

No Reason to Fear: Examining the Logic of a Critic

Rick Wade uses the faulty arguments in Sam Harris' book Letter to a Christian Nation to show why Christians don't have to be afraid of the new atheists' assault on our faith.

Getting Started

Sometimes we Christians shy away from books which attack our beliefs because we're afraid we can't answer the objections. That's understandable. Often the authors of such books carry impressive credentials. It's easy to feel intimidated.

Another response which is the opposite of fearful avoidance is haughty dismissal. Sometimes we act as if our position is so obviously true that others can be dismissed as downright stupid and hardly worth bothering with. Even if the opponents' arguments *are* bad, that's no reason to adopt an arrogant attitude. It's especially bad when the dismissive Christian hasn't even bothered to read the book!

A better response, I think, is to use such occasions to grow in understanding and to exercise one's apologetic "muscles" by working at answering the challenges posed. So, for example, when a doctrine is challenged, by studying the subject, we grow in our knowledge of Christian beliefs and (here's the uncomfortable part) we are sometimes corrected in our understanding. Another advantage is preparation for real face-to-face encounters with critics. Responding to arguments in a book means there isn't the pressure of a person staring at you, waiting for an answer (and fully expecting one; critics do have such a high view of us!).

In this article I'm going to use Sam Harris's book *Letter to a*

Christian Nation to give some suggestions about what to look for in such books.^{1} I won't try to address every challenge. Others have given more extensive responses.^{2}

I titled this essay "No Reason to Fear" for a good reason. The challenges of critics throughout the ages have not been able to prove Christianity false, and those of modern day critics won't either. Most of their arguments have already been answered. When we brace ourselves and start reading a critic's book, we often find that the arguments don't pack that great a punch after all, much like the neighborhood bully who the other boys are afraid of but really have no reason to be.

Of course, we can't always answer seemingly good objections, and certainly can't answer them all to the atheist's satisfaction. I'll go further than that. I don't think we *have* to answer every objection. There will always be objections. But it's as intellectually wrong to drop one's convictions because of a few unanswered criticisms as it is to hold to such convictions for no reason at all. Atheists obviously don't abandon their beliefs so easily, and they shouldn't expect us to either.

Fallacious Arguments

If we're going to engage books like *Letter to a Christian Nation* responsibly, we have to be ready to hear some good criticisms of our beliefs or actions. We have to accept the fact that there are some hard things to deal with in our beliefs, especially the problem of evil. We need to admit our inability to give satisfying answers to all objections if we're going to expect that kind of openness from critics. Also, it is often Christians who come under attack rather than Christianity. Harris spends a lot of time here. Christians have done some bad things, and they need to be acknowledged.

More to the point for this article, Christians can sometimes

give bad arguments for what they believe. I'm not suggesting that we have to bow to all the demands of skeptics; there are several theories of the proper use of evidences and logical arguments and personal experience, and some formulations are unreasonable. It *is* to say, however, that we must use good reasoning when we make a case.

The problem with using poor reasoning is that it undermines one's case. That's what we find in Harris's book, and that will be our focus here. When we read a case for a particular belief, we should keep a lookout for such things as questionable assumptions, logical fallacies, and incorrect facts. Harris's book is plagued with fallacious arguments, a surprising turn since he presents his side as being that of reason. So I'm going to spend most of my time on those and mention the other things when appropriate.

Don't let the term "logical fallacies" put you off, like they're things only specialists can understand. It's just another name for poor reasoning. So, for example, if you make the claim that Christianity is the only true religion, and someone responds that you only believe that because you grew up in a Christian nation, you could cry "Foul!" You're making a universal claim; where you're from is irrelevant. If it's true, it's true in India and China and the US and everywhere else, too. This is a kind of fallacy of false cause. No one is a Christian because he lives in a Christian nation. We are Christians because we have believed Jesus' claims that are universal. It also reflects the current mood according to which religions are human constructs, and Christianity is just one such religion among many.

Although fallacious arguments can have *psychological* force (when we don't spot them and they seem correct), they have no *logical* force. Their conclusions should not be believed.

Are We Really So Evil?

Harris's favorite target in his attack on religion is its supposed immorality. He tells us that "Christians have abused, oppressed, enslaved, insulted, tormented, tortured, and killed people in the name of God for centuries, on the basis of a theologically defensible reading of the Bible."[\[3\]](#) Well, *that's* a surprise! Not that Christians have done bad things, but that such acts are *theologically defensible*! Such things are sanctioned by God because He, too, does such things. Harris accuses Christians of picking and choosing sections of Scripture that present a more loving God while ignoring the truly telling ones which reveal a God who condones slavery and the beating and killing of rebellious children.

But Harris is guilty of this picking and choosing himself. He commits the fallacy which is called the *neglect of relevant evidence*. To be fair, he does note that "it is undeniable that many people of faith make heroic sacrifices to relieve the suffering of other human beings."[\[4\]](#) But he doesn't bother listing them. He gives no space to the great work done by Christians in the fields of medicine, literacy, agriculture, famine relief, etc. He ignores the good work of organizations like Mercy Ships which takes life-changing medical help to people in third world nations in the name of Christ.

Well, he doesn't completely ignore missionary efforts. One of his favorite rants is against the evils perpetrated by missionaries. They waste time preaching about such things as the virgin birth when there is important work to be done. The most memorable accusation is when he charges missionaries who preach against the use of condoms with "genocidal" piety![\[5\]](#) "Genocidal!" Maybe a little exaggeration there? (And, by the way, while it's true that Christian medical missionaries do present the gospel to people—which they should, since one's eternal life is more important than one's temporal life—I've never heard of any who withhold medical help from people in

need until they first preach a sermon on the virgin birth.)

In another place Harris commits the fallacy called *causal oversimplification*. As he sees it, religion is the cause of conflicts in Palestine, the Balkans, Sudan, Nigeria, and other countries. Religion is so unnatural and wrong-headed to atheists, that it becomes an easy target for casting blame.

I'm going to give a bit more space to this charge since it's a very popular one these days.

In 2004, the BBC published what it called a "War Audit" which was conducted to determine how significant religion has been in war, at least in the last century.[\[6\]](#) In the article "God and War: An Audit and an Exploration," authors Greg Austin, Todd Kranock and Thom Oommen report that

at a philosophical level, the main religious traditions have little truck with war or violence. All advocate peace as the norm and see genuine spirituality as involving a disavowal of violence. It is mainly when organised religious institutions become involved with state institutions or when a political opposition is trying to take power that people begin advocating religious justifications for war.

They continue:

After reviewing historical analyses by a diverse array of specialists, we concluded that there have been few genuinely religious wars in the last 100 years. The Israel/Arab wars from 1948 to now, often painted in the media and other places as wars over religion, or wars arising from religious differences, have in fact been wars of nationalism, liberation of territory or self-defense.

Regarding Islamic terrorism, the authors write:

The Islamist fundamentalist terror war is largely about political order in the Arab countries, and the presence of

US forces in Saudi Arabia. It is not about religious conversion or a clash of religions. Nevertheless, bin Laden claims a religious duty in executing the war. . . .

It is mainly when organised religious institutions become involved with state institutions that people begin advocating religious justifications for war.

We need to go back to the wars of Arab expansion, the Crusades and the Reformation Wars for genuine wars over religion.

The authors—or as they call themselves, compilers—of this article include tables which give death tolls in different categories of wars. The writers say that the tables

show that the overwhelming majority of wars and the overwhelming majority of the victims of such wars cannot be classified primarily according to religious causes or religious beliefs. There have been horrific examples though where particular communities have been *targeted because of their religious faith* [italics mine], and these atrocities have been perpetrated by the three most 17 vicious and blood-thirsty regimes ever to hold power: Stalin's Russia, Mao's China and Hitler's Germany.

It's interesting that Harris tries so hard to make religion a source of violence when, as this report indicates, it is often the religious who are targeted by violence.[{7}](#)

A Few More

Sam Harris's book is titled *Letter to a Christian Nation*, not simply because he's against Christianity. He wants all religion to come to an end. It just happens that Christianity is the most prominent religion in America. Because he lumps all religions together, he can smear Christianity with the evils of Islam by implication.

This is a fallacy. It's called the fallacy of *over-generalization* (or *converse accident*). If evil is done in the name of Islam, and Islam is a religion, then every religion is prone to evil. Thus, what counts against Islam counts against Christianity, too. (If one is reluctant to group Christianity with other religions, then one might see here the fallacy of *faulty comparison*, or what is more commonly called "comparing apples to oranges.")

Another argument Harris presents employs a fallacy we've already discussed, the fallacy of *causal oversimplification*. Harris commits this fallacy when he tells us that "the anti-Semitism that built the Nazi death camps was a direct inheritance from medieval Christianity." {8}

The reality of Christian anti-Semitism through the ages cannot be denied. However, Harris's evaluation is simplistic. It is very easy to narrowly focus on the very real anti-Semitism of Christians and ignore other very significant factors. For example, Harris fails to tell us that the Jews were persecuted quite apart from Christianity and even before Christianity came into existence. For example, serious tensions between the Jews and the Greeks of Alexandria in the first century B.C. spilled over into the next century. Things got so bad that Jews were forced to live in one section of the city. Their houses were broken into and looted. Synagogues were burned, and women were dragged to the theater and forced to eat pork. Historian H. I. Bell reports that "men, women, and even children [were] beaten to death, dragged living through the streets, or flung on to improvised bonfires." {9} He also ignores the shift from religious persecution to racial persecution which occurred in the nineteenth century, notably in Russia.

Of course, this doesn't prove that Hitler *didn't* get his anti-Semitism from Christians; but it *does* mean that one should not immediately assume that Christian prejudice is at the root of anti-Semitism. There have been other causes as well. A

significant factor in Hitler's hatred of the Jews was the strong influence of *Darwinism* that led him to think that people who were racially or eugenically inferior needed to be eliminated from the evolving human race.[{10}](#)

Although some people already believed in the inferiority of some races, and although Darwinism wasn't Hitler's sole inspiration, Historian Richard Weikart writes, "Darwinism was a central, guiding principle of Nazi ideology, especially of Hitler's own world view." Weikart quotes Richard Evans, a historian at Cambridge University: "The real core of Nazi beliefs lay in the faith Hitler proclaimed in his speech of September 1938 in science—a Nazi view of science—as the basis for action. Science demanded the furtherance of the interests not of God but of the human race, and above all the German race and its future in a world ruled by ineluctable laws of Darwinian competition between races and between individuals." Weikart continues: "This is not a controversial claim by anti-evolutionists, but it is commonly recognized by scholars who study Nazism."[{11}](#)

A Fundamental Commitment to Atheism

One of the questionable assumptions in *Letter to a Christian Nation* is Sam Harris's assertion that "there is no question that human beings evolved from nonhuman ancestors."[{12}](#) Of course, there is indeed a question about this, a question raised by highly educated scientists easily as qualified as Mr. Harris.

It's no wonder, really, that Harris makes such bold statements. He is prevented from allowing the possibility of divine creation by his basic worldview commitments. He admits that he doesn't know why the universe exists, but he's confident there's no God behind it. That sounds like a philosophical presupposition. What evidence or reasons does he give for it? Harris might like to pretend that his beliefs are

based solely on the “trinity” of science, reason, and nature, but his naturalism cannot be established by these. Rather, it informs his use of them.

One of the (potentially!) maddening things about the arguments of atheists these days is their frequent silence with respect to any justification of their own basic worldview commitments. Harris goes so far as to claim that atheism isn't really a belief; that there shouldn't even *be* the word “atheism.”[\[13\]](#) Although “atheism” has long been understood to mean the belief that there is no God, many atheists today deny that. It isn't the belief that there is no God; it's simply an absence of belief in God.[\[14\]](#) It's a kind of “default” position, a “zero” belief, where everyone should be until given sufficient reasons to believe in God. Thus, the atheist has nothing to defend or prove.

But really, folks. Who's going to believe that atheists are belief-less about God, that they don't actually believe that there is no God? It's astonishing the effort they put forth in arguing against religious belief if indeed they have no belief at all.

However, we can go back and forth with atheists about whether they truly deny the existence of God, or we can let that stand and simply ask what they *do* believe about ultimate reality, for surely they believe *something*. It's simply false to assume that atheism is some kind of zero belief, that it involves no metaphysical commitments. If one denies God, one must have some other view about ultimate reality. Naturalism is a metaphysical position, and it has serious problems of its own.[\[15\]](#) If Christians are responsible to give good reasons for their belief in Christian theism, naturalistic atheists must give reasons for their naturalism.

Sam Harris speaks as a voice on high, shouting down to us poor, ignorant people who are stuck in our absurd religious beliefs. It's hard to imagine anyone with thoughtful

convictions changing his or her beliefs based on this book. He's preaching to the choir. Now that you have a few tips on what to look for, you might want to take a look at the book, and hear the rest of the "sermon."

Challenging the New Atheists

The new wave of bitterly anti-God, anti-Christian atheists offer arguments against God. Patrick Zukeran provides several good answers.

The New Atheist Agenda

Nearly thirty years ago John Lennon sang the song, "Imagine." The words went like this:

"Imagine there's no heaven
It's easy if you try
No hell below us
Above us only sky
Imagine all the people
Living for today
Imagine there's no countries
It isn't hard to do
Nothing to kill or die for
And no religion too

Imagine all the people
Living life in peace
Imagine there's no heaven. . .
You may say that I'm a dreamer
But I'm not the only one
I hope someday you'll join us

And the world will be as one

In other words, the source of much evil in the world is religion: belief in God, life after death, and a universal moral code. Would the world be a better place if faith in God was eliminated? Many atheists now think so. Richard Dawkins states, "Imagine with John Lennon, a world with no religion. Imagine, no suicide bombers, no 9/11, no 7/7, no Crusades, no witch-hunts, no Gunpowder Plot, no Indian partition, no Israeli/Palestinian wars, no Serb/Croat/Muslim massacres, no persecution of Jews as 'Christ killers', no Northern Ireland 'troubles', no honour killings', no shiny-suited bouffant-haired televangelists fleecing gullible people of their money ('God wants you to give till it hurts'). Imagine no Taliban to blow up ancient statues, no public beheadings of blasphemers, no flogging of female skin for the crime of showing one inch of it." [\[1\]](#) The goal of the new atheists is to rid the world of belief in God or religion and replace it with reason and science. The new atheists believe that religions that embrace a belief in God, particularly Christianity, are not just irrational but dangerous and therefore must be extinguished.

The new atheists are not presenting new arguments but instead they are promoting their ideas very aggressively with strong, confrontational, and condemning language. They have gained a following amongst the young academic crowd, and they have been quite influential in public education. Some of the notable names who have written popular work include Richard Dawkins, Sam Harris, Dan Barker, and Christopher Hitchens.

In this work we will cover four popular arguments presented by the new atheists. The first is that belief in God is irrational. The second argument is that Christianity in particular is dangerous. Third, science has clearly proven God does not exist. Fourth, religion is the result of a natural man-made evolutionary process motivated by man's need for a divine father figure and the need to find meaning in the universe.

In this series, we will examine these arguments and see whether belief in God is irrational or if there are good reasons for belief in a creator.

Belief in God is Irrational

The new atheists allege that faith in God is the result of irrational thinking and that a rational person would not believe in God. Sam Harris writes, "We have names for people who have many beliefs for which there is no rational justification. When their beliefs are extremely common we call them 'religious'; otherwise they are likely to be called 'mad,' psychotic,' or 'delusional.'" [\[2\]](#)

Richard Dawkins, in his book *The God Delusion*, says that belief in God is the result of delusional thinking. He asserts that belief in God is a delusion built on empty assertions and not evidence. He states, "Faith is blind trust, in the absence of evidence, even in the teeth of evidence." [\[3\]](#) His conclusion is that there is no evidence to support the existence of God; in fact, all the evidence goes against God.

The assertion that belief in God is irrational is not a new argument but a very old one. It is true that many who believe in God are not able to present reasons why they believe. However, Christianity is not founded on "blind faith" but faith built upon evidence, and there are good reasons that make belief in God a reasonable conclusion. One significant individual who has come to believe in the existence of God is Antony Flew. Flew was this generation's greatest atheist philosopher. However, Flew, through philosophical reasoning, came to believe in God.

Flew states that he wrestled with three key, major scientific questions. First, how did the laws of nature come to be? Second, how did life come from non-life? Third, how did the universe come into existence? [\[4\]](#) The naturalists' answers,

which are heavily dependent on Darwin's theory, were unsatisfactory. Flew discovered that the classical theistic arguments provided the best answers in light of the evidence. The [cosmological argument](#), or argument from first cause, and the [teleological argument](#), or argument from design, provided a much more reasonable answer.[\[5\]](#)

For centuries, Christian apologists have presented these and several [other reasoned arguments](#) for the existence of God and many have come to a belief in God as Flew did. Antony Flew's conversion from atheism to theism deals a devastating blow to the arguments of the new atheists. Not only was he a titan among atheist philosophers, but he is another example that demonstrates belief in God is not irrational. Reasoning individuals who are willing to study the evidence and follow it wherever it leads may find a strong case for a creator.

Is Science at War with God?

The new atheists allege that science and faith are at war. Therefore real scientists must be atheists, for science clearly proves God does not exist.

How do these atheists explain the display of design in the universe? Leading atheist spokesman Richard Dawkins believes Darwin's theory answers the design argument. However, recent discoveries reveal the shortcomings of Darwin's theory. Darwin's theory fails to explain the cause of the universe. It also fails to present evidence that that life came from non-life. There is also the lack of transitional forms in the fossil record, and there is no mechanism for macro-evolutionary change. Mutations and natural selection have failed to conclusively show they can produce macro-evolutionary change. In short, the new atheists have a lot of faith that Darwin's theory will answer these challenges.

Science and the Christian faith are not enemies. In fact, the

more scientists study nature and the universe, they continue to discover complexity and design which make it highly improbable such complex systems could have come about by chance or natural forces. For this reason, the number of scientists who are acknowledging an intelligent creator continues to grow. This is a fact the new atheists neglect to acknowledge.

Francis Collins, the leader of the Human Genome project and author of *The Language of God*, tells how the order and precision in the DNA code led him from atheism to belief in God. Collins writes, "Many will be puzzled by these sentiments, assuming that a rigorous scientist could not also be a believer in a transcendent God. This book aims at dispelling that notion, by arguing that belief in God can be an entirely rational choice, and that the principles of faith are in fact complimentary with the principles of science."[\[6\]](#)

Physicist Stephen Hawking states that his study of the universe reveals that "The overwhelming impression is one of order. The more we discover about the universe, the more we find that it is governed by rational laws. . . . You still have to ask the question why does the universe bother to exist? If you like, you can define God to be the answer to the question."[\[7\]](#)

Francis Collins and Stephen Hawking are just two examples of numerous award-winning scientists who acknowledge the scientific evidence points to a creator. The more we learn in the various fields of science such as biology, microbiology, astronomy, physics, etc., the evidence continues to point to design. The complexity of life and the order displayed in the universe make it more reasonable to conclude a God created it, and the greater leap of faith would be to conclude it all occurred by chance and natural forces.

Belief in God Is Dangerous

The new atheist movement asserts that religion is dangerous, for it is the source of much of the conflict in the world today. Many assert that religions, especially Christianity, teach intolerance and discrimination. To build their case, however, the new atheists unfortunately attack misrepresentations of religions, especially Christianity.

For example, in *The God Delusion*, Richard Dawkins states, “The God of the Old Testament is arguably the most unpleasant character in all fiction: jealous and proud of it; a petty, unjust, unforgiving control-freak; a vindictive, bloodthirsty ethnic cleanser, a misogynistic, homophobic, racist, infanticidal, genocidal, filicidal, pestilential, megalomaniacal, sadomasochistic, capriciously malevolent bully.”[\[8\]](#) What Dawkins displays is his superficial understanding of the Bible. Certainly no Christian believes in a God as described by Dawkins.

Another error is the misuse of labels. New atheists apply the term “fundamentalist” to Evangelical Christians as well as fundamentalist Muslims, creating the illusion the two are equivalent in their teachings. When Dawkins points to the example of the Islamic riots against the Danish cartoons, he equates this incident not with Islam but with religion, all religions.[\[9\]](#) However a careful study reveals that there is a huge difference between Jesus’ teachings and Muhammad’s teachings. This huge difference is also revealed in the lives they lived.[\[10\]](#) A careful reading of the New Testament quickly reveals that violence goes against the nature of Christ’s teachings who taught His disciples to love their enemies and pray for those who persecute them (Mt. 5:38-48). Application of the true teachings of Christ would lead to a peaceful society.

New atheists allege that religions promote division by the creation of in-groups and out-groups. Indeed, there are

religions that discriminate, including some Christian groups, but in Christianity that is a perversion of the teachings of Christ. Jesus' sacrifice and gift of salvation is offered to all (Jn. 3:16). Throughout His life Jesus reached out to those despised by the culture, and His disciples die—many in foreign fields—preaching salvation to all. Even in the Old Testament, the mission of Israel was to be a blessing to all the world (Gen. 12). Application of true biblical teachings would lead to non-discrimination.

A significant point that the new atheists do not mention is the destructive consequences of atheist philosophies. Nietzsche predicted that the death of God would lead to a moral relativism which would result in blood in the streets.[\[11\]](#) Communism has led to the death of millions in the twentieth century. Millions were put to death under the regimes of Marx, Pol Pot, and Mao Tse Tung. Some religions are responsible for conflict, including Christians who have misused biblical teachings. However, atheism has shown to be dangerous as well.

Religion Is the Result of an Evolutionary Process

New atheists assert that religion was created out of a need for a father figure, or for comfort in a cruel world, or out of fear of the unknown. They rely on the work of James Frazer and his book *The Golden Bough*, written in the nineteenth century. Frazer taught that religion developed through a natural evolutionary process which began first with animism, a belief in spirits in nature. The worship of nature spirits eventually led to polytheism. Eventually, amongst all the gods, one was viewed as the most dominant. Eventually this dominant god alone was worshipped and monotheism developed. This was known as the evolutionary theory of religion. New atheists believe eventually man's need for God will end and

atheism will be the end of this evolutionary development. Unfortunately, the new atheists once again are not presenting a new theory but reiterating an old theory which has been shown to be flawed.

One of the flaws of this theory is that it was influenced by Darwin's theory of evolution and lacked serious empirical evidence and study.^{12} One of the most significant and well-researched works was produced by anthropologist Dr. Wilhelm Schmidt in his four-thousand-page treatise, *The Origin and Growth of Religion*. His research of hundreds of cultures revealed that monotheism is the oldest of religions. The development of religion was discovered to have gone in the opposite direction of the evolutionary theory. All cultures began with a belief in a heavenly father, and this monotheistic faith eventually degenerates to polytheism and then animism. This theory is called "original monotheism."^{13} The evidence displayed by Schmidt, and later by anthropologist Don Richardson, is consistent with the progression of religion as revealed in Romans 1. Serious research and evidence appears to favor the biblical model.

The new atheists present few new arguments. What are new are not the arguments but the method and strategy of this group. How should we meet the challenge of the new atheists? 1 Peter 3:15 challenges us to "always be prepared to give an answer to everyone who asks you to give a reason for the hope you have. But do this with gentleness and respect." We are called to love those who question or even attack the Christian faith. Christians must answer their challenges with humility and grace. As we present a well-reasoned case and the evidence, the Holy Spirit will use our apologetic defense and our unshaken but loving attitude to speak to their mind and heart.

Psalm 14:21 states, "The fool says in his heart there is no God." Might it be the new atheists who are irrational?

Answering the New Atheists – A Christian Addresses Their Arguments

Kerby Anderson counters the claim by popular new atheists that Christianity (along with other religions) is blind, irrational and without any evidence. Kerby demonstrates that contrary to the atheists' claims God is not an invention of mankind, that faith is not dangerous, and that science and Christianity support one another. From a Christian point of view, the new atheists are bringing out tired old arguments that don't stand up to rational scrutiny.

Is Faith Irrational?

Many of the best selling books over the last few years have been written by the New Atheists. I'd like to consider some of the criticisms brought by these individuals and provide brief answers. You may never meet one of these authors, but you are quite likely to encounter these arguments as you talk with people who are skeptical about Christianity.

✖ For our discussion, we will be using the general outline of the book *Is God Just a Human Invention?* written by Sean McDowell and Jonathan Morrow.[\[1\]](#) I would encourage you to read the book for a fuller discussion not only of the topics considered here but of many others as well.

You cannot read a book by the New Atheists without encountering their claim that religion is blind, irrational, and without any evidence. Richard Dawkins makes his feelings known by the title of one of his books: *The God Delusion*.

Why does he say that? He says religions are not evidentially based: "In all areas except religion, we believe what we believe as a result of evidence."[\[2\]](#) In other words, religious faith is a blind faith not based upon evidence like other academic disciplines. So he concludes that religion is a "nonsensical enterprise" that "poisons everything."[\[3\]](#)

Each of the New Atheists makes a similar statement. Dawkins states that faith is a delusion, a "persistent false belief held in the face of strong contradictory evidence."[\[4\]](#) Daniel Dennett claims Christians are addicted to blind faith.[\[5\]](#) And Sam Harris argues that "Faith is generally nothing more than the permission religious people give one another to believe things without evidence."[\[6\]](#)

Is this true? Do religious people have a blind faith? Certainly some religious people exercise blind faith. But is this true of all religions, including Christianity? Of course not. The enormous number of Christian books on topics ranging from apologetics to theology demonstrate that the Christian faith is based upon evidence.

But we might turn the question around on the New Atheists. You say that religious faith is not based upon evidence. What is your evidence for that broad, sweeping statement? Where is the evidence for your belief that faith is blind?

Orthodox Christianity has always emphasized that faith and reason go together. Biblical faith is based upon historical evidence. It is not belief in spite of the evidence, but it is belief because of the evidence.

The Bible, for example, says that Jesus appeared to the disciples and provided "many convincing proofs, appearing to them over a period of forty days and speaking of the things concerning the kingdom of God" (Acts 1:3).

Peter appealed to evidence and to eyewitnesses when he preached about Jesus as "a man attested to you by God with

mighty works and wonders and signs that God did through him in your midst, as you yourselves know" (Acts 2:22).

The Christian faith is not a blind faith. It is a faith based upon evidence. In fact, some authors contend that it takes more faith to be an atheist than to believe in God.[\[7\]](#)

Is God a Human Invention?

Human beings are religious. We are not only talking about people in the past who believe in God. Billions of people today believe in God. Why? The New Atheists have a few explanations for why people believe in God even though they say God does not exist.

One explanation that goes all the way back to Sigmund Freud is projection. He wrote that religious beliefs are "illusions, fulfillments of the oldest, strongest, and most urgent wishes of mankind."[\[8\]](#) In other words, we project the existence of God based on a human need. It is wish fulfillment. We wish there would be a God, so we assume that he exists.

As Sean McDowell and Jonathan Morrow point out in their book, there are five good reasons to reject this idea. One objection is that Freud's argument begs the question. In other words, it assumes that there is no God and then merely tries to find an explanation for why someone would believe in God anyway.

The projection theory can also cut both ways. If you argue that humans created God out of a need for security, then you could also just as easily argue that atheists believe there is no God because they want to be free and unencumbered by a Creator who might make moral demands on them.

Perhaps the reasons humans have a desire for the divine is because that is the only thing that will satisfy their spiritual hunger. C.S. Lewis argued that "Creatures are not born with desires unless satisfaction for those desires

exists. A baby feels hunger: well, there is such a thing as food. A duckling wants to swim: well, there is such a thing as water. Men feel sexual desires: well, there is such a thing as sex. If I find in myself a desire, which no experience in this world can satisfy, the most probable explanation is that I was made for another world. Probably earthly pleasures were never made to satisfy it, but only arouse it, to suggest the real thing.”{9}

Some atheists suggest that perhaps we are genetically wired to believe in God. One example would be the book by Dean Hamer entitled *The God Gene: How Faith is Hardwired into Our Genes*. It is worth noting that even the author thought the title was overstated and at least admitted that there “probably is no single gene.”{10} Since the publication of the book, its conclusions have been shown to be exaggerated. Francis Collins served as the director of the Human Genome Project and has plainly stated that there is no gene for spirituality.

Richard Dawkins believes that religious ideas might have survived natural selection as “units of cultural inheritance.”{11} He calls these genetic replicators *memes*. Although he has coined the term, he is also quick to acknowledge that we don’t know what memes are or where they might reside.

One critic said that “Memetics is no more than a cumbersome terminology for saying what everybody knows and that can be more usefully said in the dull terminology of information transfer.”{12} Alister McGrath perceives a flaw: “Since the meme is not warranted scientifically, we are to conclude that there is a meme for belief in memes? The meme concept then dies the slow death of self-referentiality, in that, if taken seriously, the idea explains itself as much as anything else.”{13}

There is another explanation that we can find in the Bible. Why do most people believe in a God? The writer of

Ecclesiastes (3:11) observes that it is God who has “set eternity in the hearts of men.”

Is Religion Dangerous?

The New Atheists contend that religion is not just false; it's also dangerous. Sam Harris believes it should be treated like slavery and eradicated.[{14}](#) Christopher Hitchens wants to rally his fellow atheists against religion: “It has become necessary to know the enemy, and to prepare to fight it.”[{15}](#) Richard Dawkins is even more specific: “I am attacking God, all gods, anything and everything supernatural, wherever and whenever they have been invented.”[{16}](#)

Much of the criticism against religion revolves around violence. We do live in a violent world, and religion has often been the reason (or at least the justification) for violent acts. But the New Atheists are kidding themselves if they think that a world without religion would usher in a utopia where there is no longer violence, oppression, or injustice.

Sean McDowell and Jonathan Morrow point out in their book on the New Atheists that details matter when you are examining religion. Injustices by the Taliban in Afghanistan ought not to be used as part of the cumulative cases against religion in general or Christianity in particular. The fact that there are Muslim terrorists in the world today does not mean that all Muslims are dangerous. And it certainly doesn't mean that Christianity is dangerous.

Alister McGrath reminds us that “all ideals—divine, transcendent, human or invented—are capable of being abused. That's just the way human nature is. And that happens to religion as well. Belief in God can be abused, and we need to be very clear, in the first place, that abuse happens, and in the second, that we need to confront and oppose this. But

abuse of an ideal does not negate its validity.”{17}

Religion is not the problem. People are the problem because they are sinful and live in a fallen world. Keith Ward puts this in perspective:

No one would deny that there have been religious wars in human history. Catholics have fought Protestants, Sunni Muslims have fought Shi'a Muslims, and Hindus have fought Muslims. However, no one who has studied history could deny that most wars in human history have not been religious. And in the case of those that have been religious, the religious component has usually been associated with some non-religious, social, ethnic, or political component that has exerted a powerful influence on the conflicts.{18}

The New Atheists, however, still want to contend that religion is dangerous while refusing to accept that atheism has been a major reason for death and destruction. If you were to merely look at body count, the three atheistic regimes of the twentieth century (Hitler in Nazi Germany, Stalin in Russia, and Mao in China) are responsible for more than 100 million deaths.

Dinesh D'Souza explains that “Religion-inspired killing simply cannot compete with the murders perpetrated by atheist regimes.” Even when you take into account the differences in the world's population, he concludes that “death caused by Christian rulers over a five-hundred-year period amounts to only 1 percent of the deaths caused by Stalin, Hitler, and Mao in the space of a few decades.”{19}

Religion is not the problem; people are the problem. And removing religion and God from a society doesn't make it less dangerous. The greatest death toll in history took place in the last century in atheistic societies.

Is the Universe Just Right for Life?

The New Atheists argue that even though the universe looks like it was designed, the laws of science can explain everything in the universe without God. Richard Dawkins, for example, says that “A universe with a creative superintendent would be a very different kind of universe from one without.”[{20}](#)

Scientists have been struck by how the laws that govern the universe are delicately balanced. One scientist used the analogy of a room full of dials (each representing a different physical constant). All of the dials are set perfectly. Move any dial to the left or to the right and you no longer have the universe. Some scientists have even called the universe a “Goldilocks universe” because all of the physical constants are “just right.”

British astronomer Fred Hoyle remarked, “A commonsense interpretation of the facts suggests that a super intellect has monkeyed with physics, as well as chemistry and biology, and that there are no blind forces worth speaking about in nature.”[{21}](#)

McDowell and Morrow provide a number of examples of the fine tuning of the universe. First is the expansion rate of the universe. “If the balance between gravity and the expansion rate were altered by one part in one million, billion, billion, billion, billion, billion, there would be no galaxies, stars, planets, or life.”[{22}](#) Second is the fine tuning of ratio of the electromagnetic force to the gravitational force. That must be balanced to one part in 10 to the 40th power. That is 1 with 40 zeroes following it.

Scientists also realize that planet Earth has extremely rare conditions that allow it to support life at a time when most of the universe is uninhabitable. Consider just these six conditions: (1) Life must be in the right type of galaxy, (2)

life must be in the right location in the galaxy, (3) life must have the right type of star, (4) life must have the right relationship to the host star, (5) life needs surrounding planets for protection, and (6) life requires the right type of moon.[{23}](#)

Scientists (including the New Atheists) are aware of the many fine tuned aspects of the universe. They respond by pointing out that since we could only exist in a fine-tuned universe, we shouldn't be surprised that it is fine tuned. But merely claiming that we could not observe ourselves except in such a universe doesn't really answer the question why we are in one in the first place.

Richard Dawkins admits that there is presently no naturalistic explanation for the fine-tuning of the universe.[{24}](#) But he is quick to add that doesn't argue for the existence of God. And that is certainly true. We know about God and His character from revelation, not from scientific observation and experimentation. But we do see the evidence that the design of the universe implies a Designer.

Are Science and Christianity in Conflict?

The New Atheists believe that science and Christianity are in conflict with one another. They trust science and the scientific method, and therefore reject religion in general and Christianity in particular.

Sam Harris says, "The conflict between religion and science is unavoidable. The success of science often comes at the expense of religious dogma; the maintenance of religious dogma always comes at the expense of science."[{25}](#)

Richard Dawkins believes religion is anti-intellectual. He says: "I am hostile to fundamentalist religion because it actively debauches the scientific enterprise It subverts science and saps the intellect."[{26}](#)

Are science and Christianity at odds with one another? Certainly there have been times in the past when that has been the case. But to only focus on those conflicts is to miss the larger point that modern science grew out of a Christian world view. In a [previous radio program](#) based upon the book *Origin Science* by Dr. Norman Geisler and me, I explain Christianity's contribution to the rise of modern science.{27}

Sean McDowell and Jonathan Morrow also point out in their book that most scientific pioneers were theists. This includes such notable as Nicolas Copernicus, Robert Boyle, Isaac Newton, Blaise Pascal, Johannes Kepler, Louis Pasteur, Francis Bacon, and Max Planck. Many of these men actually pursued science because of their belief in the Christian God.

Alister McGrath challenges this idea that science and religion are in conflict with one another. He says, "Once upon a time, back in the second half of the nineteenth century, it was certainly possible to believe that science and religion were permanently at war. . . . This is now seen as a hopelessly outmoded historical stereotype that scholarship has totally discredited." {28}

The New Atheists believe they have an answer to this argument. Christopher Hitchens discounts the religious convictions of their scientific pioneers. He argues that belief in God was the only option for a scientist at the time.{29} But if religious believers get no credit for the positive contributions to science (e.g., developing modern science) because "everyone was religious," then why should their negative actions (e.g., atrocities done in the name of religion) discredit them? It is a double standard. The argument actually ignores how a biblical worldview shaped the scientific enterprise.{30}

The arguments of the New Atheists may sound convincing, but once you strip away the hyperbole and false charges, there isn't much left.

If you would like to know how to answer the arguments of the New Atheists, I suggest you visit the Probe Web page at www.probe.org and also consider getting a copy of the book by Sean McDowell and Jonathan Morrow. You will be able to answer the objections of atheists and be better equipped to defend your faith.

The New Atheists – Kerby Anderson Blog

Kerby Anderson writes that unlike the old-style atheists who were content to merely argue that Christianity is not true, the new atheists now argue that Christianity is dangerous.

January 18, 2007

For centuries there has been conflict and debate between atheists and Christianity. But the rise of what journalists are calling “The New Atheists” represents a significant change in the nature of the debate. “The New Atheists” is part reality and part journalistic catch phrase. It identifies the new players in the ongoing battle between science and religion.

Unlike the atheists who came before them who were content to merely argue that Christianity is not true, these new atheists now argue that Christianity is dangerous. It is one thing to argue about the *error* of Christianity, it is quite another to argue about the *evil* of Christianity.

Many of these authors have books in the *New York Times* bestseller list. *Letter to a Christian Nation* by Sam Harris is one of those books in the top ten. He goes beyond the traditional argument that suffering in the world proves there is no God. He argues that belief in God actually *causes* suffering in the world. He says, “That so much of this suffering can be directly attributed to religion—to religious hatreds, religious wars, religious delusions and religious diversions of scarce resources—is what makes atheism a moral and intellectual necessity.” He argues that unless we renounce religious faith, religious violence will soon bring civilization to an end.

Response to his book has been glowing. One reader found the

book to be “a wonderful source of ammunition for those who, like me, hold to no religious doctrine.” Others enjoyed the pounding he gives Christianity. For them it “was like sitting ring side, cheering the champion, yelling ‘Yes!’ at every jab.”

But Christians are not the only target of his criticism. Harris also argues that religious moderates and even theological liberals function as “enablers” of orthodox Christianity. His book is not only a criticism of Christians, but it is a call for tolerant people in the middle to get off the fence and join these new atheists.

Another popular book is *The God Delusion* by Oxford professor Richard Dawkins. He says that religious belief is psychotic and arguments for the existence of God are nonsense. He wants to make respect for belief in God socially unacceptable.

He calls for atheists to identify themselves as such and join together to fight against the delusions of religious faith. He says, “The number of nonreligious people in the US is something nearer to 30 million than 20 million. That’s more than all the Jews in the world put together. I think we are in the same position the gay movement was in a few decades ago. There was a need for people to come out.”

Like Harris, Dawkins does not merely disagree with religious faith, but he disagrees with tolerating religious faith. He argues that religious people should not be allowed to teach these religious “myths” to their children, which Dawkins calls the “colonization of the brains of innocent tykes.”

Dawkins hammers home the link between evolution and atheism. He believes that evolutionary theory must logically lead to atheism. And he states that he is not going to worry about the public relations consequences of tying evolution to atheism.

Daniel Dennett is another important figure and author of the book, *Breaking the Spell: Religion as a Natural Phenomenon*. He

does not use the harsh and critical rhetoric of the others, but still is able to argue his case that religion must be subjected to scientific evaluation. He believes that “neutral, scientifically informed education about every religion in the world should be mandatory in school” since “if you have to hoodwink—or blindfold—your children to ensure that they confirm their faith when they are adults, your faith *ought* to go extinct.”

In addition to the books by “The New Atheists” have been a number of others that have targeted Christian conservatives. David Kuo wrote *Tempting Faith* to tell conservative Christians that they were taken for a ride by the administration that derided them behind closed doors. Add to this Michael Goldberg’s *Kingdom Coming: The Rise of Christian Nationalism* and Randall Balmer’s *Thy Kingdom Come* and Kevin Phillips’ *American Theocracy*. Each put the religious right in their crosshairs and pulled the trigger.

Many of these books border on paranoia. Consider James Rudin’s book, *The Baptizing of America*. His opening paragraph says, “A specter is haunting America, and it is not socialism and certainly not communism. It is the specter of Americans kneeling in submission to a particular interpretation of a religion that has become an ideology, an all-encompassing way of life. It is the specter of our nation ruled by the extreme Christian right, who would make the United States a ‘Christian nation’ where their version of God’s law supersedes all human law—including the Constitution. That, more than any other force in the world today, is the immediate and profound threat to our republic.”

These comments move from anti-Christian bigotry to anti-Christian paranoia. Please, tell me who these dangerous Christian conservatives are so we can correct them. I interview many of the leaders and do not even hear a hint of this. If anything, these leaders want the judges to *follow* the Constitution not supercede it with another version (either

secular or Christian).

Rudin goes on to argue that these Christian leaders would issue everyone a national ID card giving everyone's religious beliefs. Again, who are these people he is talking about? Frankly, I have not found anyone that wants a national ID card (either secular or Christian).

Nevertheless, Rudin maintains that "such cards would provide Christocrats with preferential treatment in many areas of life, including home ownership, student loans, employment and education." And the appointed religious censors would control all speech and outlaw dissent. Do you know we wanted to do that?

Clearly we are moving into a time in which atheists see religion as full of error and evil. And Christian conservatives are especially being singled out because of their belief in the truth of the Bible.

Christians should respond in three ways. First, we must always be ready to give an answer for the hope that is in us (1 Peter 3:15) and do it with gentleness and reverence. Second, we should trust in the power of the Gospel: "I am not ashamed of the Gospel, because it is the power of God for all those who believe (Romans 1:16). Third, we should live godly lives before the world so that we may (by our good behavior) silence the ignorant talk of foolish men (1 Peter 2:15).
