

What Others Are Saying About Probe

JP Moreland

Distinguished Professor of Philosophy, Talbot School of Theology, Biola University.

In 1974, I was campus director for Cru at the University of Vermont. During the three years I was there, the invitation to have speakers from Probe Ministries in 1974 was the most important thing for impact we did. They lectured in several classes, spoke to evening crowds, and brought about a shift among students and faculty regarding their views of Christianity. Now, the faith was seen as rational, defensible, something to take seriously. I have been a big fan of Probe Ministries ever since that time. For decades, they have played a unique role, an indispensable role, in the body of Christ. And they have done so with integrity. I cannot adequately express my gratitude to God for this ministry, and it is an honor to be a fellow-soldier with Probe Ministries.
