

“What are the Best Scientific Evidences for a Young Earth/Old Earth?”

I read with great interest your article on the Origins Web site “[Christian Views of Science and Earth History](#).” I am doing research on this age issue, focusing on the scientific data especially. The earth is either young or is old. You said it well, “all truth is God’s truth.” I am looking for the best scientific evidences for a young earth/old earth and want to investigate what the other side would say to those opposing arguments. Can you help me out with this?

There are several books I can recommend.

From a biblical perspective, there is a recent volume titled *Three Views on Creation and Evolution* edited by J. P. Moreland and John Mark Reynolds in the Counterpoints series from Zondervan (1999). Hugh Ross has his *The Genesis Question* for an old earth perspective, and there is Henry Morris’s *The Genesis Record* and John Whitcomb’s *The Early Earth* from a young earth perspective.

From a scientific perspective, Hugh Ross wrote his definitive biblical and scientific treatise on the old earth called *Creation and Time* in 1994 from NavPress. Young earth creationists Van Bebbler and Taylor published a response titled *Creation and Time: A Report on the Progressive Creationist Book by Hugh Ross* also in 1994 from Eden Productions. ICR (The Institute for Creation Research) has published numerous technical monographs on a young earth which can be viewed and ordered at www.icr.org. Other young earth books, including Russ Humphrey’s *Starlight and Time* can be found there, as well as at the Answers in Genesis website, www.AnswersinGenesis.org. Hugh Ross’ organization Reasons to

Believe also has online ordering at www.reasons.org.

This should give you more than enough to get started on.

Respectfully,

Ray Bohlin
