

“Where Do Historians Refer to the Earth’s Darkness During the Crucifixion?”

I need some help finding where historians refer to the fact that the sky got totally dark and the stars came out when Jesus was crucified. I remember reading something from Julius Africanus, I think it was, who mentioned this fact, but now that I am looking for it I can’t find it. Didn’t Tacitus refer to Julius’ comment also?

The historian Thallus, in A.D. 52, wrote a history of the eastern Mediterranean since the Trojan War. Although his work is lost, it was quoted by Julius Africanus in about A.D. 221. This is mentioned by Gary Habermas in his 1996 book, *The Historical Jesus* (pp. 196-97). Lee Strobel has a brief section on this in his book *The Case for Christ* (pp. 84-85). The historian Edwin Yamauchi quotes from a footnote by Paul Maier in his 1968 book, *Pontius Pilate*, as follows: “Phlegon, a Greek author from Caria writing a chronology soon after 137 A.D., reported that in the fourth year of the 202nd Olympiad (i.e., 33 A.D.) there was ‘the greatest eclipse of the sun’ and that ‘it became night in the sixth hour of the day [i.e., noon] so that stars even appeared in the heavens. There was a great earthquake in Bithynia, and many things were overturned in Nicaea.’”

This, at any rate, should help you track down the source from Phlegon if you like.

Shalom in Christ,

Michael Gleghorn
