and she gives birth prematurely but there is no serious injury, the offender must be fined whatever the woman's husband demands and the court allows. But if there is serious injury, you are to take life for life, eye for eye, tooth for tooth, hand for hand, foot for foot, burn for burn, wound for wound, bruise for bruise.

The verses appear to teach that if a woman gives birth prematurely, but the baby is not injured, then only a fine is appropriate. However, if the child dies then the law of retaliation (*lex talionis*) should be applied. In other words, killing an unborn baby would carry the same penalty as killing a born baby. A baby inside the womb has the same legal status as a baby outside the womb.

Some commentators have come to a different conclusion because they believe the first verses only refer to a case of

accidental miscarriage. Since only a fine is levied, they argue that an unborn baby is merely potential life and does not carry the same legal status as a baby that has been born.

There are at least two problems with this interpretation. First, the normal Hebrew word for *miscarry* is not used in this passage (cf. Gen. 31:38; Exod. 23:26; Job 2:10; Hos. 9:14). Most commentators now believe that the action described in verse 22 is a premature birth, not an accidental miscarriage. Second, even if the verses do describe a miscarriage, the passage cannot be used to justify abortion. The injury was accidental, not intentional (as abortion would be). Also, the action was a criminal offense and punishable by law.

## Medical Arguments Against Abortion

Thus far in our discussion we have looked at biblical arguments against abortion. But what if someone doesn't believe in the Bible? Are there other arguments we can use? Yes, there are: medical arguments, for example. Let's look, then, at some of the medical arguments against abortion.

The medical arguments against abortion are compelling. For example, *at conception the embryo is genetically distinct from the mother*. To say that the developing baby is no different from the mother's appendix is scientifically inaccurate. A developing embryo is genetically different from the mother. A developing embryo is also genetically different from the sperm and egg that created it. A human being has 46 chromosomes (sometimes 47 chromosomes). Sperm and egg have 23 chromosomes. A trained geneticist can distinguish between the DNA of an embryo and that of a sperm and egg. But that same geneticist could not distinguish between the DNA of a developing embryo and a full-grown human being.

Another set of medical arguments against abortion surround *the definition of life and death*. If one set of criteria have been used to define death, could they also be used to define life?

Death used to be defined by the cessation of heartbeat. A stopped heart was a clear sign of death. If the cessation of heartbeat could define death, could the onset of a heartbeat define life? The heart is formed by the 18th day in the womb. If heartbeat was used to define life, then nearly all abortions would be outlawed.

Physicians now use a more rigorous criterion for death: brain wave activity. A flat EEG (electroencephalograph) is one of the most important criteria used to determine death. If the cessation of brain wave activity can define death, could the onset of brain wave activity define life? Individual brain waves are detected in the fetus in about 40-43 days. Using brain wave activity to define life would outlaw at least a majority of abortions.

Opponents to abortion also raise the controversial issue of fetal pain. Does the fetus feel pain during abortion? The evidence seems fairly clear and consistent. Consider this statement made in a British medical journal: "Try sticking an infant with a pin and you know what happens. She opens her mouth to cry and also pulls away. Try sticking an 8-week-old human fetus in the palm of his hand. He opens his mouth and pulls his hand away. A more technical description would add that changes in heart rate and fetal movement also suggest that intrauterine manipulations are painful to the fetus."[\[1\]](#)

Obviously, other medical criteria could be used. For example, the developing fetus has a unique set of fingerprints as well as genetic patterns that make it unique. The development of sonography has provided us with a "window to the womb" showing us that a person is growing and developing in the mother's womb. We can discern eyes, ears, fingers, a nose, and a mouth. Our visual senses tell us this is a baby growing and maturing. This is not a piece of protoplasm; this is a baby inside the womb.

The point is simple. *Medical science leads to a pro-life*

*perspective rather than a pro-choice perspective.* If medical science can be used at all to draw a line, the clearest line is at the moment of conception. Medical arguments provide a strong case against abortion and for life.

## **Legal Arguments Against Abortion**

At this point in our discussion, we need to look at legal arguments against abortion.

The best legal argument against abortion can be seen in the case of *Roe v. Wade*. It violated standard legal reasoning. The Supreme Court decided not to decide when life begins and then turned around and overturned the laws of 50 different states.

Most of the Supreme Court's verdict rested upon two sentences. "We need not resolve the difficult question of when life begins. When those trained in the respective disciplines of medicine, philosophy, and theology are unable to arrive at any consensus, the judiciary, at this point in the development of man's knowledge, is not in a position to speculate as to an answer."

Although the sentences sounded both innocuous and unpretentious, they were neither. The Supreme Court's non-decision was not innocuous. It overturned state laws that protected the unborn and has resulted in over 30 million abortions (roughly the population of Canada) in the United States.

The decision also seems unpretentious by acknowledging that it did not know when life begins. But if the Court did not know, then it should have acted "as if" life was in the womb. A crucial role of government is to protect life. Government cannot remove a segment of the human population from its protection without adequate justification.

The burden of proof should lie with the life-taker, and the benefit of the doubt should be with the life-saver. Put

another way: "when in doubt, don't." A hunter who hears rustling in the bushes shouldn't fire until he knows what is in the bushes. Likewise, a Court which doesn't know when life begins, should not declare open season on the unborn.

The burden of proof in law is on the prosecution. The benefit of doubt is with the defense. This is also known as a presumption of innocence. The defendant is assumed to be innocent unless proven guilty. Again the burden of proof is on the entity that would take away life or liberty. The benefit of the doubt lies with the defense.

The Supreme Court clearly stated that it does not know when life begins and then violated the very spirit of this legal principle by acting as if it just proved that no life existed in the womb. Even more curious was the fact that to do so, it had to ignore the religious community and international community on the subject of the unborn.

Had the religious community really failed to reach a consensus? Although there were some intramural disagreements, certainly the weight of evidence indicated that a Western culture founded on Judeo-Christian values held abortion to be morally wrong. People with widely divergent theological perspectives (Jewish, Catholic, evangelical and fundamental Protestants) shared a common agreement about the humanity of the unborn.

The same could be said about the international legal community. Physicians around the world subscribed to the Hippocratic Oath ("I will not give a woman a pessary to produce abortion"). The unborn were protected by various international documents like the Declaration of Geneva and the U.N. Declaration of the Rights of the Child.

Just as there are solid medical arguments against abortion, so also there are legal arguments against abortion. *Roe vs. Wade* was a bad decision that needs to be overturned.

# Philosophical Arguments Against Abortion

Finally, we will conclude our discussion by looking at philosophical arguments against abortion.

A third set of arguments against abortion would be philosophical arguments. A key philosophical question is where do you draw the line? Put another way, when does a human being become a person?

The Supreme Court's decision of *Roe v. Wade* separated personhood from humanity. In other words, the judges argued that a developing fetus was a human (i.e., a member of the species *Homo sapiens*) but not a person. Since only persons are given 14th Amendment protection under the Constitution, the Court argued that abortion could be legal at certain times. This left to doctors, parents, or even other judges the responsibility of arbitrarily deciding when personhood should be awarded to human beings.

The Supreme Court's cleavage of personhood and humanity made the ethical slide down society's slippery slope inevitable. Once the Court allowed people to start drawing lines, some drew them in unexpected ways and effectively opened the door for infanticide and euthanasia.

The Court, in the tradition of previous line-drawers, opted for biological criteria in their definition of a "person" in *Roe v. Wade*. In the past, such criteria as implantation or quickening had been suggested. The Court chose the idea of viability and allowed for the possibility that states could outlaw abortions performed after a child was viable. But viability was an arbitrary criterion, and there was no biological reason why the line had to be drawn near the early stages of development. The line, for example, could be drawn much later.

Ethicist Paul Ramsey frequently warned that any argument for

abortion could logically be also used as an argument for infanticide. As if to illustrate this, Dr. Francis Crick, of DNA fame, demonstrated that he was less concerned about the ethics of such logical extensions and proposed a more radical definition of personhood. He suggested in the British journal *Nature* that if “a child were considered to be legally born when two days old, it could be examined to see whether it was an ‘acceptable member of human society.’” Obviously this is not only an argument for abortion; it’s an argument for infanticide.

Other line-drawers have suggested a cultural criterion for personhood. Ashley Montagu, for example, stated, “A newborn baby is not truly human until he or she is molded by cultural influences later.” Again, this is more than just an argument for abortion. It is also an argument for infanticide.

More recently some line-drawers have focused on a mental criterion for personhood. Dr. Joseph Fletcher argues in his book *Humanhood* that “Humans without some minimum of intelligence or mental capacity are not persons, no matter how many of these organs are active, no matter how spontaneous their living processes are.” This is not only an argument for abortion and infanticide; it’s adequate justification for euthanasia and the potential elimination of those who do not possess a certain IQ. In other writings, Joseph Fletcher suggested that an “individual” was not truly a “person” unless he has an IQ of at least 40.

In conclusion, we can see that there are many good arguments against abortion. Obviously there are a number of biblical arguments against abortion. But there are also medical, legal, and philosophical arguments against abortion. The Bible and logic are on the side of the Christian who wants to stand for the sanctity of human life.

# **“We Want an Easy Way Out of Our Pregnancy”**

Dear Sir/Madam,

With due high respect I've got a deep problem in my family, I hope you are able to help us. My wife and me have a unwanted embryo. She had a pregnancy test and unfortunately it was positive. Our embryo is 3 weeks old. In my country, Iran, “pregnancy abortion” is illegal and even if it is possible it will be very expensive. We are not ready for have a baby and both of us hate this. What should we do? We are looking for medicine and easy way for clear it. We are impatiently waiting for your efficient way to save us and improve our life with your guidance.

Dear \_\_\_\_\_,

I'm not sure how you found us, but we are against abortion because it is the murder of an innocent human being. I know it is distressing to find yourself pregnant before you are ready, but you and your wife do not have an unwanted embryo, you are growing a BABY who is in an early stage of development.

I don't know if it will make any difference to you, but I want you to know I regularly talk to women who had abortions, and it traumatized them. The guilt and shame they carry is a huge burden. They can't get away from the fact that they murdered their own babies. Please reconsider your position.

There is no easy way to "clear" an unwanted pregnancy because it is a serious matter to take the life of another human being. This baby could not have been conceived without God's permission and blessing; He means for you to have him or her, love him or her, and trust Him to help you care for this precious life.

I pray God will give you a peace that will enable you to trust Him to get you through this time without doing something you will regret for the rest of your lives and for which you will have to answer to Him.

With concern,

Sue Bohlin

## **"How Does the Bible Show Abortion is Murder?"**

In my "Introduction to Ethics" class, the topic for the night was abortion. As the discussion progressed, people all around me were saying that an abortion is good to do under any situation (rape, too young, the woman's choice) and I argued my point on that abortion is murder. I stated that the Bible had claimed to that statement also. The teacher then told me that I have to prove to him and the class that the Bible says

**abortion is murder. Can you help me with verses, or anything I could possibly use to make my point valid?**

Glad you asked!

The perspective that abortion is murder depends on two points: 1) The Bible condemns murder (taking the life of another human being), and 2) The unborn baby is a person—a human being.

### **Point #1: What is murder?**

Exodus 20:13, usually translated “Thou shalt not kill,” one of the Ten Commandments, actually means “Thou shalt not murder.” (There is a difference. Taking the life of another person in war, for example, is not the same thing as murder.)

### **Point #2: The humanity of the unborn**

1. Both Hebrew and Greek (the languages of the Bible) do not make a distinction between pre-born and born babies. Whether they live inside or outside the womb is not important as to their value or personhood.

*2. For You created my inmost being; You knit me together in my mother's womb. I praise You because I am fearfully and wonderfully made; Your works are wonderful, I know that full well. My frame was not hidden from You when I was made in the secret place. When I was woven together in the depths of the earth, Your eyes saw my unformed body. All the days ordained for me were written in Your book before one of them came to be. (Ps. 139:13-16)*

This portion of scripture is written about the unborn baby.

*3. The Lord called me from the womb; from the body of my mother He named me. (Is. 49:1)*

The prophet Isaiah says he received God's calling and naming while still in the womb.

*4. Surely I was sinful at birth, sinful from the time my mother conceived me. (Psalm 51:5)*

The psalmist states that he was a spiritual being from the point of conception. This isn't saying that he sinned while in the womb, but that he recognizes that from the earliest part of life, he was a sinner.

*5. Now the word of the Lord came to me saying, "Before I formed you in the womb I knew you, and before you were born I consecrated you; I have appointed you a prophet to the nations." (Jer. 1:4-5)*

Jeremiah declares that God knew him, consecrated him (set him apart), and appointed him a prophet before he was even conceived! From God's perspective, Jeremiah's humanity began even before conception.

*6. At that time Mary got ready and hurried to a town in the hill country of Judea, where she entered Zechariah's home and greeted Elizabeth. When Elizabeth heard Mary's greeting, the baby leaped in her womb, and Elizabeth was filled with the Holy Spirit. In a loud voice she exclaimed: "Blessed are you among women, and blessed is the child you will bear! But why am I so favored, that the mother of my Lord should come to me? As soon as the sound of your greeting reached my ears, the baby in my womb leaped for joy. (Luke 1:39-44)*

The unborn John the Baptist had a physical reaction to the presence of Mary and ESPECIALLY her unborn Child. At this point, Jesus was probably only a week- or two-old embryo. (Scripture tells us that as soon as the angel Gabriel spoke to Mary about God's plan for the Holy Spirit to overshadow her and conceive the Messiah in her and she consented, she hurried to see Elizabeth, who lived about 70 or so miles from Nazareth.)

I believe that these verses indicate that abortion is murder,

but all you can do is offer the light they provide. Some people who don't want to believe that abortion is murder or that an unborn baby is anything more than a "potential human being" can and will refuse to accept it. (Remember what the Word says in Jeremiah 17:9—"The heart is deceitful above all things, and desperately wicked: who can know it?") Your job is to pray for God to open the eyes of the hearts of the others in your class, humbly offer the truth, and leave the results to God.

Hope this helps!

## India's Missing Girls and the Right to Choose

*Rusty Wright and Meg Korpi reveal that female infanticide and feticide in India's patriarchal culture stir passions for equality and fairness but raise troubling questions. Does favoring a woman's right to choose logically imply that one supports her right to terminate a fetus simply because it is female?*

Last summer, a farmer in southern India discovered a tiny human hand poking from the ground. A two-day-old baby girl had been buried alive. The reason? Much of Indian culture favors males over females, sometimes brutally so. The girl's grandfather confessed to attempting murder because his family already had too many females; keeping this one would be too costly.

This wasn't an isolated incident on the subcontinent according to award-winning filmmaker Ashok Prasad. Prasad spoke recently at Stanford University at the U.S. premiere of his BBC documentary "India's Missing Girls." Anti-female bias affects Indians rich and poor. Males can perpetuate the family name, bring wealth, and care for elderly parents. A female's family typically must pay a huge dowry when she weds, often depleting family resources. A popular Hindi aphorism: "Having a girl is to plant a seed in someone else's garden."[\[1\]](#)

## Female Infanticide and Feticide

Against odds, this baby survived, but social and financial pressures bring alarming rates of female infanticide and feticide (termination of a fetus). UN figures estimate 750,000 Indian girls are aborted every year.[\[2\]](#) Demographic studies reveal dramatically growing gender disparity since the 1980's[\[3\]](#); in some regions only 80 baby girls survive for every 100 boys.[\[4\]](#) Many men cannot find wives.

Financial repercussions are typically cited as the reason for discarding daughters, but the decision is often an economic choice rather than necessity. Greater gender disparity occurs in wealthier states.[\[5\]](#) These families can better afford the sex determination tests and sex-selective abortions that, according to a report published by the UN Population Fund, are the main contributors to the decreasing proportion of female children.[\[6\]](#)

Adding to the offensiveness of sex-selective abortion: the fetus must be well-formed (15-18 weeks) before the sex can be detected using ultrasound-the common sex-determination technology. "India's Missing Girls" includes brief, grisly footage of terminated female fetuses being lifted from a well belonging to a clinic that performed sex-selective abortions. After the discovery, outraged women's groups protested in the streets; several such clinics were closed down.

The heartening side of the documentary is Sandhya Reddy, who runs a children's home, cares for abandoned kids, and tries to persuade mothers to keep their daughters or girl fetuses. This angel of mercy brings love, care and opportunity to society's young rejects.

"India's Missing Girl's" poignantly depicts where devaluing women can lead. The Stanford screening's sponsors included feminist and women's organizations, but feminists and nonfeminists, liberals and conservatives alike will be moved. An [abbreviated 29-minute version](#) on [YouTube](#) is worth watching, even if only the first 10-minute segment.[\[7\]](#)

## Troubling Questions

To Western sensibilities, killing babies and terminating fetuses solely because of gender is abhorrent. Yet no Hitler masterminds this mass extermination of females. It results from hundreds of thousands of personal decisions.

As the U.S. recognizes 35 years of *Roe v. Wade*, feticide's increasing contribution to India's missing girls raises a disturbing dilemma: Doesn't favoring a woman's right to free reproductive choice logically require supporting her right to terminate a fetus simply because it is female?

Important worldview questions emerge. Opposing female feticide seems to ascribe some sort of value to the female fetus. Is this value inherent because the fetus is female? If so, wouldn't equality require that we ascribe similar value to the male fetus because it is male?

Or is the fetus's value utilitarian, e.g., to ensure female influence in society or sufficient brides? Or is it merely economic-negative for Indian females, positive for males?

An enduring view of the fetus's value appears in Psalm 139. King David's worldview recognizes awe-inspiring biological intricacy fashioned by the Divine: You made all the delicate,

inner parts of my body and knit me together in my mother's womb. Thank you for making me so wonderfully complex!{8}

Inherently valuable? Socially useful? Economically consequential? Wonderfully complex? The troubling quandary still haunts: Can opposing female feticide be reconciled with supporting reproductive choice? The question demands a logically consistent answer from every thinking person.
